Sometimes a trip down memory lane refreshes the awareness of how far things have come in a relatively short time. When we consider that our hobby of AR is officially 100 years old and we have progressed from spark transmitters and coherers to software defined radios, seen the development of the thermionic valve and it's near demise and the invention of the transistor and its metamorphosis into the IC and the heart of any computer is packed with legions of dwarf semiconductors, it has been a fascinating ride, to say the least.

Over the last week I have been able to re-read Neville Williams "Australia's Radio Pioneers", published by "Electronics Australia",1994. Many of the names that we recognise from our hobby such as Ross Hull and John Moyle become more than just names on a contest. Much of the experimental work which brought about our country wide broadcasting and television services was done by radio amateurs, or licensed experimenters, as they were known in the foundation years of wireless.

So many of the notable experimenters of the past were also distinguished in their involvement with the Wireless Institute of Australia. Our hobby has traditions built on an historical base that we can be proud to uphold.

As Drew Diamond, VK3XU, points out in the second of his articles on 136kHz, in this month's "Amateur Radio" magazine it was the amateurs that made such big contributions to the understanding of long waves that were relegated to the supposedly unusable short waves. With VK Advanced Licensees now able to apply to once again use long waves, this could be the classic "everything old is new again".

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/
Redcliffe and District Radio Club

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

2 weeks ago at the club meeting, there were some surprise visitors to the club when Gary, VK4FGAZ with XYL, Anita and family. It was good to see them and Gary provided a good briefing to members about his set-up at his QTH in Stanthorpe.

Gary and daughter Lauren VK4FLMC have been putting out a big signal with a doublet antenna some 30 metres high. Gary also attributes the big signal to the fact of a great earthing system with a natural water table some 2 metres

below the surface of his land. Some of are very lucky with the location of their QTH!

At last Monday night's meeting Anita surprised us all with her second visit to the club within a week but this time without Gary who was setting up to pour the concrete slab for the new house.

Two weeks ago, Peter VK4EA and John VK4YJV attended the aviation Fly-in near Esk last weekend. Peter had his APRS system in place to show how aircraft could be tracked on the computer. Despite the heavy morning fog, many aircraft were able to fly in and with many visitors very interested in Peter's amateur radio set-up and with John providing detailed commentary of how the equipment actually worked.

Tomorrow, Monday night 14, the second Monday night of the month, is a general management meeting night and all members are invited to attend and have input to the running of the club.

The third Monday of the month is the well received Tech Talk and the next talk will be presented by Doug, VK4KZT, and the topic will be on the topic of metallurgy.

Club secretary Peter VK4TAA has also advised that the JOTA weekend is approaching fast and the club will be operating as a portable and field station at the Scout camp at Murrenbong near Petrie. Any amateur who would like to assist the club with the anticipated 400 scouts, cub, guides and rovers who will be visiting the site, should contact Peter, VK4TAA via the Redcliffe's club website.

So until next we meet, this is Ray Vk4CF and your listening to QNEWS via VK4WIA.

Invitation to a powerful seminar this Monday

The IEEE Northern Australia Section, IEEE Northern Australia Communication Chapter and the School of Engineering and Physical Sciences at James Cook University invite you to attend a technical seminar happening this Monday 14th September 2009 from 4 pm to 5 pm in Room DD014-001 (EL001), ground floor of the Electrical Engineering Building, James Cook University Douglas Campus.

This most powerful technical seminar is all about
HOW RELIABLE IS EARTH LEAKAGE EQUIPMENT WHEN
USED WITH VARIABLE SPEED DRIVES ?
and it will be given by Dr. Graham Woods of Orana Engineering.

Come along and find out how the usefulness of protective RCDs can be affected by Variable Voltage Variable Frequency drives used throughout industry to control high power electric motors.

Regular seminar attendees will be familiar with Dr. Woods background . He worked as a Lecturer at JCU for almost 20 years and was the Head of Electrical and Computer Engineering at JCU from 2004 to 2008. In 2009, he joined Orana Engineering as a Senior Electrical Design Engineer. Graham is the Vice Chairman of the Northern Australian section of the IEEE.

For further information please contact:
A/Prof. Keith Kikkert, Chair IEEE NA Section, Ph: 07-47814259, or
A/Prof. A Zahedi, Head Electrical and Electronic Engineering, JCU, Ph: 07-47816907

Give a ring straight after Don joins us!

GREETINGS ! THIS IS DON VK4FNQA WITH NEWS FROM NORTH QUEENSLAND.

I AM JUST RUMMAGING THROUGH ONE OF THE NORTH QUEENSLAND AMATEUR RADIO CONVENTION GOODIES BAGS THAT WILL BE GIVEN OUT TO THOSE LUCKY PEOPLE WHO REGISTERED FOR THE EVENT.

OOHH ! THERES THE LATEST JAYCAR CATALOGUE, THE ALTRONICS CATALOGUE SUPPLIED BY SOLEX, SOME THINGIES FROM NAVCOM AND - OOOOOH WHAT'S THIS? HMMM ! I BETTER NOT SPOIL THE SURPRISE !

I WILL SEE SOME OF YOU AT THE CONVENTION NEXT WEEKEND .

Programme

Friday Sept 18th
13-30 to 16-00 Set up at Uni
19-00 to 22-00 Meet and Greet at the Frog and Toad

Saturday Sept 19th
09-00 to 17-00 Trade Displays
09-00 to 10-30 Registration
09-00 to 12-00 Home Brew Contests Registration and Judging
10-30 to 11-30 Max Riley VK2ARZ presents - Solving the Antenna Conundrum
12-00 to 13-00 Lunch
13-30 to 15-30 A/Prof Keith Kikkert presents - Is BPL Dead ?
14-00 to 17-00 Ladies and Gents travel to and tour Townsville Museum
19-00 to 22-30 Convention Banquet and Presentations at the Frog and Toad

Sunday
08-00 to 10-00 Set up Monster Auction
09-00 to 11-30 Trade Displays
09-00 to 11-00 Ladies Group invade Willows Markets
09-00 to 11-00 Car Boot Sale
09-00 to 11-00 TARC presents the Clubs Forum
11-30 to 12-30 Lunch
12-30 to 16-30 Monster Auction and Mystery Pressie Auction
16-30 to 17-00 Clean up

THE TARC INC HAS THE SOCIAL EVENING HAPPENING THIS TUESDAY FROM 7-30PM AT THE CLUB ROOMS IN GREEN STREET WEST END. EVERYONE WELCOME TO COME ALONG AND HELP PUT THE MAGAZINE OF RENOWN - BACK-SCATTER - TOGETHER AND TO SOCIALISE !

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE, THIS IS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC.. IN CONVENTION MODE.... OF COURSE! AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

Now don't forget..for further seminar information please contact:
A/Prof. Keith Kikkert, Chair IEEE NA Section, Ph: 07-47814259, or
A/Prof. A Zahedi, Head Electrical and Electronic Engineering, JCU, Ph: 07-47816907

GB2RS NEWS

Sunday 13th September 2009

The news headlines

* RSGB represented at WRC Project Meeting

* Opportunity for a young amateur to join DXpedition

* GB4FUN visit Digicon 09 in Northern Ireland

As part of the CEPT preparation programme for WRC-12, a meeting of Project Team C will take place in Geneva from 16 to18 September. This team deals with, amongst other agenda items, AI 1.23, which is the amateur service proposal for a frequency segment around 500kHz. RSGB HF Manager and Region 1 LF Coordinator John Gould, G3WKL will attend as part of the UK delegation and Region 1 HF Chairman Ulrich Mueller, DK4VW will be in the German delegation. The CEPT coordinator for this agenda item is EC member Colin Thomas, G3PSM. During this meeting it is hoped to identify a specific frequency segment that can be presented to the WRC.

The operators of the 6Y1V contest station in Hopewell, Jamaica, are offering a young radio amateur the chance to join their team for the 2009 CQWW SSB or CW contest. Applicants must be age 21 or younger and the operator selected will receive an all expenses paid trip to join the team's operations in one of the two contest operations. To qualify, you must send an email to contest<at>6y1v.com containing an essay of 500 words or more, in English, describing how you got started in amateur radio, who guided you through the process and why you should be selected for this DX and contest opportunity at 6Y1V. Please include your full name, callsign and home address. The 6Y1V group calls this project a gift to a young amateur whom has a passion for ham radio, DXing and contesting. More information is on line at www.6y1v.com/youth.htm.

DiGIcon 09 will take place on Saturday 19 September at the Technology Education Centre, Spillers Place, Omagh, Tyrone BT78 1FA. Registration is from 11am and the registration fee is £2. The registration fee gets you an entry to the door raffle and raffle tickets for the main prizes are £1 each. The main prizes are an IC- E92D donated by Icom UK and a weather station from Waters & Stanton. Sponsors of the event include JBT Trading, TA Electronics, Icom UK, Waters & Stanton and Stephen Boyd

2nd hand radios. There will be lectures on D-Star, Satellite Communication, Digital ATV, Echolink and more. Other attractions are IC-E92D and IC-E2820 programming and GB4FUN. Further details from www.wtarc.co.uk.

An RSGB Train the Trainers session will take place at The Post Mill Community Centre, Market Street, South Normanton, Derbyshire DE55 2EJ, on 19 September. Note that this session is in addition to the Telford session on the same date. The Train the Trainers scheme helps tutors enhance the standard of their Foundation, Intermediate and Advanced licence courses. Alan Betts, G0HIQ and Brian Reay, G8OSN, will be presenting the all day course. For more information and to register, contact Jim, G0EJQ on 01522 532604 or by e-mail to g0ejq<at>rsgb.org.uk. For details of further Train the Trainers sessions, see the calendar at www.g8osn.org.uk.

Colchester Radio Amateurs are holding a Foundation licence course; two evening tutorial sessions take place on Wednesday 11 and 18 November. The practical activities and examination take place during the

2

day on Saturday 21 November. For further details contact Kevan, 2E0WMG, on 0776 6543 784 or by e-mail to colchesterradioamateurs@hotmail.co.uk.

The RSGB Convention takes place at Wyboston in Bedfordshire from 9 to 11 October. Both day tickets and overnight packages are still available. The programme is on the RSGB website and will also appear in the October RadCom.

Due to a change in their training programme Steve Hartley, G0FUW, and his team are to start their next Intermediate course in Bath sooner than expected. The classes will run from Thursday 17 September to Thursday 10 December between 7 and 9pm each week. The earlier start of the Intermediate classes also means that the next Bath Buildathon is likely to take place in late November or early December. The Buildathon may take place at the same time as the City's Christmas Market to provide a diversion for family members who are not so keen on learning about radio construction. Anyone interested in joining either the Intermediate classes, or registering an interest in the next Bath Buildathon should contact Steve on 01225 464394 between 7 and 9pm weekdays or via e-mail to g0fuw<at>tiscali.co.uk

21 September is the last date for advance ticket sales for the National Hamfest on 2 and 3 October. Organised by the RSGB in conjunction with the Lincoln Short Wave Club, the rally will take place at the Newark and Notts Showground. Advance tickets save £1 on the gate price of £4.50. See www.nationalhamfest.co.uk for full information.

And now for the details of rallies and events for the coming week

The Leicester Amateur Radio Show has its second day today, 13 September, at Loughborough University. For further information phone

01455 823344.

The Torbay Annual Communications Fair will take place today, 13 September, at Newton Abbot racecourse, Newton Abbot, Devon TQ12 3AF. Doors open at 10.30am with disabled visitors able to gain access half and hour earlier. Entry will cost £2 and there will be the usual trade stands, a Bring & Buy as well as catering facilities.

On 20 September the Hornsea Amateur Radio Club rally will take place at Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ. Doors open at 10.30am and admission is £2. Details from Rick, M0CZR by e-mail to R106221<at>aol.com or Duncan, G3TLI at g3tli<at>hotmail.co.uk.

20 September sees an Old Fashioned Rally take place at Detling, near Kent County Showground on the A249. There is a free car park, free admission, free tables and lots of giveaways from the estate of SK Ted, G3YCN. Talk-In via GB3KN. Details by e-mail to terry<at>chipperfield.name.

Now for the news of special events

The Science Museum base in Wroughton, Swindon will be running a Festival of Innovation on 12 and 13 September, opening 10am to 5pm each day. The Swindon & District ARC will be demonstrating amateur radio during the weekend and will be using the callsign GB2SM on 40 and 80m according to conditions. Further details about the event can be found from the club website and links to the Museum information site www.SDARC.net.

3

To commemorate the 150th anniversary of the birth of physician and Nobel Prize laureate Pierre Curie, look for TM150RPC to be active until 20 September on all bands and modes. QSL via F5KAZ.

On 13 September, listen out for GB2STI for Steam Trains Ireland from Whitehead and GB4WWM from the Wellesbourne Wartime Museum. Then on the 14th GB0SIS will be on the air from St Sampson Infant School in Cricklande. 15 September sees GB1NCC celebrating the Northallerton College Centenary.

There will be three stations on the air on 18 September. GG100GGR for Girl Guiding Renfrewshire, GB4BVF for the West Wight Carnival and GB0BSR from the Bedfordshire Steam Rally.

Finally for this week, 20 September sees GB4WLR on the air from the West Lancs Railway.

And now the HF DX news compiled from 425 DX News and other sources.

DL2JRM will be active on 14 and 15 September as TK/DL2JRM/P from San Cipriano, which is IOTA reference EU-164. He will be using the 40 to10m bands with QRP CW, using solar power. QSL direct or via bureau to DL2JRM.

Jon, M0OVL will be on the air /P from Inner Farne, IOTA reference EU-109, on 25 and 26 September. He is restricted to just 4 hours of operations each day between 1000 and 1400UTC. Activation is also dependent on the weather. More information at www.m0ovl.co.uk.

A group of operators from the Radio Club of Granville will be active from Saint-Nicolas Island, which is IOTA reference EU-094, between 11 and 18 September. They will operate CW, SSB and digital modes on the HF bands, with activity also on 6 and 2 metres. Expect them to be signing F5KAQ/P and homecall/P. QSL via F5RJM, either direct or via the bureau.

Now the contest news

The 51st Scandinavian Activity Contest CW leg takes place on between 1200UTC on 19 September and 1200UTC on 20 September. Using the 3.5, 7, 14, 21 and 28MHz bands, the contest exchange is signal report and serial number. Details can be found at www.qrq.se/sac.

The European PSK Club invites amateurs all over the world to participate in the CIS DX QPSK63 Contest 2009 on 19 and 20 September. All the information can be found at www.cisdx.srars.org. This is strictly a QPSK63 contest now, no other modes are allowed. The maximum output power is 100 watts.

The IARU International Amateur Television Contest takes place from 1800UTC on Saturday 12 September until 1200UTC on Sunday 13 September on all bands from 70cm upwards. Stations are encouraged to participate, or just look for increased amateur TV activity on these bands. Talkback is most likely to be found on 144.750 FM. Details of how to enter the contest can be found on the BATC website, www.batc.org.uk; entrants do not need to be BATC members.

15 September sees the UHF UK Activity Contest takes place between 1900 and 2130UTC on the 1.3 and 2.3GHz bands. The exchange is signal report, serial number and locator.

4

Now the solar factual data for the period from the 31st of August to the 6th of September, compiled by Neil Clarke, G0CAS on the 7th of September.

In its very basic form a sunspot or a sunspot group is the result of a magnetic disturbance on the Sun's surface known as the photosphere. As the magnetic disturbance intensifies it blocks the up flow of heat from the sun's interior. Therefore, sunspot groups are regions on the solar disc where the temperature is cooler than the surrounding surface. The Sun's normal surface temperature is around 5800 Kelvin's and the temperature at the centre of a sunspot could be down to around 4200 Kelvin's. According to measurements, sunspots seem to form only if the local magnetic field is stronger than about 1500 gauss. Recently it as been discovered that sunspot magnetic fields are dropping by about 50 gauss per year. If the current trend continues, we'll hit that threshold in the near future where solar magnetic fields would become

too weak to form sunspots by the year 2015. The technique is relatively new and the data stretches back for only 17 years. In fact, space weather scientists are evenly divided on whether this will even take place. We could only be observing a temporary downturn that will reverse itself in the near future allowing the new cycle to start in earnest. The drop in magnetic fields could be a normal aspect of the solar cycle and not a sign that sunspots are permanently vanishing. If sunspots do disappear, it wouldn't be the first time. In the 17th century, the Sun plunged into a 70-year period when the Sun almost became void of sunspots, which became know as the Maunder Minimum. The sunspot drought began in 1645 and lasted until 1715. Whether the current downturn is an omen for a long-term sunspot decline remains to be seen.

On the 31st, after 51 continuous days the smallest of sunspots groups appeared, however, that only lasted that day and the next. That was the fourth longest spotless period on record dating back to 1849. The Sun was then spotless again for the remainder of the period. Solar flux levels averaged 69 units and varied little day to day. The 90 day solar flux average on the 6th was 67 units. That's one unit down on last week. X-ray flux levels remained below the minimum reporting threshold. Geomagnetic activity was quiet everyday. The average was Ap 4 units. Solar wind speeds varied between 360 and 500 kilometres per second. Particle densities were low everyday. Bz varied no more than minus and plus 6 nanoTeslas for the period.

And finally the solar forecast. As this is compiled on the 7th there is no sign of an immediate up turn in sunspots and solar activity. The coming week is expected to see solar activity at very low levels. The solar disc could be spotless on most days. Solar flux levels should be in the high 60's. Geomagnetic activity is expected to be quiet today and maybe tomorrow, however, on Tuesday a coronal hole disturbance is expected to arrive. The disturbance should only be minor and last no more than 2 to 3 days. Quiet conditions should return before next weekend. MUFs during daylight hours at equal latitudes should be about 19MHz for the south and 16MHz for the north. Darkness hour lows should be around 9MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0800 and 1200 hours UTC.

And that's all for this week from the propagation team.

5

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 13 September Crawley Amateur Radio Club hosts the Microwave Roundtable. There will be presentations, demonstrations, component and equipment bargains. Visitors are welcome and light refreshments will be available. Contact John, G3VLH, on 01342 714 402. On Monday 14 September Coulsdon ATS is having a classic radios show and tell evening. Contact Andy, G8JAC, by email to g8jac<at>btinternet.com. On Monday 14 September Reading and District Amateur Radio Club commences its Advanced licence course. Contact g3ngx<at>radarc.org. On Tuesday 15 September Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 15 September Bromley and District Amateur Radio Society is having a new members evening. Contact Andy, G4WGZ, on 01689 878089.

On Tuesday 15 September Verulam Amateur Radio Club is having a visit by Chris Taylor of Martin Lynch and Sons. Chris will be handing over training equipment purchased with a Grass Roots Training grant. Contact Ralph, on 01923 265572.

On Wednesday 16 September Bracknell Amateur Radio Club is having its 2 metre local net on 145.375 FM. Contact Paul, M3XPR, by email to pryan<at>max.co.uk. On Wednesday 16 September Chesham and District Amateur Radio Society is having a DVD evening on modern aircraft avionics and the Garmin G1000. Contact Terry, G0VFW, on 01442 831 491. On Wednesday 16 September Crawley Amateur Radio Club is having a presentation on D-Star by David, G4ULF. Contact John, G3VLH, on 01342 714 402.

On Wednesday 16 September Dover Radio Club is having a natter and operating evening. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Wednesday 16 September Edgware and District Radio Society is visiting Bletchley Park. Contact Mike, G4RNW, on 020 8950 0658. On Wednesday 16 September Norfolk Amateur Radio Club is having a talk on Raynet and You by Steve, G7VAH. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 16 September Worthing and District Amateur Radio Club is having its construction contest. Contact Roy, G4GPX, on 01903 753 893. On Thursday 17 September Cray Valley Radio Society is having a surplus sale. Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm.

6

On Thursday 17 September Horsham Amateur Radio Club is having a social evening at The Fountain, Ashurst. Details on the web at www.harc.org.uk. On Thursday 17 September King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv<at>supanet.com. On Thursday 17 September Shefford and District Amateur Radio Society is visiting Astrium. Contact David,

G8UOD, on 01234 742 757. On Thursday 17 September Sutton and Cheam Radio Society is having a talk on military man-machine interfaces by Peter Skinner, G7MLJ. Contact John, G0BWV, on 020 8644 9945. On Friday 18 September Cambridge and District Amateur Radio Club is having a talk on antenna polar plot measurements by Mike, M0BLP. Contact David Leary, G8JKV on 01223 355254. On Friday 18 September Wey Valley Amateur Radio Group is having a visit by Rob Mannion, G3XFD, Editor of Practical Wireless. Details on the web at www.weyvalleyarg.org.uk. On Saturday 19 September Southdown Amateur Radio Society is operating in the British Wireless for the Blind event. Contact John, G3DQY, on 01424 424 319.

NEWS FOR THE SOUTH-WEST On Monday 14 September Cornish Radio Amateur Club is having a talk on digital cameras by Ian and Steve, G7VOH. Contact Steve, G7VOH, on 01209 844939.

On Tuesday 15 September West Devon Radio Club is having a Bring a Non-Radio Friend night. Contact Jules Cuddy, M1AGY, on 01752291588.

On Wednesday 16 September Southampton Amateur Radio Club is holding a reunion of past and present members. The club dates back before the World War II and over the years has gone through some changes. If you are or have been a member or would like to join the club please go along to the reunion night from 7pm onwards at the Lordshill Community Centre, Andromeda Road, Lordshill SO16 8BB. For more information contact Malcolm, G0WFQ on 023 8042 8113.

On Wednesday 16 September Exmouth Amateur Radio Club is having an operating and mystery night. Contact Mike, G1GZG, on 01395 274172.

On Wednesday 16 September Taunton and District Amateur Radio Club is watching a video by Bill, G0PNF. Contact William, G3WNI, on 01823 666 234.

On Wednesday 16 September Thornbury and South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417048.

On Wednesday 16 September Trowbridge and District Amateur Radio Club is having a natter night. Contact Ian, G0GRI, on 01225 864 698, E/W.

On Thursday 17 September South Bristol Amateur Radio Club is viewing photographs from members' archives. Contact Len, G4RZY, on 01275 834 282.

On Thursday 17 September Swindon and District Amateur Radio Club is having a talk by Richard Powell, M1CFW on the move to electronic ciphers after Enigma. Contact Den, M0ACM, on 07810 317750.

On Thursday 17 September Yeovil Amateur Radio Club is taking a practical look at how SSB works with G4GVM. Contact Steve Crask, G7AHP, by email to steve<at>g7ahp.co.uk.

7

On Friday 18 September Torbay Amateur Radio Society is having a natter night. Contact Dave, G6FSP, by email to g6fsp<at>tars.org.uk.

NEWS FOR THE MIDLANDS On Monday 14 September Gloucester Amateur Radio And Electronics Society is having a talk by Cliff, G8CQZ on PIC Basics. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 14 September Leicester Amateur Radio Society is on the air. Contact the duty committee member on 07804 595749.

On Monday 14 September Lincoln Short-Wave Club is having a natter night and is on the air. Contact Pam Rose, on 01427 788356.

On Monday 14 September South Birmingham Radio Society is on the air. Contact Don, on 0121 458 1603.

On Monday 14 September Stratford Upon Avon District Radio Society begins its new session. Contact G0CHO, on 01608 664488,.

On Tuesday 15 September Derby and District Amateur Radio Society is having a video show. Contact Richard Buckby, by email to radio<at>dadars.org.uk.

On Tuesday 15 September Loughborough and District Amateur Radio Club is having a skittle evening with food at the Griffin Inn, Swithland. Contact Chris, G1ETZ, on 01509 504 319.

On Wednesday 16 September Midland Amateur Radio Society is having a committee meeting and training classes. Contact Norman, G8BHE, on 01214 229 787.

On Wednesday 16 September South Notts Amateur Radio Club is having a talk on oscilloscopes by G4EDX. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc.

On Wednesday 16 September Telford and District Amateur Radio Society is having a talk and demo of building and tuning antennas by G0UFE. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 17 September Lowestoft and District Pye Amateur Radio Club is having a club night. Contact Phil, G0JSG, on 01502585448.

On Thursday 17 September Salop Amateur Radio Society is having a natter night. Details on the web at www.salop-ARS.org.uk.

On Thursday 17 September Tamworth Amateur Radio Society will be having a historic 16mm show presented by Ron, M0WSN. Details on the web at www.radioclubs.net/tamworthars.

On Friday 18 September Bromsgrove and District Amateur Radio Club is having a committee meeting. Contact Chris, M0BQE, on 01905 776 869.

On Friday 18 September Coventry Amateur Radio Society is having a video night. Contact John, G8SEQ, on 07958 777363.

On Friday 18 September Nunsfield House Amateur Radio Group is having a talk on the history and development of Heage Windmill. Contact Ken Frankcom, G3OCA, on 01332 720976.

On Friday 18 September South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 19 September Telford and District Amateur Radio Society is hosting a Train the Trainers course from 10 till 4. Contact Mike, G3JKX, on 01952 299 677.

NEWS FOR THE NORTH OF ENGLAND On Thursday 17 September North Wakefield Amateur Radio Club invites non members and members alike to a presentation on the Icarus high altitude balloon project by Robert Harrison, 2E0RJH. Details from Jim Thornton, G3YDL, by email to events@g4nok.org.

On Monday 14 September Bolton Wireless Club is having an introduction to the microwave bands by Ross, G6GVI and David, G4MVU. Contact boltonwireless<at>gmail.com.

On Monday 14 September Sheffield Amateur Radio Club is watching a YouTube video on connectors. Contact Trevor Wood, M0TWS, on trevorwood6<at>yahoo.co.uk.

On Monday 14 September Thornton Cleveleys Amateur Radio Society is having a talk on computers by John, M0JFE. Contact John Foster, M3WAZ, on 01253 399377.

On Tuesday 15 September Chester and District Radio Society is having a talk by Les green on working for Cable and Wireless in the Falklands in mid 1980's. Contact Barbara Green on 0151 339 9183.

On Tuesday 15 September Halifax and District Amateur Radio Society is holding its AGM. Contact Anthony Vinters, on 01422 822636.

On Tuesday 15 September Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 07852 200232.

On Tuesday 15 September Otley Amateur Radio Society Club is having a shack night. Contact Paul, 2E0PAK, on 07768 996370.

On Tuesday 15 September Warrington Amateur Radio Club is trying ARDF kits. Contact Roger, M0DWQ, on 07868 000 705.

On Wednesday 16 September Hornsea Amateur Radio Club is preparing for the Hornsea Rally. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 16 September Mid-Cheshire Amateur Radio Society is having a short talk by M0TLR on recording contacts into a database. Contact Peter Paul Fox, G8HAV, on 01606553401.

On Wednesday 16 September Otley Amateur Radio Society is taking part in the 2nd 70MHz Contest. Contact Paul, 2E0PAK, on 07768 996370.

On Thursday 17 September South Manchester Radio And Computer Club is having a talk on Norway and Spitzberg by Chris, G3UAU. Contact Ron, G3SVW, on 0161 969 3999.

On Friday 18 September East Cleveland Amateur Radio Club is having a technical forum. Contact Alistair, G4OLK, on 01642 475 671.

On Friday 18 September Tynemouth Radio Club is having a quiz night plus pie and peas. Contact Graham Errington, 07812 172136.

On Saturday 19 September Angel Of The North Amateur Radio Club commences its Advanced licence course. Contact Nancy Bone, G7UUR, on 0191 4770036.

On Sunday 20 September Hornsea Amateur Radio Club holds its rally at Floral Hall. Contact Gordon MacNaught, G3WOV, on 01377 240573.

9

NEWS FOR SCOTLAND On Tuesday 15 September Ayr Amateur Radio Group starts its new session with a group discussion. Contact Charlie, MM0GNS, on 01563 551704.

On Tuesday 15 September Livingston and District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192.

On Wednesday 16 September Kingdom Amateur Radio Society is having a presentation night. Contact Brian, MM0XBD, on 01383 738905.

On Thursday 17 September Aberdeen Amateur Radio Society is on the air and having a construction evening. Contact Lewis, GM4AJR, on 01224 575 663.

NEWS FOR WALES On Monday 14 September Llanelli Amateur Radio Society is having a club raffle and social night. Contact Craig, MW0MXT, on 01269 840292.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

==> NATIONAL SAFETY COUNCIL RESPONDS TO ARRL: NO EVIDENCE OF
"SIGNIFICANT CRASH RISKS" WHILE OPERATING MOBILE

ARRL President Joel Harrison, W5ZN, wrote a letter to National Safety
Council (NSC) President Janet Froetscher in July expressing the ARRL's
concerns that Amateur Radio not become an unintended victim of the
growing public debate over what to do about distracted drivers
<http://www.arrl.org/news/files/NSC_Letter7-30-09.pdf>. Froetscher has
now replied, saying the NSC does not support bans or prohibitions on the
```

use of Amateur Radios while driving
<http://www.arrl.org/news/files/NSC_Response_to_ARRL.pdf>.

Noting that there is significant evidence that talking on cell phones while driving poses crash risk four times that of other drivers, Froetscher observed that the NSC position calling for bans on the use of cell phones while driving is grounded in science. "We are not aware of evidence that using Amateur Radios while driving has significant crash risks," Froetscher wrote in her August 24 letter. "We also have no evidence that using two-way radios while driving poses significant crash risks. Until such time as compelling, peer-reviewed scientific research is presented that denotes significant risks associated with the use of Amateur Radios, two-way radios or other communication devices, the NSC does not support legislative bans or prohibition on their use."

Froetscher said that while "the specific risk of radio use while driving is unmeasured and likely does not approach that of cell phones, there indeed is some elevated risk to the drivers, their passengers and the public associated with 650,000 Amateur Radio operators who may not, at one time or another, not concentrate fully on their driving." She points out that the "best safety practice is to have one's full attention on their driving, their hands on the wheel and their eyes on the road. Drivers who engage in any activity that impairs any of these constitutes an increased risk."

ARRL Chief Executive Officer David Sumner, K1ZZ, said the ARRL "appreciates NSC President and CEO Janet Froetscher's clear statement that the NSC does not support legislative bans or prohibitions on the use of Amateur Radio while driving. We applaud the NSC for taking positions that are grounded in science. At the same time, all radio amateurs should heed her call to concentrate fully on driving while behind the wheel. It is possible to operate a motor vehicle safely while using Amateur Radio, but if it becomes a distraction we owe it those with whom we share the road, as well as to our passengers, to put safety first."

On January 30, 2009, the ARRL Executive Committee adopted the ARRL's Policy Statement on Mobile Amateur Radio Operation
<http://www.arrl.org/govrelations/MobileAmateurRadioPolicyStatement.pdf> that states "Amateur Radio mobile operation is ubiquitous, and Amateur Radio emergency and public service communications, and other organized Amateur Radio communications activities and networks necessitate operation of equipment while some licensees are driving motor vehicles. Two-way radio use is dissimilar from full-duplex cellular telephone communications because the operator spends little time actually transmitting; the time spent listening is more similar to, and arguably less distracting than, listening to a broadcast radio, CD or MP3 player. There are no distinctions to be made between or among Amateur Radio, public safety land mobile radio, private land mobile radio or citizen's radio in terms of driver distraction. All are distinguishable from mobile cellular telephone communications in this respect. Nevertheless,

ARRL encourages licensees to conduct Amateur communications from motor vehicles in a manner that does not detract from the safe and attentive operation of a motor vehicle at all times."

In his letter, Harrison explained to Froetscher that Amateur Radio operators provide essential emergency communications when regular communications channels are disrupted by disaster: "Through formal agreements with federal agencies, such as the National Weather Service, FEMA and private relief organizations, the Amateur Radio volunteers protect lives using their own equipment without compensation. The ability of hams to communicate and help protect the lives of those in danger would be strictly hindered if the federal, state and local governments to not ensure that Amateur Radio operators can continue the use of their mobile radios while on the road."

Froetscher replied that she "appreciate[s] your focus of Amateur Radio for emergency communications during disasters. I encourage ARRL to adopt best practices for the safe operation of vehicles that confines use of Amateur Radios while driving only to disaster emergencies."

The Policy Statement asserts that the ARRL "is aware of no evidence that [mobile] operation contributes to driver inattention. Quite the contrary: Radio amateurs are public service-minded individuals who utilize their radio-equipped motor vehicles to assist others, and they are focused on driving in the execution of that function."

==> AMATEURS WITH GENERAL CLASS LICENSES TO BE GRANTED RECIPROCAL LICENSES IN SOME CEPT COUNTRIES

On Thursday, September 10, the Federal Communications Commission released a new Public Notice implementing changes in CEPT reciprocal operating arrangements for US citizens who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio licenses. DA-09-2031 continues to allows US licensees "to utilize temporarily an amateur station in a European Conference of Postal and Telecommunications Administrations (CEPT) <http://www.cept.org/> country that has implemented certain recommendations with respect to the United States," subject to the regulations in that country and implements recent changes in the agreement <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-2031A1.pdf>.

When an Amateur Radio operator with US citizenship holds an Advanced or Amateur Extra Class license, they continue to be granted CEPT Radio Amateur License privileges in accordance with CEPT Recommendation T/R 61-01 (as amended) <http://www.erodocdb.dk/docs/doc98/Official/word/TR6101%20off%20140905.doc>. There is no change in reciprocity for those license classes. What has changed is that US citizens holding a General class license -- who had lost all CEPT reciprocal privileges in 2008 -- are now granted CEPT Novice Radio Amateur License privileges in accordance with ECC Recommendation (05)06 (as amended) <http://www.erodocdb.dk/docs/doc98/Official/word/Rec0506.doc>.

The Public Notice states that while operating an amateur station in a CEPT country, the person "must have in his or her possession a copy of this Public Notice, proof of US citizenship and evidence of an FCC-issued Amateur Radio license. These documents must be shown to proper authorities upon request." The Public Notice can be found online on the FCC's Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-2031A1.pdf>.

According to ARRL Regulatory Information Manager Dan Henderson, N1ND, the changes in the CEPT reciprocity are a two-part result of changes made by the European Communications Office (ECO) in February 2008 when they re-examined US license class equivalency in comparison to their HAREC examination contest. "The result of that review was full CEPT reciprocity was only granted to US Amateur Extra and Advanced class licensees, leaving US General and Technician class operators without CEPT reciprocal privileges." The new public notice now reflects that change.

"In order to re-obtain at least some limited privileges under CEPT for those class licensees, the ARRL approached the FCC, asking that the US consider accepting ECC Recommendation (05)06" Henderson continued. "Reciprocal agreements between the US and other countries are actually diplomatic arrangements and come about through the agreements through the State Department. In the winter of 2008/2009, the FCC followed up on our request and contacted the US Department of State, asking that the US formally approach the ECO with a request to become party to the recommendation."

At its meeting in late spring 2009, Henderson said that the ECO working group that handles issues pertaining to Amateur Radio accepted the US request to join ECC Recommendation (05)06, and authorized US General Class licensees to operate under that recommendation's terms. It did not extend those privileges to US Technician class licensees.

Henderson stated that it is important to note two things about ECC Recommendation (05)06: "First, not all European countries have implemented this recommendation. Therefore, a US General class operator does not have reciprocal privileges in many countries, including popular US travel destinations like Italy, the UK or France. Second, as with any reciprocal operation, the band frequencies and privileges are those allowed by your host country -- they are not the frequencies and privileges extended by your FCC license. Travelers need to make sure they are familiar with the authorized privileges for the CEPT Novice Radio Amateur License if operating using ECC Recommendation (05)06 or T/R 61-01."

CEPT countries participating in CEPT Recommendation T/R 61-01 as of September 10, 2009 include Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark (including Greenland and the Faroe Islands), Estonia, Finland, France (including Corsica, Guadeloupe, French Guyana, Martinique, St Bartholomew, St Pierre and Miquelon, St Martin, Reunion and its Dependencies, Mayotte, French Antarctica, French Polynesia and Clipperton, New Caledonia, and Wallis

and Futuna), Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Monaco, Netherlands, Netherlands Antilles, Norway, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, Ukraine and the United Kingdom(including Northern Ireland, the Channel Islands and the Isle of Man).

CEPT countries participating in ECC Recommendation (05)06 as of September 10, 2009 are Belgium, Denmark (including Greenland and the Faroe Islands), Germany, Iceland, Liechtenstein, Luxembourg, Netherlands, Portugal, Romania, Slovak Republic, Slovenia and Switzerland.

==> IARU, ARRL OFFICIALS ATTEND HAM FAIR, GAREC IN JAPAN

ARRL Chief Executive Officer David Sumner, K1ZZ, attended Ham Fair in Tokyo, Japan <http://www.jarl.or.jp/English/4_Library/A-4-6_ham-fair/ham-fair.htm>, August 22-23, at the invitation of Japan Amateur Radio League (JARL) President Shozo Hara, JA1AN. "Ham Fair is by far the largest event of its kind in Asia. It is generally regarded as one of the 'Big Three' internationally, the other two being Dayton and Friedrichshafen," Sumner said. "It is held at Big Sight, a very large and modern exhibition facility on Tokyo Bay. Most attendees come by train or subway." According to JARL, more than 31,000 people attended the two-day event, with more than 20,000 coming on the first day. The 2009 Global Amateur Radio Emergency Conference (GAREC) was held in conjunction with the event <http://www.rientola.fi/oh3ag/garec/index.html>.

Sumner said that IARU President Tim Ellam, VE6SH, was able to schedule a business trip to Tokyo to coincide with Ham Fair: "On Friday, IARU Region 3 Secretary Jay Oka, JA1TRC, and JARL staff member Mitsu Sugawara, JN1LQH, gave Tim and me a tour of JARL Headquarters. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, was already spending his second day at JARL HQ helping to check DXCC applications." Patton said he received more than 260 DXCC applications while in Japan.

On Saturday morning, Sumner and Ellam were invited to participate in the ribbon-cutting ceremony that marks the beginning of Ham Fair. "This is a rather elaborately staged event," Sumner recounted, "complete with white gloves, golden scissors and a bank of photographers. After the ceremony, and as thousands of patient attendees streamed into the exhibit area, Mr Hara led a group of us to the convention Special Event station 8J1A, where he made the first QSO. Then he led us to visit some of the commercial exhibitors." Sumner said he had the opportunity to operate 8J1A on 20 meter CW for 25 minutes. "The station had multiple operating positions and was quite busy throughout the show," he said.

On Sunday afternoon, Patton shared his ideas for rejuvenating college and university club stations as a means of reaching prospective hams. "This was well received by the Japanese hams in attendance," Sumner said. Yoshi Tsutsumi, JE2EHP/K1HP, provided interpretation.

On Monday, Sumner, Ellam and Patton attended GAREC-09; there were about 30 participants from 14 countries at the conference. Former IARU Region 3 Secretary Keigo Komuro, JA1KAB, chaired the meeting. "I was asked to chair the Statement Committee that was responsible for producing the GAREC Statement <http://www.rientola.fi/oh3ag/garec/index.html>, summarizing the conclusions and recommendations of the conference," Sumner said. "IARU International Coordinator for Emergency Communications Hans Zimmermann, HB9AQS, who did not attend this year's GAREC, had provided a draft as a starting point, and it was only necessary to tailor it to what we actually talked about."

Ellam returned to Canada on Monday afternoon, and Sumner and Patton stayed through the end of the conference on Tuesday afternoon and flew home on Wednesday. Sumner thanked his Japanese hosts, saying, "We are grateful for the extraordinary hospitality extended to us by JARL."

==> DELEGATES DESCEND ON TOKYO FOR GAREC 09

Officials from the IARU and all three IARU regions, national IARU Member-Societies and specialized Amateur Radio emergency communications groups from around the globe gathered in Tokyo on August 24-25 for the Fifth Global Amateur Radio Emergency Communications Conference (GAREC 2009) <http://www.rientola.fi/oh3ag/garec/index.html>. Hosted by the Japan Amateur Radio League, GAREC was held in conjunction with Ham Fair. More than 30 participants considered the statements from past GAREC conferences -- GAREC 05 (Tampere, Finland), GAREC 06 (Tampere, Finland), GAREC 07 (Huntsville, Alabama, USA) and GAREC 08 (Friedrichshafen, Germany) -- discussing the progress made on the implementation of the recommendations, and looking at recent experiences from exercises and actual emergency operations.

While GAREC is not a decision-making body, delegates made note of the relationships between the Amateur Service and organizations that are engaged in public protection and disaster relief, in particular the formal agreements and understandings that exist between the IARU and the United Nations, the International Telecommunication Union (ITU) <http://www.itu.int/>, and the International Federation of Red Cross and Red Crescent Societies (IFRC) <http://www.ifrc.org/>. They also looked at reports on recent emergency communications operations, specifically the earthquake disaster relief operations in Japan in 1995, China in 2008 and Italy in 2009, as well as the 2009 Australian bushfires. Delegates also took into account the reports on Global SETs, Center of Activity Frequencies, Automatic Link Establishment (ALE) <http://www.arrl.org/tis/info/ale.html> and emergency communications across international borders.

GAREC delegates requested that the ITU "continue to support the activities of IARU in facilitating the role of the Amateur Radio Service in emergency communications by fully implementing the provisions of Radio Regulations (RR) Article 25 <http://www.iaru.org/rel030703att2.html> as revised by the World Radiocommunication Conference (WRC-03, Geneva 2003) through the appropriate mechanisms of its Telecommunication Development Bureau and

to support national Administrations in such implementation." The part of Article 25 concerning Emergency Communications states: "Amateur stations may be used for transmitting international communications on behalf of third parties only in case of emergencies or disaster relief. An administration may determine the applicability of this provision to amateur stations under its jurisdiction" (RR 25.3), and "Administrations are encouraged to take the necessary steps to allow amateur stations to prepare for and meet communication needs in support of disaster relief" (RR 25.9A).

GAREC also wants the ITU to "continue to study the possibilities for the introduction of an International Amateur Radio License facilitating the work of Amateur Radio Service in international assistance and related training activities."

GAREC appealed to all of the IARU Member-Societies, as well as specialized emergency communications groups, to do the following:

* To establish close working relationships between the National IARU Member-Society and independent specialized Amateur Radio emergency communications groups in the respective countries, as well as to cooperate internationally.
* To request their national regulatory authorities implement the modifications to Article 25 of the Radio Regulations, particularly the regulations governing third-party traffic during emergencies and during training for emergency operations.
* To provide training in emergency communications to as many amateurs as possible in their respective countries, with particular emphasis on personal and logistical preparedness, psychological aspects of entering a disaster area, familiarity with the civil protection system in their country, communications techniques of particular value in emergencies and remembering that the skills developed in the amateur service can be of great benefit to disaster relief organizations in maintaining and operating their own telecommunications networks.
* Whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, Web sites, social networking and DX clusters to draw the attention of the largest possible number of Amateur Radio operators to ongoing emergency communications, in order to avoid interference with emergency traffic.
* To use their contacts with national regulatory authorities to encourage the accession to and implementation of the "Tampere Convention on the Provision of Telecommunication Resources for Disaster Mitigation and Relief Operations" <http://www.itu.int/ITU-D/emergencytelecoms/doc/tampere/S-CONF-ICET-2001-PDF-M07.pdf>. To date, 37 countries have adopted Tampere <http://www.reliefweb.int/telecoms/tampere/signatories.html>.
* To support the work of the IARU on an international Emergency Communications Handbook and to provide copies of existing agreements with institutional partners in emergency response, as well as copies of

emergency communication guidelines, manuals and checklists developed for national or local use as inputs to this work.
* To work toward the implementation of Memoranda of Understanding established between the IARU and ITU, IFRC, and the United Nations by seeking cooperation with the respective national institutions and organizations in their country.
* To continuously improve their awareness of the mission, vision and values of served agencies.
* To represent themselves as a human and technical resource able and willing to investigate the communication requirements of served agencies, offer recommendations when asked, and facilitate emergency communications when required.

GAREC called on the IARU to encourage its national IARU Member-Societies to "actively support the mission of Amateur Radio as an emergency communications resource." In the official GAREC Statement, delegates also stated that they would like to see the IARU support the following: The implementation of Article 25, the ongoing work toward an International Amateur Radio License, and the work and publication of the IARU Emergency Communications Handbook.

With respect to governments and telecommunication administrations, the conference would like these bodies to encourage joint training activities and exercises of Amateur Radio emergency communications groups and institutional providers of emergency response. Delegates recommend that GAREC conferences should continue to be held in locations throughout the world, maintaining the character of GAREC as an informal meeting among representatives of IARU Member-Societies and of Amateur Radio emergency communications groups, "serving as a forum for the exchange of experience and as an advisory body for the work on emergency communications of the IARU."

==> LOOK FOR THE OCTOBER ISSUE OF QST IN YOUR MAILBOX

The October issue of QST -- our second annual Radiosport issue -- is jam-packed with all sorts of things today's Amateur Radio operator needs, with a special focus on Amateur Radio contesting. From product reviews to experiments to public service, the upcoming issue of QST has something for just about everyone.

Kevin Kaufhold, W9GKA, takes a look at the highs and lows of the very high frequencies in his article "The Past, Present and Future of VHF Contesting." Scott Straw, KB4KBS/5, proves that everything is indeed bigger in Texas as he recounts his visit in "Multiop, Texas Style." And if you ever thought you needed to be a "big gun" to win wood in a contest, check out "How to Win the ARRL Sweepstakes with 11 QSOs" by John Kanode, N4MM.

In addition to the articles featuring contesting, ARRL Contributing Editor H. Ward Silver, N0AX, introduces QST readers to "The ARRL Handbook for Radio Communications, 2010 Edition." The 87th edition of this must-have book for radio amateurs has more than 1250 pages; of its

32 chapters, 16 have been completely revised or are altogether new, and another 12 have been updated. The 2010 Handbook features 70 percent new or updated material, including 50 percent new illustrations. The ARRL 2010 Handbook will be available for purchase from the ARRL Online Store beginning October 1.

ARRL Contest Branch Manager Sean Kutzko, KX9X, looks at VHF contesting, with a special focus on roving, in "This Month in Contesting." With so many amateurs living with deed restrictions, in apartments or dealing with other factors that prevent them from installing outdoor antennas, today's amateur needs to be a bit creative. If you can't operate from home, Kutzko suggests taking your station -- and your contest enjoyment -- on the road.

ARRL News Editor S. Khrystyne Keane, K1SFA, describes the events and decisions from the July ARRL Board of Directors meeting, and profiles the eight hams on whom the Board bestowed awards for 2008-2009.

If you're in the market for a new rig, be sure to check out October's Product Review: QST Assistant Editor Steve Sant Andrea, AG1YK, gives his take on FlexRadio Systems' FLEX-3000 software defined HF/50 MHz transceiver. In his review, Sant Andrea says "The FLEX-3000 is a compact software defined radio (SDR) in the mid-range price class. It can be used at home or paired with a notebook computer for operation on the go. Although it gives up some features compared to the FLEX-5000A, it doesn't give up much performance."

Of course, there are the usual columns that you expect in the October QST: "Hints & Kinks," "The Doctor Is IN," "How's DX," "Eclectic Technology," "World Above 50 MHz," "Hamspeak" and more. Look for your October issue to arrive soon. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please visit the ARRL Web page <http://www.arrl.org/join>.

==> GOVERNOR'S $250,000 GRANT TO AMATEUR RADIO GOES ONLINE AS OREGON HAMS INSTALL NEW WINLINK SYSTEM

This month, Oregon ARES members will complete the state-wide installation of Winlink <http://www.winlink.org/>, thanks to a $250,000 grant from Governor Ted Kulongoski. In 2007, the governor was impressed by the hams' ability to handle emergency communications when severe winter storms wreaked havoc on Oregon's North Coast and flooded the City of Vernonia, knocking out 911 services, Internet and phone service for an extended period of time <http://www.arrl.org/news/stories/2007/12/05/100/>. The Oregon Office of Emergency Management said that during the storms, the radio operators were "tireless in their efforts to keep the systems connected." When even state police had difficulty reaching some of their own troops, ham radio worked, setting up networks so emergency officials could communicate and relaying lists of supplies needed in stricken areas.

"I'm going to tell you who the heroes were from the very beginning of this...the ham radio operators," the governor said at the time. "These people just came in and actually provided a tremendous communication link to us." Because of the service rendered by Amateur Radio operators in providing communications support, the governor allocated funds for the installation of a Winlink system to integrate Amateur Radio with the Internet.

The equipment will be installed in the Emergency Operating Center in each of Oregon's 36 counties. Once the monies were distributed, ARES members researched and purchased the equipment that would be needed, formalized and signed contracts between the state, counties and ARES, and allocated space to install the antennas and equipment within each EOC. The project is scheduled to be completed in time for the 2009 ARRL Simulated Emergency Test (SET) scheduled for October 3-4 <http://www.arrl.org/FandES/field/setguide.html>.

"Using Winlink equipment and other amateur equipment already in place at the EOCs, ARES teams will have to quickly create a communications network, in some instances without depending on other infrastructure such as telephones or Internet," said ARRL Oregon Section Public Information Coordinator Steve Sanders, KE7JSS. "Many will not use commercial electric power. Despite these limitations, the ARES teams should not only be able to quickly pass local messages, but also communicate with other regions of the country. The ability to pass information in and out of disaster areas is crucial to the effectiveness of emergency responders."

When Oregon's State Office of Emergency Management was activated on December 3, 2007 <http://www.arrl.org/news/stories/2007/12/13/101/>, hams over the course of the next four days used Winlink to pass message traffic. "The Winlink system performed perfectly, and the ARES team at the OEM was able to pass approximately 200 messages into and out of the State of Oregon Emergency Operations Center," said Marion County ARES Emergency Coordinator Dean Davis, N7XG. "The only mode of communications for several Oregon counties for the first two days of the storm was the Winlink system."

==>SOLAR UPDATE

Tad "Who loves to peer up at the morning Sun" Cook, K7RA, this week reports: No new sunspot activity this week, and no emerging sunspots are visible on the far side of the Sun. Sunspot region 1025 (or 11025) that appeared over August 31 and September 1 faded more than a week ago, and the area in which it appeared has just rotated over the Sun's western limb. Sunspot numbers for September 3-9 were 0, 0, 0, 0, 0, 0, and 0 with a mean of 0. The 10.7 cm flux was 68.6, 68.4, 68.5, 69.2, 68.8, 68.9 and 69.2 with a mean of 68.8. The estimated planetary A indices were 4, 5, 2, 3, 3, 2 and 1 with a mean of 2.9. The estimated mid-latitude A indices were 4, 4, 2, 2, 3, 2 and 3 with a mean of 2.9. The average daily solar flux for this week was up slightly, just 0.7 points, to 68.8. Geomagnetic A indices were quieter, with last week's average daily planetary and mid-latitude A index at 5.7 and 4.1

respectively, while both numbers dropped to 2.9 for this week. The planetary A index is projected to be 5 for today through September 14, then 8 for September 15-18. Solar flux is expected to be 69 for today and tomorrow, then 68 for September 13-19. Geophysical Institute Prague predicts quiet conditions for September 11-12, quiet to unsettled on September 13, 15 and 17 and unsettled on September 14 and 16. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by John Keats' "On Leigh Hunt's Poem, The Story of Rimini" <http://www.litscape.com/author/John_Keats/On_Leigh_Hunts_Poem_The_Story_of_Rimini.html>.

==>IN BRIEF:

* This Week on the Radio: This week, look for the ARRL September VHF QSO Party September 12-14. There are two NCCC Sprints this week -- one on September 11 and another on September 12. The WAE DX Contest (SSB), the Arkansas QSO Party and the FISTS Get Your Feet Wet Weekend are September 12-13. The North American Sprint (CW) and the SKCC Weekend Sprint are both September 13. The NAQCC Straight Key/Bug Sprint is September 17. Next week is the ARRL 10 GHz and Up Contest on September 19-20 (local time). Look for two more NCCC Sprints this week, one each on September 18 and 19. The Feld Hell Sprint is September 19. The South Carolina QSO Party, QRP Afield, the Washington State Salmon Run, the QCWA Fall QSO Party and the Scandinavian Activity Contest (CW) are all September 19-20. The North American Sprint (SSB) is September 20. The Run for the Bacon QRP Contest and the 144 MHz Fall Sprint (local time) are September 21. The SKCC Sprint is September 23. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, September 20, 2009, for these online course sessions beginning on Friday, October 2, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the

course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* HR 2160 Gains Three More Cosponsors: On September 10, three more Congressmen -- Geoff Davis (R-KY-4), Bill Posey (R-FL-15) and Michael Turner (R-OH-3) -- pledged their support for HR 2160 <http://www.thomas.gov/cgi-bin/query/z?c111:H.R.2160:>, The Amateur Radio Emergency Communications Enhancement Act of 2009, bringing the total number of cosponsors to 24, including original sponsor Sheila Jackson-Lee (D-TX-18) <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1>. HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), John Boozman (R-AR-3), Madeleine Bordallo (D-Guam), Bob Filner (D-CA-51), Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey (D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Zoe Lofgren (D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Charlie Melancon (D-LA-3), Dennis Moore (D-KS-3), Bennie Thompson (D-MS-2), Peter Welch (D-VT), David Wu (D-OR-1) and Don Young (R-AK). Visit the ARRL Web site for information on how to encourage your Congressional representative to sponsor HR 2160 <http://www.arrl.org/news/stories/2009/05/12/10818>.

* Faster Than a Speeding Pigeon?: In South Africa, an information technology company proved that it was faster for them to transmit data with a carrier pigeon than to send it using Telkom, the country's leading Internet service provider. Internet speed and connectivity in Africa's largest economy are poor due to a shortage of bandwidth and its high cost. Local news agency SAPA reported that on September 9, an 11 month old pigeon named Winston took 68 minutes to fly the 50 miles from Unlimited IT's offices near Pietermaritzburg to the coastal city of Durban with a data card strapped to his leg. Including downloading, the transfer took two hours, six minutes and 57 seconds -- the time it took for only four percent of the data to be transferred using a Telkom line. SAPA said Unlimited IT performed the stunt after becoming frustrated with slow internet transmission times. The company has 11 call centers around the country and regularly sends data to its other branches. Internet speed is expected to improve once a new 11,000 mile underwater fiber optic cable linking southern and East Africa to other networks becomes operational before South Africa hosts the soccer World Cup next year.

* FCC Chairman Announces Enforcement Bureau Chief: Federal Communications Commission Chairman Julius Genachowski announced on September 9 that he has appointed P. Michele Ellison as Chief of the

Enforcement Bureau. Ellison will take the helm of the Enforcement Bureau starting on September 28, 2009. "Protecting and empowering consumers through effective and timely enforcement of the Commission's rules and policies is a top priority for the FCC," said Chairman Genachowski. "Michele is a talented leader with vast communications experience and sound legal judgment, and I look forward to working with her in her new capacity."

==========

The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

2264. Saifee Durbar and Bovis Lend Lease: Using Saudi Arabia as a Housing Laboratory

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-12 13:00:50 UTC
From: Saif Durbar <saif.durbar@yahoo.com>
Message-ID: <b4d31c04-6503-4692-8af4-7fa972198d28@x37g2000yqj.googlegroups.com>
Source record: 6378
Cross-posted to: misc.invest.futures,rec.food.cooking,rec.crafts.marketplace,rec.radio.shortwave,rec.radio.amateur.misc

BOVIS LEND LEASE, the construction group, has teamed up with the British architect behind London’s “erotic gherkin” office skyscraper on a $13 billion (£7.4 billion) plan to build 750,000 new homes in Saudi Arabia.

The pair are working with Saudi Construction Group, a new company backed by some of the Kingdom’s richest businessmen, to develop a huge site about three miles outside the capital, Riyadh. The backers plan to float the group — which could be worth about £1 billion — in London or Riyadh by the middle of next year.

The company is the brainchild of Saifee Durbar, a broker to Saudi billionaires investing in Europe, Paul Bloomfield, the veteran property dealmaker, and Sheikh Faisal al-Sharif, chairman of DGI, a company that is researching a $2 billion (£1.1 billion) petrochemicals plant in Saudi Arabia.

The Saudi Construction Group is designed to cash in on the Saudi Government’s plans to provide a home for every Saudi citizen. The Saudi Government believes that there is a need for between three and four million new homes over the next ten to fifteen years.

The oil-rich country currently houses more than 26 million people but is one of the world’s fastest-growing countries.

Foster & Partners, the architect behind Swiss Re’s landmark office building near the Tower of London, dubbed the “erotic gherkin” will create a master-plan for the huge housing settlement. The site totals seven million square metres and will accommodate about 750,000 new homes.

Bovis Lend Lease will be the lead contractor for the project, which will cost between $6 billion and $7 billion and will be worth between $10 billion and $13 billion when complete.

Foster & Partners is keen to create a ground-breaking development that provides new high standards of modern living in Saudi Arabia.

Foster & Partners has created some of the world’s most impressive modern architecture, including the glass dome over Berlin's Reichstag, Hong Kong’s airport and Bilbao’s new Metro. Nigel Hugill, the former managing director of Chelsfield, the property company formed by Elliott Bernerd, was instrumental in getting Bovis Lend Lease involved with the Saudi housing project.

Saif Durbar, who helped to set up the Saudi Construction Group, is a low-profile Middle Eastern businessman who has helped to fund a string of property development projects in Britain and mainland Europe, including Palm Beach, a casino and hotel complex outside Cannes. He lost a $1 billion fortune in 1995 on a bond deal that went wrong.

Details can be found at:

http://businessdistress.wordpress.com/2009/08/21/saifee-durbar-case-study-in-recovery/

He is also planning to build a railway linking Cameroon and Sudan. This will enhance African self-sufficiency as it will use minerals and other raw materials from the Central African Republic. The eastern terminus in Sudan will also provide a source of aid for the people in Darfur.

2265. SARL NEWS SUNDAY 13 SEPTEMBER 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-12 19:00:12 UTC
From: website@sarl.org.za
Message-ID: <20090912190005.C324333CC0@panix2.panix.com>
Source record: 6379
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS SUNDAY 13 SEPTEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail. Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

SILENT KEY

It is with regret that we announce the passing of Nico Smit, ZS6ATP, of Pretoria after a long illness. We extend our sincere condolences to his wife, family and friends.

(Pause)

In the news today.

SUMBANDILASAT READY FOR LAUNCH

SARL, SCI-BONA AND THE GAUTENG DEPARTMENT OF EDUCATION SIGN A MEMORANDUM OF AGREEMENT

SARL AND ICASA MEETING

HAMNET ACTIVITY IN EKURHULENI

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SUMBANDILASAT READY FOR LAUNCH

In two days time SumbandilaSat is due to be launched from Baikonur in Kazakhstan. The SA AMSAT web at www.amsatsa.org.za will be updated as information become available. There is a nice picture of the satellite mounted on the launch platform just below the main payload.

SARL, SCI-BONA AND THE GAUTENG DEPARTMENT OF EDUCATION SIGN A MEMORANDUM OF AGREEMENT

On Friday SARL President, Rassie Erasmus, signed a memorandum of agreement with the Sci-Bona Science Discovery Centre and the Gauteng Department of Education to facilitate the introduction of amateur radio as a curriculum subject in grade 10 -12 of technology high schools. In 2010 a pilot will be run in 25 Gauteng schools. Learners will work towards a ZU licence. The SARL is working with the department and Sci-Bona to develop a module system which will cover the class B syllabus.

A number of teachers have already been trained and on Friday wrote the class A exam. As part of the project it is hoped to equip the pilot schools with amateur radio stations to also teach learners the practical aspect of amateur radio. More details will be given in future editions of SARL news.

SARL AND ICASA MEETING

On Thursday last week the first of regular quarterly coordination meetings between ICASA and the SARL was held at the authoritie's head office. The meeting was a long time in materializing as the basic agreement to set up a permanent liaison committee was reached in February 2008. The SARL was represented by Hans van de Groenendaal, ZS6AKV, and Mark Zank, ZS6YES.

A number of issues affecting amateur radio were discussed and will be further explored at the next meeting in November. ICASA informed the SARL that it was working on a revision of the radio regulations as part of a project to bring regulations in line with the electronic communications act. The SARL will in the next few months have an opportunity to comment on the new draft when it will be made public.

On the question of licence fees, ICASA had taken note of the SARL objections and suggestions but no final decision of the restructuring of license fees had been made. The proposals are still in committee stage.

South Africans will soon get access to the LF spectrum on 135,7 - 137,8 kHz. ICASA has agreed the implementation the WRC07 recommendations and has started the process of having a Government Gazette published.

ICASA has accepted a proposal by Mark Zank that in future all certificates and copies of certificates will be authenticated by the SARL, using a security embossing stamp. ICASA had requested the SARL to devise a procedure that would ensure that only authentic documents are submitted as part of the licensing arrangement.

HAMNET ACTIVITY IN EKURHULENI

Amateur radio played its part in the Walk Against Crime in Eastleigh Edenvale.

The event was organized by Edenvale SAPS and Mumba Security in conjunction with Hamnet Gauteng South Region and DMSCV Members. The walk started from the Eastleigh Spar.

Devan, ZR6DAN, Mario, ZU6TAN, and Stephen, ZS6SKY, represented the units and handled all the communications at the event. Howard, ZS6ZS, was in contact with the members from a base station for back up comms if needed.

Inspector Jean Okkers from Edenvale SAPS and various other SAPS members including the station commander and head of the CPF, Mumba Security members and STS members acknowledged the ability of the units to assist with the command and control of the event. It is a pity that the event was poorly supported by the public, but, better advertising will be made use of for the next event. Inspector Okkers of the Edenvale SAPS strongly commended the members in attendance and was impressed by the professional and smooth handling of the event. We thank the members for their time and dedication and would welcome any interested members. Please note that the members also involve themselves in a lot of community events.

Hamnet Gauteng South and Ekurhuleni Disaster Management Specialized Communication Volunteers will be holding a training exercise named "Hurry up and Wait" on Saturday 19 September 2009.

The event is organized by members of the units to test the readiness of the members and the ability to deploy and activate mobile and field stations while under pressure, in preparation for the 2010 events.

Amateurs are invited to monitor the local repeaters, but are asked not to interfere with the broadcast of messages. Some strange events will be transmitted and again listeners are asked not to start phoning the local authorities. They have been informed and will be part of the exercise.

Interested amateurs please contact Howard Ware, ZS6ZS, 083-258-5045 or on email seclex@gmail.com.

CONTEST NEWS

The Spring QRP Sprint will be run this afternoon, 13 September, from 14:00 to 16:00 CAT with CW and phone activity on 40 metres. The exchange is a RS(T) report and the year first licensed. Try and work South Africa at the lowest power setting your radio has.

The provisional results of the SARL HF Phone contest will be released soon. Some logs were received that did not conform to Rule 4 of the General Contests Rules. After discussion with the SARL Council, it was decided to ask these radio amateurs to correct their log submissions and re-submit the logs or these logs will be re-classified as check logs.

The second leg of the SARL VHF/UHF Contest will be on the air on the weekend on 18 to 20 September. There are two contests on that weekend - the digital contest runs from Friday evening 18 September until Sunday 20 September, while the analogue contest runs on Saturday 19 and Sunday 20 September.

The rules are available in the 2009 SARL Contest Manual which can be downloaded from www.sarl.org.za.

The frequencies to be used for the Heritage Day Sprint on 24 September are 7,000 to 7,025 MHz for CW and 7,060 to 7,100 MHz and 7,130 to 7,200 MHz for phone.

Submit logs to The Sasolburg Amateur Radio Club ZS4SRK, PO Box 28194, Sonlandpark, 1944 or via email to riaanzs4pr@gmail.com.

The closing date for log submissions is 6 October 2009.

The second leg of the SARL VHF/UHF Contest will be on the air on the weekend on 18 to 20 September. There are two contests on this weekend - the digital contest runs from Friday evening 18 September until Sunday 20 September, while the analogue contest runs on Saturday 19 and Sunday 20 September.

The rules are available in the 2009 SARL Contest Manual which can be downloaded from www.sarl.org.za

CLUB NEWS

At the AGM of the Bloemfontein Radio Amateur Club held on 5 September, the following committee was elected: Chairman: Andre van Rensburg, ZS4APA; Vice Chairman: Martin Schwella, ZS4MS; Treasurer: Hennie Greyling, ZS4HG; Secretary: Reinette Esterhuizen, ZU4R; Members: Victor Reitz, ZS4VR, and Deric Smith, ZS4OH.

Dennis Green, ZS4BS, was thanked for his 20 years of service on the committee of the old Bloemfontein Branch and Bloemfontein RAC.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at a minimum. The visible solar disk is void of any sunspots. Solar activity is at some of the lowest levels ever recorded.

20 and 40 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoon onwards. During the late afternoon and early evenings it will be good towards the North. In the morning it may be possible to make contacts with Australia. Contacts with New-Zealand may be possible on 40 m during the evenings. During the early mornings and evenings 40 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

13 September - Spring QRP Sprint; 15 September - Launch of SumbandilaSat; 18 to 20 September - SARL VHF/UHF Contests; 19 September - Hamnet Gauteng South and Ekurhuleni DMSCV training exercise; 24 September - Heritage Day sprint; 24 September - Deadline for entries for the October RAE; 6 October - Logs for Heritage Day sprint to be in to riaanzs4pr@gmail.com.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Roger, ZR3RC, and edited by George, ZS6NE.

Thank you for listening, 73.

Theory Examination

It is now only one week to the closing date for entry
to the next Theory Examination on October the 6th.

Intending candidates should send the appropriate entry
fee as soon as possible but in any event before 21st of
September. Full details are on a link from the 'Key
Clicks' section of the IRTS website at www.irts.ie

Skerries Radio Club

The Skerries Radio Club, EI2NCR has returned back from
their summer break.

Meetings are held each Tuesday night at 8pm in
their premises on the Strand Road in Skerries. All
are welcome.

Limerick Radio Club

The Limerick Radio Club wishes to announce that the 2
Metre Repeater will be undergoing maintenance in the
next few weeks and may be out of commission
sporadically to facilitate the work being undertaken.
It is hoped that outages will be kept to a minimum
while these improvements are being implemented.

As part of this work, the call-sign is being changed as
required under the revision of repeater call-signs by
ComReg. It is expected that the new ID for the repeater
- EI2TAG will be in operation over the coming days.

HF Propagation Predictions

A UK HF Propagation Predictions page is now available
on the RSGB website.

The prediction table is prepared by Gwyn Williams, G4FKH, from Chelmsford in Essex, using a prediction model programmed by VE5ZX.

The predictions have been produced with the "average" Radio Amateur in mind, based on an average radio with a dipole type aerial, in a quiet urban environment.

Clicking on a path name will produce an Optimum MUF / Lowest Usable Frequency graph, depicting the two best bands for the path.

When an unreliable path is suspected, the LUF graph line falls to zero and disappears.

There is a text file available for the vision impaired.

The UK HF Propagation Predictions page can be seen at http://www.rsgb.org.uk/propagation/

Are Sunspots Disappearing!

There are some interesting Items on the Nasa Science Website, that can either be read or listened to, including an interesting item on a new sunspot that is fading already

Ohio/Penn DX Bulletin No. 925

The Ohio/Penn DX PacketCluster
DX Bulletin No. 925
BID: $OPDX.925
September 14, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, AA3B, NG3K, N4AA & QRZ DX, KH6BZF, W7LFA, K8YSE, KI8L, A35RK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, IK7JWX, IZ8CCW, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) YT3W, and the Algarve STAR DX Team for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-September, through Sunday, 13th-September there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6Y, 7O, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A4, A6, A7, A9, AP,, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T30, T5, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. Alex, GM0DHZ/AA8YH, informs OPDX that he is returning here November 16th for 5 weeks. He plans to be active on CW on the weekends from 3V8SS. He also adds that he is willing to accept skeds from "QRP" operators/stations, either CW or SSB. They can contact him via his E-mail address listed on QRZ.com. However, Alex has reminded us that it's a

holiday trip by his XYL.

4W6AL UPDATE. The Algarve STAR DX Team reports that a new video of 4W6AL recorded on September 11th, in the south of Portugal, is available, as well as the 4W6AL log is updated online at: http://algarvedx.com
PLEASE NOTE: QSL Manager/Pilot Station Toze, CT1GFK, reports that some 100 stations worked a PIRATED 4W6AL station on September 12th! Only four stations worked the actual 4W6AL station. Check the log before QSLing.

5B, CYPRUS. Zoli, HA5PP, will once again be active as 5B/HA5PP during both the CQWW DX SSB Contest (October 24-25th) and CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (TBD) entry. QSL via HA5PP.

5R, MADAGASCAR (AF-013). Daniel, DF8UO, will once again be active as 5R8UO from here between now and September 20th. Activity will be mainly CW and the Digital modes on 40-10 meters. QSL via his home callsign, direct or by the Bureau. He is expected to upload his log to LoTW.

8Q, MALDIVES (Update). Andrew, G7COD, will once again be active as 8Q7AK from
Embudu Village, Embudu Island (AS-013, WLOTA L-3911), between October 12-25th. Activity will be on 80-12 meters including 30/17/12m using CW and SSB. Operating schedule (everyday) is as follows: 0730-0830z, 0900-1030z, 1300-1500z and 1730-1800z. Suggested frequencies are:
CW - 3503, 7003, 10103, 14003, 18073, 21003 and 24893 kHz
SSB - 3795, 7063, 14147, 18133, 21253 and 24953 kHz
Andrew's operating conditions will be very simple consisting of 100 watts PEP from an Icom IC 7000 transceiver, MFJ 929 Auto ATU, switch mode power supply and Vibroplex mini straight morse key. The antenna is a Radio Works CWS 160 Carolina Windom sloping from 20-12 meters suspended from the tops of the coconut palms approximately 10 meters from the sea. QSL via his home callsign, direct or by the bureau. Andrew now has a dedicated Web page at: http://8q7ak.freewebspace.com

8Y, GUYANA. Members of the "Amateur Brazilian Team" will be active as 8R1PY from Lethem, Guyana, between October 31st and November 4th. Activity will be on 160-6 meters, including 30/17/12 meters, using CW, SSB, RTTY and PSK31. Operators mentioned are Edi/PU8TEP, Abilio/PV8AZ, Paulo/PV8DX, Ivan/PV8IG, Ivan/PY1YB, Anderson/PY2TNT and Alex/PY2WAS. QSL via PY2WAS.

A3, TONGA (News). Paul Kidd, A35RK, provides the following special announcements by the Tonga Ministry of Communications and Information dated September 8th):

#1] "Today, the Radio Licensing Officer for the Kingdom of Tonga, Fe'ao Vakata, has authorized amateur radio operation on the 60 Meter Band (5.330 - 5.405 Mhz), on a secondary, restricted basis.

The 60M bandplan will be the same as is authorized by the FCC, i.e. 'channelized' on the following frequencies only, USB only, 2.8 kHz maximum bandwidth, with a 50 watt pep ERP limit:

Channel Center Amateur Tuning Frequency
------------- ----------------------
5332 kHz 5330.5 kHz
5348 kHz 5346.5 kHz
5368 kHz 5366.5 kHz
5373 kHz 5371.5 kHz
5405 kHz (common US/UK) 5403.5 kHz
This 60M authorization is effective immediately."

#2] "Effective immediately, the 40 meter band allocation has been expanded. A3 licensees are now permitted to operate from 7.0 to 7.2 MHz."

Paul states, "The previous upper band edge was 7.1 MHz, so our 40M band just doubled in size! This additional allocation will allow us to work U.S. stations without having to work 'split'.

The 7.2 -7.3 MHz segment may be opened later, on a secondary use basis. The IARU Region 3 Bandplan permits this, but for the time-being, we will gladly content ourselves with the additional 100 kHz.

Many thanks to Fe'ao Vakata, the Radio Licensing Officer, for his efforts in revising and updating the amateur radio regulations here in Tonga."

ACTIVATING A RARE IOTA (Interesting Story). Cezar, VE3LYC, last week(end) activated the Ottawa Islands (NA-230) as VY0O which turned out to be a big adventure for him (bad weather, polar bear, boat problems (engine, back engine and sinking). However, he made a total of 3000 QSOs with stations on all continents. About 53% of the contacts were on CW, 47% on SSB. Read his interesting story at: http://www.qrz.com/db/vy0o

AFRICAN TOUR (6W, J5 and IOTAs). Laci, HA0NAR, will be heading to western Africa in early 2010, and plans to be there at the end of January through the end of February. He plans to visit and activate Senegal (6W) and Guinea-Bissau (J5). Tentative dates and callsigns are as follows:
Senegal (6W) - Callsign 6W/HA0NAR; January 27th through February 10th
Guinea-Bissau (J5) - Callsign J5NAR; February 11-21st
Laci is also planning to activate the following IOTA groups:
AF-078 - Senegal South Group
AF-093 - Guinea-Bissau Coastal Region Group
Look for more details to be forthcoming.

ANTARCTICA (IOTA) ACTIVITY. Mehdi, F5PFP, who did an Antarctica cruise/ expedition in the beginning of the year, reported that his good friend Pupi, LU8XP, advised him that a group of hams with Pedro, HK3JJH, are preparing an expedition to the Chilean sub-antarctic territories of the Wollaston Islands (SA-031) and Diego Ramirez Islands (SA-094) in 2010 or perhaps 2011. Pupi might be in charge of the logistic support at Ushuaia like he already made for several other expeditions. Stay tuned for updates.

BX5, TAIWAN. Jimmy, BX5AA, will be active during the CQ World Wide DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. Jimmy states that BX5 is a rare prefix for Taiwan (CQ 24). QSL via BX5AA. Visit his Web page at: http://blog.yam.com/bx5aa

FT/G, GLORIOSO ISLAND (Update). By the time you read this, the FR5GA team is expected to depart from Reunion Island on September 14th, and after some final checks with the TAAF authorities, the team will head to Glorioso Island via Mayotte Island. First signals from FR5GA are expected to be Tuesday or Wednesday (September 14th or 15th). Pictures of the teams departure are available already on the Web at: http://picasaweb.google.fr/MauriceF5NQL/DepartGlorieuses2009#
The team is expected to be there for about three weeks. QSL via F5OGL, direct or by the Bureau. For more information, updates and suggested frequencies, visit their Web page at: http://glorieuses2008.free.fr
ADDED NOTE: In a press release, it was reported (edited): "Someone said that there is no pilot station for the west coast of Americas; that's not completely true. In fact some hams offerred to help us, but they cannot be QRV for the entire length of the DXpedition, so we have only one pilot for the Americas which is Floyd, N5FG."

IOTA NEWS.....
EU-049. Fred, PA1FJ, will be active as SV8/PA1FJ/p from Samos Island (GIOTA SAS-006, MIA MG-099, WLOTA L4163) between September 14th and October 2nd. Activity will be on 40-6 meters using SSB and running QRP (5 watts - Yaesu FT817 and Buddistick antenna). QSL via his home callsign, direct or by the Bureau.

EU-164. Before going to Romo Island (See OPDX.924), Rene, DL2JRM, will activate the Island of San Cipriano (DIFM TK-037, MIA MCO-013) as TK/DL2JRM/p between September 14-15th. Activity will be on 40-10 meters QRP CW, using solar power. QSL via DL2JRM, direct or by the Bureau.

NA-110. Operators Jeep/KA1DF, Dave/KI4ROL, Paul/K3LLH, David/N2EIO, Gary/AI4JA and Bill/W3HEA will be activating the special event callsign K4L from a lighthouse (ARLHS USA-392, TWLHD WLH K-082, WLOTA L 2265, WW Loc. EM92SJ) on Hunting Island (USI SC003S, Beaufort County, South Carolina) between October 17-18th.
The activity is to commemorate the 150th anniversary of the lighthouse. The light was the first light on Hunting Island, built in 1859 but destroyed during the Civil War. It was rebuilt in 1875 of curved iron panels (each weighing 1200 pounds) with an interior brick wall. In 1889 it was dis-assembled and moved 1/4 mile inland due to rapid erosion of the northern end of the island. It served as a navigation light until decommissioned in 1933. The park itself was created just prior to WWII; during the war, the Air Force had a trans-mitter site there. QSL via K3LLH. An online log will be available after the event. Further information can be found at: http://pws.prserv.net/K4L

KH6BZF PROPAGATION FORECAST/REPORT (For September 14-20th)....
Sep 14 AN SOLAR REFERENCE
Sep 15 AN ---------------
Sep 16 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 18 AN LN - Low Normal
Sep 19 AN
Sep 20 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NEW D.L.I. AWARDS. Please check out the new "Italian Lakes Award" at:
http://www.dlit.info
---or--
http://www.forum.dli.altervista.org/viewforum.php?f=4

OH0, ALAND ISLAND. Tomi, OH6EI, will be active as OH0Z during two different weekends this month for the SAC Contests. Look for him during the Scandinavian Activity CW Contest (September 19-20th) as a Single-Op/All-Band/High-Power entry, and the Scandinavian Activity SSB Contest (September 26-27th) as a Single-Op/All-Band/High-Power entry. QSL via W0MM.

PACIFIC TOUR. Once again, Hrane/YT1AD and Miki/YU1DW will travel to the Pacific, and will be active from the following locations per this timetable:
KH8 - American Samoa; September 30th-October 1st; callsign KH8/N9YU
5W - Samoa; October 2-3rd; callsigns 5W7A (YT1AD) and 5W0DW (YU1DW)
3D2 - Fiji; October 4-6th; callsigns 3D2AD (YT1AD) and 3D2DW (YU1DW)
T30 - Western Kiribati; October 6-8th; callsigns T30M (YT1AD) and T30W (YU1DW)
The main purpose of this trip is to prepare all necessary documents for their next DXpeditions to Central Kiribati (T31), Tokelau Island (ZK3) and Wallis Island (FW8) in September and October of 2010. More details will be forthcoming at: http://www.yt1ad.info/t31

QSL INFO AND NEWS.....
9M2MRS QSL ROUTE CHANGE. Rich, 9M2MRS, reports that envelopes are being opened from his Penang Island, Malaysia address, and green stamps are being taken. He advises to send QSL requests to his PA0RRS address in the Netherlands. He said he would like this info passed around to the U.S hams.

SWAZILAND DXPEDITION QSL STATUS. QSL Manager for Swaziland DXpedition in August 2009, David, GI4FUM/3DA0DJ, reports that 5,000 QSL cards have arrived from the printer (in the Ukraine), September 11th, so the cards are on their way back to anyone who QSLed direct. Cards from the UK and Ireland have been dealt with first. Unfortunately, the present postal strikes will not help, but the cards are on their way. There are two designs, so anyone who worked more than one member of the team should get cards in both designs.

PIRATE ALERT. Phil, G3SWH, reports that the activity on 20 meters CW earlier this month by a station signing ZF2NT was a pirate operation. Bruce is still in California.

QSLS VIA LOTW: T6AD

QSLS RECEIVED VIA MAIL: 5H3VMB, 5K0T, 9J2VB, BD1HFP/2, CO8LY, FR7ZL/g, FW5ZL, GM01VI/p, J39BS, JT1CO, OH/JA5AQC, OH0E, OJ0J, R1ANR, SV2ASP/A, TK/I4GAD, TM5EL, V51AS, VK9GMW, VR10XMT, VR2XMT, VR2008O, VR2009EAG, XE2PEA, ZS1REC and ZX8A

QSLS RECEIVED VIA THE BUREAU: 4A3IH, DX1J, KH0N, T32XG and V63MP

SILENT KEY. QSL Manager Norman, W7LFA, informs OPDX that Vern Robinson, P29VR/W7GSP, became a "Silent Key" on August 17th. He returned to his home in Renton, Washington, a couple of month prior for treatment. He was active on all bands for over 16 years from PNG along with his surviving wife P29RI/K7IAF. Norman states that he has all the logs for his entire operation. OPDX and its readers would like to give our deepest sympathy to the family and friends of P29VR/W7GSP.

T4, CUBA. Operators Luis/CO6LP, Orelvis/CO6LC, Yordany/CM6YAC, Jose/CO6EC and possibly one or two other operators will be active as T46A during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via CO6LC. The plans to use a FT-747, FT-80 and 2-SEG 15D, with 2 or 3 amplifiers 400w; antennas include: 2 - 2 element yagis (20/15/10), a vertical for 40m, and verticals and dipoles for 160/80m. Receiving antennas: 2 Beverages 580 feet long to EU and USA-JA.

TC2, TURKEY. If you missed Tevfik, TA1HZ, during the WAE SSB Contest this past weekend using the special callsign TC2X, you will have a second chance to work him during the 51st Scandanavian Activity Contest on September 26-27th. Tevfik's QTH is Bayramoglu, Kocaeli, and he uses a Diamond BB7V vertical antenna and a long wire. He states, "Main purpose of activity is to give out multipliers to runners and have the flag up!!"

TC3, TURKEY (Lighthouse Activity). After the successful ILOTA Istanbul Lighthouses On The Air activity, the members of the Turkish group called TCSWAT (Special Wireless Activity Team) will now activated for the first time Balyos Lighthouse on the south coast of the Marmara Sea between September 19-23rd. The callsign will be TC3BLH. Activity will be as usual on the HF bands, mainly on 20 and 40m SSB. SSTV activity is planned, but not guaranteed. There will be other new lighthouse activations from the Marmara Sea coastline with a special award available after the operations. If you are interested in lighthouse activities, please check the following Web site for further announcements at: http://www.tcswat.org

TJ, CAMEROON. Reports indicate that Lionel, F5PSA, is active as TJ3SL. His length of stay is unknown at this time. Activity has been on 20-10 meters using SSB, but only during his spare time. QSL via his home callsign.

TK, CORSICA. Members of the Volta DX Team and Project DX Team will be active as TK/homecall from Corsica (EU-014) between September 19-24th.

Operators mentioned are: Ern/I2FUG, Oscar/IK2AQZ and John/IK2JYT. This is their annual holiday/DXpedition. Activity will be on all bands (160-2 meters) using CW, SSB and the Digital modes. They plan to have two stations using small amplifiers, verticals and loop antennas. They will also try to go and operate from a more islands, such as Ile St.Cipriano (EU-164), Ile Cerbicales (EU-100) and Ile Sanguinaire (EU-104). QSL via their home callsigns, direct or by the Bureau.

V2, ANTIGUA. Bud, AA3B, will once again be active as V26K between November 26th and December 1st. His activity includes the CQWW CW Contest (November 29-30th) as a Single-Op/All-Band/Low-Power entry. This will be an all CW operation on the contest HF bands only. Please QSL via AA3B.

VP5, TURKS AND CAICOS ISLANDS. Jack, N2VW, will be active from the VP5JM Hamlet on Providenciales Island (NA-002, FL31) between October 21-28th. His activity will include an entry in the CQWW DX SSB Contest (October 25-26th) possibly using a special callsign. Outside of the contest Jack will be signing VP5/N2VW on all bands (160-6 meters) and modes. QSL via his home callsign.

VP5, TURKS AND CAICOS ISLANDS. Operators Rodger/W7VV, Ralph/VE7XF and possibly some other operators will be active from Jodi's, VP5JM, "Hamlet" QTH (http://www.vp5jm.com/) on Providenciales, Caicos Islands (NA-002), between November 15th and December 3rd. Activity will include the CQWW DX CW Contest (November 28-29th) as a Multi-? entry and possibly a special callsign (TBA). QSL route TBA. Operators will be active before and after the contest on all bands (160-6 meters) and modes signing VP5/homecall. QSL via their home callsigns.

XV, VIETNAM (Rare IOTAs). Members of the Russian Robinson Club and R-Quad Antenna Company have put together a DXpedition project to activate the rarest IOTA references in Vietnam during the last part of September and early October. They will be in Vietnam between September 24th and October 2nd. Operators mentioned are: Sergey/RA3NAN, Oleg/RK3FA, Andy/RZ3EM and Andrey/UA6BGB. The tentative schedule is as follows:
AS-185. Activity from Hon Ngu Island as XV6RRC; September 24-26th.
AS-162. Activity from Cu Lao Cham Island as XV7RRC; September 27-28th.
AS-157. Activity from Hon Tam Island as XV3RRC; Sept. 29th-October 1st
The team plans to run 2 stations with the following setup:
TXs: Elecraft K3 ï¿½ 2 pcs
Amplifiers: Acom 1000, Ameritron ALS600
Antennas: 160/80/40m Vertical on 18m mast, 20m VDA on 12m mast, VDAs on 15-17m on 12m mast, BiggIR Vertical (40-10m), LowBands RX antennas (if the conditions permit)
Software: WinTest, AATest
The team will try to do their best to log as many IOTA enthusiasts all over the world as the propagation and other local conditions permit. If they can manage to arrange an Internet connection, they will try to update their log daily. For more details and updates, please visit their Web page at: http://xv6rrc.com/

YJ0, VANUATU. Tomas, VK2CCC (LY1F), will be active from here between October 30th and November 5th. Callsign is to be announced later. Activity will be "part time", but mainly on 160 and 80 meters CW. QSL via VK2CC, by the Bureau or direct. View some photos from his past operations at: http://www.qrz.lt/foto/main.php?g2_view=core:ShowItem&g2_itemId793

ZS, SOUTH AFRICA. Bernie, ZS4TX, from Danhof, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via LoTW.

RAC Bulletin 2009-028E - Geoff Smith, VA3GS, re-elected Ontario
South Region Director.
2009-09-14

Following the September 1st, 2009, close of nominations for
the Ontario South Region Director position, an Election
Committee was convened, chaired by RAC Corporate Secretary
Linda Friars, VE9GLF. The committee met to open and review
the sole nomination received for the position, as required
by the By-laws. There being no other nominees, and
the nomination documents found to be in order, the
committee declared the incumbent, Mr. Geoff Smith,
VA3GS, elected for another two-year term which beings
January 1, 2010.

The RAC President, Board and Executive congratulate Director
Smith and thank him for continuing to volunteer his services.

G. Linda Friars, VE9GLF
Corporate Secretary - Radio Amateurs of Canada

RAC Bulletin 2009-029E - RAC HFBPC has a new name.
2009-09-14

It is now official, a while ago, the RAC Board of Directors
has approved a motion to change the HF Band Planning Committee
name to LF/MF/HFBPC. This new name better reflects the range
of frequencies that the committee is responsible for.

Jim Fisher, VE1JF, the Committee Chair indicates that the
work the committee members are doing will not change much
as they were already including those bands in their
ongoing reviews.

73,

Daniel A. Lamoureux, VE2KA
Vice-President International Affairs - Radio Amateurs of Canada

And REL 2973 is all you have for model/manufacturer/etc? Probably too
little to go on. No other markings on the inside, might be a re-branded
model...

2273. Saif Durbar, Bovis Lend Lease, and the Saudi Housing Experiment…

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-17 00:40:22 UTC
From: saifee_durbar@yahoo.com
Message-ID: <57b76356-70b4-4005-a347-f93a56a0bb9d@n2g2000vba.googlegroups.com>

BOVIS LEND LEASE, the construction group, has teamed up with the British architect behind London's "erotic gherkin" office skyscraper on a $13 billion (£7.4 billion) plan to build 750,000 new homes in Saudi Arabia.

The pair are working with Saudi Construction Group, a new company backed by some of the Kingdom's richest businessmen, to develop a huge site about three miles outside the capital, Riyadh. The backers plan to float the group – which could be worth about £1 billion – in London or Riyadh by the middle of next year.

The company is the brainchild of Saifee Durbar, a broker to Saudi billionaires investing in Europe, Paul Bloomfield, the veteran property dealmaker, and Sheikh Faisal al-Sharif, chairman of DGI, a company that is researching a $2 billion (£1.1 billion) petrochemicals plant in Saudi Arabia.

The Saudi Construction Group is designed to cash in on the Saudi Government's plans to provide a home for every Saudi citizen. The Saudi Government believes that there is a need for between three and four million new homes over the next ten to fifteen years.

The oil-rich country currently houses more than 26 million people but is one of the world's fastest-growing countries.

Foster & Partners, the architect behind Swiss Re's landmark office building near the Tower of London, dubbed the "erotic gherkin" will create a master-plan for the huge housing settlement. The site totals seven million square metres and will accommodate about 750,000 new homes.

Bovis Lend Lease will be the lead contractor for the project, which will cost between $6 billion and $7 billion and will be worth between $10 billion and $13 billion when complete.

Foster & Partners is keen to create a ground-breaking development that provides new high standards of modern living in Saudi Arabia.

Foster & Partners has created some of the world's most impressive modern architecture, including the glass dome over Berlin's Reichstag, Hong Kong's airport and Bilbao's new Metro. Nigel Hugill, the former managing director of Chelsfield, the property company formed by Elliott Bernerd, was instrumental in getting Bovis Lend Lease involved with the Saudi housing project.

Saif Durbar, who helped to set up the Saudi Construction Group, is a low-profile Middle Eastern businessman who has helped to fund a string of property development projects in Britain and mainland Europe, including Palm Beach, a casino and hotel complex outside Cannes. He lost a $1 billion fortune in 1995 on a bond deal that went wrong.

Details can be found at:

http://businessdistress.wordpress.com/2009/08/21/saifee-durbar-case-study-in-recovery/

He is also planning to build a railway linking Cameroon and Sudan. This will enhance African self-sufficiency as it will use minerals and other raw materials from the Central African Republic. The eastern terminus in Sudan will also provide a source of aid for the people in Darfur.

Amateur Radio Newsline(tm) Report 1675 - September 18 2009

Amateur Radio Newsline report number 1675 with a release date of
Friday, September 18, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. A Dutch telecommunications regulator may
have created a confrontation between ham radio in space and ham radio
on the ground. We have the details. Also, a leader in emergency
communications says the FCC appears open to suggestions on how to solve
the problem of hams working for served agencies to keep their nets on
the air, Oregon hams use grant monies to establish a state wide Winlink
communications system and NOAA says that Solar Cycle 24 may never get
above 90. Find out the details on Amateur Radio Newsline(tm) report
number 1675 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: DUTCH GOVERNMENT TRYING TO FORCE D-STAR REPEATERS INTO
HAM SATELLITE BAND

A confrontation between amateur satellite users and terrestrial users
of D-Star repeaters appears to be looming on the other side of the
Atlantic. This because one European telecommunications regulator has
decided to make it happen. Norm Seeley, KI7UP, is here with the
details:

--

A confrontation between amateur satellite users and terrestrial users
of D-Star repeaters appears to be looming on the European horizon.
This, because the telecommunications regulator in the Netherlands is
creating a war-like scenario between the two ham radio interests so
that it can proceed with one of its pet technological projects.

Information provided to Amsat-North America indicates what the ham
radio space agency calls a growing threat to frequencies allocated and
used by the Amateur Satellite Service. This is because the Dutch
government has decided to reallocate 439.500 MHz and upward to the
Differential Global Positioning Service. And to accomplish this goal
it has decided to move the output frequency subband of that nations
terrestrial D-Star repeaters from 439 to 440 MHz down to 437 to 438
MHz. This re-allocation would place digital repeater signals right in
the downlink band of the Amateur Satellite Service.

Nor are Dutch telecommunications regulators listening to anyone's complaints about the proposed reallocation. Protests from Dutch amateur radio operators, amateur clubs and even telecommunications regulators in nearby countries are falling on what amounts to deaf bureaucratic ears. The regulator is still planning on this spectrum re-allocation to favor Differential G-P-S.

As we go to air Dutch telecommunications regulator has halted amateur D-Star repeater licensing until the frequency shift can be made. Impact on European satellite operations would be immediate. A ripple effect on world wide ham radio satellite communications would at least in theory be inevitable. So might be formal complaints to the International Telecommunications Union from spectrum regulators in neighboring nations.

>From Scottsdale, Arizona, I'm Norm Seeley, KI7UP, reporting for the Amateur Radio Newsline.

--

Even more ominous is the potential for the door to be opened for future infringement on satellite operations in other countries. This is because in many parts of the world portions of the 70cm band is allocated ham radio operators as secondary users. (Amsat-NA, PE1HZG, Southgate)

**

EMCOMM VS PECUNIARY INTEREST: WB6NOA REPORTS THE FALLOUT

Ham radio educator and emergency communications expert Gordon West, WB6NOA, is weighing in on the growing controversy that is pitting proponents of providing ham radio communications while on the job versus the FCC position that any communications by any ham who is at work, off work, or even on a lunch break and being paid is illegal. The problem says West is that the FCC deems as not legal is for paid personnel conducting a ham radio net. This he says is driving away all forms of amateur radio volunteers from public service and he has thrown his political weight in with those who are calling for the FCC to continue to work with the ham community as the two work together to find a solution. Bill Pasternak, WA6ITF, has more:

--

According to Gordon West, WB6NOA, the sky is literally beginning to fall. And its falling in on amateur radio participation in emergency communications activities.

In an e-mail to Amateur Radio Newsline, West notes that in recent days he has heard directly from a growing number of hams who were associated with emergency service operations. Hams who are simply walking away from the hobby and from emergency communications work within it. To quote WB6NOA:

"Today , I had calls from a Red Cross chapter indicating they may no longer participate or encourage American Red Cross ham radio training nets . A Red Cross staff member who is a ham, says he is out .

"Another call from a fire department ham who just formed a ham radio disaster communications team. He says he is over and out working with ham volunteers over the air .

"Ans a CERT City coordinator, also a ham, has called it quits for over the air disaster drills on 2 meter simplex."

West notes that as with emergency communicators with ARES and RACES, there is usually a ham or two on staff of various agencies that other ham volunteers work with on the air. He says that all radio amateurs fully understand the rules on pecuniary interest, but without hams embedded in agency staffs who operate in drills and disaster preparation, that ham radio has no one to serve.

In addition to being an acclaimed amateur radio instructor, Gordon West, WB6NOA, is an ARRL District Emergency Coordinator. He is also active with his Red Cross chapter and runs a daily preparedness net on 40 meters. And now he is asking the FCC for its opinion on how volunteers can best work with fellow hams who may be on staff with their local agency and who are wanting to legally run nets for disaster relief training and preparedness.

West adds that he is hoping that the FCC rules enforcer Laura Smith will continue to weigh the many comments from served agencies on this important subject. He points out that both Smith and FCC rules man Bill Cross, W3TN, responded to his initial e-mail within minutes of it being sent. He says that to him this is an indication that the regulatory agency's door is open for constructive comments.

WB6NOA ends by offering his own expertise to the FCC in crafting a solution to the current dilemma. He also quotes section 97.1(a) of the Commissions own rules. A rule which not only defines the reason ham radio exists but recognizes and specifically spells out the value of the amateur service to the public. This, as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the Amateur Radio Newsline studio in Los Angeles.

--

Gordon West says that this bru-ha-ha has just undone all that hams have been trying to do to find a purpose, with their local County or City emergency services. He adds that this controversy has likely set back the cause of ham radio emergency preparedness, growth, and cooperation between volunteers and the various agencies that they serve. (ARNewsline(tm))

**

PUBLIC SERVICE: SOUTH AFRICAN HAMNET ASSISTS THE WALK AGAINST CRIME

Ham radio recently played a part in a South African Walk Against Crime. The event was organized by Edenvale SAPS and Mumba Security in conjunction with the amateur radio group Hamnet.

ZR6DAN, ZU6TAN, and ZS6SKY, handled all the communications at the event. ZS6ZS, was in contact with them from a base station for back up communications in the event it was needed. The event is organized to test the readiness of the members and the ability to deploy and activate mobile and field stations while under pressure. This, in preparation for future events. (Southgate)

**

RESCUE RADIO: GRANT MONEY BRINGS WINLINK SYSTEM TO OREGON

A follow up to the story on a grant of $250,000 made a year and a half ago to the Amateur Radio Emergency Service in Oregon by Governor Ted Kulongoski. As a result, Oregon ARES members are on the verge of completing the state-wide installation of a Winlink ham radio emergency messaging system.

According to the ARRL, the story goes back to 2007. That's when governor Kulongoski impressed by the ability of radio amateurs to handle emergency communications when severe winter storms wreaked havoc on Oregon's North Coast. The city of Vernonia was flooded. The 911 emergency response services along with the Internet and phone service was inoperable for an extended period of time.

Because of the service rendered by Amateur Radio operators in providing communications support, the governor allocated funds for the installation of a ham radio digital communications system. One that would integrate Amateur Radio with the Internet.

Winlink was chosen over any other digital messaging system because of its performance during the severe weather two years ago. In fact it was Winlink that was the only mode of communications for several Oregon counties for the first two days of the storm. The project is scheduled to be completed in time for the 2009 ARRL Simulated Emergency Test scheduled for October 3rd and 4th. (ARRL)

**

PUBLIC SERVICE: HAMS NEEDED FOR OREGON'S EAGLE CAP EXTREME DOG RACE

Still in Oregon, that sates Eagle Cap Extreme Sled Dog Race in need of ham radio volunteers from January 13th to the 16th 2010. This, to provide communications support for the event.

About 40 to 50 radio amateurs will be needed to provide checkpoint and course safety coverage using 2 meters and a dedicated repeater for the event. The race begins at Wallowa State Park and ends at the Ferguson Ski Area and is a qualifying event for both the Alaskan Iditarod and Canadian Yukon Quest events.

Hams who enjoy performing public service work outdoors in the winter should contact Clyde Raymer, Jr., KL0CW, by e-mail to president (at) eaglecapextreme (dot) com. More on the race and the part played by volunteer radio amateurs is on-line at www.eaglecapextreme.com/amateurradio.php (Via E-Mail)

**

RESCUE RADIO: SOME SOCAL REPEATER SITES MAY NOT BE REACHABLE THIS WINTER

Hams with repeaters atop several Southern California hilltops may not be able to reach them this winter if repairs are needed. This, the result of the aftermath of a massive wildfire which is still only 85 percent contained.

Michael Mcintyre is a District Ranger who oversees the Angeles National Forest. In a letter to all permit holders Mcintyre writes that as a result of the Station Fire much of the District has been burned with complete mountain sides reduced to ash and charred remains of trees. The Angeles National Forest remains closed south and east of California State Route 14 and Route 138 until further notice.

Mcintyre says that individuals or organizations holding special uses permits for sanctioned activities within the forest are exempt from this closure. However, weather forecasters predict that Southern California will receive heavy rain this fall. This he says may result in landslides, flooding, and road washouts. Numerous roads would be closed and many communication systems and utilities across the forest might be non operational.

Mcintyre says that now is the time for lessees to organize carpools by coordinating tenant needs and planning helicopter access for when access roads are washed out. He adds that it is prudent to make back up plans with your neighbors to ensure your long term access where sanctioned activities are necessary.

While Mcintyre does not address the needs of ham radio repeater owners, its well known that a good number of wide coverage systems operate from such hilltops as Mt. Disappointment, Mt. Lukens and of coarse Mt. Wilson. And if the prediction of heavy rain later this year is correct, if a repeater goes off the air due to some failure, it may have to stay off unless its owner has the money to pay for a chopper ride up to the site. (CGC)

**

RADIO VANDALISM: TWO MORE RADIO TOWERS COME DOWN

Two more broadcast radio towers have been felled. Thais, since radicals in the Pacific Northwest toppled two towers owned by KRKO in Everett Washington as we reported last week.

The first involves WEAB in Allentown, Pennsylvania. Radio World says that the Federal Bureau of Investigation is trying to find out who cut the guy wires of the stations 350-foot tower causing it to fall to the ground. The Clear Channel tower is one of five in the same location of Whitehall Township. Authorities as saying no one was injured and no other property was damaged in the incident. The station operates at 790 kHz, went on the air in 1949. Its on the air with its remaining towers.

There's no mystery to why the 400 foot tower for of WTJV AM in Deland, Florida fell. A local newspaper says that truck full of high school students snagged one of the guy wires on its bumper after a high school football game. No one was injured, even though the tower and a power line fell. The station operate on 1490 kHz serves the Daytona Beach area. (RW, others)

**

ENFORCEMENT: UNLICENSED BROADCASTER DINGED $10000

The FCC has ordered Texas resident Radhames Severino to pay a $10,000 fine. This for allegedly operating of an unlicensed radio transmitter on the frequency 101.5 MHz in the Houston area. Newsline's Bruce, Tennant, K6PZW, has the details:

--

In its order affirming the forfeiture the FCC noted that on May 26th the Commission's Houston Resident Agent Office of the Enforcement Bureau had issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Severino for the alleged offense. To date, Severino has not filed a response to the order.

This case dates back to On October 23 and 25, 2006. That's when the FCC responded to a complaint about an unlicensed radio station in the Houston area. An agent from the Commission's Houston Office T-hunted the signal on 101.5 MHz to a building in the Houston area. On October 31, 2006, an agent from the Houston Office inspected the radio station located in suites K-M of the building, which was labeled as the home of the Iglesia Misionera Evangelistica Elohim church. The agent determined that Severino leased these suites, was responsible for the station, and was the pastor for the church.

On November 7, 2006, the Houston Office sent a formal Notice of Unlicensed Operation to Severino at his residence. The notice warned him that operation of an unlicensed radio station violated Section 301 of the Act and directed him to cease all unlicensed operations

immediately. The letter also outlined the potential penalties for such a violation,.

But the FCC warning to Severino apparently went unheeded. On January 30, March 12, and October 15, 2008, agents from the Houston Office, again T-hunted the signal on 101.5 MHz to Severino leased suites. This in turn lead to the issuance of a $10,000 Notice of Apparent Liability to Severino to which he never responded. As a result, Severino was given the customary 30 days to pay or to file an appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

This 30 day period has no passed but the FCC has not said if the fine was paid or is still outstanding. (FCC)

**

ENFORCEMENT: FCC ISSUES $19000 EAS VIOLATION FINE

The Federal Communications Commission fined Opp Educational Broadcasting Foundation, licensee of WJIF FM in Alabama, a $19,000. This, for violations of the rules governing a stations responsibility to the community it serves in time of emergency under the Emergency Alert or EAS system. The alleged violations include failing to maintain operable E-A-S equipment, not conducting required EAS tests and not providing certain information to Enforcement Bureau questions.

This case goes back to 2008 when the FCC responded to a complaint alleging WJIF did not take part in E-A-S drills and had never transmitted an EAS test. In its investigation the FCC specifically asked the station to provide copies of station E-A-S procedures and logs recording EAS test transmissions. The FCC followed up in March and warned WJIF that not responding appropriately could lead to enforcement action.

In its December 2008 response, the WJIF management did not directly answer the questions, except to state in general terms that WJIF had participated in EAS in the past. However it also noted that EAS gear was broken and the station intended to fix it as soon as possible. (FCC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO LAW: NSC SAYS OPERATING TWO WAY MOBILE IS SAFE

The National Safety Council says that operating mobile does not appear to increase the risk of having an accident.

In response to a request from the ARRL, National Safety Council President Janet Froetscher wrote back that the group has no evidence that using two-way radios while driving poses significant crash risks. She said that until such time as compelling, peer-reviewed scientific research is presented that denotes significant risks associated with the use of amateur radios, two-way radios or other communication devices that her organization does not support legislative bans or prohibition on their use.

The ARRL had written to the National Safety Council out of concern over the numerous state and city laws being enacted to ban all but hands free cellphone and stop all texting by the general public. The fear has been that some of these laws are so broadly worded that they might be interpreted by law enforcement or courts as a ban on all forms of vehicular communications.

While Froetscher comments do not carry the power of law, they will be an essential tool that hams can use to obtain exclusions from proposed mobile communications bans by cities or states. This is because the National Safety Council's findings carry a lot of weight with lawmakers at all levels of government. (ARRL)

**

NAMES IN THE NEWS: ELLISON NAMED CHIEF OF FCC ENFORCEMENT BUREAU

New FCC Chairman Julius Genachowski has announced the appointment of P. Michele Ellison as Chief of the Enforcement Bureau effective September 28th. Ellison is currently Deputy General Counsel of the Enforcement Bureau. According to an FCC press release she most recently served as Acting General Counsel of the FCC. Her appointment will likely have little impact on rules enforcement in amateur radio which was recently handed over to Laura Smith. (FCC)

**

WHATS IN A NAME: CAD AND ASTATIC REBRAND AS CAD AUDIO

Some say what's in a name? A lot if you are CAD Professional Microphones and Astatic Commercial Audio Products which are re-branding as C-A-D Audio.

While the name CAD Professional Microphones may not be one familiar to hams, the Astatic brand has its roots in amateur radio. The company was established in 1931 by two radio engineers dedicated to the development of a static-free, or "anti static," microphone.

Over the years the company evolved into Astatic Commercial Audio products. Perhaps its most famous Astatic branded product was the lollypop looking D-104 crystal microphone that was considered the gold standard for two way radio in the 1950', 60's and through the mid-1970's. That D-104 was discontinued from production about a decade ago. The name change for the Solon, Ohio, company became effective on September 1st. (Via E-Mail)

**

WHATS IN A NAME: RAC SAYS HDBOC NOW THE LF/MF/HFBPC

And another what's in a name? How about the Board of Directors of Radio Amateurs of Canada approving a motion to change the name of its High Frequency or HF Band Planning Committee to the Low Frequency, Medium Frequency and High Frequency Band Planning Committee.

Radio Amateurs of Canada says that the change name better reflects the range of frequencies that the committee is responsible for. Jim Fisher, VE1JF, who is the Committee Chair indicates that the work the committee members are doing will not change much as they were already including those bands in their ongoing reviews.

And thankfully, Radio Amateurs of Canada has come up with an acronym for the newly renamed group. They call it the LF/MF/HFBPC. (RAC)

**

HAM BUSINESS: RF CONCEPTS LLC BUYS ALPHA RADIO PRODUCTS

RF Concepts, LLC, has acquired the assets of Alpha Radio Products and will manufacture the world famous amplifiers and other Alpha Radio products. Michael Seedman, AA6DY, is the Chairman RFConcepts, LLC. He says that the Alpha 9500 and 8410 amplifiers, the Model 2100 Dummy Load/Wattmeter combo and line of 4500 Wattmeters will continue to be manufactured and available. Also the new company will honor existing customer commitments, including warranties, customer and technical support, and repairs. It will also keep an extensive parts inventories to support the more than 10,000 Alpha amplifiers in the market. (RFConcepts, LLC)

**

HAM HAPPENINGS: TAPR-ARRL DCC SEPT 25 - 27 IN CHICAGO

The joint ARRL and TAPR Digital Communications Conference will be held on September 25th to the 27th, The event takes place in the northwest suburbs of Chicago at the Elk Grove Village Holiday Inn near O'Hare airport with a free hotel shuttle bus.

The Digital Communications Conference features 2 full days of Technical forums that includes such topics as Digital Amateur Television, the use of digital Communications at the Marine Corps Marathon and the recently reported Universal Ham Radio Text Messaging initiative as proposed by Bob Bruninga, WB4APR.

If you can't be there in person you can follow activities on Twitter at twitter dot org slash taprdigital. More on the conference is on line at www.tapr.org. (WB9QZB)

**

FUTURE PROPAGATION: NOAA PREDICTS A SOLAR MAX OF ONLY 90

The U.S. Dept. of Commerce Space Weather Prediction Center has issued a prediction that the next Solar maximum will take place in May 2013 with a predicted sunspot count of just 90. This prediction follows on from other gloomy forecasts from various sources.

However, it must be remembered that scientists knows next to nothing about the suns behavior. Data from solar observing satellites goes back barely 3 decades and visual recordings of sunspot data only extends over a few centuries. Either way, this latest prediction can be seen at the website found at www.swpc.noaa.gov/ftpdir/weekly/Predict.txt (NOAA)

**

HAM RADIO IN SPACE: 4 MICROSATS TO LAUNCH SEPT 23

Turning to ham radio in space, the ISIS Launch Services weblog says a l date of September 23rd is currently likely for the Indian PSLV-C14 launcher that will carry 4 Amateur Radio CubeSats into orbit. These tiny birds include SwissCube, BeeSat and two others. More information is at blog.isilaunch.com. (Southgate)

**

ON THE AIR: COMMEMORATING PIERRE CURIE

On the air, keep an ear open for the fascinating call TM150RPC. Its on the air to commemorate the 150th anniversary of the birth of physician and Nobel Prize laureate Pierre Curie.

For those of you not aware, Pierre Curie was a French physicist, a pioneer in crystallography, magnetism, piezoelectricity and radioactivity. In 1903 he received the Nobel Prize in Physics with his wife, Maria Skï¿½odowska-Curie, and Henri Becquerel, in recognition of the extraordinary services they have rendered by their joint researches on the radiation phenomena discovered by Becquerel. That discovery is more commonly known as the X-Ray.

You can listen out for TM150RP-C on all bands and modes. QSL's go via F5KAZ. (OPDX)

**

DX

In D-X, word that Members of the Russian Robinson Club and the R-Quad Antenna Company have put together a DXpedition project to activate the rarest Islands on the Air references in Vietnam. Operators mentioned

are RA3NAN, RK3FA, RZ3EM and UA6BGB. They will be in Vietnam between September 24th and October 2nd. For more details and updates, please visit xv6rrc.com.

And lastly, M0OVL will be on the air slash P on September 25th and 26th from Inner Farne, He is restricted to just 4 hours of operations each day between 1000 and 1400UTC and is also dependent on weather conditions. More information and QSL routing is at www dot m-zero-o-v-l dot co dot uk.

(Above from various DX news sources)

GB2RS NEWS

Sunday 20th September 2009

The news headlines

RSGB members doing their bit for international amateur radio

Amateur operation on Trafalgar Square Plinth

Latest schedule for GB2CW transmissions available

Volunteers are the life-blood of the RSGB, and very often their quiet work in the background can be extremely influential. Recently, RSGB HF Manager and Region 1 LF Coordinator John Gould, G3WKL and RSGB President Colin Thomas, G3PSM attended the CEPT preparation programme for WRC-12. Now, former RSGB President Peter Chadwick, G3RZP is in Geneva to represent the IARU at ITU Working Parties 1A, B and C and at the Study Group 1 meeting. The RSGB would like to thank these gentlemen, and the many hundreds of other volunteers who give up their time freely for the benefit of our shared hobby.

[Note to newsreaders: there is no significance to the capital letters in the web address at the end of this item: they are just to make it easier and more obvious for you to read]

You may be aware that the fourth plinth in Trafalgar Square is currently being occupied by members of the public, one hour at a time, as part of the One And Other art project. On Friday 25 September, between 4 and 5pm, the plinth will be occupied by Martin Maynard, G8CIX. He will be demonstrating amateur radio and, for one hour, operating the special event station GB1AO. This will doubtless become one of the rarest callsigns ever. Martin is being supported in his endeavours by Icom UK, who have generously loaned equipment for the event. If you can't make it to Trafalgar Square yourself you can watch proceedings live on Sky Arts or on the web stream at www.OneAndOther.co.uk. Martin's own web site is www.GB1AO.co.uk.

Listeners interested in GB2CW transmissions can obtain the latest broadcast schedule on the RSGB website. It can be found within the "Options" drop-down menu of the "Morse Code: Certificate of Competency" section of the site. Inserting "GB2CW Broadcast Schedule" into Google will also provide a link to the RSGB site. However, any search will also provide a link to www.geocities.com/gm0rse/gb2cw.htm. This site should be ignored: it is not the responsibility of the RSGB and contains out of date information.

The British Young Ladies Amateur Radio Association will be celebrating its 30th anniversary on their stand at the National Hamfest in Newark on 2 and 3 October. They invite all radio amateurs to join them in their celebrations and look forward to meeting as many amateurs as possible whether BYLARA members or not. For more information on how to get to the venue to join in these birthday celebrations, go to www.nationalhamfest.co.uk. RAOTA, the Radio Amateur Old Timers Association, will be holding its 2009 AGM on Saturday 26 September at 1pm at The Horns of Boningale, Holyhead Road, Boningale, Albrighton, approximately 4 miles east of RAF Cosford. All RAOTA members are welcome. The RAF Cosford museum will be open from 10am, entry is free and members are invited to visit this prior to the AGM.

GB7NB is now operational one and a half miles south of Norwich in Norfolk. It transmits on 439.6875MHz with a -9MHz shift. A Gateway connection is planned for the near future. The group would like to thank all who assisted with the project including Darren, G7LWT from the D-Star UK-IT team and the Cambridge Repeater Group. More information can be found at the Norfolk Repeater Group's web page www.gb3nb.org.uk or www.gb7nb.org.uk.

Tomorrow, Monday 21 September, is the last day that pre-booked discount tickets are available for the National Hamfest organised by the RSGB in association with the Lincoln Short Wave Club. Taking place on 2 and 3 October, discounted pre-booked tickets are 3.50 although accompanied under 16s go free. The brand new 2010 Yearbook will be available from the RSGB at the show and the first 100 customers each day purchasing a Yearbook will receive a free goody bag.

In April 2008, Ray Oliver, G3NDS set sail in his yacht Christine Marie on a two year sail around the UK in support of charities. He is due to arrive home on 18 September. During his cruise he was in regular radio contact with hundreds of licensed radio amateurs who followed and supported him as he progressed around the coast. When half way across the Celtic Sea and out of contact with both the Irish and UK coastguard VHF stations he says it was reassuring to make strong clear radio communication with five radio amateurs in the UK on 80m SSB. For the latest information on his homecoming, or details of the trip, look at his website www.roundukcruise.org.uk.

Angel of the North Amateur Radio Club now has five candidates on their Foundation Course that started last week, but there is still time to join. The course continues from 10am to 5pm on Saturdays at Whitehall Road Methodist Church Hall. The examination will be at 7.30pm on Monday 5 October. Contact 07990 760920 if you are interested in joining.

The HB9AFO SwissCube web page reports that ham radio satellite may be launched on 21 September. SwissCube is one of four amateur radio satellites that will be launched from India on a PSL-VC14 booster. More information is online at tinyurl.com/SwissCube.

And now for the details of rallies and events for the coming week

On 20 September the Hornsea Amateur Radio Club rally will take place at Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ. Doors open at 10.30am and admission is £2. Details from Rick, M0CZR by e-mail to R106221<at>aol.com or Duncan, G3TLI, on g3tli<at>hotmail.co.uk.

20 September sees an Old Fashioned Rally take place at Detling, near Kent County Showground on the A249. There is a free car park, free admission, free tables and lots of giveaways from the estate of SK Ted, G3YCN. Talk-In via GB3KN. Details by e-mail to terry<at>chipperfield.name. The Kempton Radio and Electronics Show will be held next Sunday, 27 September, at Kempton Park Racecourse, Sunbury on Thames TW16 5QA. The show will open at 10am and there will be a talk-in station on 145.550MHz using the call GB2KRT. Most major amateur radio distributors will be represented and there will be plenty of trade stands. As usual, the Coulsdon Amateur Transmitting Society will be running the bring and buy stand. There will be three talks in the RSGB Bytesized Lecture Series, details are on the website www.radiofairs.co.uk. RSGB Abbey Court staff will be running the RSGB bookstall.

Also on 27 September, the Belgian National Amateur Radio & Computer Rally will take place in the Hall 'LA Louviere Expo', La Louvi£re, 50km south of Brussels, access direct from motorway. Doors open at 9am and talk in will be via repeaters 145.600MHz & 430.325MHz. www.on6ll.be.

Now for the news of special events

Following last year's first Railways on the Air event, Bishop Auckland Amateur Radio Club is coordinating ROTA 2009 over the weekend 26 and 27 September. The event is timed to coincide with the anniversary of the running of the world's first steam passenger train on the Stockton to Darlington Railway. Callsigns to listen out for include G8OGJ from Peak Rail, GB0GWR from Gloucestershire Warwickshire Railway and GB0HBL for the Helston Railway Preservation Society. GB0WHR is operating from the Welsh Highland Heritage Railway and GB0WRH from the Waverley Route Heritage Association. GB1NNR is at North Norfolk Railway, GB2CR is at Corris Railway and GB2EVR is based at the Eden Valley Railway. GB2HSC is operating from Hollycombe Steam Collection and GB2LHR is based at Lakeside & Haverthwaite. GB2LWR is at Lincolnshire Wolds Railway and GB2NNR is at North Norfolk Railway. GB2RER is on the air at Ravenglas & Eskdale Railway, GB4BLR is operating from Battlefield Line Railway and GB4CHC is at the Crewe Heritage Centre . Dean Forest Railway will be using GB4DFR and GB4DSR stands for Darlington Head of Steam. Over on the Isle of Wight, GB4IWR is on the air and GB4WLR is at the West Lancs railway. Finally, GB5RSR is operating from the Ribble Steam Railway.

Lebanon will be hosting the Sixth Francophone Games, which will be held in Beirut from 27 September to 6 October. The Radio Amateurs of Lebanon will be operating OD5F for the duration of the event. There will be a special QSL card for the event and QSL is via the bureau.

And now the HF DX news compiled from 425 DX News and other sources.

Kevan, 2E0WMG will be active from St Agnes, in the Scilly Isles, which is IOTA reference EU-011 and WAB SV80, on 22 and 23 September. Operation will be on 80, 40 & 20m, SSB only. QSL can be either direct or via the Bureau.

JW7XK, JW6VM and JW9DL will be operating from Longyearbyen, Spitsbergen Island in Svalbard between 26 and 30 September. This is IOTA reference EU-026. During the SAC SSB contest on 26 and 27 September they will use JW5X. QSL JW 5X via LA5X and the bureau is preferred otherwise QSL via the home calls as directed either direct or via the bureau. A team of operators will participate in the CQ WW RTTY 2009 from Andorra on 26 and 27 September, using the callsign C37URE. This operation also counts towards the commemorative acts of the URE 60th Anniversary. More information is at http://c37ure.ure.es.

Depending on weather, Jon, M0OVL will be active as M0OVL/P from the Farne Islands, which is IOTA reference EU-109 on 25 and 26 September. He has been granted permission to operate only between 1000 and 1400UTC on both days. Look for him on 20, 40 and 80 metres SSB. QSL via his home call, direct or bureau.

Ken, G0ORH reports he will be active as GM0ORH from the Isle of Arran, which is IOTA reference EU-123 on 20 to 27 September.

Now the contest news

The 51st Scandinavian Activity Contest SSB leg is taking place on 26 and 27 September from 1200 to 1200UTC. For more information about the rules of SAC 2009, please refer to www.sk3bg.se/contest/sacnsc.htm.

The Edgware Activity Periods run from 22 September to 2 October in short periods of operation – these can be found on their website, www.g3asr.thersgb.net. You can use SSB or CW on any or all of the bands. The format and rules of the event are unchanged from last year, but check them out on the website. In addition to individual club members, participation by club stations is encouraged to spread some bonus points as shown in the rules. The Edgware Club station, GX3ASR, will be operated once more by G3SJE and other club stations should identify themselves by use of the GX prefix. The call to use to show that you are participating in the event is on CW - CQ EAP or on SSB - CQ Edgware Activity Period.

The 50MHz UK Activity Contest takes place on 22 September between 1900 and 2130UTC. You can use all modes and the exchange is signal report, serial number and locator.

On 23 September, the 80m Club Sprint takes place between 1900 and 2030UTC. This is the CW leg and the exchange is serial number and name. Note the power is 10W or 100W.

Over the weekend 26 and 27 September, the CQ WW RTTY DX Contest takes place between 0000 and 2359UTC on the 3.5 to 28MHz bands. Exchange signal report and CQ Zone number, which is 14 for the UK.

The first of a series of Belgian contents takes place on 50MHz on Sunday 27 September between 0600 and 1000UTC. Work ON stations only and give them a report and serial number. ON clubs will give a 3-letter club code in addition to a report and serial number.

Finally, on 29 September the 70MHz UK Activity Contest takes place between 1900 and 2130UTC. You can use all modes on the band and the exchange is signal report, serial number and locator. Now the solar factual data for the period from the 7th to the 13th of September, compiled by Neil Clarke, G0CAS on the 14th of September.

The solar disc was spotless everyday and solar activity was a very low levels. Solar flux levels remained at 69 units everyday. The 90 day solar flux average on the 13th was 68 units, that's one unit up on last week. X-ray flux levels were below the minimum reporting level everyday. Geomagnetic activity was quiet everyday with the Ap index as low as 1 unit on the 9th and up to 6 on the 13th. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a slow 290 kilometres per second on the 9th to 380 by the 13th. Particle densities were low everyday, however, on the 13th they increase to 10 particles per cubic centimetre. As expected with a quiet geomagnetic field the Bz showed little variation, only on the 13th did fluctuations of up to minus and plus 8 nanoTeslas take place.

And finally the solar forecast. Solar activity is expected to continue at very low levels. The solar disc is also expected to be spotless most days. Without any sunspot activity, solar flux levels should be in the high 60's. Geomagnetic activity is expected to be at quiet levels until Friday or Saturday when a small recurring coronal hole disturbance is expected to arrive. The disturbance should last for about 24 hours. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. The darkness hour lows should be about 9MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 1200 and 1900 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Monday 21 September Braintree and District Amateur Radio Society Club commences its construction project. Contact John,

M5AJB, on 01787 460 947.

On Monday 21 September Burnham Beeches Radio Club is having a construction evening. Contact Dave, G4XDU, on 01628 625 720.

Vol. 28, No. 37
September 18, 2009
***************

IN THIS EDITION:

* + Changes in Store for The ARRL Letter
* + New Product Review Tests to Begin in October QST
* + Nominations Now Being Accepted for the George Hart Distinguished
Service Award
* + Part 2 of the 10 GHz and Up Contest Is This Weekend
* + Smithsonian Curator to Speak at AMSAT-NA Banquet
* ARRL Membership Newsletters, Bulletins and Notifications
* Solar Update
* IN BRIEF:
This Week on the Radio
ARRL Continuing Education Course Registration
+ ARRL/TAPR Digital Communication Conference Next Weekend
+ Don't Forget to Send Your /140 QSLs!
Alpha Radio Products Now RF Concepts
South African Amateur Radio Payload Reaches Orbit

+Available on ARRL Audio News <http://www.arrl.org/arrlletter/audio/>

***Starting September 24, The ARRL Letter will be distributed and posted
***to the ARRL Web site on Thursdays (moving from Fridays).

<k1sfa@arrl.org>
============================================================

==> CHANGES IN STORE FOR THE ARRL LETTER

After asking for feedback from ARRL Letter subscribers and reviewing
surveys sent to ARRL members, we are changing the way you receive The
ARRL Letter. Starting in two weeks -- October 1 -- The ARRL Letter will
be available to subscribers in an HTML formatted version. Of course,
those members who do not wish to receive the HTML version can click on a
link to view the Letter on the ARRL Web site. In addition, The ARRL
```

Letter will be distributed on Thursdays beginning September 24.

According to ARRL News Editor S. Khrystyne Keane, K1SFA, this new format will allow for more graphics and pictures, as well as occasional articles that feature the technical side of Amateur Radio. We will also be running portions of popular QST features, such as "The Doctor Is IN" and "Hints & Kinks."

"I am very excited about presenting The ARRL Letter in a completely new format," Keane said. "Not only will we be able to add features such as pictures and video, but by offering the Letter in HTML, readers will be able to navigate directly to those stories they are most interested in. The ARRL already offers two other newsletters -- The ARRL Contest Update and The ARRL ARES E-Letter -- in an HTML version. We have received a lot of positive feedback on these two newsletters."

The ARRL Letter first appeared in 1981 as a print publication, available by subscription from the League. In 1991 -- following the technology of the day -- it moved from being a print publication to being published electronically and sent via e-mail as a free service to ARRL members. "Now, once again, we at the ARRL are following technology's path and publishing The ARRL Letter in a new way, moving from plain text to a graphically pleasing interface," Keane explained.

We think you will enjoy this new format, and we welcome your comments. Tell us what you like -- and don't like -- by sending an e-mail to Keane <k1sfa@arrl.org>, with "ARRL Letter Feedback" in the subject line.

==> NEW PRODUCT REVIEW TESTS TO BEGIN IN OCTOBER QST

When you peruse the October issue of QST, you may notice a few extra lines in the Product Review data. "Here at the ARRL Lab, we strive to make our test procedures relevant to current technology and to new features common on today's transceivers," said ARRL Test Engineer Bob Allison, WB1GCM. "We continue to research ways to improve our testing and to develop new tests that will benefit our members. I hope you will find these new measurements useful in evaluating and comparing transceivers."

* Receiver Sensitivity (MDS) at 137 and 505 kHz
Several countries now give amateurs permission to operate at and around 137 and 505 kHz. In the US, there is activity on 495 to 510 kHz by more than 20 stations around the country operating under the ARRL sponsored WD2XSH experimental license. In addition, there are other Part 15 experimental licensees operating in this range. The WD2XSH stations are on the air regularly, gathering propagation data. They are always looking for signal reports.

Allison said that with many of today's transceivers and a suitable antenna, you can listen for these experimental stations and submit reception reports via the Web site: "The new Product Review tests will help identify transceivers suitable for use on these frequencies. With equipment built over the last 25 years ago or so, I've noticed a wide

variety of available sensitivity, from terrible to quite good. Many receivers tune to 137 and 505 kHz; not all are proficient at receiving signals there. For you 'lowfers,' this measurement is for you."

* Spectral Sensitivity
Spectral sensitivity is the weakest signal that can be "seen" on a visual display of spectrum above and below the operating frequency. Often called a spectrum scope or panadapter, this feature is included on many mid-range and high-end transceivers. "This data represents the level, in dBm, at which the operator can see a signal poke up out of the display noise floor," Allison explained. "Although the measurement is somewhat subjective, it works out to be about 3 dB above the noise floor at the bottom of the display when the scope is adjusted to show 100 kHz of spectrum. With software-defined receivers (SDRs), such as the FLEX-3000, the sample rate is set to the highest setting."

* Audio Output THD at 1 V RMS
Allison said that one of the ARRL Technical Advisors posed the question, "Who ever listens to their receiver at full volume?" Allison explained that audio output power and THD (total harmonic distortion) at the specified load impedances as specified by the manufacturer have been tested and reported. "Generally, the specification is at or near the maximum audio output the receiver is capable of," he said. "If severe hearing loss isn't an issue, we normally listen with the volume control set to around the 9 o'clock to 11 o'clock position on most transceivers and not with the control cranked to maximum."

Allison explained that distortion at normal listening levels is an important factor, especially when you are listening for an extended period of time: "High levels of distortion can make signals more difficult to understand and add to fatigue. We'll continue to measure and report how audio output power and THD compare to manufacturers' specifications, but we have added a new test intended to show distortion at more typical volume levels."

After testing several radios for comfort, Allison picked 1 V RMS as an output level for the new test. "It's an easy figure to remember," he said. "We will now also report THD at this level. Note that this test will appear with the next transceiver reviewed because the FLEX-3000 has only a low-level audio output and is dependent on external, user-supplied devices to amplify the audio to normal listening levels."

Look for these new tests beginning with October's QST Product Review featuring the FLEX-3000.

==> NOMINATIONS NOW BEING ACCEPTED FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

At its July 2009 meeting, the ARRL Board of Directors established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of

George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System (NTS) <http://www.emergency-radio.org/what_nts.pdf>. Upon learning that the ARRL Board of Directors had established this award named after him, Hart called his namesake award "a great honor."

Selection criteria include:
* Operating record with the National Traffic System; or
* Participation within the Amateur Radio Emergency Service (ARES); or
* Station appointments and/or leadership positions held within the ARRL Field Organization.

Nominations for the George Hart Distinguished Service Award shall be accepted from anyone and shall be submitted to the Membership and Volunteer Programs Manager at ARRL HQ by November 1. Nominations should document as thoroughly as possible the nominee's lifetime activities and achievements within the Field Organization. It is expected that nominated candidates will have 15 or more years of distinguished service. The Programs and Services Committee will serve as the Review Committee, with the Board of Directors making the final determination at its Annual Meeting in January. Recipients will be given an engraved plaque and cover letter and will be profiled in QST.

Nominations for the George Hart Distinguished Service Award, including any related supporting material and letters of recommendation, may be e-mailed to ARRL Headquarters to the attention of ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N <nn1n@arrl.org>, or to ARRL Field and Public Service Team Supervisor Steve Ewald, WV1X <wv1x@arrl.org>. Nominations and supporting materials must be received no later than November 1, 2009 to be considered.

==> PART 2 OF THE 10 GHZ AND UP CONTEST IS THIS WEEKEND

This weekend brings the second leg of the 2009 ARRL 10 GHz and Up Contest <http://www.arrl.org/contests/rules/2009/10-GHz.html>. If you enjoy the technical side of Amateur Radio and being on the cutting edge, this weekend gives you a perfect chance to explore the microwave portion of the radio spectrum!
The contest period starts at 6 AM (local time) Saturday, running until midnight (local time) Sunday. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, QSO points are awarded based on the distance of a QSO. "Operating from several locations during the contest period is not only allowed, it's even encouraged," he said. "Most people use SSB, although some CW is used, too. Power levels are relatively low compared to HF; most stations run several hundred milliwatts. A station running a few watts is considered a 'Big Gun.' Antennas are usually dishes, like those used for receiving satellite TV."

Kutzko explained that many QSOs are completed on the microwave bands by bouncing signals off of other objects, such as mountains, buildings and even raindrops! You can also get lucky and catch a good tropospheric opening, he said, explaining that in the 2007 contest, a ham on the West

Coast made a QSO of 907.2 miles on 10 GHz between his location in California and Mexico.

"If you have a person in your area that is interested in the microwave bands, ask if you can tag along and observe," Kutzko advised. "If you live in an area that has a microwave club -- such as the North Texas Microwave Society, the North East Weak Signal Group, the Mt Airy VHF Club and several others -- find out what their members are doing for the contest. Elmering is a big part of the microwave groups, and they are only too happy to introduce you to their fun."

Logs for the 2009 ARRL 10 GHz and Up Contest can be e-mailed <10GHz@arrl.org>. Paper logs should be sent to ARRL 10 GHz and Up Contest, 225 Main St, Newington, CT 06111. All logs must be postmarked no later than 2359 UTC Tuesday, October 20.

==> SMITHSONIAN CURATOR TO SPEAK AT AMSAT-NA BANQUET

Dr Martin Collins, a curator in the Space History Division at the Smithsonian Institution's National Air and Space Museum in Washington <http://www.nasm.si.edu/>, will be the featured speaker at the AMSAT-NA Symposium banquet on Saturday, October 10, at the Four Points Sheraton Hotel at Baltimore-Washington International Airport <http://www.amsat.org/amsat-new/symposium/2009/index.php>. The title of his presentation will be "Making the Space Age: The First 50 Years."

Dr Collins curates the National Air and Space Museum's civilian applications satellites collection that includes weather, remote sensing and communications satellites and related technologies. He has contributed to a series of Museum exhibits and was primary author of the exhibition catalog "Space Race: The US-USSR Competition to Reach the Moon" <http://www.amazon.com/Space-Race-U-S-U-S-S-R-Competition-Reach/dp/0764909053>.

On the occasion of the 50th Anniversary of Sputnik, he was editor of the book "After Sputnik: 50 Years of the Space Age" <http://www.amazon.com/After-Sputnik-Years-Space-Age/dp/0060897813> that included text and photos on the history of Project OSCAR. He was instrumental in arranging the display of OSCAR 1 at the National Air and Space Museum's Udvar-Hazy Center, along with the Naval Academy's PCSat Amateur Radio satellite. He also arranged the acquisition of AMSAT's MicroSat mechanical test model, just in time for AMSAT's 35th Anniversary Annual Meeting.

The Saturday evening banquet is one of the highlights of this year's 40th anniversary symposium, October 9-11 <http://www.amsat.org/amsat-new/symposium/2009/index.php>.

==> ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter? One of the many ARRL membership benefits includes other newsletters,

such as the ARRL Contest Update (a bi-weekly contest newsletter), the ARES E-Letter (sent monthly, containing public service and emergency communications news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the VE Newsletter, just to name a few.

You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplarian reports. The ARRL also offers a free notification service to members, letting them know when their membership and license are due to expire.

Sign up for these newsletters, bulletins and notifications on the Member Data page of the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==>SOLAR UPDATE

Tad "Gave temperate sweets to that well-wooing Sun" Cook, K7RA, this week reports: Sunspot numbers for September 10 through 16 were 0, 0, 0, 0, 0, 0 and 0 with a mean of 0. The 10.7 cm flux was 69.3, 69.3, 69, 69.1, 69, 69.2 and 68.8 with a mean of 69.1. The estimated planetary A indices were 2, 4, 4, 6, 5, 5 and 6 with a mean of 4.6. The estimated mid-latitude A indices were 2, 2, 1, 4, 4, 4 and 5 with a mean of 3.1. Thursday's prediction shows solar flux values at 70 beginning tomorrow, September 19, and continuing through September 24, then rising to 72 September 25-28. We haven't reported a weekly solar flux average above 70 in this bulletin since May 19, and prior to that there were only four more weeks above 70 in 2009. These predictions are from NOAA and the US Air Force, who also predict a planetary A index of 8 for September 18, and only 5 from September 19 to more than a month after. Geophysical Institute Prague also predicts nothing but quiet geomagnetic conditions for September 18-24.. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by John Keats' "Endymion" <http://www.bartleby.com/126/32.html>.

==>IN BRIEF:

* This Week on the Radio: This week, the ARRL 10 GHz and Up Contest is September 19-20 (local time). Look for two NCCC Sprints this week, one each on September 18 and 19. The Feld Hell Sprint is September 19. The South Carolina QSO Party, QRP Afield, the Washington State Salmon Run, the QCWA Fall QSO Party and the Scandinavian Activity Contest (CW) are all September 19-20. The North American Sprint (SSB) is September 20. The Run for the Bacon QRP Contest and the 144 MHz Fall Sprint (local time) are September 21. The SKCC Sprint is September 23. Next week, look for another NCCC Sprint on September 25. The Texas QSO Party, the CQ

Worldwide DX Contest (RTTY) and Scandinavian Activity Contest (SSB) are all September 26-27. QRP Homebrewer Sprint is September 28. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, October 25, 2009, for these online course sessions beginning on Friday, November 6, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL/TAPR Digital Communication Conference Next Weekend: ARRL and the Tucson Amateur Packet Radio Group (TAPR) <http://www.tapr.org/> will jointly host the 28th Annual Digital Communications Conference (DCC) September 25-27 in Chicago <http://www.tapr.org/dcc.html>. The DCC has something for everyone from those new to digital modes to those experienced with digital communications including technical and introductory forums. According to DCC Co-host Mark Thompson, WB9QZB, one of the highlights of this year's DCC will be Bob Bruninga, WB4APR, presenting "Universal Ham Radio Text Messaging." The Saturday night banquet speaker will be Bill Brown, WB8ELK, a pioneer in flying balloons with payloads including Amateur Radio digital communication technologies. Brown is the publisher and editor of Amateur Television Quarterly magazine. ARRL Technical Relations Manager Brennan Price, N4QX, will be on hand to discuss the upcoming World Radiocommunications Conference in his talk "WRC-12 Agenda Item 1.19: Shaping the International Regulatory Framework for Software Defined and Cognitive Radio Systems." QEX Editor Larry Wolfgang, WR1B <http://www.arrl.org/qex>, and ARRL Central Division Director Dick Isely, W9GIG, will also be in attendance. The 2009 DCC forum and speaker schedule is available online <http://www.tapr.org/pdf/DCC_2009_Schedule_Preliminary2009-09-16.pdf>.

TAPR provides leadership and resources to radio amateurs for the purpose of advancing the radio art and is a research and development oriented group offering kits, assembled products and publications related to the intersection of Amateur Radio and digital technology.

* Don't Forget to Send Your /140 QSLs!: For seven days -- September 2-9 -- the ARRL celebrated the 140th anniversary of the birth of Hiram Percy Maxim, the League's co-founder and first president <http://www.arrl.org/news/stories/2009/08/17/11025/?nc=1>. The highlight of the week-long celebration was an on-the-air Special Event where eligible amateurs could add /140 to their call signs, and amateurs who had more than 25 QSOs (with endorsements in increments of 25, up to 100) with /140 stations would receive an attractive award certificate. W1AW Station Manager Joe Carcia, NJ1Q, reports that so far, more than 200 applications for the certificate have been received, with more arriving at ARRL HQ every day. "Here at W1AW, the Hiram Percy Maxim Memorial Station, we signed more than 700 QSOs with the /140 Special Event suffix," Carcia said. "This is a great way to remember 'The Old Man,' and I know that if he were alive today, he would have been on the air, enjoying all that Amateur Radio has to offer today's ham." It's not too late to apply for your award certificate -- all requests must be postmarked by October 9, 2009. Paper logs, along with a $5 fee, should be sent to HPM/140 Celebration, ARRL, 225 Main St, Newington, CT 06111.

* Alpha Radio Products Now RF Concepts: On September 15, Michael Seedman, AA6DY, announced that his company, RF Concepts <http://www.rfconcepts.com/>, had purchased Boulder, Colorado-based Alpha Radio Products <http://www.alpharadioproducts.com/>. Seedman explained in a press release <http://www.rfconcepts.com/dear_alpha_customers.asp> that when he contacted Alpha to purchase a new amplifier, he was "disappointed to learn that I would not receive it for months." He was told that as each amplifier is made by hand, there was not enough shelf inventory to send a new one right away. Working with Alpha Products president Molly Hardman, W0MOM, "we created a way to capitalize the company in order to put amplifiers in inventory for immediate availability. Customers will no longer have to wait weeks or months to add an Alpha product to their station." Seedman said that RF Concepts "will focus on shipping our backlog of Alpha amplifiers and building sufficient product to ship from stock. We will honor our existing customer commitments -- including warranties, customer and technical support and repairs -- and keep our extensive parts inventories to support the more than 10,000 Alpha amplifiers in the market." Hardman will be staying on as Vice President of Sales for RF Concepts.

* South African Amateur Radio Payload Reaches Orbit: After several delays, South Africa's SumbandilaSat satellite <http://www.amsatsa.org.za/SZASAT.htm> finally blasted to orbit aboard a Soyuz rocket from the Baikonur Cosmodrome in Kazakhstan on September 16 <http://www.russianspaceweb.com/baikonur.html>. The main payload is a multi-spectral imager, but the satellite also carries an Amateur Radio

component consisting of a 2 meter/70 cm FM repeater. After SumbandilaSat is fully commissioned, the repeater will be activated with an uplink at 145.880 MHz and a downlink at 435.350 MHz; there will also be a voice beacon at 435.300 MHz. The transponder mode will be controlled by a CTCSS tone on the uplink frequency. The CTCSS tone frequencies have yet to be announced. SumbandilaSat was sponsored by the Department of Science and Technology and was built at SunSpace <http://www.sunspace.co.za/> in cooperation with the Stellenbosch University <http://www.sun.ac.za/>. In addition to the SA-AMSAT amateur module, the satellite carries Stellenbosch University's radiation experiment and software defined radio (SDR) project, an experiment from Nelson Mandela Metropolitan University and a VLF radio module from the University of KwaZulu-Natal.

==========
The ARRL Letter is published Fridays, 50 times each year, by the American Radio Relay League: ARRL--the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify

membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Friday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

Spring is well upon us now and somehow the conditions down here are mimicking those on the solar surface.Normally, if the rains had been consistent, there would be shoots and flowers in abundance but like the

solar surface, the early signs are about but there are no bloomin' sun spots.

It is also the time that reminds us that the long summer holiday period

is not that far away. More grass to cut and preparations to make for family gatherings and parties in December.

So how are you preparing for this period? Is your club holding a summer

get-together and organising working bees to keep the grass cut and the cobwebs at bay? Have you got your program to take advantage of what may

be fleeting openings on HF with hopefully the bands above 10m giving some good sport?

Just as the authorities give warnings about road safety, safe enjoyment

of water sports and awareness of hostile natives such as crocodiles and

snakes, we should all be aware that enjoying amateur radio should be done with care, too. Whether we are at home or doing some field day contesting, we need to use safe practices. Make sure that the metal antenna is not going to foul electricity wires during erection or should it be brought down by storm damage. Make sure that proper fatigue management is employed if you are driving in the summer heat and playing AR.

Just remember that Ross Hull, whose name is remembered in one of most prestigious contests, died as a result of electrocution caused by a momentary lapse of concentration. AR is not an extreme sport, for most of us, and we look forwarded to hearing you on the air in the future.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

At last Monday's night meeting Shaun VK4FY and James VK4TJF provided a detailed briefing of the club's RD contest weekend. Shaun reported on a fabulous weekend where 570 contacts were made. Shaun requested for any feedback on the organising of the event as it was the 1st time for both he & James. Members present thanked both Shaun and James for a job well done.

Club president, David VK4DC, moved a vote of thanks to Shaun VK4FY for his fantastic efforts on the new club web site. It really is worth a look and Shaun would welcome any feedback.

JOTA weekend is on the 17 & 18 October. The meeting discussed the event and the overall project leader will be Glen VK4FZ. There is always a need for lots of volunteers to assist and the club will be conducting all the same events as last year.

There will be no open fires allowed at the site this year and so the ever popular camp roast will not happen this year. So it will be BYO food & drink and the club BBQ's will be supplied. Don't forget it is BYO water, chairs & tables etc, and discussions are under way for the use of the showers. Camping fees are yet to be advised but it will be about $5 per night to cover toilet & fuel etc-

Any amateur in the greater Brisbane area who would like to assist the club with the anticipated 400 scouts, cub, guides and rovers who will be visiting the site, should contact Peter, VK4TAA via the Redcliffe's club website.

John VK4YJB should be certainly proud of the 2 metre antenna he designed and built for the club's repeater and last afternoon Monday Bob, ZL3ADH called in from Greymouth, New Zealand direct. Club members initially thought that he was using ECHOLINK but he wasn't. He was working the repeater using 80 watts FM and a 16 element collinear 2 metre antenna. The troposphere ducting was working well and the following stations were able to work Bob before the signal died, VK4TV, VK4FKEN,VK4YZ, VK4KET and VK4CF. It was a really fantastic and unusual contact of about 2400 km for all involved.

So until next we meet, this is Ray Vk4CF and you are listening to QNEWS via VK4WIA.

GREETINGS! THIS IS DON VK4FNQA BRINGING YOU TODAY'S NEWS DIRECT FROM THE NORTH QUEENSLAND AMATEUR RADIO CONVENTION BEING HELD AT THE JAMES COOK UNIVERSITY----

TARC VICE PRESIDENT GAVIN VK4ZZ HAS THIS TO SAY....

"THE CONVENTION IS INTO ITS SECOND AND FINAL DAY AND I AM CONFIDENT THAT ALL ATTENDING ARE ENJOYING THEMSELVES AND THE WEEKENDS DIVERSE PROGRAMME ORGANIZED... A TERRIFIC START LAST FRIDAY NIGHT AT THE 'MEET AND GREET' AT THE FROG AND TOAD RESTAURANT - YESTERDAYS TWO PRESENTATIONS SOLVING THE ANTENNA CONUNDRUM AND IS BPL DEAD WERE EXCELLENT AND WELL RECEIVED, SO TOO WAS THE LADIES AND GENTS VISIT TO THE TOWNSVILLE MUSEUM"

NOW, A FEW WORDS FROM PHILIP VK4HSV - TARC SECRETARY....

"A GREAT CONVENTION - LAST NIGHTS 'CONVENTION BANQUET' ALSO HELD AT THE FROG AND TOAD RESTAURANT WAS A WORLD CLASS EVENT AND A FEW SLUGGISH OM's ARE EVIDENT THIS MORNING - HI HI ---- THE LADIES ARE ABOUT TO LEAVE AND INVADE THE WILLOWS MARKETS TARC WILL SHORTLY PRESENT THE CLUBS FORUM STARTS SHORTLY SO I MUST BE AWAY .... BUT NOT BEFORE I HAVE A LOOK AT THE PRE LOVED TREASURES ON OFFER AT THE CAR BOOT SALE"

ONE OF THE MANY VISITORS ATTENDING CONVENTION JUST HAPPENS TO BE THE FATHER OF PHILIP / VK4HSV; GEOFF VK4FGGS HAILS FROM WARWICK, SOUTH EAST QUEENSLAND AND IS ATTENDING HIS SECOND CONVENTION HERE IN TOWNSVILLE.....

GEOFF HAS THIS TO SAY....

"THANKS DON, GREAT TO BE HERE IN TOWNSVILLE WITH THE FAMILY AND JOIN IN WITH TARC MEMBERS AND ALL OF THE OTHER VISITORS TO CONVENTION 2009. I HAVE

THOROUGHLY ENJOYED ALL OF THE PROCEEDINGS SO FAR AND REALLY LOOK FORWARD TO TODAY'S PROGRAMME AND HAVING A FURTHER LOOK AT HOME BREW ENTRIES AND THE MOUTH WATERING TRADE DISPLAYS BY NAVCOM ELECTRONICS"

WELL LISTENERS,THERE YOU HAVE IT FOR THIS MORNING!

A GREAT CONVENTION, AND ITS NOT OVER YET. THE BIG FAVOURITE IS THE 'MONSTER AUCTION' WHICH WILL GET UNDERWAY AFTER ANOTHER SCRUMPOUS LUNCH TODAY.

SORRY, WE HAVE SO MUCH TO TELL OUR LISTENERS, BUT WE HAVE SIMPLY JUST RUN OUT OF TIME, SO, IT'S A BIG CHEERIO FROM CONVENTION CITY HERE IN TROPICAL PARADISE, TOWNSVILLE.

THIS IS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC..

WIANEWS FOR WEEK COMMENCING SEP 30 2009.

- cb's mountain radio challenge.
- JAMOBREE ON THE AIR A MONTH AWAY.
- north queensland amateur radio convention this weekend.
- OPPORTUNITY FOR A YOUNG AMATEUR TO JOIN DXPEDITION.
- iaru region 3 conference next month.
- ELF CLAIMS TO HAVE TOPPELED TWO RADIO TOWERS IN USA.
- promoting amateur radio world-wide from the 'fourth plinth'.
- SOLAR MAXIMUM SUNSPOT COUNT TO REACH A 90 HIGH?
- kid's in space.

ALL UP AND COMING IN THIS EDITION OF WIANEWS WEEK COMMENCING SEPT. 20.

28-29 November, the same day as the WIA Spring Field Day is the Mountain Radio
Challenge which is a long running CB radio event.

Tony Lock who is the organiser of the M.R.C. event comments that the two events could complement each other as there are many high mountain tops registered already for the event including Mt Barrow and Burnie in VK7 and Mt Fatigue and Mt Bunninyong in VK3 and many other mountains.

The Mountain Radio Challenge is a CB Radio event that started around 1980. The idea was to see what distance could be achieved, on 27MHz, using ground wave.

Anyone could talk skip interstate or overseas, but to talk long distance without skip was a challenge. This event originated from CBers in the North Eastern Suburbs of Melbourne who would find mountains to camp on for the night, and see what distances could be achieved.

With some knowledge on several mountains, and some confidence of what distances could be achieved it soon spread out across the country, creating a chain or link of stations. The aim is to pass a message from the first to the last station and back again, a version of Chinese whispers.

The M.R.C. HF CB Call Channel is Ch 27 USB (27.275MHz) and the MRC UHF CB Call Channel: Ch 27 (477.075MHz) and there are set times to be listening that are available on the web editions of wia national news

www.mrc.cat.net.au

(Sourced from the VK-VHF Mailing List)

Jamboree On The Air is only a month away, and again some 500,000 Scouts worldwide, along with Girl Guides, will take part in Jamboree On the Air and Jamboree On The Internet.

Every year there is a theme for JOTA-JOTI, and this year the theme is Global Climate Change. Having a theme helps provide a framework for the weekend's activities. I look forward to hearing some interesting reports on JOTA 2009.

As in previous years, Amateurs around the world will be invited to help out with a JOTA activity, and many will accept the challenge. Providing an interesting JOTA has been quite difficult in the past several years due to poor propagation, so by providing an interesting programme around the radio activities, an enjoyable weekend is assured.

We must remember that for Scouts, the primary purpose of Jamboree On The Air is to make contact with other Scouts and to exchange information about what they do in Scouting. As Amateurs, we assist for the same reasons, as well as for the promotion of Amateur radio as an interest or hobby.

Unlike a contest, JOTA is not competitive, but it has the same excitement as a contest, because we know the bands will be well used, and whatever propagation exists will be used for maximum effect.

There is growing interest by Scouts in JOTA and Amateur Radio, so there's no time like the present to give the hobby a boost by introducing it to young people.

If you are approached by a Scout or Guide Group to help out with JOTA and/or JOTI, please consider saying yes. I would also like to point out that most States have laws relating to working with children, and I advise you to find out from your Scout Contacts what the rules are in your State or Territory. It's better to do this well before the event to allow the process time to work.

Information about JOTA and JOTI can be found at www.scouts.com.au
Look under the International Menu Item.

Check that site for updates regularly as the event comes closer.

JOTA-JOTI is on October 16-18.

North Queensland Amateur Radio Convention this weekend

As the news goes to air this morning hams and support crews in the north have been enjoying themselves during attendance of the 19th North Queensland Amateur Radio Convention.

The event was opened on Friday evening September 18th at the Frog and Toad Bistro by Richard Goodhew VK4FRJG, a member of TARC for many years and now one of the more active northern Foundationers.

North West Tasmania Amateur Television Group

http://www2.vk7ax.id.au/atvgroup

The next General Meeting of the Club is scheduled for Saturday 3rd October at the Ulverstone Lions Club Facility, the Show Grounds, West Ulverstone.

Start time for the meeting is 2.00 PM and members please note this is an important meeting and the last chance to discuss, as a group, the final arrangements for the forthcoming JOTA activity during the weekend of 16/17/18th. October.

Guest speaker for the meeting will be Tony VK7AX discussing all the facets of Amateur Television, both past and present. As usual all persons welcome.

(Tony VK7AX, News Officer NWT-ATV Group)

REWIND
Geoff Emery vk4zpp

Sometimes a trip down memory lane refreshes the awareness of how far things have come in a relatively short time. When we consider that our hobby of AR is officially 100 years old and we have progressed from spark transmitters and coherers to software defined radios, seen the development of the thermionic valve and it's near demise and the invention of the transistor and its metamorphosis into the IC and the heart of any computer is packed with legions of dwarf semiconductors, it has been a fascinating ride, to say the least.

Over the last week I have been able to re-read Neville Williams "Australia's Radio Pioneers", published by "Electronics Australia",1994. Many of the names that we recognise from our hobby such as Ross Hull and John Moyle become more than just names on a contest. Much of the experimental work which brought about our country wide broadcasting and television services was done by radio amateurs, or licensed experimenters, as they were known in the foundation years of wireless.

So many of the notable experimenters of the past were also distinguished in their involvement with the Wireless Institute of Australia. Our hobby has traditions built on an historical base that we can be proud to uphold.

As Drew Diamond, VK3XU, points out in the second of his articles on 136kHz, in this month's "Amateur Radio" magazine it was the amateurs that made such big contributions to the understanding of long waves that were relegated to the supposedly unusable short waves. With VK Advanced Licensees now able to apply to once again use long waves, this could be the classic "everything old is new again".

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Euro Space Week

Approximately 500 youngsters from different schools in the French part of Belgium came together with astronauts, cosmonauts as they participated in the "Belgian Space Week 2009" from 14 to 18 September.

The theme of the event in the Euro Space Centre was Life in Space.

Students talked to the Belgian ESA astronaut Frank De Winne and ask him questions about his life in the International Space Station and about his experience as UNICEF ambassador.

Opportunity for a young amateur to join DXpedition

The operators of the 6Y1V contest station in Hopewell, Jamaica,
are offering a young radio amateur the chance to join their team

for the 2009 CQWW SSB or CW contest.

Applicants must be 21 or younger and the operator selected will receive an all expenses paid trip to join the team's operations in one of the two contest operations.

To qualify, you must send an email to contest@6y1v.com containing an essay of 500 words or more, in English, describing how you got started in amateur radio, who guided you through the process and why you should be selected for this DX and contest opportunity at 6Y1V. Please include your full name, callsign and home address. The 6Y1V group calls this project a gift to a young amateur whom has a passion for ham radio, DXing and contesting.

More information is at www.6y1v.com/youth.htm

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

IARU Region 3 Conference next month

The 14th triennial meeting of the International Amateur Radio Union Region 3, which covers Asia and the Pacific, will be held in Christchurch New Zealand the 12th to the 16th of October, and hosted by the NZART.

Among the papers to be presented are those from the WIA on Broadband over Powerlines, a review after three years of licence restructure including the introduction of the Foundation Licence, the expanded 7MHz band and emergency communications.

In other papers to be considered are those on electromagnetic compatibility, band planning, ethics and operating procedures for radio amateurs and intruder watch.

Want to know more? Check out the internet address for all papers in the text edition of this news bulletin

(http://www.iaru-r3.org/14r3c/docs/docs.htm).

VISITING INDIA SOON?

The 18th Hamfest in India, HamfestIndia 2009 and Bangalore Amateur Radio Club (BARC) say the VU2ARC Golden Jubilee Celebrations are just round the corner.

The event being conducted in Bangalore this year is scheduled for Saturday-Sunday, 7 & 8 November 2009 and they welcome all Hams and SWLs from around the world to be part of this Festival in Bangalores.

Please log on to www.hamfestindia.com

N6MGM HOME LOST IN SOCAL ARSON BRUSH FIRE

The Station Fire which burnt in the hills North of Los Angeles has claimed the home of Mark Moore, N6MGM.

N 6 MGM, who works at Ham Radio Outlet in Burbank California wanted everyone know that he, his wife Amanda, K6MDY, their children and pets are all in good health. They are however emotionally devastated because the fire consumed the home, it's belongings and memories collected over many years.

Moore's amateur radio station was also lost.

The Station Fire destroyed about 230 square miles and is the largest on record in Los Angeles County.

Through Terry Graves and QRZ dot com, Moore express his appreciation to all for support and best wishes.

(details sourced to arnewsline)

OALKAND CENTER FLIGHT COMS GO OUT

Air traffic controllers at a major control centre in California say they were forced to use their personal cellular telephones to guide dozens of planes. This, when the aircraft direction communications system briefly went out.

The communications outage affected about half of the roughly 80 controllers on duty at the Oakland Centre in Fremont. Gone for several minutes were both radio and telephone communications. According to news reports the controllers said they used personal mobile phones to contact other controllers to relay flight plan information to airplanes in Western region.

The Federal Aviation Administration issued a statement saying that at no time were any planes were in danger during the 15-minute outage and that only five flights were delayed.

==========

NEWS FROM ARNEWSLINE

ELF CLAIMS TO HAVE TOPPELED TWO RADIO TOWERS IN WASHINGTON

A radical group calling itself the Earth Liberation Front is claiming responsibility for toppling two radio station towers in Snohomish County Washington early Friday morning, September 4th. The towers, owned by station KRKO were felled using a stolen machine called an excavator. A sign left at the scene said the Earth Liberation Front was responsible.

The two towers have been at the centre of controversy for several years. There are four towers currently at the location and there have been plans to build two more. Opponents of the expansion claim that radio waves can harm people and wildlife. More recently, nearby residents said that signals interfering with home phone and intercom lines have increased since KRKO recently boosted its broadcasting power.

The station is still broadcasting on a backup transmitter and antenna. It says that it is going to offer a reward for information leading to the arrest and conviction of those responsible for this criminal act.

SUITSAT 2 NOW ARISSAT-1

The SuitSat-2 project now has a new name to go with its new shape. Its now known as ARISSat-1.

ARISS Chairman Gaston Bertels, ON4WF, the announced the new name for the satellite project and said the team is now moving ahead using the same hardware that was to fly in the Russian spacesuit that got tossed away into space.

The ARISSat-1 team is re-configuring some of the modules to fit into the new space structure being designed by Bob Davis, KF4KSS and his crew. No date as to when ARISSat-1 will be tossed into orbit from the ISS.

HAM RADIO IN SPACE: SWISSCUBE MAY LAUNCH SEPT 21

And the HB9AFO SwissCube web page reports that ham radio satellite may be launched on September 21st. SwissCube is one of four amateur radio satellites that will be launched from India on an PSL-VC14 booster. More information on this hamsat is on line at tinyurl.com/SwissCube.

G4TUT SOUTHGATE AMATEUR RADIO CLUB NEWS DESK

Martin Maynard G8CIX

Promoting Amateur Radio world-wide from the 'Fourth Plinth'

Music Publisher and Amateur radio enthusiast, Martin Maynard has been selected for the 'Fourth Plinth.'

His intention whilst on the plinth is to promote the hobby of Amateur radio and raise awareness that it is an interesting and fulfilling hobby.

The 'Fourth Plinth', that Martin will occupy for one hour, is part of a major living monument created by sculptor Antony Gormley. The project has been choosing people from all over the UK to occupy the empty Fourth Plinth in Trafalgar Square in London, a space normally reserved for statues of Kings and Generals.

Martin has been allocated a slot on the plinth between 4-5pm on Friday 25th September during which he will operate a special Amateur radio station callsign GB1AO (Gulf Bravo One And Other).

Martin said, 'As a radio amateur I will be setting up a small modern transmitting station featuring Icom radios and during my hour will attempt to make contact with other amateurs around the country and further afield.'

Every hour, 24 hours a day, for 100 days without a break, different people from all walks of life are making the Plinth their very own. The project is

being streamed live on the event website www.oneandother.co.uk and on the Sky website, courtesy of SkyArts as well featuring a weekly programme on SkyArts.

This coverage has received a huge amount of press interest from all round the world.

Martin lives in Berkshire and was originally licensed in 1969 with an operating callsign G8CIX.

Martin is a successful businessman. He has worked in the fast-pace end of the music business. His company Sounds Good Ltd makes CDs and DVD's and are involved in event management and radio hire.

For more details of Martin's participation and to announce your support go to www.GB1AO.co.uk

Martin's slot is 1600-1700 on Fri 25 September 2009 and the special event station callsign again is GB1AO.

==========

WEIRD AND WONDERFUL

Sometimes older technology can be just as good or even better than new innovations.

A good example of that was the demonstration on television that Morse code is quicker than modern SMS texting on a mobile phone.

Now a technology that existed prior to the telegraph has come up trumps, as Jim Linton VK3PC explains.

"Paul Julius Reuter would be most pleased indeed on hearing news that a homing pigeon has been able to move data faster then Telkcom, South Africa's leading Internet service provider.

Reuter used pigeons in the 1850s to transmit financial market information between Berlin and Brussels, and on that was built the Reuters economic service and news agency that continues today.

The lack of broadband and its high cost is of concern to many within South Africa.

A company called Unlimited IT enlisted a pigeon named Winston, who took just over an hour to fly between two of its offices with a data card strapped to his leg.

Including the flight time the downloading of the card took over just two hours, while during the same time only four per cent of the same data could be transferred using a Telkom line.

Internet should become faster and cheaper when a new underwater fibre optic cable links southern and eastern Africa to other networks, just in time for the Soccer World Cup being held in South Africa next year".

EU-109, on 25th and 26th September. He is restricted to just 4
hours of operations each day between 10.00 and 14.00 UTC.
Activation is also dependent on the weather.
More information at www.m0ovl.co.uk

Dale, VK4DMC has told us that Cezar, VE3LYC, recently activated the
Ottawa Islands (NA-230) as VY 0 O which turned out to be a big adventure
for him, bad weather, polar bears, boat problems (engine, back engine and
sinking).

Despite this, he made a total of 3,000 QSOs with stations on all continents.

53% of the contacts were on CW!

Read his interesting story at: http://www.qrz.com/db/vy0o

Tonga Ministry of Communications and Information September 8th has authorized
amateur radio operation on the 60 Meter Band (5.330 - 5.405 Mhz), on a
secondary, restricted basis.

The 60M band plan will be the same as is authorized by the FCC,
i.e. 'channelized' USB only, 2.8 kHz maximum bandwidth, with a 50 watt
pep ERP limit:

Channel Centre Amateur Tuning Frequency
-------------- ------------------------
5332 kHz 5330.5 kHz
5348 kHz 5346.5 kHz
5368 kHz 5366.5 kHz
5373 kHz 5371.5 kHz
5405 kHz (common US/UK) 5403.5 kHz

This 60M authorization is effective immediately."

(Ganesh VU2TS)

KE7GGV, Jerry Gaule hails from Oregon and as a former
Radio Broadcaster/Engineer has started the 14.316 MHz Broadcasters HF Net.
This Sunday's 2300 UTC.

This is a gathering place for former and current Radio/TV Broadcasters-Engineers, an open net with roundtable discussions, technical tips and ideas and more.

WIRELESS WEATHER

Solar maximum sunspot count just 90 ?

The U.S. Dept. of Commerce, NOAA, Space Weather Prediction Centre (SWPC) have issued a prediction that the next Solar maximum will be May 2013 with a predicted sunspot count of just 90.

This prediction follows on from other gloomy forecasts from various sources, however, it must be remembered that humankind knows next to nothing about the suns behaviour.

Data from solar observing satellites goes back barely 3 decades and visual recordings of sunspot data only extends over a few centuries. It is likely that the sun's activity is influenced by a mixture of a number of short term and longer term cycles some of which may extend over many millennia.

It will be quite sometime before we can fully understand the complex nature of the sun.

The latest prediction can be seen at the web version of this newscast on wia.org.au

http://www.swpc.noaa.gov/ftpdir/weekly/Predict.txt

NASA - Are sunspots disappearing?

http://www.southgatearc.org/news/september2009/are_sunspots_disappearing.htm

INTRUDER WATCH - ENFORCEMENT ZONE

Dutch authorities propose rebanding D-STAR into 70cm satellite band

Information received at South Gate Amateur Radio Club news suggests the Netherlands have indicated a growing threat to frequencies allocated and used by the Amateur Satellite Service.

Worldwide, including the Netherlands, amateur use of frequencies in many portions of the 70cm band are allocated as secondary users.

The threat arises from proposals to move the output frequency band of terrestrial D-STAR repeaters from the 439-440 MHz range down to 437-438 MHz.

Dutch regulators have halted amateur D-STAR repeater licensing in that country because they plan to reallocate 439.500 MHz and upward to the Differential GPS (DGPS) service.

Despite protest from Dutch amateur radio operators, amateur clubs in the surrounding countries, and regulators in nearby countries, it seems as if the Dutch authorities are still planning on this frequency re-allocation to favour DGPS operation.

If completed this reallocation of the terrestrial D-STAR repeater outputs would place them right in the downlink band of the Amateur Satellite Service.

This would have immediate operational impact on European amateur satellite stations. Longer term it may open the door for future infringement on satellite operations in other countries.

(SouthGate)

A fix for BPL's own interference

Apparently, a problem being experienced by power companies setting out on the path of powerline communications or BPL is that their systems can generate radio frequency interference that disrupts the throughout of data.

Exacter Incorporated of Columbus Ohio, claims that to have the technology that can improve power system infrastructure by locating any radio frequency interference it generates.

The company uses a vehicle-mounted sensor combined with GPS technology that takes readings as the vehicle travels.

Interference, even at a low level, such as arcing connections or insulators are automatically mapped enabling maintenance crews to be dispatched to fix the problems.

Apparently failing and poorly installed equipment can literally stop data transmission over powerlines. Interesting?

How the technology which Exacter describes as having a patent pending, differentiates between powerline noise and BPL radio frequency pollution, is not known.

I'm Jim Linton VK3PC and you're listening to VK1WIA.

Amateur Radio Magazine Previews
September 2009

Amateur Radio magazine for September is now in your newsagents. And it is well worth picking up a copy. Why not reserve one every month to make sure they are not sold out on you. You will see a couple of intrepid amateurs on the front cover, well rugged up, because they are operating from the Mount Kosciusko summit - portable, of course.

>From time to time, one of our Amateur Radio articles provokes a reader to say, "Hang on a minute", or technical words to that effect. This time it was the article by Lloyd Butler VK5BR in the August issue, which described a transmission line Balance Meter. Read the 'Over To You' discussion on page 11, sent in by Rod Reynolds VK3AAR, together with the response from Lloyd.

WICEN (that's Wireless Institute Civil Emergency Network) did some really good work during the Victorian bushfires last February, and some of it was written

up in Amateur Radio, May issue (pages 12 & 14). Now WIA President Michael Owen VK3KI is asking "What about WICEN?" in his regular column on page 3. Michael examines the past, present and future of WICEN and asks for comments or advice from anyone with an interest.

Drew Diamond VK3XU, who is probably most frequent contributor, is exploring the propagation of signals on 136 kHz. See page 12 for a very instructive, but easy to follow, explanation of how long-wave radio signals behave adjacent to the earth. And this is really long-wave, at about 2,200 metres. Drew is always good reading - don't skip over this one.

On page 2, Editor Peter Freeman (now VK3PF) reports on a disaster at his QTH, brought about by the recent storms. Peter is currently scanning AR Mag for a new mast, plus several replacement antennas, to make good the damage. Nevertheless, October Amateur Radio will be published on time, as always.

(Compiled by: Tom Potter VK3UBS)

November through March 0900 UTC 7.068 MHz

VK3DQ on behalf of the Sherbrooke Community Radio Club say that the Sherbrooke community school will be making a contact with the space station during the week starting 26th Oct.

The School / Club station is VK3KID.

An e-mail from Tony VK5ZAI late last week saw frantic activity with teaching staff , students and local amateurs gearing up to prepare for the contact which is at short notice after a school in Canada cancelled

and VK3KID was offered the slot so its been all hands to work.

The students who are going to speak to the space station have been selected and they are busy devising their questions and brushing up on their on air techniques .

John VK3DQ visited the school for the morning staff meeting followed by the school morning student meeting and found both staff and students bubbling with excitement , and the radio shack saw many visitors during

the day, Jim VK3AMN president of the Sherbrooke Community Radio Club has accepted the extra workload with a huge grin .....

Interested amateurs and friends are welcome to attend , there will be a full day of activities in addition to the contact.

Technology Mix Gets the Group Together

WICEN Tasmania (South) holds a net each Thursday evening, normally extended via the newly licensed VK7RBI located on South Bruny.

The facility is able to be switched to other frequencies on a temporary basis and one of these is normally used for the WICEN net. Michael VK7FMRS's QTH is out of range for simplex comms and of R5, but has no problem getting into VK7RBI. With the Bruny extension being off air, he would have missed out on the WICEN net.

This is where the technology mix came in. The September edition of the ARRL's QST magazine included an article titled "Bridge the Round Table Gap with Skype" and provided a solution to the challenge of getting into the radio black hole of Cygnet/Cradoc. Roger VK7ARN, WICEN Secretary, set up a Skype account on a computer linked via a Signalink USB device to a radio.
On another computer, running another Skype account, he set up a conference call between himself, the radio linked computer and Michael VK7FMRS.

The radio networkers talked normally on air. This was picked up on Roger's radio linked to the control PC which was a member of the Skype conference group. In this way they had a successful integrated Skype and radio network.

All reported excellent results.

Lots of opportunities here.

Think about a local radio network with overseas guests. Of course, the combined net is restricted to licensed Amateurs as all participants end up `on air'.

(Roger, VK7ARN)

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS SUNDAY 20 SEPTEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail. Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

In the news today.

SUMBANDILASAT SUCCESSFULLY LAUNCHED

REPEATER FREQUENCY PLANNING

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

We start today's SARL News with good wishes to our Jewish listeners who are celebrating their new year this weekend. To our Jewish friends "May you be inscribed for a good year!"

SUMBANDILASAT SUCCESSFULLY LAUNCHED

Third time lucky! SumbandilaSat was successfully launched on 17 September at 17:55:09 CAT (Central African Time) after the launch had to be postponed twice, once due to heavy winds and the second attempt due to the fuel pressure in the feed line which was four times too low and thus caused the fuelling process to take too long to be completed in time for launch.

The satellite was released from the rocket while over the Antarctic and accessed by the ground station at the Stellenbosch University ten minutes later when the first command was sent to "wake up" the satellites. Despite the low elevation orbit of less than 10 degrees SumbandilaSat responded well with its first telemetry. On a pass on Friday morning the SunSpace team confirmed that the transponder, which also carries the amateur radio facility, was operating well.

Earlier in September a team of SunSpace Engineers unpacked the satellite at the Baikonur launch facility in Kazakhstan and carried out a full systems test. All systems performed to specification. The amateur radio payload was tested from a little distance to check radio signal levels. All three systems, the voice beacon, the parrot repeater and the VHF/UHF FM repeater performed flawlessly.

Next, SumbandilaSat was integrated on the launch platform and made ready for launch. Prior to the assembly being transported to the launch platform, the batteries were given their last top-up.

An intensive period of payload qualification will now follow during which each system will be tested. This is expected to take up to 3 months after which the command will shift to the CSIR's Satellite Application Centre at Hartbeeshoek, west of Pretoria.

The voice beacon message was recorded by Anton Coetzee, at the time a learner at the Technical High School Kimberley. His message was selected from entries in a competition to find the best message with which to launch SumbandilaSat. It reads: "This is ZSOSUM in space. I am the voice of the South African youth. We are knocking on the door of opportunity, marking our place in the orbit of space research and communication. Hear us! Listen to us!

Visit www.amsatsa.org.za, listen to the beacon message as well as the first set of Keplerian elements

Once the main payload, a Multi-spectral imager, which has a 6,25 m Ground Sampling Distance (GSD), with 6 spectral bands and is supported by an on-board storage of 24 Giga byte of memory and a main downlink of 72 Mb/s is fully put into service, will a schedule be set up according to which the various experimental payloads on board will be operated. The SA AMSAT web will publish regular updates. Listen on 435,350 during passes over South Africa. At some stage SunSpace will be testing the amateur payload. If early notice is received it will be published on www.amsatsa.org.za.

REPEATER FREQUENCY PLANNING

At the repeater frequency planning meeting held last Saturday Riaan Greeff, ZS4PR, has undertaken to put a working group together to bring all the current information up to date. As part of that process all clubs and repeater co-ordinators are requested to bring the details currently on the SARL web up to date before 30 September. On 30 September the repeater pages on the web will be removed and a process will be started to correlate frequencies and data with licenses. This is step one in the process. More details will be made available on how the process will develop from there. The important point is to bring your repeater information on the SARL web up to date before 30 September.

A process is in place to make contact with clubs and their repeater co-ordinators to resolve any anomalies before any further action will be taken. Your urgent co-operation will be appreciated. For any queries

please contact Riaan Greeff by email to riaang@vut.ac.za.

CONTEST NEWS

On Wednesday evening, J B Coetzee, the 3 year old the son of Gerhard, ZS3TG, did the draw for the ARRL Basic Antenna Handbook for the logs submitted for the SARL HF Phone contest. The winning call sign belongs to Geoff Levey, ZS6GRL. Congratulations Geoff.

The first YL Sprint (9 August) brought in eight logs from the beautiful ladies and two logs from the men folk. The sprint was well received and will be on the calendar for 2010. The results are as follows: 1st Rosalie van Loggerenberg, ZR2RL, 140 points [now ZS2DN] 2nd Colette Rundle, ZS2CR, 131 points 3rd Pam Momberg, ZS6APT, 100 points 4th Dawn Snyders, ZS5ME, 62 points 5th Melinda Mynhardt, ZU6MM, 45 points 6th Michelle Harris, ZS4M, 33 points 7th Pauline Hollis, ZS1PLN, 32 points 8th Martin Smith, ZS5M, 14 points 9th Mary Ann Meyer, ZU5MAM, 5 points

Check log: Jan Botha, ZS4JAN, 12 points

ZS4SRK invites everyone to start planning for the September 2009. Support your heritage by activation of Blockhouses, heritage sites or just some historic site where you had lost your glasses! Send your ideas and plans to the ZS4SRK club secretary by e-mail to zs4pr@qsl.net so they can know where to point their 40 m antennas. Both CW and SSB will be on the air. The frequencies to be used for the Heritage Day Sprint on 24 September are 7,000 to 7,025 MHz for CW and 7,060 to 7,100 MHz and 7,130 to 7,200 MHz for phone. Submit logs to The Sasolburg Amateur Radio Club, ZS4SRK, PO Box 28194, Sonlandpark, 1944 or via email to riaanzs4pr@gmail.com. The closing date for log submissions is 6 October 2009.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at a minimum. The visible solar disk is void of any sunspots. Solar activity is at some of the lowest levels ever recorded.

20 and 40 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoon onwards. During the late afternoon and early evenings it will be good towards Europa. In the mornings it may be possible to make contacts with Australia. Contacts with New-Zealand may be possible on 40 m during the evenings. During the early mornings and evenings 40 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 to 20 September - SARL VHF/UHF Contests; 19 September - Hamnet Gauteng South and Ekurhuleni DMSCV training exercise; 24 September - Heritage Day sprint; 24 September - Deadline for entries for the October RAE; 6 October - Logs for Heritage Day sprint to be in to riaanzs4pr@gmail.com.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Roger, ZR3RC, and edited by George, ZS6NE.

Thank you for listening, 73.

DX Bulletin No. 926
BID: $OPDX.926
September 21, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1MI/HB9DST, K1XN & GoList, NC1L, NJ1Q, W2CG, W2VU, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, 9M6XRO, AT International, DJ8NK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, I1JQJ/IK1ADH & 425 DX News, IN3VZE, M0URX, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VE3EXY, VHF-DX-Portal (MMMonVHF) and YO3HJV for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 13th-September, through Sunday, 20th-September there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FR/g, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T31, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, V8, VE, VK, VP2V, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). Jan, DJ8NK, informs OPDX this past week "all is prepared for our DXpedition to Conway Reef (3D20CR), the rigs, antennas and gear are all packed and a pre-shipment by air will leave Hamburg tomorrow (September 15th). The crew will fly out on September 24th, and we plan to start operation on October 1st." The DXpedition

is still looking for sponsors. The total amount of the operation is estimated at 64,000 USDs. For details/updates and how to donate funds for this operation, please visit their Web page at: http://www.conwayreef2009.de

3W, VIETNAM (Update [VERY RARE IOTA - #2]). An international group of operators will be active as 3W6C from Con Co Island (AS-185), Vietnam, in April 10-18th, 2010. This multi-national project, being coordinated by Swiss ham-radio operators, consists of roughly 20 individuals including one woman with members not only from Switzerland but also from Vietnam, Germany, USA and Japan. Operators mentioned as of today: Team Leader Hans-Peter/HB9BXE, Jan/DJ8NK, Hans/HB9BHW, Rene/HB9BQI, Christine/HB9BQW, Markus/HB9DIZ, Hans-Jurg/HB9DKZ, Paul/HB9DST/AA1MI, Leo/HB9DWL, Hans-Peter/HB9EHP, Matthias/HB9JCI, Peter/HB9PJT, Eddy/XV1X and Michal/XV9DX. During their stay, they plan to have 4 stations on the air. Their goal is to make contacts on as many different frequencies as possible, even on the 80 meter and 160 meter bands, which makes this DXpedition very special. But this goal also means that the group must transfer considerable amounts of equipment ï¿½ including radios, antennas, power generators, computers, and various ancillary supplies ï¿½ with them to the island. The team is looking for sponsors (whether individuals, ham-radio clubs or commercial) to help offset the costs. Complete details are available at: http://www.3w6c.qrv.ch
ADDED NOTES: Con Co Island, with a land surface of just 2 square kilometers, is 32 km off the central coast of Vietnam in the Gulf of Tonkin. The island has a population of approximately 400 people. For many years it was a restricted military zone, but today the Vietnamese government is working to turn this idyllic location into a tourist and vacation destination.

7Q, MALAWI. Barrie, G4AHK, will once again be active as 7Q7BJ between September 23rd and October 12th. Activity will be on all HF bands, mainly CW and SSB. QSL via his home callsign, direct or by the Bureau.

7Q, MALAWI. Ely, IN3VZE, informs OPDX that he will be active once again as 7Q7CE from the southwest shore of Lake Malawi from the shack of his good friend Harry, 7Q7HB, between October 2-20th. Activity will be holiday style with planned operations on all bands using SSB and RTTY. QSL via his home callsign, direct or by the Bureau.

9M6, EAST MALAYSIA. Tony, KM0O, will be active as 9M6/KM0O during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. QSL route TBA.

9M8, EAST MALAYSIA (IOTA Op). Steve, 9M6DXX, from the Island of Borneo (OC-088) plans to busy from East Malaysia over next two months. Look for Steve to be active as 9M8Z from Sarawak, East Malaysia (OC-088), between October 22-26th. Activity will be SSB only but will also include operations in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power/Unassisted entry. QSL via LoTW, or QSL direct or by the Bureau to M0URX (or request direct or bureau cards on-line [see info at: http://www.m0urx.com/direct-a-bureau-instructions.html]).

In early November, Steve/9M6DXX will be joined by John/9M6XRO and the operators will activate Pulau Labuan Island (OC-133) between November 6-8th (and possibly for one or two hours on November 9th after 0000z). The callsigns and operations will be as follows:
9M6DXX/P - On 80-10 meters; SSB only.
9M6XRO/P - On 160-10 meters; CW and RTTY.
Each stations will be using amplifiers to a multi-band vertical and a 160m inverted-L, both mounted very close to the ocean. Operators hope it will be possible to operate on 160m CW at the same time as SSB on the other bands. QSL both 9M6DXX/P and 9M6XRO/P via M0URX, either direct, by the bureau or LoTW.

A5, BHUTAN. Yasuo, JA1FJJ, will be active as A52FJJ between October 8-20th. Activity will be on 80-10 meters using SSB, RTTY and PSK31. He plans to use 500 watts into a G5RV antenna. QSL via his home callsign, direct or by the Bureau.

ALASKA IOTA OP. Hugh, K6HFA, announced that he hopes to activate the following IOTA groups:
NA-236 - (New) Sanak Islands
NA-222 - South Alaska Peninsula West Group
NA-216 - North Alaska Peninsula West Group
NA-087 - Shumagin Islands
He plans to be in the area between September 21st and October 5th. Callsign will be K7A. Activity will be on 40/30/20 meters using CW and SSB. QSL via K6HFA. PLEASE NOTE (per Hugh): He states, "Due to the very high cost of transportation in this area, I will reluctantly require 3 Green Stamps, Three Dollars, for each direct QSL request for each IOTA group. This applies to all direct requests - USA and NON-USA, EXCEPT members of IREF. All others will be sent via the Bureau."

C9, MOZAMBIQUE. Marco, IK1RAE, will be active as C91VM between October 5-23rd. Activity will be on 40-10 meters using SSB and running 100 watts into a vertical. Marco plans (if possible) to activate IOTA groups AF-061, AF-066, AF-072 and AF-088. QSL only direct. PLEASE NOTE: All proceeds will be donated to a charity project in the village of Malangute - check QRZ.com for the official QSL info.

CQ NEWS (CQ Announces 75th Anniversary Worked All Zones Award). The following is a news release from Richard Moseson/W2VU, Editor CQ Amateur Radio, dated September 18th: "The November, 1934, issue of [R/9] magazine announced a new operating award for radio amateurs, designed to encourage the growing popularity of contacting stations across the globe, what we know today as DXing. The award was called Worked All Zones and was to be granted for making confirmed contacts with hams in each of the 40 zones into which the world had been divided by [R/9's] editors. Today, 75 years later, [R/9] has been succeeded by [CQ] magazine and WAZ - Worked All Zones - sponsored by [CQ] since 1945, continues to be one of amateur radio's most prestigious operating awards.
In celebration of the WAZ's 75th anniversary, [CQ] magazine is announcing a limited-term 'Diamond Jubilee WAZ' award. A special certificate will

be issued to amateurs who make contacts in all 40 CQ Zones of the World between November 1, 2009 and December 31, 2010. Certificates will be numbered but there will be no endorsements. Confirmations will not be required. However, it is expected that applicants will continue to uphold amateur radio's long-standing tradition of honesty and self-regulation. Standard WAZ application fees will apply.
Complete details on the Diamond Jubilee WAZ Award will be in the October 2009 issue of [CQ] and are posted on the CQ website, <http://www.cq-amateur-radio.com/>, with a link from the October issue highlights page.
WAZ is the second-oldest amateur radio operating award still offered today. The only current award that is older is the International Amateur Radio Union's Worked All Continents award. The ARRL's DX Century Club (DXCC) award was introduced in 1936. To date, more than 8,600 basic WAZ awards have been issued. More information on the WAZ award program is available on the CQ website at <http://www.cq-amateur-radio.com/awards.html>"

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
TX3A - Chesterfield Island; 2009 Operation
T6AB - Afghanistan; 2008 and 2009 Operation
T6AF - Afghanistan; Current Operation

* Awards Branch E-mail Change. "There has been a change in one of the awards branch E-mail addresses. This address is no longer accepting E-mail: awards@arrl.org
The address has been changed to: award@arrl.org
Anyone sending an E-mail to awards@arrl.org will get a return message noting this and advising you of the new address. This address mostly affects the Worked All States awards program.
E-mail to dxcc@arrl.org and any of the other e-mail addresses that come to me are not affected by this.", 73 es DX! Bill Moore, NC1L, ARRL Awards Branch Manager

EA8, CANARY ISLANDS. Heinz, DL7HKL, is expected to be active as EA8/DL7HKL from La Gomera Island (AF-004) until September 28th. This will be a holiday style operation on SSB with activity on 20/15/10 meters during his evening hours. QSL via his home callsign, by the Bureau or direct.

EA8, CANARY ISLANDS. Jyrki, OH6CS, will be active as EA8/OH6CS during the CQWW DX SSB Contest (October 24-25th) as a Single-OP/Single-Band (TBA) entry. He will be in the Canary Islands (AF-004) between October 21-27th. QSL via LoTW or to his home callsign direct. Visit his Web site at: http://personal.inet.fi/cool/sierra/

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969) during the CQWW RTTY DX Contest (September 26-27th). QSL via UA3DX.

FO8, FRENCH POLYNESIA (Update). Phil, F5PHW, who will be in Tahiti for the next two years (see OPDX.920 and OPDX.921) and active as FO8RZ, has reported that he has installed the 160 meter kit on his HF6V antenna. It is suggested to start looking for him on 160m. Over the past week Phil has been on 40/30/20 meters CW, with some RTTY. QSL via LoTW. QSL is also 'OK' via F8BPN, either direct or via the French Ref-Union Bureau.

FT/G, GLORIOSO ISLAND (Update). The FT5GA team is now active. The team had some antenna problems at first due to windy weather conditions and a faulty contact on a WARC Spiderbeam (which was fixed). Indications seem that all three stations are now on the air. Most stateside stations report that the FT5GA signals are very weak and propagation is not helping. Activity has been on all bands and the CW/SSB modes with some RTTY. Operations will last until October 5th, per the Web page at: http://glorieuses2008.free.fr
Bob, N6TV, has reportedly put on his Web site some propagation tables (by bands and area) calculated by Dean, N6BV, and they are available at: http://www.kkn.net/~n6tv/ft5ga_prop.pdf
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA

IOTA NEWS.....
AS-014. Operators San/VU2CEO (A45WH) and Manoj/VU2MCJ, along with two SWLs, will be active as A45WH/p from Masirah Island, Sultanate of Oman, between September 22-24th. Activity will be on the top bands, 40/30/20 meters. QSL via A45WH, direct or by the Bureau.

EU-050. Operators Gerry/IZ1DSH and Pasquale/IZ1MLQ will be active as IL7T from San Domino Island (IIA FG-001, MIA MI-085, WLOTA L-1284) between September 24-27th. Using two stations, they will be active on 40-10 meters CW, SSB and the Digital modes. QSL via IZ1DSH, direct or by the Bureau. More information is available at: http://www.aritorino.it/IL7T.htm

EU-123. Ken, G0ORH, will be active as GM0ORH from Aran Island in the Scottish Coastal Islands until September 27th. QSL via his home callsign, direct or by the Bureau.

JW, SVALBARD. Operators Arne/LA7WCA, Maurits/LA3XIA and John/G4ATA will be active as JW7WCA, JW3ZIA and JW/G4ATA, respectively, between October 8-13th. Activity will be on most bands using SSB and RTTY. QSL via the operator's home callsign.

K5D DVD ALMOST READY! The Desecheo video is almost ready according to the K5D Web page. The Web page reports: "Bob/K4UEE and Ed/W4ZSB will produce yet another exciting DXpedition video. In the tradition of previous video productions, the K5D Dxpedition video, entitled, 'Desecheo---so near, yet so far' will be full of exciting footage of the helicopter trips, the island from the air, camp set up and takedown, pileups you won't believe and of course an inside look into the logistics of a big DXpedition, interviews with key team members and of course, humor. The video should be ready by October 2009 and will sell for

25.00 USDs. But by ordering now you reserve an early copy of this collectors' item at a discounted price of 22.00 USDs. As always, this includes shipping and handling." For complete details on how to order, go to: http://www.k4uee.com/dvd

KH6BZF PROPAGATION FORECAST/REPORT (For September 21-27th)....
Sep 21 AN SOLAR REFERENCE
Sep 22 AN ---------------
Sep 23 AN AN - Above Normal/Geomagnetic Level is QUIET
Sep 24 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Sep 25 AN LN - Low Normal
Sep 26 AN-HN
Sep 27 AN-LN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LX, LUXEMBOURG. Philippe/LX2A and a team of operators will be active as LX7I during the CQWW DX RTTY Contest (September 26-27th) as a Multi-2 entry. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

P4, ARUBA. Marty, W2CG, will once again vacation and operate in Aruba between January 5-26th, 2010. Look for him to use a special callsign, either P40C or P40CG (awaiting approval). Activity will be primarily CW/RTTY on 80-6 meters, usually between 1200-1400z and 2000-2400z, other times as schedule permits. QSL is via the LoTW (prefers), or via his home callsign, by the Bureau or direct (U.S. stations, if not LoTW then SASE via CBA).

QSL INFO AND NEWS.....
PIRATE ALERT. The infamous "YL 40m CW Pirate", ZK3T, was active again. Operator was Tanya, on 7007 kHz at 1626z. Save your green stamps.

VC1W QSL STATUS. Nenad, VE3EXY, reports, "QSL cards received from UX5UO. Processing in progress. Check your mail boxes in the next week or two. Requests received with insufficient funds will be responded via the bureau."

VK9NI QSL STATUS. It was announced this past week that the VK9NI Norfolk Island DXpedition (July 2009) QSL cards have finally arrived. Expect to receive your cards in your mailbox soon.

QSLS VIA LOTW: 5N0OCH, 5W0VK and ZK3DX

QSLS RECEIVED VIA MAIL: 5K0T, A45XR, C6AGU, CG200I, D44AC, D44TXS, DY1C, EA9/KH0AM, EX2T, FT5YI, GB5HOD, OH/JA4JBZ, PR5D, TL0A, TM5EL, V63MY, VK0BP, VK9GMW, VP2ETN and ZC4LI

QSLS RECEIVED VIA THE BUREAU: None reported this week!

USVI QSL BUREAU CHANGE. Bill Moore, NC1L, ARRL Awards Branch Manager, advises: "Please note the following update regarding the ARRL U.S. Virgin Islands Incoming QSL Bureau:
For all USVI callsigns:
V.I. QSL Bureau

Virgin Islands QSL Bureau
P.O. Box 25782
Christiansted, St. Croix
U.S. Virgin Islands 00824

Comments or questions on this bureau's operation may be directed to:
Ann Keegan, KP2YL at: kp2yl@arrl.net

VC, CANADA (Special Event). Look for OPP officer Bob Cooke/VE3BDB and other current or retired uniform or civilian members of the OPP, to activate the special callsign VC3COPP between October 2-31st. Activity is to celebrate the 100th anniversary of the Ontario Provincial Police Force (OPP). Since its formation on October 13, 1909, the OPP has grown to become one of the largest deployed police forces in North America. Activity will be on the HF bands, possibly 6 meters, and using CW and SSB. QSL via VE3BDB only direct. Visit the special VC3COPP Web site at: http://www.qsl.net/ve3bdb/vc3copp.htm

VP2M, MONTSERRAT. Operators Tom/DL2RUM (as VP2MUM), Rudi/DM2XO (as VP2MXO) and 3D20CR op Jan/DJ8NK (as VP2MNK) will operate from Montserrat between November 3-15th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns per the QRZ.com address or by the Bureau.

YM, TURKEY. Nick, LZ1NK, will be active from Asian Turkey (Zone 20) as YM3A during both the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (40 or 20m) entry and the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (40m) entry. QSL via LZ1NK. ADDED NOTE: Look for Nick as TA3/LZ1NK before each contest.

YR550, ROMANIA (Special Event). Members of the Romanian Society of Radio Amateurs will activate the special callsign YR550BU between September 18th and October 5th. According to the "Societatii Romane a Radioamatorilor" (SRR - Romanian Society of Radio Amateurs) Web page, activity is to celebrate the 550th anniversary of the first written mention of "Bucharest", the capital city of Romania. SRR states, "Bucharest was mentioned by Vlad Tepes (a.k.a "Vlad - Dracul") in a donation receipe issued at 20th of September, 1459. Vlad Tepes is the character that inspired Bram Stoker's 'Dracula'." The Romanian Society of Radio Amateurs will issue a special QSL card for this occasion. Look for activity on the HF bands, 80-10m. For more information, visit the SRR Web page at: http://www.asrr.org

YS4, EL SALVADOR. Operators Gregor/DF7OGO, Tom/K3WT, Ron/N0AT, Vlad/N0STL and Bill/W0OR will be active as YS4U during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. QSL via N0AT. Look for activity outside of the contest. Operators will be in YS-land between November 20th and December 1st.

ZF, CAYMAN ISLANDS. Joe, W6VNR, will once again be active as ZF2AH from Grand Cayman Island. Activity will include the CQWW DX SSB Contest (October 24-25th). QSL via his home callsign.

ZM2, NEW ZEALAND. Operators Lee/ZL2AL, Stan/ZL2ST, Peter/ZL2LF, John/ZL2QM, Mike/ZL2CC, Gary/ZL2IFB and Wayne/ZL2WG will be active as ZM2M from Napier, New Zealand (OC-036, also counts for WLOTA LH-0069) for the CQWW DX SSB Contest (October 24-25th), as a Multi-2R entry. QSL via ZL2AL, direct or by the bureau.

Sunday 20th September 2009

THEORY CLASSES IN REGION 4

Plans are being put in place to run radio theory classes in the Limerick area by IRTS Region 4 representative Ger McNamara EI4GXB, with the hope that the theory examination can be held in Limerick which will be dependant on numbers.

Those interested in attending the theory classes can contact Ger via email at ei4gxb /at/ gmail.com or 087 2532512 or QTHR

LIMERICK RADIO CLUB

Limerick Radio Club wishes to advise new applicants for membership & former members who wish to re-join the club, can find the application form on the club website at www.eircom.net/ei4lrc

Please forward completed application forms to the club chairman Dermot Gleeson EI2GT at QTHR.

Full details of the application process are also available on the club website.

AREN Net

The AREN Net on the 21st will be a Digital Mode NET. The mode in use is PSK31, and will commence at 19:30 local time.

Dublin Area Repeaters

Dublin, Kippure, repeater EI2KPR on 145.7625 Mhz has been operational since Wednesday 2nd. Sept Access 88.5Hz CTCSS and 2.5Khz deviation.

3 Rock repeater EI2TRR on 145.600 Mhz. is now on it's new antenna since Tuesday 8th. Sept.

3 Rock 70Cms repeater EI7DUR on 433.225Mhz This is back on air also since Tuesday 8th. Sept.

Happy listening, and if your licensed you are more then welcome to use them.

Reception reports to ei2dj (at) eircom.net

Broadcasters HF Net

KE7GGV has formed the 14.316 Broadcasters HF Net-Sunday's 2300 UTC.

This net is a gathering place for current and former Broadcasters/Engineers in (Radio/TV). All Amateurs are welcome.

This is an open net that welcomes roundtable discussions, technical tips and ideas, questions and more.

TAPR Digital Communications Conference

Over the weekend of the 25-27 September the annual ARRL and TAPR DCC is being held in Chicago Illinois.

John Ronan EI7IG will be presenting his joint paper: Experiments with Delay and Disruption Tolerant Networking in AX.25 and D-STAR Networks.

John will also be presenting in the Introductory sessions, an Introduction to APRS.

EI2MOG- How To operate the Internet Gateway

EI2MOG on 145.2125Mhz located on Mount Oriel, Co.Louth now requires the use of CTCSS tone 88.5Hz, and further information can be found at www.ei7dar.com/gateway.html.

EI2GBW Special event Station - Cork Swansea Ferry

The purchase of MV Julia for the new Cork-Swansea ferry service has now been completed. Julia left Finland on 16 September bound for Swansea, and is expected there on Wednesday 23 September for berthing trials before continuing on to Cork.

You can track her progress on marinetraffic.com under 'Ships Map' on the top left of the home page, and then finding 'Julia' under the 'Go to vessel' option.

Following her brief visit to Swansea, Julia is expected in Cork on Thursday 24 September or possibly the next day or two if her departure from Swansea is delayed.

To celebrate her arrival in Cork, special event station EI2GBW will be operating from the AREN mobile command post trailer at Customs House Quay on the day she arrives in Cork. Check press reports for exact timing of Julia's arrival in Cork.

EI2GBW will be QRV on 80m and 40m for the day. Planned frequencies are 3.660 to 3.680 MHz and 7.120 to 7.140 MHz. Operators will be John EI2GN, Tim EI2KA, Conor EI4JN and John EI9JO. Visit the EI2GBW page on QRZ.com for background information on the station.

MRE AGM

The AGM of the Mayo Radio Experimenters will be held on Wednesday October 7th at 9.30pm local time in The Welcome Inn Hotel, Castlebar. All are welcome to attend.

4W6AL Logbook now available online

The 4W6AL log has also been updated and is available online at: http://algarvedx.com

Please Note: QSL Manager/Pilot Station Toze, CT1GFK, reports that some 100 stations worked a PIRATED 4W6AL station on September 12th! Only four stations worked the actual 4W6AL station. Check the log before QSLing

Alpha Radio Products forms new Company

Alpha Radio Products. A newly formed company, RF Concepts, LLC, has acquired all the assets of Alpha Radio Products.

RF Concepts will manufacture the world-class amplifiers and other products that, for more than 40 years, our community has come to appreciate.

Ray Oliver's G3NDS - Sailing

As previously reported Ray Oliver's sail for charity,
Ray is on his final leg of his journey to his homeport

after leaving in April 2008.

Rays journey is available with stories and photos on his blog, weather permitting if all goes well he should be home in time for this weekend.

Rays blog is available at www.roundukcruise.org.uk

Swaziland DXpedition - QSL status

QSL Manager for the Swaziland DXpedition in August 2009, David, GI4FUM/3DA0DJ, reports that 5,000 QSL cards have arrived from the printer (in the Ukraine), on September 11th, so the cards are on their way back to anyone who QSLed direct.

Cards from the UK and Ireland have been dealt with first. Unfortunately, the present postal strikes will not help, but the cards are on their way.

There are two designs, so anyone who worked more than one member of the team should get cards in both designs.

Rallies

Sunday 1st November 2009 Foyle and District ARC Rally

Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA (same hotel as last year)

Sunday 22nd November 2009 Mayo Radio Rally

Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

For more information on Rallies please check the IRTS website.

2284. Why is K1MAN Still Broadcasting?

Newsgroup: rec.radio.amateur.misc
Date: 2009-09-20 22:50:56 UTC
From: "Bob Sherin, W4ASX" <Sherins@bellsouth.net>
Message-ID: <319302bf-8491-41d8-bf79-920b10a67804@y20g2000vbk.googlegroups.com>
Source record: 6398

When hearing K1MAN's one-way broadcasts (e.g., on 20 meters, 14.275 mhz), new hams are likely, incredulous. Yes, Part 97 does prohibit broadcasting. Those of us who've been around the block know Glenn ('me-me') Baxter and his routine. (A brief listen will tell you why "me-me" is appropriate.)

So how does a guy whose license expired on October 17, 2006 without FCC renewal stay on the air? And broadcast no less? Add a $21,000 FCC forfeiture issued on March 29, 2006 and the plot thickens.

According to 'me-me,' he's operating within his privileges. Yes, it's a fact that ham privileges remain when the FCC refuses to act on renewal, leaving a ham in limbo. And while most hams think K1MAN bulletins are illegal per se, fact is, law supports him (equate his activities to W1AW bulletins). He does not, however, have any support to interfere with ongoing communications. Nor can he commercialize our hobby/service.

By broadcasting around the clock, 'me-me' is taunting the FCC, because though it has acted within its delegated authority, the Commission has never given 'me-me' an administrative hearing -- one in which he believes he'll be vindicated.

For its part, the FCC has shown itself to be a paper tiger, enforcement having departed with Riley Hollingsworth. Continuing the status quo sends a message to all licensed hams that, if tagged with misbehavior, we too can flout FCC jurisdiction with impunity. Thus, ham radio misconduct is bereft of consequences, a situation fostering the type of non-compliance experienced in the 1980's.

If the FCC believes justice is on its side, it ought to forthwith send in the U.S. Marshall's and seize 'me-me's' equipment. Conversely, if the FCC has misgivings about its past actions, it ought to make Baxter whole.

Sitting on the fence is no way to go.

Bob Sherin, W4ASX

2285. [RAC-Bulletin] RAC Bulletin 2009-029E - Derek Hay, VE4HAY, elected Midwest Region Director.

Newsgroup: rec.radio.amateur.misc

RAC Bulletin 2009-029E - Derek Hay, VE4HAY, elected Midwest
Region Director.
2009-09-20

Following the September 16th, 2009, close of nominations for the Midwest Region Director position, an Election Committee was convened, chaired by RAC Corporate Secretary Linda Friars, VE9GLF. The committee met to open and review the sole nomination received for the position, as required by the By-laws. There being no other nominees, and the nomination documents found to be in order, the committee declared the incumbent, Mr. Derek Hay, VE4HAY, elected for another two-year term which beings January 1, 2010.

The RAC President, Board and Executive congratulate Director Hay and thank him for continuing to volunteer his services.

G. Linda Friars, VE9GLF
Corporate Secretary - Radio Amateurs of Canada

London-based businessman Saifee Durbar has a novel approach to aiding the people of Darfur and making Africa self sufficient.

Durbar plans to span Africa by linking Sudan in the east with Cameroon in the west with a railroad that goes through the Central African Republic.

Minerals and other raw materials found in the Central African Republic will be used to construct the railroad.

Saif Durbar sees this project as a completion of the vision for African ascendancy that started with the Suez Canal.

Project updates can be found at:

RAC Bulletin 2009-031E - Correction to Bulletin 2009-030E
2009-09-22

A previous RAC Bulletin regarding the election of
Midwest Director Derek Hay, VE4HAY, inadvertently
stated that his term would begin on January 1, 2010.
In fact, Director Hay is completing a two-year term
left vacant when the previous Midwest Director
resigned for personal reasons, a term that will
end on December 31, 2010. RAC regrets any
inconvenience the original bulletin may have caused.

G. Linda Friars, VE9GLF

==> PREPARATIONS UNDERWAY FOR WRC-12

Approximately 200 participants came together in an ITU preliminary meeting that ended September 16 in Geneva, Switzerland to help African countries prepare for the 2012 World Radiocommunication Conference (WRC-12) <http://www.itu.int/ITU-R/index.asp?category=conferences&rlink=wrc-12%C3%83%C2%A2%C3%82%C5%92%C3%82%C2%A9=en>. The six regional telecommunications organizations -- APT (Asia-Pacific), ASMG (Arab States), ATU (Africa), CEPT (Europe), CITEL (the Americas) and RCC (independent states of the former Soviet Union) -- were represented at the meeting. This meeting was part of a series of ongoing international and regional preparatory meetings to allow government and industry to

address the far-reaching and complex agenda of the WRC-12. ARRL Technical Relations Specialist Jonathan Siverling, WB3ERA, and IARU Region 1 Vice President Tafa Diop, 6W1KI, were among the participants.

WRC-12, which will be held in Geneva from January 23-February 17, 2012, will review the international treaty that governs radiocommunications -- the ITU Radio Regulations <http://www.itu.int/publ/R-REG-RR-2008/en>. The conference will be preceded by the Radiocommunication Assembly (RA-12), also to be held in Geneva, January 16-20, 2012.

The agenda for WRC-12, developed by the delegates at the last WRC in Geneva in 2007 (WRC-07), was formally adopted by the ITU Council in 2008. There are 25 agenda items addressing potential new or revised spectrum allocations to existing services. A key objective is the review of the international regulatory framework applicable to radiocommunications. This review should reflect the convergence of some radio services arising from the development of next-generation networks (NGN) <http://en.wikipedia.org/wiki/Next_Generation_Networking>, as well as new radio applications and technologies. Of most interest to amateurs is agenda item 1.23, "to consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services."

"This agenda item is the highest item on my long term priority list," said ARRL Technical Relations Manager Brennan Price, N4QX. "We are fortunate that this upcoming WRC presents an opportunity for a new secondary allocation in the medium waves. While the outcome is far from certain, our experience in other bands -- most notably 30 meters -- indicates Amateur Radio's compatibility with certain other services as a secondary user."

According to the ITU, WRC-12 will focus on appropriate spectrum sharing mechanisms to make the best use of the digital dividend in the UHF and other frequency bands, providing new opportunities for radiocommunication services. It will also identify the spectrum requirements to increase security for both maritime and aeronautical transport services. Additional spectrum resources will also be identified for scientific and other radiocommunication services, specifically related to the environment, meteorology and climatology, as well as disaster prediction, mitigation and relief. Along with the introduction of more efficient digital services requiring less power consumption, WRC-12 will be a milestone to meet ITU's commitment to achieve climate neutrality with the use of Information and Communications Technologies (ICTs) <http://en.wikipedia.org/wiki/Information_and_communication_technologies> as effective tools to combat climate change and its effects.

Along with IARU volunteers worldwide, Price and Siverling are monitoring developments on a number of other agenda items that could affect Amateur Radio if they take unanticipated turns, including:
* Agenda item 1.14, considering requirements for and implementation of the radiolocation service (radar) between 30-300 MHz.

* Agenda item 1.15, considering possible allocations between 3-50 MHz for oceanographic radar applications.
* Agenda item 1.19, considering regulatory measures to enable software-defined and cognitive radio systems.
* Agenda item 1.22, examining the effect of emissions from short-range devices.

"Oceanographic radar is perhaps our biggest defensive issue," Price said. "Fortunately, its proponents have acknowledged that sharing with Amateur Radio would be problematic."

The ITU preparatory meetings ahead of WRC-12 provide an opportunity to exchange information and views on the ongoing studies regarding WRC-12 agenda items, as well as on the common proposals and positions of the regional groups and other organizations. The discussions in this meeting addressed all WRC-12 agenda items and identified those deserving special consideration for African countries, including the sensitive issue related to the operation of security systems for ships and ports and the shared use of the planned digital TV spectrum by other services.

The Director of ITU's Radiocommunication Bureau Valery Timofeev noted that the agenda for WRC-12 was likely to be as complex as the previous World Radiocommunication Conference held in 2007. "We need to continue the trend toward increasing the number of common and coordinated proposals," he explained. "This process, which highlights the great spirit of international cooperation and consensus building at ITU, has proved to be increasingly successful in the WRC process." Timofeev added that the level of participation at the meeting indicated the importance of the WRC process "to improve regulatory procedures, to provide frequency and orbit resources for new technologies and to strengthen the technical framework for the operation of services."

Recognizing that WRC-12 is an important event for the future of information and communication technologies, ITU Secretary-General Hamadoun Toure, HB9EHT, said the forthcoming conference will be a landmark in achieving ITU's connectivity targets: "WRC-12 will be held only three years ahead of 2015 -- the target date to connect all villages, towns and cities, universities and schools in the world and to achieve the United Nations Millennium Development Goals (MDGs) <http://www.un.org/millenniumgoals/>. If there is any chance to meet these goals, we must rely on ICTs -- omnipresent tools with profound implications for all economic sectors -- to accelerate the process and bridge the digital divide." -- Thanks to the ITU for some information

==> CHANGES IN STORE FOR THE ARRL LETTER

After asking for feedback from ARRL Letter subscribers and reviewing surveys sent to ARRL members, we are changing the way you receive The ARRL Letter. Starting next week -- October 1 -- The ARRL Letter will be available to subscribers in an HTML formatted version. Each message will contain both an HTML and a plain-text version of the Letter, and the recipient's mail program can choose which version to display. For our

members who prefer a plain-text version of the Letter, there will be simple instructions on the ARRL Letter Web page that describe how to view the plain-text version in some of the more common mail programs.

According to ARRL News Editor S. Khrystyne Keane, K1SFA, this new format will allow for more graphics and pictures, as well as occasional articles that feature the technical side of Amateur Radio. We will also be running portions of popular QST features, such as "The Doctor Is IN" and "Hints & Kinks."

"I am very excited about presenting The ARRL Letter in a completely new format," Keane said. "Not only will we be able to add features such as pictures and video, but by offering the Letter in HTML, readers will be able to navigate directly to those stories they are most interested in. The ARRL already offers two other newsletters -- The ARRL Contest Update and The ARRL ARES E-Letter -- in an HTML version. We have received a lot of positive feedback on these two newsletters."

The ARRL Letter first appeared in 1981 as a print publication, available by subscription from the League. In 1991 -- following the technology of the day -- it moved from being a print publication to being published electronically and sent via e-mail as a free service to ARRL members. "Now, once again, we at the ARRL are following technology's path and publishing The ARRL Letter in a new way, moving from plain text to a graphically pleasing interface," Keane explained.

We think you will enjoy this new format, and we welcome your comments. Tell us what you like -- and don't like -- by sending an e-mail to Keane <k1sfa@arrl.org>, with "ARRL Letter Feedback" in the subject line.

==> ARRL: A PROUD HISTORY OF DEFENDING AMATEURS' RIGHTS

The fall operating season is just around the corner. Whether it's because radio conditions improve or just because attention returns to indoor pursuits as the days get shorter, on-the-air activity always picks up at this time of the year.

Do you operate on 40 meters? "If you haven't been on the band lately, you're in for a real treat!" said ARRL Chief Executive Officer David Sumner, K1ZZ. "Years of patient effort by the ARRL and by our sister members of the International Amateur Radio Union (IARU) have paid off. The band is more useful now than it's been in more than 70 years. When you think of 40 meters, you probably think of interference from foreign broadcasters. Here in the Americas, amateurs always have had access to 7,000-7,300 kHz - but we had to tolerate broadcasters in the rest of the world in the upper two-thirds of the band."

Sumner said he can recall the "futility" he felt as a 13-year-old Novice, "trying to make myself heard through the racket with just two crystal-controlled transmitting frequencies to choose from. I remember taking the crystal holders apart and putting pencil lead on the crystals in a vain attempt to slip in between the broadcasting behemoths." At the 2003 World Radiocommunication Conference (WRC-03) -- 40 years later --

he had the privilege of being present in Geneva when it was agreed that amateurs had made the case for a wider worldwide amateur band, free of broadcasting interference." For the first time in the history of radio communication, an HF broadcasting allocation would be shifted in order to accommodate the needs of another radio service -- the Amateur Radio Service!
Sumner called the WRC-03 decision "very gratifying," but said an important question remained: Would the broadcasters really move? "The International Telecommunication Union has no enforcement authority," he explained, "and operation in contravention of the international Radio Regulations is not exactly unknown. In fact, the transition turned out to be quite dramatic. On the last weekend of March, on Friday evening 7,100-7,200 kHz was full of broadcasters as usual -- but as the new seasonal broadcasting schedule took effect on Saturday night the band cleared of all but a few. For the very first time our overseas friends could hear us on 40 meter phone without having to breach the wall of broadcasters! Over the past six months the situation has continued to improve as more broadcasters have complied with the WRC-03 decision. Nighttime operation above 7,200 kHz remains a challenge, but it's not an exaggeration to say that 40 meters is like a whole new band."

Sumner explained that moving hundreds of broadcast transmitters in dozens of countries out of a band didn't just happen: "It took years of patient effort by a global team of volunteers and ARRL professionals, working through the IARU, to overcome objections and marshal the necessary support. It was an expensive undertaking, and it never could have been accomplished without the voluntary contributions - above and beyond their basic dues - of thousands of ARRL members."

Even as we celebrate our reborn 40 meter band, Sumner said that we, as amateurs, must remember that it takes hard work just to hang onto what we have. "As much as we like to pursue new and improved ham bands, most of our effort must go toward frequency defense," he said. "Every day, new uses of the radio spectrum are being conceived. Each one competes for spectrum access with incumbent radio services, including ours. Not only must we defend our allocations against well-heeled backers of licensed services, we must also try to prevent the pollution of the radio spectrum by unlicensed devices. The fight goes on in Washington, Geneva and around the globe -- and there's no end in sight."

Decisions for WRC-12 are being made now that will determine how many administrations -- including the United States - will support a new secondary allocation to the Amateur Service at 500 kHz, and whether proposals for allocations to oceanographic radars will threaten some of our existing HF bands. "We are hard at work meeting these challenges, but we need your help," Sumner said, in asking for support for the ARRL Spectrum Defense Fund. "Members' past response helped us to keep commercial satellites out of the 144 and 420 MHz bands, to gain access to frequencies around 5 MHz, and to win our court challenge of the FCC's flawed Broadband over Power Lines (BPL) rules. New challenges keep cropping up. Currently we are working to ensure that new short-range

medical devices do not impact our ability to use our UHF and microwave bands."

To help in the ARRL's ongoing mission to protect our valuable spectrum, please visit the Spectrum Defense area on the ARRL Web site <https://www.arrl.org/forms/fdefense/>. You can also reach ARRL Chief Development Officer Mary Hobart, K1MMH, at 860-594-0397 or via e-mail <k1mmh@arrl.org>. Special gifts are being offered for contributions, including a mug and pin. More details on thank you gifts can be found on the donation form for the Spectrum Defense Fund.

==> CALL FOR NOMINATIONS: THE ARRL'S BILL LEONARD, W2SKE PROFESSIONAL MEDIA AWARD

Since 1999 when Jeff Holland -- former city editor for "The Enquirer-Journal" in Monroe, North Carolina -- was named the first winner of the Bill Leonard, W2SKE Professional Media Award, there has been only one award given out each year. The award -- honoring the late Bill Leonard, a former president of CBS News -- recognizes a professional journalist whose outstanding coverage best reflects the enjoyment, importance and public service value of the Amateur Radio Service.

"At the time, printed newspapers were still a main news source," said ARRL Media and Public Relations Manager Allen Pitts, W1AGP. "Now there is the Internet, a host of blogs and news sites, audio and video streaming, cell phone alerts and many more news outlets still in development. The world of media and news reporting has been caught in the rip-currents of technology and it's causing the overnight erosion of old models while creating new opportunities."

Pitts remembers when it once was a major accomplishment for an Amateur Radio Public Information Officer (PIO) to get a few column inches in ink. "Now, the same positive PR outcomes can be achieved by placement on community Web sites and inclusion in blogs," he explained. "In the meantime, video capabilities have become available to almost anyone with a cell phone and ever more media outlets are incorporating video clips into their product."

The ARRL Public Relations Committee recognized that one award, looking at only one medium, was no longer the best fit to the current realities of PR, and the best way to update the Leonard Award was to solicit input from the very professionals who worked in this new media arena. With a subcommittee of nationally recognized reporters and media managers, they looked not only at the award itself, but also at ways to make it a catalyst for even more coverage of Amateur Radio topics in the future. Their recommendations were presented to the ARRL Board of Directors this past July. To address both current and coming news modalities, the award was split into three areas:
* Audio formats -- primarily something you listen to
* Visual formats -- primarily something you watch
* Print and Text formats -- primarily something you read

Each of the three categories will have an honorarium of $250 for the best selection within that category, but the PRC can also exercise discretion to withhold an award within a category in any given year based on the quality and content of submissions, Pitts explained.

"Many news outlets have strict rules against reporters receiving any cash or other material prizes from outside sources," he said. "What may be a 'prize' to one person could be seen as 'kickback' to another. So the Leonard honorariums will no longer go to the recipients, but rather to Internal Revenue Service 501[c](3) recognized non-profit organizations of the recipients' choosing. The three recipients will still receive personalized plaques. In this way the recipient can donate the $250 to their favorite charity (or even back to the ARRL). This avoids burdening nominated reporters with any ethics issues."

Complete information on the Bill Leonard Award, including entry and selection criteria, can be found in the November 2009 issue of QST.

==> NEWLY ELECTED SECTION MANAGERS CONVERGE ON NEWINGTON

This weekend, 12 Section Managers who are new -- or returning after a long absence -- to their post are in Newington for an orientation. The primary purposes of the Workshop sessions are to share ideas and to provide basic administrative, management, leadership and motivational training.

"The Section Manager Workshop is an orientation and training event for new Section Managers that have come on board within the last year or so," said Supervisor of the ARRL Field Organization Team Steve Ewald, WV1X. "ARRL has conducted this training each year at HQ for the past several years, and it has been well received by past participants. The Membership and Volunteer Programs Department Staff and its Field Organization Team are the lead coordinators of the event. We also cover the responsibilities and functions of the Section Manager's position, and the SMs are able to visit with ARRL Headquarters staff members and learn more about the many programs that ARRL supports. The Workshop sessions are presented by several ARRL Headquarter staff members who are experts in their respective areas."

Arkansas Section Manager J.M. Rowe, N5XFW; Eastern Massachusetts Section Manager Mike Neilsen, W1MPN; Georgia Section Manager Gene Clark, W4AYK; Iowa Section Manager Tom Brehmer, N0LOH; Los Angeles Section Manager David Greenhut, N6HD; New York City-Long Island Section Manager Mike Lisenco, N2YBB; North Texas Section Manager Jay Urish, W5GM; Oklahoma Section Manager Dean Fekan, KL7MA; San Joaquin Valley Section Manager Dan Pruitt, AE6SX; Southern New Jersey Section Manager George Strayline, W2GSS; South Texas Section Manager Lee Cooper, W5LHC, and Wyoming Section Manager Garth Crowe, N7XKT, are in attendance.

==> ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter? One of the many ARRL membership benefits includes other newsletters, such as the ARRL Contest Update (a bi-weekly contest newsletter), the

ARES E-Letter (sent monthly, containing public service and emergency communications news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the VE Newsletter, just to name a few.

You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplerian reports. The ARRL also offers a free notification service to members, letting them know when their membership and license are due to expire.

Sign up for these newsletters, bulletins and notifications on the Member Data page of the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==>SOLAR UPDATE

Tad "Him whose strenuous tongue can burst Joy's grape against his palate fine" Cook, K7RA, this week reports: Two large sunspots, 1026 and 1027, both emerged in the past few days. We could see them in advance of their appearance while they formed on the side of the sun previously unseen from earth, via the NASA STEREO mission, mentioned in last week's bulletin. These spots, emerging on the autumnal equinox, should enhance HF propagation, and expect them to increase in size as they move into the most geoeffective position over the next couple of days. We will discuss this more in the Solar Update, available on the ARRL Web site on Friday, September 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. To read this week's Solar Report in its entirety, check out the W1AW Propagation Bulletin page <http://www.arrl.org/w1aw/prop/>. This week's "Tad Cookism" brought to you by John Keats' "Ode on Melancholy" <http://www.bartleby.com/101/628.html>.

==>IN BRIEF:

* This Week on the Radio: Next week, look for the NCCC Sprint on September 25. The Texas QSO Party, the CQ Worldwide DX Contest (RTTY) and Scandinavian Activity Contest (SSB) are all September 26-27. QRP Homebrewer Sprint is September 28, and the Fall 222 MHz Sprint is September 29. Next week, the California QSO Party and the Oceana DX Contest are October 3-4. The Fall 432 MHz Sprint is October 7. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

* ARRL Continuing Education Course Registration: Registration remains open through Sunday, October 25, 2009, for these online course sessions

beginning on Friday, November 6, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. Each online course has been developed in segments -- learning units with objectives, informative text, student activities and quizzes. Courses are interactive, and some include direct communications with a Mentor/Instructor. Students register for a particular session that may be 8, 12 or 16 weeks (depending on the course) and they may access the course at any time of day during the course period, completing lessons and activities at times convenient for their personal schedule. Mentors assist students by answering questions, reviewing assignments and activities, as well as providing helpful feedback. Interaction with mentors is conducted through e-mail; there is no appointed time the student must be present -- allowing complete flexibility for the student to work when and where it is convenient. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

* ARRL to Welcome USTTI Students: Next month -- October 12-16 -- the ARRL will welcome students from various countries from all over the world who want to learn how to administer and regulate Amateur Radio programs in their home countries. This course, offered by the United States Telecommunications Training Institute (USTTI) <http://ustti.org/>, will help participants create, administer and foster an Amateur Radio Service in their countries. Designed for those in developing countries who regulate and manage their country's Amateur Radio Service, this course will help participants learn just who radio amateurs are. ARRL staff instructors will help course participants discover the ever-expanding universe of Amateur Radio communication. They will explain why Amateur Radio operators -- upwards of three million individuals in virtually every country of the world -- have earned licenses to operate stations in the Service and why they are recognized, both by their governments and internationally, as a valuable voluntary telecommunications resource. Course participants will also discover how a telecommunications administration can bring the benefits of a healthy Amateur Service to its nation. Now in its 27th year, USTTI is a nonprofit venture involving leading US-based communications and information technology corporations and leaders of the federal government cooperating to provide tuition-free management, policy and technical training for talented professionals from the developing world. This is the 25th year the ARRL has participated in the program.

* More CubeSats in Orbit: Early Thursday morning (UTC), an Indian PSLV-C14 rocket carried the Oceansat-2 satellite <http://en.wikipedia.org/wiki/Oceansat-2> to orbit, along with four CubeSats and two RubinSats. The RubinSats are 8 kg research modules that will remain attached to the PSLV-C14 booster. CubeSats are very small satellites, typically only a few inches on each side. As they are a relatively inexpensive research spacecraft, they've become increasingly popular with university science programs. A number of CubeSats use

Amateur Radio frequencies to downlink telemetry, as is the case with this latest group. Early reports indicate that all of the CubeSats are active. You can check out the frequencies and modes of the four satellites on the ARRL Web site <http://www.arrl.org/news/stories/2009/09/23/11090/?nc=1>.

==========
The ARRL Letter is published Thursdays, 50 times each year, by the American Radio Relay League: ARRL -- the national association for Amateur Radio, 225 Main St, Newington, CT 06111; tel 860-594-0200; fax 860-594-0259; <http://www.arrl.org>. Joel Harrison, W5ZN, President.

The ARRL Letter offers a weekly e-mail digest of essential and general news of interest to active radio amateurs. Visit the ARRL Web site <http://www.arrl.org> for the latest Amateur Radio news and news updates. The ARRL Web site <http://www.arrl.org/> also offers informative features and columns. ARRL Audio News <http://www.arrl.org/arrlletter/audio/> is a weekly "ham radio newscast" compiled and edited from The ARRL Letter. It's also available as a podcast from our Web site.

Material from The ARRL Letter may be republished or reproduced in whole or in part in any form without additional permission. Credit must be given to The ARRL Letter/American Radio Relay League.

==>Delivery problems (ARRL member direct delivery only!):
letter-dlvy@arrl.org

==>How to Get The ARRL Letter

The ARRL Letter is available to ARRL members free of charge directly from ARRL HQ. To subscribe, unsubscribe or change your address for e-mail delivery:
ARRL members first must register on the Members Only Web Site <http://www.arrl.org/members/>. You'll have an opportunity during registration to sign up for e-mail delivery of The ARRL Letter, W1AW bulletins, and other material. To change these selections--including delivery of The ARRL Letter--registered members should click on the "Member Data Page" link (in the Members Only box). Click on "Modify membership data," check or uncheck the appropriate boxes and/or change your e-mail address if necessary. (Check "Temporarily disable all automatically sent email" to temporarily stop all e-mail deliveries.) Then, click on "Submit modification" to make selections effective. (NOTE: HQ staff members cannot change your e-mail delivery address. You must do this yourself via the Members Only Web Site.)

The ARRL Letter also is available to all, free of charge, from these sources:

* ARRLWeb <http://www.arrl.org/arrlletter/>. (NOTE: The ARRL Letter will be posted each Thursday when it is distributed via e-mail.)

* The QTH.net listserver, thanks to volunteers from the Boston Amateur Radio Club: Visit Mailing Lists@QTH.Net <http://mailman.qth.net/mailman/listinfo/letter-list>. (NOTE: The ARRL cannot assist subscribers who receive The ARRL Letter via this listserver.)

Amateur Radio Newsline(tm) Report 1676 - September 25 2009

WITH NEWSLINE: SOME WORDS OF THANKS

The following is a Q-S-T. Ladies and gentlemen, with some thank you's to those who support these newscasts, here's Amateur Radio Newsline's Support Fund Administrator, Andy Jarema, N6TCQ

--

In November 2008 we heard from the Great South Bay ARC, W2GSB, of West Babylon, NY and Samuel Parnes, KI6OAA of Beverly Hills, CA.

Via PayPal there were W0CE and K0MSP of Midwest Broadcast Engineering and Ronald Hashiro, AH6RH in Hawaii.

In December we heard via PayPal we heard from John Leonard, W9JBL in De Kalb, IL; Joseph Kratky with the Hamfesters Radio Club 2 meter net W9AA and Chuck Harding, who relays Newsline for the Livermore ARC in the bay area on their Monday evening net.

Our volunteer staff who puts these newscasts together thank all of these people who helped bring these newscasts to you, and you can do the same by writing to us at the Newsline Support address given at the end of this newscast, or by going to our website at arnewsline.org.

I'm Andy Jarema, N6TCQ, and we thank you for listening.

--

Andy will be back with us in the near future with more thank-you's to those who have contributed to the support fund. (ARNewsline Support Fund)

**

Now, Amateur Radio Newsline report number 1676 with a release date of Friday, September 25th, 2009 to follow in 5-4-3-2-1. South Africa's long awaited ham radio satellite is in space, a Cycle 24 Sunspot makes an appearance, the Dutch National ham radio society says that D-Star repeaters will not be in the ham satellite subband, a popular DX award program turns 75 and color coding comes to a favorite on-line research tool. Find out the details on Amateur Radio Newsline(tm) report number 1676 coming your way right now.

HAM RADIO IN SPACE: SUMBANDILA SAT NOW IN ORBIT

South Africa's SumbandilaSat is on orbit. Bill Pasternak, WA6ITF, has the details:

--

The third time was a charm. This as SumbandilaSat was successfully launched at 17:55:09 Central African Time on Thursday, September 17. This after the launch had to be postponed twice due to weather and technical problems with the booster that carried it into space.

After attaining orbit the satellite was released from the rocket while over the Antarctic. 10 minutes later it was accessed by the ground station at the Stellenbosch University when the first command was sent to wake up the bird. Despite the low elevation orbit of less than 10 degrees SumbandilaSat responded well by returning its first telemetry.

An intensive period of payload qualification period will now follow during which each system of SumbandilaSat will be tested. This is expected to take up to 3 months after which the command will shift to the CSIR's Satellite Application Center north of Pretoria and eventually opened for general use.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, saying congratulations to the hams of South Africa on their hew satellite -- SumbandilaSat.

--

Launched along with SumbandilaSat was the Meteor M-N1 satellite Late reports indicate that it may be transmitting on 435.365 MHz. Details on this new bird are
http://planet.iitp.ru/english/spacecraft/meteor-m-n1_eng.htm
(SA-AMSAT, Southgate)

PROPAGATION BULLETIN: NEW CYCLE 24 SPOT ON THE FACE OF THE SUN

Some good news from the big circular disk in the daytime sky. Spaceweather reports that Sunspot 1026 emerged on Sunday, September 20th U-T-C to break a string of 19 consecutive spotless days.

Sunspot 1026 is described as being about as wide as the diameter of the Earth. This makes it an easy target for backyard solar telescopes. The Solar and Heliospheric Observatory has measured the spot's magnetic polarity and identified it as a member of new Solar Cycle 24.

Could this be a harbinger of more to come? Spaceweather says its apparently is. So stay tuned and keep your radio tuned in.
(Spaceweather)

**

BREAKING DX NEWS: GLORIOSO ISLAND IS ON THE AIR

Some breaking news in the world of DX. This, with word that the Glorioso Island FT5GA DXpedition team is now active. Operation is reported on all of the high frequency bands using CW, SSB and RTTY but most stateside stations report that signals are very weak.

The team reportedly had some antenna problems at first due to windy weather conditions and later a faulty contact on a WARC band Spiderbeam. That was repaired and indications are that all three stations are now on the air.

Operations will last until October 5th per the FT5GA web page. Its in cyberspace at http://glorieuses2008.free.fr and we will have more DX related items near the end of this weeks newscast. (Glorioso Island DX Team)

RESTRUCTURING FOLLOW-UP: ANOTHER VIEW ON THE DUTCH GOVERNMENT - D-STAR REPEATERS AND THE HAM SATELLITE BAND

A follow-up and also a different story regarding the D-Star repeater subband reallocation in the Netherlands. This time its from Abraham van den Berg, P-B-Zero-A-O-K who is VERON's VHF manager. Norm Seeley, KI7UP, has been following the story and has the latest:

--

VERON PRON Veer On

For those unaware, the VERON is the Dutch national IARU society much like the ARRL is in the national society in the United States. And Abraham van den Berg, PB0AOK, disputes the report by Amsat North America and PE1HZG that the Dutch telecommunications administration is thinking about operating D-Star repeaters in the 437 to 438 MHz band.

Van den Berg says that at this time the amateur service in the Netherlands and neighboring countries suffers from harmful interference caused by the implementation of the Radiolocation service in the 438 to 440 MHz band. And says PB0AOK, for that reason, use of D-Star repeaters with output frequencies in the upper 2 MHz part of the Region 1 70cm band has been hampered.

To solve this problem, recently the Dutch D-Star community came up with a proposal to plan the output frequencies of D-Star repeaters just below 438 MHz and has asked VERON to support this proposal. But says van den Berg, the VERON has decided not to do so/ This, due to incompatibility between the amateur service and amateur-satellite service. Moreover, says PBAOK, the proposal deviates significantly from the IARU Region 1 band plan.

According to PB0AOK, the VERON has made an alternative proposition. This, to amend the Dutch national frequency plan in such a way that it fully complies with article 5 RR of the the European Common Allocation table, as well as the IARU Region 1 band plan.

So now it's a wait and see game between the Dutch national society and that nations telecommunications regulators.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More on this issue in upcoming Amateur Radio Newsline reports.

RADIO POLITICS: HAM RADIO PREPARES FOR WRC 2012

Ham radio is getting ready for the next major World Radiocommunications conference slated for Geneva, Switzerland from January 23 to February 17, 2012. To get ready, Approximately 200 participants came together in an ITU preliminary meeting that ended September 16 in Geneva. ARRL Technical Relations Specialist Jonathan Siverling, WB3ERA, and IARU Region 1 Vice President Tafa Diop, 6W1KI, were among the participants. Also present were the power players representing the six regional telecommunications organizations including CITEL from the Americas. This meeting was part of a series of ongoing international and regional preparatory meetings to allow government and industry to address the far-reaching and complex agenda of WRC 12. (ARRL, Southgate, others)

WORLDBEAT: US GENERALS GIVEN CEPT NOVICE PRIVILEGES IN SOME NATIONS

Radio amateurs with United States General Class licenses to get reciprocal licenses in some CEPT countries, but with limited privileges.

On Thursday, September 10, the Federal Communications Commission released a new Public Notice implementing changes in the European Conference of Postal and Telecommunications Administrations or CEPT reciprocal operating arrangements for US citizens who hold a United States General, Advanced or Amateur Extra class Amateur Radio licenses. While nothing has been altered in regard to Advanced or Extra class licensees, there is good news for those holding the General. US citizens holding a General class license who had lost all CEPT reciprocal privileges in 2008 have now been granted CEPT Novice Radio Amateur License.

But according to the ARRL's Dan Henderson, this is not an across the board permit. Henderson says that it is important to note two things about the agreement. First is that not all European countries have implemented this recommendation. Therefore, a US General class operator does not have reciprocal privileges in many countries, including popular US travel destinations like Italy, the UK or France.

Second, as with any reciprocal operation, the band frequencies and privileges are those allowed by the host country and not the

frequencies and privileges extended by your FCC license while in the United States or its possessions. Therefore, travelers need to make sure they are familiar with the authorized privileges for the CEPT Novice Radio Amateur License in the nation in which they plan to operate. (ARRL, Southgate, others)

CQ MAGAZINE ANNOUNCES 75th ANNIVERSARY WAZ AWARD

In celebration of the 75th anniversary of its Worked All Zones or W-A-Z award program, CQ magazine is announcing a limited-term "Diamond Jubilee W-A-Z award. A special certificate will be issued to amateurs who make contacts in all 40 CQ Zones of the World between November 1, 2009 and December 31, 2010. Certificates will be numbered but there will be no endorsements. Confirmations will not be required. However, it is expected that applicants will continue to uphold amateur radio's long-standing tradition of honesty and self-regulation. Standard WAZ application fees will apply. Complete details on the Diamond Jubilee WAZ Award will be in the October 2009 issue of CQ, and are posted on the CQ website at www.cq-amateur-radio.com. (CQ)

**

COMMUNICATIONS LAW: FCC PROPOSES REGULATING INTERNET CONNECTIVITY SPEED

Its not exactly amateur radio but it will affect hams who use the Internet for such applications as Echolink, IRLP, and other VoIP communications. This as the head of the FCC plans to propose new rules that would prohibit Internet service providers from interfering with the free flow of information and certain applications over their networks. Amateur Radio Newsline's Fred Vobbe, W8HDU, follows happenings at the FCC and has this report:

--

The head of the FCC plans to propose new rules that would prohibit Internet service providers from interfering with the free flow of information and certain applications over their networks, an official at the agency said Saturday.

The Federal Communications Commission chairman, Julius Genachowski, will announce the proposed rules in a speech Monday at the Brookings Institution, a Washington think tank, the official said on condition of anonymity because news of the announcement had not been released.

The proposals would uphold a pledge Barack Obama made during the presidential campaign to support Internet neutrality -- the equal treatment of Internet traffic. That would bar Internet service providers such as Verizon Communications Inc., Comcast Corp. or AT&T Inc., from slowing or blocking certain services or content flowing through their vast networks.

Without strict rules ensuring Net neutrality, consumer watchdogs fear the communications companies could interfere with the transmission of content, such as TV shows delivered over the Internet, that compete with services the ISPs offer, like cable television.

Internet providers have opposed regulations that would inhibit the way they control their networks, arguing they need to be able to make sure applications that consume a lot of bandwidth don't slow Internet access to other users.

"This is about whether I can turn off my cable TV and watch TV over the Internet," said Dave Burstein, editor of the DSL Prime broadband industry newsletter. "Comcast cares about this because they don't want people to turn off their cable TV."

I'm Fred Vobbe, W8HDU, for Amateur Radio Newsline.

--

Many of you may recall that the FCC adopted four principles on Internet policy in 2005. Burstein thinks the FCC probably will adopt a fifth principle on nondiscrimination as part of the expected new rules. (FCC, W8HDU)

**

ENFORCEMENT: FCC TO CONTINUE CBS SUPER BOWL EXPOSURE CASE

The FCC says it wants to further investigate whether CBS' indecency violation in the Janet Jackson Super Bowl costume malfunction was willful. In a brief recently filed to the Third Circuit Appeals Court he FCC contends that the evidence in this case strongly suggests that CBS had access to video delay technology at the time of the 2004 Super Bowl incident. The FCC asked the court to remand the decision back to the Commission so it could investigate further its assertion that the violation was "willful."

The Third Circuit, in reversing the FCC's fine against the broadcast, said the evidence that delay technology was available at the time was scant. The FCC disagrees and wants the chance to determine whether CBS was reckless not to use video delay technology for this broadcast. (B & C)

**

RADIO LAW: FCC TO REASSESS PARENTAL CONTROL OF TELE-VIEWING

The Federal Communications Commission is about to open a reassessment of the V-chip and of family-friendly programming. This to determine if it is possible to have a single-content ratings system that can apply to movies, video games, TV and cellular telephones. The study may also look at ways to ensure that once a TV show or movie is rated, data is readily available whether the program subsequently is viewed on TV, cable, a phone or a computer.

Back in 1996 Congress required TV set makers to include the V-Chip in TVs. This Integrated Circuit technology allows parents and other televiewers the ability to set their TV receivers to screen out shows whose ratings didn't meet their personal standards.

Critics argue that the technology needs updating with a system that can now offer more information, and is less confusing. This is because motion pictures, TV programs and music each use different ratings systems and because some TV programs are rated inconsistently between networks. On the other side the TV networks, cable industry and the National Association of Broadcasters, argue that the current V-Chip system works well giving adult television viewers the ability to lock out material that they do not want their family members to watch. However, studies have found that relatively few American families actually use the V-Chip to control their youngsters viewing habits. (WRAP OnLine, others)

VE4HAY RE-ELECTED RAC MIDWEST DIRECTOR

And congratulations to Derek Hay, VE4HAY, of Winnipeg who has been re-elected as the Midwest Region Director of Radio Amateurs of Canada. Hey ran unopposed and was declared re-elected on September 16th. (RAC)

**

WITH NEWSLINE: NEWSLINE ARCHIVE AT YAHOOGROUPS

Every now and again we receive an e-mail or phone call asking if we keep an on-line archive of old newscasts. The fact is that we used to have one on our website but as the newscast expanded to its present 26

minute length we needed the bandwidth and storage space to accommodate our audio service. So, about 1999 the on-line archive went away.

There are several radio clubs and groups that do have many of our older newscasts in audio form and a search using Google will bring up many of them. And if its only the newscast text that you require then you need only log onto groups dot yahoo dot com slash group slash arnewsline slash messages. There you will find the text of all of our newscasts going back to January 26, 2001. We really do not maintain it as an archive specific but rather its an artifact of the Yahoogroups on-line service. Then again, its free with the only caveat being that you need to join the ARNewsline Yahoogroup to access it which by the way also is free of charge.

As to an audio archive? As we said, some older newscasts can also be found with a Google search at some private websites, but none prior to the mid-1990's. All of those live only on reels of tape or cassettes in a cabinet in our office. With now some 33 years of them, its doubtful you will ever find anything prior to 1996 or thereabouts on-line. (ARNewsline)

**

FUNNY TECHNOLOGY: PIGEON BEATS INTERNET IN AFRICA

A South African information technology company claims that it has proven it was faster for them to transmit data with a carrier pigeon than to send it using the country's leading internet service provider Telkom.

The local news agency SAPA reported the 11-month-old pigeon named Winston took one hour and eight minutes to fly the 50 miles from Unlimited IT's offices to the coastal city of Durban with a data card was strapped to his leg. Including downloading, the transfer took two hours, six minutes and 57 seconds. That's the same time it took for only four percent of the data to be transferred using a Telkom line.

SAPA said Unlimited IT performed the stunt after becoming frustrated with slow internet transmission times. Internet speed and connectivity in Africa is poor because of a bandwidth shortage and also expensive for what service does exist. (Telecom News)

**

WORLDBEAT: AUSTRALIAN CB MOUNTAIN RADIO CHALLENGE

And while we rarely report on 11 meter events here's one where it is legal to make DX contacts and its even an organized happening. The reason is that its in Australia where it seems that the CB rules permit this kind of activity.

The Mountain Radio Challenge is the CB Radio event in question. It began around 1980 with CB'ers in the North Eastern Suburbs of Melbourne who would find mountains to camp on for the night and see what

distances could be achieved on the 27 MHz band using ground wave. The concept was that anyone could talk skip interstate or overseas, but to talk long distance without skip was a challenge.

The Mountain Radio Challenge continues to be held each year on Australian High Frequency CB Channel Ch 27. That translates into 27.275MHz on upper sideband. There's also FM activity on the Australian UHF CB Calling frequency of 477.075MHz. More information on the Mountain Radio Challenge is on the web at www.mrc.cat.net.au (WIA News, VK-VHF List)

RADIO VS THE NET: FACEBOOK TO ADD VIVOX TWO WAY CALLING

Another challenge for radio hobbyists. This with word that the social networking site Facebook is adopting a third-party application that will permit voice contacts that will rival anything possible over the airwaves.

The new technology is not being offered from Vivox. This is Boston based company that provides the integrated voice service for virtual worlds like Second Life and EVE Online, and which already has more than 15 million users worldwide.

Once adopted, the service will allow Facebook users to have conversations with anyone on their friends list just by downloading a Vivox's plug-in. But once installed, the service works almost seamlessly with Facebook, and is intended for everything from one-to-one chat to large group discussions.

Vivox also plans to offer free dial-in numbers that will allow anyone to call into an existing conversation, much as is possible today with call-in phone conferences. This will allow even non-Facebook users will be able to participate.

Kind of like what hams do on the air all the time, minus the radio and antenna. (RW)

EMERGING TECHNOLOGY: NEW 3-D IMAGING IN THE UK

Researchers at The University of Nottingham have a new weapon in their arsenal of tools to push back the boundaries of science, engineering, and archaeology. Called the Nanotom, it is described the most advanced 3D X-ray micro Computed Tomography scanner in the world. The Nanotom is expected to help researchers in a wide variety of scientific disciplines to literally see through solids. The machine will make previously difficult investigation much easier as it allows researchers to probe inside objects without having to break into them. (Science Daily)

**

HAM RADIO IN SPACE: ASTRONAUTS TRAIN WITH TERRESTRIAL SCHOOL CONTACTS

Astronauts Timothy Creamer, KC5WKI and Soichi Noguchi, KD5TVP recently participated in Amateur Radio on the International Space Station training sessions. On Wednesday, September 9th the pair spoke with children from the Ralph McCall School in Alberta, Canada.

The training sessions are terrestrial-based amateur radio contacts using equivalent equipment to that which the astronauts will find on the International Space Station. Contact audio was available on the Internet Radio Linking Project. (ANS)

**

RADIO IN SPACE: GIANT HF ANTENNA HEARS SIGNALS FROM THE FINAL FRONTIER

Scientists from the National Research Lab's Space Science and Remote Sensing Divisions, working with researchers from the University of New Mexico and the National Radio Astronomy Observatory in Socorro, New Mexico have seen their first scientific results from the Long Wavelength Demonstrator Array or LWDA antenna system. The group lead by Dr. Jake Hartman utilized radio emissions from the approximately 300 year-old Cassiopeia A supernova remnant to establish baseline measurements for the array.

The Cassiopeia A supernova remnant located in the astronomical constellation Cassiopeia is considered to be one of the largest and most active astronomical radio sources in the sky. The measurements were obtained during field tests and calibration of two prototype antennas for the much larger Long Wavelength Array which will eventually consist of nearly 13,000 similar dipole antennas. Once completed, the full size array will provide an entirely new view of the sky in the radio frequency range of 20 to 80 MHz. Until now this has been one of the least explored regions of the electromagnetic spectrum in radio astronomy. (ScienceOnLine)

**

WORLDBEAT: SOUTH AFRICA UPDATING REPEATER DATA

South Africa is bringing its repeater information database up to date. It began the process on Saturday, September 19th at the repeater frequency planning meeting where Zed-S-4-P-R agreed to undertake

establishing a committee aimed at bringing all of that nations repeater data up to date.

As part of that process, all clubs and repeater coordinators in South Africa are requested to bring the details currently on the South Africa Radio League website up-to-date before September 30th. On the 30th the repeater pages will be removed and a process will be started to correlate frequencies and data with licenses. The South African Radio League says that more details will be made available on how the process will develop after these first steps have been completed. (SARL)

**

ON THE AIR: KL50 CELEBRATES ALASKA DAY OCTOBER 18 -19

On the air, listen out on October 18th and 19th for the call KL5O. It will be on the air celebrating as a special events station in celebration of the 2009 Alaska Day. Operation will be on 160 through 10 meters, including the WARC bands using phone, CW and RTTY. Operation will be scheduled to facilitate working North American stations, though all stations worldwide are encouraged to participate. Also, Alaska state QSO credit for the ARRL Year of the QSO Party award starts with the KL5O special event. QSL's will be available via Logbook to the World and eQSL as well as traditional cards. More information is on the web at www.kl5o.com. (Press release)

**

ON THE AIR: GB70GB CELEBRATES THE GREAT BADDOW ON OCTOBER 3

GB70GB is a Special Special Event callsign taking to the air on Saturday October 3rd. This to celebrate the 70th anniversary of the opening of the Research Center at Great Baddow. That was originally Marconi's Research Laboratories; and later on home to famous staff including Spycatcher author Peter Wright and later to Hovercraft inventor Chris Cockrell. More details of HF operation and its frequencies will be announced closer to the event at www.g0mwt.org.uk (Chelmsford Amateur Radio Society)

**

THE CONTEST CORNER: SCANDINIVIAN ACTIVITY CW SEPT 10 - 20

In contest news, the 51st Scandinavian Activity Contest CW leg takes place on between 1200 UTC on September 19th and 1200 UTC on the 20th. In use will be 80, 40 20, 15 and 10 meters with the contest exchange being a signal report and serial number. Details can be found on-line at www.qrq.se/sac.

And the European P-S-K Club invites amateurs all over the world to participate in the CIS DX QPSK63 Contest. Its also on September 19th and 20th and is strictly a QPSK63 contest now with no other modes are allowed. The maximum output power is 100 watts. All the information can be found at www.cisdx.srars.org. (Southgate)

**

DX

In DX, HA0NAR will be heading to western Africa in early 2010. He plans to be there at the end of January through the end of February with operation from Senegal as 6W stroke HA0NAR and Guinea-Bissau using the call J5NAR. More details on this one are promised in the near future.

And AA8YH is returning to Tunisia on November 16th for 5 weeks. He plans to be active on CW on the weekends from 3V8SS and is willing to accept skeds from "QRP" stations, either CW or SSB. They can contact him via his E-mail address listed on QRZ.com.

VK2CCC will be on the air from Vanuatu with a yet to be announced callsign from October 30th to November 5th. Activity will be "part time", but mainly on 160 and 80 meters CW. QSL via VK2CC, either via the bureau or direct.

G7COD, will once again be active as 8Q7AK from Embudu Island between October 12th and the 25th. His operation will be on 80 through 12 meters including the WARC bands. QSL via his home call.

And reports indicate that Lionel, F5PSA, is active as TJ3SL from the Cameroon. His length of stay is unknown at this time but he's reportedly on 20 through 10 meters using SSB. QSL via his home callsign as well.

Lastly, AA3B, will once again be active from Antigua as V26K between November 26th and December 1st. This will be an all CW operation on the contest HF bands only. Please QSL via AA3B.

(Above from various DXC news sources)

**

THAT FINAL ITEM: WIKIPEDIA TO COLOR CODE TEXT

And finally this week, if you have ever wondered if something you read on the World Wide Web is accurate, one popular website is about to help in that area. Burt Hicks has more:

--

Anyone who has used the Internet is familiar with the free, open-access on-line encyclopedia called Wikipedia dot com. Starting this fall an optional feature on Wikipedia called "WikiTrust" will color code every word of the on-line encyclopedia based on the reliability of its author and the length of time it has persisted on the page.

WikiTrust assigns a color code to newly edited text using an algorithm that calculates author reputation from the lifespan of their past contributions. It's based on the concept that the longer information persists on the page, the more accurate it's likely to be. Text from questionable sources starts out with a bright orange background, while

text from trusted authors gets a lighter shade. As more people view and edit the new text, it gradually gains more "trust" and turns from orange to what's normal for a given page.

More than 60 million people visit Wikipedia each month to searching its 12 million pages in 260 languages. But despite its popularity, Wikipedia has long suffered criticism from those who say it's not reliable. Critics say that because anyone can contribute, the site is subject to vandalism, bias and misinformation. And as all edits are anonymous, there's no easy way to separate credible information from fake content created by vandals. The operators of Wikipedia hope that WikiTrust will counter those who find fault with the on-line reference source. --

No date yet for when Wiki Trust will be available on-line. (The Wiki Follower Online News)

GB2RS NEWS

Sunday 27th September 2009

The news headlines

* Five days to go until the UK's largest amateur radio show

* Over the horizon radio causes interference

* Postal delays affect the RGSB

Next Friday, the 2nd of October, sees the opening of the UK's largest amateur radio show for some years. The show takes place at the Newark showground and spans two days. The National Hamfest will have lots for visitors to see because all space for traders is completely full. All the major manufacturers and retailers will be at the show, including a number of overseas traders making their first visit to the UK. There is a car boot area and bring and buy too. The National Hamfest will be your one opportunity this year to meet the RSGB and its many representative committees. The new GB4FUN vehicle will be in attendance and so will Ofcom. This will be the first time that Ofcom have attended a major UK amateur radio event. The star of the show will be the Luso aerial tower that created such a huge interest at both Dayton and Friedrichshafen earlier this year. The new National Hamfest has everything for the radio amateur and is a show not to be missed. The showground is easy to find and there is ample car parking right next to the hall. Full details can be found in RadCom and on the National Hamfest website, www.nationalhamfest.co.uk, where you will find a full list of all traders plus an up to date floor plan. IARU Region 1 reports that the Russian over-the-horizon radar is active daily on 14.440MHz and is producing splatter plus and minus 110kHz. The upper part of the 20m band is affected, too. The location of the ABM2-radar is in the area of Smolensk. The German PTT has been informed. More information is available on their website, www.iaru-r1.org. The RSGB, like most organisations and businesses, is suffering delays due to the many local Royal Mail disputes around the UK. The situation appears to be worsening and there is a threat of a national postal strike on the horizon. The Society apologies for any delays in postal exchanges and in particular late delivery of RadCom; this is beyond our control. There have been several additions and changes to the programme for the RSGB Convention taking place over the 9th to 11th October. For example, the HF Contest Forum will now take place before the HF Contest Trophy

presentations. Bookings for rooms, meals and so on closes next Friday, 2nd October, although day visitors are welcome at all times. For the latest updates check out the Convention's programme on the RSGB Convention website www.rsgb.org.uk/rsgbconvention. After more than 20 years of handling all of the QSL cards for residents and the scores of visiting amateurs who come year upon year to enjoy the rarer prefix of Jersey, Reg Allnet, GJ3XZE is stepping down as the island's volunteer sub manager. The RSGB wishes to convey its grateful thanks for his sterling work on behalf of his fellow amateurs and hopes that maybe now he will have some time to operate. Reg has found his own replacement and we are delighted to welcome Michael Brown, 2J0SZI, who has volunteered to take his place. Full contact details are available in the QSL section of the RSGB members' website, where a full list of all sub managers can be found. Visitors to the Channel Islands and the Isle of Man are reminded that

2

UK stamps for the collection of QSL cards are not valid and that it is wise to purchase appropriate stamps for SAEs during their stay. Cards arriving at the bureau without a via listing and many hundreds do will not be diverted to home addresses. The British Young Ladies Amateur Radio Association will be celebrating their 30th anniversary on their stand at the National Hamfest in Newark on 2 and 3 October. They invite all radio amateurs to join them in their celebrations and look forward to meeting as many amateurs as possible whether BYLARA members or not. For more information on how to get to the venue to join in these birthday celebrations, go to www.nationalhamfest.co.uk.

In the week leading up to the National Hamfest, G0PIO, G6JUT and G3XZF are involved in some local radio broadcasts about amateur radio. In the Rob Underwood programme broadcast throughout the BBC Radio Midlands area and on Monday evening on local radio throughout the BBC East region they will be talking about amateur radio and its value as a hobby. They are hoping to encourage people through these regions to visit the National Hamfest and see what amateur radio is all about for themselves. IARU Region 1 reports that in the evening hours of 18 September a strong WXfax signal appeared on 14.0019MHz. DK2OM bearings pointed to USA and the transmissions came from the US Coastguard. Jack, AA3GZ informed the US Coastguard and they promised to solve the problem. The same day a strong F1B signal was heard on 7.1017MHz. The ident belonged to the Royal Navy in Faslane, Scotland. Interference was reported to the German PTT, who informed Ofcom. About 20 minutes later the transmission was finished. D-Star repeater GB7NE is now on the air. It operates on 439.450MHz and covers most of the county of Northumberland from Newcastle upon Tyne to Bamburgh. The repeater is maintained by Colin, G7RWC and has a website, gb7ne.org.uk. The repeater currently operates as a stand alone digital audio repeater but will be connected to the D-Star network within the next few weeks. The International Amateur Radio Union (IARU) will be exhibiting and participating at the upcoming ITU Telecom World 2009 in early October.

The event will be used to roll out the new IARU Emergency Communications Brochure as well as to showcase some publications of IARU member societies.

And now for the details of rallies and events for the coming week The Kempton Radio and Electronics Show will be held today, 27 September, at Kempton Park Racecourse, Sunbury on Thames TW16 5QA. The show opens at 10am and there will be a talk-in station on 145.550MHz using the call GB2KRT. Most major amateur radio distributors will be represented and there will be plenty of trade stands. There will be three talks in the RSGB Bytesized Lecture Series, details of which are on the website www.radiofairs.co.uk. RSGB Abbey Court staff will be running the RSGB bookstall. The National Hamfest, organised by the RSGB in association with the Lincoln Short Wave Club, will take place on the 2nd and 3rd October at the George Stephenson Pavilion, Newark and Nottinghamshire Showground, Lincoln Road, Winthorpe, Newark NG24 2NY. There will be the largest showing of trade stands as well as car boot sales and a Bring & Buy, plus special interest groups and Morse proficiency tests. The RSGB will have a large presence at the show with a bookstall and RSGB Services & Committees. Details are at www.nationalhamfest.org.uk. On 4 October, the Autumn Militaria & Electronics & Radio Amateur Hangar Sale will take place at the Hack Green secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and admission is £2.50. Contact Rod Siebert on 01270 623353.

3

Now for the news of special events Following last year's first Railways on the Air event, Bishop Auckland Amateur Radio Club is coordinating ROTA 2009 over the weekend 26 and 27 September. The event is timed to coincide with the anniversary of the running of the world's first steam passenger train on the Stockton to Darlington Railway and there are many special event stations on the air. For a full listing, check out their website at http://barac.m0php.net.

GB70GB is a very special Special Event callsign, issued by Ofcom for the 70th anniversary of the opening of the Research Centre at Great Baddow. This is the home to what was originally Marconi's Research Laboratories. Later, it was also home to famous staff including Spycatcher author Peter Wright and Chris Cockrell, inventor of the hovercraft. The station will be operating on Saturday 3rd October and will be operated by members of the Chelmsford Amateur Radio Society. Baddow is also home to the last surviving fully intact 360ft Chain Home radar mast from the Battle of Britain - itself coming up to its own anniversary in February 2010, the 75th anniversary of the Daventry Experiment when radar was born. Visitors must pre- register to visit the special event station and they will see a series of exhibits on Baddow's history and technology from turn of the century Marconi heritage right up to present day innovations at what is now known as BAE Systems Advanced Technology Centre. Full details can be found at qrz.com. Special event station GB4GDS, celebrating the work of the

Guide Dogs for the Blind organisation, will be operating from 1 October for 28 days from the Lindsayfield branch of Guide Dogs for the Blind. Operator Keith, GM4DAE hopes to be active on 80m, 40m, 20m and 2m at various times from early morning through to late evening. The station celebrates the 78th anniversary of the first Guide Dog training in Wallasey, Cheshire, in 1931. Over the weekend of 3rd and 4th October, members of the Grimsby & District battalion will be operating GB1BB for the Founding weekend On the Air, which celebrates the founding of the Boys Brigade movement in 1887. Also on the air will be the 1st Bermuda battalion, callsign VP9400BB. If you are helping a Battalion or Company take part then please register the callsign via e-mail to fwoa_bb.2009@yahoo.com.

And now the HF DX news compiled from 425 DX News and other sources. The Glorioso Island DXpedition team are now active. The FT5GA team had some antenna problems at first due to windy weather conditions and a faulty contact on a WARC Spiderbeam, which was fixed. Indications seem that all three stations are now on the air. Activity has been on all bands and the CW/SSB modes with some RTTY. Operations will last until October 5th and the QSL Manager is F5OGL, Didier Senmartin, PO Box 7, F-53320 Loiron, France. Full details on their website at http://glorieuses2008.free.fr.

>From 5 to 50 October, Bill Vanderheide, N7OU will be on Rarotonga, South Cooks Island doing volunteer work. His callsign will be E51NOU and he'll be on the air in his spare time on 80 to 10m, CW only. QSL to his home callsign N7OU. Barrie, G4AHK will operate holiday style as 7Q7BJ while travelling around Malawi, until 12 October. He plans to focus on 160, 80 and 40 metres. QSL via G4AHK.

Now the contest news The Edgware Activity Periods run until 2 October in short periods of operation these can be found on their website, www.g3asr.thersgb.net. You can use SSB or CW on any or all of the bands. On 29 September the 70MHz UK Activity Contest takes place between 1900 and 2130UTC. You can use all modes on the band and the exchange is signal report, serial number and locator.

4

The first RSGB HF event of October is the 21/28MHz Contest On October 4 between 0700 and 1900UTC. You can work others on each mode on each band, exchanging RS(T) and serial number plus District Code. For most people this means the first two letters of your postcode, but single first letter postcodes are padded to two letters. If you're not sure what your District Code is, a list is available in the RSGB Yearbook or online at www.rsgbcc.org/hf/information/districtcodes.shtml. There are Open, Restricted and QRP categories and sections for CW, SSB and mixed modes. Saturday 3 October sees the 1.2/2.3GHz Trophy taking place between 1400 and 2200UTC using all modes. The exchange is Signal report, serial number and locator.

Non-RSGB events start with the IARU 432MHz&#65533;248GHz Contest, which runs for a full 24 hours from 1400 to 1400UTC on 3 and 4 October. The first six hours coincide with the RSGB 1.2GHz/2.3GHz Trophy Contest. Casual participants will doubtless find some 70cm stations on SSB to contact, but its well-equipped hilltop residents or portables that will be making the running.

Now the solar factual data for the period from the 14th to the 20th of September, compiled by Neil Clarke, G0CAS and Martin Harrison, G3USF. The solar disc was spotless throughout the week and solar activity remained very low. However, the solar flux moved very slightly upwards, reaching 71 units on the 19th and 20th, its highest level since July. The average across the week was 70, a gain of one point. The 90-day average was unchanged at 68 and the X- ray flux stayed below its minimum reporting threshold. More importantly for HF propagation, geomagnetic levels were consistently low, averaging a shade under 5 Ap units. Solar wind speeds reported by the ACE spacecraft ranged between a high of 476km/sec on the 16th and a low of 278km/sec on the 20th. Particle densities were low every day, apart from the occasional short-lived blip. And the interplanetary magnetic field was quiet, with Bz showing only small variation, the maximum being between plus 7 and minus 5 nanoTeslas on the 20th. Aided by low geomagnetic levels and seasonal improvement, HF propagation reached predicted values. Good morning openings to the Far East and the Pacific were reported on 14MHz and the Glorioso DXpedition proved workable up to 24MHz. There were even brief periods with sporadic-E on 28MHz. Looking ahead now, solar activity will mostly be very low, though we may well see occasional sunspots and even a minor flare. Solar flux levels are expected to hover around 70. The geomagnetic field may initially be slightly unsettled in the wake of a small coronal hole disturbance but should subsequently be quiet. Prospects for HF propagation look reasonably good, within the context of the current prolonged solar minimum. MUFs at equal latitudes will continue to be around 19MHz in southern Britain and 16MHz in the north. Darkness lows will be about 9MHz. Paths to southern Africa should have a maximum usable frequency around 22MHz. The optimum working frequency, at which there should be a 90 per cent chance of success, will be around 18MHz. The best time will be between 1400 and 2000 UTC. Finally, G4FKH's propagation predictions for a wide range of paths can now be found on the Society's web page at www.rsgb.org.uk/propagation.

And that's all for this week from the propagation team.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Tuesday 29 September Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Wednesday 30 September Bracknell Amateur Radio Club is having a 2 metre local net on 145.375 FM. Contact Paul, M3XPR, by email to pryan@max.co.uk.

On Wednesday 30 September Chesham and District Amateur Radio Society is having a construction evening. Contact Terry, G0VFW, on 01442 831 491. On Wednesday 30 September Dover Radio Club is having ten-minute talks by members. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk. On Wednesday 30 September Havering and District Amateur Radio Club is having an informal evening. Contact John, M0UKD, 07817365354. On Wednesday 30 September Norfolk Amateur Radio Club is having an informal construction and workshop evening with Bright Sparks. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 30 September Worthing and District Amateur Radio Club is on the air and having a discussion enening. Contact Roy, G4GPX, on 01903 753 893. On Thursday 1 October Cray Valley Radio Society is having a talk by George, G3BNE oh his life in radio. Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm. On Thursday 1 October Horsham Amateur Radio Club is having a used equipment sale. Details on the web at www.harc.org.uk. On Thursday 1 October King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com. On Thursday 1 October Shefford and District Amateur Radio Society is planning for CQWW. Contact David, G8UOD, on 01234 742 757. On Friday 2 October Cambridge and District Amateur Radio Club is having a talk on Cambridgeshire RAYNET by David, G8IDL. Contact David Leary, G8JKV on 01223 355254. On Friday 2 October Crystal Palace Radio and Electronics Club is looking at mobiles, portables and test equipment. Contact Bob, G3OOU, on 01737 552 170. On Friday 2 October Loughton and Epping Forest Amateur Radio Society is having a talk on the history of signalling by John Mulye, G0VEH. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Friday 2 October Wey Valley Amateur Radio Group is having a talk by Roger Western, G3SXW. Details on the web at www.weyvalleyarg.org.uk.

6

On Saturday 3 October Brede Steam Amateur Radio Society is at the bunker. Contact Steve, on 01424 720815. On Saturday 3 October Surrey Radio Contact Club has its club dinner. Contact Ray, G4FFY, on 020 8644 7589. On Sunday 4 October Worthing and District Amateur Radio Club is having breakfast at the Goring Caf&#65533; Restaurant. Contact Roy, G4GPX, on 01903 753 893.

NEWS FOR THE SOUTH-WEST

Foundation and Advanced training courses start in Lymington, Hampshire this month. The Foundation course commences on Friday 25 September and the Advanced on Monday 28 September. Details from Richard Ferguson, M0RBF, by email to training@hamandchips.com. The Horndean & District ARC will be running their next Licence training course in October. The first part of the tuition for the Foundation Licence will be on Saturday October 3rd, with the remainder of the course, plus the exam on Sunday October 11th. There is also an intermediate licence course, with the exam also on October 11th. Details from the Stuart Swain, G0FYX, on 02392 472846 On Monday 28 September Bristol RSGB Group is having a talk on the mechanics of music and how to stay in tune by Professor Alan Bramley, G4NDU. Contact Robin, G3TKF, on 01225 420442. On Tuesday 29 September West Devon Radio Club is having a CW night. Contact Jules Cuddy, M1AGY, on 01752291588. On Wednesday 30 September Taunton and District Amateur Radio Club is having a talk on kite aerials by Roger, G4ROJ. Contact William, G3WNI, on 01823 666 234. On Wednesday 30 September Thornbury and South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048.

On Thursday 1 October Newquay and District Amateur Radio Society is having a general chat and operating night. Contact Joe Bell, M6JOE, on 01726 891557. On Thursday 1 October South Bristol Amateur Radio Club is having talks by members on domestic radios from yesteryear. Contact Len, G4RZY, on 01275 834 282. On Thursday 1 October Swindon and District Amateur Radio Club is having a talk on the world of DX by Don Field, G3XTT. Contact Den, M0ACM, on 07810 317750.

On Friday 2 October Bournemouth Radio Society is having a talk by Nicky Marriott, M5YLO about her recent YL Dxpedition to the Falklands. Visitors are welcome. The meeting is at 8pm at the Kinson Community Centre. Contact John, G0HAT on 07719 700771. On Friday 2 October Torbay Amateur Radio Society is having an operating night. Contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR THE MIDLANDS On Monday 28 September Gloucester Amateur Radio and Electronics Society is having an informal evening. Contact Anne, 2E1GKY, on 01452 548478, daytime.

7

On Monday 28 September Leicester Amateur Radio Society is on the air. Contact the duty committee member on 07804 595749. On Monday 28 September South Birmingham Radio Society is testing its equipment for field day. Contact Don, on 0121 458 1603. On Monday 28 September Stratford Upon Avon District Radio Society is having a talk on aurora by G4GEE. Contact G0CHO, on 01608 664488. On Tuesday 29 September Derby and District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk. On Tuesday 29 September Loughborough and District Amateur Radio Club is having a practical evening. Contact Chris, G1ETZ, on 01509 504 319. On Wednesday 30 September Lincoln Short-Wave Club is making final arrangements for National Hamfest on the 2nd and 3rd. Contact Pam Rose, on 01427 788356. On Wednesday 30 September Midland Amateur Radio Society Club is on the

air, having a ragchew and holding training classes. Contact Norman, G8BHE, on 01214 229 787. On Wednesday 30 September South Notts Amateur Radio Club is holding a members-only Forum. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc.

On Wednesday 30 September Telford and District Amateur Radio Society is having a social evening. Contact Mike, G3JKX, on 01952 299 677. On Thursday 1 October Lowestoft and District Pye Amateur Radio Club is having a club night. Contact Phil, G0JSG, on 01502585448. On Thursday 1 October Salop Amateur Radio Society is having a natter night. Details on the web at www.salop-ARS.org.uk.

On Friday 2 October Cheltenham Amateur Radio Association is having a talk on D-Star by G4SGI. Contact Derek Thom, G3NKS, on 01242 241099. On Friday 2 October Coventry Amateur Radio Society is having a talk on Coventry Cathedral by Gordon Thorpe, M0GKO. Contact John, G8SEQ, on 07958 777363. On Friday 2 October Nunsfield House Amateur Radio Group is holding a photo competition on the subject of fire. Contact Ken Frankcom, G3OCA, on 01332 720976. On Friday 2 October South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND On Monday 28 September the UKFM Group Western holds its Annual General Meeting in the club room of the Warrington Amateur Radio Club. The venue is Grappenhall Community Centre, Bellhouse Lane Grappenhall WA4 2SG. For further information please contact Kath, M1CNY on 01270 761 608 or email dwilson@btinternet.com. On Monday 28 September Angel Of The North Amateur Radio Club is on the air and continues its Advanced licence course. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 28 September Bolton Wireless Club is having a talk on low earth orbit amateur satellites by Andy, G1EFP. Contact boltonwireless@gmail.com.

8

On Monday 28 September Sheffield Amateur Radio Club is having a social night. Contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk. On Monday 28 September South Manchester Radio And Computer Club has its monthly technical forum. Contact Ron, G3SVW, on 0161 969 3999. On Monday 28 September Thornton Cleveleys Amateur Radio Society is watching a video on the Wellington bomber with John, G4FRK. Contact John Foster, M3WAZ, on 01253 399377. On Tuesday 29 September Chester and District Radio Society is having a bring and tell evening. Contact Barbara Green on 0151 339 9183. On Tuesday 29 September Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 07852 200232. On Tuesday 29 September Otley Amateur Radio Society is having presentations by members. Contact Paul, 2E0PAK, on 07768 996370. On Tuesday 29 September Warrington Amateur Radio Club is having a talk on DSP basics by Cliff, M0MRC. Contact Roger, M0DWQ, on 07868 000 705. On Saturday 3 October Chester and District Radio Society is having a committee meeting. Contact Barbara Green on 0151 339 9183.

On Saturday 3 October Otley Amateur Radio Society Club is visiting the National Hamfest. Contact Paul, 2E0PAK, on 07768 996370. On Wednesday 30 September Hornsea Amateur Radio Club is having a talk on contesting by Richard, G4CGG. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Wednesday 30 September Mid-Cheshire Amateur Radio Society is planning for Radioactive. Contact Peter Paul Fox, G8HAV, on 01606553401.

On Thursday 1 October South Manchester Radio And Computer Club a is having a talk on navigating the Warwickshire Ring by Dave, G4UGM. Contact Ron, G3SVW, on 0161 969 3999. On Friday 2 October East Cleveland Amateur Radio Club is having a radio magazines evening. Contact Alistair, G4OLK, on 01642 475 671. On Friday 2 October Tynemouth Radio Club is looking at the virtual world. Contact Graham Errington, 07812 172136.

NEWS FOR SCOTLAND On Sunday 27 September Moray Firth Amateur Radio Society is taking part in Railways on the Air from Dufftown station. Contact Jim, MM0SMD, on 01340 820 134. On Tuesday 29 September Ayr Amateur Radio Group is having a construction night. Contact Charlie, MM0GNS, on 01563 551704, cgnstewart@hotmail.com. On Tuesday 29 September Livingston and District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192. On Wednesday 30 September Kingdom Amateur Radio Society is having a shack night. Contact Brian, MM0XBD, on 01383 738905. On Thursday 1 October Aberdeen Amateur Radio Society is having a junk sale. Contact Lewis, GM4AJR, on 01224 575 663.

9

On Friday 2 October Cockenzie and Port Seton Amateur Radio Club is having a normal club night. Contact Bob, GM4UYZ, on 01875 811 723. On Sunday 4 October Cockenzie and Port Seton Amateur Radio Club is taking part in the RSGB 21 and 28MHz Contest. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES On Thursday 1 October Meirion Amateur Radio Society is having a talk on antenna design by Simon, 2W0SAK. Contact John, MW0VTK, on 07868 738016. On Friday 2 October Newport Amateur Radio Society is having a construction night. Contact Gareth Price on 01633 880081. GB2RS welcomes news from all RSGB affiliated local clubs. We invite Club secretaries to email details of forthcoming meetings to GB2RS@rsgb.org.uk. Any information for November meetings that arrives before Thursday 1 October will also appear in the Club Calendar section of RadCom.

NEWS FOR NORTHERN IRELAND On Thursday 1 October Bangor and District Amateur Radio Club is having an operating evening. Contact Mike, GI4XSF, on 028 4277 2383. GB2RS welcomes news from all RSGB affiliated local clubs. We invite Club secretaries to email details of forthcoming meetings to GB2RS@rsgb.org.uk. Any information for November meetings that arrives before Thursday 1 October will also appear in the Club Calendar section of RadCom.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

SARL NEWS SUNDAY 27 SEPTEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail. Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

SILENT KEY

Gottfried Kemmer ZR6WWA has become silent key on the 16th of September. Our condolences to his wife Maria, family and friends.

(Pause)

In the news today:

SARL ANNOUNCES DETAILS OF HOME CONSTRUCTION COURSE

DEPARTMENT OF COMMUNICATIONS HAS RELEASED DRAFT FREQUENCY SPECTRUM POLICY

DATES FOR 2010 SARL EVENTS

SUMBANDILASAT MAKING PROGRESS

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SARL ANNOUNCES DETAILS OF HOME CONSTRUCTION COURSE

The SARL will be presenting a series of Home Construction courses staring in Gauteng on 21 November 2009 at the NARC. Dates for Durban, Cape Town and Port Elizabeth have been posted on the web.

The course is intended to give the following skills: how to make SMD quality PCB's, how to mount SMD components and how to make industrial quality face plates and labels.

The techniques used are original, and will turn a home built project into a real quality item. Some of the methods and techniques to be taught will be valued and protected by many electronic companies operating in the industry.

In addition a CD with circuit and PCB generating software for windows together with a practical demonstration that will turn your circuit into a first case industrial grade project, will be made available. At the course participants will be given materials to manufacture PCB's and mount SMD components.

Course fees and registration details can be found on www.sarl.org.za, select RTA under the activities on the home page. Only 20 participants can be accommodated at each course and will be accepted on a first come first service basis.

DEPARTMENT OF COMMUNICATIONS HAS RELEASED DRAFT FREQUENCY SPECTRUM POLICY

On the 18th of September the Department of Communications published the draft frequency spectrum policy for comment. This policy, once finalized, will determine how spectrum is managed in South Africa and will provide ICASA with the guidelines. The policy will also affect the amateur spectrum and its management going forward. The SARL will study the document and prepare a submission to the DOC requesting that the amateur spectrum is highlighted because of its nature in providing community services, particularly should an emergency arise. The policy also lays down some guidelines affecting spectrum pricing.

Radio Amateurs in South Africa are invited to study the document and make input to the SARL for possible inclusion in the submission being prepared by the SARL as the national body for amateur radio in South Africa. The Government Gazette can be downloaded from www.sarl.org.za, click on publications and select ARMI. The deadline for submissions to the SARL is 7 October 2009.

DATES FOR 2010 SARL EVENTS

Dates for the 2010 RTA and PIC courses have been published on the SARL web. Diarize the dates. Details of when the bookings for the PIC courses will open will be announced in early January. The dates can be found on www.sarl.org.za on the RTA pages.

SUMBANDILASAT MAKING PROGRESS

The ground control station is making good progress in checking out the various systems on the satellite. Radio Amateurs will still have to wait some time before the amateur payload will be activated.

Paterson AFB in USA informed the SunSpace team that they had incorrectly labelled SumbandilaSat as Fregat-IRIS. They are part of the radar tracking network responsible for uniquely identifying over 20 000 objects in Earth orbit! The team has up to Thursday last week been tracking the Fregat-Iris (35 867) instead of SumbandilaSat (35 870).

After correcting the TLE information, communication with the satellite is more consistent and reliable which should speed up the activation process. The elements and up to date information is regularly posted on www.amsatsa.org.za.

LAST CHANCE TO PAY YOUR SARL SUBSCRIPTION

The 2009/2010 SARL subscriptions were due on 1 July this year with the final deadline 30 September. After that date membership privileges will be suspended. If you have not paid your subscription as yet, please do so in the next few days. If you pay after that date you will lose any unbroken membership status you may have built-up. The current subscription is only R340. Think about it for less than R1 per day you can support the national body that takes care of amateur radio in South Africa and, through its membership of the IARU, internationally.

Call Mariska on Monday at 011 675 2393 or send an email to admin@sarl.org.za if you need a copy invoice or banking details.

VISITING THE SARL OFFICE

It happens from time to time that you may need to pay a visit to the SARL office and there is nothing more frustrating than planning your trip, arriving at the NARC and there is no one there.

As much as we try to ensure that there is someone at the office during our normal times, which are Monday to Thursday from 08:30 - 16:00 and from 08:30 - 11:00 on a Friday, it does happen that Mariska is sick, or has taken leave due to any reason.

We would request that before you decide to embark on your trip, to please phone the office first on 011 675 2392 to make sure that Mariska is there and will be available to assist you.

A lock up box will shortly be installed at the front entrance to the office, where you will be able to drop off any important items for our attention.

SUCCESSFUL HAMNET EXERCISE

The Disaster Management Specialized Communication Volunteers, part of Hamnet South Gauteng, took successfully part in an exercise during which a major flood in the Kempton Park area was simulated. The objective was to assist new members to understand what type of information is required, to be concise and only respond on the frequency when the command centre calls the person in.

Howard, ZS6ZS, delivered the Metro's Mobile Command Unit within half an hour after receiving the call. Chris, ZS6COG, and Francois, ZR6COI, activated a second command post at the Springs Disaster Centre within 15 minutes. Within one hour a joint operations centre was set up at the Birchleigh Medical centre. The Hamnet team had established HF, VHF and UHF communications within 30 minutes after arrival.

CONTEST NEWS

The second leg of the SARL 80 Metre QSO Party will be run on Thursday evening 1 October from 19:00 to 22:00 CAT. It is a phone only contest with activity on 3,600 to 3,650 and 3,700 to 3,800 MHz.

The exchange is your call sign, a RS signal report and a consecutive serial number commencing with 001. Scoring is ten points per contact with a local station and 15 points with a station outside South Africa. Logs must be submitted by 16 October and sent to the Durban Amateur Radio Club, 17 Brownlee Place, Bluff, Durban, 4052 or by e-mail to zs5lp@sharksden.co.za.

The provisional results of three contests have been released. The full listing of results can be found in HF Happenings 372.

Boland 40 Metre Sprint:- 1st Ettienne Vosloo, ZS1AX, 56 points; 2nd Jan Botha, ZS4JAN, 50 points; 3rd Philip Verster, ZS1DV, 43 points.

SARL 40 Metre Mobile Competition:- 1st Gerhard Coetzee, ZS3TG, 477 points; 2nd J F Olivier, ZS5JP 342 points; 3rd Tienie Herbst, ZS6MHH, 278 points.

SARL HF Phone Contest:

Multi-Operator Stations:- 1st David Hutchinson, 3DA0DJ, 423 points; 2nd Bloemfontein Defence ARC, ZS4CD, 326 points.

Single Operator Stations:- 1st Jan Botha, ZS4JAN, 243 points; 2nd Gary Potgieter, ZS5NK, 188 points; 3rd Daniel Mans, ZS3D, 167 points.

The best score on a single band - Rosalie Van Loggerenberg, ZR2RL (ZS2DN), 141 points on 40 metres.

Following the SARL HF Phone contest, Rule 4 and 5 of the General Rules will be strictly adhered to during the checking of logs and summary sheets. Any logs found to be in contravention of these rules will be re-classified as check logs.

CLUB NEWS

Following the AGM of the East Rand Radio Club on 19 September 2009, it is our pleasure to announce the new committee that will be serving East Rand Amateurs in 2010:

Chairman Francois Jacobs, ZR6COI; Vice Chairman and Youth Marius Mynhardt, ZS6MGM, Secretary Charlotte Miller, ZU6CEM, Honorary Treasurer Andre van Tonder, ZS6HE, Bulletins Judy Pretorius, ZR6POP, Special Projects Margolet McKenzie, ZR6MRG, Special Projects Brian McKenzie, ZR6BNM, Flea Markets Francois Botha, ZR6COI,

QSL Manager Mitchel Mynhardt ZS6YH, Web Master Greg Miller, ZS6GDM, SARL Public Information Officer Ben Homan, ZR6BEC, Repeater Custodian Chris Gryffenberg,ZS6COG

The East Rand club now boasts in excess of 50 members and they invite all East Rand Radio Amateurs to join in their regular activities that are open to all, members and non members.

On Saturday 3 October 2009 the East Rand Flea Market takes place at the East Rand Clubhouse in Plantation Road Springs, behind the Civic Centre. They are QRV on 145,675 MHz, the East Rand Repeater. Activities start at 08:00 and conclude by 11:00. Tables are R 20-00 each and bookings are essential. Contact Francois on 079 932 7131 to secure your spot. There is plenty of parking and seating available. Refreshments will be on sale. Go and join in the fun of the flea market.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. The good news is that two sunspots appeared simultaneously during the week. It is the first time in three months that this has happened.

20 and 15 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europa. In the mornings it may be possible to make contacts with Australia. Contacts with New-Zealand are going to be challenging. During the early mornings and evenings 20 and 40 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

1 October - Second leg of the SARL 80 Metre QSO Party; 3 October - East Rand Flea Market; 6 October - Logs for Heritage Day sprint to be in to riaanzs4pr@gmail.com; 7 October - Comments on Draft Frequency Spectrum Policy to be in; 16 October -Logs for second leg of the SARL 80 Metre QSO Party to be in. 21 November - Home Construction course, Gauteng, at the NARC.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League,

compiled by Roger, ZR3RC, and edited by George, ZS6NE.

This is the last bulletin to have been compiled by Roger since he will be taking up further studies at the beginning of next year. We thank Roger for his contribution to amateur radio as a volunteer member of the news team and we wish him all the success in his new endeavours.

Thank you for listening, 73.
/EX

A NOT SO SILLY TWIT

National News wants to keep up with you on Twitter
To find out more about Twitter, visit the link:
http://twitter.com/i/deafe017142140db7044566433da2c1d176ca9b9

Twitter is a unique approach to communication and networking based on the simple concept of status. What are you doing? What are your friends doingï¿½right now? With Twitter, you may answer this question over SMS or the Web and the responses are shared between contacts.

So look for VK1WIA now on Twitter.

>From Twitter to steam powered radio.

Are you a current Radio Announcer?

Were you a Radio Announcer,

SBS/ABC/COMMUNITY/NARROWCAST or COMMERCIAL announcer and hold a ham licence?

nationalnews@wia.org.au wants to hear from YOU for a very very SPECIAL News Broadcast in November.

Currently we have 4 or 5 there HAS to be more of you out there! hihi

Please as a matter of urgency email nationalnews@wia.org.au

TODAY.

If your finding difficulty hearing this newscast on RF in the Brissy area, try these stations on VHF/UHF

Primary:- 147.000

North to Logan:- 438.575 and 146.850

South to the Brisbane River:- 146.700 146.950

HARAOA that is Hellenic Amateur Radio Association of Australia has now its own Radio Shack.

The Radio Shack is located at the St George Sailing Club in Sans Soucci with water front views.

Permission has been granted for antennas and a tower to be erected at the Sailing Club.

If you have any equipment gathering dust that you may want to good use, how about letting HARAOA utilise it at their new permanent Radio Shack, and help get VK2CL on the Air. Any help would be greatly appreciated.

Please contact Tommy VK2IR

0413-005-511

OCT 25

Ballarat Amateur Radio Group Annual Hamvention, new location of Ballarat Greyhound Racing Track, off Rubicon Street.

All the usual traders of new gear will be in attendance as well as the very popular pre-loved displays.

Food and drinks will be available on the premises

Doors open for trading at 10.00am, and entry fee is still $6.00.

The new location has huge off street parking.

For more information and table bookings contact
hamvention@barg.org.au

Chris Chapman VK3BJA has just released an early heads up that Gippsland Gate Radio & Electronics Club's Hamfest NEXT year will be July 17.

The 2009 Annual General Meeting of theTARCinc happens Sunday November 22nd from 7am at Area 2 - Rossiter Park Aitkenvale.
The AGM will start off with a scrumptious Breakfast followed by the meeting and attendance numbers are needed for catering purposes.
Relay your AGM numbers as soon as possible to Phil VK4HSV.

0407 737976

Deadline is the November 17th Social Meeting.

The 19th North Queensland Amateur Radio Convention happened last weekend in Townsville, some great equipment specials, and great talks by
Max Riley VK2ARZ,
Associate Professor Keith Kikkert,
Peter Newey VK4APN
And the Club Forum with main participants Bill VK4XZ, Rusty VK4JM and Bill VK4FW

North West Tasmania Amateur Television Group

http://www2.vk7ax.id.au/atvgroup

The next General Meeting of the Club is scheduled for Saturday 3rd. October at the Ulverstone Lions Club Facility at the Show Grounds, West Ulverstone.

Start time for the meeting is 2.00 PM and members please note this is an important meeting and the last chance to discuss, as a group, the final arrangements for JOTA during the weekend of 16/17/18 th. October.
It is planned to hold Camps at Burnie Scout Hall, Paton Park, Ulverstone and Camp Boomerang Port Sorell.

Guest speaker for the meeting will be Tony VK7AX discussing all the facets of Amateur Television, both past and present.

As usual all persons welcome.

(Tony VK7AX, News Officer NWT-ATV Group)

WIANEWS urgently asks for rebroadcasters EVEN ONE! hihi in the Brisbane area.

AGAIN this week no news to be heard south of the Brisbane River to the border.

Sure a lil scrathy sig around Logan and south from 438.575 VK4RSS and Lismore/Byron up the coastal strip but SURELY after some 9 months+ we can get a club to handle this.

MANY have offered and not sure what happened but how about letting the QAC know! PLEASE email qac@wia.org.au

Graham VK4BB
Sunday Morning
Sept 27 2009.

WIA PRESIDENT MICHAEL OWEN VK3KI:-

"The WIA began with a meeting of like minded people at the Hotel Australia, Martin Place, Sydney, on the 11th March, 1910, which formed the Institute of Wireless Telegraphy of Australia.

Has anything been happening about the centenary of the WIA next year, you may well ask.

Well, actually, yes, a great deal has been happening to celebrate the founding of the Wireless Institute of Australia 100 years ago.

The WIA's Centenary Committee has been working on it for some 18 months. It has prepared extensive plans

With the broadcast next Sunday and with the October issue of AR we will be launching the details of the celebration of the centenary of organised amateur radio in Australia, which will commence in May and with a very special annual meeting in Canberra at the end of that month and continue through to the end of October.

And, we propose a very special role for our affiliated clubs.

So, make sure you are listening to VK1WIA next weekend".

DISCUSSION POINT With Geoff Emery vk4zpp

Those of us that live in the regional and rural areas depend on many community volunteers and one of the better known groups are the local Rural Fire Services. Over the years, many amateurs have been able to assist their local volunteer brigades by supplying radios, doing installation work and manning the base radio system. Other radio hobbyists have joined the brigades and been at the front line of fire fighting. Around the Wide Bay area, I am aware of several current and former volunteer fire fighters amongst the radio fraternity.

As part of our preparation for the summer season, it is not only the holiday preparations and the tidying up in case of cyclones but ensuring that our property is rendered as safe to fire ravage as possible. As much as I hate to suggest it (but then DX is not holding most of us to the HF Bands) some time removing the combustible items and reducing the

fuel load with the lawn mowing equipment is not only good for the soul but may protect you and your family in the event of an emergency.

Having had the experience of having to get my family out of a burning house and wondering what can be done when all the records and belongings are sodden ash, I can only emphasise the warnings issued by the Fire Authorities. Make sure you have charged batteries in your

mobile phones and HT's and an escape plan, should you ever need it.

Along the way, maybe your club can assist another group of worthy volunteers - your local volunteer fire service.

SILENT KEY

In the QNEWS broadcast this week,
(http://www.wiaq.com/ftp/vk4_qnews_64.mp3)
we pause to remember Silent Key Noel Mitchell VK4KP .. you may have bought your first ham radio rig from him. Make sure you listen as Peter Jones VK4YAC presents a very special trbute.

"Noel Mitchell first got his Ham radio licence somewhere in the 1950s..

In earlier years he served in the Air Force as an Instrument Maker in New Guinea during World War Two.

In fact, Noel had a life long love of aviation.

However his interest in all things radio led him to become a YAESU dealer in the early 70s .. but he's probably best remembered as a distributor for Kenwood radios from the late 1970s through the 80s and 90s.

He was very active himself on all bands HF, VHF and UHF.

In fact he was one of the early ones to call in to Queensland's first fulltime two-metre repeater which was built on Mt Tamborine near the Gold Coast in the early 70s...

AUDIO

Rare audio indeed, from the early 70s, recently uncovered by Bruce VK4EHT.

Noel VK4KP was also a pioneer of Amateur Television, being a founding member of the SEQ-ATV Group in the late 70s .. a club he stayed with for the next 30 years until his death.

He was featured in several mainstream TV programs promoting ATV, such as A Current Affair and on Channel Ten News..

Noel had a love of music, being a life member of the Theatre Organ Society of Australia.. where he produced many musicals and shows.

Mr Mitchell was also a great family man, always surrounded by his wife Audrey, and many children and grand children.

Never really coming to terms with the loss of his wife Audrey last year, and after suffering a cancer related illness, Noel the KP eventually went silent aged 85 .. on Monday the 14th of September 2009.

Truly one of the colourful characters of the Ham Radio community who'll never be forgotten.

We remember .. Noel Mitchell.. Victor Kilo-4-Kilo-Papa".

WEIRD AND WONDERFUL

Runs Entirely Off Power In Trees

The Science Daily website on Sept 9th reported about research undertaken by the University of Washington in relation to powering devices from the energy flowing around trees.

A study last year from the Massachusetts Institute of Technology found that plants generate a voltage of up to 200 millivolts when one electrode is placed in a plant and the other in the surrounding soil. Those researchers have since started a company developing forest sensors that exploit this new power source.

The UW team sought to further academic research in the field of tree power by building circuits to run off that energy. They successfully ran a circuit solely off tree power for the first time.

Co-author Carlton Himes, a UW undergraduate student, spent last summer exploring likely sites. Hooking nails to trees and connecting a voltmeter, he found that bigleaf maples, common on the UW campus, generate a steady voltage of up to a few hundred millivolts. This voltage is then put through another circuit to boost this up to a usable 1.1 volts which is enough to run low-power sensors. The equipment powers down to save energy and an in-built "heart-beat" clock that runs from 1 nanowatt, keeps the system awake for short periods.

The team has proven that this is not a dissimilar metal - battery effect and it will never generate large amounts of power but it can be used to power sensors and gauge the tree's health.

INTERNATIONAL NEWS With thanks to Amateur Radio Newsline, and the WW sources of the WIA.

TWO MORE RADIO TOWERS COME DOWN

Two more broadcast radio towers have been felled. Thais, since radicals in the Pacific Northwest toppled two towers owned by KRKO in Everett Washington as we reported last week.

The first involves WEAB in Allentown, Pennsylvania. Radio World says that the Federal Bureau of Investigation is trying to find out who cut the guy wires of the stations 350-foot tower causing it to fall to the ground. The Clear Channel tower is one of five in the same location of

Whitehall Township. Authorities as saying no one was injured and no other property was damaged in the incident. The station operates at 790 kHz, went on the air in 1949. Its on the air with its remaining towers.

There's no mystery to why the 400 foot tower for of WTJV AM in Deland, Florida fell. A local newspaper says that truck full of high school students snagged one of the guy wires on its bumper after a high school

football game. No one was injured, even though the tower and a power line fell. The station operate on 1490 kHz serves the Daytona Beach area.

COMMEMORATING PIERRE CURIE

On the air, keep an ear open for the fascinating call TM150RPC. Its on

the air to commemorate the 150th anniversary of the birth of physician and Nobel Prize laureate Pierre Curie.

For those of you not aware, Pierre Curie was a French physicist, a pioneer in crystallography, magnetism, piezoelectricity and radioactivity. In 1903 he received the Nobel Prize in Physics with his

wife, Maria Sklodowska-Curie, and Henri Becquerel, in recognition of the extraordinary services they have rendered by their joint researches

on the radiation phenomena discovered by Becquerel. That discovery is more commonly known as the X-Ray.

You can listen out for TM150RP-C on all bands and modes. QSLs go via F5KAZ.

UK CEASES MANUFACTURE OF TV RECEIVERS

The production of television receivers marked made in the United Kingdom has ended. On Thursday, August 22nd the final TV rolled off the production line at Toshiba's factory in Plymouth, England marking an end to the manufacture of a technology the UK invented.

In the UK, John Logie Baird is the man credited with inventing the television receiver. He demonstrated his first television set to the world in 1926. His Baird Corporation was the world's only recognized TV manufacturer at the end of the 1920s, with their Televisor Model B being the first mass-produced, commercially available set.

In the United States the work of Baird is little known. Here the credit as to who was the inventor of modern television really comes down to two different people in two different places both working on the same problem at about the same time. They were Vladimir Zworykin, a Russian-born American inventor working for Westinghouse and later RCA, and Philo Farnsworth, a privately backed inventor from the state of Utah. The duplicity of work eventually lead to a court battle that with patent priority status ruled in favour of Farnsworth in 1939. You can read the full BBC news report at http://news.bbc.co.uk/1/hi/technology/8222421.stm (Telegraph OnLine, BBC, Wikipedia.com, others)

SEARCHING FOR WALDO THE ROBOT

Lastly, scientists along Florida's Gulf Coast are trying to find a radio controlled underwater robot that has mysteriously vanished. Jerry Gaul, KE7GGV, has the details:

Scientists at Mote Marine Laboratory have lost a bright yellow submersible research robot somewhere in the Gulf waters off Venice, Florida.

The sea going remote control research device from laboratory in Sarasota has been missing since Monday, August 31st. Scientists aren't sure what happened to the robot, which is nicknamed Waldo. Some think that it might have sprung a leak or suffered a malfunction and sunk. Others believe that It also could be on the surface, but its communication beacon or E-L-T has malfunctioned and that it cannot signal its location.

Waldo the sea going robot is 6-foot-long, weighs about 115 pounds, has short wings midway up its cylindrical body and cost about $100,000. He was also equipped with a detector to find a toxic algae bloom called red tide that was valued at another $30,000.

If you live along the Gulf Coast and see something bright yellow strange floating off shore, that could be the missing robot.

For the Amateur Radio Newsline, I'm Jerry Gaule, KE7GGV.

If you find Waldo or even hear his radio signal you may be eligible for Mote Marine Laboratory's no-questions-asked reward. Their contact number is area code 941-388-4441. Ask for extension 271.

INTRUDER WATCH - ENFORCEMENT ZONE

Monitoring Service Report-PIRATES

1) ZL3AK has reported the call sign ZL3TST being active on the NZ CB bands. Confirmed this call sign does not exist within RSM SMART registration list. Apparently there have been some complaints. If anyone hears someone using the call sign ZL3TST on the NZ CB bands please report Date, Time, Channel, and relevant information.

2) The second reported pirate is ZL3T.
This one was reported by F5NBU, on 40m - this apparently is a YL operator who states that one should QSL via NZART. Apparently from the Tokelau area. She has been heard previously within other DX clusters.
If anyone has further information, please provide reports so that reports can be passed to relevant RSM area.

Melbourne Digital Amateur Television - update

A digital uplink test has been held at the Mt Dandenong site of the ATV repeater VK3RTV with four stations participating - VK3GMZ, VK3KHB, VK3TRX and VK3CH.

This test session on Saturday the 19th of September result in all stations being received at Mt Dandenong, reports Peter Cossins VK3BFG, with no errors or pixilation. The digital uplink standard for the repeater is DVS-S Satellite.

Experiments with power levels demonstrated that low power operation is possible.

Mick VK3CH at Thornbury was successful with just 150 milliwatts, which must be some kind of ATV record covering a distance of 30 kilometres.

The VK3RTV Controller is almost finished and it is envisaged that full Digital operations will commence around the end of the month.

VK3RTV will take both analogue and digital input signals, but the output will be DVB-T, which is the standard used by commercial TV stations.

The upgrade to VK3RTV was funded by Amateur Radio Victoria with the WIA also providing $1,000 through its Club Grants Program.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

Looking to boost your IOTA score?

Be VERY VERY aware if you happen to work the K6HFA Alaskan Islands project
it will cost you 3 GREEN STAMPS!!!

PLEASE NOTE (per Hugh): He states,
"Due to the very high cost of transportation in this area, I will reluctantly
require 3 Green Stamps, Three Dollars, for each direct QSL request for each
IOTA group.

"This applies to all direct requests - USA and NON-USA,
EXCEPT members of IREF. All others will be sent via the Bureau."

Alaska IOTA operation
Hugh, K6HFA, hopes to activate IOTA groups:

NA-236 - (New) Sanak Islands
NA-222 - South Alaska Peninsula West Group
NA-216 - North Alaska Peninsula West Group
NA-087 - Shumagin Islands

He plans to be in the area until October 5th.

Callsign will be K7A.

Activity will be on 40/30/20 meters using CW and SSB.
QSL via K6HFA.

WW SPECIAL INTEREST GROUP --- POLICE
http://www.iparc.nl

Ontario Provincial Police Force special event

Look for OPP officer Bob Cooke, VE3BDB and other current or retired uniform
or civilian members of the OPP, to activate the special callsign VC3COPP
between October 2nd - 31st.

Activity is to celebrate the 100th anniversary of the Ontario Provincial
Police Force (OPP). Since its formation on October 13, 1909, the OPP has
grown to become one of the largest deployed police forces in North America.

Activity will be on the HF bands, possibly 6 meters, and using CW and SSB.

QSL via VE3BDB only direct.

lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were

submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

SB QNEWS @ WW $QNEWS090927
QNEWS - SEP 27 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

QNEWS urgently asks for rebroadcasters EVEN ONE! hihi in the Brisbane area.

AGAIN this week no news to be heard south of the Brisbane River to the border.

Sure a lil scrathy sig around Logan and south from 438.575 VK4RSS
and Lismore/Byron up the coastal strip but SURELY after some 9 months+
we can get a club to handle this.

MANY have offered and not sure what happened but how about letting the QAC
know! PLEASE email qac@wia.org.au

Graham VK4BB
Sunday Morning
Sept 27 2009.

QNEWS BROADCAST September 27 2009

VK4 SILENT KEYS @ 2008 - 2009 QAC YEAR

VK4HEL Stan Sonter November 10 (advised by vk2va via Summerland)
VK4NKA John Bourke November 19 (advised by vk4kd)
VK4FFJS John VK4FFJS February (advised by vk4aoe)
VK4DIC Dick Ettinger March 5 (advised by vk4bgt)
VK4NBS Vince Skinner March 24 (advised by vk4dmc)
VK4JZB Bob Moule May 7 (advised by vk4jkl)
VK4KAD Ian Tinney May 9 (advised by vk4eka)
VK4IB Bernie Burgess June 24 (advised by vk7 news service ((vk7bk)))
VK4BT Bob Tompkins June 24 (advised by vk4vhs)
VK4KBN Arthur July 20 (advised by vk4so)
VK4BBG Jim Potts July 30 (advised by vk4ttt)
VK4PY Gary Meyers August (advised by vk4co)
VK4KP Noel Mitchell September 14(advised by vk4eht)

We pause now to remember another Silent Key .. Noel Mitchell VK4KP ..
... in fact you may have bought your first ham radio rig from him.

With a tribute, here's Peter VK4YAC...

"Noel Mitchell first got his Ham radio licence somewhere in the 1950s..

In earlier years he served in the Air Force as an Instrument Maker in
New Guinea during World War Two.

In fact, Noel had a life long love of aviation.

However his interest in all things radio led him to become a YAESU dealer in
the early 70s .. but he's probably best remembered as a distributor for
Kenwood radios from the late 1970s through the 80s and 90s.

He was very active himself on all bands HF, VHF and UHF.

In fact he was one of the early ones to call in to Queensland's first fulltime
two-metre repeater which was built on Mt Tamborine near the Gold Coast in the
early 70s...

AUDIO

Rare audio from the early 70s, recently uncovered by Bruce VK4EHT.

Noel VK4KP was also a pioneer of Amateur Television, being a founding member
of the SEQ-ATV Group in the late 70s .. a club he stayed with for the next
30 years until his death.

He was featured in several mainstream TV programs promoting ATV, such as A
Current Affair and on Channel Ten News..

Noel had a love of music, being a life member of the Theatre Organ Society of
Australia.. where he produced many musicals and shows.

Mr Mitchell was also a great family man, always surrounded by his wife Audrey,
and many children and grand children.

Never really coming to terms with the loss of his wife Audrey last year, and
after suffering a cancer related illness, Noel the KP eventually went silent
aged 85 .. on Monday the 14th of September 2009.

Truly one of the colourful characters of the Ham Radio community who'll never
be forgotten.

We remember .. Noel Mitchell.. Victor Kilo-4-Kilo-Papa.

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

Queensland has had it's first declared fire bans this week when the
temperatures became unseasonably high and the winds filled the valleys
with smoke and peppered the sky into grey opacity, around the Gympie
area. With the recent report in WIA National News of the Californian
amateur family that lost their home and the memories of the devastation

of large tracts of Victoria, this is a warning which we must take seriously.

Those of us that live in the regional and rural areas depend on many community volunteers and one of the better known groups are the local Rural Fire Services. Over the years, many amateurs have been able to assist their local volunteer brigades by supplying radios, doing installation work and manning the base radio system. Other radio hobbyists have joined the brigades and been at the front line of fire fighting. Around the Wide Bay area, I am aware of several current and former volunteer fire fighters amongst the radio fraternity.

As part of our preparation for the summer season, it is not only the holiday preparations and the tidying up in case of cyclones but ensuring that our property is rendered as safe to fire ravage as possible. As much as I hate to suggest it (but then DX is not holding most of us to the HF Bands) some time removing the combustible items and reducing the

fuel load with the lawn mowing equipment is not only good for the soul but may protect you and your family in the event of an emergency.

Having had the experience of having to get my family out of a burning house and wondering what can be done when all the records and belongings are sodden ash, I can only emphasise the warnings issued by the Fire Authorities. Make sure you have charged batteries in your mobile phones and HT's and an escape plan, should you ever need it.

Along the way, maybe your club can assist another group of worthy volunteers - your local volunteer fire service.

Silent Key EI6DA

Pat Mooney EI6DA died peacefully on Monday evening 21 September last after a long illness in the loving care of his family at his family home on Johnstown Road, Dun Laoghaire.

Pat had spent his life as a dedicated Member of the Gardai and rose through the ranks to eventually retire as Garda Superintendent. He moved to Navan as Superintendent and was later transferred to the Garda Depot, Phoenix Park, Dublin up to his retirement which was about twenty years ago. Pat lived for a time in Castleknock and after retirement, Pat and his wife Marie moved to Dun Laoghaire.

Born in Dublin he was very proud of his roots and his family, sadly his wife Marie predeceased him about ten years ago. Pat was a very private man and very reserved and a latecomer to the world of amateur radio. A gentleman to his fingertips he was always ready to do the good turn or help fellow amateurs. After he retired from the Gardai sadly his eyesight began to prematurely fail and his neighbouring radio colleagues were not found wanting and were always there to help with antennas etc.

Pat enjoyed having a table at various rallies and enjoyed the haggle with his radio colleagues. Pat lived for a time in the '80s in Navan and was a regular at club meetings of the Royal Meath Amateur Radio Club and could always be relied to be the first to put his name down for the club's bus outings to the Killyhevlin in Enniskillen.

He was a great supporter of the Worked All Ireland Award and had achieved two ultimate awards one of them on 40 metres exclusively. One of the aims of the WAI Award is the promotion of friendship through amateur

radio and Pat achieved this to perfection. His friendly, courteous and gentle nature was very evident in his contacts on the air and created many enduring friendships.

The amateur world is very much the poorer tonight with the death of one of this country's finest and most respected Superintendent amongst his Garda colleagues, especially along the border where he served during the difficult times of the "Troubles" shortly after being appointed Superintendent.

Pat Mooney, despite his responsibility for safety and discipline of his Area Gardai also had the reputation as being a very caring Christian man, a caring which extended beyond his family circle to his Garda Colleagues and to providing Christian support to neighbours and especially radio colleagues during any serious illness or need.

His funeral took place on Saturday 26th of September ,To his family and many friends we extend our deepest sympathy. May he rest in peace.

THEORY CLASSES IN REGION 4

Plans are being put in place to run radio theory classes in the Limerick area by IRTS Region 4 representative Ger McNamara EI4GXB, with the hope that the theory examination can be held in Limerick which will be dependant on numbers.

Those interested in attending the theory classes can contact Ger via email at ei4gxb /at/ gmail.com or 087 2532512 or QTHR

Estate agent signals Marconi sale

Italian inventor Guglielmo Marconi carried out early radio transmission experiments to and from Rathlin Island from Ballycastle in 1898.

His house, known as Marconi's cottage, sits on the rocks of the North Antrim coast two miles outside Ballycastle.

The experiments were part of the development of wireless telegraphy which would transform communications.

A Belfast-based selling agent described the cottage as sitting on a "secluded 18 acre site with breathtaking sea views and surrounded by rural countryside". The property has gone on the market for 450.000 Euro.

Tipperary Amateur Radio Group

The next monthly meeting of the Tipperary Amatuer Radio Group will take place on Thursday next the 1st October in Raheen House Hotel, Raheen Road, Clonmel at 8.00 pm All are Welcome to attend.

Industry News

ASTATIC Re-branding

CAD Professional Microphones and Astatic Commercial Audio Products, which are re-branding as C-A-D Audio.

While the name CAD Professional Microphones may not be one familiar to Amateurs, the Astatic brand has its roots in amateur radio. The company was established in 1931 by two radio engineers dedicated to the development of a static-free, or "anti static," microphone.

Over the years the company evolved into Astatic Commercial Audio products. Perhaps its most famous Astatic branded product was the lollypop looking D-104 crystal microphone that was considered the gold standard for two way radio in the 1950', 60's and through the mid-1970's.

That D-104 was discontinued from production a decade ago. The name change for the Solon, Ohio, company became effective on September 1st.

Ontario Provincial Police Force special event

Look for OPP officer Bob Cooke, VE3BDB and other current or retired uniform or civilian members of the OPP, to activate the special callsign VC3COPP between October 2nd - 31st.

Activity is to celebrate the 100th anniversary of the Ontario Provincial Police Force (OPP). Since its formation on October 13, 1909, the OPP has grown to become one of the largest deployed police forces in North America.

Activity will be on the HF bands & possibly 6 meters, using CW and SSB.

QSL via VE3BDB only direct.

Free Yagi antenna designs

Derek Hilleard, G4CQM - a professional antenna designer with more than 15 years experience - has now published, free of charge, a collection of homebrew/diy vhf, uhf and shf yagi designs for fellow radio amateurs to build for themselves.

The website has a range of designs for Yagi antennas covering 50MHz, 144MHz, 432MHz and 1296MHz (the 6m, 2m, 70cm and 23cm bands).

You can find Derek's website at:
http://myweb.tiscali.co.uk/g4cqm/

K5D DVD almost ready!

The Desecheo video is almost ready according to the K5D Web page.

The Web page reports: "Bob K4UEE and Ed W4ZSB will produce yet another exciting DXpedition video. This DVD is expected for release by October 2009.

For complete details please go to the website
http://www.k4uee.com/dvd

Rallies

For more information on Rallies please check the IRTS website.

This week in History

1918 First direct radio message, UK to Aust. received by E Fisk, Sydney.

1956 First Trans Atlantic telephone cable, Scotland to Newfoundland, Canada.

Items mentioned in the IRTS Radio news are of a general, educational or informative nature, there is no guarantee that stations mentioned can be heard or worked.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to
�charlie dot Carolan at gmail dot com
Or by phone to 087-6265418 News can also be submitted via e-mail to

�newsteam at irts dot ie� for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday�s bulletin.

September 28, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KY1V, NJ1Q, NG3K, N4AA & QRZ DX, KH6BZF, K8YSE, 5B4MF, AT International, DK8JB, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, I1HYW, I1JQJ/IK1ADH & 425 DX News, OH2BN, OH2HAN, ON5JV, Pete's-DX-Newsdesk, PS7AB, PY7XC, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VE3EXY, VE3ZZ and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-September, through Sunday, 27th-September there were 220 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FR/g, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TK, TL, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V5, V7, V8, VE, VK, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). Updates for this one are expected to be on QRZ.com (under 3D20CR). The crew plans to start operations on October 1st. Suggested frequencies are:
CW - 1826.5, 3505, 7020, 10104, 14024, 18080, 21024, 24894, 28024 and 50124 kHz

SSB - 3799, 7070, 14190, 18145, 21290, 24950, 28490 and 50124 kHz
RTTY - 10140, 14080, 18110, 21080, 24920 and 28080 kHz.
Look for a 6m beacon to be on 50124 kHz. QSL via DJ8NK, by the bureau
or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009"
are "NOT" OK. QSL cards are most likely to be sent out in January 2010).
For more details and possible updates, see their Web page at:
http://www.conwayreef2009.de

4U1, ITU HQ (Topband Activity). A report from RSGB President Colin Thomas,
G3PSM, states: "4U1ITU will be active during the CQWW CW Contest at the
end of November and there will be a 160m operation. Currently there is no
160m operation due to the very high noise level from computers both from
within the main ITU building itself, but also from surrounding inter-
national organizations. It is understood that a Titanex V160 has been
promised from a Japanese source, and it is hoped that time can be found
during the week preceding the contest to get the antenna up on the flat
roof of the 5 storey Varembe building. However, most of the operators
and helpers will be taking part in WRC-12 preparatory meetings during
that week. A Multi Single operation is currently planned for the contest."

4W, TIMOR-LESTE. By the time you read this, Al, 4W6AL (CT1GPQ), will be
QRT (September 27th) and will be heading home. The Algarve STAR DX Team
has updated the log and it can be found on: http://algarvedx.com

6Y1V YOUNG HAM EASSAY DEADLINE (September 30th). David, KY1V, reports
on September 26th: "In just four short days we will be selecting 4 young
hams to join us this year for CQWW at 6Y1V. We are very excited this
year as we have received essays from every continent, from age 9 through
21, and from both boys and girls! I have previewed many of the essays
and I can already say it is going to be very difficult to select just 4
young hams. If you wish to be considered for this years' CQWW SSB or CW
contest, you have only 4 days to submit your essay. I would like to thank
all of the young hams that sent essays this year and their parents for
putting their trust and faith in Stacy, Krassy and I. Please be sure to
work the all Young Ham 6Y1V station in CQWW this year!"

AT10, ANTARCTICA. Bhagwati, VU3BPZ, will once again head to the Antarctica
with the 29th Indian Antarctic Expedition (IAE). The crew has just finished
their pre-Antarctic training and medical checks. The team is expected to
be there over the winter during a long term operation between November 15th
and March 2011. Bhagwati is expected to be on the air from the Maitri Base
(WAP IND-03) using his personal callsign VU3BPZ and also a special callsign
AT10BP to be issued by the Ministry of Communication & IT for this event.
Updates and more details are expected on the WAP Web site at:
http://www.waponline.it (Check: News & Information page)

E21, THAILAND. Tinkon, E21NPZ/8, will be active during the CQWW DX SSB
Contest (October 24-25th) as a Single-Op/Single-Band (40m)/Low-Power
entry. QSL via E21NPZ.

EA8, CANARY ISLANDS. Operators Jean/ON5JV and Georgette/ON6AK will be
active as EA8/homecall from Tijoco Bajo, Tenerife Island (AF-004) between

November 20th and February 10th (2010). Activity will be on 40-10 meters during their evenings. They plan to use 100 watts into a vertical 14AVQ. QSL via their home callsigns, the bureau is preferred.

FK, NEW CALEDONIA. Akira, JA1NLX, (along with his XYL) will once again head to the Pacific, but this time he will be active from Ouvea Island (OC-033), the biggest island in the Loyalty Islands Group, between November 19-23rd. His callsign will be FK/JA1NLX. Activity will be on all HF bands (80-10 meters) using CW and RTTY with a IC-706MK2 100 watt transceiver and vertical antenna. QSL via the LoTW or by his home callsign, direct or by the Bureau. For more details and log after his operation, visit the following Web page at: http://www.ne.jp/asahi/ja1nlx/ham/fk_2009.html

FT/G, GLORIOSO ISLAND (Update). The FT5GA team continues to be on the air and is trying to satisfy the international Ham radio community. As of September 27th, they have made over 26.6k QSOs with 9.4k unique callsigns (12885/CW, 11676/SSB and 2070/RTTY). The team has had some problems with radios (two transceivers went down out of the four they had, but one was repaired). FT5GA was active during the CQWW DX RTTY Contest this past weekend. Still most stateside stations report that the FT5GA signals are very weak and propagation is not helping. Operations will last until October 5th, as per the Web page at: http://glorieuses2008.free.fr
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA

IOTA NEWS.....
AS-120. Members of the Nicosia Amateur Radio Club were expected to activate Agios Georgios Island on September 26th, as homecall/p. QSL via their home callsigns (using addresses on QRZ.com). Operators mentioned were: Andreas/5B8AP, Spyros/5B4MF, Tamer/5B4AHE, Philip/5B4ZN and Paris/5B4XF. It has been two years since the island was last activated during the IOTA Contest in 2007. <http://kkioftes.homeip.net/ham/iota2007/>
<http://kkioftes.homeip.net/ham/as120-2009/pictures/island_view.jpg>

EU-104/ Claude, F5MCC, will once again activate some of Corsica's
EU-164. coastal islands as TK/F5MCC between now and October 2nd. He was heard last week on EU-014, but is expected to activate Sanguinaires Islands (EU-104, DIFM TK-002, MIA MCO-022, WLOTA L 0098) soon and also Lavezzi Islands (EU-164, DIFM TK-011, MIA MCO-007, WLOTA L 0755). The activation on EU-164 will be for one day only between 1000-1600z. QSL via his home callsign, the Bureau is preferred.

NA-110. Rich, K3RWN, will once again activate the Isle of Palms (USI SC001S, Charleston County, South Carolina) between September 26th and October 2nd. Activity will be mostly SSB/RTTY/PSK31 with a focus on 30 meters for the Digital modes and 40/20 meters for SSB. This will be a portable operation using only 100 watts into a PAC12/Buddipole antenna. While on the beach, Rich will try some QRP SSB operations using his FT-817 and 5 watts. QSL

via his home callsign (QRZ.com).

OC-070. Hotang, YC0IEM, will be active as YC0IEM/8 from Ambon Island between October 4-23rd. Bands and modes of activity were not provided. QSL via IZ8CCW.

OC-142. Ray, K9LUK, will be active from Fraser Island (WLOTA L 2976, Queensland State, Australia) between October 18-23rd. Callsign was not provided. Activity will be on all HF bands. QSL via his home callsign (QRZ.com).

SA-062. With the support of the Island Radio Expedition Foundation (IREF), the Araucaria DX Group and the ForDX, a group of operators, will be activating Coroa Vermelha Island between November 11-16th. Activity will be on 80-10 meters using CW and SSB. The team members are Leo/PP1CZ, Andre/PY0FF, Renner/ PY7RP, Jim/PY7XC, Ciro/PY7ZY and Mike/K9AJ. QSL via K9AJ. For more details, visit their Web site at: http://www.pw6c.com

J79, DOMINICA (Update). By the time you read this, operators Babs/DL7AFS and Lot/DJ7ZG should be active as J79ZG from the city of Calibushie (Loc. FK95HO and NA-101) between now and October 15th. Activity will be on 80-6 meters on the usual DX frequencies, mainly on CW, SSB, RTTY and PSK, as well as 6 meters. They will look especially for JA stations. QSL via DL7AFS. Their Web page for this operation is: http://www.qsl.net/dl7afs/Index_J7.html

KC4, ANTARCTICA (On the Birds and APRS). Bill, K7MT, will once again be returning to McMurdo Station (AN-011) and be active as KC4USV between November 15th and February 20th, 2010. Bill states that he will be on the HF bands on 14243 kHz, Sundays at 0000z. He will also be active on PSK-31 (on 14070 kHz) and CW (14043 kHz) if time permits. Bill has also mentioned that he will take an Arrow II antenna and his Kenwood TH-7 to work the Amateur Satellites into VK and ZL land. He also has plans to be on APRS VHF/HF with a Kam Plus, so you might just see him driving around on the Ross Ice Sea as K7MT-7 on APRS. QSL via K1IED. Visit his home page for some interesting pictures at: http://www.mt.net/~k7mt/

KH4, MIDWAY ISLAND (Press Release). Tom/N4XP and Dave/WB4JTT, co-leaders for the 2009 Midway Island Dxpedition, sent out the following press release number 7 dated September 23rd (edited): "There is less than a month to go before the K4M team hits the air. Our final dates are now set.
We arrive on the Island on October 9th and our return will be October 19th. That gives us two weekends to be QRV.
Our website was updated this week with interactive propagation charts. Pick a month and then the time and it will show you openings from KH4 to the world at that moment.
The team wishes to thank those 15,000 DXers who voted on our web poll. If you haven't voted on your needed band/mode please do so now as we are going to use this to schedule our operators. We also appreciate all the comments left for us there. Our website is, http://www.midway2009.com

If you haven't visited it in a while stop by and help support our effort.
This month we are highlighting four more team members. You can read
all their history at: http://www.midway2009.com/meettheops6.html "

KH6BZF PROPAGATION FORECAST/REPORT (For September 28th-October 4th)....
Sep 28 LN-AN SOLAR REFERENCE
Sep 29 AN ---------------
Sep 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 1 AN-HN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 2 AN LN - Low Normal
Oct 3 AN
Oct 4 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH0, MARIANA ISLANDS. Yoshi, JK2VOC, will once again be active from
the Northern Marianas (OC-086) as KH0/JK2VOC between October 23-26th.
Activity will include the CQWW DX SSB Contest (October 24-25th) as
a Single-Op/All-Band entry. Look for activity before the contest on
30/17/12 meters. QSL via his home callsign, by the Bureau or direct
to: Yoshihiro Fukuta, 7-9 Mikawa, Tsu-City, Mie 514-0045 Japan

KL5, ALASKA (Special Event). Look for special event station KL5O to be
active on the air in observance of Alaska Day. Activity will take place
between 1800z, October 18th and 0600z, October 19th. Operations will be
on 160-10 meters, including 30/17/12 meters. Modes will be CW, SSB and
RTTY. Details from the KL5O Web site states, "Operation will be scheduled
to facilitate working North American stations, though all stations world-
wide are encouraged to participate. See the 'On The Air' link for time/
frequency/mode information." QSLs are available via the LoTW, eQSL and
if you want a hard copy QSL card, the QSL manager is AC7DX. For more
information, visit the KL5O Web site at: http://www.kl5o.com

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQ World Wide
DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power
entry. QSL via WC4E.

OG0, ALAND ISLAND. If you worked OG0A this past weekend, it was an Aland
Island contest station in this past weekend's Scandinavian SSB Contest.
A press release late last week from Jarmo, OH2BN, stated: "Martti, OH2BH;
Ville, OH2MM, and Pekka, OH2TA, will travel to Aland Islands to compete
head-to-head with the announced Market Reef OJ0B team headed by Pertti,
OH2PM, in the Scandinavian Activity Contest.
Radio Arcala's mother station OH8X will be operated by Juha, OH8NC,
while Toni, OH2UA, will travel south to put the OH2BH station on with
a pair of K3's for serious benchmark testing. QSL OG0A and OJ0B via
OH2BH, OH8X via OH2UA and OJ0J via OH0RJ."

OH, FINLAND (Special Mine Activity). Operators Simo/OH2HAN and Timo/OH3DF will be active as homecall/9 from the Arctic Amethyst Mine in Luosto (Lapland, Finland) between October 15-18th. Activity will be on the HF bands using SSB and RTTY. The Amethyst Mine is situated on a very beautiful natural place on top of Lampivaara Fell in Luosto, Lapland. Instead of being in raw material business it sells only locally produced amethyst jewelry. It also welcomes all the visitors, and you can dig your own amethyst gemstones there and hear the story of amethysts. They are mining only manually without machinery and their ideology of sustainable development is to preserve nature and work in a manner which does not disturb magnificent Lappish nature. A special QSL will be available via their home callsigns.

QSL INFO AND NEWS.....
QSL 3V8SS via IZ8CCW. Operator was SWL Ashraf, 3V4-002, from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DX RTTY Contest this past weekend. Read about Ashraf on: http://www.qsl.net/3v4-002

QSL ER0FEO via UU0JM or LoTW. Activity was in the CQWW DX RTTY Contest this past weekend.

FJ/VE3EY QSL STATUS. Nenad, VE3EXY, reports: "QSLs are out... Received first batch of FJ/VE3EY QSL cards from Nick for his August 2009 St. Barth activation. QSL cards are processed and ready to go to QSL bureaus."

QSL LS1D via LW9EOC. Operators were Daniel/LU3CT, Tim/LW9EOC, Daniel/LW1DIO and Mario/LW8DQ from La Tablada, Argentina. Activity was in the CQWW DX RTTY Contest this past weekend.

QSL OG20YL via OH2YL. Operator is Anne, OH2YL, from Karjalohja, Finland. Activity is to celebrate Ann receiving her license 20 years ago.

QSL SX5R via SV5DKL (QRZ.com address). Activity was in the CQWW DX RTTY Contest this past weekend.

7P8AO QSL STATUS. Laci, HA0HW, was informed by Pista, HA5AO (edited): "Yesterday (September 21st) I have received the QSL cards from the UX5UO printshop. I will answer the QSL requests, first, to the stations who sent donations to the orphan children in Lesotho, than those who sent direct requests with sufficient funds. In the third batch the QSL cards will be posted to stations who sent IRCs, however, I kindly asked for GS (Green Stamps) only. All the direct requests with 1 USD will be answered via the bureau. Finally the bureau cards will be answered. I uploaded and will be uploading the QSO details to the LoTW to all those stations who sent or gave donations on-line or it was included with their direct requests. The complete log will be uploaded to the LoTW at least a year. If you are going to send for a direct QSL request, please read my QSL policy carefully (on QRZ.com), especially for the Lesotho operation."

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Vlad is still sending them out.

QSLS VIA LOTW: 5N0OCH, 6H1IM, 7Q7BP, CP6/DF9GR, DL4CF, FO8RZ, LA9Z, LY2IJ, SM3EVR, UA0YAY, XE1HSW, ZC4LI and ZP6CW

QSLS RECEIVED VIA MAIL: 5V7PRF, 7Q7BP, 7Q7HB, 7P8MM, 7P8OK, 9J2FM, 9L1X, A25/DL7DF, A43DLH, BX5AA, C21TI, EA5ARJ, EA9IB, EU3AR, FM1FV, GB5KIL, GB0SGB/p, H44MY, HR9/WQ7R, HV5PUL, JD1BMH, OZ1GML, P29NI, S04R, SV2AVP, TY5ZR, V51YJ, V8AQM, V85SS, VK9GMX, VK9NI, VP8YLH, YJ8TZ, ZF2DX and ZF2ZB

QSLS RECEIVED VIA THE BUREAU: 5X7FN, 6Y1V, 7P8FC, BY4RSA/4, C56YK, CE0Z/DL2AH, CO2IZ, DL6EZ, DR25RIN, E7/YT2ED, EA2VE, EA9BW, EB1DH/p, EG2ANT, EK8PL, EK0B, F/ON7MH/P, HA8IE, HF94KE, HG0HQ, HG5Y, IF9/IK5MEQ, II8ANT, II8IPY, IK6CAC, IO1DCI, IP5PJ, IQ4AX, JE1FAR, JJ5EFY, JW8DW, LY0HQ, OE9XHQ, OH5NE, ON64POL, PA143ITU, R45VT, RD3MA, RP3D, RK3IWT/1, RT4M, SN7Q, TF/LA9SN, TO6T, TU/F5LDY, UA6UDV, UT0VE/P, VE3MIS, VK7AC, YL2GQT, YV5CRB and YW6AJ

TC1, TURKEY. Members of the Turkish group called TCSWAT (TC Special Wireless Activity Team) will activate the special callsign TC10TF between September 25th and October 2nd. Activity will be on the HF bands. Operators mentioned are TA0U, TA1HZ and TA2RX. Their activity is to celebrate the 10th Transportation Forum which is organized by the Ministry of Transportation & Communications between September 27th and October 1st in Istanbul <http://www.ulastirmasurasi.org/tr/main_page.html>. TCSWAT will be on the air to show that the Turkish ham radio operators are part of the infrastructure of communications. QSL info is available at: http://www.tcswat.org/QSL.html
It is suggested to "Please read the info before sending in any QSL cards."

TI, COSTA RICA. A large team of operators will be active as TI5N during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via W3HNK. Operators mentioned are: Sandra/N3TQU, Todd/KD4YHY, Don/N6JRL, Jim/AL7BA, Stan/KC7EHJ, Dave/KB8OCP, ???/KF0FWC, Jim/KI0DN, Carlos/TI5KD and Sophia/TI2IY. Look for the operators to be active before and after the contest using their own callsign between October 22-27th. Activity will be on 60/30/17/12 meters.

TX5, AUSTRAL AND MARQUESAS ISLANDS (Reminder/Update). Just a reminder that Les/SP3DOI, Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will activate Tubuai Island (OC-152) in the Austral Island group between September 29th and October 12th, as well as Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns have been confirmed and are TX5SPA (Austral) and TX5SPM (Marquesas). Their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. Both countries rank 21st and 19th respectively on the most wanted list in that area, but they do not intend to ignore the stations from other continents. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). PLEASE NOTE: Operators would like to emphasize that all the costs of the DXpeditions are covered entirely by its participants. They do not accept any sponsors, and are going there for their own pleasure, using their own money. The QSL Manager for their DXpeditions is going to be Wojciech, SP9PT. For more details and update, go to:

http://fo2009sp.pl
UPDATE: According to their Web page (as this was being typed), the team was expected to fly to Tubuai Island on Sunday, September 27th.

V3, BELIZE. Pete, K8PT, will be active as V31PT between November 24th December 6th. No other details were provided. However, in past operations by Pete, activity usually is 160-6 meters using CW, SSB, RTTY and some PSK-31. QSL via his home callsign.

VC2, CANADA. Operators Noel/VE2BR and Gregg/VE3ZZ will once again be active in the CQ World Wide DX SSB Contest (October 24-25th) from Mercier, Quebec (Zone 5, Grid Loc FN35dh), using the special call VC2Z. QSL via VE2BR.

VP9, BERMUDA. Bob, KE0UI, will be active as VP9I from Hamilton Parish during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power/Assisted entry. QSL
via N1HRA. Look for activity before and after the contest by Bob signing VP9/KE0UI. QSL via his home callsign.

XU, CAMBODIA. Operatprs Norbert/F6AXX and Alain/F6HBR will be active as XU7UFT from Sihanoukville between December 3-8th. Activity will be on the HF bands, but CW only. QSL via F6AXX, by the Bureau or direct (w/SAE and return postage). Look for direct QSLs to be answered after January 15th, 2010.

ZY0T, TRINDADE AND MARTIM VAZ ISLANDS. Four members of the Rio DX Group will activate Trindade Island (PY0T/SA-010) as ZY0T between October 11-16th, however this may vary due to the Brazilian Navy schedules. Operators mentioned are: Felipe/PY1NB, Linneu/PY1ON, Ivan/PY1YB and Fabio/PY1ZV. Activity will be a on 160/80/40/30/20/17/15/12/10 meters using CW and SSB. They plan to have 2 stations. Suggested frequencies are:
CW - 1821.5, 3520, 7005, 10110, 14030, 18088, 21030, 24910 and 28030 kHz
SSB - 1840, 3765, 7050, 14250, 18118, 21250, 24950, 28450 and 28550 kHz
QSL via PY1NB DIRECT ONLY. For more information, visit their Web page at:
http://riodxgroup.dxwatch.com/trindade-2009

2298. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1254376801@panix.com>
Source record: 6512
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Norm Fusaro, W3IZ, Editor

IN THIS ISSUE:

+ The Thumb
+ Hamfest Shakeup

The Thumb
Norm Fusaro, W3IZ

Let's consider the thumb for a moment. The thumb's ability to work with all the fingers on the hand makes it very important to humans. The opposable thumb separates humans (and primates) from other animals and is responsible for most human accomplishments. Because thumbs give us dexterity and allow us to use tools, we have been able to build many wondrous things. Some of these things are as small and intricate as a Swiss watch and as grandiose as skyscrapers and vehicles that allow us to explore beyond our planet. It is absolutely amazing that if not for the opposable thumb and the human brain that controls it, pretty much everything in our world would not be possible.

There is a lot of power in the thumb. Pointed downward a thumb could send a gladiator to his death. Hung out along a roadway the thumb can stop a car. Authorities keep subordinates under their thumb to maintain control. The thumb lets us know when we've done a good job, calls out baseball players, gives an artist perspective, counts money and can pacify a crying baby. The thumb also has a sinister side. We can thumb our nose at people, card cheats use the thumb to deal from the bottom of the deck or mark cards with a thumbnail, and the dishonest butcher has been known to place his heavy thumb on the scale.

For as much as the thumb has done to enhance our lives it seems that the index finger has been getting a lot of exercise recently. The index finger is very good at pointing however a pointing finger has not really accomplished as many positive things as the thumb has. Sure the index finger may dial a telephone, but without the thumb the telephone would never have been built. Pointing fingers send people away, poke-out eyes and blame others for our condition. In every aspect of our lives we see people pointing the finger of blame rather than accepting responsibility. A kid fails in school not because the

teacher taught the lesson poorly, but because he failed to study. A lady scalds herself with hot coffee not because the restaurant did not label the cup--she was scalded because she put hot coffee in her lap. People find it easier to point a finger instead of planting their thumb in their chest and saying "I am the one who will make a difference." If you ever feel the need to point a finger remember the thumb and all that is possible because of it. Let's metaphorically use our opposable thumbs to grip the rope and pull in the same direction.

Shake Up Your Hamfest.
By Bob Bastone, WC3O radiofreebob@att.net

Have you ever been to a hamfest? I am sure that many of you have and you know what to expect. A general rule for veteran 'festers is to get there early to look over the stuff and keep an eye under the table for those goodies that others miss. Attendees at a hamfest are an eclectic bunch. There are the newly licensed operators, the soon to be licensed and the old-timers. Whether it's new gear or back breaking antiques, a.k.a boat anchors, there is something for everyone. You could even buy a raffle ticket and hope for the best.

Not much is different with hamfests all over the country but it doesn't have to be that way. A hamfests is a perfect opportunity to try something new. Ideas don't have to break the budget but they can be something that offers the crowd something just for making the trip to the show.

Here are a few suggestions that we have used at the Skyview Radio Society's < http://www.skyviewradio.net/ > events. Feel free to use them at your club's next event.

Car Show

Our club has been doing this for a few years now. Some have classic cars, hot rods, bikes or whatever. Leave some preferred parking for them as incentive to bring their fancy car to your fest. Folks really enjoy looking over these between looking at that old GE receiver card and that old, busted, early Palm Pilot with no docking station for $10.00. Depending on your hamfest situation it doesn't cost you anything extra to do and people really enjoy it!

Jam Session

Many hams are also pretty good musicians. Why not advertise on your hamfest fliers for folks to bring their instruments. This has been great fun every year at our hamfest some time now. Wait until later in your fest to get started. Promote it on your PA system. Try it, you'll like it.

Culinary Delights

Do you do your own cooking for your hamfest? Try something different. Come up with a signature dish and give it a cute hammy name. At our fest we have the Skyview Burger and the Skyview Dipole Hotdog. Both are spicy and sloppy. Most folks will break a sweat so much that when you're done eating them you normally need a shower. Folk love them! Here is a tip: Don't buy low quality generic food. Get the good stuff and charge for it. People don't mind paying extra if they feel they are getting something special for their money. Taste is a very strong sense and emotion. They will be back to your fest next year, with friends.

Paparazzi

Take lots of pictures of your event especially pictures of people having fun. Crop out unnecessary background images and post the pictures on your club web site soon after the event. It's not as good as getting you face on the cover of QST but it's nice to see your smiling mug on a web site.

The hamfest season is just about over here in the northeast so this is a good time to plan for next year. I hope some of these suggestions might help your club with its next hamfest. They have worked well for us. Use your imagination. You know what you have to work with. The idea is to shake it up. Let's get some young folks interested and make your fest much more memorable for everybody. Good luck and I hope that old rusty D-104 you got from that box on the ground works out for you. I think you got a good deal on it.

Welcome to the HTML ARRL Letter

The ARRL Letter <http://www.arrl.org/arrlletter/audio/> has been
distributed via e-mail since January 1996, when the Internet was young
and full of possibilities. One of those possibilities -- our weekly
digest of Amateur Radio news -- has not changed all that much in
13-plus years. Until now.

The conversion to HTML is part of the effort to make all ARRL
e-publications more attractive and easier to read -- and more 21st
century.

In response to what ARRL members have told us, we have expanded the
scope of The ARRL Letter. You'll find more of a variety of news and
information -- the news, some enhanced technical content and other
features we think you'll enjoy.

For those who prefer to receive The ARRL Letter in text format, that
option remains available.
```

Please let us know what you think of The ARRL Letter by sending ARRL News Editor and ARRL Letter author S. Khrystyne Keane, K1SFA, an e-mail <k1sfa@arrl.org>. -- Joel P. Kleinman, N1BKE, Managing Editor, QST

==> + REGULATORY: ARRL BOARD ADOPTS GUIDELINES AND RECOMMENDATIONS ON THE APPROPRIATE USE OF AMATEUR RADIO

On Friday, September 25, the ARRL Board of Directors adopted guidelines on the appropriate use of Amateur Radio on behalf of commercial, non-profit and government entities, as well as recommendations for additional steps to be taken by the ARRL to educate radio amateurs and others on how to prepare and train for public service and emergency communications while complying with the current FCC Rules.

At its meeting in July 2009, the ARRL Board created an ad-hoc committee to study the issue and prepare suggested guidelines. The committee submitted its report to the ARRL Executive Committee, which reviewed and revised the document. After additional discussion among Board members by electronic mail and teleconference, the Executive Committee submitted the document to the Board for formal adoption.

Entitled The Commercialization of Amateur Radio: The Rules, The Risks, The Issues <http://www.arrl.org/news/files/ARRL_AppropriateUseGuidelines.pdf>, the document offers guidelines to assist radio amateurs and anyone wishing to utilize the capabilities of Amateur Radio in understanding the FCC Rules that prohibit communications in which the amateur has a pecuniary interest, including communications on behalf of an employer. While the FCC Rules in this regard have not changed in many years, there has been increasing discussion of the issue as growing numbers of employers and non-amateur organizations recognize the value of Amateur Radio as an emergency communications resource and encourage their employees to obtain amateur licenses. Also included are guidelines for evaluating the appropriateness of Amateur Radio volunteers providing communications services to commercial enterprises and other entities for which other communications systems are available.

"The guidelines are not intended to be the last word on the subject, and surely will not be," observed ARRL First Vice President Kay Craigie, N3KN, and chair of the ad-hoc committee. "The report includes several recommendations for additional steps that the ARRL needs to take to help amateurs and the organizations we serve to better understand the Rules and to ensure that what we do to prepare to be of service in emergencies is consistent with the current Rules."

==> + OPERATING: THE 2010 ARRL HANDBOOK: OUR BIGGEST -- AND BEST -- EVER!
With more than 60 authors and reviewers contributing over 70 percent of new or completely revised content, The 2010 ARRL Handbook for Radio Communications <http://www.arrl.org/catalog/?item=NO-HB2010#top> is the biggest Handbook ever. Since it was first published in 1926, the Handbook has been a mainstay for the radio electronics experimenter. A core resource for radio amateurs, hobbyists, engineers and scientists,

the Handbook is the single most authoritative reference on practical communications topics. It is both reference book and tutorial, woven together with practical applications and solutions. The 2010 Handbook -- the 87th edition -- is a useful introduction to radio communication, and featuring the most current material on electronics and Amateur Radio.

<http://www.arrl.org/catalog/?item=NO-HB2010#top> For 2010, The ARRL Handbook for Radio Communications -- with more than 1250 pages -- has been reorganized into five major sections, making it easier than ever to find exactly what you are searching for: Fundamental Theory, Practical Design and Principles, Antenna Systems and Radio Propagation, Equipment Construction and Maintenance, and Station Assembly and Management. "Each chapter has been designed to be either an 'encyclopedia' (providing descriptive overviews of current practices and technology) or 'practical handbook' (focusing on techniques, designs and projects)," Handbook Co-editor H. Ward Silver, N0AX, explained. "In either case, Co-editor Mark Wilson, K1RO, and I tried to ensure that there was enough introductory material to get the newcomer started, as well as plenty of in-depth discussion the experienced amateur will expect." For a closer look inside the 2010 Handbook, click here <http://www.arrl.org/news/stories/2009/09/30/11102/>.

==> + PUBLIC SERVICE: NOMINATIONS NOW BEING ACCEPTED FOR 2009 ARRL HUMANITARIAN AWARD

Nominations are open for the 2009 ARRL International Humanitarian Award <http://www.arrl.org/FandES/field/awards/humanitarian.html>. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. To learn more about the ARRL International Humanitarian Award, including submission criteria, click here <http://www.arrl.org/news/stories/2009/09/28/11098/?nc=1>.

Product Review: The ICOM IC-7600 HF and 6 Meter Transceiver

<http://www.youtube.com/watch?v=R6N2jgzlbIk> Get a "first look" at the ICOM IC-7600 HF and 6 meter transceiver! Featured in the November 2009 QST Product Review, this rig -- reviewed by NCJ Managing Editor Rick Lindquist, WW3DE (ex-N1RL), and shown in this video <http://www.youtube.com/watch?v=R6N2jgzlbIk> by ARRL Test Engineer Bob Allison, WB1GCM -- represents an integration of ICOM's popular PROIII and the IC-7700/7800 transceivers, both in style, features and capability. Check it out!
==> + PUBLIC SERVICE: HAM APPOINTED CHIEF OF ARMY MARS

On September 25, veteran Army communicator Jim Griffin, KE7LJA, became Chief of the Army Military Affiliate Radio System (MARS <http://www.netcom.army.mil/mars/>). Major General Susan Lawrence,

Commanding General of the 9th Signal Command (Army), named Griffin to succeed Stuart Carter; Carter has held the Chief's post since December 2006. MARS, the Defense Department-sponsored organization of Amateur Radio operators who volunteer for communications support in emergencies, is a component of the 9th SC(A). As a uniformed member of the Signal Corps and subsequently a civil servant, Griffin has amassed 52 years in government service. Before Friday's appointment, he served for two years as Deputy Chief of Army MARS, tasked with the responsibility for construction of its new gateway communications station at Fort Huachuca, Arizona. For more information, click here <http://www.arrl.org/news/stories/2009/09/26/11093/?nc=1>.

==> + OPERATING: INTERNATIONAL REPLY COUPONS (IRCS): OUT WITH THE OLD, IN WITH THE NEW

<http://www.upu.int/news_centre/2008/en/2008-08-08_irc.shtml>It is now time to start dumping your old International Reply Coupons (IRCs). The "Beijing Model No 2 <http://www.dailydx.com/images/IRC-2007-100.jpg>" must be redeemed before December 31, 2009. The new IRC -- the Nairobi Model IRC <http://www.dailydx.com/images/2008-08-08_irc.jpg> -- has been available in the US since September 10 and elsewhere since July; the price is $2.10 each in the US. The Nairobi Model is due to expire in 2013. For more information, click here <http://www.arrl.org/news/stories/2009/09/30/11103/?nc=1>. Thanks to The Daily DX <http://www.dailydx.com/> for the information.

==> + ON THE AIR: 4U1UN CELEBRATES UN GENERAL ASSEMBLY WITH SPECIAL EVENT

To celebrate the 64th General Assembly of the United Nations <http://www.un.org/ga/>, 4U1UN <http://www.qrz.com/callsign.html?callsign=4u1un> -- the Amateur Radio station at the UN -- began operating as 4U64UN <http://www.qrz.com/callsign.html?callsign=4U64UN> on September 22. According to The Daily DX <http://www.dailydx.com/>, 4U64UN will be on the air for 64 days on all bands and modes. QSL via Logbook of The World (LoTW <http://www.arrl.org/lotw>) or direct to Herbert Aeby, HB9BOU. Logs will be uploaded to LoTW once the event is over. QSL cards will be mailed out starting in December 2009.

+ "Hints and Kinks"

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST <http://www.arrl.org/qst>. If we publish your hint, you will receive $20. Send your hints via e-mail <h&k@arrl.org> or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> SOLAR UPDATE

Tad "Much have I travell'd in the realms of gold <http://englishhistory.net/keats/poetry/chapmanshomer.html>" Cook, K7RA, this week reports: Sunspot 1026 has faded and 1027 is about to disappear over the Sun's western horizon. The strange thing is that 1027 is still visible as a bright magnetic disturbance when viewed on the STEREO Web site <http://stereo.gsfc.nasa.gov>, but it apparently isn't still visible as a sunspot. The equinox, significant sunspot activity and low geomagnetic indices made for good conditions this week. The 3-month moving average of sunspot numbers -- now including September's data -- is the same as last month's 3-month average, made up from sunspot numbers from June through August. It seems that both June and September had identical average sunspot numbers, so for the last reading, the June data was dropped and the September data was added, and the same 3-month average of 4.0 is the result! We will discuss this more in the Solar Update, available on the ARRL Web site on Friday, October 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' On First Looking into Chapman's Homer.

==> THIS WEEK ON THE RADIO

This week, the California QSO Party and the Oceania DX

<http://www.arrl.org/contests/> Contest are October 3-4. The Fall 432 MHz Sprint is October 7. Next week, the ARRL EME Contest is October 10-11. There's an NCCC Sprint October 9 and the YLRL DX/NA YL Anniversary Contest is October 9-11. The 10-10 International 10-10 Day Sprint and the FISTS Fall Sprint are both October 10. On October 10-11, check out the Pennsylvania QSO Party, the Arizona QSO Party and the Oceania DX Contest (CW). The North American Sprint (RTTY), the SKCC Weekend Sprint and the UBA ON Contest (SSB) are October 11. The NAQCC Straight Key/Bug Sprint is October 14. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

ARRL Continuing Education Course Registration

Registration remains open through Sunday, October 25, 2009, for these online course sessions beginning on Friday, November 6, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education

Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

WIANEWS FOR WEEK COMMENCING OCT 4 2009.

Michael Owen VK3KI President of the Wireless Institute of Australia
details the WIA Centenary celebrations and our callsign VK 100 WIA

ALL UP AND COMING IN THIS EDITION OF WIANEWS WEEK COMMENCING OCT 04 2009

Something different, lets look at some social activity, some state activity
first. In VK1 Canberra Region Amateur Radio Club is on the move.

After eleven years at the Farrer location, they move to the
Mount Mugga Mugga scout hall 17 Astrolobe street Red Hill

Check the CRARC club page on wia.org.au for the location map.

Next general meeting on the 28th October (a Wednesday night) will
be first meeting at the new location.

VK7
local area news :- http://reast.asn.au/news.php
vk7 local news, email vk7regionalnews-subscribe@yahoogroups.com

Northern Tasmanian Amateur Radio Club

October's monthly meeting will be a social event, with a dinner meeting at Tranquillity Gardens on Wednesday the 14th of October starting at 6.30pm. Guest speaker is Brendan McMahon from the Bureau of Meteorology, talking about all things weather related.

Please let Ann VK7FYBG or Jason VK7ZJA know if you will be attending.

(Jason VK7ZJA, NTARC Secretary)

VK8

Next job for Frank VK8FT is to organise JOTA in Darwin.
Frank tells me he expects to have VK8BP on the air from Howard Springs, a short distance from Darwin.

>From Twitter to steam powered radio.

Are you a current Radio Announcer?

Were you a Radio Announcer,

SBS/ABC/COMMUNITY/NARROWCAST or COMMERCIAL announcer and hold a ham licence?

nationalnews@wia.org.au wants to hear from YOU for a very very SPECIAL News Broadcast in November.

Currently we have 24 or 25 maybe more of you of you out there! hihi

Please as a matter of urgency email nationalnews@wia.org.au

TODAY.

135 Km East of Birdsville is a long way from anywhere that a mobile phone will work, so it was lucky that the driver of the rolled vehicle had plenty of people on the road that day, even luckier that some of them were Amateur Radio operators on a DXpedition with the Blue Mountains Amateur Radio Club.

While Richard VK2LET assisted with first aid to the driver, Kevin VK2FTTP called Kev VK4KKD in Brisbane. Kev called 000 and advised the Queensland Ambulance Service of the situation and after some initial questions and realising that Birdsville was not a suburb of Brisbane the Ambos called the Royal Flying Doctor.

The Royal Flying Doctor Service called a nurse from a nearby station property and on her arrival treated the driver for shock and some abrasions to his

head.

Four Police officers returning to Brisbane after helping out with the Birdsville races stopped to assist, they couldn't get the satellite phone to work so the started some minor investigations into the accident.

The Ambulance and Police arrived and took the driver by road back to Birdsville.

This incident goes to show that Amateur Radio is truly a fail safe form of communications.

The full story and other interesting articles from the Blue Mountains Amateur Radio Club can be found in the upcoming issues of AR magazine.

>From VK1WIA this has been VK2LET for the WIA National News Service.

---------- WIA ----------

This is Michael Owen VK3KI President of the Wireless Institute of Australia. As I promised on last Week's broadcast we are today launching details of the WIA Centenary celebrations. I'd like to introduce the Chairman of the Centenary Committee David Wardlaw VK3ADW to officially launch the celebrations.

Thanks Michael, yes it is my privilege to officially launch the WIA Centenary celebrations. The Centenary Committee comprising of Peter Wolfenden VK3RV, Jim Linton VK3PC, Robert Broomhead VK3DN and myself as Chairman, have for the last 18 months been planning the celebrations.

Peter has led a group that has been researching the early history of amateur radio and the WIA from archival material held by the WIA and others, whilst Robert & Jim have been busily working on presentation material, media communications and various commemorative items that I'm sure will be collected and treasured by many in years to come.

It also gives me great pleasure to announce the special commemorative callsign VK100WIA being issued by the ACMA to the WIA. It will be used by the WIA in May and shared amongst the WIA Affiliated clubs until the end of October, we will hear a little more about this shortly. But for the moment, I would like to introduce to you Peter Wolfenden

Over the last year and a half a project has been underway to scour the WIA archives for material on the history of the Institute, the WIA's historical documents have been brought together at the new Bayswater office where searching, sorting and indexing has taken place.

I'd like to acknowledge my sincere appreciation to David Wardlaw and Chris Long VK3AML for their assistance with this enormous project.

Much new information has been uncovered and much which also confirms the history as it has been recorded to date.

The Historic recordings Sounds of Amateur Radio volume one, released for the WIA 75th celebration in 1985, will be re-released along with a Sounds of Amateur Radio volume two currently in production and will be on sale later

this year.

The WIA Centenary event will truly be an event to remember. Now to talk about the special commemorative callsign, here is Jim Linton

The callsign is VK100WIA. As previously announced it will be first put to air by the WIA in May next year associated with some special commemorative activities.

The QSL card has been designed, and contact with VK100WIA will be required to qualify for the limited edition WIA Centenary Award.

Thank you to the Waverley Amateur Radio Society for providing a photo of its founders from 1920, which features on the QSL card and Award certificate.

Use of the VK100WIA callsign by radio clubs will be on a roster system. A letter explaining how to get on the roster via an online booking form has been sent to the secretary of all clubs.

Now it's over to Robert Broomhead.

The 2010 WIA AGM weekend of activities are being held in Canberra from Friday the 28th to Sunday the 30th of May. As soon as the weekend plans are locked in, full details will be on the WIA website and a brochure sent to you our members included with your Amateur Radio magazine.

Those who enjoyed our previous AGM weekends held in Parkes, Broken Hill and Gippsland will not be disappointed, the planning for the Canberra weekend is on a scale that far exceeds anything we have done before, so put it in your diary today.

The WIA website also has a new Centenary section with a wealth of information on the Centenary activities, access is via the News and Events tab or via the Centenary link on the right hand side of the homepage.

Our special range of WIA Centenary merchandise is now available via the website.

Centenary posters have been printed and will be distributed to clubs along with a new Calling CQ poster and Calling CQ brochures."

So there you have it, we are proud to launch the WIA Centenary celebrations. We do hope that you and your club will become involved, and that your club will devise and conduct a special event promoting amateur radio in your community and take part by putting the VK100WIA callsign to air between 1st June and 31st October next year.

You can read more about our plans in the Comment section on page one of this months AR magazine. Please let us know of your ideas and plans on how you can be involved in celebrating this very special event.

We have established an email address for all enquiries relating to the Centenary, it is centenary@wia.org.au

Thank you

ACMA NEWS

Responding to concerns about declining standards in the use of marine radio and compliance with the requirement to hold an operators' certificate of proficiency, the Australian Communications and Media Authority has released a discussion paper about regulatory arrangements for VHF marine radios used by recreational boat operators.

The discussion paper invites comment from marine radio users about safety and the use of VHF radio by recreational boaters and follows concerns expressed by the National Marine Safety Committee and representatives of the maritime community.

In further ACMA news, their third spectrum tune-up - to be held on November 18 will focus on technical innovation in motor vehicles and other forms of transport and how it is driving changes in radiofrequency spectrum planning and use.

The morning session of the Transport Spectrum Tune-Up will focus on intelligent transport systems (ITS). ITS has the potential to reduce road accidents and decrease congestion, thereby saving time, lives, and reducing vehicle operating costs and air pollution.

The afternoon session will focus on maritime and aviation issues, the 400 MHz band, and non-ITS emergency warning systems and radio frequency identification.
There will also be a presentation on rail transport issues focusing on 400 MHz, 1.8GHz and spectrum sharing with the electricity industry.

The Transport Spectrum Tune-Up will be held at the Melbourne Convention and Exhibition Centre. Places are limited. To register please go to www.acma.gov.au/tstu or contact Lucy McGee at Lucy.Mcgee@acma.gov.au or call (02) 6219 5341.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Listen out for and make welcome new Westlakes member Michael VK2FCMD. Michael sat and passed his foundation call at the Waverly Amateur Radio Club.

The Cradle Coast Amateur Radio club congratulates Scott Wilson who was successful in sitting his foundation licence assessment and is applying for call sign VK7FTTT or VK7FRAT.

If you are a non amateur or a short wave listener living in the north west, or west coast of Tasmania, and would like to become a licensed amateur radio operator, then get along to a meeting and find out about this interesting hobby. If you cannot make a meeting but would like to find out more then contact the learning facilitator, Keith Winkler VK7KW, or any of the committee members.

Full contact details can be easily found by a "Yahoo" or "Google" search of CCARC TASMANIA

(David Cleland, VK7DC, CCARC Secretary)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

The International Amateur Radio Union (IARU) will be exhibiting and participating at the upcoming ITU Telecom World 2009 early this month (October).

The event will be used to roll out the new IARU Emergency Communications Brochure as well as to showcase some publications of IARU member societies.

Dot, dot, dot, cash, cash, cash,
estate agent signals Marconi sale

It was the Irish home of a wireless pioneer and has now gone on the market for ï¿½400,000.

Italian inventor Guglielmo Marconi carried out early radio transmission

experiments to and from Rathlin Island from Ballycastle in 1898.

His house, known as Marconi's cottage, sits on the rocks of the North Antrim coast two miles outside Ballycastle.

The experiments were part of the development of wireless telegraphy which would transform communications.

Belfast-based selling agent BTWCairns described the cottage as sitting on a "secluded 18 acre site with breathtaking sea views and surrounded by rural countryside".

Just the spot for an inventor to quietly tinker with electromagnetic waves.

AB FAB

Actress Joanna Lumley of Absolutely Fabulous fame took to the airwaves to celebrate the birth of Robert Burns.

GB250RB was activated Sep 20 by the Wigtonshire Amateur Radio Club and the highlight of the station's day was when actress and comedienne Joanna Lumley visited the operating area, and passed a greeting on the 40m band to a another special event station GB2HEN operated by Dave M1TWO in Suffolk.

The call-sign GB250RB is in use Till the 31st of December from locations that have a connection with Burns.

(SOUTHGATE)

USA

In Dallas, Unleashed Indoor Dog Park is noted as being the first dog day-care in the world.

One would expect a waiting line the length of a football field to exist at this rare facility as dogs come and go. However, as a result of strides made by GAO RFID Inc., long lines and thus wait times pose no threat to the success of this unique park.

To keep track of clients and their pets, dogs are given a tag embedded with an RFID inlay to be worn on the animal's collar. Each time the animal approaches a gate, equipped with an RFID reader, the RFID tag transmits an identification number to the reader. Once read, the ID is transmitted to the facility's system and a conformation of validity is made. The ID is then transmitted to yet another software called Kennel Connection. Once there, information pertaining to the animal's health and disposition is verified and updated if required. The ID's final destination is a financial management provider, where it is paired with the appropriate credit card information and verified.

This entire process takes only seconds, and, once verified, a green light is displayed and the lock on the gate to the facility is released.

GAO RFID Inc. (www.GAORFID.com) is a leading provider of RFID Readers, RFID Tags and RFID software providing cost saving solutions to end users worldwide.

Special Event Stations

GB 70 GB is a very special Special Event callsign, issued by Ofcom for the 70th anniversary of the opening of the Research Centre at Great Baddow. This is the home to what was originally Marconi's Research Laboratories.

Later, it was also home to famous staff including Spycatcher author Peter Wright and Chris Cockrell, inventor of the hovercraft.

The station will be operating on Saturday 3rd October and will be operated by members of the Chelmsford Amateur Radio Society.

Baddow is also home to the last surviving fully intact 360ft Chain Home Radar mast from the Battle of Britain.

Special event station GB4GDS, celebrating the work of the Guide Dogs for the Blind organisation, will be operating from till Oct 30.
GB4GDS hopes to be active on 80m, 40m, 20m and 2m.

GB4GDS celebrates the 78th anniversary of the first Guide Dog training in 1931.

Over this weekend, 3rd and 4th October, members of the Grimsby & District battalion will be operating GB1BB for the Founding weekend On the Air, which celebrates the founding of the Boys Brigade movement in 1887.

Also on the air will be the 1st Bermuda battalion, callsign VP9400BB.

KL50 CELEBRATES ALASKA DAY OCTOBER 18 -19

Listen out on October 18th and 19th for the call KL5O.

It will be on the air celebrating as a special events station in celebration of the 2009 Alaska Day. Operation will be on 160 through 10 meters, including the WARC bands using phone, CW and RTTY.

More information is on the web at www.kl5o.com

ANTARCTICA.

VU3BPZ was QRV from Antarctica during 2000-2004 and again during the second wintering during 2004-2006.

VU3BPZ, will once again head to the Antarctica with the 29th Indian Antarctic Expedition. The team is expected to be there over the winter during a long term operation between November 15th and March 2011.

VU3BPZ is expected to be on the air from the Maitri Base (WAP IND-03) using VU3BPZ and also a special callsign AT10BP to be issued by the Ministry of Communication & IT.

Updates and more details are expected on the WAP Web site at:
http://www.waponline.it (Check: News & Information page)

More Interference from Over the horizon radar

IARU Region 1 reports that the Russian over-the-horizon radar is active daily on 14,440kHz and is producing splatter plus and minus 110kHz.

The upper part of the 20m band is affected, too.

The German PTT has been informed.

IARU Region 1 also reports that in the evening hours of 18th September a strong WXfax signal appeared on 14,001.9kHz.

Bearings pointed to the USA and the transmissions came from the US Coastguard.

Jack, AA3GZ informed the US Coastguard and they promised to solve the problem.

The same day a strong F1B signal was heard on 7,101.7MHz.

The ident belonged to the Royal Navy in Faslane, Scotland. Interference was reported to the German PTT, who informed Ofcom. About 20 minutes later the transmission was finished.

MEDIA WATCH
www.wiaq.com/admin/uploads/weeklytally.rtf
www.cq-amateur-radio.com/WorldRadio.html

In the week leading up to the UK's National Hamfest, G0PIO, G6JUT and G3XZF have been involved in some local radio broadcasts about amateur radio.

In the Rob Underwood programme broadcast throughout the BBC Radio Midlands area and on Monday evening on local radio throughout the BBC East region they talked about amateur radio and its value as a hobby.

They sure encouraged people through these regions to visit the National Hamfest and see what amateur radio is all about for themselves.

You can listen to the programmes at

WIKIPEDIA TO COLOUR CODE TEXT

Everyone who has used the Internet is familiar with the free, open-access on-line encyclopaedia called Wikipedia dot com

Starting soon an optional feature on Wikipedia called "WikiTrust" will colour code every word of the on-line encyclopaedia based on the reliability of its author and the length of time it has persisted on the page.

WikiTrust assigns a colour code to newly edited text. It's based on the concept that the longer information persists on the page, the more accurate it's likely to be.

Text from questionable sources starts out with a bright orange background, while text from trusted authors gets a lighter shade.

As more people view and edit the new text, it gradually gains more "trust" and turns from orange to what's normal for a given page.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

East Malaysia IOTA operation

Steve, 9M6DXX, from Borneo plans to busy from East Malaysia over the next couple of months as 9M8Z from Sarawak, OC-088, October 22-26th.

Activity will be SSB only but will also include operations in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power/Unassisted entry.

QSL via LoTW, or by the Bureau to M0URX

Then November, Steve will be joined by John 9M6XRO and the operators will activate Pulau Labuan Island OC-133 between November 6-8th.

The callsigns and operations will be as follows:
9M6DXX/P - On 80-10 meters; SSB only.
9M6XRO/P - On 160-10 meters; CW and RTTY.

Each stations will be using amplifiers to a multi-band vertical and a 160m inverted-L, both mounted very close to the ocean. Operators hope it will be possible to operate on 160m CW at the same time as SSB on the other bands.

(SouthGate)

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

OLD TIMERS
Members and friends of the Radio Amateurs Old Timers Club Australia are reminded that the next news and information broadcast will take place on the first Monday of the Month.

using the RAOTC callsign of VK3OTN.

10.00 am Victorian time on 7.060 and 3.650 MHz plus 1.843 MHz AM, and 145.700.

On 14.150 MHz at 01.00 UTC beaming north and 02:00 UTC west from Melbourne

For those not yet retired, 8.30 PM Victorian time tune 80 metres 3.650 MHz and in Tasmania, but at Victorian time, 8:30 on the Mount Duncan repeater 146.625.

With the objective to maintain interest and good fellowship among those who qualify for membership, full membership of the RAOTC is available to any person who has held, or has been qualified to hold, an Amateur Licence for a minimum of 25 years.

Associate membership is available to any person who has held, or has been qualified to hold, an Amateur Licence for a minimum of 10 years.

Associate members are entitled to all the privileges of Full Membership except the right to vote or to hold office.

There will be a JOTA station operating from the Tasmanian Scouts Northern Districts Camp on the JOTA weekend at Corra Linn (QE38OM) on "Scout Island". VK7TAZ is callsign
on APRS VK7KPC-8

The North East Radio Club, The Scout Radio Activities Group and Tranmere Sea Scouts are operating a JOTA station on Saturday 17th October from 11:00 AM to 8:00 PM. This Station will cater for Joeys, Cubs, Scouts and Venturers in the Eastern JOTA 09 Suburbs of Adelaide.

On the day we are expecting over 100 participants.

A number of activities have been planned for the day including, transmitters operating on HF, 2M 70cms IRLP, and Echo Link.

We will be using Tranmere Sea Scouts call sign of VK5TSS and if would like to arrange a sked please send an email to vk5tss@yahoo.com or if you hear us calling CQ on the 17th give us a call.

I'm Charlie VK5KDK and you're listening to VK1WIA.

SOCIAL SCENE

VK3

The Ballarat Amateur Radio Group Annual Hamvention will be held on Sunday October 25.

Bring along your good home-brew gear and have it judged in the Home Brew Competition. Substantial prizes are available for the best items.

All the usual traders of new gear in attendance, as well as the tables of pre-loved gear will be on display. In access of 50 tables booked already,

If you would like to book a table contact us on email at Hamvention@barg.org.au

The new location is the Ballarat Greyhound Racing Track, off Rubicon Street, Ballarat.

Check out the details on the Website www.barg.org.au

Remember Sunday October 25, Victoria's leading Country Hamvention at Ballarat.

This has been Bob, VK3NBV for the Ballarat Amateur Radio Group.

VK5

The South Coast Amateur Radio Club (SCARC) Inc. will hold it's AGM for 2009 November 25.

The clubrooms are located in Hackham, at the Hackham Scout Hall, 16 Roberts Road Hackham, which provides a fairly central location for members, some to the north, but the majority to the south of O'Halloran Hill, spreading down through McLaren Vale to Victor Harbour.

Membership is open to ALL persons - the only requirement is a genuine interest in amateur radio. We especially welcome youth of the community to whom we feel amateur radio is a great leisure activity.

An amateur radio interest can well lead to a career in radio, television, computers or even electronics.

VK6

"VK6 Scout Communications Team FIRE SALE/GARAGE SALE
SATURDAY OCTOBER 31ST 2009

There wasn't a fire, nor do we have a garage, however sometime in the next several months

our place will be demolished to make way for a new building. We need to clear out our lovingly stored gear.

We'll be selling electronic equipment, components, remnants and various other items. All must be sold!

We also invite outside vendors to bring along their goods for sale.

Venue: Peter Hughes Scout Communication Centre, corner Gibbs St and Welshpool Road, East Cannington.

Time: 9:00am Sellers.

11:00am Buyers.

Admission: Sellers $5. Buyers Gold Coin Donation.

Refreshments will be on sale - snacks, lunch, tea, coffee, cool drinks. Harmonics Welcome

There's plenty of parking, so come along for an enjoyable few hours.

Proceeds will go towards fitting out our new radio shack.

Enquiries: Bob Bristow VK6POP bobbr@westnet.com.au 95746626."

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

With two more weeks to JOTA and only 10 weeks left before Christmas, 2009 seems to be raging to a climactic finish. Two dust storms to celebrate Spring, fire bans and scrub fires and an tsunami around Samoa, it has been a few days of different weather around the Oceania region.

Daylight saving is around the corner for much of the country and those of us along the coasts are getting ready for the official cyclone season. The areas that benefit from extended daylight hours have little

reason not to check their homes and stations, things like guys and brackets and loose feed cables. Those of us in VK4 just choose a time when the sun is not too strong to get these checks done.

As mentioned on WIA National News, previously, the AARNIE newsgroup, aarnie@yahoogroups.com, moderated by Adam, VK4IM has increased my access to AR news and projects considerably. Not only does "Amateur Radio" magazine arrive in the letter box but I now get to read e-mags such as "World Radio Online" and "Ham Mag", both in PDF and full colour, for free. As well many clubs are posting their newsletters on AARNIE and this goes to support the efforts of the WIA broadcast team in keeping members of the hobby informed.

One thing that is easily forgotten is that Amateur Radio forms a large international community which tries to include all members regardless of wealth and rank, religion or race, health or infirmity. Ours is a century old pursuit that has always tried to think globally and act locally.

October General Meeting

This months meeting is on 6th of October and features Frank VK4BLF as guest speaker showing photos and discussing his recent trip to Asia.

Unfortunately yours truly, Gordon the Secretary has to go to Victoria for work. This also means that there will be a stand in news broadcaster so lets

hope they can get it right.

Last weeks news had a slight hiccup when a slamming door in the house shook the news PC and it decided to mute the audio, nothing a spare PC and a few moments of high blood pressure couldn't fix.

Sunfest 2009

Well it was a great success with many people securing bargains and feeding their faces. It was a great place to catch up with many friends and swap stories and we hope everyone enjoyed it as much as we enjoyed hosting it.

Until next time, this is Gordon VK4VP.

GB2RS NEWS

Sunday 4th October 2009

The news headlines

* RSGB goes to law over PLA dispute with Ofcom

* EMC committee at Newbury

* More lectures to interest amateurs at the RSGB Convention

The RSGB continues to take the Power Line Adaptor compliance fight to Ofcom. This follows Ofcom's statement on PLT/PLA on 3 September 2009 and the RSGB's response statement issued on 4 September 2009. The Society has now received a formal reply from Ofcom following the Society's earlier formal complaint to Ofcom regarding non compliant PLA's and Ofcom's interpretation of the EMC Directive regarding these devices.

The RSGB continues to find Ofcom's responses and position totally unacceptable and has recently met with and instructed its lawyers to investigate a legal challenge on the Ofcom position. The RSGB will continue the fight to protect the radio spectrum against non compliant devices which cause unacceptable levels of interference, particularly to the HF bands. We will issue further statements as the case develops.

Visitors to the EMCUK Exhibition and Conference at Newbury in Berkshire on 13 and 14 October will be able to meet members of the RSGB EMC Committee on their stand in the main exhibition hall. The stand will feature the Society's work on interference issues and HF signal strength measurement together with demonstrations of the high level of emissions from Power Line Telecommunications systems. There will be a bookstall selling RSGB and ARRL books including the latest Radio Communications Handbook all at member's prices. The event is held in the Grandstand at Newbury Racecourse. There is plenty of parking space nearby. Admission to the exhibition, and to the IEEE's EMC demonstration bench sessions, is free. Tickets are available from www.emcuk.co.uk.

The exhibition sets out the latest in EMC test equipment and in components and techniques for compatible product design. Many amateurs and professionals will find attendance at the EMC training sessions or at the associated technical conference well worth the extra costs. For

details see the exhibition website.

RSGB Convention takes place next weekend, 9 to 11 October, at Wyboston in Bedfordshire, just off the A1. A good turnout of visitors is expected whether day visitors or those staying for the weekend. This year there are more lectures than in 2008 including a new stream of VHF and Up talks. There are bigger rooms available for some of the most popular talks and more space at Contest University, which runs as two lecture streams this year. As part of the non-technical beginners talk on Moonbounce, David Hilton-Jones, G7RAU is planning a live moonbounce QSO. It's not too late to plan your visit as day tickets will be available on the door for the lecture streams on Saturday and Sunday. Full details of the lecture streams can be found on the RSGB Convention website www.rsgb.org.uk/rsgbconvention/events_programme.php.

2

The video showing Martin Maynard, G8CIX promoting amateur radio from the 4th Plinth in Trafalgar Square can be seen on the web at www.GB1AO.co.uk. The Fourth Plinth is part of a major living monument created by sculptor Antony Gormley. Martin, G8CIX was allocated a slot on the plinth between 4 and 5pm on Friday 25 September during which he operated GB1AO using Icom radio equipment. Full details of the hour will be in the November RadCom.

The IARU Region 2 Executive Committee met for its annual meeting in Lima, Peru in September. On behalf of Region 1 IARU, Hans, PB2T attended this meeting as observer. He found it interesting to see how the Region 2 EC meetings are conducted in both English and Spanish language. Emergency communications formed an important part of the discussions. IARU Region 1 expressed its concerns that apparently no progress was made on mutual recognition of IARP and CEPT licenses. It was good to hear that results can still be expected. More information can be found on IARU Region 2 home page.

The K5D Desecheo video is almost ready, according to the K5D website. It reports that this exciting DXpedition DVD by Bob, K4UEE and Ed, W4ZSB is expected for release by October 2009. Bob, K4UEE is booked for three talks at the forthcoming RSGB Convention on 9 to 11 October at Wyboston in Bedfordshire. He will be speaking once on Saturday and twice on Sunday. Check out the RSGB Convention website for times at www.rsgb.org.uk/rsgbconvention.

And now for the details of rallies and events for the coming week Just a reminder that this year's Chesterfield Rally due to be held on 10 October has had to be moved to 24th April 2010. The organisers of the rally are sorry to have caused any inconvenience or trouble to anyone wanting to visit this year's rally. They look forward to seeing you on Saturday 24th April 2010 at Hasland Village Hall. Chesterfield. Details will be available as they arise on the website www.chesterfieldrally.com or by ringing 01246 275 889. Today, 4 October, the Autumn Militaria & Electronics & Radio Amateur Hangar Sale

will take place at the Hack Green secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Doors open at 10am and admission is £2.50. Contact Rod Siebert on 01270 623353. On 7 October, the Denby Dale ARC Mini Rally & Surplus Sale will take place in Pie Hall, Wakefield Road, Denby Dale, Huddersfield HD8 8RX. Doors open at 7.30pm. Contact Gerald, G3DSY on 01484 602905 for more details. The RSGB Convention will be held at the Wyboston Lakes Conference Centre, Bedfordshire on 9 to 11 October. New for 2009 is a VHF and Up Stream of lectures. Other highlights will be Peter Chadwick, G3RZP, looking at the theory of ATUs and Leslie Butterfields, G0CIB discussing the international beacon project. The ever-popular Contest University will also be running. Details at www.rsgb.org/rsgbconvention. On 11 October the Great Lumley AR & ES Rally will be held in the Great Lumley Community Centre, Front Street, Chester-le-Street DH3 4JD. Doors open at 10.30am and admission is £2. There will be trade stands, a Bring & Buy and catering on site. More details from David Barclay, M0BPM, on 0191 3888113, or by e-mail to m0bpm@btinternet.com.

3

Now for the news of special events Over the weekend of 3rd and 4th October, members of the Grimsby & District battalion will be operating GB1BB for the Founding Weekend On the Air, which celebrates the founding of the Boys Brigade movement in 1887. Also on the air will be the 1st Bermuda battalion, callsign VP9400BB. If you are helping a Battalion or Company take part then please register the callsign via e-mail to fwoa_bb.2009@yahoo.com.

On 5 October, GB2MS will be on the air from Macclesfield to raise awareness for multiple sclerosis. At the same time, 5 October, listen out for GB4HSG for the Handforth Scout Group in Wilmslow, Cheshire. On 8 October, GB0NPD will be on the air for National Pottery Day from Halifax.

And now the HF DX news compiled from 425 DX News and other sources. Dave, G4IAR and Judith, G4IAQ will be operating as G4LAB/P from Scilly, which is IOTA reference EU-011, between 9 and 19 October. They plan to use the IOTA frequencies on the HF bands, plus or minus QRM. QSL via G4IAR, direct only please. RIODXGROUP, with a team of four operators, PY1NB, PY1ON, PY1YB and PY1ZV will activate Trindade Island as ZY0T. Scheduled dates are from 11 to 16 October, but this may vary a bit due to Brazilian Navy schedules. More information on http://riodxgroup.dxwatch.com/trindade-2009. QSL via PY1NB, direct only please. Andrew, G7COD, will be operational every day from Embudu Island in Kaafu Atoll in the Maldives, which is IOTA AS-013, using the call 8Q7AK from 11 to 25 October. He will be using SSB and CW on the 80 to 10m bands including WARC frequencies. For comprehensive details of operating times, suggested frequencies and QSL information etc, please check 8Q7AK on QRZ.COM. Nick, M1DDD will be active as KP2/M1DDD from the Island of St Croix in the US Virgin Islands from 14 to 20 October. Activity will be on 40, 20, 15 and 10m and he will also be trying on 6m

especially for Europe. Various beam antennas will be used. QSL will be via his homecall, direct or via the bureau. 3D20CR, commemorating 20 years since the first activation of Conway Reef, will be on the air until 10 October with eight operators, using all bands and modes. They should be workable from the UK on 40, 30, 20 and 17m at the very least, and probably other bands for the better-equipped among you. They have a website where you will find the latest information. DJ8NK will be handling the QSL chores. The Midway operation boasts a line up of many top DXpeditioners and is due to be active from 9 to 19 October. The call will be K4M and they expect to be on all bands and modes with multiple stations. As with most expeditions nowadays, their website is the place to find the latest news, www.midway2009.com.

FT5GA is active from Glorioso, with almost 30,000 contacts in the log and still a few days to go. UK stations have worked FT5GA on all bands 160 through 10 but the deliberate interference on the FT5's frequency has been horrendous at times. In practice, the team seem to be doing a creditable job in difficult circumstances, with two or three enforced downtimes each day over which they have no control as they are under military jurisdiction on the island and have to fit in with other scheduled activities.

Now the contest news The first RSGB HF event of October is the 21/28MHz Contest on October 4 between 0700 and 1900UTC. You can work others on each mode on each band, exchanging RS(T) and serial number plus District Code. For most people this means the first two letters of your postcode, but single first letter postcodes are padded to two letters. If you're not sure what your District Code is, a list is available in the RSGB Yearbook or online

4

at www.rsgbcc.org/hf/information/districtcodes.shtml. There are Open, Restricted and QRP categories and sections for CW, SSB and mixed modes. The Worked All Britain HF Phone Contest takes place on 10 and 11 October from 1200 to 1200UTC in the 14, 21 and 28MHz bands. The exchange is signal report, serial number and WAB square. Rules and log sheets are available from the Contest Manager, G0BFJ, QTHR or from the WAB website at www.worked-all- britain.co.uk. It's the third month of the 80m Club Sprint Contest on 8 October from 1900 to 2300 UTC. It became apparent after the first Sprints took place in August that not everybody had fully understood the format of the event, so a reminder seems appropriate. The contest exchange is a serial number and your name, but no signal report (eg `001 Fred'). If you call CQ, after someone has replied and you complete a contact you must vacate the frequency. On the other hand, if you call someone and make a contact, practice dictates that you then call CQ on that frequency until someone replies. When the contact is completed, you then QSY. In practice this means that much of the time you have two contacts on a frequency, the first when you reply to a CQ and the second after calling CQ. On 6 October it's the 144MHz UKAC & Club Championship between 1900 and

2130UTC using all modes. The exchange is signal report, serial number and locator. The Second 50MHz Contest takes place on Sunday 11 October. It is a short event, lasting only three hours between 0900 and 1200UTC. There are categories for Single-operator fixed stations and Open. The exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 21st to the 27th of September, compiled on 28th of September by Neil Clarke, G0CAS. We start this week with the latest monthly smoothed sunspot numbers which, for December, January and February, are 1.7, 1.8 and 1.9. December 2008 could possibly be the month which sunspot minimum took place, but still no conformation on this as yet. Now to the present. Sunspots were visible every day, one group rotated into view and the other emerged. Both groups belonged to the new cycle. Solar activity was very low except for a single C class solar flare that occurred on the 25th. Solar flux levels increased to the highest level so far this year at 76 units on the 23rd. Levels then gradually declined to 72 units by the end of the period. The average was 73 units and the 90 day solar flux average on the 27th was 68. That's the same level as last week. X-ray flux levels which have remained below the minimum reporting level for many weeks finally increased and by the 22nd were up to A1.4 units. Geomagnetic activity was quiet everyday with an average of Ap 4 units for the period. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 440 kilometres per second on the 22nd to 260 by the 25th. Particle densities were low everyday. Bz only varied between minus and plus 8 nanoTeslas at worst, while some days had variations much less than that. And finally the solar forecast. This week solar activity is expected to be at very low levels. Solar flux levels are expected to be in the high 60's. However, if sunspots do appear then flux levels could rise to the mid 70's. Geomagnetic activity should be at quiet levels everyday. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz for the north. The darkness hour lows should be about 9MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try the path will be between 0900 and 1400 hours UTC.

And that's all for this week from the propagation team.

SARL NEWS SUNDAY 04 OCTOBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail. Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

In the news today:

SPACE WEEK ESSAY COMPETITION FOR LEARNERS

GREAT START WITH ZS10WCS

GOOD RESPONSE TO THE SARL HOME CONSTRUCTOR'S COURSE

SUMBANDILASAT IS MAKING GOOD PROGRESS

SPECIAL EVENT STATION ZS3SKA

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SPACE WEEK ESSAY COMPETITION FOR LEARNERS

To celebrate Space Week and the successful launch of SumbandilaSat, SA AMSAT and the South African Amateur Radio Development Trust are launching an essay competition for learners in grade 8 - 12 today in which many prizes can be won including an Acer Aspire One notebook.

Learners are invited to write an essay of between 1 000 and 1 500 words about the subject "How will South Africa benefit from space projects?

They are encouraged to do some internet research about space projects and how other nations have benefited and in their own words describe how South Africa can benefit from its entry into the space arena.

The closing date is 30 November 2009. Full details can be found on both www.amsatsa.org.za and www.amateuradio.org.za.

GREAT START WITH ZS10WCS

The Boland Amateurradioklub launched the ZS10WCS special event callsign with great gusto. During September they clocked up 2 639 contacts in over 100 countries and set a very high target for the Oakdale Amateur Radio Club which will run the special event station during October.

The QSL cards will be delivered to the Boland Amateur Radio Club during next week when they will be dispatched via the bureau.

Thanks to the following radio amateurs who operated the world cup special event station: ZS1OLI, ZS1EL, ZS1DUG, ZS1RX, ZS1REC, and ZS1L.

The mode breakdown is as follows: SSB 1 552 contacts, CW 1 050 contacts and PSK31 37 contacts. Visit www.sarl.org.za for more information.

Well done Boland!

GOOD RESPONSE TO THE SARL HOME CONSTRUCTOR'S COURSE

Following the announcement about the home constructor's course in last week's SARLNEWS there was a good response particularly for the course on 21 November in Gauteng. There are only 8 seats left for the course at the NARC.

RS South Africa has sponsored 5 temperature controlled soldering stations which will be available for some hands-on soldering experience with surface mount devices.

Visit the SARL website for more information on the course. Information on how many seats are still available, as well as a list of persons registered for the course, will be updated regularly.

WIA TO CELEBRATE THEIR CENTENARY NEXT YEAR

The Wireless Institute of Australia turns 100 next year making it the world's oldest National Radio Society. WIA President Michael Owen, VK3KI, says he wants the world-wide amateur radio community to join in the celebration.

In the October edition of the WIA's Amateur Radio magazine he announced a programme that includes a special callsign VK100WIA that will be operated next May by the WIA, and after that by many affiliated clubs around Australia for the next 5 months. A commemorative QSL card will be issued for contacts with VK100WIA between May and October next year.

A limited edition operating award, called the WIA Centenary Award, is also to be available and two contacts with VK100WIA are required under its rules.

A programme of events will occur around the WIA's annual meeting in the nation's capital Canberra in May 2010, while radio clubs are planning events to promote the centenary of organized amateur radio in Australia.

It all began in 1910 with a meeting of wireless pioneers in Sydney to protect their interests and rights against what they considered to be harsh treatment by authorities and a high licence fee. The Wireless Institute of Australia has continued since then to protect and enhance the privileges of radio amateurs and to promote amateur radio.

Details of the centenary program can be found on www.wia.org.au.

SUMBANDILASAT IS MAKING GOOD PROGRESS

The Ground control station at the University of Stellenbosch is making good progress in activating the various systems on board the satellite. The latest report indicates that after the uploading of some patches the onboard computer (OBC) is running more reliably. The team has identified a couple of improvements to the flight code which will be uploaded soon. Regular updates are posted on www.amsatsa.org.za. The past week also saw the publication of the Keplerian elements in the weekly updates from AMSAT NA.

SPECIAL EVENT STATION ZS3SKA

South Africa is one of two stations in the run for the erection of the largest radio telescope in the Southern hemisphere known as the Square Kilometre Array (SKA). The possible site in South Africa is situated in the Northern Cape between Calvinia, Brandvlei and Williston. A start has already been made with the erection of a smaller version, which is called Meerkat.

In order to make this project known to amateurs, nationally and internationally, members of the Boland and Northern Cape radio clubs will operate an amateur radio station over the week end 23 to 25 October from the chosen site. The station's call sign will be ZS3SKA and operation will be on all HF bands.

All stations that confirm contacts either via the buro or directly to P O Box 273, Strand, 7139, will receive a special QSL card.

More information on operators, equipment and frequencies will be made known in due course.

For m�re information on the SKA, visit www.ska.ac.za.

COMPETITION NEWS

SARL 40 metre Mobile Competition: The incorrect results were published last week. The error is regretted. Only 6 logs were received for the 2009 competition.

The correct results are: 1st Gerhard Coetzee, ZS3TG, 488 points; 2nd John Kramer, ZS5J, 231 points ; 3rd Mitchel Mynhaardt, ZS6YH, 168 points; 4th Romeo Nardini, ZS6ARQ, 149 points; 5th Jan Botha, ZS4JAN, 136 points; 6th Geoff Levey, ZS6GRL, 130 points.

2008 CQ WW DX Phone and CW contests:

In the Phone contest, the Bloemfontein Defence ARC, ZS9X, participated in the Multi-Operator, 2 Transmitter category, and made 8,2 million points placing them 3rd in Africa and 9th in the world.

In the CW contest, Bernie van der Walt, ZS4TX, participated in the all band high power class and made 5,7 million placing him 3rd in Africa.

CLUB NEWS

At the AGM of the Highveld Amateur Radio Club, which was held recently, the following members were elected to the management committee for the 2009/2010 term of office: Chairman; Frank van Wensveen, ZS6TMV; Vice Chairman; Frank Mercier, ZS6MER; Secretary / Treasurer/: Berridge Emmett, ZS6BFL; Assistant Secretary: Marianne Treyvellan, ZR6JMT; Shacknews: Berridge Emmett, ZS6BFL, Marianne Treyvellan, ZR6JMT, Harry Lautenbach ZS6LT; Website: Yvonne van Dijk, ZR6TBL, and Marianne Treyvellan ZR6JMT; Repeater/Packet Radio/Technical: Ton Van Dijk ZS6ANA; PIO: Berridge Emmett, ZS6BFL.

Thanks to the outgoing committee members and best wishes to the new committee for a fruitful term of duty.

The Overberg Amateur Radio Club will be holding a general club meeting at the Hermanus Magnetic Observatory on the 10th October starting at 10:00. This will coincide with the end of the HMO's "Space Week". All radio amateurs are invited and if you can give a demonstration on how to work a satellite, you will be most welcome. The usual bring and braai will take place after the meeting.

The Antique Wireless Association Valve QSO Party will take place on the 10th and 11th of October 2009.

On Saturday 10th Oct the AM section will take place from 15:00 to 19:00 SAT and on Sunday 11th Oct the SSB section from 15:00 to 19:00 SAT.

Frequencies will be from 3 600 to 3 700 on the 80 m band and 7,070 to 7, 100 and 7,130 to 7,200 MHz on the 40 m band. (Take note of 40 m band frequencies).

Exchange will be Call Sign, RS and consecutive numbers starting with 001, plus the type of radio receiver.

Scoring - 3 points for all valve, 2 points for hybrid, 1 point for Solid State. Multiplier(your rig) - 3 points all valve, 2 points for hybrid, 1 point for solid state.

Contest logs should be submitted to the AWA either by email, fax or snail mail for attention Andy, ZS6ADY, in the recommended format for SARL Contest Logs.

Certificates will be awarded to the first three places in each category.

The Antique Wireless Association will be holding an open day plus AGM on Saturday 17th October from 09:00 at the Transvaal Aviation Centre at

Rand Airport.

Antique Wireless Display, Flea Market, Cash Bar, Restaurant etc. will all be there.

Bring the family along and have an enjoyable day with them.

If anybody have queries, contact Andy, ZS6ADY, on 082 448 4368.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. There were official sunspots for more than 10 days in 'n row over the last two weeks.

20 and 15 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New-Zealand are going to be challenging. During the early mornings, late afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

6 October - Logs for Heritage Day sprint to be in to riaanzs4pr@gmail.com; 7 October - Comments on Draft Frequency Spectrum Policy to be in; 10 October - AM section of AWA's valve QSO Party between 15:00 and 19:00; 11 October - SSB section of AWA's valve QSO Party between 15:00 and 19:00; 16 October -Logs for second leg of the SARL 80 Metre QSO Party to be in. 17 October - AWA's open day and AGM at the Rand Airport, starting 09:00; 23-25 October - Special station ZS3SKA on the air; 21 November - Home Construction course, Gauteng, at the NARC.

Please note that in last week's bulletin the telephone number stated for the SARL office is incorrect, the correct number is 011 675 2393.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750

MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz.
There is also a podcast by ZS6RO. For the webstream and Echolink by
ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A
repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz.
Sentech sponsors the ARMI transmissions on the non-amateur frequencies.
You have listened to a bulletin of the South African Radio League,
compiled by George, ZS6NE.

Thank you for listening, 73.

****
>From The Business Manager Debby Morgan ZL2TDM
Debby says...with the IARU Region 3 triennial conference in Christchurch almost upon us, it's time to let you know that this office will be closed from Friday 9th October until Tuesday 20th October as I will attending the conference.

Any urgent enquiries can be made to my cell phone 027 450 8979 while I am away.

The office will also be closed tomorrow Monday 5th October due to unforeseen circumstances.

Subscriptions for 2010 are now due, please pay before the end of November to take advantage of the $10 rebate.

If you know of anyone interested in sitting the amateur radio exam, please in the first instance get them to take a look at our web page on the examination process and sample papers.

It offers comprehensive information on what is required, how to study and the costs involved to obtain a call sign and certificate of competency. More importantly it includes contact details for examination supervisors in their area and branch information should they wish to talk to an amateur first hand.

I receive a number of calls from people who have contacted a branch only to be told to call me. Remember this is the first point of contact for these 'would be' amateurs and it's the most important. If they do not get the information they seek, or are told to try various people this can be off putting, first impressions are lasting so it's up to us all to encourage those who seek advice on "How to become an Amateur" and make it memorable for them.

Talk soon...Debby ZL2TDM

NZART Monitoring System Report
Here are several links:

One is the IARUMS R3 database, possibly the first of its kind covering 2006 through to July 2009 - very useful for cross referencing purposing, when deciding whether a signal is an intruder or not.

http://www.iaru-r3.org/ms/r3msnl.htm

Plus a database of cluster spots of intruders from July 2006 through to August 2009

http://www.iaru-r3.org/ms/r3msnl.htm

Another good reference is the ITU terrestrial monitoring files for cross reference purposes.

http://www.itu.int/ITU-R/terrestrial/monitoring/files/pdffiles/321.pdf
http://www.itu.int/ITU-R/terrestrial/monitoring/files/pdffiles/322.pdf and
http://www.itu.int/ITU-R/terrestrial/monitoring/files/pdffiles/323.pdf

Plus

A report from the UK:

The Russian radar ABM2 is daily abusing 14255 kHz with 10 kHz spread and 50 pulses/sec.
Every morning at about 08 - 10 UTC. Location: North West of Smolensk.

Any reports appreciated.

THEORY CLASSES IN REGION 4

Plans are being put in place to run radio theory classes in the Limerick area by IRTS Region 4 representative Ger McNamara EI4GXB, with the hope that the theory examination can be held in Limerick which will be dependant on numbers.

Those interested in attending the theory classes can contact Ger via email at ei4gxb /at/ gmail.com or 087 2532512 or QTHR

GLORIOSO ISLAND OPERATION CONTINUES

The FT5GA team on Glorioso Island continues to be on the air and is trying to satisfy the needs of the international radio community.

As of September 27th, they had made over 26.600 QSO's even though they have had problems when two transceivers went down out of the four they had brought with them. One was repaired on site and put back in service.

Operations will last until October 5th, as per the Web page at

http://glorieuses2008.free.fr

IARU national radio society to celebrate its centenary

The Wireless Institute of Australia turns 100 next year making it the world's oldest National Radio Society. WIA President Michael Owen VK3KI says he wants the world-wide amateur radio community to join in the celebration.

A commemorative QSL card will be issued for contacts with VK100WIA between May and October next year. A

limited edition operating award, called the WIA Centenary Award is also to be available and two contacts with VK100WIA are required under its rules.

A program of events will occur around the WIA's annual meeting in the nation's capital Canberra in May 2010, while radio clubs are planning events to promote the centenary of organised amateur radio in Australia.

It all began in 1910 with a meeting of wireless pioneers in Sydney to protect their interests and rights against what they considered to be harsh treatment by authorities and a high licence fee.

The Wireless Institute of Australia has continued since then to protect and enhance the privileges of radio amateurs and to promote amateur radio. Details of the centenary program can be found on the WIA website www.wia.org.au

---

UNITED NATIONS HQ, 4UxUN. UN Headquarters station 4U64UN is active until mid November in celebration of the 64th annual UN general Assembly. Activity is on all bands and modes. QSL via HB9BOU.

Alaska Day Special Event Station

Look for special event station KL5O to be active on the air in observance of Alaska Day.

Activity will take place between 1800z, October 18th and 0600z, October 19th. Operations will be on 160-10 meters, including 30/17/12 meters. Modes will be CW, SSB and RTTY.

MRE AGM

The AGM of the Mayo Radio Experimenters will be held on Wednesday October 7th at 9.30pm local time in The Welcome Inn Hotel, Castlebar. All are welcome to attend.

Limerick Radio Club

Members are reminded that the next meeting of the Club takes place on Thursday 8th October at the Limerick Institute of Technology at 19:30.

AREN Net

The next AREN net is on Wednesday the 7th of September at 19.30PM

Rallies

Sunday 1st November 2009 Foyle and District ARC Rally Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA (same hotel as last year)

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

October 5, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KB1RVT, NC1L, NJ1Q, N3SL, NG3K, N4AA & QRZ DX, W5KDJ, KH6BZF, K8YSE, AT International, CT1GFK, DJ7IK, DK9TN, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, I1HYW, I1JQJ/IK1ADH & 425 DX News, LZ1ZF, OH2BH, OH2BN, Pete's-DX-Newsdesk, PY2SEX, RSGB IOTA Web Site, SM5LWC, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW and YV1DIG for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 27th-September, through Sunday, 4th-October there were 225 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/c, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FP, FR, FR/g, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP5, VP8, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (Update). The 3D20CR is now active until October 10th. As of Saturday, October 3rd, the team has made some 12k QSOs. Most of the activity has been on 160/80/40/20/17 meters using CW, SSB and PSK. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are

most likely to be sent out in January 2010). For more details and possible updates, see their Web page at: http://www.conwayreef2009.de
Also watch QRZ.com for updates at: http://www.qrz.com/db/3d20cr

3V, TUNISIA. A German team will operate from the "Radio Club Station of Tunisian Scouts" (3V8SS) in Sousse, using a special callsign 3V3S between November 23rd and December 2nd. Operators mentioned are: Andy/DJ7IK, Jan/DJ8NK, Guenter/DJ9CB, Andreas/DL9USA and Lars/DF1LON. The team will set up, and use a spiderbeam and verticals antennas. All antennas will be donated to the 3V8SS station. Look for them to also participate in the CQWW DX CW Contest (November 28-29th) as a Multi-Single/Low-Power entry. QSL via DL9USA. A Web page will be active soon at: http://www.3V3S.tk

4U1UN ACTIVITY WEEK (October 19-25th). A press release by Jarmo, OH2BN, states (edited): "4U1UN - United Nations Headquarters, New York - This DXCC entity will be active from October 19-25th, on all bands, all modes, with a team of well-known DX and contest operators: OH2BH, OH0XX, OH2NB, OH6LI, G3SXW, F5CWU, F4EGD, PY5EG, JK3GAD, UA9AB, LA5IIA LA4OFA, NN1N, K2QI, KA2RTD, K2LE, N2UN, N2GA, K2DO, N2YBB, KA2D, WQ2N and W2VQ. Antennas and security access to the building are heavily restricted but the team will do their best to make this rare station available to all.
Activity will be from 8AM until midnight local time (1200-0400 UTC) each day. All-night activity is planned for Friday the 23rd and Saturday the 24th of October. Some of the operators will form an international team for CQ World-Wide SSB Contest participation in the 'Two Transmitter' (M2) category. QSL via HB9BOU. LoTW upload will be done after the operation.
It is highly appreciated if you are able to distribute through your publications. 73 es tnx de Johnny, NQ2G / LA5IIA."

ADDED NOTE: Look for 4U64UN to be active until mid-November. Activity is to celebrate the 64th annual UN General Assembly. Activity is expected to be on all band and modes. QSL via HB9BOU or LoTW. Please note that the logs will be uploaded to LoTW once this event is over. QSL cards are expected to be mailed out sometime in December 2009.

8P, BARBADOS. Brian, ND3F, will be active as 8P9SS between November 22nd and December 2nd. Activity will probably be on all bands, but he will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or direct to ND3F.

9H, MALTA. Andreas, DL9USA, will be active from Comino Island (EU-023) between October 15-22nd. Bands and modes of activity were not provided. QSL via his home callsign.

A2, BOTSWANA. Mike, K9NW, will be active as A25NW between November 23rd and December 1st. Activity will include the CQWW DX CW Contest (November 28-29th). QSL via his home callsign (QRZ.com).

A5, BHUTAN. Just a reminder that Yasuo, JA1FJJ, will be active as A52FJJ between October 8-20th. Activity will be on 80-10 meters using SSB, RTTY

and PSK31. He plans to use 500 watts into a G5RV antenna. QSL via his home callsign, direct or by the Bureau.

AH6, HAWAII. Once again the members of the "Coconut Wireless Contest Club" will be active as AH6XX in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. Operators mentioned are: Rich/K2WR, Tetsuo/AH7C and Kan/JA1BK (KH6BK). QSL via LoTW, or direct to K2WR.

AM3, SPAIN. Members of the AM3SSB Contest Team will be active during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via EA3JW. Operators mentioned are: Eugeni/EA3QP, Marcel/EA3IN, Jaime/EA3JW, Joan/EA3GEG, Martin/EC3ACS, Albert/YV3AZC and Jose/EA5DFV.

CR2, AZORES. Toni, OH2UA, will be active as CR2X from Ribeira Grande during the CQWW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via OH2BH. For more details, visit the Web page at: http://www.cu2a.com

CU2, AZORES ISLANDS. A press release by Martti, OH2BH, states (edited): "You may catch the Radio Arcala team in action from the Azores starting Monday, October 5th, for one week. Look for Martti/OH2BH (CU2KG), Juha/ OH8NC (CU2KH) and Toni/OH2UA (CU2KI) on a variety of bands during a maintenance operation from their contest station CR2X <http://www.cu2a.com>. QSLs CBA via home calls."

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
5N0OCH - Nigeria; Current Operation (Logs in LoTW)
5N0EME - Nigeria; 2009 Operation
D2QMN - Angola; Current operation
Anyone who had this operation rejected in a recent DXCC submission can send a message to dxcc@arrl.org to be placed on the list to be updated.

EA8, CANARY ISLANDS. A German team of operators will activate the URE Las Palmas section radio club station EA8URL during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via address on QRZ.com. Operators mentioned are: Hans-Juergen/DB7QJ, Tobias/DH1TW, Heijo/DJ1OJ, Simon/DJ4MZ, Hajo/DJ9MH, Stefan/DJ9NMH, Manfred/DK2OY, Matthias/DK4YJ, Ulf/DK5TX, Christoph/DK9TN, Renate/DL2MY, Ron/DL3BPC, Holger/DL5KUT and Bernhard/DL6RAI. For more info on EA8URL, visit their Web page at: http://www.ea8url.com

FT/G, GLORIOSO ISLAND (Update). The FT5GA team continues to be on the air and is trying to satisfy the international Ham radio community. As of October 4th, they have made just under 43k QSOs with 13.4k unique callsigns (20256/CW, 18342/SSB and 4106/RTTY). This will be the last week to work them. The Web page is now reporting that the team will be active until October 8th. They are also planning to pay more attention to 160 and 80 meters CW to the USA, even if these bands are very very noisy. For updates, visit the FT5GA Web page at: http://glorieuses2008.free.fr

QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA

ADDED NOTE (FT5GA Pirates): Carl, N4AA, editor of "QRZ DX, sent out the following press release October 1st: "Hello DXers:
This is a SPECIAL BULLETIN and the following will reveal why.
I have been contacted by a person (who I will NOT name) who has the capability to pin point (very accurately) the source of an on the air signal. What I am saying is ï¿½ this person has the professional equipment
and the expertise to monitor a signal on the ham bands and determine to a very narrow area where that signal is coming from.
Apparently there was a pirate on 10114 last night signing FT5GA. That signal was NOT coming from Glorioso, it was coming from QUEBEC in CANADA, NNE of Montreal.
On two other days pirate signals were monitored signing FT5GA, one was coming from LATVIA and the other from the SOUTH COAST OF SICILY.
These pirates should be relatively easy for 'local' DXers to find. They need to be specifically identified and pressure brought to bear on them to cease their deliberate and illegal activities.
The 'source' that I mentioned above will continue to provide periodic reports like this, and I will continue to publish the locations of these irresponsible persons. I ask for those within the areas identified pay particular attention and use whatever means are available to them to put a stop to these activities.
Your cooperation with the identification of these pirates will be appreciated by all of us."

FY, FRENCH GUIANA. Operators Marc/F1HAR, Herve/F5HRY, Gerard/F6FGZ, Laurent/F6FVY, Sebastien/F8CMF and Didier/FY5FY will be active as FY5KE during the CQ World Wide DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via FY5KE, by the Bureau or direct.

G6, ENGLAND. Operators Paul/G6PZ, Mark/M0DXR, Simon/M0CLW, Peter/M3PHP and Simon/2E0CVN will be active as G6PZ during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via G6PZ, by the Bureau or direct. Visit the G6PZ contest station Web site at: http://www.g6pz.com

GJ/MJ, JERSEY (EU-013). Rich, K2WR, will once again be active as MJ0AWR before the CQWW DX CW Contest (November 28-29th). For activity during the contest, look for him to use the callsign GJ2A and be a Single-Op/All-Band entry. QSL GJ2A via K2WR or GJ3DVC. QSL MJ0AWR via K2WR.

II1, ITALY (Special Event/WAP Station). Look for special event station II1CAM (WAP-177) to be on the air until October 15th. Activity is to celebrate the 100th anniversary of the airport at Cameri, logistic and technologic pole of the Italian Air Force (see the following Web page: http://www.aeronautica.difesa.it/SitoAM/Default.asp?idsez=2956&idente3DA2).
The WAP (Worldwide Antarctic Program) has always worked close to the Italian Air Force (IAF) which devotes its personnel every year to the Antarctic Missions. The WAP is joining in on the celebration of the

Cameri AFB and a special thanks goes to A.R.I. Sezione di Gallarate (IQ2GM) for this brand new II1CAM (WAP-177) callsign on the air. QSL via IW2MNO. More info and WAP news can be found on the WAP Web site at: http://www.waponline.it

IOTA NEWS.....
EU-011. Operators Dave/G4IAR and Judith/G4IAQ will be active as G4LAB/p from the Isles of Scilly between October 9-19th. Activity will be on the HF bands, on or near the usual island and IOTA frequencies. QSL via G4IAR, direct only (QRZ.com).

OC-070. (Postponed) Hotang, YC0IEM, will be active as YC0IEM/8 from Ambon Island between October 12-30th (not October 4-12th as first announced). Bands and modes of activity were not provided. QSL via IZ8CCW.

OC-203. (RARE IOTA). Operators Paul/ZL4PW and Ray/VK4HDX plan to activate Stewart Island between March 19-30th, 2010. Last activation was in 2007 for 48 hours, and before that in 2004. Previous operations were generally CW. These operators plan to be active on all modes on 160-15 meters. They may also partici-pate in CQ WPX SSB Contest too. Paul and Ray have purchased the majority of equipment for this operation, as well as covering travel and food costs to Stewart Island. They are currently looking for donations/funds to assist in the purchase of a couple of items missing from their list. They still need:
* Antenna phasing device for 2 element phased arrays for 30/40m
* A solid-state linear amplifier
If you feel you can help, please contact Paul at:
zl4pw@orcon.net.nz
A Web site is currently under construction for this DXpedition. Stay tuned for more info.

J45, DODECANESE. Martin, ON4PO, will be active as J45PO between October 21-29th. Operations will be from the SX5P contest station on Rhodes Islands, so look for activity before and after the CQWW DX SSB Contest (October 24-25th), especialy on 40 meters. During the contest, Martin will be the 40m operator. QSL via J45PO via ON4PO.

KG4, GUANTANAMO BAY. Keith, KJ5YU, is currently in GITMO and will be there until February 2010. He is expected to sign KG4YU. No QSNs have been reported yet nor what bands or modes he will be using. QSL via KJ5YU.

KH4, MIDWAY ISLANDS (OC-030). Just a reminder that a multi-national team of 18 operators will activate Midway Island (OC-030) between October 9-19th. The team will sign K4M and will operate from Sand Island (Reference numbers: USI OI-011S and Grid AL18). The U.S. Fish & Wildlife Service has authorized this amateur operation from this rare U.S. entity for only a 10 day period -- the first radio activity in almost 10 years. Midway Island ranks number 24 world-wide and number 13 in Europe on the DX Magazineï¿½s ï¿½Most Wanted Listï¿½. The updated team member list consists of operators: Joe/AA4NN, Franz/DJ9ZB, Max/I8NHJ, Kevin/K6TD, Kimo/KH7U, Craig/K9CT,

Don/N1DG, Tom/ND2T, Paul/N4PN, Tom/N4XP, Arnold/N6HC, John/N7CQQ, Dave/
WB4JTT, Charlie/W6KK, Bruce/W6OSP, Art/WA7NB, Joe/W8GEX and James/9V1YC.
In addition to the on the air team members, K4M is ably assisted by the
following off island support team: Don/AA1V (Web support/online logs),
Markus/DL9RCF (European Fund Raising), Dan/W5DNT (Logistics), Paul/W6XA
(Radio Setup and Testing) and Margarett(XYL AA4NN - Finance), Janet/W8CAA
(Fundraising) and Vrata/OK1KT (QSL Card Procurement). Activity will be
on 160-6 meters with 5 to 6 stations. Suggested frequencies are:
CW - 1826.5, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024 kHz
SSB - 3799, 7078, 14200, 18145, 21295, 24945 and 28475 kHz
RTTY - 7040, 10140, 14080, 18100, 21080 and 28080 kHz
6m - 50115/CW and 50118/SSB
For more details, updates, online log, frequencies and bios, go to:
http://www.midway2009.com
QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA
30620-9989 USA) or LoTW.

KH6BZF PROPAGATION FORECAST/REPORT (For October 5-11th)....
Oct 5 AN SOLAR REFERENCE
Oct 6 AN ---------------
Oct 7 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 8 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 9 AN LN - Low Normal
Oct 10 AN
Oct 11 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less
ADDED NOTES BY LEE: Lee states, "It should be noted that some of the
of the best DX'ing may be expected between October 17-28th. Always
check the low bands......"

KH8, AMERICAN SAMOA (Ops are safe!). Lee, KH6BZF, informs OPDX this past
week that Larry, AH8LG, "American Samoa Amateur Radio Association" (ASARA)
President, his XYL Uti/KH8FO and family are safe and sound after the
tsunami hit KH8-land. He is currently on P/V solar power as the island
power is spotty at best. Larry's shop in Pago Pago harbor did sustain
some damage. KH8AA is reportedly also safe.

LZ44, BULGARIA (WFF Op!). Members of the Balkan Contest Club (LZ1KZA)
will organize a "World Flora Fauna" (WFF) expedition from Biosphere
Reserve "Srebarna" (LZFF-016, WW. Loc. KN34MC) between October 9-11th.
Their callsign will be LZ44WFF, and activity will be on all HF bands
using CW, SSB and the Digital modes. QSL via the Bureau to LZ1KZA.

OL7, CZECH REPUBLIC. Members of the Czech HF Contest Team (OL7R) will be
active using a special callsign, OK0K, in the CQWW DX SSB Contest (October
24-25th) as a Multi-Multi entry in Zone 15. QSL via OK1WMV, direct is
preferred.

PA9, NETHERLANDS. Marcel, PA9M, will be active from PA6Z superstation during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (80m) entry. QSL via PA9M. Visit the PA6Z superstation Web page at: http://www.pa6z.nl/index.html

PJ4, NETHERLANDS ANTILLES. Operators John/K4BAI and Don/W4OC will be active as PJ4/homecall from K2NG/PJ4G rental QTH on Bonaire (IOTA SA-006, WLOTA L1279) between November 24th and December 1st. Also look for them to be active as PJ4A during the CQ World Wide DX CW Contest (November 28-29th) as a Multi-Op entry. QSL all callsigns via K4BAI. E-mail requests for bureau cards will be accepted.

QSL INFO AND NEWS.....
4W6AL UPDATE. Toze, CT1GFK, reports that the 4W6AL statistics are now available now at: http://algarvedx.com
QSL cards will be printed during October. Please be patient!

NO BUREAU QSLS! DXer and QSL Manager Wayne, W5KDJ, reports that "I do not accept QSL cards via the Bureau. I will only confirm contacts via: direct QSL with SASE or SAE+(IRC or 1 USD), or using eQSL or LoTW." Wayne is the QSL Manager for: 3DA0KDJ, 5R8KD, A25KDJ, C91KDJ, SV0WWW, TF2WJN and YN2KDJ.

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Vlad is still sending them out.

QSL UPDATE. Bill Horner, VK4FW, QSL Manager for many stations, reports: "I have returned home from my family holiday. In the last 4 days I have completed some 5000 QSL cards (NONE FOR 4W6FR)and have just about caught up with it all. On Monday (October 5th), there will be a major deposit made at the post office. The 4W6FR cards will not begin till probably xmas time as we have yet to print a card, and no logs are available till the op returns from 4W. Regards to all."

ZK2V QSL STATUS. QSL Manager Steve, N3SL, reports, "With the exception of about 100-125 cards that require 'special handling', the entire batch of DIRECT ZK2V cards should be to the post office on Tuesday (September 29th). That will be just shy of 1400 envelopes, confirming 2979 QSOs. Bureau cards will be tackled next."

QSLS VIA LOTW: K5D

QSLS RECEIVED VIA MAIL: 3DA0EL, 3DA0MH, 3DA0MM, 3DA0TB, 3DA0VA, 7P8YI, 7X4AN, C21TI, EEA9/KH0AM, K5D, KL1V, PX6T, S92LX, TC098A, TI2KI, TO8YY, TT8FC, V7XX, VK9GMW and ZK2V

QSLS RECEIVED VIA THE BUREAU: None reported this week!

RARE SPECIAL EVENT STATION. Members of the Kristianstad Radio Amateurs Awards Group (SK7BQ) in Kristianstad (A city in former "Eastern Denmark", Sweden since 1658) inform that the most wanted station for the "Roskilde 1658 Award", SK1658DK, from Lund in the former Danish Province of Scania in southernmost Sweden will be active during the first weekends of October, November and December. There are a couple of hundred stations

missing this station for the award. To qualify for this award, four out of seven callsigns in Sweden and Denmark with 1658 in their callsign have to be worked. On February 26th, special rules were applied to the award. For details, visit the award Web site at:
http://www.sk7bq.com/roskilde (entirely in English)
Look for the other special callsigns (SB1658OZ, SH1658DK, SH1658OZ and OZ1658ROS) to be active during the rest of the year. Look at the "Activity Calendar" in the menu on the above Web site which will be updated regularly until the end of the year. They report, "Unfortunately condx have been miserable from Sweden and Denmark to countries outside Europe but a few stations outside Europe have qualified for the award. The stations will be QRV on 20m and higher bands if they are open."

T6, AFGHANISTAN. Pascal, F5PTM, is now active from Afghanistan as T6YA until sometime in December. Activity over the past weekend was on 40/30/20/17 meters CW. He is reportedly using a TS-850 into a G5RV antenna. QSL via F5OGL: Didier Senmartin, Box 7, 53320 Loiron, France.

TF, ICELAND (On the Birds!). Tom, N2YTF, is currently operating as TF/N2YTF from Iceland. According to his QRZ.com page: "Iceland! I will be operating the FM satellites and HF (where time allows) from Iceland until Oct. 5th. Expect me to be on the birds QRP portable, sometimes with an Arrow Antenna for any passes between 1000 and 0000 UTC. Please help get the word out about my satellite operations." Check his QRZ page for more information.

TO5, MARTINIQUE. Saty, JE1JKL, will be active as FM/JE1JKL/p from FM5BH's QTH between November 25-27th. Activity will also include the CQWW DX CW Contest, signing as TO5T, and as a Single-Op/All-Band/High-Power entry. QSL via JE1JKL.

TWO NEW COUNTRIES? It was reported this past week that St. Maarten (PJ7) and Curacao (PJ2) will become separate countries within the Dutch Kingdom on October 10, 2010, and this date is irrevocable. HOWEVER, the two new countries are subjected to meet certain conditions before that date. If the two countries can meet these conditions, the the Netherlands Antilles will officially cease to exist.

TX5, AUSTRAL AND MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB are now active as TX5SPA from Tubuai Island (OC-152) in the Austral Island group until October 12th. As this was being typed, the team has made about 9k QSOs. Remember, their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to:
http://fo2009sp.pl

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Keiichiro/JA7GYP will be active from Pohnpei (OC-010) between October 25-31st. Activity will be focused on the lower bands. QSL via their home callsigns. They will also be in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single

entry; possible part time participation. QSL via LoTW.

VK9X, CHRISTMAS ISLAND (Update/OC-002). Operators Harry/DM5TI, Rene/DL2JRM, Tom/DL2RMC and Sid/DM2AYO will be active from here between November 21st and December 5th. The team plans to have two stations active 24/7 on 160-10 meters on all modes. They will use K3 radios with 600 watts+ amps. Activity will be focused on the lower bands, mostly on CW. The callsign VK9XX will be used during the DXpedition while VK9XW is used during the CQWW DX CW Contest (November 28-29th). QSL via Dl1RTL, by the Bureau or direct. For complete details, visit the VK9XX Web site at:
http://www.dl2rmc.com/tom/VK9X2009

VP5, TURKS AND CAICOS ISLANDS. Operators Frank/WA2VYA, Tony/W2WAS, John/W2GD and John/N2VW will be active as VP5T during the CQWW DX SSB Contest (October 24-25th) as a Multi/Multi/Dxpedition entry. QSL VP5T via LoTW, or via N2VW (by the Bureau or direct). Their activity will be from Providenciales (NA-002). Look for CW and operations on the WARC bands and 60 meters before and after the contest. Operators will sign using VP5/homecall. QSL to their home callsigns. No eQSLS. SWL QSLs are OK.

VP9, BERMUDA (NA-005). Ted, W3TB, will once again be active during the CQ WW DX SSB Contest (October 24-25th), but this time signing as W3TB/VP9 (or possibly VP9I again) and will be a Single-Op/All-Band entry. Also, look for operations before and after the contest. QSL via N1HRA.

XR6, CHILE. Members of the Radio Club Temuco (CE6TC) will be active as XR6T from the QTH of Gaston, CE6DBI, for the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. Operators mentioned are: Alex/CE6SAX, Alex/ CE6DFY, Carlos/CE3AQI, Carlos/CE6CP, Marco/CE6VMO and Ramiro/CE6VMR. QSL via CE3FED, by the Bureau or direct to: Radio Club Temuco, P.O. Box 1234, Temuco, Chile.

YN, NICARAGUA. Eric, K9GY, will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. He will be there between November 25-30th. Outside of the contest, look for CW activity on 30/17/12 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

YW8, VENEZUELA. The members of the Radio Club Venezolano continue to activate all the states across Venezuela. Look for activity from the Monagas State as YW8AJ between October 9-12th. They will try to activate all bands and modes including some 2m. Operation is valid for the DEV award (Venezuelan States Award) and can be viewed at:
http://www.radioclubvenezolano.org/concurso.htm
QSL via YV5AJ, direct or by the Bureau.

ZS9, SOUTH AFRICA. Members of the Bloemfontein Defence Amateur Radio Club members will be active as ZS9X from Bloemfontein during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. Operators mentioned are: Bernie/ZS4TX, Berney/ZS4U, John/ZS4S, Ronnie/ZS4RY, Jan/ZS4JAN and Denis/ZS4BS. QSL only via K3IRV. Read the interesting write-up at:
http://www.qrz.com/db/ZS9X

ZY0T, TRINDADE AND MARTIM VAZ ISLANDS (Update/Delay). Four members of the Rio DX Group will activate Trindade Island (PY0T/SA-010) as ZY0T now scheduled for October 17-20th (not 11-16th as first announced, due to the Brazilian Navy schedules - and these days can be shifted 1 day either way). QSL via PY1NB DIRECT ONLY. See OPDX.927 for more details or visit their Web page at: http://riodxgroup.dxwatch.com/trindade-2009

> non-profit and government entities

When I first glanced at this, I thought that it was going to be another promotional piece expounding emergency services. But I figured I'd go to the pdf, and was pleasantly surprised. The ARRL has got this one absolutely right.

The emergency comms people had at some point gotten the wrong idea about amateur participation in emergencies, and were applying their structure to the process. Many of the issues that were pointed out in the pdf file were experienced first hand by myself and others: the "Everything we do is by definition an emergency, so if we're operating, it's an emergency and you have to relinquish your communication devices to us". We don't really need licenses, since what we are doing is emergency work". And thanks, it's been great, but since our employees all have technician licenses now, we don't need you any more - but we still have to have your repeater.". That isn't conjecture - that's from actual conversations (the last was paraphrased - it was more like "Once we have all our guys licensed, we won't have to bother you guys any more)

The success of amateur radio in recent emergency situations has been a great thing, but many of the groups we have worked with have misunderstood the cause for that success. We have been a big help because of the non-organized aspect of our operations, and the lack of structure inherent in our hobby. The groups we are working with are by necessity highly structured, and everything has a process and hierarchy imposed on it.

What has happened is that after seeing the communications success that we have had, those in the services that we have helped have come to the conclusion that if we can only have some of that structure imposed on us, we will just become better. That is where some of the friction started to develop. Having to give the Red Cross our financial information, nor was the "Unpaid Volunteer" position where part of the Amateur's duties would be sweeping the floor or taking out the trash.

So Kudos to the ARRL for seeing the issues brought up as the EC folks started to press a little to hard on the service.

2310. [RAC-Bulletin] RAC Bulletin 2009-032E - Military radiolocation system to operate on 70 cm.

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-07 16:03:08 UTC
From: rac-bulletins@eton.ca
Message-ID: <4ACCBB95.2050706@rac.ca>
Source record: 6524
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2009-032E - Military radiolocation system to
operate on 70 cm.
2009-10-07

Military radiolocation system to operate on 70 cm.

As described in Schedule I of RBR-4, amateur usage of the
430-450 MHz (70 cm) band is on a no-protection,
non-interference basis. Amateurs may not cause interference
to nor be protected from interference from stations licensed in
other services operating in that band. The same is true in the
United States, and amateur operations on this band in a number
of areas of the United States have power limits imposed on them
in order to avoid interference to radiolocation services
operated by the US military.

Industry Canada has informed RAC that it has authorized the
Department of National Defence to use a digital system called
Enhanced Position Location Reporting System (EPLRS) on these
frequencies. The EPLRS system consists of mobile, fixed,
transportable and airborne stations that use 5 MHz-wide spread
spectrum channels to provide strategic telemetry information
for military platforms. This authorization is on a
no-protection, non-interference basis, which means that no new
restrictions will be imposed on Canadian amateur operations in
this band as a result.

Industry Canada has informed RAC that there is a slight
potential for interference to amateur radio systems, typically
in the form of a minor audible clicking noise. If Canadian
amateurs encounter such interference, they are requested to
report it to RAC at <regulatory @ rac.ca>. The information
reported should include the geographical location, date, time,
frequency and mode being used by the amateur station, and a
description of the interference.

Questions or concerns regarding the planned implementation of
EPLRS may be sent to <regulatory @ rac.ca>.

Richard Ferch, VE3KI
Vice President, Regulatory Affairs - Radio Amateurs of Canada

QNEWS BROADCAST OCTOBER 11 2009

2009 WIA Club President's Lunch

This is Don Wilschefski VK4BY, WIA QAC Chairman.

Registrations are being received for the 2009 WIA Club President's Lunch. So far we have registrations from as far afield as Townsville, Rockhampton, Maryborough and Hervey Bay.

WIA President Michael Owen, and Vice President Ewan Mcleod, will be attending, and will address the group after lunch. The lunch will be held on Sunday, 15th November, at the Geebung- Zillmere RSL club. This is the day after the Gold Coast hamfest.

The Geebung Zillmere RSL club is in Newman Road Geebung, on the north side of Brisbane. The doors will open at 11:00am, and a set lunch will be served at 12:30pm. The meal will be an alternating roast beef and roast chicken meal, that will be served to the tables. Cost for the meal is $15- per person, to be paid at the door.

The Wireless Institute of Australia will pay the cost of the room hire. There will also be a bar service.

To reserve your place, please email Don Wilschefski VK4BY at qac@wia.org.au Special dietary requirements can be catered for. If you are arriving by plane or train, please advise, and transport to the venue may be organised.

As in previous years, the intention is for one or two representatives from each radio club to attend. This is a good opportunity to discuss issues with the President and Vice President of the WIA.

Numbers will be required by Monday 9th November.

I look forward to seeing you there.

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

With the weather bringing disasters to many parts of the Asia/Oceania Regions we should relflect on the importance of our hobby in a greater scheme.

Going by news reports, there is severe flooding in southern India and the Phillipines, earth quake damage in Sumatra and tsunami devestation in Samoa and Tonga with such immense human costs. According to Jim Linton, VK3PC, on the WIA web site, and as we heard in the national newscast local amateurs are definitely involved in support roles in Indonesia and the Phillipines.

It is to meet the demands of such crises that the Global Amateur Radio Emergency Conferences have been convened. These annual meetings have

drawn on the previous s.e. Asian tsunami and the Chinese earthquakes and the outcomes are being reviewed through at least two United Nations Agencies.

Our WIA has a committee developing a basic training course for emergency communications which will provide a consistent level of skills to those

completing the course satisfactorily.

What this means is that as all grades of licence in Australia have access to HF frequencies and even with poor sun spot numbers, some of the countries affected by natural disaster are closer to northern VK-land than our major cities are to each other, we radio amateurs can assist in message handling and support. The reality is that our hobby is international in reach. Can we touch another, in time of need?

Ipswich and District Radio Club

Allan Roebuck VK4FABR says in what is certain to be the season opener, members, guests and other amateurs are invited to help Ipswich and District Radio Club celebrate the festive season.

A special Christmas lunch is being held on Saturday November 7 at the Workers Club in Bell Street from 11.30am to 2pm.

The venue is also known as Ipswich Trades Hall and the lunch will only cost $13.95, plus drinks.

Payment for this event would be appreciated as soon as possible.

You can pay at any club meetings, or send a money order to
PO Box 250, Ipswich, QLD, 4305,

or contact the Secretary on 07-3282-7238 to organise payment.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/
Redcliffe and District Radio Club

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

JOTA weekend is on the 17 & 18 October. The club will be portable at the Murrongbong Scout camp near Petrie, north of Brisbane and will be using the special scout callsign, VK4SMB. The club will be on most HF bands and IRLP on 2 metres.

There will be a number of amateur radio activities to introduce our hobby to the anticipated 400 scouts, cub, guides and rovers who will be visiting the site. There will also be a display of historic morse code equipment.

There will be no open fires allowed at the site this year and so the ever popular camp roast will not happen this year. So if you wish to visit the site, look for campsite 6 and it will be BYO food & drink and the club BBQ's will be there to assist in the cooking of food.

If you wish to stay overnight, please advise Peter VK4TAA via the club's website. Please remember that it is BYO water, chairs & tables etc, and the camping fees will be about $6 per night to cover the cost of toilets and fuel for the generators. The club's leader for the weekend is Glenn VK4FZ.

Shaun VK4FY will also be assisting cubs from Aspley Scout group using the internet.

Setting up of the campsite will occur on Friday starting about 10 am, and if you can assist listen to the Redcliffe 2 metre repeater for further details on Friday morning.

So until next we meet, this is Ray VK4CF and you are listening to QNEWS via VK4WIA.

GOOD MORNING & GREETINGS ! THIS IS DON VK4FNQA WITH NEWS FROM NORTH QUEENSLAND.

I AM JUST RECOVERING FROM AN ATTACK OF THE CROAKS, SO APOLOGIES IN ADVANCE IF I GO ALL CROAKY.

FIRSTLY I MUST PASS ON SOME SAD NEWS ABOUT ONE OF OUR FORMER MEMBERS.

THANKS TO PETER VK4PV, ADVICE HAS BEEN RECEIVED THAT KEN TELFORD VK8THH WENT SILENT KEY ON FRIDAY OCTOBER 2ND AFTER A LONG BATTLE WITH CANCER.

KENS FUNERAL WAS HELD IN ALICE SPRINGS ON THURSDAY OCTOBER 8TH.

WE PASS ON DEEPEST SYMPATHIES TO XYL HELEN AND FAMILY.

NOW FOR SOME GENERAL NEWS...

THERE ARE OPERATORS OUT IN THE BUSH TODAY NORTHWEST OF TOWNSVILLE CHASING HORSIES WITH RADIOS... THE OPERATORS ARE PROVIDING COMMUNICATIONS SUPPORT FOR THE 5TH BLUEWATER HORSE ENDURANCE RIDE DURING THE WEEKEND AND PROVIDED ALL GOES WELL SHOULD BE FINISHING UP ABOUT 1PM TODAY.

THE TARC INC HAS THE PROJECT NIGHT HAPPENING THIS TUESDAY EVENING FROM 7-30PM AT THE CLUB ROOMS IN GREEN STREET WEST END. EVERYONE WELCOME TO COME ALONG AND HELP PUT THE MAGIC SMOKE BACK INTO THE LATEST TECHNICAL PROJECT !

NOW FOR SOME REQUESTS.

JAMBOREE ON THE AIR IS HAPPENING NEXT WEEKEND AND IF YOU WANT TO HELP OUT WITH A GROUP IN NORTH QUEENSLAND THEN PLEASE CONTACT RICHARD VK4FRJG ON TELEPHONE 47752923 RIGHT NOW.

TARC IS VISITING THE TOWNSVILLE CHORAL AND ORCHESTRAL
SOCIETY THEATRE RESTAURANT ON FRIDAY THIRTEENTH OF NOVEMBER...

IAIN VK4IGM IS HANDLING BOOKINGS AND SEATS ARE LIMITED.
CONTACT IAIN ON TELEPHONE 47214083 RIGHT NOW.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE,
THIS IS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO
CLUB INC,...

AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

ALL UP AND COMING IN THIS EDITION OF WIANEWS WEEK COMMENCING OCT 11 2009

JOTA From Bob VK6POP

JOTA is next weekend. Scouts and Guides worldwide will be on air trying to contact each other. Approximately 500,000 people around the world are involved in the Jamboree On The Air and Jamboree On the Internet every year.

You're likely to hear Scout stations operating on or adjacent to the calling frequencies, however they are not limited to those places on the bands. As
with any event of this nature, operators will look for a nice clear spot, or tune around to find someone calling "CQ Jamboree".

This year there will be Australian Scouts on air using their own callsigns for JOTA for the very first time. Congratulations to those Scouts who have gained their license, and those who are about to.

JOTA and JOTI commence officially at midnight local time on Friday 16th October, and finish at midnight local time Sunday 18th October.

There will be an address by Her Excellency Ms Quentin Bryce, AC, Governor General of Australia, Chief Scout and Patron of Girl Guides Australia. This is broadcast on amateur radio frequencies, usually through the WIA news network, at 1300 local time. Please check with your local Scout people for details in your state or territory. For those unable to listen to the broadcast, the MP3 file may be played locally.

The address will be available for download from the usual WIA news source, and from scouts.com.au JOTA-JOTI pages. Follow the link from "international".

The Scout calling frequencies, which can be found at www.scouts.com.au are:

International voice calling frequencies:
3.690 & 3.940 MHz,
7.090 & 7.190,
14.290
18.140
21.360
24.960
28.390
50.160

Australian voice calling frequencies:
3.650
7.090 7.190
14.190 14.290
21.190

28.590
52.160

Calling frequencies for Slow Scan TV (SSTV):
3.630
7.033
14.227

Calling Frequencies for PSK31
14.070

Next week's WIA news on the JOTA-JOTI weekend will be presented by Amateur Radio Licensed Scouts from the Waylen Bay Sea Scout group in Perth.

Good luck with JOTA-JOTI, and thank you to all who are helping.

AMATEUR RADIO - HOME OF THE GOOD GUYS - OR " Tip of the Hat".

It makes you feel great upon learning that one interest group in Amateur Radio makes special provision so as not to disadvantage another group.

That is exactly what has happened when a clash was discovered by the Deutscher Amateur Radio Club with its popular Worked All Germany contest being on the same weekend at the Jamboree On the Air - the 17th and 18th of October.

The contest organisers have readily made the decision that there should be contest-free frequencies to give the scout and guide stations a fair go on the HF bands, including all of the designated World Scout Frequencies. Well done!

The following frequencies are the contest-free zone:
80m: CW: 3560 - 3800 kHz, SSB: 3650 - 3700 kHz
40m: SSB: 7080 - 7140 kHz
20m: CW: 14060 - 14350 kHz, SSB: 14100 - 14125 kHz and 14280 - 14350 kHz
15m: SSB: 21350 - 21450 kHz
10m: SSB: 28225 - 28400 kHz

This means that all World Scout Frequencies are in the clear.

Should you encounter contest stations on the above frequencies, please advise them of the contest-free zone. These are also mentioned on the web site of the contest organisers at
www.darc.de/referate/dx/fgdcg.htm

(Jim Linton VK3PC-southgate-darc)

On last weeks broadcast we announced the launch of the WIA Centenary celebrations, in recognition of the foundation of the WIA and the very start of organised amateur radio in Australia during 1910.

Things have got off to good start, we have had a number of enquiries about the celebrations and enquiries regarding clubs booking the VK100WIA special event callsign, instructions and login details have been sent this week to the secretary of each WIA affiliated club, at the address registered in the

clubs section of the WIA website. We have already received quite a number of orders for the limited Centenary merchandise which you will find on sale under the merchandise section of the online bookshop and via the centenary we pages in the WIA website. Our centenary tie pins and centenary posters have arrived and have been added to the increasing range of commemorative products on sale.

So this week, have a think about how you and your club would like to help celebrate the centenary and be ready to make your clubs 3 day reservation to put the VK100WIA callsign to air.

And as we mentioned on last weeks broadcast an email address centenary@wia.org.au has been established for all enquiries relating to the centenary celebrations.

Townsville City Council launches Disaster Messaging Service

Townsville City Council has launched a Community Disaster Messaging Service based on the Early Warning Network and can now provide residents with free emergency alerts in the event of severe weather.

You can choose one or more ways to receive messages, including mobiles, landline phones or email.

It could save your life... and protect your property.

Melbourne DATV goes live

The digitisation of one of the world\'s longest running fast-scan amateur television repeaters, VK3RTV on Mt Dandenong east of Melbourne, is now fully implemented.

The project has been in the planning for some years. When funding became available in January this year it was full-steam ahead with German made DVB-T commercial television standard boards being imported.

Then all of the other bits and pieces including a controller had to be built.

We reported on this broadcast the very first digital test that occurred on the 7th of June. This was followed further tests.

Now, after more than 30 years, the VK3RTV analogue transmission has ended to be replaced by digital.

A number of radio amateurs in the greater Melbourne and Geelong areas are receiving it on 446.5 MHz in the 70cm band using TV set-top boxes or USB DVB-T receivers.

Congratulations to Peter Cossins VK3BFG and others in the Melbourne ATV Group who have made it possible.

The project is funded by Amateur Radio Victoria which acknowledges a $1,000 contribution by the WIA through its Club Grants Program.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

VK3

The Sherbrooke community school will be making a contact with the space station some time during the week of Monday Oct 26.

They do have limited room and to attend, you must have an invite.

However they will have a link up on VK3RBY, and VK3RML and are still hoping to get ATV link up as well, if you can help with the ATV part could you email

VK3AMN@wia.org.au

or ring 9754 5862

VK4

Ipswich and District Radio Club is claiming the first Christmas party for 2009. Allan Roebuck (VK4FABR) reports -

In what is certain to be the season opener, members, guests and other amateurs are invited to help Ipswich and District Radio Club celebrate the festive season.

A special Christmas lunch is being held on Saturday November 7 at the Workers Club in Bell Street from 11.30am to 2pm.

The venue is also known as Ipswich Trades Hall and the lunch will only cost $13.95, plus drinks.

Payment for this event would be appreciated as soon as possible.

You can pay at any club meetings, or send a money order to PO Box 250, Ipswich, QLD, 4305,

or contact the Secretary on 07-3282-7238 to organise payment.

This is Robert VK3DN reading an item on behalf of Geoff Atkinson VK3AFA Secretary

2009 Club Grants Announced

The WIA Board has accepted the recommendations of the 2009 Grants Committee .

Grants have been awarded totalling $5,450.00.

For 2009 the Board specified that grants would be offered for projects and activities to be conducted before April 2010 to attract new amateurs, and for projects that supported emergency communications.

The Grant Committee was asked to pay particular attention to the number of WIA members in a club as a percentage the total membership of the Club when considering the applications.

17 applications were received.

7 projects and activities to attract new amateurs were awarded grants totalling $4050.00 as follows:

Fishers Ghost Amateur Radio Club Inc. $500.00 for amateur radio demonstrations at the 2010 Australian Jamboree;

Redcliffe & Districts Radio Club $500.00 for equipment for JOTA activities;

Port Stephens Amateur Radio Club $500.00 to establish loan library of Foundation books and material;

Waverley Amateur Radio Society $750.00 for a trailer fitted with antennas and radios to promote amateur radio and for emergency use;

Sunshine Coast Amateur Radio Club Inc. $500 for GlobalSET communication,

St George Amateur Radio Society $600.00 for a data projector as a part of a project to attract new amateurs,

Sherbrooke Community Radio Club $700.00 for the purchase of radio equipment and literature to further an existing amateur radio training involvement with a school.

Three projects supporting emergency communications received grants totalling $1,400.00 as follows:

Yarra Valley Amateur Radio Group Inc. $250.00 toward replacing a trailer and equipment destroyed in the 2009 fires;

St George Amateur Radio Society Inc. $650.00 refurbish 2 metre repeater for emergency preparedness;

Twin Cities Radio & Electronics Club $500.00 toward stage 1 of a planned project to build an emergency station on a trailer.

The full report of the Grant Committee which details all applications received and the reasons for their recommendations will be placed on the WIA website.

The Board congratulates the successful applicants, and thanks all the clubs that participated.

The Board also thanks the Committee for their work reviewing and analysing the applications and formulating their recommendations.

(Geoff Atkinson Secretary 6/10/09)

ACMA NEWS

More 2 GHz spectrum proposed for mobile telecommunications services

The Australian Communications and Media Authority is seeking feedback from industry and interested parties to a proposal to make further spectrum in the 2 GHz band available for mobile telecommunications services in regional and remote areas of Australia.

The ACMA has released a discussion paper detailing the proposed public telecommunications service (PTS) apparatus licensing arrangement to support the coordinated deployment of mobile telecommunications infrastructure in regional and remote areas.

Complete details on the licensing arrangements and the draft amendments to the regulatory framework to support the proposal can be viewed on the ACMA website.

(Media contact: Donald Robertson, Media Manager, on (02) 9334 7980)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

West Sumatra Earthquake.

It is understood that a number of Amateur Radio stations are assisting in the aftermath of the earthquake in West Sumatra.

YB5ZA is located in the Governor's office of West Sumatra province and

supports the disaster management command post. They are operating on 7.0650 MHz, 145.500 MHz and VHF repeater 146.260 MHz.

YB5ZDD is on the air using 7.065 MHz SSB from the international airport Padang city.

Bambang Sambadi YB1TY has established an iQSO gateway via iqso.orari.net

http://unsyiah.iqso.orari.net/iqso/iqso.htm

(southgate)

SPECIAL EVENT STATION ZS3SKA

South Africa is one of two nations in the run for the erection of the largest radio telescope in the Southern hemisphere known as the Square Kilometre Array (SKA).

The possible site in South Africa is situated in the Northern Cape and a start has already been made with the erection of a smaller version, which is called Meerkat.

In order to make this project known to amateurs, nationally and internationally, Boland and Northern Cape radio clubs will operate an amateur station 23 to 25 October from the proposed site.

The station's call sign will be ZS3SKA and operation will be on all HF bands.

Now how about it VK6'ers? Seeing WA is the other contender what about a club starting up VK6 SKA.

vE4HAY RE-ELERCTED RAC MIDWEST DIRECTOR

Congratulations to Derek Hay, VE4HAY, of Winnipeg who has been re-elected as the Midwest Region Director of Radio Amateurs of Canada. Hey ran unopposed and was declared re-elected on September 16th.

HAM RADIO PREPARES FOR WRC 2012

Ham radio is getting ready for the next major World Radiocommunication conference slated for Geneva, Switzerland from January 23 to February 17, 2012

To get ready, Approximately 200 participants came together in an ITU preliminary meeting that ended September 16 in Geneva. ARRL Technical Relations Specialist Jonathan Siverling, WB3ERA, and IARU Region 1 Vice President Tafa Diop, 6W1KI, were among the participants.

Also present were the power players representing the six regional telecommunications organizations including CITEL from the Americas.

This meeting was part of a series of ongoing international and regional preparatory meetings to allow government and industry to address the far-reaching and complex agenda of WRC 12.

==========
RSGB NEWS FROM G4NJH

RSGB goes to law over PLA dispute with Ofcom

The RSGB continues to take the Power Line Adaptor compliance fight to Ofcom.

This follows Ofcom's statement on PLT/PLA on 3rd September 2009 and the RSGB's response statement issued on 4th September 2009.

The Society has now received a formal reply from Ofcom following the Society's earlier formal complaint to Ofcom regarding non compliant PLAs and Ofcom's interpretation of the EMC Directive regarding these devices.

The RSGB continues to find Ofcom's responses and position totally unacceptable and has recently instructed its lawyers to investigate a legal challenge on the Ofcom position. The RSGB will continue the fight to protect the radio spectrum against non-compliant devices which cause unacceptable levels of interference, particularly to the HF bands. We will issue further statements as the case develops.

G8CIX on the Fourth Plinth

The video showing Martin Maynard, G8CIX promoting amateur radio from the 4th Plinth in Trafalgar Square can be seen on the web at www.GB1AO.co.uk

The Fourth Plinth is part of a major living monument created by sculptor Antony Gormley. Martin, G8CIX was allocated a slot on the plinth between 16.00 and 17.00 on Friday 25th September during which

he operated GB1AO using Icom radio equipment.

==========
NEWS FROM ARNEWSLINE

THE BPL WAR: EXPERIMENTAL BPL SYSTEM COMING TO SAN DIEGO CA.

BPL Internet access is raising its head in Southern California. This with word that the FCC has granted a Special Temporary Authorization and the

callsign WD9XZG to PCN Technology Inc.. This to permit the company to provide a Broadband on Power Lines communication demonstration in the San Diego area. The STA is good from this past September 23rd and expires on January 30th of 2010. It permits PCN Technology the right to operate a

limited BPL Internet access system from 3 to 30 MHz including any ham radio bands that might be affected. The FCC says that this Special Temporary

Authorization is granted upon the express condition that it may be terminated by the Commission at any time without prior notice to PCN Technology Inc. or anyone using the experimental system for Internet access. Hams in and around the San Diego area will want to keep their eyes on their S-meters and ears on background noise to see what if any impact this BPL system might have on their ability to communicate. (CGC, FCC)

THE BPL WAR: RSGB MAY SUE OVER BPL POWER LINE ADAPTERS

The battle over the use of data transfer Power Line Adapters in the UK looks set to escalate. This, with a threat of legal proceedings looming by that nations national amateur radio society.

Power Line Adapters are a BPL distribution system that use the AC power

mains power to supply broadband communications around a house or building,. Unfortunately they also cause severe interference to the HF

Radio Spectrum over a wide area of up to 300 meters.

The Radio Society of Great Britain has been fighting against the introduction of this technology. It now appears ready to mount a legal challenge over the UK telecommunications regulator Ofcom's position allowing the use of these devices to be widely used.

And in a position statement made public on Wednesday, September 30th the RSGG is quoted as saying that it continues to find Ofcom's responses and position regarding Power Line Adapters as being totally unacceptable. As such the national society has recently instructed its lawyers to investigate a legal challenge on the Ofcom position.

NEW HIGH EFFICIENCY SOLAR CELLS DEVELOPED

Turning to the emerging technology page, an Electronics Weekly article reports that Belgian researchers have taken another step towards creating a new generation of mechanically-stacked triple junction solar cells. These new cells are expected to eventually become the most efficient available.

According to the article in a triple junction cell, each junction is tuned to absorb a different part of the solar spectrum, with the upper layers

designed to be transparent to wavelengths absorbed in the lower layers. This is similar to the way many colour films were made prior to the advent of digital photography. The researchers say that this broad coverage of the spectrum is why high efficiencies are obtained.

This is the first promising demonstration of this new stacking technology which is expected to produce cells with efficiencies above 40%. The complete article on this new is at

www.electronicsweekly.com/Articles/2009/09/23/47021/imec-opens-door-for-record-breaking-solar-cells.htm

TALK SHOW HOST WANTS SAT HAMS

Broadcaster Ted Randall, WB8PUM, host of the shortwave broadcast QSO Radio Show, is looking for ham radio satellite operators who are interested in talking about their personal experiences in satellite communication to contact him. He is specifically in need of someone who can take an entry level approach to explain satellites to the new and young hams listening to his weekly broadcasts. If you think you can help, please contact Ted by e-mail to tedrandall (at) kaij (dot) us. More about the QSO Radio Show is on-line at www.tedrandall.com

NEW HAM ASTRONAUT IS KF5DBF

Another astronaut has gotten her ham radio license. Mission specialist

Tracy Caldwell recently passed her amateur radio license exam and has been issued the callsign KF5DBF.

Caldwell, who is a PH.D, was born in Arcadia, California and enjoys sports, hiking, and auto maintenance.
She is scheduled to fly with Expedition 23 in April 2010.

League, and Korea Ladies Amateur Radio Club with support by Ministry of
Korea Communication Commission, Korea Tourism Cooperation. City of Seoul.

INTRUDER WATCH - ENFORCEMENT ZONE

Carl, N4AA, editor of "QRZ DX, sent out the following press release:

"Hello DXers:

This is a SPECIAL BULLETIN and the following will reveal why.

I have been contacted by a person (who I will NOT name) who has the capability to pin point (very accurately) the source of an on the air signal. What I am saying is ï¿½ this person has the professional equipment and the expertise to monitor a signal on the ham bands and determine to a very narrow area where that signal is coming from.

Apparently there is a pirate on 10114 signing FT5GA.

That signal was NOT coming from Glorioso, it was coming from QUEBEC in CANADA, NNE of Montreal.

On two other days pirate signals were monitored signing FT5GA, one was coming from LATVIA and the other from the SOUTH COAST OF SICILY.

These pirates should be relatively easy for 'local' DXers to find. They need to be specifically identified and pressure brought to bear on them to cease their deliberate and illegal activities.

The 'source' that I mentioned above will continue to provide periodic reports like this, and I will continue to publish the locations of these irresponsible persons. I ask for those within the areas identified pay particular attention and use whatever means are available to them to put a stop to these activities.

Your cooperation with the identification of these pirates will be appreciated by all of us."

(Tnx: ARRL Bulletin)

BBC Radio 4 - Wireless Interference

The BBC Radio 4 show Click On, first broadcast on Monday Oct 5, and now on the web, featured an item on interference to Wi-Fi Networks from household appliances

Click On describes the item as:

Household appliances such as cordless phones and baby monitors can interfere with home networks. Adrian Wagstaffe, author of an OFCOM report about wireless congestion, helps Simon solve his home wireless problems.

Click On Series 5 Episode 1 can be heard at
http://www.bbc.co.uk/programmes/b00n0qr6

The Wireless Interference item starts 10 minutes into the show.

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Wi-Fi signals used to see through walls

Monday's edition of the UK Telegraph reports that scientists at the University of Utah in the United States have found a way to harness Wi-Fi signals to 'see' through solid walls.

The researchers say that the variation of radio signals in a wireless network can reveal the movements of people behind closed doors or even a wall.

Joey Wilson and Neal Patwari, from the University of Utah, have used the principle of variance-based radio tomographic imaging. The system works by measuring interference between the nodes of wireless devices. If someone passes through that field, the device registers a change in the levels of resistance, and feeds that information back to a computer.

The system can currently see about three feet through a wall, and is so far only capable of sensing motion. At this stage, it is not sophisticated enough to generate an actual image of what lies beyond the wall, but the research team is confident that this feature could be developed in time.

You can read the full article 'Wi-Fi signals used to see through walls' at:

http://www.telegraph.co.uk/technology/news/6254646/Wi-Fi-signals-used-to-see-through-walls.html

Amateur Radio Magazine Previews
October 2009

Amateur Radio for October is already out. Look for the Scout on the cover, talking to her mates on her hand-held. And that is because the Scouts and Guides will be holding their annual Jamboree on the Air (JOTA) Friday 16 till Sunday 18 here in VK.

JOTA will involve around half a million Scouts and Guides. It will also involve many of the adult amateur fraternity, who give hundreds of hours of support to JOTA every year. One of these is Bob Bristow VK6POP, who we heard from earlier in this newscast, well VK6POP writes on page 22 to tell everyone how they can become involved. Foundation Licence holders, too. And don't miss the promotion picture inside the front cover.

For a while now, we have been aiming to get the magazine to you by the first of every month, and you will have noticed that we are hitting that target, plus or minus a day or two, on a regular basis.

Check out page 1 for a special article on the WIA Centenary. President Michael Owen VK3KI explains the plans for nation-wide celebrations by Radio Clubs next year. Look for the special Centenary logo - something you will see a lot of during 2010. And note the unique callsign, VK100WIA. Then turn to page 8 for more on the Centenary - history, logo design and special merchandise. The Centenary polo shirt is pictured. WIA has a dedicated Committee working to make all this happen.

For the older generation of amateur radio operators, who can remember when home-brewing was common, there is an article about the HB10, a valve transceiver built in the 1950s. The article (and the transceiver) are by Bruce Kidgell VK3BMK who recently resurrected and lovingly restored this 50 year-old veteran. On page 4, read about what it took to find and fix the glitches - strictly hardware, no software here!

The Hamads are a free service to WIA members that has been provided by Amateur Radio for decades. You will still find them presented near the back of the magazine but what has changed is the lodgement method. Check the new details on page 54 - one of several improvements that your Publications Committee is gradually introducing to the magazine.

Read the inspiring article by Mike Charteris VK4QS on page 12. Mike looks back as well as forward, convinced that gaining his Amateur Operator's Licence was the best thing that ever happened to him. He wonders if a system of on-air mentors might be a good way to spread technical know-how, and the love of it that he has enjoyed.

Don't forget the regular columns presented every month by Amateur Radio. They are all written by experts in their fields and keep you up-to-date on your special interest.
For example, Contests are covered on page 41, DX News & Views on page 44 and an interesting article on AMSAT (satellites) at page 49.
And there is news from all the Clubs around Australia.

North West Tas. Amateur Television Group 2 Meter Repeater VK7RTV now operational.

The Club is proud to announce that it's 2 Metre Repeater VK7RTV on 146.775 located at it's Gawler Site was commissioned on Monday 21st. September.

Please note that the repeater does not have a conventional control unit at this time. For the moment it has software enabled time out and automatic ID beaconing every 10 Minutes.

IRLP Node 6616 has been switched on to the repeater and appears to be functioning OK.

CALLING FREQUENCIES
Please QSY off the calling frequency after establishing communication.

Australian voice calling frequencies:
3.650, 7.090, 14.190, 21.190, 28.590, 52.160

World CW calling frequencies:
3.570, 7.030, 14.060, 18.080, 21.140, 24.910, 28.180, 50.160

World voice calling frequencies:
3.690 & 3.940 MHz, 7.090 & 7.190, 14.290, 18.140, 21.360,
24.960, 28.390, 50.160

Calling frequencies for Slow Scan TV (SSTV):
3.630, 7.033, 14.227

Calling Frequencies for PSK31
14.070

Mackay Amateur radio assoc will be operating in JOTA from Rowellan Park
scout Grounds with call sign VK4SMK ON SATURDAY only 17th October

JOTA/JOTI Weekend

The NWT-ATV Group at this stage plan to hold Camps at Burnie Scout Hall,
Paton Park, Ulverstone and Camp Boomerang Port Sorrel.

It is planned to operate on RF and IRLP Nodes 6616 / EchoIRLP 467772 and
IRLP Node 6124.

EchoIRLP 152375 will be linked to the Repeaters throughout the activities.

It is planned to demonstrate to the scouts and cubs the aprs beaconing &
mapping of shipping movements between Tasmania and mainland VK by Jim VK7JH.

Promotion and education of Amateur Radio will be a feature at the camps this
year with educational kits made available to the scouting fraternity.

(Tony VK7AX, News Officer NWT-ATV Group)

AO-51 configuration to support Scouting JOTA

AMSAT-NA is supporting the 52nd Jamboree on the Air (JOTA) Scouting event by
dedicating AO-51 operation to the event.

For October 17th and 18th, the AO-51 QRP repeater will be allocated for
JOTA use. All users are requested to give way to JOTA stations or QSOs with
JOTA stations.

The frequencies used for this weekend will be 145.880 FM uplink, and
435.150 FM downlink, no PL tone required. The mode change should occur at
00:00 UTC on the 17th and run for approximately 48 hours.

AMSAT wishes the Scouts good luck operating via the AO-51 satellite for the
event.

Reports of your JOTA operations should be sent to the AMSAT-BB or directly to
ko4ma@amsat.org.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES ALL REGIONS
21.360 - 18.160 - 14.300 - 7.060 - 3.760 MHz.
REGION 2 TRY ALSO 3.985 - 7.240 - 7.290

WICEN Tasmania (South) will be providing comms on October 16-18 for the St Helens endurance ride checkpoints.

Base is at St Helens Sports Complex with checkpoints between Goshen and Taylors Beach (Bay of Fires)

Ride starts 07:00 Saturday. Survey and set up Friday 14:00.

Hopefully, this will be a dress rehearsal for the Tom Quilty Gold Cup national championships in 2012.

Hope to also set up an HF JOTA station.

==> + REGULATORY: COUNTERPART BILL TO HR 2160 INTRODUCED IN SENATE

On Tuesday, October 6, Senator Joe Lieberman (ID-CT), along with
Senator Susan Collins (R-ME), introduced Senate Bill 1755
<http://www.arrl.org/news/files/SenateBill1755.pdf>, The Amateur Radio
Emergency Communications Enhancement Act of 2009. Similar to HR 2160
<http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&doc
id=f:h2160ih.txt.pdf>
-- also called The Amateur Radio Emergency Communications Enhancement
Act of 2009 -- that was introduced
```

<http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1> this past April by Representative Sheila Jackson-Lee (D-TX-18), the bill, if passed, would direct the Department of Homeland Security (DHS <http://www.dhs.gov/index.shtm>) to undertake a study on emergency communications. S 1755 points out that "There is a strong Federal interest in the effective performance of Amateur Radio Service stations, and that performance must be given -- (A) support at all levels of government; and (B) protection against unreasonable regulation and impediments to the provision of the valuable communications provided by such stations."

"We are delighted to have the sponsorship of both the Chairman and the Ranking Member of the Homeland Security and Governmental Affairs Committee <http://hsgac.senate.gov/public/>, and especially to have the support of Senator Lieberman from the ARRL's home state," said ARRL Chief Executive Officer David Sumner, K1ZZ. "The bill could not have a better pedigree. Click here <http://www.arrl.org/news/stories/2009/10/07/11127/?nc=1> for more information on S 1755."

==> + FCC ENFORCEMENT: FCC FINES CALIFORNIA FIRM $4000 FOR OPERATING ON AMATEUR FREQUENCIES

On September 28, the FCC issued a Notice of Apparent Liability for Forfeiture (NAL) to a California firm that the Commission maintains was using amateur frequencies to conduct business. According to the Commission, Shimmick Construction Company, Inc/Obayashi Corporation, Joint Venture ("Shimmick-Obayashi") -- licensees of stations WQER756, WQEN793, WQJI360 and WQKG818 -- apparently repeatedly violated Section 1.903(a) of the Commission's Rules "by failing to operate only in accordance with the rules applicable to their particular service as set forth in the Commission's Rules and with a valid authorization granted by the Commission." Click here <http://www.arrl.org/news/stories/2009/10/06/11124/?nc=1> for more information.

==> EVENTS: ARRL GEARS UP FOR FOURTH ANNUAL ON-LINE AUCTION

The Fourth Annual ARRL On-Line Auction begins its preview week on Thursday, October 15. With more than 160 items up for bid -- and more being added every day -- this event promises to have something for just about everyone. The auction kicks off Thursday, October 22 and runs through Thursday, October 29 on the ARRL Web site. Proceeds from the auction benefit ARRL education programs including activities to license new hams, strengthen Amateur Radio's emergency service training, offer continuing technical and operating education, as well as create instructional materials. Click here <http://www.arrl.org/news/stories/2009/10/06/11125/?nc=1> to discover just what the ARRL Auction has in store for 2009.

==> + ARRL PUBLICATIONS: LOOK FOR THE NOVEMBER ISSUE OF QST IN YOUR MAILBOX

The November issue of QST <http://www.arrl.org/qst> is jam-packed with all sorts of news and information today's Amateur Radio operator needs. >From product reviews to construction projects to public service, the upcoming issue of QST has something for just about everyone.

A. Robert Patzlaff, W9JQT, takes a look at "The Rockless, a VFO Controlled Low Power Transceiver." In this article, Patzlaff builds on the Rock-Mite -- profiled in the April 2003 issue of QST <http://p1k.arrl.org/cgi-bin/topdf.cg?id=103934&pub=qst> -- and modifies this basic CW transceiver to work with a variable frequency oscillator. Jean-Yves Morin, VE2MHZ, presents a "Removable Car Window Antenna with Cross Over Connector." Make your go-kit ready to go for any vehicle with this no-holes mounting arrangement.

With the cold wind blowing on the long winter nights this past January, Poul-Erik Karlshoj, OZ4UN, got to wondering about the LDE <http://en.wikipedia.org/wiki/LDE>s he encountered while QSOing with a Spanish amateur. Read about his experience in "Observation of Long Delayed Echoes on 80 Meters." ARRL Education Project Coordinator Mark Spencer, WA8SME, describes the newest program in the Teachers Institute on Wireless Technology in his article, "The 2009 Teachers Institute Introduces Advanced Satellite Workshop."

ARRL Contest Branch Manager Sean Kutzko, KX9X, in his column "This Month in Contesting," discusses the "crown jewel" of W/VE contesting -- the ARRL November Sweepstakes! And now that the 2009-2010 Contest Season is in full swing, catch up on all the upcoming contest activity with this month's "Contest Corral."

If you read last week's ARRL Letter <http://www.arrl.org/arrlletter/index.html?issue=2009-10-01>, you saw the video <http://www.youtube.com/watch?v=R6N2jgzlbIk> featuring ARRL Test Engineer Bob Allison, WB1GCM introduce the ICOM IC-7600 HF and 6 meter transceiver. Now is your chance to get up close and personal with this rig. NCJ <http://www.arrl.org/ncj> Managing Editor Rick Lindquist, WW3DE (ex-N1RL), reviews the 7600, calling it "a superb synthesis of ICOM's popular PROIII and the IC-7700/7800 transceivers, both in styles, features and capability. Another winner!" Allison also provides an update to October's Product Review, the FlexRadio FLEX-3000.

Of course, the November issue includes the variety of columns you know and love: "Happenings," "Hints & Kinks," "The Doctor Is IN," "How's DX," "Eclectic Technology," "World Above 50 MHz," "Hamspeak" and more. Look for your November issue to arrive soon. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership <http://www.arrl.org/join>. To join or renew your ARRL membership, please visit the ARRL Web page <http://www.arrl.org/join>.

==> + INTERNATIONAL: OLDEST NATIONAL AMATEUR RADIO SOCIETY MARKS 100TH ANNIVERSARY

In 2010, the Wireless Institute of Australia (WIA) -- the oldest national Amateur Radio society -- will celebrate its 100th anniversary. On March 11, 1910, the WIA had its beginnings when a group of wireless pioneers gathered at the Hotel Australia, Martin Place in Sydney. These early hams wanted to protect their interests and rights against what they considered to be harsh treatment by authorities -- and a high license fee. Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit." From that meeting, the Institute of Wireless Telegraphy of Australia -- later, the WIA -- was formed. Since its founding, the WIA has continued to protect and enhance the privileges of radio amateurs and to promote Amateur Radio in Australia and beyond. Click here <http://www.arrl.org/news/stories/2009/10/06/11121/?nc=1> for more information on the WIA's centennial celebration.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment <http://www.arrl.org/news/features/2009/10/02/11109/?nc=1> covers the month of September.

==> DID YOU KNOW?

Did you know that the K3LR Multi-Multi Team <http://www.k3lr.com/> consumes more than 200 cups of coffee during a 48 hour contest?

==> + ARRL FIELD ORGANIZATION: 2009 SECTION MANAGERS WORKSHOP: A LEARNING EXPERIENCE

The Annual Section Manager (SM) Workshop -- held September 25-27 --

afforded 12 newly elected SMs (including three who began their first terms of office October 1) to visit ARRL Headquarters. During the extended weekend gathering, participants not only got to meet many Headquarters staff members, but also learned some of the ins and outs of how to be effective Section leaders and administrators. The primary purposes of the Workshop sessions were to share ideas and to provide basic administrative, management, leadership and motivational training. Click here <http://www.arrl.org/news/stories/2009/10/05/11119/?nc=1> for more information on the 2009 ARRL Section Managers workshop.

==> + AMATEUR RADIO AND SCOUTING: SCOUTING JAMBOREE ON THE AIR (JOTA)

<http://www.youtube.com/watch?v=OQIHdml8inU> October 17 and 18 will mark the 52nd worldwide Scouting Jamboree on the Air (JOTA). Held the third full weekend in October each year, this is the premier operating event for Amateur Radio and Scouting around the world. Click here <http://www.arrl.org/news/stories/2009/10/07/11122/> to join QEX Editor and Staff Liaison to the ARRL Ad Hoc Committee on Scouting Larry Wolfgang, WR1B, to find out ways to interest youth in Amateur Radio.

==> SOLAR UPDATE

Tad "Like the bright spots that move about the Sun
<http://www.bartleby.com/126/12.html>" Cook, K7RA, this week reports:
Sweet memories of the 11-day run of sunspots toward the end of last
month are fading, and so far, the days of zero sunspots are at six,
with the last sunspot seen on October 1. A peek at the latest STEREO
images <http://stereo.gsfc.nasa.gov/> shows two active areas in our
Sun's southern hemisphere beyond our direct view, but it is hard to
tell if these will emerge as sunspots when they appear over the eastern
limb. A rough guess has the first one possibly emerging around October
10, with the second around a week later. Currently, the solar flux
forecast shows flux values lower then 70 through October 15, then
around 72 during the two-week period from October 16-30. The same
NOAA/USAF forecast predicts the same very quiet geomagnetic conditions
that we've seen for some time, with planetary A index around 5. Two
very small increases are predicted for October 11-12 -- with an A index
of 7 -- and October 24-25, with the A index at 8. Average sunspot
numbers for the week dropped 15.3 points below the September 24-30
period, and the average daily solar flux for the week declined 2.2
points to 70.5. We'll also go over some e-mail about propagation via
ground fog -- mentioned in last week's bulletin -- in the Solar Update,
available on the ARRL Web site on Friday, October 9. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/tis/info/propagation.html>. This week's "Tad
Cookism" brought to you by John Keats' To My Brother George
<http://www.bartleby.com/126/12.html>.

==> THIS WEEK ON THE RADIO

This week, the ARRL EME Contest
<http://www.arrl.org/contests/rules/2009/eme.html> is October 10-11.
There's an NCCC Sprint October 9 and the YLRL DX/NA YL Anniversary
Contest is October 9-11. The 10-10 International 10-10 Day Sprint and
the FISTS Fall Sprint are both October 10. On October 10-11, check out
the Pennsylvania QSO Party, the Arizona QSO Party and the Oceania DX
Contest (CW). The North American Sprint (RTTY), the SKCC Weekend Sprint
and the UBA ON Contest (SSB) are October 11. The NAQCC Straight Key/Bug
Sprint is October 14. Next week, look for the ARRL School Club Roundup
<http://www.arrl.org/SCR/> October 19-23. There's another NCCC Sprint
October 16. The Iowa QSO Party, the Feld Hell Sprint and the Microwave
Fall Sprint are October 17. On October 17-18, check out the New York
QSO Party, JARTS WW RTTY Contest, the Stew Perry Topband Challenge, the
Worked All Germany Contest and the W/VE Islands QSO Party. The Illinois
QSO Party is October 18-19 and the Run for the Bacon QRP Contest is
October 19. All dates, unless otherwise stated, are UTC. See the ARRL
Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest
Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Station Web page
<http://www.arrl.org/contests/spev.html>.

==> + ARRL RECOGNIZES: PAUL DANZER, N1II, WINS SEPTEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for September is Paul Danzer, N1II, for his article "A Simple Transformer to Measure Your Antenna Current." Congratulations, Paul! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the October issue by Saturday, October 31.

==> OPERATING: HAMS FACE NEW RULES ON ONTARIO ROADWAYS

The Ministry of Transportation in Ontario, Canada announced on September 30 that Bill 118 <http://www.ontla.on.ca/bills/bills-files/39_Parliament/Session1/b118ra.pdf> concerning distracted driving will take effect on October 26, 2009. According to Radio Amateurs of Canada (RAC <http://www.rac.ca/>) Vice President for Public Relations Peter West, VE3HG, the new law makes it illegal for drivers to talk, text, type, dial or e-mail using handheld cell phones and other handheld communications and entertainment devices. Following a three-month period that begins October 26 where the focus will be on educating drivers, police will start issuing tickets on February 1, 2010 <http://news.ontario.ca/mto/en/2009/09/ban-on-hand-held-devices-starts-in-october.html>.
"All two-way radios in all vehicles -- with the exception of emergency responding vehicles -- must be hands-free in three years' time," he posted on the RAC's blog <http://racblog.wordpress.com/2009/09/30/new-rules-on-ontario-roadways/>.
"This news comes from the official government staffer who has been in communications with Radio Amateurs of Canada over the last year. At the end of the three-year exemption, all commercial, CB and Amateur Radio equipment used in moving vehicles by the vehicle operator must be hands-free in operation."

==> OPERATING: WEBINAR ON REMOTE CONTROL OPERATING PLANNED

With the growing limits imposed on hams due to antenna restrictions, interest is growing in operating amateur stations by remote control. With that in mind, Bob Arnold, N2JEU, one of the pioneers of Internet remote station control, is organizing an Internet-based live conference, or webinar, on the topic. The conference would feature a guest panel comprised of amateurs currently involved in remote operations, both at the operating and software levels. Interested hams could listen to the live audio stream and could ask questions via "text chat." Since he is presently organizing resources for this online event, Arnold is looking for feedback on what topics listeners would like to see addressed. He is also looking for information from people currently operating online remote stations. There is still room on the guest panel for additional participants. Authors of software that make remote operation possible are also asked to respond. If you would like

to participate either as a guest or a listener, please contact Arnold via e-mail <n2jeu@ralabs.com> or visit this Web site <http://www.n2jeu.net/> for any additional information on the conference as it becomes available.

==> OPERATING: ANGOLA OPERATION APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that the current Angola operation -- D2QMN -- has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk and you will be placed on the list for update," Moore said.

==> + AMATEUR RADIO IN SPACE: ASTRONAUT FERNANDO "FRANK" CALDEIRO, KE4RFI (SK)

NASA Astronaut Fernando "Frank" Caldeiro, KE4RFI, passed away on October 3 after a more than two year battle with a brain tumor. He was 51. Caldeiro was a member of the Astronaut Class of 1996 and most recently was assigned to the WB-57 High Altitude Research Program within the Aircraft Operations Division at Ellington Field in Houston. In that role, he directed the integration and conducted the operation of high-altitude atmospheric research experiments carried on board the NASA WB-57 aircraft. "Frank was a valued member of the astronaut corps and the Flight Crew Operations team," said NASA's Director of Flight Crew Operations Brent Jett. "He provided a wealth of experience and made significant contributions to the success of both the WB-57 project and the space shuttle program. He will be missed by all those who knew him at NASA. Our hearts go out to his family." Caldeiro was born in Buenos Aires, Argentina, but he considered New York City and Merritt Island, Florida, to be his hometowns. He is survived by his wife, the former Donna Marie Emero of Huntington Beach, California, and two daughters.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

<http://www.arrl.org/cep/student/>Registration remains open through Sunday, October 25, 2009, for these online course sessions beginning on Friday, November 6, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CCE Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1678 - October 9 2009

Amateur Radio Newsline report number 1678 with a release date of
Friday, October 9th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. The rare call 4U1UN will come back on the
air for one week only this month with an all star cast at the mics and
keys. Also, ham radio assists in the wake of the Sumatra earthquake,
hams are safe on American Samoa following a Tsunami, a California
concrete hauling company faces a fine for operating in the two meter
ham band and a popular hamfest returns after an absence of 13 years.
Find out the details on Amateur Radio Newsline(tm) report number 1678
coming your way right now.

RADIO CELEBRATION: 4U1UN ACTIVITY WEEK FROM NYC

4U1UN, the United Nations Headquarters station in New York City will
make a rare appearance on the air from October 19th to the 25th .
This, with an all star line-up of top gun DX'ers and contester's at the
controls of the famed station. Amateur Radio Newsline's Norm Seeley,
KI7UP, has the details:

--

The list of operators reads like a whose who in the worlds of
contesting and DX'ing. Names like Marti Laine, OH2BH, from
Finland,.Roger Western, G3SXW from the U-K. Kaz Watanabe, JK3GAD from
Japan and Gene Schumat, UA9AB, from Asiatic Russia, to mention only a
few. In all there will be about two dozen of the best of the best
bringing 4U1UN to life in celebration of 4U1UN Activity Week.

For those not aware, 4U1UN may be geographically located on Manhattan's
East side but as far as ham radio is concerned it is considered a DXCC
entity unto itself. It became rather rare after 911 when new security
measures were put in place. As a result its not often that 4U1UN takes
to the airwaves. In fact it has to be a special event such as this to
bring the station on. This is one of those rare occasions but as the
operators note security access to the building is heavily restricted.
None the less, the team says that it will do its best to make this rare
station available to all.

As to an operating schedule. Its going to be restricted to 12"00 to 04:00 UTC each day. That translates into 8 a.m. to midnight Eastern Daylight Time. All-night activity is planned for Friday the 23rd and Saturday the 24th of October. The 24th is United Nations Day.

Logs for 4U1UN will be uploaded to Logbook to the World after the operation is completed. All QSL requests go via HB9BOU.

And I'm Norm Seeley, KI7UP, in Scottsdale, Arizona, reporting for the Amateur Radio Newsline.

--

In addition to the commemorative 4U1UN operation several of the team members will participate in the CQ World-Wide SSB Contest. They will be entering in the Two Transmitter or M2 category.

And this final note. Keep an ear open for the callsign 4U64UN to be active until mid-November. It will be on to celebrate the 64th annual UN General Assembly.

(NQ2G / LA5IIA, OH2BN, Southgate)

BREAKING DX NEWS: MIDWAY ISLAND COMES ON THE AIR

And some late breaking DX news. A multi-national team of 18 operators will activate Midway Island at about the time this newscast goes on the air and is expected to continue through October 19th. They are signing K4M and will operate from Sand Island.

The U.S. Fish & Wildlife Service has authorized this amateur radio operation from this rare U.S. entity for only a 10 day period. This is the first amateur radio activity from Midway in almost 10 years. Midway Island ranks number 24 world-wide and number 13 in Europe on the DX Magazine's "Most Wanted List".

We will have more DX news later on in this weeks Amateur Radio Newsline report. (OPDX)

**

RADIO LAW: SENATE BILL INTRODUCED TO STUDY HAM RADIO EMCOMM

A companion bill to the Amateur Radio Emergency Communications Enhancement Act of 2009 was introduced in the U.S. Senate on Tuesday, October 6 by Connecticut Democrat Joe Lieberman and Maine Republican Susan Collins.

Titled Senate Bill 1755, it carries the same name as the House measure introduced this past April by Representative Sheila Jackson-Lee. The bill, if passed, would direct the Department of Homeland Security to undertake a study on emergency communications with an emphasis on the role that ham radio operators play.

S 1755 points out that "There is a strong Federal interest in the effective performance of Amateur Radio Service stations, and that performance must be given support at all levels of government; and protection against unreasonable regulation and impediments to the provision of the valuable communications provided by such stations.

Introduction of S 1755 is the result of many months of groundwork laid by the American Radio Relay League and appears to be directly based on the basis and purpose of the service. This as outlined in Section 97.1 of the FCC rules. (ARRL)

RESCUE RADIO: HAMS HELP IN THE AFTERMATH OF WEST SUMATRA QUAKE

A number of amateur radio stations are reportedly assisting in the aftermath of the earthquake in Western Sumatra. According to information supplied to the Southgate news, station YB5ZA is located in the Governor's office of West Sumatra province, and is operational in support of the disaster management command post. Its said to be are operating on 7.0650 MHz on 40 meters as well as on 145.500 MHz FM simplex. YB5ZA is reportedly also supporting a 2 meter repeater on the 146.260 in and 146.860 MHz out channel pair.

Another station involved in relief efforts is YB5ZDD. It is on the air using 7.065 MHz on SSB from the airport in Padang City. Lastly, YB1TY has established an iQSO gateway via iqso.orari.net to handle messaging related to disaster relief. All of these operations and possibly others are expected to be operational for some time. (Southgate, Various)

**

RESCUE RADIO: HAMS SURVIVE KH8 TSUNAMI

And some good news about several hams living on American Samoa. Lee Wical, KH6BZF, in Hawaii has informed the Ohio Penn DX Newsletter that American Samoa Amateur Radio Association President Larry Gandy, AH8LG, his wife Uti, KH8FO and their family are safe and sound. This, after the tsunami that hit a week ago.

Larry is currently on solar power as the island power is spotty at best. Also, his shop in Pago Pago harbor did sustain some damage.

KH6BZF adds that KH8AA is reportedly safe as well. (KH6BZF)

**

RESTRUCTIRING: CANADIAN HAMS TO SHARE WITH MILITARY SYSTEM ON 70 CM

Industry Canada has informed Radio Amateurs of Canada that it has authorized the Department of National Defense to use a digital system called Enhanced Position Location Reporting System or EPLRS in the 430 to 450 MHz shared 70 centimeter band. The EPLRS system consists of mobile, fixed, transportable and airborne stations that use 5 MHz-wide

spread spectrum channels to provide strategic telemetry information for military platforms.

This authorization is on a no-protection, non-interference basis, which means that no new restrictions will be imposed on Canadian amateur operations in this band as a result. Industry Canada says that there is a slight chance of minor interference to amateur radio systems. Typically in the form of a minor audible clicking noise. If Canadian amateurs encounter such interference, they are requested to report it by e-mail to Radio Amateurs of Canada at regulatory at rac dot ca. The information reported should include the geographical location, date, time, frequency and mode being used by the amateur station, and a description of the interference. (RAC)

**

RADIO RULES: ONTARIO CANADA ENACTS HANDFREE RULES THAT WILL IMPACT HAMS

If you are a ham living in the Canadian Province of Ontario, or planning to visit, listen up. On Wednesday, September 30th the Ontario Ministry of Transportation in announced that Bill 118 that bans several distractions while operating a motor vehicle in the Province will take effect on October 26, 2009.

According to Radio Amateurs of Canada, the new law makes it a violation for drivers to talk, text, type, dial or e-mail using handheld cell phones or any other handheld communications or entertainment devices. Following a three-month educational period police will start issuing tickets on February 1, 2010.

The new law does directly impact ham radio mobile operations although not immediately. Posting to the Radio Amateurs of Canada blog page, Vice President for Public Relations Peter West, VE3HG, noted that all two-way radios in all vehicles must be hands-free in three years time. The only permanent exception is for emergency response vehicles. At the end of the three-year interim exemption, all commercial, CB and Amateur Radio equipment used in moving vehicles by the vehicle operator must be set up for hands-free operation. (RAC)

**

ENFORCEMENT: CALIFORNIA STATION FINED $5000 FOR AIRING WRONG EAS

The FCC has proposed a $5000 fine against a California religious broadcaster who inadvertently sent out the wrong message during a designated test. This, even though the station is a volunteer in the EAS program. Bruce Tennant, K6PZW, has the details:

--

The Notice of Apparent Liability for Forfeiture was issued to Calvary Chapel of Costa Mesa, Inc., licensee of FM radio station KWVE in San Clemente, California. KWVE is a Local Primary or LP station designated to initiate the transmission of Emergency Activation System tests and alerts in several counties.

On October 19, 2008 the Commission's Enforcement Bureau says that it received a complaint alleging that KWVE transmitted commercial programming and an advertisement as part of an EAS test message. This in turn caused the programming and advertisement to be retransmitted by other broadcast stations and cable systems in the area.

On August 27, 2009, the FCC Spectrum Enforcement Division issued a letter of inquiry to the Calvary Chapel directing it to respond to the allegations against station KWVE. On September 9th Calvary Chapel did so and admitted that the incident had occurred. It called it a simple mistake caused by an employee who intended to run a scheduled weekly EAS test instead ran an unscheduled Required Monthly Test or RMT instead. It also admitted that the board operator failed to transmit the End of Message or EOM code and the message advising that the test had been concluded. Calvary Chapel categorized the incident as solely an operator error and did not constitute a willful or repeated violation under the of the Commissions Rules

But the FCC disagrees. It says KWVE is charged with the responsibility of knowing and complying with the terms of its authorization, of the Communications Act and the FCC Rules. This includes the required procedures for conducting EAS tests. Moreover, the Commission has long held that licensees are responsible for the acts and omission of their employees and independent contractors. As such it has consistently refused to excuse licensees from forfeiture penalties where the actions of employees or independent contractors have resulted in violations.

Calvary Chapel of Costa Mesa was given the usual 30 days to pay the fine or to file an appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

But that's not where this enforcement case ends. The CGC Communicator newsletter notes that a number of prominent people in the EAS community have stepped forward with plans to tell the FCC that they believe that the fine is inappropriate. These experts note that In short they note that Local Primary stations volunteer their services to the nation, and

some of them are beginning to ask if its worth the added responsibility of being an Local Primary if they, too, will be subject to fines for occasional slip-ups. (FCC, CGC)

**

ENFORCEMENT: A CONCRETE FINE FOR OPERATING IN THE 2M HAM BAND

A California firm has been issued a proposed $4000 fine for operating on amateur radio frequencies. This as the FCC issues a Notice of Apparent Liability for Forfeiture to the Shimmick Construction Company Inc. after being caught operating a dispatch service in the 2 meter band.

In late May the FCC's Los Angeles office received several complaints that a Yorba Linda, California, concrete delivery company was operating numerous mobile stations in on 146.025 MHz. On May 26th, an agent used direction finding gear to locate the source of the transmissions that were not identified by call sign.

On May 27th the agent visited the site and spoke with the supervisor of the on-site concrete plant. The supervisor allowed the agent to inspect several of the handheld radios in use at the site where it was found that a number of portable transceivers were programmed to 146.025 MHz.

In its follow-up investigation the FCC determined that the two companies had formed the joint venture called Shimmick-Obayashi -- Shimmick Construction Inc and Obayashi Corporation and that both were Commission licensees. However none of these licenses permitted operation in any ham radio band. As a result, a proposed $4000 has been issued to the twin companies which has the usual 30 days to pay or to file an appeal. (FCC)

**

THE SOCIAL SCENE: THE NEW ORLEANS HAMFEST IS BACK

A popular hamfest that's been missing in action for several years has made a triumphant return. The place is New Orleans and Don Wilbanks, AE5DW, was there;

--

Saturday, October 3rd saw the return of something New Orleans radio amateurs had not experienced in 13 years& a New Orleans hamfest. The last New Orleans hamfest was held in November of 1996 and, for many reasons, didn't return until 2009.

By all accounts, the hams of the Crescent City were ready and the fest was an unqualified sucess. Keith Barnes, W5KB, president of the Jefferson Amateur Radio Club who, in association with the Delta DX Association and the New Orleans Amateur Radio Club sponsored the event, says there were many positive comments about all aspects of the fest

from the venue, hotel location and venders. Keith says it takes countless hours to put on the 8 hour party, but with the help of area hams it all went smoothly. Other area clubs pitched in as well. The Ozone ARC lent their prize drum and the Amateur Radio Disaster Services of Louisiana (SELCOM) provided their 146.86 repeater for talk-in.

Icom and MFJ were there showing their latest toys as well as several venders from surrounding states.

The idea of resurrecting the hamfest began several years ago by one the original committee members of the original New Orleans Hamfest which was called AMACOM, the New Orleans Ham and Computer Festival.

Seldon Ohlsson W5LMR had often brought up reprising the fest and for whatever reason it was not done. After moving back into the Jefferson Amateur Radio Club House this last January, after having renovated it post Katrina, (Katrina's flood waters destroyed everything that the club had owned) the idea of resurrecting and co-sponsoring a Hamfest for New Orleans was brought up again. The membership said yes. It was a sometimes bumpy road, but on Saturday, October 3, the dream was realized.

Sadly, W5LMR became a silent key a few years ago. While he didn't live to see his dream realized, I know he was there in spirit and would have been the first to pitch in and help.

I was there and I had a great time! Here's to many more hamfests in the great city of New Orleans!

>From 50 miles up the road in Picayune , Mississippi, Don Wilbanks, AE5DW for the Amateur Radio Newsline.

--

The bottom line. Hams in the New Orleans area were happy to see this hamfest return. (AE5DW)

**

PUBLIC SERVICE: D-STAR REPLACES PACKET AT MEDTRONIC MARATHON

D-Star text messaging has now replaced packet radio in the Minneapolis and Sait Paul, Minnesota, Medtronic Twin Cities Marathon. This after another flawless operation with the new mode in 2009.

According to the amateur radio team supporting the event, five Icom D-Star RP-1D access points installed on Twin Cities building rooftops have proven to be 100% reliable. This included the unusually warm 2007 race where more than 50 runners were sent to area hospitals.

Team member Erik Westgard, NY9D, say that Packet radio's low data rate, complexity of the character mode interface, and user training issues have put that aging mode on the back burner. Westhgard noted that using D-Star messaging means that any available operator can use

the groups web based missing runner application. This means that they can be helping family members far more quickly.

In 2010 look for an expansion of D-Star in this event. This, as the support team hopes to begin phasing in D-Star digital voice. This they say will allow the concurrent use of low speed data messaging as well as voice contacts. (WB9QZB)

**

PUBLIC SERVICE: EDUCATIONAL CONTACT USES D-STAR INTERNATIONAL LINK

D-Star has been used for a transatlantic hookup between students in two schools separated by about 8000 miles. This as pupils at St. Marys Catholic School in Kent in the United Kingdom got the chance to speak with their counterparts at St, Marys Catholic School in Temple, Texas via a D-Star based ham radio link-up.

The contact took place on Tuesday, October 5th. The students at both schools had prepared questions to ask each other. This included such diverse subjects as sports, television, classroom subjects and culture. They were also treated to presentations at before the contact to learn more about what amateur radio is.

Brian Joyner, G8ZYZ, and Catherine Block, M1CVF, handled the duties in the United Kingdom using the services of the GB7FK D-Star repeater in Kent. Steve Bosshard, NU5D, and the Temple Amateur Radio took care of the technology in the Lone Star State.

Reports are that the session went flawlessly and that both sides are looking forward to the next one. (M1CMN, Southgate)

**

PUBLIC SERVICE: HAM RADIO ASSISTS THE HEAD OF THE CHARLES REGATTA

Ham radio will be providing communications for the Head of the Charles Regatta that takes place the weekend of October 16th to the 18th.

The Head of the Charles Regatta, also known as HOCR or HOTC, is a rowing race held each October on the Charles River, which separates Boston and Cambridge, Massachusetts. It is the largest 2-day regatta in the world, with more than 8,000 athletes rowing in some 1750 boats in 56 events. It also attracts about 300,000 spectators throughout Regatta weekend.

To make the event safe and successful, ham radio volunteers from around the area will be using the 145.430 Belmont and 146.820 Brookline repeaters to support the Red Cross Aid Stations. The Red Cross Health and Safety Committee will have at least eight rescue boats on the river and six aid locations on the shore.

The Head of the Charles Regatta is run by an office of 3 and approximately 1,500 volunteers. The regatta is hosted by Cambridge

Boat Club, a rowing and social club founded in 1909 that is headquartered on the Cambridge side of the river. Since 1998, the Head of the Charles Regatta's Charity Program has generated over $650,000 for its official charities, which include Access Sport America, Cambridge Community Foundation, and Community Rowing. (KC1US, Wikipedia)

SPECIAL ANNOUNCEMENT: WB6MMH MAKES ARNEWSLINE AVAILABLE ON ECHOLINK AND IRLP

If you are on EchoLink or own use repeater that's tied to the world using IRLP there is a new service. One that will permit you to listen to these weeks newscasts just by connecting to the appropriate Echolink or IRLP node.

This new service is the work of longtime friend Skip Hansen, WB6YMH, of Rancho Palos Verdes, California. According to him, if you would like to hear the current weeks Newsline report on your repeater or link it's really easy if you are on EchoLink or IRLP.

Skip says that on EchoLink just connect to the Newsline conference, node number 6397 or dial the word news on the DTMF pad. On IRLP connect to experimental node 0016 providing that access to "experimental nodes" have been enabled by the node operator. Once you do either, the server will play the news in 2 minute chunks with 10 second pauses between them to reset timeout timers and give you an opportunity to disconnect simplex nodes. Audio is stopped during the pauses so no content is lost.

Our thanks to Skip Hansen, WB6YMH, for providing this value added service. One that will permit many hams to listen to Newsline whenever they want and wherever they might be. (ARNewsline(tm))

**

NAMES IN THE NEWS: THREE SHARE NOBEL PRIZE FOR PHYSICS

The Royal Swedish Academy of Sciences has decided to share the 2009 Nobel Prize in Physics. One half will go to Charles K. Kao of Standard Telecommunication Laboratories, Harlow, in the UK, and Chinese University of Hong Kong for groundbreaking achievements concerning the

transmission of light in fibers for optical communication. The other half is being jointly awarded to Willard S. Boyle and George E. Smith, Bell Laboratories, Murray Hill, NJ, in the USA. This, for the invention of an imaging semiconductor circuit known as the CCD sensor.

In 1966, Charles Kao made a discovery that led to a breakthrough in fiber optics. He carefully calculated how to transmit light over long distances via optical glass fibers. With a fiber of purest glass it would be possible to transmit light signals over 100 kilometers, compared to only 20 meters for the fibers available in the 1960s. Kao's enthusiasm inspired other researchers to share his vision of the future potential of fiber optics. The first optical fiber was successfully fabricated just four years later, in 1970.

Meantime, in 1969 Willard Boyle and George Smith invented the first successful imaging technology using a digital sensor that they called the Charge-Coupled Device or CCD. CCD technology makes use of the photoelectric effect, as theorized by Albert Einstein and for which he was awarded the 1921 Nobel Prize. By this effect, light is transformed into electric signals. For Boyle and Smith the challenge when designing an image sensor was to gather and read out the signals in a large number of image points, pixels, in a short time. They were successful and because of this the CCD has become the digital camera's eye.

This discovery revolutionized photography, as light could now be captured electronically instead of on film . CCD technology is also used in many medical applications, including imaging the inside of the human body for both diagnostics and for microsurgery. (Adapted from Nobel Foundation release)

**

RADIO ON THE NET: QRZ.COM NOW HAS ELECTRONIC QSLING INFO

The giant QRZ dot com callsign website has expanded its callsign database. This, with added fields that take into account the emergence of electronic confirmations of on the air contacts as well as those hams who only use cards sent via the mail.

The newly added fields are Mail QSL that indicates whether this person will QSL by Postal Mail, eQSL says that a ham is using eQSL.cc, LOTW indicates whether this person uses LOTW. Another new field is IOTA which permits the insertion of an Islands on the Air designator.

Fred Lloyd, AA7BQ, who owns and manages QR.com notes that these are all user supplied items. That means if the item appears in the listing then the record reflects the member's choice. Otherwise, nothing is shown for these items. Lloyd adds that these new fields are also transmitted in the QRZ XML Logbook Data stream. For more info about logbook data, see the QRZ.com XML page. (QRZ)

**

EMERGING TECHNOLOGY: WI-FI SECURITY PAINT

The BBC News reports that researchers have created a special kind of paint which can block out wireless signals. The paint reportedly contains an aluminum-iron oxide which the inventor claims to resonates at the same frequency as wi-fi meaning the airborne data is absorbed and blocked.

Developed at the University of Tokyo, the paint could cost as little as $10 per kilogram. I t means security conscious wireless users could block their neighbors from being able to access their home network without having to set up encryption. Another possible use would be in restaurants and theaters where use of cellphones and text messaging devices has become an annoyance to others.

While paints blocking lower frequencies have been available for some time, this is the first technology to absorb frequencies transmitting in the 100 GHz range.

You can read the full BBC News story 'Anti-wi-fi paint offers security' at http://news.bbc.co.uk/1/hi/technology/8279549.stm (BBC)

**

NAMES IN THE NEWS: APPLE PASSES TWO BILLION APS DOWNLOADS

Apple Inc. says that more than 2 billion applications have been downloaded from its App Store. This, marking a milestone for the company's year-old business.

According to Apple, more than 85,000 applications are available to 50 million iPhone and iPod Touch customers worldwide. Apple also notes that more than 125,000 software designers are registered in its iPhone Developer Program. (Apple)

**

HAM RADIO IN SPACE: AMSAT-NA SUPPORTS JOTA WITH AO-51

Turning to ham radio space related news, word from AMSAT-North America says that it is supporting the 52nd Jamboree on the Air Scouting event by dedicating AO-51 operation to it.

On October 17th and 18th the AO-51 the QRP repeater will be set to crossband FM mode and allocated for the scouts to use. The mode change should occur at 00:00 UTC on the 17th and run for approximately 48 hours.

The frequencies to be used for the Jamboree weekend will be 145.880 FM uplink, and 435.150 FM Downlink. No tone access is required. All satellite users are requested to give priority to Jamboree stations and to hold QSO's with them. (KO4MA)

**

DX

In DX, word from our longtime friend John Abbruscato, W5JON, that he will be operating from the hilltop QTH overlooking the Caribbean Sea, and Marigot Bay, St. Lucia from October 20th to the 30th. He will use the call J68JA on 160 through 6 meters using an Icom IC-7000, KL-400 Amplifier into multi-band dipoles on the High Frequency bands and a 3 Element yagi on 6. The dates include the Includes CQ World Wide SSB Contest. QSL to W5JON.

A German team will operate from the Radio Club Station of Tunisian Scouts using a special callsign 3V3S between November 23rd and December 2nd. The team will install and use a Spiderbeam and verticals. Once the DXpedition has concluded the antennas will be donated to the 3V8SS club station. QSL via DL9USA. More is on-line at www.3V3S.tk.

Brian, ND3F, will be active from Barbados as 8P9SS between November 22nd and December 2nd. His operation will probably be on all bands, and he will also be in the CQWW DX CW Contest on November 28th and -29th as a Single-Op/All-Band/Low-Power entry. QSL via Logbook to the World or direct to ND3F.

K9NW will be active from Botswana as A25NW between November 23rd and December 1st. His operation is expected to include His operation is also expected to include the CQWW DX CW Contest. QSL via his home callsign as listed on QRZ.com.

F5PTM will be active from Afghanistan through December as T6YA . Listen out for him on 40, 30, 20 and 17 meters on CW only. QSL via F5OGL.

DL9USA,will be active from Comino Island between October 15th and the 22nd. Bands and modes of his activity were not provided. QSL via his home callsign.

Lastly JA1FJJ, will be active from Bhutan as A52FJJ through October 20th. Operations will be on 80 through 10 meters using SSB, RTTY and PSK31. He plans to use 500 watts into a G5RV antenna. QSL via his home callsign, direct or by the Bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE LONGEST CW MESSAGE EVER

And finally this week, an answer to the question of what was the longest Morse code message ever sent. With the answer, here's Amateur Radio Newsline's Burt Hicks, has the details:

--

The longest Morse message ever sent took place on October 26, 1864. That's when then Governor of the Territory of Nevada, James W. Nye, ordered that a telegram be sent to President Abraham Lincoln that contained the entire text of the Nevada State Constitution.

According to historians, the job of sending such a long telegram at the height of the Civil War was a challenge. This was because there was no direct wirline link from Carson City to Washington, DC. So telegrapher James H. Guild worked seven hours to transmit the message to Salt Lake City, where it was resent to Chicago, then Philadelphia, and finally to the War Department's telegraph Office in Washington. There, two days later, where a 175-page transcription was made.

The final page shows a total 16,543word count and cost $4313.27 to send. In todays dollarettes that would be $59,229 to pay for the one-way the transmission. Three days after receiving this telegram and in accordance with an Act of Congress, President Lincoln proclaimed that Nevada was admitted into the Union.

This 175-page transcription is now in the holdings of the National Archives and is on display in an exhibition entitled "BIG!" That exhibit celebrates the 75th anniversary of the National Archives by featuring big records, big events and of coarse some very big ideas.

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

The exhibition runs through January 3, 2010 in Washington, DC. It will then be sent out on a national tour. (News release)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's" only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Carlson, KQ6FM, in Reno, Nevada, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 11th October 2009

The news headlines

* RSGB EMC Committee go to the EMC UK Exhibition

* D-Star represented on the Emerging Technology Co-ordination Committee

* Power Line Communication lecture in Manchester

Visitors to the EMC UK Exhibition and Conference at Newbury in Berkshire on 13 and 14 October will be able to meet members of the RSGB EMC Committee on their stand in the main exhibition hall. The stand will feature the Society's work on interference issues and HF signal strength measurement together with demonstrations of the high level of emissions from Power Line Telecommunications systems. The event is held in the Grandstand at Newbury Racecourse. Admission to the exhibition, and to the IEEE's EMC demonstration bench sessions, is free. Tickets are available from www.emcuk.co.uk.

As D-Star and digital voice communication continues to grow and develop, it has become apparent that there is ever-increasing reliance on the Trust Servers that comprise the network infrastructure. The administration of this network within the UK is carried out by the UKIT team who came together voluntarily to take on this vital role. The RSGB now wishes to build upon the excellent work done by the team giving it a more permanent structure and, following discussions at the National Hamfest, it has been agreed that they will become part of the ETCC. Darren, G7LWT will represent the UKIT on the ETCC, while the other members will work on a corresponding basis.

There is to be a presentation by consultant Professor Paul Brown on Tuesday 13 October at 6 for 6.30pm at the Manchester Conference Centre, the Days Hotel, on Sackville Street, Manchester M1 3BB. Power line communication has been around for many years. In the early nineties it was the focus of research, undertaken in the Manchester area, to validate the concepts of digital telephony and internet service provision over electricity distribution networks. Broadband over power line, as it is often referred to today, is still the subject of ongoing research and is considered a challenging technology to integrate with existing analogue and digital wireless systems. This lecture focuses, briefly, on the history, development, marketplace and ongoing research

in digital PLC systems. Everybody is welcome to attend this free event. This event has been organised by the IET. More details at www.theiet.org.

The RSGB and Lincoln Short Wave Club would like to thank all those who made the National Hamfest a huge success. Thanks go to the back-room helpers who worked so hard from set up to break down, to the traders who filled not only the main hall but outside as well and, of course, the thousands of visitors who came along over the two days. Book next years' event in your diary now! It's 1 and 2 October 2010 at the Newark & Notts Showground, Newark NG24 2NY.

2

A severe tropical storm in The Philippines and earthquakes in Indonesia have seen radio amateurs providing emergency communications and other relief and recovery assistance. Amateur radio clubs have mobilised for the relief operations. 7.045MHz has been used for general announcements while 2m FM is used for community operations.

Artist and Filmmaker Esther Johnson is planning to use three different amateur radio clubs based in the London area to set up a radio station during an exhibition of her work on 23rd, 24th and 25th October 2009 in London. The radio stations will accompany Johnson's 16mm film TUNE IN, made in 2006, which focuses on amateur radio. Johnson will also be exhibiting photography of radio enthusiasts alongside her film work. Further information on TUNE IN can be found at www.blanchepictures.com/films/tunein.htm.

The Wireless Institute of Australia turns 100 next year, making it the world's oldest national radio society. WIA President, Michael Owen, VK3KI, says he wants the world-wide amateur radio community to join in the celebration. A commemorative QSL card will be issued for contacts with VK100WIA between May and October next year. A limited edition operating award, called the WIA Centenary Award is also to be available and two contacts with VK100WIA are required under its rules. Details of the centenary program can be found on the WIA website at www.wia.org.au.

The 52nd Scouts' Jamboree On The Air will take place on 17 and 18 October. AMSAT-NA is supporting JOTA by dedicating AO-51 operation to the event. For October 17th and 18th, the AO-51 QRP repeater will be allocated for JOTA use. All users are requested to give way to JOTA stations or QSO's with JOTA stations. The frequencies used for this weekend will be 145.880 FM uplink, and 435.150 FM downlink, no PL tone required. The mode change should occur at around 00:00 UTC on the 17th and run for approximately 48 hours. AMSAT wishes the Scouts good luck operating via the AO-51 satellite for the event. Reports of your JOTA operations should be sent to the AMSAT-BB or directly to ko4ma@amsat.org.

And now for the details of rallies and events for the coming week

Today, 11 October, the Great Lumley Amateur Radio & Electronics Society Rally will be held in the Great Lumley Community Centre, Front Street, Chester-le-Street DH3 4JD. Doors open at 10.30am and admission is £2. There will be trade stands, a Bring & Buy and catering on site. More details from David Barclay, M0BPM, on 0191 3888113.

On 13 and 14 October, the EMCUK Exhibition & Conference will be held at the Newbury Racecourse, Newbury, Berkshire RG14 7NZ. Visitors will be able to meet members of the RSGB EMC Committee on their stand in the main exhibition hall. The stand will feature the Society's work on interference issues and HF signal strength measurement together with demonstrations of the emission from Power Line Telecommunications systems. Admission to the exhibition and to the IEEE's EMC demonstration bench sessions is free. Tickets are available from www.emcuk.co.uk.

On 18 October, the Blackwood and District ARS Rally will be held at Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. Doors open at 10am for disabled visitors and 10.30 for other visitors. Admission is £2 and there will be trade stands, a Bring & Buy as well as an RSGB Bookstall. Details from Dave, GW4HBK, on 01495 228515, or e-mail ddlewhbk@btinternet.com.

3

Galashiels and District Amateur Radio Society will be holding their Annual Radio and Computer Rally in The Volunteer Hall, St John's Street, Galashiels. Doors open at 11am and admission is £2. There will be trade stands, a Bring and Buy and refreshments. Details from Jim, GM7LUN on 01896-850245 or e-mail gm7lun@qsl.net.

Now for the news of special events

>From mid October to mid November the Bromsgrove & District ARC will be operating special event station GB75XX to commemorate 75 years from the first transmission from the BBC radio masts at Droitwich. Operation will be all bands, all modes. Further information on QRZ.com.

UN Headquarters station 4U64UN is active until mid November in celebration of the 64th annual UN General Assembly. Activity is on all bands and modes. QSL via HB9BOU.

Look for special event station KL5O to be active on the air in observance of Alaska Day. Activity will take place between 1800UTC, 18 October and 0600UTC, 19 October. Operations will be on 160 through to 10m, including 30, 17 and 12m. Modes will be CW, SSB and RTTY.

And now the HF DX news compiled from 425 DX News and other sources.

A team headed by Derek, G3KHZ will be in Papua New Guinea from 22 October until 9 November. It is worth bearing in mind that last year when they were in the same neck of the woods this group were worked from the UK on 80 and, by a couple of well-equipped UK stations, on 160. So even if you are not an IOTA chaser, this expedition may be good

for some new band slots. Full details on their website, www.425dxn.org/dxped/p29_2009

A Dutch team plans to be active from Benin (TY) from 10 to 30 October, with good equipment and antennas. Check their website at www.benin2009.com for more information.

DL2FAG will be active from Niue and Samoa in October and November from 19 October to 7 November as ZK2DL from Niue, OC-040, and from 17 to 30 November as 5W0KH from Samoa, OC-097. He plans to operate mainly RTTY, PSK and SSB on 10-80. QSL via his home call.

Now the contest news

The Worked All Britain HF Phone Contest takes place on 10 and 11 October from 1200 to 1200UTC in the 14, 21 and 28MHz bands. The exchange is signal report, serial number and WAB square. Rules and log sheets are available from the Contest Manager, G0BFJ, QTHR or from the WAB website at www.worked-all- britain.co.uk.

The 432MHz UK Activity Contest takes place on 13 October between 1900 and 2130UTC. Using all modes the exchange is signal report, serial number and locator.

4

Now the solar factual data for the period from the 28th of September to the 4th of October, compiled on 5th of October by Neil Clarke, G0CAS.

On the 28th the solar disc had one visible sunspot group. This was in its declining phase and by the 30th only one spot remained and by the 2nd it had disappeared altogether. Solar activity was at very low levels, however, a number of small sub flares took place but to small to report in any detail and certainly had no effect on propagation. Solar flux levels averaged 72 units and varied little day to day. The 90 day solar flux average on the 4th was 69, that's one unit up on last week. X-ray flux levels remained below the minimum reporting level throughout. Geomagnetic activity was quiet everyday. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 310 and 420 kilometres per second. Particle densities were low everyday and varied between one and seven particles per cubic centimetre. Bz varied between no more than minus 6 and plus 8 nanoTeslas except on the 4th which varied between minus 6 and plus 11 nanoTeslas.

And finally the solar forecast. This week solar activity is expected to be at very low levels. Looking at the last rotation the solar disc is expected be spotless on most days. However, as seen recently, sunspot groups can appear suddenly with very little warning. Solar flux levels should be around the 70 mark, that's providing no sunspots appear. Geomagnetic activity is expected to be mostly quiet, saying that, the next couple of days could be slightly unsettled. MUFs during daylight hours at equal latitudes should be around 19MHz for the south and 16MHz

for the north. The darkness hour lows should be about 9MHz. Paths this week Japan should have a maximum usable frequency with a 50 per cent success rate of around 19MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 0800 and 1100 hours UTC.

And that's all for this week from the propagation team.

5

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA Listeners to the GB2RS news reading at 1900 hours on 145.525MHz need to note that as from next Sunday 18th October, the readings will commence, from now on, one hour earlier at 1800 hours. Julian, M0GFD, who reads the news from his QTH in Bow, east London, has carried out some antenna improvements, and finds that his signal now reaches Southend-on-Sea to the east. He is the only news reader for this schedule, and would appreciate having a reserve reader. If any RSGB member in his service area to the east of London would like to volunteer, they should telephone Gordon Adams, G3LEQ, the RSGB's GB2RS News Manager on 01565 652 652 for more information.

On Monday 12 October Coulsdon Amateur Transmitting Society is having a talk on effective small antennas by Prof Mike Underhill, G3LHZ. Contact Andy, G8JAC, by email to g8jac@btinternet.com.

On Tuesday 13 October Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815.

On Tuesday 13 October Harwell Amateur Radio Society is having a talk on linear amplifiers by Paul Cullen. Contact Malcolm, G8NRP, on 01235 524844.

On Tuesday 13 October Plymouth Radio Club is having an inter-club quiz night versus The Rest of The World. All radio clubs or groups are invited to join forces to try to beat PRC! Contact Bob, G7NHB, on 01752 343177.

On Wednesday 14 October Aylesbury Vale Radio Society is having a discussion evening. Contact Roger, G3MEH, on 01442 826 651.

On Wednesday 14 October Bracknell Amateur Radio Club is having a talk on Robot Capers by Richard, G8IBP. Contact Paul, M3XPR, by email to pryan@max.co.uk.

On Wednesday 14 October Chesham and District Amateur Radio Society is discussing a technical topic with G3XZG. Contact Terry, G0VFW, on 01442 831 491.

On Wednesday 14 October Dover Radio Club is having a presentation on scanning by Matt, M1CMN. Contact Brian, G4SAU, by email to g4sau@DARC.org.uk.

On Wednesday 14 October Fareham and District Amateur Radio Club is holding its grand junk sale. Contact Derek Clarkson, G4JLP, on 01329 823405.

On Wednesday 14 October Farnborough and District Radio Society is watching films of club activities with Peter, G4MBZ. Contact Derek, G3OFA, by email to mail@farnboroughradio.org.uk.

On Wednesday 14 October Havering and District Amateur Radio Club is having an informal evening. Contact John, M0UKD, 07817365354.

6

On Wednesday 14 October Norfolk Amateur Radio Club is having an informal, construction and workshop evening. Contact Chris Danby, G0DWV, on 01603 419204.

On Wednesday 14 October South Essex Amateur Radio Society is having a talk by Bruce, G1JJS, on the sky at night. Contact Dave Speechley, G4UVJ, on 01268 697978.

On Wednesday 14 October Southgate Amateur Radio Club is having a planning meeting. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 14 October Worthing and District Amateur Radio Club is holding its AGM. Contact Roy, G4GPX, on 01903 753 893.

On Thursday 15 October Cray Valley Radio Society is having a talk by Peter Chadwick, G3RZP, entitled IARU - where do our wavelengths come from? Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm.

On Thursday 15 October Horsham Amateur Radio Club is having a social evening at the Dog and Bacon, Horsham. Details on the web at www.harc.org.uk.

On Thursday 15 October King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Thursday 15 October Shefford and District Amateur Radio Society is holding its autumn junk sale. Contact David, G8UOD, on 01234 742 757.

On Thursday 15 October Sutton and Cheam Radio Society is having a talk on the future direction of power line transmission by John Pink, G8MM. Contact John, G0BWV, on 020 8644 9945.

On Friday 16 October Wey Valley Amateur Radio Group is having a talk on what's next in communications by Dr Michael Willis, G0MJW. Details on the web at www.weyvalleyarg.org.uk.

On Saturday 17 October Brede Steam Amateur Radio Society commences its JOTA weekend. Contact Steve, on 01424 720815.

On Saturday 17 October King's Lynn Amateur Radio Club starts operating its weekend JOTA special event station. Contact Ray, G3RSV, by email to ral-g3rsv@supanet.com.

On Saturday 17 October Loughton and Epping Forest Amateur Radio Society is operating GB1HS for JOTA weekend with the 1st Hainault Scouts. Contact Marc Litchman, G0TOC, on 020 8502 1645.

On Saturday 17 October Norfolk Amateur Radio Club is taking part in JOTA. Contact Chris Danby, G0DWV, on 01603 419204.

On Saturday 17 October South Essex Amateur Radio Society commences its weekend JOTA event from Canvey Island, operating as GB2CIS. Contact Dave Speechley, G4UVJ, on 01268 697978.

NEWS FOR THE SOUTH-WEST On Monday 12 October Cornish Radio Amateur Club Computer Section is having a talk by Clive, G3OCB on Windows 7. Contact Steve, G7VOH, on 01209 844939.

On Tuesday 13 October Blackmore Vale Amateur Radio Society is having a talk on software defined radio by Jan, G0BBL. Contact Tony G0GFL, on 01258 860741.

On Tuesday 13 October West Devon Radio Club is having its annual review night. Contact Jules Cuddy, M1AGY, on 01752291588.

On Wednesday 14 October Taunton and District Amateur Radio Club is having an open forum on club matters and discussing the annual club programme. Contact William, G3WNI, on 01823 666 234.

7

On Wednesday 14 October Thornbury and South Gloucestershire Amateur Radio Club is on the air. Note that the club has a new venue, The Chantry, 52 Castle Street, Thornbury BS35 1HB. Contact Tony, G0WMB, on 01454 417048.

On Thursday 15 October Newquay and District Amateur Radio Society is having a club night, general chat and operating night. Contact Joe Bell, M6JOE, on 01726 891557.

On Thursday 15 October South Bristol Amateur Radio Club is having a table top sale with Len, G4RZY. Contact Len, G4RZY, on 01275 834 282.

On Thursday 15 October Swindon and District Amateur Radio Club is having a talk on Wi-Fi and Bluetooth by James, M1DST. Contact Den, M0ACM, on 07810 317750.

On Thursday 15 October Yeovil Amateur Radio Club is having a talk on AVOs and multimeters by Rob, G6LLP. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 16 October Bournemouth Amateur Radio Society is holding its AGM. All members are urged to attend. Contact John, G0HAT, on 07719700771.

On Friday 16 October Torbay Amateur Radio Society is having an operating night. Contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR THE MIDLANDS On Monday 12 October Gloucester Amateur Radio And Electronics Society is having a junk and books sale. Contact Anne, 2E1GKY, on 01452 548478, daytime.

On Monday 12 October South Birmingham Radio Society is checking aerials after the weekend's renovations. Contact Don, on 0121 458 1603.

On Monday 12 October Stratford Upon Avon District Radio Society is having a talk by Pete, G0WXJ, RSGB Region 5 Representative. Contact G0CHO, on 01608 664488.

On Monday 12 October Worcester Radio Amateurs Association is helping Hallow Scouts with their communicators' badge. Contact Leslie Coyne, M3WRZ, on 01905 764320.

On Tuesday 13 October Derby and District Amateur Radio Society is having a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 13 October Loughborough and District Amateur Radio Club is holding its AGM. Contact Chris, G1ETZ, on 01509 504 319.

On Tuesday 13 October Worcester Radio Amateurs Association is having a talk and is on the air. Contact Leslie Coyne, M3WRZ, on 01905 764320.

On Wednesday 14 October Midland Amateur Radio Society is having a ragchew, training classes and a committee meeting. Contact Norman, G8BHE, on 01214 229 787.

On Wednesday 14 October Telford and District Amateur Radio Society is having a talk on data modes by G0CER. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 15 October Lowestoft and District Pye Amateur Radio Club is having a club night. Contact Phil, G0JSG, on 01502585448.

On Thursday 15 October Salop Amateur Radio Society is having a pre-AGM natter night. Details on the web at www.salop-ARS.org.uk.

8

On Thursday 15 October Solihull Amateur Radio Society is holding its AGM at the Shirley Centre, 274 Stratford Road, Shirley, Solihull B90 3AD. Contact P T Gaskin, G8AYY, on 0121 783 2996.

On Friday 16 October Coventry Amateur Radio Society is having a quiz night. Contact John, G8SEQ, on 07958 777363.

On Friday 16 October Nunsfield House Amateur Radio Group is having a talk on propagation by Ken Frankcom. Contact Ken, G3OCA, on 01332 720976.

On Friday 16 October South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

On Saturday 17 October Worcester Radio Amateurs Association commences its weekend JOTA event at Kinver Camp, putting M0ZOO on the air. Contact Leslie Coyne, M3WRZ, on 01905 764320.

NEWS FOR THE NORTH OF ENGLAND On Monday 12 October Angel Of The North Amateur Radio Club is having a talk by Daniel Harrop on avoiding the pitfalls in HF mobile operation. Contact Nancy Bone, G7UUR, on 0191 4770036.

On Monday 12 October Bolton Wireless Club is having a talk, HF bicycle mobile around the world, by David, G4AKC and Keith, G7LPW. Contact boltonwireless@gmail.com.

On Monday 12 October Sheffield Amateur Radio Club is having a satellite QSO demo, subject to favourable satellite orbits. Contact Trevor Wood, M0TWS, by email to trevorwood6@yahoo.co.uk.

On Monday 12 October Thornton Cleveleys Amateur Radio Society is holding its AGM. Contact John Foster, M3WAZ, on 01253 399377.

On Tuesday 13 October Isle Of Man Amateur Radio Society is having a talk on PIC programming by Malcolm Newton. Contact Stuart Hill, GD0OUD, on 01624 613226.

On Tuesday 13 October Silcoates School Amateur Radio Club is having a talk on the Scarborough Reef DXpedition and attempts to operate from Rockall by Mike, K9AJ. All are welcome, and the event is in the hall at Silcoates School, Silcoates Lane, Wakefield WF2 0PD.

On Tuesday 13 October Morecambe Bay Amateur Radio Society is having a committee meeting. Contact Martin Hazel, M0ZIF, on 07852 200232.

On Tuesday 13 October Otley Amateur Radio Society is having a shack night. Contact Paul, 2E0PAK, on 07768 996370.

On Wednesday 14 October Hornsea Amateur Radio Club is having a talk by Andy, G0VRM. Contact Gordon MacNaught, G3WOV, on 01377 240573.

On Wednesday 14 October Mid-Cheshire Amateur Radio Society is planning for RadioActive and working on the club project on the air. Contact Peter Paul Fox, G8HAV, on 01606553401.

On Thursday 15 October South Cheshire Amateur Radio Society is conducting Foundation exam assessments. Contact Chris Wiseman, G0RDK, on 01782 773185.

On Thursday 15 October South Manchester Radio And Computer Club is having a report on the RSGB Convention by Ron, G3SVW. Contact Ron, G3SVW, on 0161 969 3999.

On Friday 16 October East Cleveland Amateur Radio Club is having a "bring in something interesting" evening. Contact Alistair, G4OLK, on 01642 475 671.

9

On Friday 16 October Tynemouth Radio Club is having an operating night with technical topics and holding a Morse class. Contact Graham Errington, on 07812 172136.

On Saturday 17 October Otley Amateur Radio Society is providing JOTA skeds for local Scouts. Contact Paul, 2E0PAK, on 07768 996370.

NEWS FOR SCOTLAND On Tuesday 13 October Livingston and District Amateur Radio Society is having an operating evening. Contact Norman, on 07740 946192.

On Wednesday 14 October Kingdom Amateur Radio Society is having a shack night. Contact Brian, MM0XBD, on 01383 738905.

On Wednesday 14 October Paisley YMCA Amateur Radio Club is having a break. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Thursday 15 October Aberdeen Amateur Radio Society is having a discussion night. Contact Lewis, GM4AJR, on 01224 575 663.

On Friday 16 October Cockenzie and Port Seton Amateur Radio Club is having a DVD night. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES On Monday 12 October Llanelli Amateur Radio Society is having a club raffle and social night. Contact Craig, MW0MXT, on 01269 840292.

On Friday 16 October Newport Amateur Radio Society is on the air. Contact Gareth Price on 01633 880081.

NEWS FOR NORTHERN IRELAND [Note to all NI Newsreaders: please read this out. We are actively trying to increase the profile of amateur radio in the area.] GB2RS welcomes information from all RSGB affiliated clubs. We invite club secretaries to email details of forthcoming meetings to GB2RS@rsgb.org.uk. Any information for December meetings that arrives before Friday 30 October will also appear in the Club Calendar section of RadCom.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

2315. CQWW 2008 Log analysis

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-09 22:48:31 UTC
From: ei6dx <lanagalina@gmail.com>
Message-ID: <4ca6de6e-8d73-4e9f-b943-843d902e4e2e@v25g2000yqk.googlegroups.com>

Hi!
CQWW is in a couple of weeks.
I put together a small application that parses all CQWW 2008 logs,
calculates QSO rates and aggregates results by time, band, zones. You
may find it useful for figuring out your next contest plan, deciding
on best time and band for zone and DX hunting, and simply for looking
at what others work in CW and SSB tests.
To launch the application click here: www.ei6dx.com/cqww-activity-analyzer
VY 73 GL
Stan, EI6DX/UA1OUT
P.S. To view the app you need Flash.

2316. SARL NEWS SUNDAY 11 OCTOBER 2009

Newsgroup: rec.radio.amateur.misc

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS SUNDAY 11 OCTOBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail. Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

In the news today:

SO YOU NO LONGER HAVE ACCESS TO THE SARL MEMBER WEB PAGES!

CHECK YOUR HOME CONSTRUCTION COURSE REGISTRATION ON THE WEB

52nd JOTA/JOTI 2009 NEXT WEEKEND

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SO YOU NO LONGER HAVE ACCESS TO THE SARL MEMBER WEB PAGES!

If you had not paid your subscription by 30 September you will no longer have access to the SARL members only pages and the various downloads that are available from there and Radio ZS online or in your mailbox. You can however remedy that fast by paying your subscription of R340 without any further delay. Contact Mariska Faasen at 011 675 2393 to get the details about electronic transfer facilities or the exact amount due. Ordinary member's fees for this year is R340. Senior members and junior pay less.

Once you have paid your outstanding subscription it may take two weeks for the access restoration process to be completed but at least you will know that you will soon have access to the web again. And what is more, that you are a proud supporter of Amateur Radio and the SARL.

CHECK YOUR HOME CONSTRUCTION COURSE REGISTRATION ON THE WEB

If you have registered you can check your registration for the home construction course on the web. Visit www.sarl.org.za, click on

activities and select RTA where you will find a link to the Home Construction course page. For the Gauteng course there are only 6 seats still available. It is a good idea to check availability before you register. Each venue can only accommodate 20 persons.

The course will be presented by John Willescroft, ZS6EF.

OCTOBER RAE

The last RAE for this year takes place on the 22nd October. For those prospective amateurs in the Pretoria and Centurion areas, the RAE will again be written in the Higher Tegnological School, John Vorster at 1 072, Meyer Street, Rietfontein.

Candidates must report not later than 18:30 at the first classroom to the left of the main entrance gate. Remember your ID book, pocket calculator, an extra pen or two and cool drink or water.

For any further information, contact Paul, ZS6PR, at Tel. 012-332-3157.

Magalies Radio Amateur Club, ZS6MRK, and John Vorster Radio Amateur Club, ZS6JVT, wish all candidates success with the examination.

52nd JOTA/JOTI 2009 NEXT WEEKEND

Once again it's that time of the year when the Scouts and Guides will be on the air for the annual Jamboree-on-the-Air, 17th and 18th October. Scouts all over the World will be on the Air. In South Africa it starts at 00:01 on Saturday until Sunday 23:59 local time.

Whether or not you are helping with such a station please feel free to join in, especially if you were a scout or a guide when you were younger. As long as you keep the overs short and let the young do most of the talking you will be doing them a great service.

Demonstrate your favourite mode whether it is SSB, AM (A3E), slow scan TV, Packet or CW. Even if the signals are only heard, it will be very interesting for them. Morse code sent slowly can be a real "draw card" especially when they realize they can do the same.

Even if you have a club event next Saturday try to activate the club station and introduce your members to the Scout Movement.

Remember the scouts and guides are young and have long memories.

For more information on JOTA/JOTI, the International Scout Movement, refer to www.jota.sub.cc.

CONTEST NEWS

The provisional results of the SARL HF CW Contest have been released. Only thirteen logs were received for the contest, the majority of logs were submitted correctly. 1st West Rand ARC, ZS6WR, 100 points; 2nd Vidi la Grange, ZS1EL, 98 points; 3rd Pierre van Deventer, ZS6BB, 86 points; 4th Allan Smith, ZS1AAX, and Hans Kappetijn, ZS6KR, 84 points.

The best score on a single band was by Vidi la Grange, ZS1EL, with 48 points on 40 metres.

The full results were published in HF Happenings 374.

CLUB NEWS

The Sasolburg Radio Club is proud to announce their new committee elected at their AGM held on the 4th October, the members are: Chairman, Marius Preston, ZS4MP; Vice-chairman, Frik Wolff, ZS6FZ; Treasurer, Corn&#65533; Cronj&#65533;, ZU6C; Secretary, Riaan Greeff ZS4PR. The PIO work will be done by Gerald Smith, ZS6IG, and Andries Visagie, ZS6VL. Andries will also keep the club's website up to date. Technical development will be in the capable hands of Frik, ZS6FZ, and Ockerd Taljaard, ZS6LZ.

The club wishes to thank the outgoing committee members for their hard work during the past year and the members know that they will keep the club's name high on all the various platforms in amateur radio in the future.

During the AGM various trophies were also handed to well deserving members.

Should anyone like to join that dynamic club, then you may contact any of the committee members or Riaan, ZS4PR, via e-mail to zs4pr@qsl.net.

The club is also proud to support the SARL by means of the following club members who are also members of the SARL: ZS6FZ, ZS4MP, ZS4PR, ZS6AXJ, ZS6LZ, ZR4CT, ZS4FD, ZS4SS, ZS6VL, ZS4SM, and ZS6XB.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. There are no official sunspots and the visible disk is spotless.

20 and 15 m will provide best opportunities for DX. Conditions to the East and the West will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europe. In the mornings it may be possible to make contacts with Australia on 20 m. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New-Zeeland are going to be challenging. During the early mornings, late afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

16 October -Logs for second leg of the SARL 80 Metre QSO Party to be in. 17-18 October - 52nd JOTA/JOTI 00:01 on Saturday until Sunday 23:59 local time; 22 October - Radioamateur's Examination country wide at 18:30; 21 November - Home Construction course, Gauteng, at the NARC.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. Echolink will be off. today. A repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, which was compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

THEORY CLASSES IN REGION 4

Plans are being put in place to run radio theory classes in the Limerick area by IRTS Region 4 representative Ger McNamara EI4GXB, with the hope that the theory examination can be held in Limerick which will be dependant on numbers.

Those interested in attending the theory classes can contact Ger via email at ei4gxb /at/ gmail.com or 087 2532512 or QTHR

CQ CQ calling news items

As is common through the year we have occasional lulls in news from EI. If your group or club are involved in anything that you would like to share with or listeners or readers please pass on the information to our editor.

4U1UN ACTIVITY Operating Schedule

4U1UN, the United Nations Headquarters station in New York City will make a rare appearance on the air from October 19th to the 25th . This, with an all star line-up of top gun DX'ers and contester's at the controls of the famed station.

Its operating schedule is going to be restricted from 12"00 to 04:00 UTC each day. All-night activity is planned for Friday the 23rd and Saturday the 24th of October. The 24th is United Nations Day.

Logs for 4U1UN will be uploaded to Logbook to the World after the operation is completed. All QSL requests go via HB9BOU.

MIDWAY ISLAND K4M

A multi-national team of 18 operators are currently activating Midway Island, they are expected to continue through October 19th. They are signing K4M and will operate from Sand Island.

The U.S. Fish & Wildlife Service has authorized this amateur radio operation from this rare U.S. entity for only a 10 day period. This is the first amateur radio activity from Midway in almost 10 years.

Midway Island ranks number 24 worldwide and number 13 in Europe on the DX Magazine's "Most Wanted List".

QRZ.COM New features

The giant QRZ dot com callsign website has expanded its callsign database. This, with added fields that take into account the emergence of electronic confirmations of on the air contacts as well as those who only use cards sent via the mail.

The newly added fields are Mail QSL that indicates whether this person will QSL by Postal Mail, eQSL says that an Amateur is using eQSL.cc, LOTW indicates whether this person uses LOTW. Another new field is IOTA which permits the insertion of an Islands on the Air designator.

Stations with QRZ listings who would like to display the above information are asked to activate those options in their management page.

AMSAT Supports JOTA with AO-51 Satellite

Turning to radio space related news, word from AMSAT-North America says that it is supporting the 52nd Jamboree on the Air Scouting event by dedicating AO-51 operation to it.

On October 17th and 18th the AO-51 QRP repeater will be set to crossband FM mode and allocated for the scouts to use. The mode change should occur at 00:00 UTC on the 17th and run for approximately 48 hours.

The frequencies to be used for the Jamboree weekend will be 145.880 FM uplink, and 435.150 FM Downlink. No tone access is required. All satellite users are requested to give priority to Jamboree stations and to hold QSO's with them.

International Reply Coupon Deadlines

Operators who use IRC's in the QSL exchange process are advised to check the expiry dates of their current stock as stock batches expire on 31 December 2009.

DX Bulletin No. 929
BID: $OPDX.929
October 12, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W1TY, NG3K, N4AA & QRZ DX, N4II, W5JON, KH6BZF, KL7JR, K8YSE, ND9M/MM, N0HJZ, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, HP1AC, I1JQJ/IK1ADH & 425 DX News, IK8VRH, IZ7AUH, JE2EHP, JT1CD, OH5DX, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, TA0U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and YS1GMV for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-October, through Sunday, 11th-October there were 226 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/c, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FR, FR/g, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP6, VP8, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (QRT). The 3D20CR is now QRT as of October 8th. Last report is that the team made over 32k QSOs. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are most likely to be sent out in January 2010). For more details and possible updates, see their Web page at:

http://www.conwayreef2009.de
Also watch QRZ.com for updates at: http://www.qrz.com/db/3d20cr

4O, MONTENEGRO. Tonno, ES5TV, will be active as 4O3A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. Activity will be from Ranko, 4O3A, superstation. QSL via 4O3A, direct or by the LoTW.

4S, SRI LANKA. Operators Heinz/DL1IH and Salvo/DH7SA are expected to be active as 4S7AAG and 4S7SAG, respectively, during a holiday DXpedition sometime in October. Stay tuned!

4X, ISRAEL. Yoshi, JE2EHP, will be active as 4X/K1HP from Tel Aviv and Jerusalem in Israel between October 29th and November 5th. Activity will be on all the HF bands and 6m, using CW, SSB and RTTY. QSL is via Bureau to his home callsign JE2EHP.

5B, CYPRUS. John, G4IRN, will be active as 5B/G4IRN between November 27-30th. Activity will include a CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (??) entry. QSL via LoTW or via G4IRN.

5Z, KENYA (IOTA Op). Operators Enrico/5Z4ES, Francesco/IK8TEO, Antonio/ IK8UHA and Anthonio/IK8VRH are planning to be in Kenya and activate two IOTA islands between February 10-20th (2010). Callsign will be 5Z0H (IK8VRH informs OPDX that this will be the only time [first time] the 5Z0 prefix will be used) and islands mentioned are Lamu Island (AF-040) and Wasini Island (AF-067). QSL via LoTW, by the Bureau or direct to IK8VRH: P.O. Box 173, I-80016 Marano (NA), Italy. Visit the 5Z4H Web page at: http://5z4h.sitonline.it

6V, SENEGAL. Just a reminder that Seb, F8IJV, will be on his honeymoon here between October 15th and November 1st. He plans to be active in the CQWW DX SSB Contest (October 24-25th). He will try to operate before and after the contest as 6V7Q on 160-6 meters, mainly on SSB and the Digital modes. He will be operating from Jean-Francois, 6W7RV, QTH in La Somone. QSL via F8IJV.

8Q, MALDIVES. Jim, G3VDB, will be active 8Q7EJ from Vilamendhoo Island (AS-013) between now and October 25th. Activity will be holiday style and subject to hotel permission and local conditions. Look for operations on CW, RTTY, PSK31 and possibly SSB. He will use 100 watts into wire antennas. QSL via his home callsign.

CM2, CUBA. Frank, CM2IR, informs OPDX that he is on 40 meters using BPSK31 on 7035 kHz (IOTA NA015 and GRID LOCATOR EL83tc). He is also on SSB around 7150 and 7170 kHz (times not provide). QSL via EB7DX, QSL Manager with 2 USDs or IRCs. QSL SENDING ONLY BY REQUEST!!!

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (??) entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (???) entry. He is testing wire yagis/beverages on lower bands. QSL via OH2BYS.

EA9, CEUTA AND MELILLA. A group of Spanish operators will be active as EE9Z during the CQWW DX SSB Contest (October 24-25th) as Multi-2 or Multi-Single entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jose/EA9CD, Enrique/EA9GW, Jose/EA9PY, Mariano/EA9LS and Jorge/EA9LZ.

EI, IRELAND (On the Bird!). Marc, W4MPS, will be active as EI/W4MPS from County Cork between October 16-26th. Most of the time he will be in Grid IO52, although he may also travel to IO42 and IO51 (if the family ever lets him out of the pub). Marc states that he uses a FT-60R at 5 watts and an Arrow antenna on AO-51.

FS, SAINT MARTIN (Possible PJ7). Craig, AH8DX, will once again be active as FS/AH8DX starting October 22nd. Activity will include the CQWW DX Contest (October 24-25th) as a Single-Op/All-Band entry. Operations outside of the contest will be on 160/80 meters CW and SSB. Look for 40 meters RTTY also. QSL via AH8DX direct or via LoTW. Craig may also be active as PJ7/AH8DX from St. Maarten.

FT/G, GLORIOSO ISLAND (QRT). The FT5GA team is now QRT and is happy that the goal of 50k QSOs was reached by a crew of 5 operators with two and sometimes three stations. The FT5GA went QRT on October 7th (a day earlier than expected due to the military flight schedule). According to their Web page, they have made a total of 50427 QSOs with 15250 unique callsigns (24235/CW, 21080/SSB and 5112/RTTY). For updated details, visit the FT5GA Web page at: http://glorieuses2008.free.fr
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA
LATE MINUTE ADD-ONS: Didier, F5OGL, states, "The logs of the FT5GA operation will be very soon on LoTW." Also, a couple of pictures of the operation are now available at: http://picasaweb.google.fr/MauriceF5NQL/FT5GA#

HC8, GALAPAGOS ISLANDS. A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal (SA-004, WLOTA L0094) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via W5UE.

HG0, HUNGARY (WFF Op). This October, members of the Regionalis Radios Sportklub Puspokladany plan to start a year long activation of different Hungarian National Parks that qualify for the WFF program (see the Web page at: http://www.wff44.com/en). The first event will take place from the Hortobagy National Park <http://www.hnp.hu/index_en.php> between October 12-18th. The area has a reference number of HAFF-006. They will use the special callsign HG0WFF. QSL by the Bureau is "OK", but their QSL Manager is HA0HW. Some of the operators will use their own callsign with mark /p.

HP, PANAMA. Members of the Radio Club de Panama (HP1RCP) will be active during the 2009 JOTA event, October 17-18th, from Panama City, Panama, Colegio La Salle assisting Troop 4.

ID9N VIDEO AVAILABLE ON YOU TUBE! Members of the Noantri DX & Contest Team that were active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001) in April, now have a video available on YouTube at: http://www.youtube.com/watch?v=iwbJb66leaM

INDIAN OCEAN GRIDS (On the Birds). Jim, ND9M/VQ9JC, sailing toward Diego Garcia (VQ9) at about 27, will be activating the following grids during the following AO-51 passes:
November 11th at 2258z - MI95 or MI96 (as ND9M)
November 12th at 1304z - MI84 (as ND9M)
November 12th at 2355z - MI63 (as either ND9M or VQ9JC)
November 13th at 1224Z - MI62 (as VQ9JC)
Jim will try to be active for AO-27 on Monday (November 12th/0757z) and Tuesday (November 13th/0906z). Those times are during his work schedule, and he may not be able to set up. Also, Jim "may" be active on SO-50 for very late passes Sunday (November 11th/1924z for MI96 or NI06) and Monday night (November 12th/1814z for MI73 or MI63). Jim is operating full duplex with an FT-897D (TX) and FT-817ND (RX).

IOTA NEWS.....
EU-038. Ben/DO1BEN and YL Barbara/DO1IQ will be active as PD/homecalls from Texel Island (WLOTA L0043) between October 16-22nd.
Activity will be on the HF bands, propagation permitting.
QSL via their home callsigns, the Bureau is preferred.

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG, Antonino/IT9SAZ and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545), between October 24-25th, for the CQWW DX SSB Contest as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-118. RARE IOTA! Operators Oscar/EA1DR, George/EC2ADN, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning a DXpedition to Flannan Isles (a extremely difficult island to land on) during sometime early/mid-June, 2010. Last activation was in 2002 (also in 1989 and 1995). QSL Manager will be M0URX. More details, the callsign and Web site will be forthcoming.

NA-036. Rob, VE7RSV, will be active from Vancouver Island (CISA BC001, WLOTA L0858) during the W/VE Islands QSO Party (October 17-18th). QSL via address on QRZ.com.

OC-142. Ray, K9LUK, will be active as K9LUK/VK4 from Frazer Island between October 18-23rd. QSL via his home callsign direct.

SA-008. Orlando, PY2TJ, will be active as LU/PY2TJ from Isla Tierra Del Fuego (WLOTA L2448) between November 1-7th. Activity will be on all HF bands. QSL via PT2OP, direct is preferred

or by the Bureau.

SA-058. Members of the Grupo DX Caracas will be active as YW5F from
Farallon Centinela Island between November 6-9th. Activity
is to celebrate the 20th anniversary of the Caracas DX Group.
Operations will be on 80-2 meters using CW, SSB and FM. QSL
via DM4TI.

J5, GUINEA-BISSAU. Jose, CT1DSV, will be active as J5S between October
12-18th (especially between October 17-18th). QSL via his home callsign.

J8, ST. LUCIA. John, W5JON, will once again be operating from the hilltop
QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between
October 20-30th. His callsign will be J68JA. Reference numbers are: IOTA
NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including
60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into
the following antennas: Alpha Delta DX-LB and DX-EE Dipoles, and a 3
element yagi on 6m. Activity will also include the CQWW DX SSB Contest
(October 24-25th) as a Single-Op/All-Band entry. QSL via W5JON. John
adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

JT1, MONGOLIA (EME Op). Operators Jeremy/W7EME and Jim/K7YO are active
on 2 meter EME from Mongolia as JT1UN and JT1UN/JT5, and also JT1YO
and JT1YO/JT5 on 70cm, until October 14th. Activity will be from the
JT1KAA HQ station of the Mongolian Amateur Radio Society. This operation
will be the first Moon Bounce QSO from Mongolia. For more information,
please visit: http://www.w7eme.org/ulaanbaatar

KH4, MIDWAY ISLANDS (OC-030). On Saturday, October 10th, the following
press release was sent out from Tom, N4XP: "The entire team is in Honolulu.
On Thursday when the first members were to depart to Midway we were
informed of a problem with the plane involving an oil leak. We were
assured it was fixable. Friday several test flights were made that
determined that the repairs were unsuccessful. We are frantically
searching for alternative means. We discovered yesterday that there
are no available planes on the island that are either certified to fly
to Midway or large enough for us. We are negotiating with a company in
California for a jet as well. The plane we originally chartered is about
to take off on a test flight to determine if the repairs made overnight
were successful. The team is not giving up and exploring ALL options to
make this happen. Fish and Wildlife is being very supportive of our
efforts but in no way will they extend the end date of our operation
beyond the 19th due to the return of migratory species that have already
begun to return early. We will update this website in 5 or 6 hours when
the plane returns and is checked out. We are as frustrated as you."
On Sunday, just before going to print, a statement on the KH4 Web page
states, "(0400z) We have just learned our aircraft is in the air testing
repairs made in the past 24 hours. We are anxiously waiting the results."
For more details, updates, online log, frequencies and bios, go to:
http://www.midway2009.com
QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA
30620-9989 USA) or LoTW. See the above Web page for complete details.

KH6BZF PROPAGATION FORECAST/REPORT (For October 12-18th)....
Oct 12 AN SOLAR REFERENCE
Oct 13 AN ---------------
Oct 14 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 15 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 16 AN LN - Low Normal
Oct 17 AN
Oct 18 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Lee, KH6BZF, informs OPDX that a relief fund is now set up for American Samoa at: C/O BANK OF HAWAII, ATTN: AMERICAN SAMOA RELIEF, 111 SOUTH KING STREET, HONOLULU, HI 96813.

MU, GUERNSEY. Gerhard, OE3GEA, will be active as MU/OE3GEA from Guernsey (EU-114, WLOTA L0013) between October 27-29th. Activity will be on the HF bands using CW and low power only. QSL via his home callsign, direct or by the Bureau.

NYQP IS BACK! (After 25 years!) The Rochester DX Association looks forward to your support and participation in the 2009 New York QSO Party. The event takes place Saturday, October 17th, starting at 1800z (2:00 PM Eastern) for 12 hours. Check out the NYQP Web page for complete rules, FAQ's, Software, Forum, County maps and Log submissions at: http://www.NYQP.org Over thirty plaques to be awarded. <http://www.NYQP.org/sponsorship.php>

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. Operators mentioned are: Juha/OH1JT, Timo/OH1NOA, Jouko/OH1RX, Timo/OH1TM, Ari/OH5DX, Tomi/ OH6EI, Timo/OH6GLE and Juha/OH6XX. QSL via W0MM.

PJ2, NETHERLANDS ANTILLES. Members and non-members of the Caribbean Contesting Consortium (CCC) will activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. QSL via N9AG or LoTW. Operators mentioned are: Geoff/W0CG/PJ2DX, David/G3NKC, Martin/G4XUM, Kyle/WA4PGM, John/K6AM, Wayne/K8LEE, Joe/W9JUV, Kelly/N0VD and Richard/N0YY. Operators will sign as PJ2/homecall before the contest on all bands and modes. QSL via their home callsigns. Visit the CCC Web site at: http://www.pj2t.org

QSL INFO AND NEWS.....................
TC1ELH via POB 73, Karakoy 34421, Istanbul, Turkey. There was activity by the TCSWAT from the Marmara Eregli Lighthouse (TUR059) during this past weekend. This was the first activation of the lighthouse. If you are interested in Lighthouse activities, please check the Web site for upcoming TCSWAT events and awards at: http://www.tcswat.org

QSLS VIA LOTW: 5W0VK and XV3RRC

QSLS RECEIVED VIA MAIL: 6I7CQ, 6J2T, 7P8OK, A45WD, A61Q, EA9IB, T6AD, TO8YY, TU5JM, V51AS, XF4T, YS1MAE, Z29KM and ZK2V

QSLS RECEIVED VIA THE BUREAU: EZ8BO, EZ10BO, EZ21BO, EZ75BO, EZ56BO, EZ60SB, EZ3A, EZ75R, EZ21A, EZ56V, EZ10A, EZ8CW and EZ8-001

TC1, TURKEY. Club members for the TRAC Istanbul Branch (TA1KB) will activate their new club station using the special callsign TC1IEM between October 16-18th, for the "Istanbul Eurasia Marathon". The race will take place on October 18th, and it is the only marathon race that starts from Asia and ends in Europe. Details about the race are on: http://www.istanbulmarathon.org/en/index.php
The race course is only two hundred meters away from the new club station. Activity will be on the HF bands. QSL via the TA Bureau is preferred (or direct to TA1KB).

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQ WW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as Single-Op/Single-Band (40m) entries. QSL via LX1NO.

TK, CORSICA (Contest and IOTA Op). Paolo, IV3UHL, will be active as TK/IV3UHL during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/ Single-Band (20m) entry. QSL via IV3UHL. He states that he will probably activate EU-164 before the contest. He is also looking for one more operator. If interested, E-mail him at: iv3uhl1@libero.it

TK, CORSICA. Salvatore, IK8UND, will be active as TK9R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Assisted entry. Look for activity on CW and RTTY before the contest. QSL via IK8UND direct ONLY.

TX3, CHESTERFIELD ISLAND. Operators George/AA7JV and Tomi/HA7RY report on their Web page that last minute tests and preparations are under way for the TX3A operation to take place between November 23rd and December 6th. Equipment is being packed and weighed. They have both weight and capacity constraints, and they like to keep things simple. Many improve-ments have been made to the equipment (antennas and radios). They have also loaded and tested RTTY hardware and software. There will be RTTY on Chesterfield Island, if they make it there! Read their complete update at: http://www.tx3a.com/news.html

TX5, AUSTRAL AND MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/ SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will be moving onto Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns will be TX5SPM. Remember, their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V3, BELIZE. Rich, N0HJZ, will be active as V31MW from Placencia between October 17-26th. Activity will be on all bands during his stay. He will also operate as V31MW during the CQWW DX SSB Contest (October 24-25th)

as a Single-Operator/All-Band/High-Power entry. Rich informs OPDX that he may be the only entrant on from Belize this year, so make sure you look for him. QSL via LoTW or direct with SASE.

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via VE3DZ. He will be there between October 21-26th.

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via VK6NE.

VP2M, MONTSERRAT. Operators George/K2DM, Peter/K3ZM, Glen/W4GKA and Jim/AD4J will be active as VP2MDG, VP2MZM, VP2MKA and VP2MIJ, respectively, from October 20-28th. The group will also be active as VP2MDG during the CQ WW DX SSB Contest (October 24-25th) as a Multi-Single entry. Also, look for VP2MDG on 6m SSB and VP2MZM on 160m CW outside the contest. QSL to their home callsigns.

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI), will once again be active as VP9KF from Baileys Bay, Hamilton Parish, between November 4-18th. Activity will only be CW on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/ Please, DO NOT send to the VP9 bureau.

VY1, CANADA (Yukon on 10 Meters!). "Yukon John", KL7JR, informs OPDX that plans are underway for the activation of Jacquot Island ("new one" in Kluane Lake) before and during ARRL's December 10 Meter Contest (December 11-13th). John states, "Hopefully the lake will be frozen enough to allow me to drive out to it! Can't seem to get there in summer- hi hi!" Look for VY1RST to concentrate on 10 meters for the contest and 14.260 (main) for non-contest activities. QSL via KL7JR by the CBA. LAST MINUTE ADD-ON: John/KL7JR and XYL Claire/WL7MY will be on 10-20 meters from Buckshot Betty's Cabins in Beaver Creek as VY1RST between November 19-23rd (before and during ARRL's November SS Phone Contest). E-mail for skeds at: KL7JR@Yahoo.com

W4, UNITED STATES (Special Event). As part of National Wildlife Refuge Week <http://www.nwrweek-radio.info/>, the South Florida DX Association (K4FK) will activate the Arthur R. Marshall Loxahatchee National Wildlife Refuge <http://www.fws.gov/loxahatchee> on Saturday, October 17th, from 1400-1830z, using the 1x1 call W4R. The station will be active on 20 and 40 meters SSB, and possibly CW. QSL via WA4WTG, with SASE.

WORLD WIDE DXPEDITION TROPHY (by Strange Radio Team). The Strange Radio Team presents the exclusive "WORLD WIDE DXPEDITION TROPHY" (WWDT) to the DXpedition of the year that provided the greatest interest to the ham radio world. The DXPEDITION is chosen from a yearly survey which is available in many ham magazines (both Italian and international) and on the Web at: http://www.strangeradioteam.com
The current survey being taken is for DXpeditions which took place between June 1st, 2008, and June 1st, 2009. The survey will end January 31st, 2010.

The DXPEDITION that is choosen/selected the most will be rewarded with a trophy. You can select or suggest a DXpedition at the following Web page at: http://www.strangeradioteam.com/wwdxt/index.asp
The award will be presented during the "International DX Convention" organized by Strange Radio Team. Currently, there are 70 DXpeditions to vote for.

YJ, VANUATU (OC-035). Tomas, VK2CCC, will be active as YJ0CCC between October 30th and November 5th. Activity will be limited, but operations will mainly be on 160/80 meters CW. Also, look for some activity on the new 60 meters band (5403.5 kHz USB). QSL via his home callsign, the bureau is preferred.

YS, EL SALVADOR. Members of the Club de Radio Aficionados de El Salvador (CRAS) will be active as YS1YS during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via YS1GMV. Operators mentioned are: Francisco/YS1FAF, Federico/YS1FEA, Mario/YS1GMV, Mario/YS1MAE, Jose/YS1MS and Florencio/YS1ZC.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) and the MDXC will be active as Z37M during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via Z37M, by the Bureau or from the info on QRZ.com. Operators mentioned are: Ant/IZ8CCW, Pasquale/IZ8IYX, Dario/IT9SSI, Antonello/IT9YVO, Gianni/IZ8CGS, Alex/IZ8MOQ, Dom/IZ8JAI, Venco/Z36W and Chris/Z35X. Look for more details on the MDXC Web page at: http://www.mdxc.org

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 929.1
BID: $OPDX.929.1
October 11, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and Midway Island Web Page for the following DX information.

KH4, MIDWAY ISLANDS (Update). The K4M Web page is now reporting the following (as of 2100z, October 11th):
"Last night (as many of you know who watched N8E on flightaware.com) ended after only 1 hour in failure.

However, the flight last night was also a success in ruling out 7 swapped parts as not being the failure point. However they still didn't fix the problem. This morning they replaced the last of the possible parts. We have just returned from the hanger after visiting with the mechanics, who are tired of seeing our faces and are telling us so! They are pretty sure (yeah we heard that before) that they now have isolated the leaking part. They have replaced it and are about to run up the engine again. Following protocol they should be in the air within an hour to begin their test flight. Our destination is over open ocean and there are no emergency landing strips along the way. They can not take us to Midway until they know they can fly the distance without issue. We are also still frantically searching for alternatives, but there are no planes on Midway certified to fly there by F & W. There is a possible plane on the way to Hawaii from Las Vegas and we are pursuing this.
This is rare for a reason.
The minute we know this test flight is a success we will update the website and we are in a standby position. Wish us luck."

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, W1TY, NG3K, N4AA & QRZ DX, N4II, W5JON, KH6BZF, KL7JR, K8YSE, ND9M/MM, N0HJZ, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, HA0HW, HP1AC, I1JQJ/IK1ADH & 425 DX News, IK8VRH, IZ7AUH, JE2EHP, JT1CD, OH5DX, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, TA0U, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and YS1GMV for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 4th-October, through Sunday, 11th-October there were 226 countries active. Countries available: 3A, 3B8, 3C, 3D2, 3D2/c, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FR, FR/g, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V5, V6, V7, V8, VE, VK, VP2E, VP2V, VP6, VP8, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF (QRT). The 3D20CR is now QRT as of October 8th. Last report is that the team made over 32k QSOs. QSL via DJ8NK, by the bureau or direct (new IRCs are OK, old IRCs with expiration date of "31 Dec. 2009" are "NOT" OK. QSL cards are most likely to be sent out in January 2010). For more details and possible updates, see their Web page at:

http://www.conwayreef2009.de
Also watch QRZ.com for updates at: http://www.qrz.com/db/3d20cr

4O, MONTENEGRO. Tonno, ES5TV, will be active as 4O3A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. Activity will be from Ranko, 4O3A, superstation. QSL via 4O3A, direct or by the LoTW.

4S, SRI LANKA. Operators Heinz/DL1IH and Salvo/DH7SA are expected to be active as 4S7AAG and 4S7SAG, respectively, during a holiday DXpedition sometime in October. Stay tuned!

4X, ISRAEL. Yoshi, JE2EHP, will be active as 4X/K1HP from Tel Aviv and Jerusalem in Israel between October 29th and November 5th. Activity will be on all the HF bands and 6m, using CW, SSB and RTTY. QSL is via Bureau to his home callsign JE2EHP.

5B, CYPRUS. John, G4IRN, will be active as 5B/G4IRN between November 27-30th. Activity will include a CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (??) entry. QSL via LoTW or via G4IRN.

5Z, KENYA (IOTA Op). Operators Enrico/5Z4ES, Francesco/IK8TEO, Antonio/ IK8UHA and Anthonio/IK8VRH are planning to be in Kenya and activate two IOTA islands between February 10-20th (2010). Callsign will be 5Z0H (IK8VRH informs OPDX that this will be the only time [first time] the 5Z0 prefix will be used) and islands mentioned are Lamu Island (AF-040) and Wasini Island (AF-067). QSL via LoTW, by the Bureau or direct to IK8VRH: P.O. Box 173, I-80016 Marano (NA), Italy. Visit the 5Z4H Web page at: http://5z4h.sitonline.it

6V, SENEGAL. Just a reminder that Seb, F8IJV, will be on his honeymoon here between October 15th and November 1st. He plans to be active in the CQWW DX SSB Contest (October 24-25th). He will try to operate before and after the contest as 6V7Q on 160-6 meters, mainly on SSB and the Digital modes. He will be operating from Jean-Francois, 6W7RV, QTH in La Somone. QSL via F8IJV.

8Q, MALDIVES. Jim, G3VDB, will be active 8Q7EJ from Vilamendhoo Island (AS-013) between now and October 25th. Activity will be holiday style and subject to hotel permission and local conditions. Look for operations on CW, RTTY, PSK31 and possibly SSB. He will use 100 watts into wire antennas. QSL via his home callsign.

CM2, CUBA. Frank, CM2IR, informs OPDX that he is on 40 meters using BPSK31 on 7035 kHz (IOTA NA015 and GRID LOCATOR EL83tc). He is also on SSB around 7150 and 7170 kHz (times not provide). QSL via EB7DX, QSL Manager with 2 USDs or IRCs. QSL SENDING ONLY BY REQUEST!!!

CN, MOROCCO. Jim, W7EJ, will be active as CN2R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (??) entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (???) entry. He is testing wire yagis/beverages on lower bands. QSL via OH2BYS.

EA9, CEUTA AND MELILLA. A group of Spanish operators will be active as EE9Z during the CQWW DX SSB Contest (October 24-25th) as Multi-2 or Multi-Single entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jose/EA9CD, Enrique/EA9GW, Jose/EA9PY, Mariano/EA9LS and Jorge/EA9LZ.

EI, IRELAND (On the Bird!). Marc, W4MPS, will be active as EI/W4MPS from County Cork between October 16-26th. Most of the time he will be in Grid IO52, although he may also travel to IO42 and IO51 (if the family ever lets him out of the pub). Marc states that he uses a FT-60R at 5 watts and an Arrow antenna on AO-51.

FS, SAINT MARTIN (Possible PJ7). Craig, AH8DX, will once again be active as FS/AH8DX starting October 22nd. Activity will include the CQWW DX Contest (October 24-25th) as a Single-Op/All-Band entry. Operations outside of the contest will be on 160/80 meters CW and SSB. Look for 40 meters RTTY also. QSL via AH8DX direct or via LoTW. Craig may also be active as PJ7/AH8DX from St. Maarten.

FT/G, GLORIOSO ISLAND (QRT). The FT5GA team is now QRT and is happy that the goal of 50k QSOs was reached by a crew of 5 operators with two and sometimes three stations. The FT5GA went QRT on October 7th (a day earlier than expected due to the military flight schedule). According to their Web page, they have made a total of 50427 QSOs with 15250 unique callsigns (24235/CW, 21080/SSB and 5112/RTTY). For updated details, visit the FT5GA Web page at: http://glorieuses2008.free.fr
QSL Manager is F5OGL: Didier Senmartin, P.O. Box 7, F-53320 LOIRON, FRANCE. Online log is available at: http://www.clublog.org/charts/?c=FT5GA
LATE MINUTE ADD-ONS: Didier, F5OGL, states, "The logs of the FT5GA operation will be very soon on LoTW." Also, a couple of pictures of the operation are now available at: http://picasaweb.google.fr/MauriceF5NQL/FT5GA#

HC8, GALAPAGOS ISLANDS. A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal (SA-004, WLOTA L0094) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. QSL via W5UE.

HG0, HUNGARY (WFF Op). This October, members of the Regionalis Radios Sportklub Puspokladany plan to start a year long activation of different Hungarian National Parks that qualify for the WFF program (see the Web page at: http://www.wff44.com/en). The first event will take place from the Hortobagy National Park <http://www.hnp.hu/index_en.php> between October 12-18th. The area has a reference number of HAFF-006. They will use the special callsign HG0WFF. QSL by the Bureau is "OK", but their QSL Manager is HA0HW. Some of the operators will use their own callsign with mark /p.

HP, PANAMA. Members of the Radio Club de Panama (HP1RCP) will be active during the 2009 JOTA event, October 17-18th, from Panama City, Panama, Colegio La Salle assisting Troop 4.

ID9N VIDEO AVAILABLE ON YOU TUBE! Members of the Noantri DX & Contest Team that were active as ID9N from Vulcano Island (Eolian Group) (IIA ME-018, MIA MI-122, WLOTA 1001) in April, now have a video available on YouTube at: http://www.youtube.com/watch?v=iwbJb66leaM

INDIAN OCEAN GRIDS (On the Birds). Jim, ND9M/VQ9JC, sailing toward Diego Garcia (VQ9) at about 27, will be activating the following grids during the following AO-51 passes:
October 11th at 2258z - MI95 or MI96 (as ND9M)
October 12th at 1304z - MI84 (as ND9M)
October 12th at 2355z - MI63 (as either ND9M or VQ9JC)
October 13th at 1224Z - MI62 (as VQ9JC)
Jim will try to be active for AO-27 on Monday (October 12th/0757z) and Tuesday (October 13th/0906z). Those times are during his work schedule, and he may not be able to set up. Also, Jim "may" be active on SO-50 for very late passes Sunday (October 11th/1924z for MI96 or NI06) and Monday night (October 12th/1814z for MI73 or MI63). Jim is operating full duplex with an FT-897D (TX) and FT-817ND (RX).

IOTA NEWS.....
EU-038. Ben/DO1BEN and YL Barbara/DO1IQ will be active as PD/homecalls from Texel Island (WLOTA L0043) between October 16-22nd.
Activity will be on the HF bands, propagation permitting.
QSL via their home callsigns, the Bureau is preferred.

EU-054. Operators Raffaello/IT9ATF, Renato/IT9NPR, Pippo/IT9PPG, Antonino/IT9SAZ and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545), between October 24-25th, for the CQWW DX SSB Contest as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-118. RARE IOTA! Operators Oscar/EA1DR, George/EC2ADN, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning a DXpedition to Flannan Isles (a extremely difficult island to land on) during sometime early/mid-June, 2010. Last activation was in 2002 (also in 1989 and 1995). QSL Manager will be M0URX. More details, the callsign and Web site will be forthcoming.

NA-036. Rob, VE7RSV, will be active from Vancouver Island (CISA BC001, WLOTA L0858) during the W/VE Islands QSO Party (October 17-18th). QSL via address on QRZ.com.

OC-142. Ray, K9LUK, will be active as K9LUK/VK4 from Frazer Island between October 18-23rd. QSL via his home callsign direct.

SA-008. Orlando, PY2TJ, will be active as LU/PY2TJ from Isla Tierra Del Fuego (WLOTA L2448) between November 1-7th. Activity will be on all HF bands. QSL via PT2OP, direct is preferred

or by the Bureau.

SA-058. Members of the Grupo DX Caracas will be active as YW5F from
Farallon Centinela Island between November 6-9th. Activity
is to celebrate the 20th anniversary of the Caracas DX Group.
Operations will be on 80-2 meters using CW, SSB and FM. QSL
via DM4TI.

J5, GUINEA-BISSAU. Jose, CT1DSV, will be active as J5S between October
12-18th (especially between October 17-18th). QSL via his home callsign.

J8, ST. LUCIA. John, W5JON, will once again be operating from the hilltop
QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between
October 20-30th. His callsign will be J68JA. Reference numbers are: IOTA
NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including
60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into
the following antennas: Alpha Delta DX-LB and DX-EE Dipoles, and a 3
element yagi on 6m. Activity will also include the CQWW DX SSB Contest
(October 24-25th) as a Single-Op/All-Band entry. QSL via W5JON. John
adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

JT1, MONGOLIA (EME Op). Operators Jeremy/W7EME and Jim/K7YO are active
on 2 meter EME from Mongolia as JT1UN and JT1UN/JT5, and also JT1YO
and JT1YO/JT5 on 70cm, until October 14th. Activity will be from the
JT1KAA HQ station of the Mongolian Amateur Radio Society. This operation
will be the first Moon Bounce QSO from Mongolia. For more information,
please visit: http://www.w7eme.org/ulaanbaatar

KH4, MIDWAY ISLANDS (OC-030). On Saturday, October 10th, the following
press release was sent out from Tom, N4XP: "The entire team is in Honolulu.
On Thursday when the first members were to depart to Midway we were
informed of a problem with the plane involving an oil leak. We were
assured it was fixable. Friday several test flights were made that
determined that the repairs were unsuccessful. We are frantically
searching for alternative means. We discovered yesterday that there
are no available planes on the island that are either certified to fly
to Midway or large enough for us. We are negotiating with a company in
California for a jet as well. The plane we originally chartered is about
to take off on a test flight to determine if the repairs made overnight
were successful. The team is not giving up and exploring ALL options to
make this happen. Fish and Wildlife is being very supportive of our
efforts but in no way will they extend the end date of our operation
beyond the 19th due to the return of migratory species that have already
begun to return early. We will update this website in 5 or 6 hours when
the plane returns and is checked out. We are as frustrated as you."
On Sunday, just before going to print, a statement on the KH4 Web page
states, "(0400z) We have just learned our aircraft is in the air testing
repairs made in the past 24 hours. We are anxiously waiting the results."
For more details, updates, online log, frequencies and bios, go to:
http://www.midway2009.com
QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA
30620-9989 USA) or LoTW. See the above Web page for complete details.

KH6BZF PROPAGATION FORECAST/REPORT (For October 12-18th)....
Oct 12 AN SOLAR REFERENCE
Oct 13 AN ---------------
Oct 14 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 15 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 16 AN LN - Low Normal
Oct 17 AN
Oct 18 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH8, AMERICAN SAMOA. Lee, KH6BZF, informs OPDX that a relief fund is now set up for American Samoa at: C/O BANK OF HAWAII, ATTN: AMERICAN SAMOA RELIEF, 111 SOUTH KING STREET, HONOLULU, HI 96813.

MU, GUERNSEY. Gerhard, OE3GEA, will be active as MU/OE3GEA from Guernsey (EU-114, WLOTA L0013) between October 27-29th. Activity will be on the HF bands using CW and low power only. QSL via his home callsign, direct or by the Bureau.

NYQP IS BACK! (After 25 years!) The Rochester DX Association looks forward to your support and participation in the 2009 New York QSO Party. The event takes place Saturday, October 17th, starting at 1800z (2:00 PM Eastern) for 12 hours. Check out the NYQP Web page for complete rules, FAQ's, Software, Forum, County maps and Log submissions at: http://www.NYQP.org Over thirty plaques to be awarded. <http://www.NYQP.org/sponsorship.php>

OH0, ALAND ISLAND. Look for OH0Z to be active once again in the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. Operators mentioned are: Juha/OH1JT, Timo/OH1NOA, Jouko/OH1RX, Timo/OH1TM, Ari/OH5DX, Tomi/ OH6EI, Timo/OH6GLE and Juha/OH6XX. QSL via W0MM.

PJ2, NETHERLANDS ANTILLES. Members and non-members of the Caribbean Contesting Consortium (CCC) will activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. QSL via N9AG or LoTW. Operators mentioned are: Geoff/W0CG/PJ2DX, David/G3NKC, Martin/G4XUM, Kyle/WA4PGM, John/K6AM, Wayne/K8LEE, Joe/W9JUV, Kelly/N0VD and Richard/N0YY. Operators will sign as PJ2/homecall before the contest on all bands and modes. QSL via their home callsigns. Visit the CCC Web site at: http://www.pj2t.org

QSL INFO AND NEWS.....
TC1ELH via POB 73, Karakoy 34421, Istanbul, Turkey. There was activity by the TCSWAT from the Marmara Eregli Lighthouse (TUR059) during this past weekend. This was the first activation of the lighthouse. If you are interested in Lighthouse activities, please check the Web site for upcoming TCSWAT events and awards at: http://www.tcswat.org

QSLS VIA LOTW: 5W0VK and XV3RRC

QSLS RECEIVED VIA MAIL: 6I7CQ, 6J2T, 7P8OK, A45WD, A61Q, EA9IB, T6AD, TO8YY, TU5JM, V51AS, XF4T, YS1MAE, Z29KM and ZK2V

QSLS RECEIVED VIA THE BUREAU: EZ8BO, EZ10BO, EZ21BO, EZ75BO, EZ56BO, EZ60SB, EZ3A, EZ75R, EZ21A, EZ56V, EZ10A, EZ8CW and EZ8-001

TC1, TURKEY. Club members for the TRAC Istanbul Branch (TA1KB) will activate their new club station using the special callsign TC1IEM between October 16-18th, for the "Istanbul Eurasia Marathon". The race will take place on October 18th, and it is the only marathon race that starts from Asia and ends in Europe. Details about the race are on: http://www.istanbulmarathon.org/en/index.php
The race course is only two hundred meters away from the new club station. Activity will be on the HF bands. QSL via the TA Bureau is preferred (or direct to TA1KB).

TF, ICELAND. Siggi, TF3CW, has announced that he will be active in the CQ WW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as Single-Op/Single-Band (40m) entries. QSL via LX1NO.

TK, CORSICA (Contest and IOTA Op). Paolo, IV3UHL, will be active as TK/IV3UHL during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/ Single-Band (20m) entry. QSL via IV3UHL. He states that he will probably activate EU-164 before the contest. He is also looking for one more operator. If interested, E-mail him at: iv3uhl1@libero.it

TK, CORSICA. Salvatore, IK8UND, will be active as TK9R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Assisted entry. Look for activity on CW and RTTY before the contest. QSL via IK8UND direct ONLY.

TX3, CHESTERFIELD ISLAND. Operators George/AA7JV and Tomi/HA7RY report on their Web page that last minute tests and preparations are under way for the TX3A operation to take place between November 23rd and December 6th. Equipment is being packed and weighed. They have both weight and capacity constraints, and they like to keep things simple. Many improve-ments have been made to the equipment (antennas and radios). They have also loaded and tested RTTY hardware and software. There will be RTTY on Chesterfield Island, if they make it there! Read their complete update at: http://www.tx3a.com/news.html

TX5, AUSTRAL AND MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/ SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will be moving onto Nuku Hiva Island (OC-027) in the Marquesas Islands group between October 16-22nd. Callsigns will be TX5SPM. Remember, their goal is to make as many QSOs as possible, mainly with Europe on the lower frequency bands. If possible (propagation), they will also be working on all the higher bands. They are planning to be active on CW, SSB and RTTY (maybe PSK31). The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V3, BELIZE. Rich, N0HJZ, will be active as V31MW from Placencia between October 17-26th. Activity will be on all bands during his stay. He will also operate as V31MW during the CQWW DX SSB Contest (October 24-25th)

as a Single-Operator/All-Band/High-Power entry. Rich informs OPDX that he may be the only entrant on from Belize this year, so make sure you look for him. QSL via LoTW or direct with SASE.

VE2, CANADA (Zone 2). Operator Yuri, VE3DZ, will once again be active as VE2IM from Sept-Iles, QC (Zone 2), during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via VE3DZ. He will be there between October 21-26th.

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via VK6NE.

VP2M, MONTSERRAT. Operators George/K2DM, Peter/K3ZM, Glen/W4GKA and Jim/AD4J will be active as VP2MDG, VP2MZM, VP2MKA and VP2MIJ, respectively, from October 20-28th. The group will also be active as VP2MDG during the CQ WW DX SSB Contest (October 24-25th) as a Multi-Single entry. Also, look for VP2MDG on 6m SSB and VP2MZM on 160m CW outside the contest. QSL to their home callsigns.

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI), will once again be active as VP9KF from Baileys Bay, Hamilton Parish, between November 4-18th. Activity will only be CW on all bands. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Visit his Web page at: http://vp9kf.com/ Please, DO NOT send to the VP9 bureau.

VY1, CANADA (Yukon on 10 Meters!). "Yukon John", KL7JR, informs OPDX that plans are underway for the activation of Jacquot Island ("new one" in Kluane Lake) before and during ARRL's December 10 Meter Contest (December 11-13th). John states, "Hopefully the lake will be frozen enough to allow me to drive out to it! Can't seem to get there in summer- hi hi!" Look for VY1RST to concentrate on 10 meters for the contest and 14.260 (main) for non-contest activities. QSL via KL7JR by the CBA. LAST MINUTE ADD-ON: John/KL7JR and XYL Claire/WL7MY will be on 10-20 meters from Buckshot Betty's Cabins in Beaver Creek as VY1RST between November 19-23rd (before and during ARRL's November SS Phone Contest). E-mail for skeds at: KL7JR@Yahoo.com

W4, UNITED STATES (Special Event). As part of National Wildlife Refuge Week <http://www.nwrweek-radio.info/>, the South Florida DX Association (K4FK) will activate the Arthur R. Marshall Loxahatchee National Wildlife Refuge <http://www.fws.gov/loxahatchee> on Saturday, October 17th, from 1400-1830z, using the 1x1 call W4R. The station will be active on 20 and 40 meters SSB, and possibly CW. QSL via WA4WTG, with SASE.

WORLD WIDE DXPEDITION TROPHY (by Strange Radio Team). The Strange Radio Team presents the exclusive "WORLD WIDE DXPEDITION TROPHY" (WWDT) to the DXpedition of the year that provided the greatest interest to the ham radio world. The DXPEDITION is chosen from a yearly survey which is available in many ham magazines (both Italian and international) and on the Web at: http://www.strangeradioteam.com
The current survey being taken is for DXpeditions which took place between June 1st, 2008, and June 1st, 2009. The survey will end January 31st, 2010.

The DXPEDITION that is choosen/selected the most will be rewarded with a trophy. You can select or suggest a DXpedition at the following Web page at: http://www.strangeradioteam.com/wwdxt/index.asp
The award will be presented during the "International DX Convention" organized by Strange Radio Team. Currently, there are 70 DXpeditions to vote for.

YJ, VANUATU (OC-035). Tomas, VK2CCC, will be active as YJ0CCC between October 30th and November 5th. Activity will be limited, but operations will mainly be on 160/80 meters CW. Also, look for some activity on the new 60 meters band (5403.5 kHz USB). QSL via his home callsign, the bureau is preferred.

YS, EL SALVADOR. Members of the Club de Radio Aficionados de El Salvador (CRAS) will be active as YS1YS during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via YS1GMV. Operators mentioned are: Francisco/YS1FAF, Federico/YS1FEA, Mario/YS1GMV, Mario/YS1MAE, Jose/YS1MS and Florencio/YS1ZC.

Z3, MACEDONIA. Members of the Radio Club "Nikola Tesla" (Z37M) and the MDXC will be active as Z37M during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via Z37M, by the Bureau or from the info on QRZ.com. Operators mentioned are: Ant/IZ8CCW, Pasquale/IZ8IYX, Dario/IT9SSI, Antonello/IT9YVO, Gianni/IZ8CGS, Alex/IZ8MOQ, Dom/IZ8JAI, Venco/Z36W and Chris/Z35X. Look for more details on the MDXC Web page at: http://www.mdxc.org

Your running of my pieces is a fraud upon your listeners on account of
misplaced context. Please cease and desist further.

Done over 20 years ago, running them as current taints me accordingly
as a fraud. This is formal, written demand for proper retraction.
Or, in the alternative, run the risk of a defamation suit.

Bob Sherin, W4ASX

==> + THREE KILLED WHILE ERECTING ANTENNA

At approximately 8:40 PM on October 12, a man, woman and their 15 year
old son were killed while trying to erect a 50 foot vertical antenna at
the home of the man's mother, Barbara Tenn, KJ4KFF, in Palm Bay,
Florida. The deceased were not licensed amateurs. According to police
reports, Melville Braham, 55, Anna Braham, 49, and their 15 year old
son Anthony were putting up an antenna -- Tenn's second -- at night
when they lost control of the antenna and it crashed into nearby
overhead power lines. The impact sent 13,000 volts of electricity
through the pole that the three were holding. A family friend, a 17
year old boy, was on the roof at the time of the accident. He and the
couple's daughter, who was in the house at the time, were not injured.

for more information.
```

==> + PUBLIC SERVICE: HAM PROVIDES RESCUE SUPPORT AT UTAH MARATHON

While not as well known as the Boston and New York City Marathons, Utah's St George Marathon <http://www.stgeorgemarathon.com/> draws more than 7000 runners to the town of St George -- located 300 miles south of Salt Lake City, near the Utah-Arizona-Nevada border -- each year. The race, now in its 33rd year, uses shuttle vans equipped with Amateur Radio operators and medical personnel to provide any help and support needed along its course. On October 3 -- race day -- Brian Plumb, KE7HNW, was driving Shuttle #3, with Kathy Hutchinson, a nurse at a local hospital, by his side. Click here <http://www.arrl.org/news/stories/2009/10/15/11141/?nc=1> for more information.

==> + OPERATING: TEAM LEADERS SELECTED FOR WRTC 2010

After a grueling selection process, the organizers of the 2010 World Radiosport Team Championships (WRTC <http://www.wrtc2010.ru/>) have selected team leaders representing all six continents. Of the 76 applications submitted, 44 were selected as Team Leaders; these Team Leaders will now choose a partner. WRTC, held every few years, takes place during the IARU HF World Championships, July 10-11. In 2010, WRTC will be held just outside Moscow. Click here <http://www.arrl.org/news/stories/2009/10/13/11133/?nc=1> for more information.

==> OPERATING: GET READY FOR JOTA THIS WEEKEND!

<http://www.youtube.com/watch?v=OQIHdml8inU> When Scouts want to meet young people from another country, they usually think of attending a quadrennial World Jamboree. But each year, more than 400,000 Scouts and Guides "get together" over the airwaves for the annual Jamboree-on-the-Air (JOTA). This year, JOTA celebrates its 52nd anniversary. JOTA follows a 48 hour schedule beginning at 0000 local time on Saturday, October 17, continuing through 2400 local time on Sunday, October 18. Click here <http://www.arrl.org/news/stories/2009/10/15/11142/?nc=1> for more information, including suggested frequencies, satellite operations, available resources and more.

==> + OPERATING: AFTER FALSE STARTS, MIDWAY ISLAND DXPEDITION OFF TO GOOD BEGINNING

After the airplane scheduled to take the K4M DXpedition team from Honolulu to Midway Island developed engine trouble, there was doubt as to if the team would even make it to the island. But Murphy didn't get in the way -- mechanics found the necessary parts to get the plane in the air safely. After a four hour flight, the team arrived on Midway at 0700 UTC on Monday, October 12 to start operations. Originally scheduled to be on-the-air for 10 days (beginning October 9), the team might not be able to extend their time on the island, due to US Fish and Wildlife Service (USFWS) regulations. Click here <http://www.arrl.org/news/stories/2009/10/13/11137/?nc=1> for more

information.

==> + OPERATING: HAMS ON-THE-AIR TO SUPPORT NATIONAL WILDLIFE REFUGE WEEK

The KP1-5 Project -- organizers of the 2009 Desecheo Island DXpedition -- is pleased to announce that Amateur Radio operators will be operating in observance of the 2009 National Wildlife Refuge Week, on the air October 10-18. This event features scores of festivals and special events that help connect people with nature at the country's 547 National Wildlife Refuges. Click here <http://www.arrl.org/news/stories/2009/10/14/11139/?nc=1> for more information.

==> + OPERATING: ARRL DXCC DESK APPROVES FT5GA OPERATION

ARRL DXCC Manager Bill Moore, NC1L, reports that the FT5GA operation on Glorioso Island <http://glorieuses2008.free.fr/index-e.htm> -- September 14-October 8, 2009 -- has been approved for DXCC credit. Until this operation, Glorioso sat at number 4 on DX Magazine <http://www.dxpub.com/>'s Most Wanted list; five operators operating for 23 days made more than 50,000 QSOs to make this rare one available.

==> HINTS & KINKS : ALTOIDS TIMES TWO

Sam Green, W0PCE, of St Louis, Missouri, has a different take on those ubiquitous Altoids tins:

Many of us mount compact circuits in cases that previously contained mint candies. My friend Matt, W0XEU, suggested packaging more complex circuits in multiple Altoids tins by mounting them back to back, a simple yet elegant idea.

I built this circuit in a "double-wide" arrangement because I needed somewhere to put the

batteries. This offered the added advantage of providing a means to filter bench power during development and testing so I wouldn't leak ambient RF signals into the main compartment with its very sensitive circuitry. I simply drill a hole near each corner to screw the boxes together. If you are careful with the placement of the holes you can even turn the arrangement around later to reverse the way the covers open. Otherwise, plan ahead. I feed power between compartments via a threaded coaxial feed-through EMI <http://www.mouser.com/tusonix>(electromagnetic interference) filter <http://www.tusonix.com/filters.html>, with additional bypass capacitors for this very sensitive application. The threaded filter

serves in place of one of the screws that hold the cases together. I use conductive adhesive-backed copper tape <http://parts.digikey.com/1/parts/1376464-tape-copper-foil-1-x-18yds-1245-x-1.html> as a gasket to minimize leakage into the shielded compartment that

contains the sensitive circuitry.

You can extend this method to additional compartments where you might want many stages of gain and you need to isolate and control the coupling between them. This is a very simple and effective way to prototype more complex circuits before you have to worry about customizing the packaging. Matt and I hope you will find this method useful. -- 73, Sam Green, W0PCE, 10951 Pem Road, St Louis, MO 63146, w0pce@arrl.net

==> + DID YOU KNOW? THE WOUFF HONG

Every amateur should know and tremble at the history and origins of this fearsome instrument for the punishment of amateurs who cultivate bad operating habits and who nourish and culture their meaner instincts on the air. The Wouff Hong <http://www.arrl.org/tis/info/history.html#hong> was invented -- or at any rate, discovered -- by "The Old Man" himself, just as amateurs were getting back on the air after World War I. The Old Man (who later turned out to be Hiram Percy Maxim, W1AW, co-founder and first President of ARRL) first heard the Wouff Hong described amid the howls and garble of interference as he tuned across a band filled with signals that exemplified all the rotten operating practices then available to amateurs (considering the state of the art as they knew it). As The Old Man heard it, the Wouff Hong was being used on some hapless offender so effectively that he investigated. After further effort, "T.O.M." was able to locate and identify a Wouff Hong. The Old Man never prescribed the exact manner in which the Wouff Hong was to be used, but amateurs need only a little imagination to surmise how painful punishments were inflicted on those who stoop to liddish behavior on the air. The Original Wouff Hong is on display at ARRL Headquarters. Find out more about this dreaded instrument of torture here <http://www.arrl.org/tis/info/history.html#hong>.

==> AMATEUR RADIO IN SPACE : COLUMBUS ANTENNAS TO TAKE TO THE SKIES

<http://www.youtube.com/watch?v=1efXlL75dvA> In February 2008, the new Columbus module -- built by the European Space Agency (ESA) -- was attached to the International Space Station (ISS). When ESA first announced its intentions for the module a number of years ago, the ARISS International team began planning how to get ham radio integrated. While ESA's blueprints were being drawn, hams made serious inquiries and gave presentations, eventually winning approval to have antenna feed-through connectors added to the module. ARRL ARISS Program Manager Rosalie White, K1STO, discusses the latest developments <http://www.arrl.org/news/features/2009/10/05/11110/?nc=1>.

==> + EVENTS: DAYTON HAMVENTION CREW READIES FOR 2010 SHOW

Organizers of the 2010 Dayton Hamvention <http://www.hamvention.org/>Â® -- May 14-16 -- are gearing up for one of the largest Amateur Radio gatherings in the world. According to Hamvention Assistant General

Chair Michael Kalter, W8CI, a new online program for taking and tracking online orders has been implemented and all volunteer committee chairs and assistants are in place. Kalter said that the theme of the 2010 Hamvention is Amateur Radio Clubs Worldwide: The Lifeline. "We all recognize how much Amateur Radio clubs and organizations contribute to the service, Kalter said. "We all see this in how clubs pull together in disasters, Field Day, contests, working with youth, teaching classes and sponsoring hamfests; in parts of the world, the club truly is the communication link to the world." Kalter said that Hamvention organizers are asking hams to submit photos of your Amateur Radio club and the activities that the club participates in. "We would like to use some of these on the front and back cover of the Hamvention program for 2010," he said. "We are also looking for stories of interest from your club.".

==> THIS WEEK ON THE RADIO:

This week, look for the School Club Roundup <http://www.arrl.org/SCR/> October 19-23. There's an NCCC Sprint October 16. The Iowa QSO Party, the Feld Hell Sprint and the Microwave Fall Sprint are October 17. On October 17-18, check out the New York QSO Party, JARTS WW RTTY Contest, the Stew Perry Topband Challenge, the Worked All Germany Contest and the W/VE Islands QSO Party. The Illinois QSO Party is October 18-19 and the Run for the Bacon QRP Contest is October 19. Next week, you'll find another NCCC Sprint on October 23. The CQ Worldwide DX Contest (SSB), the CW and Digital runnings of the10-10 International Fall Contest, and the 50 MHz Fall Sprint are October 24-25. The SKCC Sprint is October 28. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL PUBLICATIONS : CHECK OUT THE NOVEMBER/DECEMBER ISSUE OF QEX

The November/December issue of QEX <http://www.arrl.org/qex> is coming soon, and it is full of theoretical and practical technical articles that you don't want to miss. Click here <http://www.arrl.org/news/stories/2009/10/14/11138/?nc=1> to discover what's inside this upcoming issue. QEX is edited by Larry Wolfgang, WR1B <lwolfgang@arrl.org>, and is published bimonthly.

==> THE ARRL LETTER : HTML VS PLAIN TEXT

Many people have asked how they can continue to read The ARRL Letter in a plain text format. ARRL IT Department Manager Jon Bloom, KE3Z, has provided instructions <http://www.arrl.org/arrlletter/about.html#plaintext> to do just that. According to Bloom, most e-mail reading programs provide some means of

accessing the plain-text version if you want it. Unfortunately, we are not able to send out plain text versions (like the ones prior to October 1) of The ARRL Letter. If you like the look of HTML (including pictures and videos), but do not want to receive the Letter in HTML format, you can access current and archived editions via the ARRL Web site <http://www.arrl.org/arrlletter/>.

==> TAPR ELECTS NEW OFFICERS

At the recent ARRL and TAPR Digital Communications Conference (DCC <http://www.arrl.org/?artid=9182>) in Chicago, the TAPR <http://www.tapr.org/> Board of Directors of selected a new slate of officers and named Dr David Toth, VE3GYQ, President Emeritus of TAPR. Dr Toth served as TAPR President from 2005-2009 and as a member of the Board from 1987-1993 and 2004 to present. The new TAPR officers are: Steve Bible, N7HPR, President; Scott Cowling, WA2DFI, Vice President; Tom Holmes, N8ZM, Treasurer; and Stan Horzepa, WA1LOU, Secretary. TAPR recently elected three new members to their Board of Directors: Scott Cowling, WA2DFI; John Koster, W9DDD, and Mark Thompson, WB9QZB. -- Thanks to Stan Horzepa, WA1LOU, for the information

==> SILENT KEY: MATHIAS BJERRANG, LA5NM/JW5NM (SK)

Noted DXer Mathias Bjerrang, LA5NM/JW5NM, passed away October 11. He was 67. While in Svalbard, Norway, Bjerrang slipped and fell while walking, hitting his head and was later found Sunday morning, cold and unable to speak. He was brought inside where he later stopped breathing; he was unable to be resuscitated and died. A native of Norway, Bjerrang went on many cold weather DXpeditions, including the North and South Poles. Many times, he provided the sought-after double multiplier of Zone 40 and Svalbard in contests. Bjerrang earned WAS <http://www.arrl.org/awards/was/> as JW5NM and DXCC <http://www.arrl.org/awards/dxcc/> as both JW5NM and LA5NM; he was previously on the DXCC Honor Roll as JW5NM. Thanks to The Daily DX <http://www.dailydx.com/> for some information

==> ORGANIZATIONAL: ARRL MEMBERSHIP NEWSLETTERS, BULLETINS AND NOTIFICATIONS

Did you know the ARRL offers more newsletters than just The ARRL Letter? One of the many ARRL membership benefits includes other newsletters, such as the ARRL Contest Update <http://www.arrl.org/contests/update/> (a bi-weekly contest newsletter), the ARES E-Letter <http://www.arrl.org/FandES/field/ares-el/> (sent monthly, containing public service and emergency communications news), the ARRL Club News, the ARRL Instructor/Teacher E-Letter and the VE Newsletter, to name a few. You can also elect to receive news and information from your Division Director and Section Manager (keep in mind that not all Divisions/Sections send notices), as well as W1AW bulletins that relate to DX, propagation, satellites and Keplerian reports. The ARRL also offers a free notification service to members, letting them know when

their membership and license are due to expire. Sign up for these newsletters, bulletins and notifications on the Member Data page of the ARRL Web site <http://www.arrl.org/members-only/memdata.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

<http://www.arrl.org/cep/student/>Registration remains open through Sunday, October 25, 2009, for these online course sessions beginning on Friday, November 6, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cep@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1679 - October 16 2009

Amateur Radio Newsline report number 1679 with a release date of Friday, October 16th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. A family looses its lives trying to help a ham put up an antenna, Australia unveils a free Electromagnetic safety calculator that covers the VHF and UHF ham bands, Midway Island finally makes it on the air and D-Star goes to new heights and then jumps out. Find out what we mean on Amateur Radio Newsline(tm) report number 1679 coming your way right now.

RADIO SAFETY: THREE ELECTROCUTED INSTALLING HAM ANTENNA IN FLORIDA

Three people trying to help a Florida ham by installing an antenna for her have been electrocuted in a bizarre accident that happened after dark. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

A mother, father and their 15-year-old son died on Monday, October 12th. This, after being electrocuted while attempting to erect a ham radio antenna.

The Palm Bay Florida Police Department identified the victims as Melville Braham, 55, Anna Braham, 49, and their 15 year old son Anthony. None were licensed radio amateurs but they appeared to have been assisting an area ham with an antenna installation.

Authorities say the family was attempting to raise the antenna mast when they lost control and it struck an overhead power line. It made contact with the overhead wiring and sent 13,000 volts down through the antenna mast the three were holding,

When paramedics arrived, they found all three on the ground not breathing. Rescue crews immediately tried to resuscitate them. Anna Braham was pronounced dead at the scene. The father and son were taken to a local hospital, where they were later pronounced dead.

Florida Power & Light Co. crews also responded to the scene. They shut off power in the area while authorities collected evidence and documented the scene.

According to news reports, Anthony Barham attended Southwest Middle School. Grief counselors were available at the school on Tuesday October 13th to help students deal with the tragic loss of their friend.

Federal Communications Commission records do not show that any of the victims were licensed amateur radio amateurs. They do, however, show a license issued to a Barbara V. Tenn, KJ4KFF, at the address where the electrocutions occurred.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

This appears to be yet another case of those trying to put up an antenna not realizing the potential danger of nearby overhead high tension electric distribution, and the fact that these wires are all but invisible at night. (Published news reports)

**

RADIO SAFETY: NEW EMI CALCULATOR AVAILABLE FROM THE ACMA

Australia's Swinburne University, together with EM Software and Systems, has developed an online tool that will allow users to calculate exclusion zones around antennas where radiation levels exceed safety standard limits.

Commissioned by the Australian Communications and Media Authority, the exclusion zone calculator will allow people to conduct safety assessments of transmitting antennas, such as those found on boats, four wheel drives, at fixed station locations and even communication networks operating in the VHF and UHF spectrum. This includes ham bands from 2 meters on up through 2.4 GHz.

To calculate the zone, all users need to do is enter the antenna type, transmitter power, antenna gain and frequency band into the online tool. Click your mouse and the program will automatically calculate the safe distance around the antenna in metric distance.

The ACMA has also produced a booklet entitled Human Exposure to Radiofrequency Electromagnetic Radiation Information for Licensees of Radio-Communications Transmitters. Both the on-line tool and a booklet that explains EME health exposure can be found at www.acma.gov.au. (ACMA)

**

HAM RADIO IN SPACE: AMSAT-NA ANNOUNCES NEW FM CUBESAT

AMSAT North America says that its once again headed back into space. This time with a brand new cubesat that will be like no other before it.

During the board meeting held Oct. 8 in conjunction with the Annual Space Symposium the AMSAT Board of Directors adopted the Engineering Task Force recommendation that low-cost launch options be pursued immediately. This means that the AMSAT engineering team will develop a 1U CubeSat design effective immediately.

The new AMSAT CubeSat's initial capability is planned to add to the popular low-earth orbit FM transponder fleet allowing hams to continue to use their existing handheld and portable antenna systems. Such a satellite also continues the accessible entry path for new satellite operators to get started.

Meantime, word that the flight version of ARISSat-1 replacement for SuitSat 2 has been developed to be adaptable into the CubeSat model. This will allow a modular approach to mission design using proven subsystems and components.

The ARISSat-1 mission planned in 2010 and will be the initial flight test of AMSAT's modular satellite. According to Tony Monteiro, AA2TX, who is AMSAT North America's Vice-President of Engineering, this approach to building flight hardware gets AMSAT back up in space with new satellites by leveraging the skills and technology it has today.

AMSAT says that there's another reason for this fast track approach. This is because the existing FM satellites are starting to show their age. (AMSAT, N3TL)

**

BREAKING DX NEWS: MIDWAY ISLAND TEAM FINALLY ARRIVES ON THE ISLAND

It took a few more days than planned but the Midway Island DXpedition has finally arrived and is on the air. The K4M team was supposed to be on the island on Friday, October 9th, but an oil line leak in one of the engines of the Grumman Gulfstream 1 turbo-prop aircraft chartered to carry them from Hawaii to Midway kept them on the ground an extra two days.

The team arrived safely on Midway Atoll at 07:00 UTC on Monday morning October 12th. At daybreak they began assembling their antennas to put the stations on air.

As reported last week, the multi-national team of 18 operators will activate Midway Island through October 19th. The U.S. Fish & Wildlife Service had authorized this amateur radio operation from this rare U.S. entity for only a 10 day period beginning on the 9th but has told the team that no extension can be granted due to the migratory schedule of the islands indigenous bird population.

This is the first amateur radio activity from Midway in almost 10 years. Midway Island ranks number 24 world-wide and number 13 in Europe on the DX Magazine's "Most Wanted List".

We will have more DX news later on in this weeks Amateur Radio Newsline report. (K4M Press Release)

**

DX FOLLOW-UP: GLORIOSO DX TEAM REACHES 50000 QSO'S

The FT5GA Glorioso Island operation is now QRT and the operators are happy that the goal of 50,000 QSOs' was reached. This by the crew of five hams with two and sometimes three stations on the air.

The operation was forced to end operations on October 7th. This was a day earlier than expected due to the military flight schedule.

According to their Web page, they have made a total of 50,427 QSOs with 15,250 unique callsigns. Of these some 24,235 were on CW, 21,080 on SSB and 5,112 scored the path using RTTY.

The QSL Manager for this operation is Didier Senmartin, F5OGL. And we will have more DX related news later on in this weeks Amateur Radio Newsline report. (Southgate)

**

PUBLIC SERVICE: HAM RADIO AND THE CHICAGO MARATHON

Ham radio helped make the recent Bank of America Chicago Marathon an overwhelming success. The race took place on Sunday, October 11th with about 75 hams helping to coordinate the event while providing a safety web to oversee the almost 35,000 runners.

Coordinating the ham radio aspect of the event was Jerry Martin, KC9BDA, of Beech Park, Illinois. He assembled a team that came from ARES. RACES, SATERN, the local American Red Cross chapters and many other local clubs. The hams set up two- separate networks covering medical emergencies and logistics. They also manned 21 aid and medical stations while maintaining liaison with other volunteer groups and the National Weather Service.

The communications effort began in the wee hours of the morning and lasted until the final runner crossed the finish line. Hams mainly used dual band handhelds backed up by portable battery operated high power stations to communicate over the 26.2 mile course. Several repeaters donated their services and were held on stand-by in case they were needed

The winner of the men's competition was Kenya's Sammy Wanjiru, with a total time of 2 hours, 5 minutes and 41 seconds. The women's first place went to Liliya Shobukhova of Russia. She completed the course in 2 hours, 25 minutes and 56 seconds. There were also separate competitions for handcycle and wheelchair entries as well.

All of the ham radio operators who volunteered to provide communications were required to have previous experience in public service events. (WB9QZB, others)

**

PUBLIC SERVICE: THE ISTANBUL MARATHON

Chicago is not the only place that ham radio is involved in a marathon event. Members of the TRAC Istanbul Branch will activate their new club station using the special callsign TC1IEM between October 16th to the 18th. This to assist and commemorate the 2009 Istanbul Eurasia Marathon.

The Istanbul Eurasia Marathon is the only race of its type that starts in Asia and ends in Europe. All of the commemorative operations will take place on the high frequency bands. More on the race is on-line at www.istanbulmarathon.org (Southgate)

ENFORCEMENT: HOW THE SOCAL 2 METER CEMENT JAMMER WAS FOUND

A follow-up to last week's story of the proposed $4000 FCC fine that was levied against the Shimmick Construction Company and Obayashi Corporation for illegally operating in the amateur two-meter band. This was an excellent example of the close cooperation that now exists between the Los Angeles area FCC office and hams in the Official Observer and Amateur Auxiliary program. Amateur Radio Newsline's Joe Moell, K0OV, has the rest of the story in this report:

--

It all started in late April, when hams in central and northern Orange County began hearing conversations on 146.025 MHz, the output of K6SOA/R, which is owned by the South Orange Amateur Radio Association or SOARA. The transmissions were clearly for business and appeared to be related to construction work. SOARA has regular hidden transmitter hunts, so some of the club members were already equipped to go into action to find the source. Two of them, Richard Saunders, K6RBS and Richard Clark, N6UZS, reported strong signals in the cities of Orange and Costa Mesa. However, the strength and direction of bearings were not the same from one day to the next.

Other transmitter hunters and members of the Official Observer corps soon joined in. The search wasn't simple because the activity wasn't daily and it was sporadic on the days when it occurred. Next came reports of strong signals in Anaheim and Yorba Linda. Between the cuss words, the T-hunters heard conversations suggesting that they were listening to the handi-talkies of a concrete supplier at various job sites around the county.

On May 21, Dan Welch W6DFW, the Orange Section Official Observer Coordinator, hit pay dirt at a construction site of the Diemer Filtration Plant in Yorba Linda. His photos and recordings went to the FCC and within a week, the interference was gone. It should be noted that the concrete supply firm had obtained its handi-talkies from a commercial two-way radio supplier, which had mistakenly programmed them to transmit and receive on 146.025 MHz instead of 156.025 MHz. With no frequency readout and with tone squelch operational in their receivers, the concrete workers could not hear the SOARA repeater and had no idea that they were using an Amateur Radio frequency. Nevertheless, as the licensee for the radios, Shimmick-Obayashi got the Notice of Apparent Liability for Forfeiture and will have to either appeal it, pay the fine, or try to get their radio supplier to do so.

>From southern California, where our regular T-hunts keep us ready to find intruders to our bands at a moment's notice, this is Joe Moell K0OV for Amateur Radio Newsline.

--

The ham radio community in southern California developed a close working rapport with the local FCC office several years ago during the investigation into the activities of convicted jammer Jack Gerritsen. >From this latest quick enforcement action one might speculate that the relationship appears to be cast in concrete. (K0OV, ARNewsline(tm))

**

ENFORCEMENT: UNLICENSED UK BROADCASTER GETS BANNED FROM ROOFTOPS

The British may have stumbled on a unique solution to keep pirate broadcasters off the air. Don't let them have outdoor antennas. Don Carlson, KQ6FM, has more:

--

An unlicensed broadcaster has been banned from every roof top in London, England. This, after he pleaded guilty to installing pirate radio equipment on a tower in the city.

According to a report on UK telecommunications regulator Ofcom website, Kieran O'Sullivan received the anti-social behavior order following a successful prosecution by the regulatory agency. He also received an 18 week custodial sentence suspended for 12 months, a three month curfew, a ï¿½1,200 fine, and had his radio equipment seized.

Ofcom worked with Camden Council and police to secure the prosecution following complaints from residents about Freeze FM operating from estates in Hampstead. Neighbors had complained about pirate radio operators using roof tops to install equipment, which caused a nuisance to residents and damaged property.

And I'm Don Carlson, KQ6FM, in Reno.

--

You can read the full Ofcom report
http://www.ofcom.org.uk/consumer/2009/09/pirate-radio-rooftop-ban/
(Ofcom, BBC, others)

**

RADIO LAW: NEW ON-LINE FEDERAL REGISTER LAUNCHED

The Federal Register online version is now in an easier-to-read format at Data.gov. Now in XML format it is it easier to transport data from a Web site and store it, manipulate it or customize it elsewhere.

The Federal Register is published by the Office of the Federal Register. It in turn is a part of the National Archives and Records Administration and is updated Monday through Friday except on federal holidays.

The register went online in 1994 and is the official publication for rules, proposed rules and notices of federal agencies and organizations. It also provides executive orders and other presidential documents. (RW)

**

HAMVENTION 2010: AMATEUR RADIO CLUBS WORLDWIDE: THE LIFELINE

"Amateur Radio Clubs Worldwide: The Lifeline" will be the theme of the 2010 Dayton Hamvention slated for next May 14th to the 16th at the Hara Arena in Dayton, Ohio. According to Asst. General Chairman Michael Kalter, W8CI, we all recognize how much amateur radio clubs and organizations contribute to the service. This is especially true in the way clubs pull together in disasters, field days, contests, working with youth, teaching classes, and sponsoring hamfests. And says Kalter there are parts of the world where a ham radio club truly is the communication link to the world.

In order to help celebrate the world of radio clubs, Hamvention planners are asking for pictures from radio clubs around the world that it can use on the front and back cover of the Hamvention 2010 program magazine. It is also looking for stories of interest from interesting radio clubs as well.

In other Hamvention related news, Kalter says that all of our volunteer committee chairs and their assistants are in place for 2010 and have been meeting to make this the best Hamvention you have ever attended. He also notes that the organizations new online program for taking and tracking orders is up and running. He notes that many hours have been spent since he close of Hamvention 2009 to make all of these necessary improvements. The site can be accessed at www.hamvention.org so you have the chance to make your 2010 plans early. (Dayton Hamventionï¿½)

**

HAM HAPPENINGS: HAM RADIO CRUISE NIGHT IN VIRGINIA IN MAY 2010

Many of you are familiar with cruise-in events at restaurants, drive-ins, shopping centers or other venues. That's where participants bring their cars, trucks and motorcycles to display and compete for awards.

Ham radio operators are also proud of the time and effort invested in transportable stations and one radio club feels its time for them to show off as well. The Albemarle Amateur Radio Club in Central Virginia will sponsor the first Virginia Ham Radio Cruise-In from 10 a.m. until 4 p.m Eastern time on Saturday, May 1st, 2010. And like automotive buffs, this will be a chance for hams to meet, greet and show off their mobile and portable gear.

If it sounds like fun to you can get more information from Jim Crosby, K4JEC. His e-mail address is jecrosby at comast dot net (K4JEC)

**

NAMES IN THE NEWS: K7CR STEPS DOWN AS CHAIRMAN OF SBE EAS COMMITTEE

Some names in the news. First up is well known Washington state amateur and repeater coordination pioneer Clay Freinwald, K7CR. He is stepping down from the board of the Society of Broadcast Engineers due to term limits and is also leaving his post as chairman of the SBE's EAS Committee for the same reason.

Freinwald, who holds an Extra Class license and was instrumental in the formation of the Western Washington Amateur Relay Association is identified as closely as anyone in the broadcast industry with the EAS. He is a past recipient of Radio World Magazine's Excellence in Engineering Award and has served on the SBE board and chaired the EAS committee for a decade.

K7CR says that he will continue working with the committee under the new chairman, Ralph Beaver. Beaver operates a company known as Media Alert based in Tampa, Florida. (RW)

**

NAMES IN THE NEWS: UK FILM MAKER TO WORK WITH RADIO CLUBS

And UK filmmaker Esther Johnson is planning to use three different amateur radio clubs based in the London area. This, to set up a radio station during an exhibition of her work on 23rd, 24th and 25th October. The stations will accompany Johnson's 16mm film Tune In that she produced in 2006, and which focuses on amateur radio. Johnson will also be exhibiting photography of radio enthusiasts alongside her film work. Further information on Tune In can be found at www.blanchepictures.com/films/tunein.htm. (RSGB)

**

NAMES IN THE NEWS: G5RV LAST LOGBOOK SAVED IN EBAY AUCTION

And the final log/book of one of the UK's best-known radio amateurs has been saved for posterity.

The late Louis Varney, G5RV, was one of the founder members of the Chelmsford Amateur Radio Society in 1936. When Chelmsford club member Duncan Munro, M0KGK, spotted that G5RV's last ever logbook was being auctioned on e-bay the club decided to buy it.

M0KGK did the bidding and despite fierce competition managed to secure the logbook in the last eight seconds of auction. The logbook shows that G5RV's final QSO's were on January 11 2000 with G0WGP and Chelmsford club President Harry Heap, G5HF. Ironically, the entry appeared on page 73 of the logbook. Varney was, of course using a G5RV antenna that he designed for those final contacts (M5AKA, Southgate)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: KEN JOHNSON, W6FU - S.K.

The changing of the guard in amateur radio continues. This with word that Ken Johnson, W6FU, died of cancer on October 2.

Together with Don Wilson, K6RKE, Johnson founded educational FM station KPCS which later became KPCC. He also taught broadcasting classes at Pasadena City College for many years and also served as trustee of the college's W6BAB Amateur Radio station,.

Ken then traveled with the Los Angeles Dodgers, engineering their remote broadcasts for KWKW. Working with Jaime Jarrin, he saw four World Series Championships and collected countless stories.

A memorial service was to be held at 11 a.m. on Saturday, October 10th at the Assumption of the Blessed Virgin Mary Catholic Church in Pasadena. Ken Johnson, W6FU was age 89. (CGC, N6LL)

**

WORLDBEAT: WIA TURNS 100 IN 2010

The Wireless Institute of Australia turns 100 next year, making it the world's oldest national radio society. Now, its President, Michael Owen, VK3KI, says he wants the world-wide amateur radio community to join in the celebration. A commemorative QSL card will be issued for contacts with special events station VK100WIA between May and October of 2010. A limited edition operating award, called the WIA Centenary

Award is also to be available with two contacts with VK100WIA are required under its rules. Details of the centenary program can be found on the WIA website at www.wia.org.au. (WIA)

**

WORLDBEAT: D-STAR NOW REPRESENTED ON RSGB'S EMERGING TECHNOLOGY COMMITTEE

D-Star will now be represented on the Radio Society of Great Britain's Emerging Technology Committee. According to the RSGB announcement, as D-Star and digital voice communication continues to grow, it has become apparent that there is ever-increasing reliance on the Trust Servers that comprise the network infrastructure.

The administration of this network within the UK is carried out by the UKIT team who came together voluntarily to take on this vital role. The RSGB says that it wants to build upon the excellent work done by the team by giving it a more permanent structure. Following discussions at the recent UK National Hamfest, it has been agreed that they will become part of the Emerging Technology Committee. G7LWT will represent the UKIT on the committee while the other members will work on a corresponding basis. (RSGB, Southgate)

**

EMERGING TECHNOLOGY: KEYBOARDS THAT LEAK YOUR DATA

And if you think that the letters and numbers you type on your computers keyboard are secure because you have a good firewall, you might want to guess again. While your on-line connection might keep you invisible to others on the net, your keyboard could be sharing your data with anyone in range of your PC. Frank Lusa, VK2FJL, reports:

--

Audio report only Hear it by downloading this weeks MP3 version of the newscast at www.arnewsline.org.

--

One solution is to try shielding your keyboard cable if you are worried about information leaks. (WIA News)

**

CONTEST CORNER: THE NY QSO PARTY IS BACK

In contest news, its been away for a quarter of a century but the Rochester DX Association says that the New York QSO Party is back. The 2009 edition will take place on Saturday, October 17th, starting at 1800 UTC and running for the next 12 hours. For rules, county maps and log submissions take your web browser to www.NYQP.org (Via E-Mail)

**

DX

In DX, HA0HW reports that a group has begun a year long operation from different Hungarian National Parks. The first of these operating events took place from the Hortobï¿½gy National Park from October 12th to the 18th using the callsign HG0WFF. Their QSL manager is HA0HW but cards sent via the bureau are OK.

And a team headed by G3KHZ will be in Papua New Guinea from October 22nd through the 9th of November. Activity will be on 160 through 15 meters using CW, SSB and RTTY. Full details and QSL routing is on the web at www.425dxn.org.

DO1BEN and DO1IQ will be active portable PD from Texel Island between October 16th and the 22nd. Activity will be on the HF bands, propagation permitting. QSL via their home callsigns with the Bureau preferred.

A Dutch team plans to be active from Benin through the 30th of October. Check their website at www.benin2009.com for more information.

Lastly, JE2EHP, will be active as 4X stroke K1HP from Tel Aviv and Jerusalem Israel between October 29th and November 5th. His operation will be on all the High Frequency bands plus 6 meters, using CW, SSB and RTTY. QSL is via the bureau to JE2EHP.

(Above from various DX news sources)

**

THAT FINAL ITEM: D-STAR REACHES NEW HEIGHTS

And finally this week the story of a ham who has taken D-Star to a new height. New height as in 13,000 feet in the sky. Bill Pasternak, WA6ITF, has the details:

--

According to his posting on the D-Star Reflector, on Saturday October 10 Mark Meltzer, AF6IM, of Palo Alto California went sky-diving and brought along an Icom IC 91AD D-Star enabled handie talkie.

Meltzer says that on his first jump he opened his chute at about 13,000 feet and worked numerous 2 meter analog FM simplex contacts. He also held a couple of analog FM QSOs on 1.2 GHz through the W6CYX and W6LRW linked repeater system on 1282.225.

At about 8000 ft he decided to try D-Star but heard only a garbled R2D2 sounding reply. At the time Mark says that he was flying his canopy away from Mt. Diablo which placed my body between the repeater and the IC 91AD's antenna. So he turned towards Mt. Diablo and the distortion went away and he was able to work Rick Mc Cusker, WF6O, in Sacramento clearly through the machine.

AF6IM notes that he was also carrying analog APRS gear that not only reported GPS derived data that not only included his altitude heading

and speed but also his blood oxygen level and pulse rate. He also thanks WF6O for being the other half of the D-Star parachute mobile contact and especially to Tim Barrett, K6BIV for making it all possible with his D-Star repeater system.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF in the newsroom near Los Angeles and wondering why anyone would want to jump out of a perfectly good airplane.

--

The jump took place at Byron, California which is a favorite area for sky diving. Byron, California is also home to the somewhat well-known and historical Byron Hot Springs. This is a now-abandoned resort which was a retreat that attracted many movie stars and famous athletes in the early 1900s. More information and telemetry data on AF6IM's accomplishment is on line at www.parachutemobile.org D-Star Reflector)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

GB2RS NEWS

Sunday 18th October 2009

The news headlines

* SAQ diary dates from the Swedish LF station

* Check your IRC expiry dates

* GB7MBC DX cluster is now available

The historic Alexanderson alternator transmitter located at Grimton, Sweden is preserved as a museum and is operated by volunteers on various special days throughout the year. The station will transmit CW on its usual frequency of 17.2kHz on 24 October at 0900UTC and 24 December at 0800UTC. Listen out for SAQ. These transmissions are well worth listening to if you can rig up some kind of the receiver; the musical sound of the keyed alternator is unique. No reports required and no QSL cards are given for the October transmission but QSLs are available for the Christmas Eve transmission. For more information check out www.alexander.n.se.

Operators who use International Reply Coupons, or IRCs, in the QSL exchange process are advised to check the expiry dates of their current stock because one batch is due to expire on 31 December 2009.

The GB7MBC DX cluster is now available for those listeners with mobile smartphones. Web pages have been created to make it simple to use the cluster when mobile. Although designed for an iPhone, they have been tested on Blackberry, Android and the Nokia N95. It should work with most smartphones. The pages feature filtering and the capability to click on a DX callsign to get the QRZ information for it. There are currently two pages, one for general use and one specifically for VHF, including 70cm. The General Cluster web address is www.gb7mbc.net/webcluster/iPhone.php and the VHF Cluster web address is www.gb7mbc.net/webcluster/iPhone_VHF.php. The group would be happy to receive your comments.

Due to administrative problems at the RSGB, there has been a delay in processing CRB checks for amateur radio examination volunteers. Of those instructors affected, almost all the references are in and all the CRB checks have been applied for. Quite a lot have been cleared and the people concerned have been informed and are now re-registered. If

you have not received a new welcome pack then we are still awaiting your CRB clearance, although it won't be too long now before you are back on the register. The RSGB would like to take this opportunity to thank you for your patience and understanding. This was an unfortunate incident and should not occur in the future.

In celebration of the 40th anniversary of the founding of Thornton Cleveleys Amateur Radio Society, members will be holding an open day at the United Reformed Church on Rossal Road, Thornton Cleveleys, on 24 October between 9am and 5pm. They will be displaying different aspects of amateur radio, with active stations on HF and VHF/UHF. There will be demonstrations of slow scan TV, digital communications, vintage wireless, internet linked radio, Morse and the licence training team will be available to answer any questions. Other amateurs are asked to listen for G4ATH on 80 and 40 metres and the calling channels on VHF/UHF and give them a call. Ted, G3WBB has further details on 01253 857466.

2

In November, the Chelmsford Amateur Radio Society will be starting revision classes for the Advanced Amateur Radio Communications Exam. The classes will be held in Danbury Village Hall near Chelmsford every Thursday evening from November 12 until December 3. The Advanced exam is being held on Monday December 7. Further details and booking information are available from the CARS training organiser Clive, G1EUC on 01245 224577.

If you are off to Portugal on holiday next month, you may be interested to know that November 15 sees the 12th Ham Fair in Lisbon, Portugal. Details can be found on the internet at www.arvm.org/index.fr2009.html. This is one of the biggest events in Portugal and aims to be more than just a show with new and second hand goods as visitors enjoy meeting new and old amateur friends.

And now for the details of rallies and events for the coming week

Sadly, the organisers of the Northern Mobile Rally, due to be held in Richmond School on 25 October, have been obliged to cancel it. Despite their promotional efforts, bookings haven't been high enough to make the rally viable. Please pass this message onto anyone you know who was thinking about travelling to this rally.

Today, 18 October, the Blackwood and District ARS Rally will be held at Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. Doors open at 10am for disabled visitors and 10.30 for other visitors. Admission is £2 and there will be trade stands, a bring & buy as well as an RSGB Bookstall. Details are available from Dave, GW4HBK, on 01495 228515, or by e-mail to ddlewhbk@btinternet.com.

Galashiels and District Amateur Radio Society will be holding their Annual Radio and Computer Rally in The Volunteer Hall, St John's

Street, Galashiels today, 18 October. Doors open at 11am and admission is £2. There will be trade stands, a bring and buy and refreshments. Details from Jim, GM7LUN on 01896 850245, or e-mail gm7lun@qsl.net.

Carrickfergus Amateur Radio Group, GI0LIX, will host its annual Radio Rally in Downshire Community School, Carrickfergus on Saturday 24th October 2009. Doors will be open from 12.30 pm. A good range of traders and tables will be present. Access for traders ONLY is from 10 am. Further information is online at http://www.gi0lix.co.uk.

The G QRP Club Convention at Rishworth on 24 October is to have a Buildathon where novice constructors build a project under the guidance of experienced radio constructors. The project is a Manhattan style Sudden receiver for 40 metres. There are only 20 places and the total cost is £15, which should be paid at the G QRP Club stand on the day. The Buildathon will begin at 12.30pm and last most of the afternoon. The actual finish time for individuals will depend upon how long it takes that person to complete the receiver. To book your place, send an email to g3rjv at gqrp.co.uk or g3mfj at gqrp.com.

Now for the news of special events

Don't forget that Jamboree on the Air is taking place this weekend, 17 and 18 October. Listen out for the many stations on the air and give young people the chance to exchange greetings on the air.

3

>From mid October to mid November the Bromsgrove & District ARC will be operating Special Event Station GB75XX to commemorate 75 years from the first transmission from the BBC radio masts at Droitwich. Operation will be all bands, all modes. Further information on QRZ.com.

4U1UN, the United Nations Headquarters station in New York City, will make a rare appearance on the air between 10 and 25 October. There will be an all-star line-up of top gun DXers and contesters at the controls of the famed station. Its operating schedule is going to be restricted from 1200 to 0400UTC each day. All- night activity is planned for Friday 23rd and Saturday 24th. The 24th October is United Nations Day. Logs for 4U1UN will be uploaded to Logbook to the World after the operation is completed. All QSL requests should go via HB9BOU.

And now the HF DX news compiled from 425 DX News and other sources.

KP4KE will be taking part in the CQWW DX contest on 24 and 25 October. QSLs should go via OK1DOT.

Andrew, G7COD, will be operational every day from Embudu Island in Kaafu Atoll the Maldives, which is IOTA reference AS-013, using the call 8Q7AK until 25 October, using SSB and CW on the 80 to 10 metre bands including WARC frequencies. For comprehensive details of operating times, bandplan, propagation forecast and QSL information etc, please check his website www.8q7ak.freewebspace.com.

FP/KV1J and FP/W8TOM will be operating from Miquelon Island, which is IOTA reference NA-032, between 20 and 27 October. They plan to operate SSB, CW, RTTY and PSK on 160 through to 6 metres and to participate in the CQ WW DX SSB Contest as FP/KV1J. QSL via their home calls, direct or via the bureau. Their logs will be uploaded to Logbook of The World and eQSL. Further information at www.kv1j.com/fp/october09.html.

Now the contest news

On 20 October the RSGB UHF Activity Contest takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

21 October sees the 80m Club Sprint take place between 1900 and 2030UTC. The contest exchange is a serial number and your name, but no signal report, eg 001 Steve. If you call CQ, after someone has replied and you complete a contact you must vacate the frequency. On the other hand, if you call someone and make a contact, practice dictates that you then call CQ on that frequency until someone replies. When the contact is completed, you then QSY. In practice this means that much of the time you have two contacts on a frequency, the first when you reply to a CQ and the second after calling CQ.

The 48-hour CQ Worldwide DX SSB contest on 24 25 October is undoubtedly the biggest event of the month. The CQ WW DX contests are some of the biggest events in the HF calendar and there will be a lot of DXpeditions and serious entries by contest groups. Expect the phone portions of the HF bands, except the WARC bands, to be busy all weekend. There are numerous categories that can be entered, from QRP to high power, single band to all-band, and single-transmitter single-op, to multi-multi. This means that just about everyone can pick a category that is suitable for them personally and put in a competitive entry. Nobody with a barefoot 100 watt transceiver and a doublet at 25ft would expect to be able to compete against the big guns, but the beauty of it is that if you pick your category carefully you still stand a reasonable chance of receiving a certificate for being highly placed. For example, if you have family commitments during

4

the day, choose to make a single band entry on 160m or 80m, because they are where the action is at night. On the other hand, if you don't like staying up at night, choose a single band entry on 10m or 15m, which are only likely to be open during daylight hours. If you want to set yourself a real challenge, enter a QRP category. Although you won't expect to be able to call CQ and get a run of QSOs going if you operate QRP, if you show determination and keep slugging away at it you may find when the results are published that there were few other single-band QRP entrants from your country and you get a certificate. The contest takes place between 0000 and 2350 on 24 and 25 October and the exchange is signal report and CQ Zone, which is 14 for the UK.

Now the solar factual data for the period from the 5th to the 11th of October, compiled on 12th of October by Neil Clarke, G0CAS.

We start this weeks report with some more possible evidence that solar minimum is now behind us. The latest smoothed sunspots numbers for January, February and March 2009 are 1.8, 1.9 and 2.0 respectively. Remember that the figure for December 2008 was 1.7. Even though an increase is taking place, it is painfully slow. Still there is no firm confirmation that minimum has indeed did taken place from the Space Weather Predication Centre. To quote SWPC, monthly values are final except for the most recent 6 months which are considered preliminary.

The solar disc was spotless every day. Solar activity was very low with no solar flares taking place at all. Solar flux levels averaged 69 units and varied very little day to day. The 90 day solar flux average on the 11th was 69 units, that's the same level as last week. X-ray flux levels remained below the minimum reporting level throughout. Geomagnetic activity was very quiet, even though on the 11th a small coronal hole disturbance arrived the Ap index only reached 6 units for that day. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary from a very slow 240 kilometres per second to 300 between the 6th and the 10th. On the 11th speeds increased to peak at 460 kilometres per second. Particle densities were also very low and for long periods between the 5th and the 10th were less than one particle per cubic centimetre. An increase to 28 particles per cubic centimetre took place on the morning of the 11th. Bz varied between minus and plus 3 nanoTeslas everyday except for the 11th which varied between minus 10 and plus 8 nanoTeslas. Particularly, the solar wind velocities and densities are some of the lowest values that I have recorded in the last 15 years whilst I have been compiling these reports.

And finally the solar forecast. This week solar activity is expected to be at very low levels. This week could possibly see the odd small sunspot group. If so, then solar flux levels could be in the low 70's. However, with a spotless sun solar flux levels will be around the 70 mark. Geomagnetic activity is expected to be quiet everyday, later in the week there is a chance that activity could increase slightly. MUFs during daylight hours at equal latitudes should be about 20MHz for the south and 17MHz for the south. At this time of year daytime highs normally take place within an hour or so from local noon. Darkness hour lows should be around 9MHz and normally take place just before local sun rise. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of about 19MHz. The optimum working frequency with a 90 per cent success rate will be around 15MHz. The best time to try this path will be between 1400 and 1900 hours UTC.

And that's all for this week from the propagation team.

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

THE FOLLOWING NEWS CAN BE HEARD FROM OUR AUDIO SERVICES
QNEWS -- ALL OF THE NEWS ALL OF THE TIME at www.wiaq.com

2009 WIA Club President's Lunch

This is Don Wilschefski VK4BY, WIA QAC Chairman.

WIA President Michael Owen, and Vice President Ewan Mcleod, will be attending, and will address the group after lunch. The lunch will be held on Sunday, 15th November, at the Geebung- Zillmere RSL club. This is the day after the Gold Coast hamfest.

The Geebung Zillmere RSL club is in Newman Road Geebung, on the north side of Brisbane. The doors will open at 11:00am, and a set lunch will be served at 12:30pm. Cost for the meal is $15- per person, to be paid at the door.

To reserve your place, please email Don Wilschefski VK4BY at qac@wia.org.au
Special dietary requirements can be catered for.
As in previous years, the intention is for one or two representatives from each radio club to attend. This is a good opportunity to discuss issues with the President and Vice President of the WIA.

Numbers will be required by Monday 9th November.

Bunya Mts & Dist AmCom

They are hosting a HAM AND WINE FEST 2010 on January 30th
at Maclagan, which is just west of the Great Dividing Range.

Get along and join in the fun of a hamfest towards the west.

There will be the usual new and preloved gear for sale by various groups and individuals. Or do you have an excess of home grown fruit and vegs you would like to have on sale; or perhaps you have a non-radio related pastime you want to display.

Also if your group would like to do a demonstration of any aspect of our great hobby, you are most welcome to do so, this could be, Home brew gear,

servicing gear, APRS, DSTAR, slow scan. This list is long, so they are looking for expressions of interest.

All table bookings will be $10 per table, this includes entry for one person, others will be allowed in before 9am to assist with the setting up. Bookings will need to be made by Friday the 15th January 2010, late bookings will be accepted, but an extra fee will apply.

There are two wineries nearby, and one of these has a B & B Or you can visit the beautiful Bunya Mts near by; there is camping and picnic grounds available as well as cabins and houses to rent, if you wanted to stay a night in comfort.

What a good way to kick off the year, come along and enjoy.

All the proceeds from this event will be used for a badly needed upgrade to the club's repeater installation up on Mt Kiangarow at the northern end of the Bunya Mountains.

Geoff Emery vk4zpp

As mentioned on WIA News previously, the newsgroup,
aarnie@yahoogroups.com
moderated by Adam, VK4IM has increased my access to AR news and projects considerably.

Not only does "Amateur Radio" magazine arrive in the letter box but I now get to read e-mags such as "World Radio Online" and "Ham Mag", both in PDF and full colour, for free.

As well many clubs are posting their newsletters on AARNIE and this goes to support the efforts of the WIA broadcast team in keeping members of the hobby informed.

Check out aarnie@yahoogroups.com and tell em QNEWS sent you!

GREETINGS ! THIS IS DON VK4FNQA WITH NEWS FROM NORTH QUEENSLAND.

HAVE YOU BEEN IN CONTACT WITH A JOTA STATION THIS WEEKEND ?
JAMBOREE ON THE AIR HAS BEEN HAPPENING ACROSS THE WORLD ON RADIO AMATEUR FREQUENCIES. STATIONS IN CENTRAL, NORTH AND FAR NORTH QUEENSLAND HAVE BEEN VERY BUSY HELPING GUIDE AND SCOUT GROUPS COMMUNICATE USING VARIOUS MODES.

JAMBOREE ON THE AIR ENDS THIS EVENING.

TARC NOW HAS A FACEBOOK SITE AND TARC FACEBOOK MASTER PAUL
VK4FOTO INVITES YOU TO GO AND HAVE A LOOK AND MAYBE EVEN JOIN !
YOU HAVE TO BE A REGISTERED USER OF FACEBOOK TO SEE THE FRONT
PAGE AND APPLY WITH THE TARC FACEBOOK MASTER FOR FULL ACCESS.
THE SITE WILL EVENTUALLY CONTAIN ALBUMS OF CLUB EVENT PICTURES,
A REMINDER LIST OF UP AND COMING EVENTS, PLUS MUCH MUCH MORE !
GO TO THE TARC WEBSITE AND CLICK ON THE TARC FACEBOOK LINK TO FIND OUT MORE !

THE TARC INC HAS THE SOCIAL MEETING HAPPENING THIS
TUESDAY EVENING FROM 7-30PM AT THE CLUB ROOMS IN GREEN
STREET WEST END. EVERYONE WELCOME TO COME ALONG AND HELP PUT THE
MAGAZINE OF RENOWN BACK-SCATTER TOGETHER AND SOCIALISE WITH FELLOW HAMS.

REMEMBER THAT TARC IS VISITING THE TOWNSVILLE CHORAL AND ORCHESTRAL
SOCIETY THEATRE RESTAURANT ON FRIDAY THIRTEENTH OF NOVEMBER.
IAIN VK4IGM IS HANDLING BOOKINGS AND SEATS ARE LIMITED.
CONTACT IAIN ON TELEPHONE 47214083 RIGHT NOW.

WELL THATS ALL FOR THIS WEEK, SO CHEERIO FROM TROPICAL PARADISE, BUT
A PARTING REMINDER DO NOT FORGET JAMBOREE ON THE AIR CONTINUES UNTIL THIS
EVENING. THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC,
AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

SB NEWS @ WW $VK1WIA091018
WIANEWS - Oct 18 - VK NATIONAL NEWS

WIANEWS FOR WEEK COMMENCING OCT 18 2009.

CQ Jamboree this is VK6SCS calling CQ Jamboree.

CQ Jamboree This is VK6SAA Scout Headquarters calling CQ Jamboree.

CQ Jamboree indeed.

Welcome to the JOTA edition of the WIA news, recorded at the Peter Hughes
Scout Communication Centre by Scouts from Waylen Bay Sea Scouts in Perth.

I'm Bob, VK6POP, JOTA-JOTI coordinator for Scouts Australia.

Let me introduce today's studio team.

Hi I'm Andrew VK6FAIL.

Hi I'm Flynn VK6FFFF.

Hi I'm Barb, VK6FPAX.

WE ARE ALL IN THIS EDITION OF WIANEWS WEEK COMMENCING OCT 18 2009

Antenna dangers shown through online tool

Swinburne University, together with EM Software and Systems, has developed an online tool that will allow users to calculate exclusion zones around antennas where radiation levels exceed safety standard limits.

Commissioned by the Australian Communications and Media Authority, the exclusion zone calculator will allow people to conduct safety assessments of transmitting antennas, such as those found on boats, four wheel drives and in radio communication networks.

To calculate the zone, all users need to do is enter the antenna type, transmitter power, antenna gain and frequency band into the online tool, and it will automatically calculate the safe distance around the antenna.

This project will provide the public with access to an online tool that is easy to operate and gives clear and easy to understand outputs.

There are thousands of commercial transmitting antennas throughout Australia that emit RF electromagnetic radiation. Safe levels of human exposure to radiation are determined by the Australian Radiation Protection and Nuclear Safety Agency.

The online tool can be accessed at the Australian Communications and Media Authority website

D3

Optus announced this week that Australia's newest state-of-the-art satellite, Optus D3, is fully operational after successfully completing extensive in-orbit testing ahead of schedule.

Trevor Taege VK4BAT told WIA National News that following the successful launch August from French Guiana, Optus has now completed a number of crucial tests at its geo-stationary 156ï¿½E location.

D3 will complement Optus' existing four satellites providing services across Australia, New Zealand and Antarctica.

The Telco says D3 would provide new business opportunities for them and allow their customers to provide new and advanced digital Services including Foxtel who plan on rolling out 30 additional pay TV Channels along with significantly more Interactive and on demand features

Optus' satellite fleet reaches all corners of the country delivering subscription television, free-to-air TV, voice, internet and radio services.

ACMA NEWS

The Australian Communications and Media Authority is releasing spectrum in the 3575-3700 MHz band (the 3.6 GHz band) to support the deployment of wireless access services in regional and remote areas of Australia.

The full media release can be found at
www.acma.gov.au/WEB/STANDARD/pc=PC_311927

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Tom Potter VK3UBS from AR Mag tells us Foundation Licensees now have their own Foundation Corner in Amateur Radio magazine.

Ross Pittard VK3CE has created this feature and on page 10 he takes you through the construction of a simple but useful half-wave dipole antenna.

This is hands-on stuff of interest to many, not only FLs.

A Friday session set up at short notice on the 9th October saw Ark's Academy candidates Stephen and Jim pass assessments for Standard Theory

and Regulations and Foundation License, both candidates were delighted with their results and will be on the air with new callsigns in the next few days" Both Candidates are members of Melbourne's E.M.D.R.C. and will be able to bask in their achievements at the next club meeting., So welcome Jim to Amateur Radio and well done Stephen on your Upgrade from the Ark's Academy team"

(John Fisher VK3DQ / VK3ARK)

EDUCATIONAL CONTACT USES D-STAR INTERNATIONAL LINK

D-Star has been used for a transatlantic hook-up between students in two schools separated by about 8000 miles. This as pupils at St. Marys Catholic School in Kent in the United Kingdom got the chance to speak with their counterparts at St, Marys Catholic School in Temple, Texas via a D-Star based ham radio link-up.

The students at both schools had prepared questions to ask each other. This included such diverse subjects as sports, television, classroom subjects and culture. They were also treated to presentations at before the contact to learn more about what amateur radio is.

Brian, G8ZYZ, and Catherine, M1CVF, handled the duties in the UK using the services of the GB7FK D-Star repeater in Kent.

Steve, NU5D, and the Temple Amateur Radio took care of the technology in the Lone Star State.

Reports are that the session went flawlessly and that both sides are looking forward to the next one.

(AR NEWSLINE Southgate)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

International Amateur Radio Union Region 3

The IARU Region 3 Directors met in Christchurch, New Zealand, over two and a half days from 8th to 10th October 2009, immediately before the 14th Regional Conference.

The Directors are Chairman Michael VK3KI, Shizuo, JE1MUI, Peter, ZL2AZ, Gopal, VU2GMN and Joong-Guen Rhee, HL1AQQ, and the Secretary is Jay Oka JA1TRC.

The Directors reviewed the matters on the agenda for the Conference, including their own two papers on the IARU Monitoring System (MS), one prepared in response to the request of the last Conference in Bangalore.

They also considered the other reports and papers before the Conference relating to the IARU MS.

The Directors agreed that the MS was a very important aspect of the work of the IARU, and the material before the Conference raised many questions that should be addressed.

The Directors decided that they would recommend that the MS should be a major focus of the Conference, particularly as the Conference was being attended by representatives of IARU Regions 1 and 2, as well as the IARU officers and representatives of the International Secretariat.

They decided that they would recommend that the Conference appoints a special working group be formed to address this matter, working at times when all delegates could attend.

Artist and filmmaker to work with radio clubs

Artist and Filmmaker Esther Johnson is planning to use three different amateur radio clubs based in the London area to set up a radio station during an exhibition of her work on 23rd, 24th and 25th October in London.

The radio stations will accompany Johnson's 16mm film TUNE IN, made in 2006, which focuses on amateur radio. Johnson will also be exhibiting photography of radio enthusiasts alongside her film work.

Further information on TUNE IN can be found at www.blanchepictures.com/films/tunein.htm

CANADIAN HAMS TO SHARE WITH MILITARY SYSTEM ON 70 CM

Industry Canada has informed Radio Amateurs of Canada that it has authorized the Department of National Defence to use a digital system called Enhanced Position Location Reporting System or EPLRS in the 430 to 450 MHz shared 70 centimetre band. The EPLRS system consists of mobile,

fixed, transportable and airborne stations that use 5 MHz-wide spread spectrum channels to provide strategic telemetry information for military platforms.

This authorization is on a no-protection, non-interference basis, which

means that no new restrictions will be imposed on Canadian amateur operations in this band as a result. Industry Canada says that there is a slight chance of minor interference to amateur radio systems. Typically in the form of a minor audible clicking noise. If Canadian amateurs encounter such interference, they are requested to report it by e-mail to Radio Amateurs of Canada at regulatory at rac dot ca. The information reported should include the geographical location, date, time, frequency and mode being used by the amateur station, and a description of interference. (RAC)

FCC TO REASSESS PARENTAL CONTROL OF TELE-VIEWEING

The Federal Communications Commission is about to open a reassessment of the V-chip and of family-friendly programming. This to determine if it is possible to have a single-content ratings system that can apply to movies, video games, TV and cellular telephones. The study may also look at ways to ensure that once a TV show or movie is rated, data is readily available whether the program subsequently is viewed on TV, cable, a phone or a computer.

Back in 1996 Congress required TV set makers to include the V-Chip in TVs. This Integrated Circuit technology allows parents and other televiewers the ability to set their TV receivers to screen out shows whose ratings didn't meet their personal standards.

Critics argue that the technology needs updating with a system that can now offer more information, and is less confusing. This is because motion pictures, TV programs and music each use different ratings systems and because some TV programs are rated inconsistently between networks. On the other side the TV networks, cable industry and the National Association of Broadcasters, argue that the current V-Chip system works well giving adult television viewers the ability to lock out material that they do not want their family members to watch. However, studies have found that relatively few American families actually use the V-Chip to control their youngsters viewing habits.

TALK SHOW HOST WANTS SAT HAMS

Broadcaster Ted Randall, WB8PUM, host of the shortwave broadcast QSO Radio Show, is looking for ham radio satellite operators who are interested in talking about their personal experiences in satellite communication to contact him. He is specifically in need of someone who can take an entry level approach to explain satellites to the new and young hams listening to his weekly broadcasts. If you think you can help, please contact Ted by e-mail to tedrandall (at) kaij (dot) us. More about the QSO Radio Show is on-line at www.tedrandall.com

NEW HAM ASTRONAUT IS KF5DBF

Another astronaut has gotten her ham radio license. Mission specialist

Tracy Caldwell recently passed her amateur radio license exam and has been issued the callsign KF5DBF.

Caldwell, who is a PH.D, was born in Arcadia, California and enjoys sports, hiking, and auto maintenance.
She is scheduled to fly with Expedition 23 in April 2010.

OPERATIONAL NEWS -

ON AIR CONTEST COLUMN - D A T E L I N E 2009

OCT 24 - 25 CQ WORLD WIDE SSB

NOV 1 ZL STRAIGHT KEY NIGHT
NOV 28 - 29 VK SPRING VHF-UHF FIELD DAY
NOV 28 - 29 CQ WORLD WIDE CW

SPECIAL EVENT CALLS, BEACON DX AND NET ADVICE

the Southern Cross dx net which is a world wide hf net that has been going for around 50 years. The net runs 7 days a week starting at 1130z on 14.238.50 MHz and runs for 1 hour some times longer if conditions are good.

Net controller is Jack W1FDY in Virginia. It is a great net for amateurs new and old that may not have as good a station as others to make contact with other amateurs all around the world without the hassle of pileups act.

(Marty VK6FDX)

4U1UN, the United Nations Headquarters station in New York City will make a rare appearance on the air from October 19th to the 25th .

24th of October is United Nations Day.

An all star line-up of top gun DX'ers and contester's will be at the controls of the famed 4U1UN station.

Names like Marti Laine, OH2BH
Roger Western G3SXW
Kaz Watanabe, JK3GAD
Gene Schumat, UA9AB, from Asiatic Russia, to mention only a few.

In all there will be about two dozen of the best of the best bringing 4U1UN to life in celebration of 4U1UN Activity Week.

For those not aware, 4U1UN may be geographically located on Manhattan's

East side but as far as ham radio is concerned it is considered a DXCC entity unto itself.

It became rather rare after 9-11 when new security measures were put in place.

As a result its not often that 4U1UN takes to the airwaves.

In fact it has to be a special event such as this to bring her on.

As to an operating schedule. Its going to be restricted to 12:00 to 04:00 UTC each day.

Amateur Radio Newsline's Reporter Norm Seeley, KI7UP said that logs for 4U1UN will be uploaded to Logbook to the World after the operation is completed.

All QSL requests go via HB9BOU.

Look for special event station KL5O to be active on the air in observance of Alaska Day. Activity will take place between 18.00 UTC, 18th October and 06.00 UTC, 19th October. Operations will be on 160 through to 10m, including 30, 17 and 12m. Modes will be CW, SSB and RTTY.

MIDWAY ISLAND K4M

A multi-national team of 18 operators are currently activating Midway Island, they are expected to continue through October 19th. They are signing K4M and operate from Sand Island.

The U.S. Fish & Wildlife Service has authorized this amateur radio operation from this rare U.S. entity for only a 10 day period. This is the first amateur radio activity from Midway in almost 10 years.

Midway Island ranks number 24 worldwide.

K9NW will be active from Botswana as A25NW between November 23rd and December 1st. His operation is expected to include His operation is also expected to include the CQWW DX CW Contest. QSL via his home callsign

F5PTM will be active from Afghanistan through December as T6YA . Listen out for him on 40, 30, 20 and 17 meters on CW only. QSL via F5OGL.

JA1FJJ, will be active from Bhutan as A52FJJ through October 20th. Operations are on 80 through 10 meters using SSB, RTTY and PSK31, 500 watts into a G5RV antenna.

QSL via his home callsign.

QRZ.COM NOW HAS ELECTRONIC QSLING INFO

The giant QRZ dot com callsign website has expanded its callsign database. This, with added fields that take into account the emergence of electronic confirmations of on the air contacts as well as those hams who only use cards sent via the mail.

The newly added fields are Mail QSL that indicates whether this person will QSL by Postal Mail, eQSL says that a ham is using eQSL.cc, LOTW indicates whether this person uses LOTW. Another new field is IOTA which permits the insertion of an Islands on the Air designator.

AA7BQ, who owns and manages QR.com notes that these are all user supplied items. That means if the item appears in the listing then the record reflects the member's choice. Otherwise, nothing is shown for these items.

New fields are also transmitted in the QRZ XML Logbook Data stream.

For more info about logbook data, see the QRZ.com XML page.

(QRZ)

INTRUDER WATCH - ENFORCEMENT ZONE

BBC Radio 4 - Wireless Interference

The BBC Radio 4 show Click On, first broadcast on Monday Oct 5, and now on the web, featured an item on interference to Wi-Fi Networks from household appliances

Click On describes the item as:

Household appliances such as cordless phones and baby monitors can interfere with home networks. Adrian Wagstaffe, author of an OFCOM report about wireless congestion, helps Simon solve his home wireless problems.

Click On Series 5 Episode 1 can be heard at
http://www.bbc.co.uk/programmes/b00n0qr6

The Wireless Interference item starts 10 minutes into the show.

Amateur Radio Magazine Previews
October 2009

Amateur Radio for October is already out. Look for the Scout on the cover, talking to her mates on her hand-held. And that is because the Scouts and Guides will be holding their annual Jamboree on the Air (JOTA) Friday 16 till Sunday 18 here in VK.

JOTA will involve around half a million Scouts and Guides. It will also involve many of the adult amateur fraternity, who give hundreds of hours of support to JOTA every year. One of these is Bob Bristow VK6POP, who we heard from earlier in this newscast, well VK6POP writes on page 22 to tell everyone how they can become involved. Foundation Licence holders, too. And don't miss the promotion picture inside the front cover.

For a while now, we have been aiming to get the magazine to you by the first of every month, and you will have noticed that we are hitting that target, plus or minus a day or two, on a regular basis.

Check out page 1 for a special article on the WIA Centenary. President Michael Owen VK3KI explains the plans for nation-wide celebrations by Radio Clubs next year. Look for the special Centenary logo - something you will see a lot of during 2010. And note the unique callsign, VK100WIA. Then turn to page 8 for more on the Centenary - history, logo design and special merchandise. The Centenary polo shirt is pictured. WIA has a dedicated Committee working to make all this happen.

Don't forget the regular columns presented every month by Amateur Radio. They are all written by experts in their fields and keep you up-to-date on your special interest.
For example, Contests are covered on page 41, DX News & Views on page 44

and an interesting article on AMSAT (satellites) at page 49.
And there is news from all the Clubs around Australia.

(tOM potter vk3ubs)

JOTA is here!

Elizabeth Hickey Activity Leader - Radio and Electronics, who is known as
VK1FELF says YOU are invited to come and help introduce the hobby to the next
generation of Hams.

VK1's Camp Cottermouth for the entire duration of JOTA would like to see you!

Open from Saturday 12 noon on October 17th until Sunday 12 noon on the 18th.

HF Radio, EchoLink, geo caching, fox hunting, radio related arts and crafts,
a scavenger hunt and many other activities.

VK4's Tablelands Radio and Electronics Club are providing radio support
for the Gordonvale Scout Group and the Gordonvale Girl Guides for the 52nd.
Jamboree On The Air.

Jamboree On The Air (JOTA) is an annual event in which around 500,000 Scouts
and Guides from all over the world make contact with each other by means of
amateur radio.

T.R.E.C. are "on the airwaves" from the Scouts Den in Gordonvale, corner of
Church and George Streets using VK4WAT on HF and VHF and also on
IRLP node 6163.

Phil VK4HSV has been operating with Alice River Scouts at The Den from

Friday evening and will finish there today around 0300UTC

Kooka VK4FRJG has been operating with Loam Island Scouts at The Station
and will be finishing up sometime today

Ken VK4QZ and Paul VK4DJ have been operating with Ross Guides at
Herveys Range and will be finishing up sometime today

Don VK4MC and helpers have been operating with Flinders District Guides at the
District Guide Centre at Bluewater and will be finishing up sometime today

The North East Radio Club, The Scout Radio Activities Group and Tranmere
Sea Scouts are operating a VK5 JOTA station this weekend catering to
Joeys, Cubs, Scouts and Venturers in the Eastern Suburbs of Adelaide.

A number of activities are taking place, transmitters operating on HF,
2M 70cms IRLP, and Echo Link using Tranmere Sea Scouts call sign of VK5TSS

Sked? please send an email to vk5tss@yahoo.com

JOTA ON THE ECHOLINING WIRELESS SYSTEM.

Let me read this as I got it straight off the web...

I quote..

"Hi everyone... yes I have been putting together ANOTHER JOTA EchoLink server
(JOTA-365).

EchoLink folks don't like new servers these days so to get the conference
approved, as they are discouraging new conferences, it seemed to me that we
need the English one on year round... I'm planning to leave this one on year
round (thus the 365 name), and have also put three QNI times per day on it
for suggested checking in to try to encourage people to cross paths as I see
quite a few checking in but at different times and thus not connecting with
each other.

VE6JAM is our main Scout Call sign

It is listed as JOTA 365 Scouts JOTA (E) and is node number 480809".

AMSAT-NA is supporting JOTA by dedicating AO-51 operation to the
event.

AO-51 QRP repeater is now in JOTA use.

All users are requested to give way to JOTA stations or QSOs with JOTA
stations.

The frequencies used for yesterday and today are:-
145.880 FM uplink, and 435.150 FM downlink

AMSAT wishes we Scouts good luck operating via the AO-51 satellite for the
event.

Reports of your JOTA operations should be sent to the AMSAT-BB or directly to
ko4ma@amsat.org

Scouts and Guides are on the sky waves from South Africa looking for YOU!

Whether or not you are helping with such a station please feel free to join in, especially if you were a scout or a guide when you were a wee bit younger.

As long as you keep the overs short and let the young do most of the talking you will be doing us a great service.

Hams come demonstrate your favourite mode whether it is SSB, AM, slow scan TV, Packet or CW. Even if the signals are only heard, it will be very interesting for most of us.

Morse code sent slowly can be a real "draw card" especially when scouts

realize we can do the same.

Remember the scouts and guides are young and we have long memories, so treat us "gently" hihi.

For more information on JOTA/JOTI refer to www.jota.sub.cc

After JOTA we Scouts will still be remembered!

A German team will operate from the Radio Club Station of Tunisian Scouts using a special callsign 3V3S between November 23rd and December 2nd. The team will install and use a Spiderbeam and verticals. Once the DXpedition has concluded the antennas will be donated to the 3V8SS club station. QSL via DL9USA.

More is on-line at www.3V3S.tk

SLIENT KEY

>From VK6FIVE

Well it seems from time to time we loose one.

One of those true gentlemen, one of the quite giants of our hobby.
And that is how it was this past week in VK6.

At the age of 92, on Wednesday the 7th. David Couch, VK6WT, Life member of the National WIA, Member for life of the WA Repeater Group, a Member of the Royal Signals ARS, and RAOTC member no. 341. Hung-up his Fist and Became Silent Key.

David, born in Fairfield Victoria, on the 30 of April 1917, served his country during WWII in the Army Signals Corps and was subsequently stationed in WA, where he remained the rest of his life.

He qualified in 1944 and was licensed in 1946, with the resumption of Amateur Radio after the War.

David spent most of his time on air on the CW bands and had a very large collection of Morse key's. Quite some years ago he donated a number of them to the Wireless Hill Radio & Telegraphy museum.

David was a regular on VHF, for local contacts in the Remembrance Day Contest every year. And for a long time he had a weekly sched, on VHF with local hams.

For many years, David used to bring his wife Olive when she was alive to the Perth ALARA lunches and with his keen interest in Photography was often the unofficial photographer.

Many VK6 Amateurs knew David well, as he was for many years a TAFE Lecturer, & during the 1970s and 80s became responsible for teaching oh so many of the past and present hams in VK6. A rollcall far too many or name.

In testimony for his quiet and dedicated service, to our hobby, and the respect he deserved, a solid half, of all the mourners at his service this week were Hams.

He also had membership of the ARRL, the RSGB, and the International Morse Preservation Society or Fist's Club.

Please join with me in a moments' silent reflection for an absent friend, Vale David Couch born, 30/4/1917 died 7/10/2009.

"CT SK VK6WT AR"

==========
I hope all Scouts and Guides are enjoying JOTA-JOTI, and that you will want to come back next year for even more fun. Remember to register your participation at www.jotajoti.org and to complete an online blog to show the world what you did for JOTA-JOTI. To the amateur radio community, thanks for the loan of the airwaves and for your wonderful support of Jamboree On The Air.

>From the Peter Hughes Scout Communication Centre in Perth, this is Bob VK6POP.

2328. SARL NEWS SUNDAY 18 OCTOBER 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-17 19:00:14 UTC
From: website@sarl.org.za
Message-ID: <20091017190008.45D0C33CBF@panix2.panix.com>
Source record: 6542
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS SUNDAY 18 OCTOBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

In the news today:

FIRST AMATEUR RADIO PAYLOAD TEST DID NOT HAPPEN

SARL REQUESTS DOC TO ADD AMATEUR RADIO TO SPECTRUM POLICY DOCUMENT

INVITATION TO ATTEND A PRESENTATION

SPECIAL EVENT STATION ZS3SKA

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

FIRST AMATEUR RADIO PAYLOAD TEST DID NOT HAPPEN

On Wednesday last week the first test of the amateur radio payload on SumbandilaSat did not switch on as planned. The problem was a glitch in the diary software which failed to turn on the amateur radio payload. Ground station engineers are working on the problem and another test will be scheduled within the next few days.

On 13 October the main camera payload was activated during which video was recorded. The video was captured while SumbandilaSat travelled over northern Namibia. To watch the video go to www.amsatsa.org.za.

Details of the next amateur radio test will be posted on www.amsatsa.org.za as information becomes available.

Persons who send in audio clips and reports of the test within 24 hours of the actual test will be entered into the lucky draw for the new ARRL satellite Handbook. Send the audio clip and reports to

www.amsatsa.org.za.

Once the amateur radio payload operates successfully SA AMSAT will apply for an OSCAR number.

HAMVENTION 2010: AMATEUR RADIO CLUBS WORLDWIDE: THE LIFELINE

"Amateur Radio Clubs Worldwide: The Lifeline" will be the theme of the 2010 Dayton Hamvention slated for next May 14th to the 16th at the Hara Arena in Dayton, Ohio. According to Assistant General Chairman Michael Kalter, W8CI, they all recognize how much amateur radio clubs and organizations contribute to the service. This is especially true in the way clubs pull together in disasters, field days, contests, working with youth, teaching classes, and sponsoring hamfests. And, says Kalter, there are parts of the world where a ham radio club truly is the communication link to the world.

In order to help celebrate the world of radio clubs, Hamvention planners are asking for pictures from radio clubs around the world that it can use on the front and back cover of the Hamvention 2010 programme magazine. It is also looking for stories of interest from interesting radio clubs as well.

HOME CONSTRUCTION COURSE REGISTRATIONS STREAMING IN

Registrations for the Home Construction Course have been streaming in. For the Gauteng event only one place is left. Durban, Port Elizabeth and Cape Town still have quite a few spaces left. Visit www.sarl.org.za, select activities, then RTA and go to the Home Construction Course to view the list of persons registered for the course. For any queries please email rta@sarl.org.za.

SARL REQUESTS DOC TO ADD AMATEUR RADIO TO SPECTRUM POLICY DOCUMENT

Following the publication of the draft radio frequency spectrum policy, the SARL has requested the Department of Communication to add more specific wording about amateur radio to the document as is the case with radio astronomy. The SARL propose the following wording: "10.5 Government supports Radio Amateurs having continued access to their radio frequencies as designated by the ITU table of allocations necessary to continue the application of the radio spectrum for self development, investigation into radio science and radio wave propagation and the provision of emergency communication services and as a support medium to promote STEM (Science Technology, Engineering and Maths) amongst the youth of South Africa."

As an explanatory note STEM has internationally replaced the term ICT - Information Communication Technology - as it better represents the broader requirements of industry, an area in which Amateur Radio can make a major contribution.

The draft spectrum policy was communicated in SARL NEWS some weeks back and made available on the web for comment. It is of concern to the SARL

that only one comment was received.

INVITATION TO ATTEND A PRESENTATION

WALKING THE DIGITAL DOG - Work, Learn and Play in Virtual Worlds is an interesting lecture presented by South Africa Network of the Institution of Engineering and Technology (IET SA Network) with Roo Reynolds, IQ Collaboration Development team, IBM - Metaverse Evangelis, UK.

The dates are Johannesburg: Thursday, 22 October 2009 at 18:00 Joburg Country Club, Woodmead and Cape Town: Monday, 26 October 2009 at 17:30 Lecture Theatre Complex, Cape Peninsular University of Technology.

There is no charge and snacks will be served after the lecture. To register go to www.eepublishers.co.za.

Could virtual worlds really be the next big thing for business, social networking, education and entertainment? What are virtual worlds, and what can and can't they do? How does one get started?

While they certainly don't replace real life communication, they do offer richer opportunities for people getting to know each other and collaborate than ping-pong emails, faceless phone calls and uncomfortable video conferencing.

Businesses are using virtual worlds to do more than promote their brands; they're enabling travel-free conferences, rehearsing difficult work in dangerous or life-threatening situations and allowing people to experience products before they exist. So even if some suggest that virtual worlds are a silly irrelevance and a quirky alternative to true life, the reality is different.

The speaker will draw on his experience of helping lead IBM into online collaboration in virtual worlds, and will share examples of various companies and individuals who have already used virtual worlds as digital venues in which they work, learn and play.

OCTOBER 2009 RAE

In total 125 candidates have enrolled to write the October 2009 RAE. The SARL would like to wish all candidates good luck on Thursday evening while they write the examination.

The normal turnaround time for releasing results after the examination is three weeks and we would request that you exercise patience while the papers are marked and the results collated.

Should there be any queries regarding your RAE, please feel free to contact Mariska at the office on tel 011 675 2393 or alternately via email to admin@sarl.org.za.

SPECIAL EVENT STATION ZS3SKA

In the bulletin of 4 October it was mentioned that a special event station, ZS3SKA, will be operational between 23 and 25 October from the centre of nowhere in the Great Karoo where the Square Kilometre Array may be erected. The station will be operational only in the phone sections of the 160, 80, 40, 20 en 15 m bands. More information about operators and frequencies will be added to the Forum pages of the SARL web.

A special QSL card will be sent to all stations that send their cards via the Bureau or directly to P O Box 273, Strand, 7139, South Africa.

For more information on the SKA visit www.ska.ac.za.

CONTEST NEWS

SARL HF CW Contest. There was an error in the published results of the SARL HF CW Contest. Pierre van Deventer, ZS6BB, made 92 points and not 86 points.

The combined results of the SARL HF Phone and CW Contests are: Individuals: 1st David Hutchinson, 3DA0DJ, 423 points; 2nd Bloemfontein Defence ARC, ZS4CD, 326 points; 3rd Jan Botha, ZS4JAN, 325 points; 4th Vidi la Grange, ZS1EL, 259 points; 5th Hans Kappetijn, ZS6KR, 236 points.

Well done to all who submitted a log and congratulations to the winners.

Club Competition: 1st ZS Contest Group, 567 points; 2nd Pretoria ARC, 493 points; 3rd Port Elizabeth ARS, 372 points; 4th Bloemfontein Defence ARC, 326 points.

Another Youth Competition The Technological High School John Vorster will present another Youth Contest on the 31st of October 2009 between 10:00 and 12:00 CAT. Have a look at the SARL Web Page www.sarl.org.za for more detail and the final rules for the contest.

PRETORIA AMATEUR RADIO CLUB MEGA FLEA MARKET

The last ZS6PTA Mega flea market for this year will be held on Saturday 31 October at the Pretoria Motor Club in Silverton from 08:00 to 11:00. For more information, or to book a table please contact Almero, ZS6LDP on 082 908 3359.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. There are no official sunspots and the visible disk is spotless.

20 and 15 m will provide best opportunities for DX with 10 m showing signs of waking up in the afternoons. Conditions to the East and the West will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europa.

In the mornings it may be possible to make contacts with Australia on 20 m. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with New-Zeeland are going to be challenging. During the early mornings, late afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

22 October - Radio Amateur's Examination country wide at 18:30; 22 October - Lecture "Make use of Virtual Worlds" Johannesburg Country Club, Woodmead, 18:00; 23 - 25 October - Special event station ZS3SKA, the Square Kilometer Array station on the air; 26 October - Lecture "Make use of Virtual Worlds" Cape Town in Lecture Theatre Complex, Cape Peninsular University of Technology 17:30; 31 October - ZS6PTA Mega flea market at the Pretoria Motor Club in Silverton from 08:00 to 11:00; 31 October - Youth competition of HTS John Vorster; 21 November - Home Construction course, Gauteng, at the NARC.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, which was compiled by George, ZS6NE.

Thank you for listening, 73.

NZART Headquarters Infoline Issue 194
18-OCTOBER-2009
NZART Website: http://www.nzart.org.nz/

Greetings
Welcome to Headquarters-Infoline a twice-monthly bulletin of news from NZART Headquarters e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at:
http://www.nzart.org.nz/lists/infolinelist.html

In This Issue
*Digital Futures Discussion Document
*October FMTAG Notes
*NZART Monitoring System Report
*Update to FMTAG Form 10 in October-2009
*The Results of Getting Your Amateur License in a Weekend
*Second Block Course/Weekend Study Course Proposed
*The Rhododendron Festival Award/Dan Wilkinson Contest 2009
*IARU Regional Conference Hailed A Success
*Kapiti Branch 69 Sale and Social
*Contest News
==VHF/UHF/SHF Contest Notes
==HF Contests
*Upcoming Events
*The WIA Weekly News Bulletin and The ARRL Letter can be found at:
*Break-In and Infoline Information
*Dates for Official Broadcast (OB) and Head Quarter's Infoline
*Attachments for Branches:
NZART Headquarters Infoline 194.doc
****
Digital Futures Discussion Document

The submitted paper on Digital Futures Discussion Document may be inspected at:
http://www.nzart.org.nz/policies/digital-futures-submission-final.pdf

The paper answers Question 12 "Do you agree with the proposal not to provide for Amateur television services in the UHF band? Please give reasons for your view."

The NZART paper strongly disagrees with this proposal and gives detailed reasons why it disagrees.
****
October FMTAG Notes

At its October meeting, NZART Council approved the publication of the following notes for the information of, and seeking comments from, NZART members.

Any comments should be sent to FMTAG at:

fmtag@nzart.org.nz

MEMBER COMMENTS ON 2400 MHz BANDPLAN (July/August Break-In)

1. Three members have indicated support for the proposed "below 2400 MHz" bandplan, without providing additional information.

2. Three members gave useful information on local non-Amateur band usage and/or the experience in overseas countries, such as Australia, where most weak signal work now takes place just above 2403 MHz.

3. Three members, being the owners of commercially-made Japanese transceivers, which do not operate, or are difficult or impossible to modify to operate, on the proposed frequencies below 2400 MHz, have strongly objected to the proposed bandplan. The models involved are ICOM IC-970 including the ICOM UX-98 module, Kenwood TM-2400, and Maki Denki UTV-2400E.

4. One member described his direction-finder activities, locating the sources of non-Amateur transmissions between 2400 and 2450 MHz in his vicinity. He reports that their energy density seems to fall off below 2405 MHz. He also reported on his investigation into the behaviour of these non-Amateur transmissions in the presence of an un-modulated carrier (10 Watts into an omni-directional antenna): unsophisticated cordless telephones continued trying to make contact even though they became non-functional, while most of the frequency-hopping or pseudo-wideband-noise types eventually avoided frequencies in the vicinity of the un-modulated carrier and moved elsewhere in the band.

5. One member pointed out that we are likely to lose the frequencies below 2400 MHz at the next World Radio Conference, as these have been identified for Next Generation radio services, by various national Radio Administrations.

Taking all the above comments into consideration, FMTAG suggests that a long-term solution, likely to be acceptable to the majority, would be to locate the narrowband segment somewhere close to, but above, 2400 MHz, and seeks further comments from all members, including from the authors of the "move to below 2400 MHz" proposal.

INTERIM RECOMMENDATIONS TO NZART COUNCIL

Published for the information of, and seeking comments from, NZART members.

Branch 86 Suburban ARC has applied for a 70 cm D-STAR Digital Voice repeater, to be located at Musick Point, at map reference NZ260 R11 799820. The repeater transmit frequency will be 439.575 MHz and the repeater receive frequency will be 434.575 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 86 Suburban ARC has applied for a 23 cm D-STAR Digital Voice repeater, to be located at Musick Point, at map reference NZ260 R11 799820. The repeater transmit frequency will be 1293.625 MHz and the repeater receive frequency will be 1273.625 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 86 Suburban ARC has applied for a 23 cm D-STAR Digital Data repeater, to be located at Musick Point, at map reference NZ260 R11 799820. The repeater transmit frequency will be 1294.625 MHz and the repeater receive frequency will be 1274.625 MHz. An engineering evaluation confirms that there will be no interference to other stations.

FINAL RECOMMENDATIONS TO NZART COUNCIL

None this month.

KEEP YOUR BEACON OR LINK OR REPEATER LICENCE UP TO DATE

Please contact FMTAG before making changes to the operation of your beacon, link or repeater, to ensure that the licence can be modified in time to match the proposed changes.

The MED issues a Warning, or Infringement Notice, with an attached Instant Fine, when it discovers that the equipment doesn't match the licence:

1. Unlicensed equipment,
2. Location error of 100 metres, or more,
3. Wrong frequency,
4. Excessive power,
5. Excessive bandwidth.

The size of the instant fine is at the discretion of the Issuing Officer. Typical fines usually start at a minimum of $250 for individuals, and $1250 for corporate bodies, per infringement.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/nz/fmtag.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz
****
NZART Monitoring System Report

Any reports please inform MS@nzart.org.nz or ZL1GWE directly.

"QRG: 14002.2 kHz - African pirate net in USB, every morning (06 - 09 utc and later, also in the noons and evenings) - operating like a phoneline -

unknown tribal language - about 180 degrees from Germany, possibly Central Africa or Angola. No calls, only names. NGO? Missionaries? They only understand QRM.
QRG: 7117.0 kHz - F1B/F1A - 50 Bd, 1000 Hz shift, Russian Airforce Moscow, ident "REA4". The ident is transmitted in CW on the mark-QRG 7117.5 every full hour +40 minutes. forty minutes - sri!

The Results of Getting Your Amateur License in a Weekend

The Hawke's Bay Amateur Radio Club Inc. ran an amateur radio study course over the weekend of 5th and 6th of September 2009.

They had eight candidates attend the two day event with their conculsion below.

"So what did the weekend experiment prove?

I think that we can draw the following conclusions:

* You never know where potential amateur radio operations will come from. Clues to a good resource are friends of existing radio amateurs.

* It is probably a myth that there is any particular age that the hobby attracts. Targeting one age group without targeting all age groups is folly.

* It is possible to source quality candidates and train them to pass the examination over the weekend. It should not be just training to answer the questions. Much emphasis should be placed on the teaching of as much of our craft as possible.

* Precision planning combined with excellence in teaching is a foremost requirement for success.

* A weekend such as this only allows the candidates to gain a piece of paper and a callsign. It does not make them amateur radio operators. The mentoring help by all members of the local clubs will help them achieve what they want to accomplish in our hobby. The "Entry Level licence" debate will still rage

on over the next few years. The Hawke's Bay Amateur Radio Club's experience has little to do with alternative views on changing our existing licensing regime. We do feel however, that the existing examination requirement is not really an impediment to anyone becoming a radio amateur. This weekend was all about having some fun, doing something different and gaining new people to enjoy our hobby and it succeeded.

Our heartiest congratulations to the new hams, Andrew ZL2AJD, James ZL2OO, Peter ZL4KR, Gary ZL1GA, Peter ZL2AK, Jan ZL2CZE and Campbell ZL2CCM. Amateur radio is a great hobby.

We wish you well.

73, Lee ZL2AL, Warren ZL2AJ and Peter ZL2LF
Hawke's Bay Amateur Radio Club Inc."

Thank you Lee, ZL2AL, for the full report and pictures, which can be found on the NZART Web at:
http://www.nzart.org.nz/html/exam-weekend.html

IARU Regional Conference Hailed A Success

The International Amateur Radio Union (IARU) Region 3, 14th Triennial Conference was held on 12-16 October, hosted by the NZART in Christchurch, New Zealand.

Delegates from 10 member societies (ARRL, ARSI, CRSA, HARTS, JARL, KARL, NZART, ORARI, SARTS and WIA), with RAST, RSGB and VARC being represented by proxy. Also attending was the IARU President Tim Ellam VE6SH and Vice President Ole Garspetad LA2RR, from Region 1 President Hans Timmerman PB2T and Secretary Dennis Green ZS4BS and Region 2 Secretary Ramon Santoyo XE1KK.

The IARU R3 Directors had identified two topics, the IARU Monitoring System, and emergency communications, as being highly important, and major decisions

were made on both of them.

Three working groups were established:

* The IARU Monitoring System (MS)

* Policy matters that included education, training, development of amateur radio and international and regional conferences involving radio administrations

* Operational and Technical Matters, including emergency communications, the IARU R3 Award and band plans

The Conference agenda included five documents on the IARU MS that generally sought a review and reinvigoration of this important activity. A special working group was established with Peter Young VK3MV appointed chairman and Rod Stafford W6ROD as secretary.

The amateur services must take action to protect their bands, the Conference heard, because without complaints about an intruder causing harmful interference, it may be claimed that there is no breach of the ITU Radio Regulations.

There was keen interest and participation in that working group. As a result of its work, the Conference resolved to acknowledge the contributions over many years of the IARU MS Region 3 Coordinator Arasu Monohar VU2UR.

The Conference identified the need to update and modernise the IARU protocols and procedures to effectively deal with intruders causing harmful interference in the amateur radio bands.

A package of proposed measures adopted by the Conference included greater coordination between the IARU MS coordinators in the three IARU regions, a single website to more effectively collect data on intruders and to record action being taken on them, and to provide information to assist those submitting intruder observation reports.

The Conference confirmed the importance of participation in regional telecommunication organisations, which are setting directions on regulatory matters that could impact on amateur services. IARU member societies are encouraged to be involved in that activity, where possible.

The regional telecommunication organisation's decisions significantly influence the decisions taken by the ITU World Radiocommunication Conference (WRC), with the next being in January 2012.

The NZART received praise for a number of its initiatives. One was its "ZL3 Buildathon" project that involved the encouragement of electronic project construction in schools and elsewhere in the community to lift the profile of amateur radio. Another was the 'Radio WAVE' project that demonstrates the principles of radio frequency propagation, polarity and effective radiated power.

The Conference heard that the Amsat-ZL's KiwiSAT amateur satellite project was undergoing final development. Some difficulties has arisen because of the US restrictions on the export of technology. KiwiSAT was expected to be ready for launch in 2010, although no decision has been made on launching it into orbit.

A total of nine documents on the agenda referred to emergency communications and amateur radio. ORARI and CRSA were highly commended on the role that they and radio amateurs had played in Indonesia and China after major natural disasters.

The Conference considered the concept of emergency centre of activity (CoA) frequencies worthwhile, and adopted 3.600, 7.110, 14.300, 18.160 and 21.360 MHz. These have been immediately included in the IARU R3 Band Plans.

CoA are not spot frequencies, but starting points + or - 5 kHz, are not the only frequencies to be used, and are not mode specific and should be considered as being 'all modes'.

The Conference also encouraged radio societies and emergency groups to include in their planning and training, how best to publicise the role of radio amateurs during emergencies and make it known internationally.

Among the other agenda items considered were ARDF, better utilisation of all allocated amateur bands, BPL/PLT, EMC, visitor licensing, liaison between societies and the radio administrations in their nations, operating ethics and standards, and support for the development of amateur radio in the region.

An election was required for the five-member IARU R3 Directors, with Michael Owen VK3KI, Shizuo Endo JE1MUI, Peter Lake ZL2AZ, Gopal Madhavan VU2GMN and Joong-Guen Rhee HL1AQQ being re-elected. The Directors then nominated Michael VK3KI as their chairman, which was endorsed by Conference. The Secretary, Jay Oka JA1TRC, was elected unopposed.

Michael VK3KI described the Conference as one of the most constructive and friendly he had attended. He said the credit for that goes to all who participated in the meaningful discussions resulting in productive outcomes.

All in attendance were in praise of the NZART organising committee, headed by Terry Carrell ZL3QL, who also took on the role of Conference Chairman, contributing greatly to its success. Sue Carrell and Mary Rogers ran a full women's program during the week for the wives of delegates and visitors.

The IARU recognised the work of Bob Knowles ZL1BAD on his retirement as the IARU MS Coordinator, a position he held for more than 20 years.

The Conference elected Peter Young VK3MV as the IARU R3 Regional IARU MS Coordinator. All other regional coordinators were reappointed.

The Conference received two invitations, one from ORARI for Bali, Indonesia, and another from VARC for Ho-Chi-Minh City, Vietnam to host the next Conference. The delegates voted in favour of accepting the VARC invitation for the 15th Conference in late 2012.

Kapiti Branch 69 Sale and Social

Kapiti Branch 69 will be holding its Sale and Social at the club's rooms on Saturday 31 October. This is a good opportunity to meet old friends and new Hams for a chat...and to pick up or dispose of some worthwhile gear.

The sale will start at 9am and refreshments will, as usual, be available at a small cost.

Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KY1V, NC1L, NJ1Q, NG3K, N4AA & QRZ DX, K5WW, N5ZO, KH6BZF, WB6RSE, K8PT, K8YSE, K9NW, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F5NQL & UFT, G3SWH, I1JQJ/IK1ADH & 425 DX News, IZ5MOQ, LY4A, OZ5AAH, PA1WLB, Pete's-DX-Newsdesk, PT7WA, PY2SEX, RA3AUU, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), YB2TJV, YV5ANF and ZC4VJ (G3AB) for the following DX information.

DXCC COUNTRY/ENTITY REPORT:
According to the AR-Cluster Network for the week of Sunday, 11th-October, through Sunday, 18th-October there were 233 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/a, FO/m, FP, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TK, TL, TR, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VK9L, VP2E, VP2V, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XT, XU, XW, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3DA, SWAIZILAND. Operators Andy/3DA0TM, Dave/ZS6AVM, Dave/ZS6GF and Daniel/ZS6JR will be active as 3DA0WW in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via 3DA0TM.

4L, GEORGIA. Operator Vaho, 4L8A, will be active in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) entry. QSL via K1BV.

4L, GEORGIA. Roli, LY4A, will be active as 4L3A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (80m) entry. QSL via LY4A. Visit Roli's Wen page at: http://www.ly4a.com

5B, CYPRUS. Stewart, G3RXQ, will be active as 5B/G3RXQ during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via G3RXQ.

5R, MADAGASCAR. Sam, G4OHX, will be active as 5R8HX from Madagascar (IOTA AF-013 and WLOTA L2455) between December 28th and January 3rd (2010). Activity will be mainly CW. QSL via his home callsign direct only.

8P, BARBADOS. Tom, W2SC, will be active as 8P5A during the CQWW DX SSB Contest (October 24-25th) as Single-Op/All-Band/High-Power entry. QSL via NN1N.

A6, UNITED ARAB EMIRATES. Mohammed, A61BN, is a new ham in Dubai. He seems to be enjoying 20 meters on SSB between 1100-1330z. There has also been a report that he likes the Digital modes. He has a stateside QSL Manager who is Buzz, NI5DX. Buzz is expected to have the logs shortly, and QSL cards should be available in about a month or so. Mohammed is a good friend of Khalid, A61BK, who has been a great "Elmer" for him. Buzz is also the QSL Manager for A61BK.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R during the CQ World Wide DX SSB Contest (October 24-25th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, Masaki/JO1DFG, and Sato/JH7QXJ. QSL via JH7QXJ. ADDED NOTE: They suggest to listen to 7075-7100 kHz.

AH0, MARIANA ISLANDS. Operators Kuny/W1FPU (7L1FPU), Hajime/AH0BR, Moto/W1NDE and possibly others will be active as AH0BT from the Northern Mariana Islands during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via 7L1FPU, by the Bureau and direct (see QRZ.com). Watch an interesting AH0BT video on YouTube at: http://www.youtube.com/watch?v=wwcNHnCWmZA

AO8, CANARY ISLANDS (AF-004). Operators Pekka/OH1RY/EA8AH, Juan/EA8CAC, Manuel/EA8ZS, Salvador/EA5DY, Jaakko/OH1MA, Kari/OH3RB, Kari/OH5XT and Jussi-Pekka/OH6RZ will be active as AO8A during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via OH1RY.

CE9, SOUTH SHETLAND ISLANDS. A team of operators will be operating from Arturo Prat-Greenwich Island-South Shetland archipelago between January 10-24th. Team members mentioned are: Luis/XQ5CIE, Carlos/CE6UFF, Didier/F6DXE and Dagoberto/CE5COX. No other details were provided.

CN, MOROCCO. M'hamed, CN8NK, in Rabat, will be active as CN4P during the CQWW DX SSB Contest (October 24-25th) as a Single-Op entry. QSL via

EA5XX.

D6, COMOROS. Sam, F6AML, (F6KOP team member) will be active as D68F from the Union des Comores (AF-007) between November 13-23rd. Activity will be on 160-10 meters, including 30/17/12 meters, using CW and SSB. His suggested frequencies are:
CW - 1828(RX/1822), 3520, 7020, 10115, 14020, 18071, 21020, 24891 and 28020 kHz
SSB - 1828(RX/1822), 3775, 7075, 14265, 18140, 21265, 24960 and 28480 kHz
Sam will operate split (up 5 or down 5 kHz) using a FT857D w/amp. He plans to focus on the topband and lower bands. SUNRISE: 0240z SUNSET: 0215z. QSL via his home callsign, by the bureau or direct (QRZ.com). All the gear except the amplifier, will be given to the foundation for the future Radio Club of the Comoros Union.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
FT5GA - Glorioso Island; 2009 Operation

* YI/KV4EB DXCC CREDITS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports DXCC credit for this operation originally noted dates from April 20, 2003, to November 28, 2003. An update to this operation has been received and the DXCC approval dates are now from April 20, 2003, through January 9, 2004. If you had this operation rejected due to this date issue you can fix it in one of two ways:
1) Send an email to dxcc@arrl.org
2) Select it in your next LogBook of The World application as logs will soon be uploaded.
This is ONLY if your QSO falls within the date period noted above.

EI, IRELAND. Olivier, ON4EI, will once again be active as EI/ON4EI from Ireland (EU-EU-115, WLOTA 2484) near Fethard (IO62DL) on the top of Benneshill (170m ASL) between October 21-26th. Activity will include the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/Low-Power/ Non-Assisted entry. It is suggested to look for him before the contest on 7150 lHz +/- QRM. His equipment is a Elecraft K3 w/100w into a 18m vertical top loaded monopole, inverted V for 160/80/40m and a Spiderbeam for 20/15/10m.

ES, ESTONIA. Ben, OZ5AAH/OZ5IPA, will be active as ES1/OZ5IPA from Tallinn and plans to participate again in the "The International Police Association's Contest", November 7-8th. Contest rules are available at:
http://www.ipa-rc.de
Look for him to be on CW and SSB. All QSOs will be good for "Sherlock Holmes Award" and IPA awards. QSL via his home callsign direct to:
Ben Jakobsen, Gjethusparken 25, DK-3300 Frederiksvaerk, Denmark.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands (include topband). He has announced that he will be in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band or Single-Band (15 or 10m) entry. His activity will be "random style".

QSL via F8BPN, direct, by the bureau, LotW.

HQ2, HONDURAS. Dan, HR2DMR, will be active as HQ2W during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via HR2DMR (QRZ.com).

HT2/YN, NICARAGUA. Mike, K9NW, will again be active from Nicaragua between October 22-27th. His activity will include the CQWW DX SSB Contest (October 24-25th) using the callsign HT2N during the contest as a Single-Op/All-Band entry. Look for him as YN2NW before and after the contest. QSL YN2NW via K9NW. QSL HT2N via K9NW "ONLY" for the 2009 CQWW SSB Contest.

IOTA NEWS.....
EU-045. Mauro, IN3SAU, will be active as IB0/IN3SAU from Ponza Island for 10 days starting October 26th. Activity will be on 80-10 meters using SSB, RTTY and PSK31. QSL via his home callsign.

OC-129. Manfred, DL4IAS, will be active as DV7/DL4IAS from Bantayan Island in the Philippines between October 20th and November 5th. Activity will be on CW, SSB and PSK. QSL via his home callsign.

OC-130. Kouichi, JI1FGX, now living in Ozamiz Occidental on the Island of Mindanao, is active as JI1FGX/DU9. Activity is on 80/40/20/17/15/10/6 meters using SSB, SSTV and RTTY. QSL Manager is JF1LZQ: Yutaka Sakurai, P.O. Box 1, Suyama, SUSONO, SHIZUOKA, 410-1299, JAPAN. Please send your QSL requests to JF1LZQ via the following instructions below:
For JA stations - JARL Bureau, SASE, or SAE + 1 USD
For Non-JA stations - Bureau, or SAE + 2 USDs

OC-142. Ray, K9LUK, is expected to be active possibly as VK4/K9LUK from Fraser Island (OC-142, WLOTA L 2976), Queensland State, Australia, between now and October 23rd. Look for activity on all HF bands. QSL via his home callsign (QRZ.com).

OC-149. Operators Mike/KM9D and Jan/KF4TUG are reportedly staying on Liapari Island in the New Georgia Island Group. Length of stay is not known. Mike is signing H44MY and has been active on 160/80/40/15 meters CW. QSL via OM2SA.

SA-019. Operators Nilzo/PY6AWU, Jose/PY6HD and Roberto/PY6RT will be active as ZZ6Z from Abrolhos Archipelago between October 29th and November 2nd. The Brazilian Navy schedule could affect the dates. Activity will be on 80-10 meters SSB only. QSL via direct only to PY6HD.

JT, MONGOLIA. Marko, N5ZO, will be active as JT1ZO during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via OH0XX. Marko informs OPDX that he will be there between October 21-26th. Activity outside of the contest will be on the traditional HF bands probably most of the time (most likely very little if any 160m as there is no amp or antenna present there) using CW and SSB.

KH4, MIDWAY ISLANDS (OC-030). This operation is ending fast. The following is a schedule that was posted on the K4M Web page:
October 18th (2000z) - Commence tear down; Operation reduced to stations operating 15i¿½160 meters.
October 19th (0600z) - 15, 17 and 20 meter stations go QRT; Operation reduced to stations operating 30-160 meters
October 19th (1800z) - QRT
October 20th (0100z) - Depart Midway Atoll for Honolulu
As of early October 18th (0138z), there are over 49.3k QSOs with 15.5k unique callsigns (29584/CW, 17841/SSB and 1876/RTTY). For more details, updates, online log, frequencies and bios, go to: http://www.midway2009.com
QSL via online QSL Service, direct (Midway 2009, Box 333, Bethlehem, GA 30620-9989 USA) or LoTW. See the above Web page for complete details.

KH6BZF PROPAGATION FORECAST/REPORT (For October 19-25th)....
Oct 19 AN SOLAR REFERENCE
Oct 20 AN ---------------
Oct 21 AN AN - Above Normal/Geomagnetic Level is QUIET
Oct 22 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Oct 23 AN LN - Low Normal
Oct 24 AN-HN
Oct 25 AN-HN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between 0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between 7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS. Operators David/N3XF, Ed/K1ZE and Rob/W1EQ will be active as KP2/homecall from St. Croix between November 4-11th. Activity will be on 160-10 meters using CW, SSB and possibly RTTY. Look for KP2M during the ARRL CW Sweepstakes Contest (November 7-8th). QSL KP2M via info on QRZ.com. All other QSLs via home callsign and LoTW.

LX, LUXEMBOURG. Philippe, LX2A, will be active as LX7I during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m)/High-Power entry. QSL is OK via LX2A, by the Bureau, direct and LoTW (no EQSL). His Web page is: http://www.lx2a.com

NEW CLUB FORMED. It was announced this past week that a new club called "Radio Club Isla de Margarita" (YV7RCM), located on the Island of Margarita (IOTA SA-012), was born. At the present, there are 40 active members and some others waiting for their callsigns. Board of directors are:
Rafael Arenas/YV5ESN/7 - President
Diego Ross/YV7KT - Vice President
Jose Luis Blanco/YV7BMZ - Secretary
David Fernandez/EB7DX - QSL Manager
Club's Web page is:
http://sites.google.com/site/radioclubislademargarita/home
E-mail address is: yv7rcm@gmail.com

OOOPPSSS DEPARTMENT! Small typo in last week's bulletin (OPDX.929). Under the item "J8, ST. LUCIA.", the "J8" should have been "J6".

P2, PAPUA NEW GUINEA (Reminder/Update/IOTA Op). Operators Hans/SM6CVX (CW), Derek/G3KHZ (CW), Luis/CT1AGF (SSB/RTTY), Gordon/G3USR (SSB) and David/M0VTG are scheduled to activate three (possibly 6) Papua New Guinea IOTA islands between October 22nd and November 16th. The announced schedule and callsigns are as follows:
OC-102 - Tanga Island; callsign P29VCX (via SM6CVX); October 22-26th
OC-231 - Green Island; callsign P29VLR (via SM6CVX); October 27-31st
OC-205 - Woodlark Island; callsign P29NI (via G3KHZ); November 2-9th
Activity will be on 160-15 meters using CW, SSB and RTTY modes. The team will be using new single band vertical dipoles for 30-15 meters and a ground plane for 40 meters. Hans, SM6CVX, will activate Hastings Island (OC-117) as P29VCX (QSL via SM6CVX) possibly between November 11-13th. Then if possible, D'Entrecasteaux Island (OC-116) as P29VCX (QSL via SM6CVX) between November 13-14th. Also, a one night operation is possible from Loloata Island (OC-240) as P29VCX (QSL via SM6CVX) between November 15-16th. A Web page is available for more details at:
http://www.425dxn.org/dxped/p29_2009/index.html

PA30, NETHERLANDS (Special Event). Members of the "International Police Association Radio Club" of the Netherlands (IPARC-PA) is celebrating their 30th anniversary by activating the special event station PA30IPA between now and November 6th. Look for IPA members of the IPARC to be active on HF, VHF and UHF on all modes, including PSK31 and RTTY. QSOs with PA30IPA counts for 2 points towards the Windmill Award. You need 3 points, so if you ask for a QSO with the operator with his home callsign, you collect all 3 points and can obtain the award. QSL PA30IPA via PA9LUC. For a scedule of the transmissions of PA30IPA see IPARC's Web site at:
http://www.iparc.nl

PB65, NETHERLANDS (Special Event). Look for special event station PB65BP to be active until November 11th. Operations will be on all bands and the Digital modes. Activity is to celebrate the 65th anniversary of the "Liberation of Breda" and the memory of the Poles -- soldiers of the First Polish Armored Division under General Stanislaw Maczek that released the city on October 29, 1944. The complete story can be found on QRZ.com under the callsign PB65BP. QSL via PA1WLB.

PJ4, NETHERLANDS ANTILLES. Don, W9JNY, will be active as PJ4/W9NJY from Bonaire (SA-006 and WLOTA L1279) between now and October 30th. Activity will be casual on all HF bands. QSL via his home callsign, direct or by the Bureau.

PJ4, NETHERLANDS ANTILLES. Jeff, KU8E, will once again be active as PJ4/KU8E from Bonaire (SA-006 and WLOTA L1279) during November (dates not provided). Activity will include the CQWW DX CW Contest (November 28-29th) as a Single-Op/Low-Power entry. QSL via K4BAI, direct or by the Bureau.

QSL INFO AND NEWS.....
STILL OPERATING AND STILL QSLING! Wim, PA0WRS, reported (edited):
"Today in the mail a QSL from W0ZTL North Dakota 160m. A new one for my 160m WAS. Operator Alex will be 92 years old in November and is QRV since 1939. I added 2 Greenstamps and Alex returned 1.

It's for sure that Alex still has FB ears..... Tks Alex"

NEW QSL MANAGER. Andy, ZC4VJ (G3AB), reports that he has a new QSL Manager. The new QSL Manager is via M0URX. Cards received at the P.O. Box address in Cyprus will continue to be answered. LoTW logs will continue to be uploaded by ZC4VJ.

NEW QSL ROUTE. Erik, K5WW, reports that effective October 12th, he will start doing the HR9/WQ7R QSL (so no longer via AI4U).

HAVE PATIENCE! More QSL cards were received this past week for the many UA4WHX operations. Leslie, WF5E, from the "WF5E DX-QSL SERVICE" reported receiving 600 QSL cards from Vlad, UA4WHX. He states, "Today (Oct. 17th) I received my first shipment of QSLs from UA4WHX. 3 lbs. I still have another 500 or so due later. I will process these and send them out ASAP. Thanks Vlad." For more details about the "WF5E DX-QSL SERVICE" go to: http://www.qsl.net/wf5e

QSLS VIA LOTW: 9M2CNC, CT3FQ, GW4BLE, HI3TEJ, HK1X, HK6P, IK0YVV, LX7I, LY9Y, OE9GHV, OK2ZI, PA7LV, PF7M, S9MX, SV2BFN, TI5/NP3D, TO4X, TS7C, UA3BS/3, UA3SAQ, UA3TCJ, YI/KV4EB, YL7X and YW4V

QSLS RECEIVED VIA MAIL: 5B/AJ2O, 5B4AII, 5K0T, 9H3QC, C31PP, CC0Y, GI0KOW, GI0VJE, HA5JI, KL7J, LZ1JZ, OH0R, PY0FF, R7HQ, RW3RN, TO3R, TO5AA, TO8YY, UM8LA, VK9GMW, VQ9LA, YI1RZ, YL2BJ, YL2KO and YT5W

QSLS RECEIVED VIA THE BUREAU: 4L7O, DP1POL, EP4HR, ES5NC, FJ5DX, H40FN, LA9Z, OA4BHY/2, T88HM, TC2T, V51AS, V26MN, VK9XW, VP9400KD, XE1KK/XF1, YJ0MM and ZL1WY/ZL7

SILENT KEY. It has been reported that well-known DXer Mathias Bjerrang, JW5NM/LA5NM became a Silent Key (SK). Reports indicate that while in Svalbard, Mathias slipped and fell while walking, hitting his head. He was later found Sunday morning, cold and unable to speak. He was brought inside where he later stopped breathing; he was unable to be resuscitated and died. OPDX and its readers would like to send out our deepest sympathy to the family and friends of JW5NM/LA5NM.

ST, SUDAN. Robert, S53R, will be active either as ST2KSS or ST2X (pending license) during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/ Single-Band (15m, possibly 20m) entry.

T8, PALAU. Kozo, JR8DHE, will be active as T88KP between October 24-29th. Look for activity in the CQWW DX SSB Contest (October 24-25th). QSL via his home callsign.

TC7, TURKEY. Operators Hudaverdi/TA7OM, Ayhan/TA7N, Erkan/TA7CM, Bulent/ TA7Q, Ismail/TA7AO, Can/TA3GO and YL Elif/TA3YE will be active as TC7KA during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via TA7KA.

TI5, COSTA RICA. Once again a large team of operators will be active as TI5N during the ARRL DX SSB Contest (March 6-7th) as a Multi-? entry. QSL via W3HNK. Operators mentioned are Brian/K9QQ, Mike/KA4RRU, Dan/W0CN,

Denis/W4DC and Kyle/WA4PGM.

TI8, COSTA RICA. Operators Keith/W4KTR, Eddie/K4UN, Bob/W4BW, Lex/W4XO, Carlos/TI2KAC, Juan Carlos/TI2JCY and TI2ZM will be active as TI8M from Costa de Pajaros, during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via TI2KAC, direct preferred but bureau "OK".

TO7, MARTINIQUE. Dmitry, UT5UGR, will be active as TO7A during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSL via UT5UGR.

TX5, MARQUESAS ISLANDS (Update). Operators Les/SP3DOI, Jan/SP3CYY, Wojciech/SP9PT, Jozef/SP9-31029 and Michel/FO5QB will be closing up their TX5SPM Nuku Hiva Island (OC-027) operation in the Marquesas Islands group on October 22nd. As of Sunday, 4k QSOs are logged. The QSL Manager for their DXpeditions is Wojciech, SP9PT. For more details and updates, go to: http://fo2009sp.pl

V3, BELIZE (Update). Pete, K8PT, will be active as V31PT from Ambergris Cay (IOTA NA-073) between November 24th December 6th. He informs OPDX that this will be a holiday style operation on 40-10 meters only using SSB, CW and RTTY. QSL via his home callsign.

VG7, CANADA (Special Event). Members of the Vancouver Olympics Amateur Radio Group (VOARG) will be activating three special event stations to promote/commemorate the Vancouver Winter Olympic and Paralympic Games to be held in February and March of 2010. The special activity has began this October and will continue through March 2010. Operations will be on all bands and modes. The schedule for the three special 2x1 callsigns are as follows:
VG7V ï¿½ October 1st through November 30th
VG7W ï¿½ December 1st through January 31st (2010)
VG7G ï¿½ February 1st through March 31st (2010)
VOARG will be consolidating all contacts and intends to post them to the LoTW. In addition, commemorative QSL cards will be available at the conclusion of the events in April 2010. Direct QSL will require a self addressed envelope (SAE) and 2 green stamps to cover postage sent to the following address: VOARG, 9362 - 206A St., Langley, BC, Canada V1M 2W6 Cards received via the QSL Bureau will be returned the same way. A VOARG Web site will be operational in the very near future with more details.

VK9L, LORD HOWE ISLAND. There have been a few 40m QSNs reported by VKs that Lewis, VK2AHL, is active as VK2AHL/VK9L and is on holiday there. No way to check before going to print, but WFWL..... We will keep you posted.

VK9X, CHRISTMAS ISLAND. Operators Phil/G3SWH and Jim/G3RTE will be active from Christmas Island between February 20-27th (2010). Christmas Island counts as OC-002 for IOTA purposes. The 2008 "Most Wanted" survey by the DX Magazine shows Christmas Island at #66 world-wide for DXCC purposes. They will both use the callsign VK9X/G6AY. Their activity will be on CW only on all bands 80-10 meters. There will be no 160 meters activity.

Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many bands as possible. QSL via G3SWH, either direct with SAE and adequate return postage (recommended), via Phil's Web site <http://www.g3swh.org.uk> for a bureau reply or via the bureau. There is more information at: http://www.g3swh.org.uk/christmas-island.html

VR2, HONG KONG (Also FK). Jean-Louis, F5NHJ, will be active as VR2/F5NHJ from Hong Kong (AS-006) between October 20-25th. He will also be active from New Caledonia (FK) between October 26th and November 11th. His callsign will be FK/F5NHJ from Grande Terre (OC-032) and also from Lifou or Mare Island (OC-033). Activity from both places will be focused on 30 meters using the Digital modes. He will use a FT-857 and a Buddipole. QSL via F5NHJ, direct or LoTW. For more details, see his Web page at: http://www.f5nhj.fr

WRTC-2010 NEWS. Harry, RA3AUU, member of the WRTC-2010 Organizing Committee, announced that the list of team leaders have been chosen for WRTC-2010. To see the list of the 44 team leaders, please visit the WRTC-2010 Web page at: http://www.wrtc2010.ru/

XU7, CAMBODIA (IOTA/Contest Op). Wim, XU7TZG, will once again be active as XU7KOH from Koh Russei (IOAT AS-133, aka Bamboo Island). Peter, NO2R (XU7ACY) will also be with him. Both will be active in the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via ON7PP direct only (w/2 USDs and SAE). Donations appreciated to QSL Manager to cover expenses. There will be limited CW operations before the contest.

YB, INDONESIA. Members of the ORARI Daerah Jawa Tengah Contesting Team will be active as YE2R from Semarang on the Island of Java (IOTA OC-021, WLOTA L1660), during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via EB7DX. Operators mentioned are: Hans/YB2DX, Seno/YB2LSR, Warno/YB2BOB, Jon/YB2ECG, Dani/YB2TJV, Taryono/YB2OBL, Partono/YB2CPO, Herry/YB2SSB, Deta/YB2VTO, Buntoro/YB3PXF, Adhi/YB3MM, Rudi/YC2KME, Bobby/YC2BBY, Dharmoko/YC2JVX, Sapto/YC2JKG, Udi/YC2PQW and Danis/YD2DNA.

YJ, VANUATU (Update/IOTA Op). The Croatian team of Ante/9A4DU, Nikola/9A6DX and Marko/9A8MM will be active as YJ0XX, YJ0DX and YJ0MM, respectively from Efate Island (OC-035) between January 21-28th (2010). Activity will be on 160-10 meters using CW, SSB and RTTY. QSL Manager will be 9A8MM. More details and updates are available at: http://vanuatu.rkp.hr

YOUNG HAM'S SELECTED FOR 2009 CQWW. David, KY1V, reports (edited): "We have finished the selection process for this year's Young Ham Contest Program. Having received dozens of essays from 5 continents we discovered we had a rich pool of excellent young CW operators from which to choose. This year, we decided to go back to our roots and sponsor CW operators for the CQWW CW Contest which we haven't done since 2004 when then 14 year old Daniel Bradke, W2AU, was selected as the first ever recipient of this opportunity at VP5X. Thanks to my partner Krassy, K1LZ, and a generous donation from a Texas amateur (whom we'll announce later with

permission), we decided to select 4 young hams to comprise the base team for 6Y1V's CQWW CW operation. With myself as the 5th team member, we have one spot open for a 6th team member. If you're interested in participating in this once in a life time adventure, let me know ASAP. Congratulations to the following four lucky young hams:
K0DXC - Cal Darula of Jackson, Ohio**
EA3ALZ - Roger Caminal of Sabadell, Spain
OZ7AM - Alex Hansen of Vallensbaek Strand, Denmark
RV9LM - Alexander Bezmenov of Tyumen, Russia
See you in Jamaica in November!"
** PLEASE NOTE: David, KY1V, later reported: "It is with great regret that I report Cal Darula, K0DXC, cannot join us for CQWW CW in November due to a prior commitment to K3LR. Not only is Cal a wonderful kid, but he is a stand up guy that places priority on previous commitments! You'll go far in life Cal. Krassy and I are extending you a special invitation to operate in ARRL DX next spring. Yes, we'll pick up your expenses! This leaves us with an open seat for another lucky young ham. We'll announce our selection within 24 hours!"

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. Activity will be on 160-10 meters. QSL via VU2PAI direct (QRZ.com address).

YW0, AVES ISLAND. On the YW0A Web page, it was announced that "The DXpedition will be scheduled by the Venezuelan Army for January 2010, in 3 or 4 weeks. We are working and coordinating with them, to obtain less days of operation. No one operator or team member can stay for a long time on the island." For updates, watch:
http://yw0a.4m5dx.info/home.html

Z3, MACEDONIA (Update/Correction). Members of the Radio Club "Nikola Tesla" (Z37M) and the MDXC will be active as Z37M during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via the Bureau or direct only to the MDXC H.Q. at: MEDITERRANEO DX CLUB, BOX 360, 87100 Cosenza, Italy. Operators mentioned are: Ant/IZ8CCW, Pasquale/IZ8IYX, Dario/IT9SSI, Antonello/IT9YVO, Gianni/IZ8CGS, Alex/IZ5MOQ, Dom/IZ8JAI, Venco/Z36W and Chris/Z35X. Look for more details on the MDXC Web page at:
http://www.mdxc.org

ZP0, PARAGUAY. Mike, NT6X, plans to be active as ZP0R during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via ZP5AZL. Mike will be operating from Tom's, ZP5AZL, QTH located in the borders of Asuncion, the capital city of Paraguay. Operations prior to the contest, Mike will sign ZP6/NT6X.

ZY0T, TRINDADE AND MARTIM VAZ ISLANDS (Update/Delay). Members of the Rio DX Group are now active from Trindade Island (SA-010) as ZY0T until October 20th. QSL via PY1NB DIRECT ONLY. See OPDX.927 for more details, or visit their Web page at: http://riodxgroup.dxwatch.com/trindade-2009

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 18th October 2009

Bereavement

It is with great sadness to extend our deepest Sympathy to Owen Furniss EI4DI and family on the death of their Son, Irish Air Corps Captain Derek Furniss whose funeral was on Saturday 17th October, May he rest in peace.

IRTS Presidents visit to Crossakiel

Last Wednesday, IRTS President Paul Martin EI2CA, attended the meeting of the Crossakiel Amateur Radio Association.

The meeting was well attended by CARA members, Paul EI2CA presented the IRTS Mebership Certificate for CARA to the Associations President Gary Renihan EI3GIB.

CARA meet every Wednesday in the Welcome Wagon in Crossakiel, all are welcome to attend.

Train the Trainers

The Society is considering running a "Train the Trainers" session for theory tutors intending to run classes and who wish to use the Society's CD Exam Course Guide. This may also be of interest to those unable to attend classes and who wish to use the Guide as a study aid for the Theory Examination.

The two-hour session would most probably take place on a weekend afternoon and would demonstrate how best to use the CD Guide and also practical matters relating to preparing students to sit the Exam. If you are interested in participating in such a Training Session please drop an email to Paul EI2CA or Seamus EI8BP or indeed any of the Committee Members. Their contact details are on the IRTS website and in the latest issue

of Echo Ireland.

Affiliated Clubs

Affiliated Clubs are reminded that they are entitled to send a representative to IRTS Committee meetings. The next Committee meeting will take place on Saturday 31st October in the Port Laoise Maldon Hotel at 11am. The meetings usually finish by 1pm and it is an opportunity for Clubs to participate in the Committee process.

IOTA 2009 Provisional Results

The provisional results for the 2009 Islands On The Air Contest have now been published. These results show that over 2,000 logs were submitted - a record figure for this contest. 20 EI and GI stations submitted logs.

The highest EI/GI score was achieved by EJ0GI - South Dublin Radio Club and the City of Belfast Radio Amateur Society - who operated from Inis Oirr. Their score was just under 5 million points, giving them 8th place in the DXpedition, Multi-Operator, Mixed Mode, 24 Hour, High Power category.

GI0MPG, operating from Rathlin Island, were placed 9th in the same category, with 3.1 million points. Meanwhile, the Dalkey Island Contest Group (EJ1DD) - operating from Clare Island and in the Low Power category - were placed 8th in this category, with over 2.2 million points.

Other Irish stations achieving in excess of one million points were Thos EI2JD, who placed 1st in the assisted category and 2nd in the major Single Op category with 2.9 million points and also Pat EI9HX, with 1.2 million points.

The highest overall score was achieved by the Slovak Contest Group operating in Sardinia, followed closely by the Bristol Contest Group operating from Jersey.

Dxpedition and IOTA Talk by Declan Craig EI6FR

The Mayo Club has organised Declan Craig EI6FR to give a talk the evening before the Mayo Radio Rally, Saturday 21st November. He will have an interesting account about past Expeditions and IOTAS's he has taken part in, how to plan future events and what is involved.

Declan will be talking from experience as he has soldiered on a few and his experience is invaluable!

Dayton 2010, Get with the Program

"Amateur Radio Clubs Worldwide, The Lifeline" will be the theme of the 2010 Dayton Hamvention scheduled for next May 14th to the 16th at the O'Hara Arena in Dayton, Ohio.

In order to help celebrate the world of radio clubs, Hamvention planners are asking for pictures from radio clubs around the world that it can use on the front and back cover of the Hamvention 2010 program magazine.

They are also looking for stories of interest from interesting radio clubs.

More details are available at the Dayton site

www.hamvention.org

G5RV's 1932 Logbook sells

On October 1st, the 1932 logbook of Louis Varney, G5RV, was put up for auction on eBay. Within a couple of days the price reached £77 where it stayed until last Sunday. After some intense bidding the logbook finally sold for £227.

The logbook shows that G5RV's final QSO's were on January 11 2000.Ironically, the final entries appeared on page 73 of the logbook. Varney was, of course using a G5RV antenna that he designed for those final contacts.

JOTA 2009

Jamboree On The Air (JOTA) is taking place this weekend

On a weekend each October more than 500,000 people from over 100 countries participate in the largest annual world-wide Scouting event - a Jamboree on the Air, or JOTA.

Amateur radio stations are used to allow the young people to exchange greetings over the air. In addition many groups will include construction activities, electronics tuition, radio 'fox-hunting' and orienteering, or perhaps combine these with a special camping weekend.

Also AMSAT the Radio Amateur Satellite Corporation has made changes to the operational schedule of Echo, the AO-51 Satellite to accommodate JOTA activites. JOTA stations are encouraged to operate through the Sat on its passes over the weekend.

Priority has been given to JOTA Stations who would like to work AO-51 and Amateurs are encouraged to work JOTA stations.

Radio Sweden to stop issuing QSL cards

With the start of the new transmission period for shortwave and mediumwave, as well as satellite, on October 25, Radio Sweden will only be publishing its broadcast schedule on the Web.

At the same time Radio Sweden is discontinuing mailing QSL cards to listeners in response to reception reports.

Glorioso Island team hit QSL target

The FT5GA team is now QRT and is happy that the goal of 50 Thousand QSOs was reached by a crew of 5 operators with two and sometimes three stations.

The FT5GA went QRT on October 7th (a day earlier than expected due to the military flight schedule).

Didier, F5OGL, states, "The logs of the FT5GA operation will be very soon on LoTW."

CQ WW CC announce New Rules

Any participants in the upcoming contest are reminded to check the rules as there have been some changes made. It is understood that the changes will not affect every participant however it is recommended that anyone participating should review the rules.

More information can be found at www.cqww.com

DXCluster for mobile phones

The GB7MBC DXCluster is now available for those of you with mobile smartphones. Web pages have been created to make it simple to use the cluster when mobile.

Although designed for an iPhone, they have been tested on Blackberry, Android and the Nokia N95. It should work with most smartphones.

The pages feature filtering and the capability to click on a DX callsign to get the QRZ information for it.

The cluster is available at

http://www.gb7mbc.net/webcluster/iPhone.php

Rallies

Sunday 1st November 2009 Foyle and District ARC Rally Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA (same hotel as last year)

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

For more information on Rallies please check the IRTS website.

****
The ARES E-Letter

Published by the American Radio Relay League
****

October 20, 2009

Editor: Rick Palm, K1CE <k1ce@arrl.net>

At the end of September, the ARRL adopted a statement of policy with respect to the use of Amateur Radio entitled the The Commercialization of Amateur Radio: The Rules, The Risks, The Issues <http://www.arrl.org/news/files/ARRL_AppropriateUseGuidelines.pdf>. The document offers guidelines to assist radio amateurs and anyone wishing to use the capabilities of Amateur Radio in understanding the FCC Rules that prohibit communications in which the amateur has a pecuniary interest, including communications on behalf of an employer. From the document's introduction:

"From its founding in 1914 to the present day, the American Radio Relay League has fostered Amateur Radio public service and emergency communications activities. The League encourages organizations engaged in disaster relief to make appropriate use of Amateur Radio. Further, the League welcomes new, public-service minded licensees from all occupational and professional backgrounds. The ARRL believes that the Amateur Radio Service and our emergency communications activities flourish best in an atmosphere of respect for and compliance with the FCC's Rules. These Rules provide for more flexibility than is typical of other radio services. They guide our operations and assist us in protecting the spectrum allocated to the Amateur Radio Service from encroachment by commercial interests.

"This document is not intended to discourage anyone from becoming an Amateur or to discourage any organization from promoting an interest in Amateur Radio among its employees and volunteers. Nor does it signal any change in the League's long-standing devotion to public service and emergency communications. Its objective is to educate both Amateurs and the organizations we serve about what is permitted under the FCC's current Rules and to assist Amateurs in making reasoned decisions about the appropriateness of services we may offer to organizations in our communities."

This document is a must-read: Please click on the link above and spend some time going over it with your ARES group.

==> VERMONT ARES SUPPORTS JDRF BIKE TOUR

On August 29, ARES members of the Central Vermont Amateur Radio Club, Inc (CVARC) provided health and welfare communications for the Juvenile Diabetes Research Foundation (JDRF) Bike Tour. The tour covered one hundred miles over difficult terrain on a cold rainy day. It was hard on the riders and VHF communications were difficult. Many of the riders either have diabetes, or have family members that suffer from it. However, the majority of the riders persevered, riding the entire 100 miles. The youngest operator (16) Chris Craig, K1MHZ, ran a professional net as alternate NCS.

The route took riders up the Rt. 100 valley from Killington to Waitsfield, and back, with the event organizers trying to use their ten Motorola Satellite phones (SAT's), local ambulance service radio systems, and cell phones of every variety and provider available. None were of any use for the majority of the route! The only consistently reliable communications for the entire route was provided by Amateur Radio. There was not one quarter mile that the Medical Supervisor was not able to communicate with the various rest stops and overall tour supervisor.

Over $1.3 M was raised by the tour for the Juvenile Diabetes Research Foundation (over $4,000 each participant, on average), the most raised for any of their numerous events throughout the country. There were no serious medical incidents. All of the most necessary information for the event was passed via Amateur Radio. Many thanks to all who helped make communications for the event a success. -- Tom Long, KB1NGQ, Waterbury Center, Vermont

==> KENTUCKY SARS SERVED BY ARES

If most of your active ARES members wear several hats, it can stretch a small volunteer group thin when an emergency occurs. This is true of most ARES (and other) organizations. But it can also be an advantage. More agencies can learn about you, there is built-in cross-training,

and opportunities can open up that would not otherwise be available.

About noon on Friday, September 4, an autistic younger teenage girl disappeared from school. She had disappeared once before and had been found hiding in the school. This time an internal search turned up nothing. About 1430 a full search of the Radcliff, Kentucky, area was begun by several fire departments, a local K-9 group, and others.

At 1700 the American Red Cross was asked to provide support for the large number of searchers. Four volunteers in two ARC vehicles and one private pickup truck left for the Radcliff Fire Station 1, which was being used as the command post for the search.

Among the ARES volunteers were Dave VanderMolen, AI4VF, and Shelby Ennis, W8WN. After the first round of food had been provided for the searchers, a call came in on the Elizabethtown repeater from an additional K-9 crew that was coming in from a neighboring county. It was learned that most of the arriving crew were radio amateurs and that they would not have any communications with the CP except via their Amateur walkie-talkies. At this point VanderMolen and Ennis decided to set up an Amateur station at the fire department/CP.

VanderMolen had a collapsible 10-foot pole, two-meter ground plane, mobile rig and AC power supply in his truck, so it was quickly set up outside the fire station. While it worked well, it soon became evident that it would be inadequate. The visiting K-9 crew, now out in the field, could not communicate back to their head person at the CP. And surprisingly, even with the good ground plane, VanderMolen and Ennis also could not communicate reliably with the searchers. (Two other ARES members were out as heads of two of the SAR groups, but their communications were adequate).

Meanwhile, Lora Ennis, WD8LPN, had requested that several other operators from the area go on standby as it appeared that the search would continue all night. John Mahanna, KC4CQT, who lived only a few blocks from the fire station, had a 60-foot tower and good equipment plus experience, so he was asked to take over the relaying. This worked well, as he could copy all of the searchers.

About 2200 it was decided that the search would have to continue all night, and arrangements were made by the many groups and agencies to keep searching. But about an hour later one of the dogs picked up a good trail, and the young lady was quickly located in good condition.

Everything was secured. The Hardin County Amateur Radio Emergency Communications group had been very helpful, thanks to having two ARES members on the scene with the American Red Cross and having KC4CQT living nearby.

But this wasn't the end of the story. Only 24 hours later another young teenage girl in another area of the county ran away from home. The fire department in charge of the search (a different department) realized that they did not have any portable equipment with which to maintain

adequate communications from the command post, which was set up in one of the county schools, so they immediately called AI4VF for assistance. As VanderMolen drove to the area about 0130 Sunday morning he put out a call on the local repeater and raised Leon Priest, N4TFK, who immediately went on standby to see what would be needed.

VanderMolen discovered that two public safety frequencies needed to be monitored, but needed appropriated equipment. Priest, however, reported equipment available in the Severns Valley Association's Southern Baptist Disaster Response trailer. (VanderMolen, Priest, and Ennis are also members of the SBDR, as well as ARES and ARC). Priest and VanderMolen soon had two radios and two antennas in operation. Later that night the girl returned home, and the local SAR groups were happy to get some rest.

Since then two of the area fire departments have asked ARES to be put on their official emergency response lists. -- Shelby Ennis <w8wn@arrl.net>, W8WN/AAR4IJ, Hardin County, Kentucky EC; ARC DSHR 184654; http://www.qsl.net/w8wn/ <http://webmail.cfl.rr.com/do/redirect?url=http%253A%252F%252Fwww.qsl.net%252Fw8wn%252F>

==> EMCOMM COMPANION BILL OFFERED IN SENATE

On Tuesday, October 6, Senator Joe Lieberman (ID-CT), along with Senator Susan Collins (R-ME), introduced Senate Bill 1755 <http://www.arrl.org/news/files/SenateBill1755.pdf>, The Amateur Radio Emergency Communications Enhancement Act of 2009. Similar to HR 2160 <http://www.arrl.org/govrelations/HR2160.pdf> -- also called The Amateur Radio Emergency Communications Enhancement Act of 2009 -- that was introduced this past April by Representative Sheila Jackson-Lee (D-TX-18), the bill, if passed, would direct the Department of Homeland Security (DHS) to undertake a study on emergency communications. S 1755 points out that "There is a strong Federal interest in the effective performance of Amateur Radio Service stations, and that performance must be given -- (A) support at all levels of government; and (B) protection against unreasonable regulation and impediments to the provision of the valuable communications provided by such stations."

==> AND THE TRAINING KEPT A ROLLIN' . . .

A reminder to all ARES ops that they should have the following certifications as a minimum level of competency in ARES emcomm facets. These are pursuant to the recommendations of the former ARRL National Emergency Response Planning Committee.

â□¦ ARRL's ARECC Level 1 -- click here <http://www.arrl.org/cep/calendar/coursedescription.html?id=EC-001>for information and a syllabus.
â□¦ ARC combined course in Adult CPR/First Aid Basics <https://www.redcrossonlinetraining.org/Distance/Default.aspx?CID=58>
â□¦ ARC online Introduction to Disaster Services <http://www.redcross.org/flash/course01_v01/>

â□¦ FEMA IS-100 (Introduction to Incident Command System <http://training.fema.gov/EMIWeb/IS/IS100a.asp>)
â□¦ FEMA IS-200 (ICS for Single Resource and Initial Action Incidents) <http://training.fema.gov/EMIWeb/IS/IS200a.asp>
â□¦ FEMA IS-700 (National Incident Management System <http://training.fema.gov/EMIWeb/IS/IS700a.asp>)
Except for the first two, all courses are free of charge, and CPR/First Aid may be free to members of the American Red Cross. CPR/First Aid is the only course which requires periodic refreshers and the only course which must be taken in person rather than on the Internet. Where FEMA courses exist in more than one current version - aimed at somewhat different audiences - any of the currently-available versions will suffice.

The American Heart Association (AHA) also offers excellent courses in Basic Life Support, and for more ambitious students, Advanced Cardiac Life Support.

==> LETTERS

On Resource Typing

Unfortunately, lack of commonality and standards can slow a response to a wide area disaster. Hurricane Katrina demonstrated that flaw. Hurricane Gustav verified the problem. Setting standards for response personnel and equipment from outside the affected area is crucial.

Not every position requires the same capabilities. Actually, the needs vary widely across the entire response. A motor home packed with multiple radios, operating positions, modes and antennas is overkill at a Red Cross shelter; and someone with just an HT is useless as net control for a big EOC in a region where infrastructure is down.

Typing of individuals and teams is essential to the mission and success of Amateur Radio emcomms. It must include equipment, physical capabilities and training. The NRCEV <http://www.nrcev.org/> has made a good effort toward typing <http://www.nrcev.org/files/cst_typing_matirx_only_2008.pdf>, although my feeling is that it needs more work. Possibly creating sub-types under the major groupings would be the answer. As yet, we are in the early stages of this initiative.

But it is the ARRL, as our leading organization for Amateur Radio, that must take the lead - and the sooner the better. -- Cliff Segar, KD4GT, Rockwood, Tennessee, "The Billboard Guy" <http://www.arrl.org/news/stories/2007/08/29/100/>

I was encouraged when I read the request for standards for Amateur Radio resource typing. I have been reading about the efforts to do this, especially from California hams, for several years. It's high time this was done seriously. I look forward to seeing your progress! -- Lee Mushel, K9WRU, Gays Hills, Wisconsin

==> GAREC 2009 SUMMARY

Officials from the IARU <http://www.iaru.org/> and all three IARU regions, national IARU Member-Societies and specialized Amateur Radio emergency communications groups from around the globe gathered in Tokyo on August 24-25 for the Fifth Global Amateur Radio Emergency Communications Conference (GAREC 2009 <http://www.rientola.fi/oh3ag/garec/index.html>). Hosted by the Japan Amateur Radio League (JARL <http://www.jarl.or.jp/English/4_Library/A-4-6_ham-fair/ham-fair.htm>), GAREC was held in conjunction with Ham Fair <http://www.jarl.or.jp/English/4_Library/A-4-6_ham-fair/ham-fair.htm>. More than 30 participants considered the statements from past GAREC conferences -- GAREC 05 (Tampere, Finland), GAREC 06 (Tampere, Finland), GAREC 07 (Huntsville, Alabama, USA) and GAREC 08 (Friedrichshafen, Germany) -- discussing the progress made on the implementation of the recommendations, and looking at recent experiences from exercises and actual emergency operations.

While GAREC is not a decision-making body, delegates made note of the relationships between the Amateur Service and organizations that are engaged in public protection and disaster relief, in particular the formal agreements and understandings that exist between the IARU and the United Nations, the International Telecommunication Union (ITU <http://www.itu.int/>), and the International Federation of Red Cross and Red Crescent Societies (IFRC <http://www.ifrc.org/>). They also looked at reports on recent emergency communications operations, specifically the earthquake disaster relief operations in Japan in 1995, China in 2008 and Italy in 2009, as well as the 2009 Australian bushfires. Delegates also took into account the reports on Global SETs, Center of Activity Frequencies, Automatic Link Establishment (ALE <http://www.arrl.org/tis/info/ale.html>) and emergency communications across international borders.

GAREC delegates requested that the ITU "continue to support the activities of IARU in facilitating the role of the Amateur Radio Service in emergency communications by fully implementing the provisions of Radio Regulations (RR) Article 25 <http://www.iaru.org/rel030703att2.html> . . ." The part of Article 25 concerning Emergency Communications states: "Amateur stations may be used for transmitting international communications on behalf of third parties only in case of emergencies or disaster relief. An administration may determine the applicability of this provision to amateur stations under its jurisdiction" (RR 25.3), and "Administrations are encouraged to take the necessary steps to allow amateur stations to prepare for and meet communication needs in support of disaster relief" (RR 25.9A).

GAREC also wants the ITU to "continue to study the possibilities for the introduction of an International Amateur Radio License facilitating the work of Amateur Radio Service in international assistance and related training activities."

GAREC appealed to all of the IARU Member-Societies, as well as specialized emergency communications groups, to do the following:

--To establish close working relationships between the National IARU Member-Society and independent specialized Amateur Radio emergency communications groups in the respective countries, as well as to cooperate internationally.

--To request their national regulatory authorities implement the modifications to Article 25 of the Radio Regulations, particularly the regulations governing third-party traffic during emergencies and during training for emergency operations.

--To provide training in emergency communications to as many amateurs as possible in their respective countries, with particular emphasis on personal and logistical preparedness, psychological aspects of entering a disaster area, familiarity with the civil protection system in their country, communications techniques of particular value in emergencies and remembering that the skills developed in the amateur service can be of great benefit to disaster relief organizations in maintaining and operating their own telecommunications networks.

--Whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, Web sites, social networking and DX clusters to draw the attention of the largest possible number of Amateur Radio operators to ongoing emergency communications, in order to avoid interference with emergency traffic.

--To use their contacts with national regulatory authorities to encourage the accession to and implementation of the Tampere Convention on the Provision of Telecommunication Resources for Disaster Mitigation and Relief Operations <http://www.itu.int/ITU-D/emergencytelecoms/doc/tampere/S-CONF-ICET-2001-PDF-M07.pdf>. To date, 37 countries <http://www.reliefweb.int/telecoms/tampere/signatories.html> have adopted Tampere.

--To support the work of the IARU on an international Emergency Communications Handbook and to provide copies of existing agreements with institutional partners in emergency response, as well as copies of emergency communication guidelines, manuals and checklists developed for national or local use as inputs to this work.

--To work toward the implementation of Memoranda of Understanding established between the IARU and ITU, IFRC, and the United Nations by seeking cooperation with the respective national institutions and organizations in their country.

--To continuously improve their awareness of the mission, vision and values of served agencies.

--To represent themselves as a human and technical resource able and willing to investigate the communication requirements of served agencies, offer recommendations when asked, and facilitate emergency communications when required.

GAREC called on the IARU to encourage its national IARU Member-Societies to "actively support the mission of Amateur Radio as an emergency communications resource." In the official GAREC Statement, delegates also stated that they would like to see the IARU support the following: The implementation of Article 25, the ongoing work toward an International Amateur Radio License, and the work and publication of the IARU Emergency Communications Handbook.

With respect to governments and telecommunication administrations, the conference would like these bodies to encourage joint training activities and exercises of Amateur Radio emergency communications groups and institutional providers of emergency response. Delegates recommend that GAREC conferences should continue to be held in locations throughout the world, maintaining the character of GAREC as an informal meeting among representatives of IARU Member-Societies and of Amateur Radio emergency communications groups, "serving as a forum for the exchange of experience and as an advisory body for the work on emergency communications of the IARU."

==> THREE PEOPLE KILLED WHILE ERECTING ANTENNA

A man, woman and their 15 year old son were killed while trying to erect a 50 foot vertical antenna at the home of the man's mother, Barbara Tenn, KJ4KFF, in Palm Bay, Florida. The deceased were not licensed amateurs.

"It happened in an instant," Palm Bay Fire Marshal Mike Couture said in a statement. "It is an unfortunate set of circumstances that led to the most tragic result."

According to police reports, Melville Braham, 55, Anna Braham, 49, and their 15 year old son Anthony were putting up an antenna -- Tenn's second -- at night when they lost control of the antenna and it crashed into nearby overhead power lines. The impact sent 13,000 volts of electricity through the pole the three were holding. A family friend, a 17 year old boy, was on the roof at the time of the accident. He and the couple's daughter, who was in the house at the time, were not injured.

The mother was pronounced dead at the scene. When paramedics arrived, the father and son were not breathing; rescue crews immediately tried to resuscitate them. They were transported to a hospital where they later died.

Neighbor Jim Vallindingham told television station WFTV <http://www.wftv.com/news/21277976/detail.html> that he called 911 when he saw the fire in the back yard and then he ran over: "I had no idea it was electrical until we got over there and saw the three people laying on the ground. So I called 911 a second time to tell them there

were casualties. You know, there were people on the ground. So [the 911 operator] told me that's electric, you back away don't touch anything."

Couture said that night was not the best time to be attempting to put up an antenna. "It wasn't the best time, meaning it was night time. Obviously, in darkness, and trying to do something like this and not being keenly aware of where the power line is in the backyard, [was not a good idea]," he said.

Neighbors said that Tenn, an ARRL member, used Amateur Radio to talk with her family in Jamaica. -- ARRL Letter

==> RESCUE SUPPORT AT UTAH MARATHON

Utah's St George Marathon <http://www.stgeorgemarathon.com/> draws more than 7000 runners to the town of St George -- located 300 miles south of Salt Lake City, near the Utah-Arizona-Nevada border -- each year. The race, now in its 33rd year, uses shuttle vans equipped with Amateur Radio operators and medical personnel to provide any help and support needed along its course. On October 3 -- race day -- Brian Plumb, KE7HNW, was driving Shuttle #3, with Kathy Hutchinson, a cardiac nurse at a local hospital, by his side.

"We started driving up and down the highway," Plumb said, "stopping to help anyone in need. Kathy and I had just dropped off a van load of runners at the transition area at mile marker 24, turned around and were getting ready to go up the highway again when everything happened -- a lady ran up to us and said there was a runner who had collapsed just up the road and he needed our help."

"As we approached the runner, we saw that he was down," Plumb recounted. "Kathy grabbed the oxygen and I grabbed the AED machine. When we got there, the runner wasn't doing well. With the help of another runner (who happened to be a fire fighter), Kathy gave him oxygen and we started doing CPR. The police were on the scene and they called 911 for an ambulance."

Plumb told the ARRL that the 48 year old man "had no pulse. He was gone. So I got the AED set up and I 'shocked' him and his heart began beating again. He was then transported to the hospital via ambulance. The EMTs told us that if we had not been there when we were there and with an AED, he would have been gone, he was so out of it totally and could not have been revived."

Later, Plumb learned from Hutchinson -- the runner had been taken to her hospital -- that the man and his family wanted to meet him. "I went there on the Monday after the race," he told the ARRL, "and said 'Hi, I'm Brian.' I didn't give my last name or call sign or anything like that, and they all asked, 'Are you the radio ham guy?' They knew that Amateur Radio had helped save their family member." Plumb said that the man is out of the hospital and seems to be doing fine. -- ARRL Letter

==> K1CE FOR A FINAL

Bit by bit, I have been putting my "personal EOC" back on the air following a lightning hit in June that took out my entire station and computer systems. It gave me the opportunity to reassess and rebuild my station accordingly. A major improvement, in my opinion anyway, was to place my equipment in a rack mount/stand on wheels. See photo. I believe that rack mounting your equipment not only provides an aesthetically appealing presentation, but adds more utility as well. The rack stand rolls around on the floor, and can be moved to the side of my chair as I type on the computer keyboard.

You may think that to rack mount your equipment is expensive. Think again. I used two sources for my project: NovexComm <http://www.novexcomm.com/>, which makes highly-professional, low-cost rack mounts for many Amateur Radio rigs, and, believe it or not, Musician's Friend <http://www.musiciansfriend.com/>, where I found a mixer stand that was perfect for my needs. The stand is surprisingly inexpensive, but

rugged enough for my in-home application. Here is the specific link to what I bought: Musician's Gear Rolling Rack Stand <http://accessories.musiciansfriend.com/product/Musicians-Gear-Mixer-Rack-Stand?sku=451029>.
As you think about rack mounting, look again at the photo: Nice looking, isn't it?! Give it a try. Perhaps this Thanksgiving, your XYL won't have the door to your ham shack closed and locked as she tours guests around the house!

My station, by the way, consists of an ICOM IC-756 PROIII HF radio, and a ICOM IC-2200H 2-meter FM radio, both powered by a husky ASTRON RM-35M power supply. Simple, but effective! The antenna is (or soon will be) an Alpha Delta DX-CC multiband wire antenna that is built to withstand the often severe weather here in Northern Florida.

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

2334. rec.radio.info Posting Guidelines

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-22 06:05:01 UTC
From: rram@panix.com

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

Amateur Radio Newsline(tm) Report 1680 - October 23 2009

Amateur Radio Newsline report number 1680 with a release date of
Friday, October 23rd, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC issues a public notice on ham radio
operators being paid by entities holding emergency training drills as
the ARRL plans a web seminar on the topic of pecuniary interest in
amateur radio. Also, South Africa's Sumbandillasat comes on the air,
the I-A-R-U Administrative Council meets down under and a truly rare on
for S-W-L's. Find out the details on Amateur Radio Newsline(tm) report
number 1680 coming your way right now.

RADIO LAW: FCC ISSUES PUBLIC NOTICE ON AMATEUR SERVICE COMMUNICATIONS
DURING GOVERNMENT DISASTER DRILLS

The FCC appears to be offering a kind of limited legal olive branch to
government entities in need of ham radio operators to perform emergency
communications during drills. This, while the ham is on the clock for
an employer who might be sponsoring or involved in the event. Amateur
Radio Newsline's Don Carlson, KQ6FM, takers a look at what the FCC has
to say:

--

In its October 20th public notice, the FCC begins by reiterating that
transmissions by amateur stations participating in government disaster
drills must comply with all applicable Amateur Service rules. It
agrees that the value of the amateur service to the public is that of a
voluntary noncommercial communications service, particularly with
respect to providing emergency communications is one of the underlying
principles of the amateur service. At the same time the agency is
adamant that the Amateur Service is not an emergency radio service unto
itself.

Rather, says the regulatory agency, ham radio is a voluntary,
non-commercial communication service. It is authorized for the purpose
of self-training, intercommunication and technical investigations.
This, as carried out by licensed persons interested in radio technique
solely with a personal aim and without pecuniary interest. In other
words, nobody involved in the use of ham radio on the air can directly
or indirectly profit from it.

The FCC then goes on to say that state and local government public safety agencies occasionally conduct emergency preparedness or disaster drills that include amateur operations. Some entities, such as hospitals, emergency operations centers, and police, fire, and emergency medical service stations, have expressed interest in having their employees who are amateur station operators participate in these drills by transmitting messages on the entity's behalf. The Commission's Rules, however, specifically prohibit amateur stations from transmitting communications in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer.

But here is where that olive branch of sorts comes in. The FCC release goes on to say that given the public interest in facilitating government-sponsored emergency preparedness and disaster drills, that the FCC will take this opportunity to provide a clear process for requesting a waiver, and provide the information that it required in order for it to consider granting such a request. And this is what the FCC says has to be done.

First, you the ham radio operator cannot request the waiver. Only the government agency or entity that you work for can do that. In other words, waiver requests should be submitted to the Wireless Telecommunications Bureau by the government entity conducting the drill, and must provide the following information:

First, when and where the drill will take place. Second, the identification of the amateur licensees expected to transmit amateur communications on behalf of their employers. Third is the identification of the employers on whose behalf the hams will be transmitting and lastly, a brief description of the drill.

The FCC emphasizes that the filing of a waiver request does not excuse compliance with the rules while that request is pending. Rather that the waiver must be requested prior to the drill, and employees may not transmit amateur communications on their employer's behalf unless the waiver request has been granted.

So what does this mean for Joe Ham whose employer wants him to take part in an emergency drill. If we interpret this correctly, it the employer is part of a city, state or federal agency and, if the FCC feels that the drill is important enough to issue a waiver, then those hams can take part. But only after the waiver has been issued and only during the time period that its grant is in force.

On the other hand, if Joe Ham works for some commercial organization that' s not eligible to obtain a waiver, then its best to say no, rather than to put his license on the line.

Lastly, the FCC notes that in an actual emergency, the Commission's Rules provide that an amateur station may use any means of radio-communication at its disposal to provide essential communication needs in connection with the immediate safety of human life and the

immediate protection of property when normal communication systems are not available. In those circumstances says the FCC, a rule waiver is not necessary.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

The FCC release says that for further information regarding matters discussed in this Public Notice, to please contact William T. Cross of the Wireless Telecommunications Bureau. The best way is by email to william dot cross at fcc dot gov. You can download and read the entire notice at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-2259A1.pdf (FCC)

RADIO LAW: ARRL TO HOLD WEB SEMINAR ON PECUNIARY INTEREST IN HAM RADIO

Meantime, ARRL General Counsel Christopher D. Imlay, W3KD, and ARRL Regulatory Information Manager Dan Henderson N1ND, will present a web-based conference. This, to discuss the issues behind, and the reasoning for the League's recent report titled The Commercialization of Amateur Radio: The Rules, The Risks. That's the ARRL's position paper on pecuniary interest as it relates to the United States Amateur Radio Service.

The session will take place on Wednesday, October 28th beginning at 9 PM Eastern Daylight Time. According to ARRL Atlantic Division Director Bill Edgar, N3LLR, who is the sessions sponsor, all amateurs need to be aware of these issues.

The on-line gathering is available at no cost and is open to all amateurs. To register for this interactive web based meeting, go to https://www1.gotomeeting.com/register/326759760 (ARRL)

HAM RADIO IN SPACE: SUMBANDILLSAT IS ON THE AIR

The first contacts have been made using the newly launched SumbandilaSat ham radio payloads and it sounded like this:

--

Satellite QSO audio. Hear it by downloading this weeks MP3 audio newscast at www.arnewsline.org

--

According to the official mission blog, at 07:48 UTC during the first morning pass of Sunday, October 18th, controllers activated the voice beacon on 435.350 MHz. They then switched on the transponder with is uplink is on 145.880 MHz with a downlink 435.350 MHz.

Later in the day, during the first evening pass at 19:13 UTC, several radio amateurs were heard operating through the satellite transponder. Thankfully, controllers had the foresight to preserve the moment for posterity:

--

Satellite QSO audio. Hear it by downloading this weeks MP3 audio newscast at www.arnewsline.org

--

It was a moment of triumph for everyone who worked for years to design, build and launch Sumbandillasat. You can hear more of these initial and QSO's through this new South African ham radio satellite at http://previews.matogen.com/sunspace/assets/galleries/sounds/Sumbandila-Firs tActivePass-Recording-2009-10-18.mp3 (SA-AMSAT)

**

RESCUE RADIO: SUMATRA BOUND HAM IS ON THE SATS

A ham involved in rescue radio is on his way to help earthquake ravaged Sumatra and is on the air via the ham radio satellites.

Jim Clary, ND9M, who also holds the call VQ9JC is presently deployed on a Navy ship heading for Sumatra on a humanitarian mission. This, to deliver fresh water for the victims of the recent earthquakes there.

While enroute he has been active on the ham radio satellites using a Yaesu FT897 as a transmitter and an FT817 for a receiver. The antenna is an using an Arrow and hes using a battery from an uninteruptabe power supply or U-P-S to power the station operating from the Helicopter Pad on the ship. Clary says there isn't much activity in the Indian Ocean but he is working VU's and E21's and handing out rare water grids as he whiles away the time until the ship reaches Sumatra. (ANS)

BREAKING NEWS: C6APR CONTEST TEAM KILLED IN PLANE CRASH

I'm Bill Pasternak, WA6ITF with sad news that the C6APR contest team has been killed in an aviation accident on their way to to the Bahamas to operate the CQ World Wide DX contest.

Peter Radding, W2GJ, Ed Steeble, K3IXD, Randy Hargenrader, K4QO and Dallas Carter, W3PP, lost their lives the morning of Wednesday, October 21st. This, when the twin engine Piper Aztec they were traveling on crashed shortly after takeoff from Summerville Airport in rural South Carolina. The operators were on their way to Crooked Island, Bahamas, for the annual operating event.

We will have more on this tragic story next week. (Various sources)

**

RADIO POLITICS: IARU AC MEETS DOWN-UNDER

The Administrative Council of the International Amateur Radio Union held its annual meeting in Christchurch, New Zealand on October 17th and 18th. Numerous points were agreed upon. Each will have a profound effect on the future of the world-wide amateur radio service. Amateur Radio Newsline's Jim Meachen, ZL2BHF, takes a look at a few of them;

--

We won't go into the minute details, but among the most important items was the review of a strategic plan for the development of support for amateur radio frequency allocations was reviewed for the period through 2012. The principal focus is on preparations for the 2012 World Radiocommunication Conference with an eye at getting a new amateur allocation in the vicinity of 500 kHz.

Another important point was adoption of a policy statement explaining the status of the Global Amateur Radio Emergency Communications Conference or GAREC. This, with respect to the International Amateur Radio Union. According to the meeting report, the Global Amateur Radio Emergency Communications Conference functions as an informal meeting of I-A-R-U member-societies and of amateur radio emergency groups within or outside of the respective national IARU member-society. The gathering serves as a forum for the exchange of experience and as an advisory body for the emergency communications work of the IARU.

And still in the area of emergency communications, the Administrative Council noted that the three I-A-R-U regions have reached consensus on three global Center of Activity frequencies for use in the event of emergencies. These frequencies are 14.300, 18.160 and 21.360 MHz.

As a result of failure to fulfill their obligations under the IARU Constitution, the rights of several I-A-R-U member-societies were placed temporarily in abeyance. These societies represent hams in Bolivia, Ecuador, Guyana, Nicaragua, Paraguay, and Suriname.

Last but by no means least, the theme of "Amateur Radio: Combining communication experience with modern digital techniques" has selected for the next World Amateur Radio Day. Tats slated for April 18, 2010.

For the Amateur Radio Newsline, I'm Jim Merachen, ZL2BHF, In Auckland, New Zealand, reporting for the Amateur radio Newsline.

--

The next scheduled in-person meeting of the International Amateur Radio Union Administrative Council will be held in El Salvador in conjunction with the I-A-R-U Region 2 Conference. That takes place in October 2010. (IARU)

**

INTRUDER WATCH: SSB INTRUDERS ON 14.002 MHZ

If something sounds strange on 20 meter SSB where there should only be Morse, then you have likely stumbled across what appears to be a African pirate radio net. According to Region One Inthruder Watch, this group of likely unlicensed operators can be found every morning from 6:00 to 09:00 U-T-C on 14.002.2 MHz using upper sideband. They converse in what's described as an unknown tribal language they operate like a phone line. Beam headings taken from Germany place the operation at about 180 degrees and possibly putting the operation in central Africa or Angola. No calls have been heard and only names are being used to identify. (NZART, WIA News)

**

ON THE AIR: CANADA'S HAM COMMUNITY TO COMMEMORATE THE 2010 WINTER OLYMPICS

Ham radio will be a part of the 2010 Olympics. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

The upcoming Olympic games in Canada will be celebrated on the ham bands. This with word that members of the Vancouver Olympics Amateur Radio Group will be activating three special event stations to promote and commemorate the Vancouver Winter Olympic and Paralympic Games to be held in February and March of 2010.

The special activity is already under way and will continue through March 2010. Operations will be on all bands and modes with the first station VG7V on the air from October 1st through November 30th. Then comes VG7W from December 1st of this year through January 31st of 2010. The final call will be VG7G taking to the airwaves on February 1st and continuing through March 31st 2010.

The Vancouver Olympics Amateur Radio Group says that it will be consolidating all contacts and intends to post them electronically to the ARRL's Logbook to the World. In addition, commemorative paper QSL cards for those who want them will be available at the conclusion of the events in April 2010. Cards received via the QSL Bureau will be returned the same way.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

In addition to the commemorative operation radio amateurs will also be handling many of the logistics for the games. Word is that most of this will be short range communications on the 1.3 meter or 220 MHz band using FM and numerous local repeaters. (OPDX)

**

RADIO LAW: SOME IRC'S ABOUT TO EXPIRE

Hams who use International Reply Coupons, or IRC's, in the QSL exchange process are advised to check the expiry dates of their current stock. This is because one batch is due to expire on December 31st. Those are the ones that you need to use up quickly before their value is gone. (GB2RS)

**

ENFORCEMENT: FCC CRITICIZED OVER KWVE FINE BY 50 STATE BROADCAST ASSN'S

Turning to enforcement news, word that fifty state broadcast associations have signed onto a letter of protest to the Federal Communications Commission about a proposed $5,000 fine against KWVE FM, of San Clemente, California. This, for an EAS mistake by a station staffer.

As reported here on Newsline a few weeks ago, the case goes back about a year. That's when Calvary Chapel station KWVE transmitted an unauthorized Required Monthly Test of the Emergency Alert System. The FCC received a complaint in October 2008 that the station transmitted commercial programming and an ad as part of the test message, which were then re-transmitted by other stations and cable systems in the daisy chain. In response to a letter of Inquiry, the station told the commission one of its employees had intended to run a scheduled weekly EAS test, but ran the unscheduled RMT instead. Also, that the employee failed to transmit the End of Message code.

But in its decision last month, the FCC said KWVE's actions affected other stations. Also, the transmission of EAS tones that are followed by a broadcast that is not part of an EAS test or actual emergency information, whether intentional or accidental, compromises the integrity of the EAS system. The FCC called KWVE's action was willful and that's why it proposed a $5,000 fine.

Now, in their letter protesting the FCC's action against KWVE, the broadcast associations reminded the commission that the station is a volunteer Local Primary One or LP-1. As such, they are concerned that if the commission imposes a substantial fine against an LP-1 for a mistake, it would deter current LP-1's as well as current Primary Entry Point stations from continuing to participate voluntarily in EAS. The broadcast associations also fear the fine would also have a chilling effect preventing new stations from serving as LP-1's or Primary Entry

Point stations.

The associations signing the letter represent radio and television stations in all 50 states as well as stations in the District of Columbia and Puerto Rico. In the letter they ask that the agency either set aside the fine or simply admonish the station. (CGC, RW, others)

**

ENFORCEMENT: CBS SAYS FCC VIOLATING ITS CIVIL RIGHTS IN SUPERBOWL CASE

And talk about a novel defense to an FCC accusation of a major broadcast violation. It looks as if CBS might just have come up with one as we hear from Newsline's Jim Davis, W2JKD:

--

CBS Incorporated says that the FCC is violating its constitutional rights in hounding the broadcaster in regard to what's become known as the Superbowl Janet Jackson wardrobe malfunction.. In a Friday filing, October 2nd before the U.S. Third Circuit Court of Appeals, CBS said the FCC has an Ahab-like obsession with the Super Bowl case, comparing the commission to the mad sea captain in Moby-Dick.

CBS lawyers say that this obsession poses an important question. They ask how many years can the FCC prolong a broadcast indecency probe of an un-scripted and unintended event that lasted nine-sixteenths of one second?

CBS says the FCC's obsessive zeal in pursuing the Super Bowl case and the attendant chill on broadcast speech show why First Amendment scrutiny by the court may not just be appropriate, but also necessary. The network also contends in the filing that the notorious wardrobe malfunction was orchestrated by Jackson and duet partner Justin Timberlake without the network's knowledge.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD

--

As previously reported, in September the FCC asked the court to look into whether CBS was reckless when it chose not to use video delay technology for the broadcast. The agency contends that even the fleeting exposure of an entertainers breast that was broadcast over the

airwaves breast violated FCC indecency regulations. (RW)

**

D-STAR NEWS: NEW 23 CM DIASCUSSON GROUP FORMED

A new Internet based reflector group has been created to discuss the use of D-STAR Digital Voice and High-Speed Data on the 1.2 GHz band . Called D-STAR_23cm, the group discussions center around the use of the Icom ID-1 mobile, IC-9100 transceiver, RP-1V and RP-2V digital voice repeaters and all aspects of 23 centimeter data and voice communications using D-Star technology. The group can be joined groups dot yahoo dot com slash D-Star_23 cm (WB9QZB)

**

EMERGING TECHNOLOGY: FLEXABLE SATELLITE ANTENNAS

Flexible antennas attached to your clothing may work better for GPS or other personal satellite communication reception. That's according to the European Space Agency, as reported by TV Technology's Doug Lung. Firefighters or other emergency personnel may benefit from this technology, according to officials involved in this testing. (Todays Technology)

**

HAM RADIO IN SPACE: IRAN MAY PUT SATELLITE IN THE HAM SATELLITE BANDS

Turning to ham radio space relayed news, there is a possibility that Iran's Mesbah-2 satellite, slated for launch early 2010, could operate on frequencies allocated to the Amateur Satellite Service.

An on-line report at astronautix.com says that the original Mesbah satellite, lost in a 2005 launch failure, was to have operated on Amateur Satellite Service frequencies. Now its being reported that Iran's Minister of Communications and Information Technology, Reza Taqipour, has said that the replacement Mesbah satellite has successfully completed pre-launch tests and is now ready for liftoff early next year.

Most observers think that there will be little difference between the transponder set-up between the lost Mesbah satellite on the new replacement bird. More is at www.astronautix.com/craft/mesbah2.htm (Southgate)

**

WORLDBEAT: AUSTRALIA'S WIA NEWS NOW ON TWITTER The Wireless Institute of Australia national news service is now on Twitter. As many of you know, the WIA is the national society for Radio Amateurs in Australia. It joins the growing number of ham radio organizations making use of this service. You can find WIA National News on Twitter at twitter dot com slash VK1WIA. (WIA) ** WORLDBEAT: ARNEWSLINE ON FACEBOOK Also,

remember that Amateur Radio Newsline has created a news discussion page on the Facebook social networking service. You must be a Facebook member to access it. Just go to www dot facebook dot com, join the service, use the search feature to find the Amateur Radio Newsline page and then become a friend of it. We hope to see you there. (ARNewsline(tm))

**

WORLDBEAT: SWEDNS SAQ ON THE AR OCTOBER AND DECEMBER

The historic Alexanderson alternator transmitter located at Grimton, Sweden, will next take to the airwaves on October 24th at 09:00 UTC and again on December 24th at 08:00 UTC.

This museum station is operated by volunteers on special days throughout the year. It transmits CW on the frequency of 17.2kHz signing the call SAQ. If nothing else, the station is well worth listening out for because its C-W is a musical sound and is very unique.

No reports required and no QSL cards are given for the October transmission but QSLs are available for the Christmas Eve transmission. For more information check out www.alexander.n.se. (press release)

**

DX

In DX, word that the ARRL's DXCC desk has approved the recent FT5GA operation from Glorioso Island has been approved for DXCC credit. Ther operation that began on September 14th and ran through October 8th netted more than 50,000 QSO's. Until this operation, Glorioso was number 4 on DX Magazine's Most Wanted list. DL2FAG will be active from Niue and Samoa from October 19th to November 7th. He will operate as ZK2DL from Niue and from 17th to 30th November from Samoa. He plans to operate mainly RTTY, PSK and SSB on 10-80. QSL via his home call.

A German team is on the air on their 26th DXpedition to Lichtenstein where they are operating as HB0 slash HB9AON from Triesenberg. They will be there through October 30th and are active on the. The QSL manager is DJ2YE.

KL7JR reports that plans are underway for the activation of Jacquot Island before and during ARRL's December 11th to the 13th Ten Meter Contest. Listen out for VY1RST to concentrate on 10 meters for the contest and 14.260 for non-contest activities. QSL via KL7JR at his callbook address.

G4OHX, will be active as 5R8HX from Madagascar between this December 28th and January 3rd of 2010. Activity will be mainly CW. QSL via his home callsign, direct only.

Lastly, G7COD will be operational from Embudu Island in Kaafu Atoll the Maldives, until October 25th. He's using the call 8Q7AK on SSB and CW on the 80 through 10 meter bands including WARC frequencies. QSL as directed on the air.

Above from various DX news sources.

**

THAT FINAL ITEM: RADIO ST HELENA DAY - NOVEMBER 14th

And finally this week, if you like to listen out for rare shortwave stations then this is for you. Once again, Amateur Radio Newsline's Jim Davis, W2JKD:

--

Radio St. Helena Day will be on Saturday 14th of November 2009. This rare station is located on the Island of St Helena which lies in the South Atlantic off the coast of Angola.

The station normally provides a local radio service to the island and has a range of about 100 km. But once a year it broadcasts internationally on Shortwave at 11.092.5 MHz on upper sideband with its famed Party On-The-Air program.

This years operation will begin at 20:00 UTC and conclude at 01:00 UTC with the last 90 minutes beaming toward North America, Central America and the Caribbean. A special QSL card will be available to confirm reception reports.

To get a QSL from Radio St. Helena, you must send a written and verifiable reception report by Air Mail and include sufficient return postage to Radio St. Helena, P.O. Box 93, Jamestown, St. Helena, STHL 1ZZ, South Atlantic Ocean. Mark your envelope via Air Mail via United Kingdom & Ascension For those not aware, Saint Helena was named after St Helena of Constantinople.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD.

--

And less we forget, E mail reports will be not be verified and off air recordings cannot not be returned. At least that's what the press release says. (Press release)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at

www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Fred Vobbe, W8HDU, saying 73 and we thank you for listening.

==> + REGULATORY: FCC ISSUES PUBLIC NOTICE ON AMATEUR SERVICE
COMMUNICATION DURING GOVERNMENT DISASTER DRILLS

On October 20, 2009, the FCC released a Public Notice clarifying the
Commission's rules relating to the use of Amateur Radio by licensed
amateurs participating in drills and exercises on behalf of their
employers. Entitled Amateur Service Communications During Government
Disaster Drills, the Public Notice addresses participation by paid
employees of organizations taking part in drills.

The Public Notice -- DA 09-2259
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-2259A1.pdf> --
affirms that the Commission's rules "specifically prohibit amateur
stations from transmitting communications 'in which the station
licensee or control operator has a pecuniary interest, including
```

communications on behalf of an employer.'" ARRL Regulatory Information Manager Dan Henderson, N1ND, said that "This Public Notice is intended to clarify a difficult issue. A wide range of unofficial -- and frankly some incorrect -- interpretations have been offered on this topic in various public forums recently. DA 09-2259 is the official FCC notice on this issue. Though issued jointly by the Wireless Telecommunications Bureau (WTB <http://wireless.fcc.gov/>), the Enforcement Bureau (EB <http://www.fcc.gov/eb/>) and the Public Safety and Homeland Security Bureau (PSHSB <http://www.fcc.gov/pshs/>) under delegated authority from the Commission, the Notice makes it clear that WTB is the Bureau at the FCC with jurisdiction over the Amateur Radio Service rules and their interpretation."

The Public Notice states that, in order to facilitate participation by employees who wish to engage in government-sponsored drills and emergency exercises on behalf of their employers, a waiver can be requested from the WTB by the government agency sponsoring the drill or exercise (and not by the individual who wishes to participate in the drill or exercise). The government entity conducting the drill must include in its waiver application the following information:

- When and where the drill will take place,
- Identification of the amateur licensees expected to transmit amateur communications on behalf of their employer,
- Identification of the employer(s) on whose behalf the amateur(s) will be transmitting, and
- A brief description of the drill.

"It should be noted," Henderson said, "that the waiver request must be filed and acted upon in advance of the drill. The waiver must be actually granted by the Commission before the amateurs participate in the drill. It is not enough to apply -- the waiver must be granted first."

Henderson added that the Public Notice also emphasizes that in an actual emergency, the Part 97 rules "provide that an amateur station may use any means of radiocommunication at its disposal to provide essential communication needs in connection with the immediate safety of human life and the immediate protection of property when normal communications systems are not available." In those specific circumstances, the rule waiver is not necessary.

Government entities requesting a waiver for their emergency/disaster drill should submit a written request addressing the factors listed above to Wireless Telecommunications Bureau, 445 12th St SW, Washington, DC 20554, Attn: Scot Stone.

A waiver is needed only for those licensees transmitting messages on behalf of their employer during the State and local government public safety agency's "occasionally conducted emergency preparedness or disaster drills test or drill." This may, after analysis, turn out to be very few licenses or, by rearranging functions of participants, a

waiver may not be needed. The Commission has also emphasized that only governmental agencies may apply for a waiver.

In September, the ARRL released guidelines <http://www.arrl.org/news/stories/2009/09/25/11094/?nc=1> that address numerous aspects of the issue of business communications in the Amateur Service.

==> + REGULATORY : ARRL GENERAL COUNSEL, REGULATORY INFORMATION MANAGER TO PRESENT WEBINAR

<https://www1.gotomeeting.com/register/326759760> ARRL General Counsel Chris Imlay, W3KD, and ARRL Regulatory Information Manager Dan Henderson N1ND, will present a webinar beginning at 9 PM EDT on Wednesday, October 28. This session will discuss the issues behind, and the reasoning for, the ARRL's recent report, The Commercialization of Amateur Radio: The Rules, The Risks, The Issues <http://www.arrl.org/news/files/ARRL_AppropriateUseGuidelines.pdf>. <http://www.arrl.org/news/files/ARRL_AppropriateUseGuidelines.pdf>According to webinar sponsor and host ARRL Atlantic Division Director Bill Edgar, N3LLR, all amateurs need to be aware of these issues. The webinar, available at no cost, is open to all amateurs. Please click here <https://www1.gotomeeting.com/register/326759760> to register for this informative interactive Internet meeting.

==> + FOUR RADIO AMATEURS KILLED IN PLANE CRASH EN ROUTE TO CQWW PHONE CONTEST

Just after take-off -- around 6:30 AM on Wednesday, October 21 -- a twin-engine plane carrying four Amateur Radio operators crashed into the woods, only 250 yards off the end of the runway in Jedburg, South Carolina, about 20 miles northwest of Charleston. The plane -- piloted and owned by Peter Radding, W2GJ -- carried Ed Steeble, K3IXD, Dallas Carter, W3PP, and Randy Hargenrader, K4QO. The four men were on their way to the Bahamas to operate in this weekend's CQ World Wide Phone Contest as C6APR, competing in the Multi/2 category. Radding, of North Charleston, South Carolina, was 69; Steeble, of Summerville, South Carolina was 68; Carter, of Laurel, Delaware, was 67 and Hargenrader, also of Summerville, was 55. All were ARRL members; Radding and Steeble were Life Members. Click here <http://www.arrl.org/news/stories/2009/10/21/11157/?nc=1> for more information.

Robert Biss, W8ZA, of Harpers Ferry, West Virginia, accompanied Steeble, Carter, Radding and Hargenrader to the Bahamas for the 2008 running of the CQWW SSB Contest. Click here <http://www.arrl.org/news/features/2009/10/22/11158/?nc=1> for Biss' remembrances of his four friends.

==> + ADVOCACY: HR 2160 GAINS MORE COSPONSORS

As of October 14, five more Congressional Representatives -- Tom Latham (R-IA-4), Dana Rohrabacher (R-CA-46), Scott Garrett (R-NJ-5), Candice

Miller (R-MI-10) and John Olver (D-MA-1) -- pledged their support for
HR 2160
<http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&doc
id=f:h2160ih.txt.pdf>,
The Amateur Radio Emergency Communications Enhancement Act of 2009,
bringing the total number of cosponsors to 30, including original
sponsor Sheila Jackson-Lee
<http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1> (D-TX-18). HR
2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri
(D-NY-24), Roscoe Bartlett (R-MD-6), John Boozman (R-AR-3), Madeleine
Bordallo (D-Guam), Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Bart
Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey (D-NY-22),
Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Zoe Lofgren
(D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11),
Charlie Melancon (D-LA-3), Dennis Moore (D-KS-3), Bill Posey (R-FL-15),
Bennie Thompson (D-MS-2), Michael Turner (R-OH-3), Peter Welch (D-VT),
David Wu (D-OR-1) and Don Young (R-AK). Click here
<http://www.arrl.org/news/stories/2009/05/12/10818> for information on
how to encourage your Congressional representative to sponsor HR 2160.

==> + INTERNATIONAL: IARU ADMINISTRATIVE COUNCIL ADOPTS PRELIMINARY
WRC-12 POSITIONS

The Administrative Council (AC) of the International Amateur Radio
Union (IARU <http://www.iaru.org/>) held its annual meeting on October
17-18, 2009 in Christchurch, New Zealand and took 16 actions. Attending
the Christchurch meeting were IARU President Tim Ellam, VE6SH/G4HUA;
Vice President Ole Garpestad, LA2RR; Secretary Rod Stafford, W6ROD;
regional representatives Hans Blondeel Timmerman, PB2T; Dennis Green,
ZS4BS; Ramon Santoyo, XE1KK; Daniel Lamoureux, VE2KA; Michael Owen,
VK3KI; Shizuo Endo, JE1MUI; Peter Lake, ZL2AZ, and recording secretary
David Sumner, K1ZZ. The next scheduled in-person meeting of the AC will
be held in the vicinity of San Salvador, El Salvador in conjunction
with the Region 2 Conference in October 2010. The officers will
investigate holding a Web-based "virtual meeting" early in 2010. Click
here <http://www.arrl.org/news/stories/2009/10/20/11149/?nc=1> for more
information.

==> DID YOU KNOW? WWV AND WWVH

Today, most amateurs know that radio stations WWV and WWVH broadcast
time and frequency information 24 hours a day, seven days a week to
millions of listeners worldwide. Administered by the National Institute
of Standards and Technology (NIST), WWV is located in Fort Collins,
Colorado, about 60 miles north of Denver; WWVH is located on the Island
of Kauai, Hawaii on a 30 acre site near Kekaha at Kokole Point. Both
stations broadcast information that includes time announcements,
standard time intervals, standard frequencies, UT1 time corrections, a
BCD time code, geophysical alerts, marine storm warnings and Global
Positioning System (GPS) status reports. Most hams today think of WWV
and WWVH as "time stations." According to QST Editor Steve Ford,

WB8IMY, that's only half-true: they are really time and frequency stations. "The time signals that you hear are regulated by an atomic clock that uses the oscillations of Cesium atoms as its standard -- 9,162,361,770 oscillations equal 1 second," wrote Ford in the June 1994 issue of QST. Click here <http://www.arrl.org/news/stories/2009/10/21/11155/?nc=1> to discover this part of Amateur Radio history.

==> INTERNATIONAL : IARU OFFICIALS ATTEND REGION 3 CONFERENCE IN NEW ZEALAND

Hosted by the New Zealand Association of Radio Transmitters (NZART), officials from the International Amateur Radio Union (IARU) attended the IARU Region 3 14th Triennial Conference on October12-16, in Christchurch, New Zealand. Joel Harrison, W5ZN, ARRL President, represented the ARRL and ARRL Chief Executive Officer and former IARU Secretary David Sumner, K1ZZ, was also in attendance. Click here <http://www.arrl.org/news/stories/2009/10/18/11147/?nc=1> for more information

==> + INTERNATIONAL: ARRL HQ HOSTS AMATEUR RADIO COURSE FOR USTTI PARTICIPANTS

<http://www.youtube.com/watch?v=6ImJ7LTUeg0> Students from Ghana, Mauritius, the Philippines, Sri Lanka and Zambia attended the United States Telecommunications Training Institute (USTTI) Amateur Radio Administration Course (ARAC) at ARRL Headquarters October 12-16. ARRL Technical Relations Manager Brennan Price, N4QX, coordinated the session and led the course. "The curriculum covered a wide variety of Amateur Radio topics and concerns, including licensing, spectrum requirements, disaster communications and antenna requirements," Price said. The curriculum also covered the ITU and its regulations, as well as the process leading to the next World Radiocommunication Conference 2012 (WRC-12). Click here <http://www.arrl.org/news/stories/2009/10/22/11154/?nc=1> for more information.

==> + HISTORICAL: UNIVERSITY RESEARCHERS NEED YOUR HELP AS THEY STUDY EARLY AMATEUR STATION LOGS

Researchers at the University of Wisconsin and Miami University of Ohio are seeking copies of amateur station logs from 1913-1927 in hopes they may offer insights into the relationship between individuals' work and leisure activities, technology, and their social networks. "Early hams laid the foundation for today's use of technology for communications and entertainment," said Director of Engineering and Operations for Wisconsin Public Radio Steve Johnston, WD8DAS. "Many operators did not work in a technical field, but pursued Amateur Radio as a hobby for its own sake. This is a true success story about how a pastime can develop into an entirely new commercial and social phenomenon." Click here <http://www.arrl.org/news/stories/2009/10/21/11153/?nc=1> for more

information on how you can help out with this study.

==> SOLAR UPDATE

Tad "Dance, and Provencal song, and sunburnt mirth <http://englishhistory.net/keats/poetry/odetoanightingale.html>" Cook, K7RA, this week reports: Sunspot group 1028 emerged for only a few hours on Tuesday. This is another one of those phantom spots that briefly appears, only to vanish, teasing us with hints of an increase in activity that never seems to come. Along with the quiet Sun, we are still seeing extremely quiet geomagnetic indices, a nice upside to the lack of solar activity. Solar flux until the end of this month is expected to be around 72. The average solar flux for this week was 70.6, up 0.7 points from 69.9 the week before. Look for more information in the Solar Update, available on the ARRL Web site on Friday, October 23. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' Ode to a Nightingale <http://englishhistory.net/keats/poetry/odetoanightingale.html>.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/contests/> This week, look for an NCCC Sprint on October 23. The CQ Worldwide DX Contest (SSB), the CW and Digital runnings of the 10-10 International Fall Contest and the 50 MHz Fall Sprint are October 24-25. The SKCC Sprint is October 28. Next week, look for more runnings of the NCCC Sprint on October 30 and November 5. The High Speed Club CW Contest is November 1 and the ARS Spartan Sprint is November 3. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> + AMATEUR RADIO IN SPACE: SUMBANDILASAT NOW OSCAR 67

The South African Amateur Radio satellite SumbandilaSat <http://www.arrl.org/?artid=9183> has been officially designated SumbandilaSat-OSCAR 67, or simply OSCAR 67. Last weekend, the satellite was successfully activated and tested with a number of contacts made through its transponder, but it is not yet open for routine use. The satellite was launched from the Baikonur Cosmodrome <http://www.russianspaceweb.com/baikonur.html> in Kazakhstan on September 17. The main payload is a multi-spectral imager, but the satellite also carries an Amateur Radio component consisting of a 2 meter/70 cm FM repeater. After SumbandilaSat is fully commissioned, the repeater will be activated with an uplink at 145.880 MHz and a downlink at 435.350 MHz; there will also be a voice beacon at 435.300 MHz. The transponder mode will be controlled by a CTCSS tone on the uplink

frequency. SumbandilaSat was sponsored by the Department of Science and Technology and was built at SunSpace <http://www.sunspace.co.za/> in cooperation with the Stellenbosch University <http://www.sun.ac.za/>. In addition to the SA-AMSAT amateur module, the satellite carries Stellenbosch University' s radiation experiment and software defined radio (SDR) project, an experiment from Nelson Mandela Metropolitan University and a VLF radio module from the University of KwaZulu-Natal.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, October 25, 2009, for these online course sessions beginning on Friday, November 6, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

2337. Tower part looking??!!

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-22 23:44:06 UTC
From: Ron <ronnclair@yahoo.com>
Message-ID: <b76Em.75832$IR3.65187@newsfe25.iad>
Source record: 6301

Hi
I have the Delhi selfsupporting tower, it is 48ft tall I believe, an old ham tower. It has the top piece plate but I need the plate that is about 5 ft down. The previous owner of the tower made some home made ones for each 1/3 length of the tower but now I need the replacement for the one plate that I can connect the angle brackets that hold the u bolts that hold the masting. I went to to a local tv distributor now who sells the tower but not the replacement parts. I also need those angle brackets. I am in Southern Ontario. Any ideas where there are shops or ham fests in this area soon?

Thanks

2338. Re: Open Letter to K1MAN

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-23 16:28:39 UTC
From: The Collector <newsgroup@newsgroup.com>
Message-ID: <tICdnV5Ix6JRRHzXnZ2dnUVZ_gmdnZ2d@earthlink.com>
Source record: 6302

Well hello Bob. It's been years. It's "Doc" AF2Y. On a search engine I typed in, "the anatomical configuration of prolapsed hemorrhoids" and up came a reference to rec.radio.amateur.misc. So I sat here for a while trying to figure out how that search led me to this newsgroup and the only reason I could figure out was that the search engine thought "rec" was short for "rectum."

At any rate, as I peeked at what's going on in our hobby, I saw the subject "Open Letter to K1MAN" penned by W4ASX, Bob Sherin; I became curious as to the meaning of the whole thing and decided to delve a bit. So I typed in the Search Engine, K1MAN, came up with a gent named Glenn Baxter, began reading the various references and was astounded by all the material. In 2000, after moving to this condo and encountering all the caveats and caviars and meat loaves, I decided to wait a bit for hamming until I move again, preferably to either Las Vegas or Las Vegas (my favorite city in this country) but that's still in the offing.

If I remember corrrectly, when I shut down in Sept.2000, there was no real war between K1MAN and the FCC. It all had something to do with his operating a competitve organization to the ARRL's and that some hams were complaining about his program interfering with ongoing QSOs and stuff like that. Who would ever believe that everything would coalesce into an atomic bomb? Now it seems Hiroshima is being relived thru a $21,000 fine levied, Rich Whiten becoming involved, the late Walter Cronkite being involved; your involvement; threatened law suits, actual litigation and all that jazz. I swear,all the events that unfolded and are in the process of unfolding read like the Dan Brown novel "Angels and Demons."

By the way, in my storage room I came across a boatlaod of tapes from the BARF days. I must say that a lot of stuff said was tragic but when I heard "The Mike and Judy Shows" featuring "Raincoat Charlie" as guest, although "Mooj" took his
hatred seriously, it's still the funniest stuff ever heard on ham radio.

Hope all's well with you and yours,
"Doc"

"Bob Sherin, W4ASX" <Sherins@bellsouth.net> wrote in message

GB2RS NEWS

Sunday 25th October 2009

The news headlines

* Ofcom apprehends individual and seizes equipment

* Contest team perishes in air disaster

* Ofcom publishes its plans for the London 2012 Olympic Games

Late in the evening on 15 October, a team of enforcement officers from Ofcom, assisted by Humberside Police, apprehended an individual in the Hull region on suspicion of illegally transmitting on the region's amateur radio bands. Equipment was seized during the operation and Ofcom is continuing its investigations.

With great sadness we report the deaths of the C6APR team consisting of Pete, W2GJ, Ed, K3IXD, Randy, K4QO and Dallas, W3PP. The team were on their way to Crooked Island in the Bahamas to take part in the CQWW contest this weekend. They were killed when their light aircraft crashed on takeoff on the morning of 21 October. Our deepest sympathies go out to their families and friends.

On Monday 19 October, the UK regulator Ofcom published its Spectrum Plan for the London 2012 Olympic Games, outlining how the airwaves will be managed during the seven week event. The Plan contained input from both the RSGB and RAYNET. You can read the full transcript at www.ofcom.org.uk/consult/condocs/london2012/statement.

On Friday 16 October, the WSPR beacon V53ARC went online. The beacon is working well and transmitting on the 80, 40, 30, 20, 17, 15 and 10m bands with 5W and on 6m with 2W. It has been spotted already around the globe including VK, KH8, J, S and many other countries. It can be heard on each band every 16 minutes on the WSPR frequencies. More information can be found at www.oe1ifm.at.

Icom UK is on the move to new premises. After 24 happy years at their current location in Sea Street in Herne Bay, they are due to be fully in place at the new home by 9 November. The new address will be Blacksole House, The Boulevard, Altira Park, Herne Bay, Kent CT6 6GZ. All phone numbers and e-mail addresses remain the same. The move will be in two phases. The sales, marketing, IT and accounts team along with the warehouse will move between 30 October and 1 November, opening on 2

November for business as usual. The workshop will move the following weekend, 5 to 7 November.

After an off-air period of almost two years, the Black Isle VHF Repeater, GB3BI, was returned to service on Sunday 18 October. The repeater is now located on a private site at 417m asl, approximately ten miles South of Nairn on the Moray Coast. The Chairman and Committee of the Black Isle Repeater Group wish to convey their sincere thanks to Cawdor Estate and, in particular, to both Lord Cawdor and Angus McNicol, the Estate Factor, for all their help and accommodation towards the relocation of this repeater. All enquiries and or signal reports should be directed to Steve Scanlain, GM1VAD via email to raynet.control<at>btinternet.com or by phone or text message to 07900 960478.

2

The Mid Ulster Amateur Radio Club will be running a Foundation course in November. Registration will take place on 2 November at 7pm in the Place Initiative, Portadown. For more information e-mail cqmuarc<at>googlemail.com, or ring 0283 834 8451. All abilities and ages are welcome.

The GB7HMI Bulletin Board System is up and running in Northern Ireland. The new sysop is MI0RSN. GB7HMI now has telenet connection and an RF connection on 144.9375MHz. For the telenet connection you need to e-mail the sysops at mi0rsn<at>hotmail.com with your password. For any more information please contact the same e-mail address.

The FT5GA Glorioso Island operation is now over and the operators are happy that the goal of 50,000 QSOs was reached. The operation was forced to end operations on 7 October. This was a day earlier than expected due to the military flight schedule. The QSL Manager for this operation is Didier Senmartin, F5OGL.

The theme of the 2010 Dayton Hamvention on 14 to 16 May will be Amateur Radio Clubs Worldwide: The Lifeline. In order to help celebrate the world of radio clubs, Hamvention planners are asking for pictures from radio clubs around the world that it can use on the front and back cover of the Hamvention 2010 program magazine. It is also looking for stories of interest from interesting radio clubs as well. More information at www.hamvention.org.

The Great Lumley Amateur Radio and Electronics Society is moving to the Finchale Training College at Durham on 31 October. It is near to the Arnison Shopping Centre, Pity Me, and the postcode is DH1 5RX. More details can be obtained from David, M0BPM, on 0191 3888113, or by e-mail to m0bpm<at>btinternet.com.

The date of the 3rd Bath Buildathon has been confirmed as Saturday 5 December. Following the success of the first two events the cost will remain at £60 to include a Brendon DSB transceiver kit, room hire, tea and coffee etc. The Bath Buildathon Crew will be providing all tools

and test equipment required and no previous experience is required, just a bucket load of enthusiasm! The famous Christmas Market will be happening in the City centre at the same time and the prestigious new Southgate shopping centre will also be open, just in case non-radio members of the family would like to make a weekend of it. Booking forms for the Buildathon are available on request by e-mail from g0fuw<at>tiscali.co.uk or by post. Steve is QTHR in the Yearbook and on QRZ.com.

And now for the details of rallies and events for the coming week

Sadly, the organisers of the Northern Radio Rally, due to be held in Richmond School on 25 October, have been obliged to cancel the rally. Despite their efforts to promote the rally, bookings haven't been high enough to make the rally viable. Please pass this message onto anyone you know who was thinking about travelling to this rally.

On Sunday 1 November, the Great Northern Hamfest will take place at the Metrodome Leisure Centre, Queens Road, Barnsley S71 1AN. Opening time is 11am. There will be trade stands an RSGB bookstall, Foundation, Intermediate and Advanced licence information, Special interest groups and Local radio clubs. There are a limited number of tables available at a reduced price for amateurs, but not trade, wishing to sell their surplus equipment. To book a table and for any other enquiries, contact the Hamfest Manager, Ernie, G4LUE on 01226 716339 or 07984 191873.

3

The North Wales Radio Rally is to be held on Saturday 31 October and Sunday 1 November in Llandudno at John Bright School, which is postcode LL30 1LF. Doors are open from 10am to 5pm both days. Talk in will be on S22. The rally is all on one level and there is disabled access. Entry is £3 and you'll find many large traders attending and there will be an RSGB bookstall as well as a Bring and Buy. For more information please contact Liz Cabban, GW0ETU on 01690 710257 or by e-mail to lizcabban<at>vodafoneemail.co.uk

The Holsworthy ARC Rally will take place on 1 November at the Holsworthy Community College, Holsworthy, Devon EX22 6JD. Doors open at 10am and the entry fee is £2. There will be trade stands and a Bring & Buy. More details from Don, G0RQL on 01409 261223.

Also on 1 November the Foyle & District ARC Rally will be held in the Best Western White Horse Hotel, Derry BT47 3PA. Doors open at 12 noon and there will be trade stands, special interest groups and Bring & Buy.

Now for the news of special events

Listen for W1ACB/US on 14.045MHz and 7.045MHz operating CW. It is a permanent station for the US Army Signal Corps and the British Royal Naval Signals of WWII. Go to QRZ.com to view their WWII tower. They also operate on other bands from Top Band to 10m and can usually be

heard on frequencies ending in 45.

On 31 October, GB0BME will be on the air for Bancroft Mill Engine from Barnoldswick.

1 November sees two stations going on the air. GB4RN is the Royal Naval Amateur Radio Society station in Waterlooville and GB0AD is for Armistice Day and is stationed in Aberdare.

And now the HF DX news compiled from 425 DX News and other sources.

A team headed by G3KHZ will be in Papua New Guinea until 9 November. Activity will be on 160 to 15 meters using CW, SSB and RTTY. Full details and QSL routing is on the web at www.425dxn.org.

JE2EHP, will be active as 4X/K1HP from Tel Aviv and Jerusalem between 29 October and 5 November. His operation will be on all the HF bands plus 6m, using CW, SSB and RTTY. QSL is via the bureau to JE2EHP.

Until 11 November, FK/F5NHJ will be on the air from Grande Terre, which is IOTA reference OC 0032, and also from Lifou or Mar&#65533;, which is IOTA reference OC 033.

ZZ0Z will be active from Archipelago Abrolhos, which is IOTA reference SA-109 from 29 October to 2 November.

DL4IAS will be active from Bantayan Island, which is IOTA reference OC-129, until 5 November as DV7/DL4IAS.

The XR0YA DXpedition to Easter Island will take a place between 31 October and 15 November. It will be a lightweight, small expedition led by 6 operators. Thanks to the support of the Radio Club of Chile they will have the opportunity to activate Rapa Nui on 30 meters. Since the island is still most wanted on this band in Europe, 30m will be their priority. Details at .http://rapanui2009.org/

4

EI6DX, will be active as portable 6W between 7 and 16 November from Somone in Senegal, which is located about 70km southeast of the city of Dakar. He will concentrate on the lower bands and CW. QSL to RX3RC, direct or via the bureau.

8R1PY will be active from Lethem, Guyana from 31 October to 4 November. They plan to operate SSB, CW, RTTY and BPSK on 160 to 6 metres. QSL via PY2WAS either direct or via the bureau.

Now the contest news

The annual contest of the International Police Association Radio Club is taking place over the weekend of 7 and 8 November. CW is on 7 November from 0600 to 1000UTC and 1400 to 1800UTC. SSB is on 8 November also from 0600 to 1000 and 1400 to 1800UTC. More details from www.iparc.de.

The 48-hour CQ Worldwide DX SSB contest on 24–25 October is probably the biggest event of the month. Expect the phone portions of the HF bands, except the WARC bands, to be busy all weekend. The contest takes place between 0000 and 2350 on 24 and 25 October and the exchange is signal report and CQ Zone, which is 14 for the UK.

On 27 October the 50MHz UK Activity Contest takes place between 1900 and 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 12th to the 18th of October, compiled on 19th of October by Neil Clarke, G0CAS.

Information that I have just received from the `Solar Terrestrial Dispatch' goes on to say. "There is sufficient data to be virtually certain that December 2008 was the month of the solar minimum. Officially, there is still insufficient post-minimum data to be completely confident. However, confidence is now quite high that December 2008 was the month of the solar minimum." The `Solar Terrestrial Dispatch' can be found at www.spacew.com

The solar disc was spotless everyday and with it solar activity was very low. However, on the 17th, around 1900 hours a very small `two ribbon' solar flare took place from a spotless region on the Sun, which is known as a `plage' region. What is more unusual from a flare this small is that it produced a slow, faint, Earth- directed coronal mass ejection. The CME had not arrived by the end of the reporting period, maybe, more on this next week. Solar flux levels remained at 70 everyday except for the 17th which increased to 71 units. The average was 70 units. The 90 day solar flux average on the 18th was 69 units, that's the same level as last week. X-ray flux levels remained below the minimum reporting level throughout. Geomagnetic activity was very quiet everyday. The most disturbed days were the 15th and the 16th with an Ap index of only four units. The average was Ap 2 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 440 kilometres per second. Particle densities were low except for a brief increase to 16 particles per cubic centimetre during the morning of the 15th. Bz varied between minus and plus 4 nanoTeslas for the period.

And finally the solar forecast. This week solar activity is expected to be at very low levels. However, the solar disc could exhibit some sun spots. Solar flux levels should be around the 70 mark with a spotless Sun and slightly higher if any spots do appear. Geomagnetic activity is expected to be mostly quiet, saying that, today, could be slightly unsettled. MUFs during daylight hours at equal latitudes should be around 21MHz for

5

the south and 18MHz for the north. The darkness hour lows should be around 9MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The

optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 0900 and 1500 hours UTC.

And that's all for this week from the propagation team.

6

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Monday 26 October Felixstowe and District Amateur Radio Society is having a talk on D-Star. Contact Paul, G4YQC, by email to pjw<at>btinternet.com. On Tuesday 27 October Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 27 October Dorking and District Radio Society is having a talk on assessing receiving system performance by Ranulph Poole and John Salter of BBC Research. Contact Garth, G3NPC, on 01737 359472. On Tuesday 27 October Horndean and District Amateur Radio Club is holding its AGM. Contact Stuart, G0FYX, on 023 9247 2846. On Wednesday 28 October Chesham and District Amateur Radio Society is having a construction evening. Contact Terry, G0VFW, on 01442 831 491. On Wednesday 28 October Dover Radio Club is having a school holiday net on GB3KS from 7.30pm. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Wednesday 28 October Fareham and District Amateur Radio Club is having a talk by Richard, M1CFW on the move to electronic ciphers. Contact Derek Clarkson, G4JLP, on 01329 823405. On Wednesday 28 October Havering and District Amateur Radio Club is having an informal evening. Contact John, M0UKD, 07817365354. On Wednesday 28 October Newbury and District Amateur Radio Society is having a talk on contests by Don Field, G3XTT. Contact Richard, G3ZGC, on 01635 46241. On Wednesday 28 October Norfolk Amateur Radio Club is having an informal, construction, workshop and Bright Sparks evening. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 28 October Verulam Amateur Radio Club starts its Foundation course. Contact Ralph, on 01923 265572. On Wednesday 28 October Worthing and District Amateur Radio Club is on the air and having a discussion evening. Contact Roy, G4GPX, on 01903 753 893. On Thursday 29 October Bittern DX Group is having a debrief on October events and planning future endeavours. Contact Linda, G0AJJ, on 01692 404154. On Thursday 29 October King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact

Ray, G3RSV, by email to ral-g3rsv<at>supanet.com. On Thursday 29 October Shefford and District Amateur Radio Society is having a mystery talk by Paul, G1GSN. Contact David, G8UOD, on 01234 742 757.

7

On Friday 30 October Wimbledon and District Amateur Radio Society is holding its AGM. Contact Jim, M0CON, on 020 8874 7456. On Friday 30 October Mid-Sussex ARS is having a radio night. Contact Sue, G6YPY, on 01273 845 103. On Saturday 31 October Gorleston Amateur Radio Society is having its regular lunch time meeting at the Short Blue Hotel in Gorleston. Contact David, G3OEP, on 01493 662 323.

NEWS FOR THE SOUTH-WEST On Monday 26 October Bristol RSGB Group is having a talk by Phil Whitchurch, G3SWH and Mayotte, FH/G3SWH. Contact Robin, G3TKF, on 01225 420442. On Tuesday 27 October West Devon Radio Club is having an HF operating night for first timers. Contact Jules Cuddy, M1AGY, on 01752291588. ** TAKE A MINUTE TO REMEMBER THEM THIS WEEKEND! If you haven't heard, four radio amateurs were killed in plane crash while enroute to operate in the CQWW DX SSB Contest from Crooked Island, Bahamas. The tragedy happened just after take-off, around 6:30 AM on Wednesday, October 21st, when the twin-engine Piper PA-23 plane carrying the four contesters crashed into the woods only 250 yards off the end of the runway in Jedburg, South Carolina, about 20 miles northwest of Charleston. The four radio amateurs were:
Peter Radding/W2GJ (C6APR) SK - North Charleston, SC; Pilot/Owner
James "Randy" Hargenrader/K4QO (C6AQO) SK - Summerville, SC
Edwin F Steeble/K3IXD (C6AXD) SK - Summerville, SC
E. Dallas Carter/W3PP SK - Laurel, DE
Details about this tragedy can be found on the Web at:
http://www.journalscene.com/news/Plane-crashes-at-Summerville-Airport
http://www.arrl.org/news/stories/2009/10/21/11157/?nc=1

* Since their signal will be missing during the CQWW DX SSB Contest, OPDX is requesting/suggesting (out of respect and memory) that the contesters world-wide take a pause for 1 minute (complete silence on the bands for the one missing station; 15 seconds for each "SK" operator) from 0000-0001z, Sunday, October 25th. PLEASE, pass the word around.... OPDX and its readers would like to send out deepest sympathy to the family and many friends of the above Silent Keys...

* C6APR Memorial CQWW SSB Station. It was announced that in memory of C6APR, the Trident Amateur Radio Club (TARC) will be operating the

CQWW SSB Contest using the clubs callsign N4EE. They will be operating a single station out of W3VT in Summerville, SC, on 75m, 40m, and 20m, other bands as conditions permit. Frequencies and times will be published at a later time. A special QSL card will be made to memorialize the C6APR team's accomplishments and tragic loss. Please join them during this weekend's contest to remember their fallen friends and pass on condolences to their families. Charleston area hams are invited to assist with operations. Please contact W3VT for info. QSL will be direct with SASE - For LoTW and EQSL confirmation please note on QSL. Condolences thread can be found here:
http://forums.qrz.com/showthread.php?t"2654

*** EDITOR'S SPECIAL NOTES (by Tedd, KB8NW): This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX SSB Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX SSB Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 16th-October, through Friday, 23rd-October there were 235 countries active. Countries available: 3A, 3B8, 3D2, 3V, 4J, 4L, 4O, 4S, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FO/m, FP, FR, FS, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH4, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0T, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9L, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA. SWL Ashraf, 3V4-002, will be active as 3V8SS from the "Radio Club Station of Tunisian Scouts" in Sousse, during the CQWW DXX SSB Contest (October 24-25th) as a Single-Op/Single-Band (15)/Low-Power entry. QSL via IZ8CCW. Also, read about Ashraf on the following Web pages at:
http://ashraf3v4002.wordpress.com
http://www.qsl.net/3v4-002/

4K, AZERBAIJAN. Member of the 4K7Z Radio Club will be active during the CQWW DX SSB Contest as a Multi-Single/All-Band entry. QSL via UA3FDX.

4U1UN IN THE CQWW SSB CONTEST. A press release from Martti, OH2BH, states: "A six-man team of NN1N, KR2Q, PY5EG, JK3GAD, OH0XX and OH2BH will be participating in the CQ World Wide DX SSB Contest in the two-transmitter

category providing this DXCC entity and unique multiplier to a large group of their fellow hams globally. The station has a few new antennas. They include a SteppIR Vertical, a Butternut vertical for 40, 80 and 160 meters and 6M yagi. As usual, QSL service will be handled by HB9BOU either via the bureau or direct. The logs will also be uploaded to LoTW after the operation has concluded."

9Y4, TRINDADE AND TOBAGO. Chris, 9Y4D (ex-9Y4NZ), will be active during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (possibly 20m like last year)/High-Power entry. QSL via info on QRZ.com.

A35, TONGA (News and Contest Ops). Paul Kidd, well-unknown as A35RK, informs OPDX that he has been thinking about if-and-when to use his special A35A. Paul states, "I had the initial impression that A35A was restricted to contest/special event use. But that's not the case....it's a regular every-day callsign, now that the rules have been changed. I had a chat this morning with Fe'ao Vakata (the radio licensing officer) about this, and here's what he said: It is his intention to issue A31x callsigns for visiting contest and special event operations. Basically, that prefix block is reserved for 'groups', not individuals. The A31xx block is reserved for other short-term visitors, yachties, etc. The A35x and A35xx blocks are intended for resident operators, like me. When he issued me the A35A license, it was with the understanding that I could use it any way I choose....as a 'regular' call, or as a special event/contest call. Fe'ao said that it's entirely up to me, and he has no objections to my using it anyway I want to. Therefore.....Effective immediately, A35A will be my 'fulltime' callsign....for DXing, contests, ragchewing, the whole coconut. HI......
QTH remains the same: Lifuka Island, Ha'apai Group, IOTA OC-169
QSL A35A via W7TSQ, W7 Bureau, or LoTW (No direct mail to Tonga, no A3 Bureau)..... 73, Paul Kidd, A35A (A35RK)"

Look for A35A to be active in the upcoming CQWW DX Contests:
CQWW SSB - Single-Op/Single-Band/Low-Power (probably 15M)
CQWW CW - Multi-Sigle, Operators Paul/A35A and Dave/W6ZL (A35KL)
In both cases, QTH Ha'apai Group (OC-169). QSL via LoTW (additional QSL arrangements pending).

A35, TONGA. Ramon, XE1KK, will be active as A31KK from Fafa Island in the Tongatapu Group (OC-049) during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (20m) entry. QSLs will automatically be sent via the Bureau. Also, QSL via LoTW.

AH6, HAWAII (Update). Once again the members of the "Coconut Wireless Contest Club" will be active as AH6XX in the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. Operators mentioned are: Rich/K2WR, Tetsuo/AH7C and Kan/JA1BK (KH6BK). QSL via LoTW, or direct to K2WR.

C4, CYPRUS. Andy, LZ2HM, and possibly others will be active as C4I during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via LZ2HM.

C91, MOZAMBIQUE. Mike, ZS6TAF, who works in Maputo from time to time, operate mobile using the callsign C91BA. He uses Yaesu 857D and Watson Multiranger mobile antenna for 80/40/20/15/10/6 meters. He was heard this past week on 7083 kHz at 1539z. QSL via his home callsign.

CCF/OHDXF CONTEST & DX CONFERENCE. Dates for the CCF/OHDXF Contest and DX conference have been announced by the Contest Club of Finland(CCF) and OH DX Foundation (OHDXF). It will be held between January 22-24th (2010). Look for more details to become available on the following Web page at: http://contestclubfinland.com/CCF

CE9, SOUTH SHETLAND ISLANDS (Update). A team of operators will be operating from Arturo Prat-Greenwich Island-South Shetland archipelago (IOTA AN-010, WW Loc. GC07FQ), between January 10-24th. Team members mentioned are: Luis/XQ5CIE, Carlos/CE6UFF, Didier/F6DXE and Dagoberto/CE5COX. Their callsign will be XR9JA. Activity will be on 160-6 meters using CW, SSB, PSK31 and the AO-51 Satellite. QSL via CE5JA. For more information, go to: http://www.ce5ja.cl

CQ3, MADEIRA ISLAND (AF-014). Members of the CT3 Friendly DX Group will be active as CQ3Z during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via CT3AB. Operators mentioned are: Filipe/CT3AB, Norberto/CT3FH, Jose/CT3IP, Dinora/CT3JJ and Nelio/CT3KO.

CR3, MADEIRA ISLAND (AF-014). Members of the CT3 Madeira Contest Team will be active as CR3A during the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via CQ9K. Operators mentioned are: Jose/CT3BD, Luis/CT3DL, Jose/CT3DZ, Jose/CT3EE, Antonio/CT3EN, Jose/CT3IA, Eusebio/ CT3KU, Jose/CT3KY, Jos/CT3NT and Jos/CT4NH.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
TX3A - Chesterfield Island; 2009 Operation
T6AB - Afghanistan; 2008 and 2009 Operation
T6AF - Afghanistan; Current Operation
K4M ï¿½ Midway Island; 2009 Operation; Plans are for K4M to use LoTW for QSO confirmations, see the K4M web site for more details.

E7, BOSNIA-HERZEGOVINA. There will be a few stations active from here during this weekend's CQWW DX SSB Contest. Look for the following:
E71A - Emil as a Single-Op/Single-Band (80m) entry.
E73M - Daniel as a Single-Op/All-Band/Assisted entry.
E77DX - Emir as a Single-Op/All-Band entry.
E77XZ - Suad as a Single-Op/Single-Band (15m) entry.

EA9, CEUTA AND MELILLA (Update). A group of Spanish operators will be active as EE9Z or possibly ED9NA during the CQWW DX SSB Contest (October 24-25th) as Multi-2 entry. QSL via EA9LZ (QRZ.com). Operators mentioned are: Cristobal/EA7RU, Jorge/EA7HZ, Jose/EA9CD, Manuel/EA9BW, Jose/EA9PY, Mariano/EA9LS and Jorge/EA9LZ.

EE6, BALEARIC ISLANDS. Biel, EA6DD, will be active as EE6E during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/Single-Band (40m) entry. QSL via EA6DD.

ER4, MOLDOVA. Serge, UT5UDX, will be active as ER4DX during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band entry. QSL via RA4LW.

FT5W, CROZET ISLAND. Florentin, F4DYW, currently active as FT5WO, is expected to be on the air until November 15th, but will leave the island on November 23rd. He is usually on 20 or 17 meters during Saturdays and Sundays between 0600-1300z usually between 14260-14280 kHz. QSL via F4DYW.

GJ/MJ, JERSEY (EU-013). Operators Rich/N6AA and Jim/N6TJ will lead a group to activate GJ2A during the CQWW DX SSB Contest (October 24-25th) as a Multi-Multi entry. See QRZ.com for QSL info.

HG0, HUNGARY (WFF Op). Members of the Regionalis Radios Sportklub Puspok-ladany (HA0KHW) will once again activate another Hungarian National Park between October 22-29th. Look for them to be active as HG0WFF/p from Orseg National Park (HAFF-009). The team leader is Geza, HA4DX. QSL by the Bureau is "OK", and their QSL Manager is HA0HW. Some of the operators will use their own callsigns with a mark /p (maybe).

HS0, THAILAND. John, W2YR, informs OPDX that Winit, HS1CKC, is making a big effort to organize operators and get the Radio Amateur Society of Thailand club station HS0AC ready for a Multi-Multi entry in the CQWW DX SSB Contest this coming weekend. Remember, Thailand has a very restric-tive band allocation on 80 meters, and as a result, they will be required to operate in the very lower portion of the band. They may operate on or about 3.539 MHz and will listen up in the band for callsign. John states, "These are a great bunch of guys, and I am sure they will welcome schedules made on other bands during the contest." MORE UPDATED DETAILS: Contest/Club station will be a Multi-? entry in the contest. QSL via HS0ZFZ. Operators mentioned are: Winit/HS1CKC, Nathan/HS0ZHG, Swen/HS0ZFZ, Sam/HS0ZDY, Son/HS6NDK, Champ/E21EIC and possibly others.

IOTA NEWS.....
EU-068. Operators Jean-Claude/F5IL, Juan/F5IRC, Luis/F5THW and Christophe/F5UBH will be active as TM5SN from Sein Island (DIFM 007, DMF 29-015 le moulin de Sein CP 29990 Sein, WLOTA 2721 PB 1003 and PB218 Men Brial Lighthouse IN78NA or Sein Lighthouse PB106 IN78NB) between October 30th and November 2nd. Activity will be on the HF bands using CW, SSB and the Digital modes (RTTY and possibly others). QSL via FIIL, direct (SAE + postage) or by the French REF-Union Bureau (please only this Bureau).

NA-029. Mike, W7ASF, will be active as VY2/W7ASF from Prince Edward Island (CISA PE-001, WLOTA 0523) between November 18-24th. Activity will include an entry in the ARRL Sweepstakes Phone Contest (November 21-23rd). QSL via his home callsign, direct or by the Bureau.

JU1, MONOGOLIA. Members of the JTDXA Contest Team will be active as JU1DX during the CQWW DX SSB Contest (October 24-25th) and the CQWW DX CW Contest (November 28-29th) as a Multi-Op/Two-Transmitter entry. Location is 100 miles from Ulaanbaatar, capital city of Mongolia. Team members mentioned are: Naran/JT1BV (Team Leader), JT1BL, JT1BS, JT1BZ, JT1CH, JT1DR and JT1CZ. QSL via info on QRZ.com.

JU75, MONGOLIA (Special Event and Contest Op). Look for special event station JU75BSI to be active in the CQWW DX SSB Contest (October 24-25th) as a Multi-Op/Single-Transmitter/High-Power entry. Operators mentioned are JT1CH and JT1BZ. This special event station is active to celebrate the 75th anniversary of the Mongolian Border Service. A special QSL is available with a SASE. Also, QSL via LoTW or direct to JT1CH.

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power/ Assisted entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

***KH6BZF PROPAGATION FORECAST/REPORT (For October 26th-November 1st)....

MARCONI NOBEL 100 AWARD. To celebrate the 100th anniversary of Marconi receiving the Nobel Prize, listen for and work 10 different special event "SI" stations between November 9th and December 10th. The following special anniversary callsigns will be on the air: SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM. Other SM stations may be using the special prefix SI, but only the above stations count. Each anniversary station counts once per band. No endorsements. The fee is 50 SEK, 5 Euro or 5 USDs. Apply with log entry to SSA Awards Manager, Bengt Hogkvist, Ostbygatan 24 C, SE-531 37 Lidkoping, Sweden.

OY3, FAROE ISLANDS. Tom, OZ1AA, will be active as OY3AA during the CQWW DX SSB Contest (October 24-25th) as a Single-Op/All-Band/High-Power entry. QSl via OZ1ACB. His Web page is: http://www.oz1aa.com

P3, CYPRUS. Operators Sandy/RW4WR, Dmitry/RX3DCX, Andrei/RA6LBS, Harry/ RA3AUU, Jack/RW3QC, Igor/UA2FZ and Roman/UR0MC will be active as P33W during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single entry. QSL via RA3AUU.

P4, ARUBA (SA-036). John, W2GD, will be active as P40W during the CQ WW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power

or QRP entry with limited antennas. QSL via N2MM. Logs will be loaded on LoTW upon his return to USA.

P4, ARUBA (SA-036). Andy, AE6Y, will be active as P49Y during the CQ WW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High (or Low)-Power entry. QSL via AE6Y.

PJ4, NETHERLANDS ANTILLES (Correction). Doc, W9NJY, (not Don, W9JNY) will be active as PJ4/W9NJY from Bonaire (SA-006 and WLOTA L1279) between now and October 30th. Activity will be casual on all HF bands. QSL via his home callsign, direct or by the Bureau.

QSL INFO AND NEWS.....
VE7/VA7 INCOMING QSL BUREAU. Please note that the QSL Manager of the VE7/VA7 Incoming QSL Bureau has a new callsign. It is now VE7BC (old callsign was VE7UQ). The Bureau's E-mail address is now: ve7bc@shaw.ca All other information is unchanged. The Bureau Web site is at: http://www.qsl.comm.sfu.ca

QSLS VIA LOTW: NONE REPORTED THIS WEEK!

QSLS RECEIVED VIA MAIL: 4S7NE, 5K0T, 5W0JT, 6W/DL4SJ, 9Y4W, C52C, N7RO/p, T88ZS, VK9DWX, VK9GMW, VO2/NF6J, YB0DJ and ZF1A

QSLS RECEIVED VIA THE BUREAU: 4J0DX, 4K7Z-Club, 5I3A, 8N750MCS/7, AO7DMR, CN2BC, CT9L, DS1REE, EA8/OH2BAD, EG5T, EK0B, ER4DX, EU5ROPE, EV6ZK, EV7DP, EV8DP, EV9P, EX8AP, HB0/DJ1AIB, HB75F, HE8EFGJ, HE8MH, IA6IPY, II1ANT, IQ8OM, IU3SRT, JT3Y, JW/OK1IPS, JW/OK1IPS, LY2IJ, OH3GZ/P, OL140PS, OL4A, P40MH, PD1DX, PI9NOZ, SN90PR, SO9DX, SP1918PR, T2UF, TC2009UC, TO3R, UA3FDX, UN7MMM and UW0G

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQWW DX SSB Contest (October 24-25th) as a Multi-? entry. QSL via DK4VW.

T30, WESTERN KIRIBATI. Operators David/N1EMC and Mike/N1IW will be active as T30KI and T30IW, respectively, between November 10-16th. Activity will be on 60-6 meters as conditions permit using SSB/CW. QSL via N1EMC.

T6, AFGHANISTAN. David, CT1DRB, will be active as T6AG from here the next 6 months as of October 21st. Activity will only be CW. QSL via EA3GHZ direct.

TZ, MALI. Mac, JA8SLU, will once again return to Mali and be active as TZ6JA between November 2-23rd. Activity will be SSB only. QSL direct only to: Mac Obara, P.O. Box 59, Tama, Tokyo, 206-8691 JAPAN.

TS9, TUNISIA. Operators Hrane/YT1AD, Dragan/YT3W, Markovic/YU1AU, Vladeta/YU1KX, Alea/???? and possibly others will be active as TS9A during the CQWW DX SSB Contest (October 24-25th) as a Multi-Single or Multi-2 entry. QSL via YT1AD, direct or by the Bureau.

V3, BELIZE. Wil, AA4NC, will be active as V31RR between February 17-23rd. Activity will be on the HF bands including 30/17/12m using CW, SSB and

RTTY. His activity will also include the ARRL DX CW Contest (February 20-21st) as a Single-Op entry. QSL via his home callsign or LoTW.

VE2, CANADA (Zone 2). Operators Andrew/KD3RF, Irwin/KD3TB, William/K3FMQ, Ken/N3PSJ and Sebastien/VE2GTZ will be active as VE2DXY during the CQWW DX SSB Contest (October 24-25th) as a Multi-2 entry. QSL via KD3RF. This is their 8th year as a Multi-2 operation in Zone 2. Visit their Web site at: http://www.wix.com/andyvavra/VE2DXY

XV, VIETNAM (Update/IOTA Op). Operators Manfred/DK1BT, Wolf/DL4WK, Andy/DL5CW, Sigi/DL7DF and Frank/DL7UFR will be active as XV4D from Phu Quoc Island (AS-128) between November 4-17th. Activity will be on 160-10 meters using CW,SSB,RTTY,PSK and SSTV. QSL via DL7DF, direct or by the Bureau.

YN, NICARAGUA. Eric, K9GY, will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the 2010 ARRL DX CW Contest (February 20-21st) as a Single-Op/All-Band/Low-Power entry. He will be there between February 18-22nd. Outside of the contest, look for CW activity on 30/17/12 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

The following stations are expected to be active in the
CQ World Wide DX SSB Contest (October 24-25th, 2009)

Thanks to Bill, NG3K, for providing OPDX readers with the following consolidated listing of the participants in the 2009 CQWW DX SSB Contest. For a more detailed listing (and up-to-date changes/corrections) in HTML format, please visit Bill's Web page at:

JOTA A SUCCESS

G5RV's Logbook sells

Sunspots and tree rings

ALL UP AND COMING IN THIS EDITION OF WIANEWS WEEK COMMENCING OCT 25 2009

FOUR DX HAMS KILLED IN PLANE CRASH

It is with great sadness we have to inform the Amateur community of a tragic
accident Thursday morning at 6:30am EST.

The C6APR team, consisting of Pete, W2GJ, Ed, K3IXD, Randy K4QO and
Dallas W3PP were all killed as their aircraft crashed on take-off from
Summerville Airport, SC on their way to Crooked Island, Bahamas.

The Hams were flying to Fort Pierce, Fla., and then on to the Bahamas to operate in the CQWW contest this weekend.

The plane had only climbed to about 150 feet before something caused it to make a sharp U-turn and then crash into a wooded area near the Summerville airport.

The twin-engine Piper PA-23, which seats six and was built in 1976, was engulfed in flames when firefighters arrived at the scene.

Our thoughts are with their families in this tragic time.

(vk3fz/vk3frs)

THREE ELECTROCUTED INSTALLING HAM ANTENNA IN FLORIDA

Three people trying to help a Florida ham by installing an antenna for her have been electrocuted in a bizarre accident that happened after dark. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

A mother, father and their 15-year-old son died on Monday, October 12th. This, after being electrocuted while attempting to erect a ham radio antenna.

The Palm Bay Florida Police Department identified the victims as Melville Braham, 55, Anna Braham, 49, and their 15 year old son Anthony. None were licensed radio amateurs but they appeared to have been assisting an area ham with an antenna installation.

Authorities say the family was attempting to raise the antenna mast when they lost control and it struck an overhead power line. It made contact

with the overhead wiring and sent 13,000 volts down through the antenna

mast the three were holding,

When paramedics arrived, they found all three on the ground not breathing. Rescue crews immediately tried to resuscitate them. Anna Braham was pronounced dead at the scene. The father and son were taken to a local hospital, where they were later pronounced dead.

Florida Power & Light Co. crews also responded to the scene. They shut off power in the area while authorities collected evidence and documented the scene.

According to news reports, Anthony Barham attended Southwest Middle School. Grief counsellors were available at the school on Tuesday October 13th to help students deal with the tragic loss of their friend.

Federal Communications Commission records do not show that any of the victims were licensed amateur radio amateurs. They do, however, show a license issued to a Barbara V. Tenn, KJ4KFF, at the address where the electrocutions occurred.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

This appears to be yet another case of those trying to put up an antenna not realizing the potential danger of nearby overhead high tension electric

distribution, and the fact that these wires are all but invisible at night.

(Published news reports fox orlando)

VK4 Counter terrorism exercise Operation Hotel Taunt

A joint operation aimed at testing a coordinated response to an emergency situation was held Wednesday at the Port of Brisbane.

The counter terrorism exercise involved several government and private authorities working together to resolve a potentially dangerous situation.

The exercise involved a suspicious package being located on a wharf at the Port of Brisbane.

Authorities then went about planning and participating in every aspect that would be necessary if this was a real situation.

Wynnum District Superintendent Tony Rand was happy with the exercise and the way the situation was successfully handled.

"This type of exercise is extremely important for everyone involved to hone their skills and learn best practice methods.

"We will assess the exercise and educate ourselves on any areas that may need improvement. Everything done here can be taken away and used in a real life situation," Superintendent Rand said.

(QPS Media and Public Affairs Branch).

JOTA A SUCCESS

Lots of good reports coming in of JOTA last weekend.

Her Excellency Ms Quentin Bryce AC, Governor-General of Australia, Chief Scout and Patron of Girl Guides Australia addressed Scouts and Guides in a message which opened the annual Jamboree On The Air.

JOTA-JOTI involved some 10,000 Scouts and Guides in Australia, and about 500,000 worldwide and gave young people an opportunity to meet and learn about Scouts and Guides in other parts of the world.

The amateur radio station of the World Scout Bureau was active from Geneva on all short-wave and VHF bands during the JOTA weekend with the Bureau's call sign HE8S.

On the Sunday afternoon, Secretary General Luc Panissod gave the closing speech that was transmitted over shortwave and entered into a live contact with J5S at the Scout HQ in Guinea Bissau.

HE8S - World Scout Bureau

NERG'S latest club newsletter has pointed out that from 9 November, there will be some important changes to the Victorian road safety rules about using mobile phones and visual display units.

While these don't appear to affect any rules regarding the legal use of two-way radios whilst driving, some amateur radio equipment is starting to look a lot like a mobile phones or GPS navigator, so it's probably best NOT to use them whilst mobile and avoid attracting too much attention.

Notes regarding phones and visual display devices and other rule changes can be found on the Vic Roads web site:

www.roadrules.vicroads.vic.gov.au

WIA PRESIDENT VK3KI REPORTS ON IARU R3 CONFERENCE

Last Friday week saw the conclusion of the IARU Region 3 triennial conference in Christchurch, New Zealand.

Each of the three International Amateur Radio Union regional organisations, with the regions matching the ITU regions, holds a conference every three years.

The conference becomes the meeting for the national amateur societies, such as the WIA, and the representatives of the other two regions as well as the IARU officers.

The WIA participates in the IARU Region 3 conferences, because it is the way that the WIA can participate in the formulation of the policy of the IARU, the representative of the amateur service at the regional telecommunication organisations and at the ITU.

In a broadcast I cannot go through all the many matters discussed over the 4 working days of the conference. I can give you an indication of the breadth of the discussion by telling you that the focus of the Conference was the protection of our bands through the IARU Monitoring System, what we call in Australia Intruder Watch, and emergency communications.

Why is Intruder Watch important? Because without complaints about an intruder causing harmful interference, it may be claimed that there is no breach of the ITU Radio Regulations, which allow a station to be placed anywhere so long as it does not cause harmful interference to a station operating in accordance with the ITU's Radio Regulations.

It was agreed that there was a need to update and modernise the Monitoring System to effectively deal with intruders causing harmful interference in the amateur radio bands.

The other major matter was the role of amateur radio in emergency communications. The conference commended the Indonesian society (ORARI) and its amateurs and the Chinese society (CSRA) and its amateurs on the role that they had played in Indonesia and China after major natural disasters.

The Conference considered the concept of emergency centre of activity (CoA) frequencies worthwhile, and adopted 3.600, 7.110, 14.300, 18.160 & 21.360 MHz.

Among the many other matters considered were the matters affecting amateurs on the agenda for the next ITU World Radiocommunication Conference, the WRC in 2012, particularly the agenda item dealing with the allocation of a small

secondary segment to amateurs around 500 kHz. In addition the matters included ARDF, better utilisation of all allocated amateur bands, BPL/PLT, EMC, visitor licensing including the Australian class licence, liaison between societies and their radio administrations, operating standards, various projects, together with support, for the development of amateur radio in the region, the New Zealand KiwiSAT satellite project, the beacon project, various matters affecting the 7 MHz band, including the footnotes to that band, future financial implications and the budget for the next triennium.

The NZART was praised for its hospitality and efficiency as the host society.

The next IARU Region 3 Conference will be in Ho-Chi-Minh City, Vietnam in late 2012.

October 2005 VK9 Callsigns

The headlines for this item are, I think, no more restrictions on retaining a VK9 callsign and location indications in VK9 callsigns abandoned.

Earlier this year, after it had taken over the responsibility of recommending callsigns, the WIA raised the question whether the conditions imposed by the ACMA on the issue of VK9 callsigns for Australia's External Territories continued to be appropriate.

In particular, the policies of requiring the callsign to include a letter as a location identifier and the bar on retaining a callsign were questioned.

The WIA consulted widely, seeking submissions on the issue, and ultimately submitted to ACMA a report on its investigations and its recommendations.

ACMA has now announced new arrangements for the issue of VK9 callsigns for the Australian External Territories that represent a significant simplification.

>From 1 November 2009 the arrangements for the issue of a licence for the VK9 call area will be the same as for the other Australian call areas.
In particular, all licences issued to authorise operation in the External Territories (VK9), other than those issued to visiting overseas Amateurs, will be issued for the period requested by the applicant. Unless a short term licence is specifically requested, the licence will not be subject to a renewal bar. This provision applies regardless of whether the applicant is a visitor or permanent resident or does not provide a 'station address'. Where a station address cannot be provided, for example on an uninhabited island, the station location will be the name of the island.

All licences issued to visiting overseas Amateurs will be issued for a period of one year unless a short term licence is specifically requested. Short term licences will continue to be subject to a renewal bar and licences issued to visiting overseas amateurs will not be automatically renewed.

As with these provisions, there will be no differentiation between visitors or permanent residents, all VK9 licensees, including overseas visitors, will be able to operate under the portable provisions of the Amateur Licence Conditions Determination in any External Territory or mainland state or territory

The other issue, the question of the callsign identifying the location, attracted the most interest.

Callsigns allocated to Amateur licences authorising operation in the External Territories will no longer contain a letter indicating a specific operating location.

VK9 callsigns will continue to reflect the licence category (Advanced, Standard or Foundation).

HAMS ACROSS AUSTRALIA.

VK1
G'day all, could all persons holding keys for the Farrer shack please return them to the committee as soon as possible.. The Farrer shack will no longer be used from the 31st of October 09..

NORTHERN vk2
PRETTY GULLY REPEATER VK2RBR REPAIRS.

The wind associated with recent dust storms brought down antennas and made a bit of a mess of them besides one coax getting wrapped around the blades and shaft of the wind generator.

They have been rebuilt and put up again and it is now working on a single dipole on each of Tx and Rx instead of the phased pair for each.

At the antenna phasing box on each antenna the sealant had failed and the internals were severely corroded, now all is good.

Sherbrooke Community Radio Club would like to thank all the amateurs who helped out over JOTA. Scouts from 3 troops and a one group of Guides attended their shack over the two days. From this introduction to amateur radio there will be a number of kids who will get into ham radio.

Without the older radio amateurs helping youth into the hobby, it would remain an older person's activity.

Sherbrooke Community Radio Club's ARISS contact takes place at Sherbrooke Community School 28th at 07:13UTC. As the link will not be in Australia you will not be able to hear the downlink or uplink but if you tune to VK3RBY, VK3RML or EchoLink Amsat server G7EVY you will be able to hear em.

NEWS FROM THE TOP END VK8

The Darwin Amateur Radio Club had two stations active during JOTA last weekend. Guides from around Darwin were at the clubrooms on VK8DA and had a good time with quite a few good contacts. The Scouts gathered at Howard springs in Darwin's rural area where VK8BP was set up. HF conditions were a little poor but some useful contacts were made. Thank goodness for EchoLink during this period of no sunspots.

87 Joeys Cubs Venturers and Rovers were there doing all manner of communications related activities.

The next club meeting of the Darwin Amateur Radio Club is at the clubrooms in Sports House Waratah Crescent Fannie Bay on Wednesday 4th of November 7pm. Don't forget the AGM is on the 2nd of December. Nominate now for a position on the club committee.

the club Christmas dinner is at the Hidden Valley Tavern at 7 pm on Thursday December the 3rd.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

G5RV's Logbook sells

On October 1st, the 1932 logbook of Louis Varney, G5RV, was put up for auction on eBay. Within a couple of days the price reached ï¿½77 where it stayed until after some intense bidding the logbook finally sold for ï¿½227.

The logbook shows that G5RV's final QSOs were on January 11 2000.

Varney was, of course using a G5RV antenna that he designed for those final contacts.

Ironically, the final entries appeared on page 73 of the logbook.

12th Ham Fair in Lisbon

If you are off to Portugal on holiday next month, you may be interested to know that 15th November sees a major Ham Fair in Lisbon.

This is one of the biggest events in Portugal and aims to be more than just a show with new and second hand goods as visitors enjoy meeting new and old amateur friends and from around the globe.

arvm.org/index.fr2009.html

Researchers say they have created a special kind of paint which can block out wireless signals.

It means security-conscious wireless users could block their neighbours from being able to access their home network - without having to set up encryption.

The paint contains an aluminium-iron oxide which resonates at the same frequency as wi-fi - or other radio waves - meaning the airborne data is absorbed and blocked.

By coating an entire room, signals can't get in and, crucially, can't get out.

Developed at the University of Tokyo, the paint could cost as little as

10 DOLLARS per kilogram, researchers say.

(vk2fjl)

D-STAR REACHES NEW HEIGHTS

Here is the story of a ham who has taken D-Star to a new height.

New height as in 13,000 feet in the sky.

Bill Pasternak, WA6ITF, in a recent Amateur Radio Newsline bulletin says that Mark Meltzer, AF6IM, of Palo Alto California went sky-diving and brought along an Icom IC 91AD D-Star enabled handy talkie.

Meltzer says that on his first jump he opened his chute at about 13,000

feet and worked numerous 2 meter analogue FM simplex contacts. He also held a couple of analogue FM QSOs on 1.2 GHz through the W6CYX and W6LRW linked repeater system on 1282.225.

At about 8000 ft he decided to try D-Star but heard only a garbled R2D2

sounding reply. At the time Mark says that he was flying his canopy away from Mt. Diablo which placed my body between the repeater and the IC 91AD's

antenna. So he turned towards Mt. Diablo and the distortion went away and he was able to work Rick Mc Cusker, WF6O, in Sacramento clearly through the machine.

AF6IM notes that he was also carrying analogue APRS gear that not only reported GPS derived data that not only included his altitude heading and speed but also his blood oxygen level and pulse rate. He also thanks WF6O for being the other half of the D-Star parachute mobile contact and especially to Tim Barrett, K6BIV for making it all possible with his D-Star repeater system.

NOV 28 - 29 CQ WORLD WIDE CW

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010

March 21-22 John Moyle Field Day

Time to get ready for this year's VHF-UHF field day, held on the weekend 28/29 November.

Some details have come to light courtesy of the NERG club in VK3 which we share here.

The VHF-UHF Field Days provide VHF-UHF operators with the opportunity to "head for the hills" and see how far they can work.

The Field Days has sections for single and multiple operators, with 24 @ 8 hr sections. There is also a separate Home Station section.

The scoring is based on grid locator squares. Each new square worked gives quite a boost to the score, and this encourages the entrants to operate from locations in grid squares that normally don't have a great amount of amateur activity.

There are no mode restrictions, except that all contacts must be simplex - no repeaters, Internet, or satellites allowed. There is plenty of FM activity, but one feature of the Field Days is a high level of SSB activity.

Stations can do very well with modest antennas and equipment from a good hilltop. Operating mobile from more than one grid square can also improve scores.

See the WIA web Contests page for more details:
www.wia.org.au/members/contests/vhfuhf/

Getting very serious with ham radio contests

Every major sport has at some time or another suffered from cheating.

Whether it be athletes using illegal substances to enhance performance, taking a risk that the officials won't notice that rules are being flouted or just falsifying the score-sheet.

So it should come as no surprise that amateur radio contests can be subject to cheating too.

The issue is gaining greater publicity through the disqualifications to be handed out by the CQ World Wide Contest Committee.

It has introduced a Yellow card and a Red card system, just like a soccer referee. Under the CQ World Wide Contest rules all entrants agree that the use of the card system and other decisions of the Contest Committee are official and final.

For a low level indiscretion a Yellow card will be issued making the entrant ineligible for an award. But two Yellow cards in three consecutive contests means a two year ban.

For higher level matters, a Red card means the submitted log is rejected or no score recorded, the entrant or operator is banned for 12 months and listed at the end of the contest results for all to see. Get two Red cards and there is a three year ban.

Cards are issued for breaches of contest rules or the operating requirements of a country, unsportsmanlike conduct such as using non-amateur radio means to pre-arrange contacts contrary to the rules, or taking credit for excessive unverifiable QSOs or multipliers.

Hopefully this innovation will discourage those who don't abide by the rules or are outright cheats.

WIRELESS WEATHER

Peter Ellis VK1PE has spotted an odd story about the sunspot cycle.

Sunspots and tree rings

Some of us just know that daylight saving fades the curtains. But, now,

it has been proved that sunspots affect the growth of tree rings.

Ms Sigrid Dengel, a postgraduate researcher at the Institute of
Atmospheric and Environmental Science at the University of Edinburgh,
has "investigated the interannual variation in the growth rings formed
by Sitka spruce (/Picea sitchensis/) trees in northern Britain (55ï¿½N,

3ï¿½W) over the period 1961--2005" finding that "there was a consistent
and statistically significant relationship between growth of the trees
and the flux density of galactic cosmic radiation.

Moreover, there was an underlying periodicity in growth, with four minima
since 1961, resembling the period cycle of galactic cosmic radiation"
corresponding to the 11 year cycle of sunspots. The more sunspots, the greater
the flux of the solar wind and the lesser the flux of the galactic cosmic
radiation. She has said, "the relation of the rings to the solar cycle was

much stronger than it was to any of the climatological factors we had looked at." Does this also explain why my cherry tree is flowering so well this year?

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

Wi-Fi signals used to see through walls

Monday's edition of the UK Telegraph reports that scientists at the University of Utah in the United States have found a way to harness Wi-Fi signals to 'see' through solid walls.

The researchers say that the variation of radio signals in a wireless network can reveal the movements of people behind closed doors or even a wall.

Joey Wilson and Neal Patwari, from the University of Utah, have used the principle of variance-based radio tomographic imaging. The system works by measuring interference between the nodes of wireless devices. If someone passes through that field, the device registers a change in the levels of resistance, and feeds that information back to a computer.

The system can currently see about three feet through a wall, and is so far only capable of sensing motion. At this stage, it is not sophisticated enough to generate an actual image of what lies beyond the wall, but the research team is confident that this feature could be developed in time.

You can read the full article 'Wi-Fi signals used to see through walls' at:

http://www.telegraph.co.uk/technology/news/6254646/Wi-Fi-signals-used-to-see-through-walls.html

REAST ATV Experimenters Night

We had a great roll-up last Wednesday night with a very special quest that Ken VK7DY brought along. Gary Briant VK3KYF who is the President of the VK3 Sunraysia Radio Group based in Mildura.

Ken VK7TW and Justin VK7TW interviewed Garry on air and we found out what makes Garry tick and what the Sunraysia Radio club gets up to.

Thanks to Garry and Ken. It was also great to see Reg VK7KK along for the night.

Justin VK7TW then took the audience through a show and tell and demonstration of what other functions a Grid Dip oscillator could be used for which included:

- Resonance Testing of circuits

- Calculating an unknown L or C value with know component values and finding the resonant frequency

- Q Factor measurements for inductors

- Absorption wave meter testing of tank circuits

- Field strength meter

- Signal generator

- Measuring the length of a coax using the open circuit ï¿½ wavelength or shorted ï¿½ wavelength method; and,

- A crystal oscillator

Paul VK7FPAH was then interviewed about his construction of a Quadrifiliar 137MHz satellite antenna and we checked it's resonance and discussed on air the problems Paul was having with the performance of the antenna. Watch this space as there case is certainly not closed-.HIHI.

We finished up with some great videos from the STEREO Heliospheric satellites which showed real solar flare activity and Coronal Mass Ejection (CME) events that have been captured by the satellites that are currently monitoring the sun.

We will have another cram packed session this Wednesday night so why not come along and see what we get up to.

We will be continuing to prepare the new ATV studio and hanging some of the conduit to provide structured cabling paths around the studio.

STOP PRESS - We have taken delivery of the new DVB-T DATV transmitter components and this is currently being housed in a suitable rack box along with the power amplifier.

AMSAT-NA ANNOUNCES NEW FM CUBESAT

AMSAT North America says that its once again headed back into space. This time with a brand new CubeSat that will be like no other before it.

During the board meeting held Oct. 8 in conjunction with the Annual Space Symposium the AMSAT Board of Directors adopted the Engineering Task Force recommendation that low-cost launch options be pursued immediately. This means that the AMSAT engineering team will develop a 1U CubeSat design effective immediately.

The new AMSAT CubeSat's initial capability is planned to add to the popular low-earth orbit FM transponder fleet allowing hams to continue to use their existing handheld and portable antenna systems. Such a satellite also continues the accessible entry path for new satellite operators to get started.

Meantime, word that the flight version of ARISSat-1 replacement for SuitSat 2 has been developed to be adaptable into the CubeSat model. This will allow a modular approach to mission design using proven subsystems and components.

The ARISSat-1 mission planned in 2010 and will be the initial flight test of AMSAT's modular satellite. According to Tony Monteiro, AA2TX, who is AMSAT North America's Vice-President of Engineering, this approach to building flight hardware gets AMSAT back up in space with new satellites by leveraging the skills and technology it has today.

AMSAT says that there's another reason for this fast track approach. This is because the existing FM satellites are starting to show their age.

QNEWS BROADCAST OCTOBER 25 2009

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

It was only last week when "Amateur Radio" magazine appeared in the
letter box. With the promotion of the centenary celebrations of the WIA

and JOTA/JOTI featuring prominently, it was actually the article from
VK4QS that grabbed my attention.

Michael describes his joining the ranks of the amateur fraternity during
the 1980's and the fact that he never felt himself a stranger, rather he
felt embraced by a new family. The behaviours which characterised the
hobby in past times are contrasted with the observed behaviours of a
number of licensees today.

Yes, community standards have altered and language that would have
landed you in court, in years gone by, is now regarded in a different
way. No longer is the solitary amateur hovering over glowing valves and

pounding morse whilst listening through headphones. Today, it is more
likely that the room full of equipment has been replaced by a "shack"

integrated into the living space and the sounds that are received can be overheard by any one in range of the speaker. If you would not like material heard by your family and friends, surely you wouldn't transmit it?

The final part of Michael's article is devoted to how we can foster our

new recruits (and the listeners who anonymously assess our behaviour from behind their receivers). This is a thought provoking article for amateurs of any age who are interested in promoting AR.

Do you realise that our WIA is twice as old as ABC TV in VK4?

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

Last weekend about 30 club members spent a very dusty weekend assisting some 300 scouts, cub, guides and rovers who visited the club's portable station located at the Murrongbong Scout camp near Petrie, north of Brisbane. It was also good to see Richard, VK4ZAA from the Brisbane Digital group working with Redcliffe club members for his third JOTA.

The scouts and cubs started to arrive at 8 am and the first event on the tour was the kit building assisted by club members with soldering irons. The most popular kit was the crystal radio set and thanks to Shaun, VK4FY, who put up a 50 metre length of wire to allow the cubs to listen to their newly built radios.

Shaun was also the organiser of the JOTI part of the event.

Another kit available for building was the electric buzzer and although it might NOT be welcomed when the cubs arrived home, the cubs certainly enjoyed using the buzzer to practice their morse code skills. Many of the girls were able to easily able to send morse across the camp site and a couple were able to send simple sentences at the end of 10 minutes practice. The boys were just a little slower.

Last Monday evening before the monthly tech talk, the club members were provided with a slide show of the JOTA weekend which showed the highlights of the weekend. The pictures will be up on the Redcliffe website by the end of next week.

For the Tech talk, John, VK4YJV, described the design of the 2 metre repeater antenna and also provided a detailed explanation of the constructions difficulties of vhf and uhf antennas. The most critical of all the design components of the repeater antenna was the feed point design. John through the use of mathematics and a little trial and error was able to design and construct a vertical dipole with a true 50 ohm feed point that ensured that there will be no static build up, is totally waterproof and insect proof and will be simple to maintain.

John was also able to show how critical is the construction of the antenna and clearly spelt out to the audience that the techniques that we use on hf

antennas cannot be applied to uhf and vhf antennas. He also showed that if you do not consider even little things in the design such as the fringing of the ends of the driven elements, that even this can substantially change the design parameters and the end result.

John for shadowed a further tech talk titled Plastics are not all plastics

Until next I'm Ray from the Redcliffe club and your listening to QNEWS from VKFOURWIA

GREETINGS! THIS IS DON VK4FNQA WITH NEWS FROM NORTH QUEENSLAND.

WE HAVE JUST COMPLETED A VERY SUCCESSFUL JOTA-JOTI WEEKEND
WHERE LOTS OF YOUTH MEMBERS TOOK TO THE AIRWAVES.

ONE OF THE FRIENDLIEST RADIO NETS IN THE LAND HAPPENS THIS TUESDAY EVENING FROM 7-30PM ON THE TOWNSVILLE VHF REPEATER. THE ANN RENTON MEMORIAL LADIES NET IS OPEN TO YOUNG AND OLD, YL OR OM AND IS A GOLDEN OPPORTUNITY FOR ANYONE WHO NEEDS PRACTICE ON AIR TO HAVE A GO AS SECOND OPERATOR. SO JOIN IN THIS TUESDAY EVENING AND LETS SEE IF THE YLS CAN OUTNUMBER THE OMS !

THE TOWNSVILLE AMATEUR RADIO CLUB INC WILL BE HOLDING THE 2009 ANNUAL GENERAL MEETING ON SUNDAY NOVEMBER 22ND FROM 7AM AT ROSSITER PARK AITKENVALE, WITH PROCEEDINGS STARTING OFF WITH A SCRUMPTIOUS PANCAKE BREAKFAST FOLLOWED BY THE MEETING. ATTENDANCE NUMBERS ARE NEEDED FOR CATERING PURPOSES SO PLEASE CONTACT CLUB SECRETARY PHIL VK4HSV SOONEST IF YOU ARE WISHING TO ATTEND. CONTACT PHIL EITHER ON HIS MOBILE 0407 737976 OR VIA THE WONDERFUL MEDIUM OF AMATEUR RADIO.

DEADLINE FOR THOSE NUMBERS IS TUESDAY NOVEMBER 17TH.

REMEMBER TOO THAT TARC IS VISITING THE TOWNSVILLE CHORAL AND ORCHESTRAL SOCIETY THEATRE RESTAURANT ON FRIDAY THIRTEENTH OF NOVEMBER. IAIN VK4IGM IS HANDLING BOOKINGS AND, AS SEATS ARE LIMITED, HE NEEDS THOSE BOOKINGS NOW! CONTACT IAIN ON TELEPHONE 47214083 RIGHT NOW.

WELL THATS ALL FOR THIS WEEK FROM A CURRENTLY BALMY TROPICAL PARADISE, THIS IS DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA

2342. Saif Durbar: Conducting Housing Experiments in Saudi Arabia!

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-24 12:03:30 UTC
From: saifee_durbar@yahoo.com
Message-ID: <5aec58c6-46c7-4356-aca3-654081eac0df@m25g2000vbi.googlegroups.com>
Source record: 6306
Cross-posted to: rec.radio.amateur.misc,rec.radio.shortwave,sci.electronics.repair,sci.engr

BOVIS LEND LEASE, the construction group, has teamed up with the British architect behind London's "erotic gherkin" office skyscraper on a $13 billion (£7.4 billion) plan to build 750,000 new homes in Saudi Arabia.

The pair are working with Saudi Construction Group, a new company backed by some of the Kingdom's richest businessmen, to develop a huge site about three miles outside the capital, Riyadh. The backers plan to float the group – which could be worth about £1 billion – in London or Riyadh by the middle of next year.

The company is the brainchild of Saifee Durbar, a broker to Saudi billionaires investing in Europe, Paul Bloomfield, the veteran property dealmaker, and Sheikh Faisal al-Sharif, chairman of DGI, a company that is researching a $2 billion (£1.1 billion) petrochemicals plant in Saudi Arabia.

The Saudi Construction Group is designed to cash in on the Saudi Government's plans to provide a home for every Saudi citizen. The Saudi Government believes that there is a need for between three and four million new homes over the next ten to fifteen years.

The oil-rich country currently houses more than 26 million people but is one of the world's fastest-growing countries.

Foster & Partners, the architect behind Swiss Re's landmark office building near the Tower of London, dubbed the "erotic gherkin" will create a master-plan for the huge housing settlement. The site totals seven million square metres and will accommodate about 750,000 new homes.

Bovis Lend Lease will be the lead contractor for the project, which will cost between $6 billion and $7 billion and will be worth between $10 billion and $13 billion when complete.

Foster & Partners is keen to create a ground-breaking development that provides new high standards of modern living in Saudi Arabia.

Foster & Partners has created some of the world's most impressive modern architecture, including the glass dome over Berlin's Reichstag, Hong Kong's airport and Bilbao's new Metro. Nigel Hugill, the former managing director of Chelsfield, the property company formed by Elliott Bernerd, was instrumental in getting Bovis Lend Lease involved with the Saudi housing project.

Saif Durbar, who helped to set up the Saudi Construction Group, is a low-profile Middle Eastern businessman who has helped to fund a string of property development projects in Britain and mainland Europe, including Palm Beach, a casino and hotel complex outside Cannes. He lost a $1 billion fortune in 1995 on a bond deal that went wrong.

Details can be found at:

http://businessdistress.wordpress.com/2009/08/21/saifee-durbar-case-study-in-recovery/

He is also planning to build a railway linking Cameroon and Sudan. This will enhance African self-sufficiency as it will use minerals and other raw materials from the Central African Republic. The eastern terminus in Sudan will also provide a source of aid for the people in Darfur.

SARL NEWS SUNDAY 25 OCTOBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a webstream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your news reader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325, 14,235, 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750, 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit).

SILENT KEYS

It is with regret that w[illegible] have to announce the passing away of two radio amateurs recently. They are:

Johannes (Jan) Gijzen ZR6ANB, on the 27th of September. He leaves his wife Elizabeth behind.

Chrissy Williams, ZS6JX, on 8 October 2009. She was the wife of, Dave, ZS6JW.

We extend our sincerest condolences to their relatives and friends.

(PAUSE) In the news today:

SUMBANDILASAT NOW PROUDLY DESIGNATED SO-67

AMATEUR RADIO WOOED KIDS AT HMO SCIENCE ADVANCEMENT DAY

MEMBERSHIP CREEPING BACK SLOWLY TO LAST YEAR'S HIGH

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

SUMBANDILASAT NOW PROUDLY DESIGNATED SO-67

Following successful initial testing of SumbandilaSat's amateur radio payload, AMSAT NA has designated the amateur payload as SO-67. SO-67 is not yet released for general use as testing by the ground station and a few strategically placed radio amateurs is continuing.

SA AMSAT is proud that South Africa has achieved two OSCAR satellites (OSCAR = Orbiting Satellite Carrying Amateur Radio). The first one was SUNSAT OSCAR 35 (SO-35) which served the amateur community world-wide well.

Testing of SO-67 will continue for some time. When all tests have been completed and the SunSpace team have tested all the other payloads satisfactorily will an operational schedule be published at which time the satellite will be released for general use.

Initial tests have shown that SO-67 frequencies are slightly lower than the published frequencies. The best results have been obtained on 145,875 MHz. As testing and commanding continues the best advice is tune around 145,880 MHz

Where possible the times that SO-67 will be switched on for testing will be published on www.amsatsa.org.za. Send in reports to saamsat@intekom.co.za.

HOME CONSTRUCTION COURSE UPDATE

The SARL Home Construction course to be held on 21 November in Gauteng has been fully booked and no more registrations can be accepted. The Cape Town event is filling up fast but there is still space, so also for Port Elizabeth and Durban. Visit www.sarl.org.za for more details and a list of confirmed registrations. To get to the home construction course page click on activities, select RTA then for the link.

AMATEUR RADIO WOOED KIDS AT HMO SCIENCE ADVANCEMENT DAYS

Fox hunting and other amateur related activities wooed the kids at the HMO Science Advancement days. John and Lynn Willescroft organized various activities. John reports that the 450 MHz licence free foxhunt receivers and transmitters worked very well with no reflection problems and the receivers were very good in demonstrating the principle of the Yagi antenna.

John told SARL News "We first assembled the folded dipole and showed the pattern against a transmitter, we then added each element in turn and demonstrated how the antenna pattern changed. It made clear and precise patterns for each element added and. The kids commented that they had never seen it work before. In a letter the Managing Director of the HMO, Dr Sandile Malinga, wrote "On behalf of the Hermanus Magnetic Observatory (HMO) and the National Research Foundation (NRF), I would like to express our sincerely gratitude and heartfelt appreciation to you for visiting the HMO and running the fox hunting activity. The event was enjoyed by all and went a long way in showing the young ones that science can be fun. My daughter enjoyed it greatly; she was still talking about how enjoyable the hunt was at home at night. It is things like these that make a lasting and positive impression in these young minds and advance science for our future."

Thanks to John and Lynn for flying the flag high.

MEMBERSHIP CREEPING BACK SLOWLY TO LAST YEAR'S HIGH

The current paid-up membership of the SARL stands at 1 243 which is still below the figure with which we ended at the end of June when the new subscriptions were due. If you have not paid your renewal do it now. It is never too late to support the national body for Amateur Radio in South Africa. Annual subscription for an ordinary member is only R340, which if you think about it, is less than R1 per day, little enough to protect the hobby that you have invested so much in.

If you need details on how pay electronically, call Mariska on Monday at 011 675 2393 or drop an email to admin@sarl.org.za.

This week we welcome the following new members: ZR6SRA, Bertrand Ford; ZS1PN, Pieter Nel; ZU5WLD, Wesley Du Preez; ZR6MP, B.P. Meyer; ZR6KHN, K.H Niewenhuis; ZU1K, Renier de Jager; ZU1V, Victoria de Jager; ZU1PPG, Tiffany de Jager; ZS6CO, L Jerman Luckertz; ZR6KBS, Johannes H van der Westhuizen. We wish them a happy association with the SARL.

COMPETITION NEWS

JOHN VORSTER TECHNICAL HIGH SCHOOL 40 m PHONE COMPETITION

1. Aim. This is a fun activity to promote contacts between radio amateurs under the age of 26. 2. Date and Time:31 October 2009 from 08:00 to 10:00 UTC [10:00 to 12:00 CAT]. 3. Frequency: It is a phone contest on the 40 metre band [7,130 to 7,200 MHz]. 4. Categories: a. Class B, ZU Licence Holders; b. Class A, ZR and ZS Licence holders. 5. Power: a. Class B = Max 20 W; b. Class A = Max 100 W. 6. Exchange: The exchange is a RS report and the operator's age. 7. Scoring: QSO between two stations that are under the age of 26 = 5 points; QSO between a station under 26 and a station over 26 = 3 points; QSO between two stations older than 26 = 1 points; QSO with ZS6JVT = 10 points. 8. Log Sheets: Log sheets and summaries shall be submitted within 15 days after the contest and can be sent by e-mail to telesat@cybersmart.co.za or by snail mail to the JVT Youth Competition, Technical High School John Vorster, P.O. Box 31 714, Totiusdal, 0134. The age of the operator must be shown on the summary sheet. Closing date for log submission: 15 November 2009. 9. Certificates: The five highest scores in each class will receive Certificates. 10. Prizes: There will be a lucky draw between all the Logs received.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at very low levels. There was a sunspot trying to form in the northern hemisphere but currently the visible disk is spotless.

20 and 15 m will provide best opportunities for DX with 10 m showing signs of waking up in the afternoons. Conditions to the East and the West will be good from the afternoons onwards. During the late afternoons and early evenings it will be good towards Europa.

In the mornings it may be possible to make contacts with Australia on 20 m. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with New-Zealand are going to be challenging. During the afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

This is what Hannes had to say about DX conditions. Listen now what did happen during the past week: "To his surprise Ean ,ZS1PR, heard John, ZS4S, in a SSB QSO with a Canadian station on Tuesday evening (20th) at 19:55 CAT. When the Canadian station signed off at 20:00 Ean called John and a contact with reports of 55 in both directions resulted.

Then John turned his Cubical Quad towards Cape Town and the signal strengths increased to over S9 in both directions. At times John's signal was S9+30 with Ean".

Later they were joined by Shane, ZS4TW, Henk, ZS1ACD, and Dennis, ZS1AU. When they signed off at 21:10 signals between Cape Town and Bloemfontein were still good.

Ean also reports that 20 metres in Cape Town are open for DX virtually every evening till around 22:00 CAT.

Back to Hannes. Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

25 October - Special event station ZS3SKA, the Square Kilometer Array station still on the air today; 26 October - Lecture "Make use of Virtual Worlds" Cape Town in Lecture Theatre Complex, Cape Peninsular University of Technology 17:30; 31 October - ZS6PTA Mega flea market at the Pretoria Motor Club in Silverton from 08:00 to 11:00; 31 October - Youth competition of HTS John Vorster on 40 m, 08:00 to 10:00; 21 November - Home Construction course, Gauteng, at the NARC.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to the Amateur Radio Mirror International programme every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 570 kHz. There is also a podcast by ZS6RO. For the webstream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League,
which was compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

2345. IRTS Radio News Bulletin, Sunday 25th October 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-25 20:00:22 UTC

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 25th October 2009

DX contesters killed in plane crash

The tragic news is that four members of the C6APR DX team perished when their light aircraft crashed soon after take-off in South Carolina.

They were heading to Crooked Island in the Bahamas for this weekend's CQ World Wide Contest, a location used on seven previous occasions by the team since 2006 including in the CQ WW and IOTA contests.

Killed were the pilot Pete Radding W2GJ, Ed Steeble K3IXD, Randy Hargenrader K4QO and Dallas Carter W3PP. Our thoughts are with their families at this time.

Train the Trainers

The Society is considering running a "Train the Trainers" session for theory tutors intending to run classes and who wish to use the Society's CD Exam Course Guide. This may also be of interest to those unable to attend classes and who wish to use the Guide as a study aid for the Theory Examination.

The two-hour session would most probably take place on a weekend afternoon and would demonstrate how best to use the CD Guide and also practical matters relating to preparing students to sit the Exam. If you are interested in participating in such a Training Session please drop an email to Paul EI2CA or Seamus EI8BP or indeed any of the Committee Members. Their contact details are on the IRTS website and in the latest issue of Echo Ireland.

Affiliated Clubs

Affiliated Clubs are reminded that they are entitled to send a representative to IRTS Committee meetings.

The next Committee meeting will take place next Saturday 31st October in the Port Laoise Maldon Hotel at 11am. The meetings usually finish by 1pm and it is an opportunity for Clubs to participate in the Committee process.

CQIR Contest

Following the success of the first CQIR contest held during the IRTS 75th Anniversary celebrations in 2007, the Society's Committee at their last meeting discussed requests from at home and abroad for a repeat event. You may recall that this HF event celebrated the Irish diaspora overseas and gave an opportunity for those with green blood in their veins to enjoy a Worldwide Irish Contest.

The committee decided to consider running the event every five years on a weekend close to St. Patrick's Day which would mean that the next event would be in March 2012 to coincide with the IRTS 80th Anniversary celebrations. We can also look forward to improved Solar Cycle conditions by then.

The Committee will consider revising the rules based on lessons learnt during the first event. If you have any suggestions or comments please forward them to the Contest Manager, Thos EI2JD.

GlobalSET 2009

Global Simulated Emergency Test Saturday

IARU Region 1 invites the HQ-Stations of all IARU member societies and stations of Emergency Communications Groups to participate in a Global Simulated Emergency Test on Saturday November 14th, 2009 18.00 • 22.00 UTC.

The operation will take place on and near the emergency Centre-of-Activity (CoA) frequencies on 80, 40, 20, 17 and 15 metres (+-QRM).

This is an exercise between stations interested in emergency communications and is not a contest. Activity will be concentrated around the IARU Emergency Centre of Activity frequencies which are now incorporated in band plans around the world.

The details of the exercise will be published on the IARU Region 1 website (www.iaru-r1.org) under the

Emergency Communications Working Group section.

Dxpedition and IOTA Talk by Declan Craig EI6FR

The Mayo Club has organised Declan Craig EI6FR to give a talk the evening before the Mayo Radio Rally, Saturday 21st November. He will have an interesting account about past Expeditions and IOTAS's he has taken part in, how to plan future events and what is involved.

DXpedition to Midway Island

Midway Island, in the North Pacific Ocean, was home to a group of US and European radio amateurs earlier this month. Using the call sign K4M the team made over 60,000 QSOs during a seven day period. CW was used for over 60% of their QSOs, with 20, 30 and 40 metres accounting for most of the traffic.

Midway is ranked 13th "most wanted" DXCC entity in Europe, so there was a good deal of interest in this DXpedition from EI and GI. 18 EI and 11 MI/GI stations made contact with Midway during the month, nearly all of these QSOs being on 20, 30 or 40 metres. Top of the Irish leaderboard were John EI7BA, Nicki EI9JF and Dick GI3OQR - each with 5 band/mode QSOs in the K4M log.

SWL Activity

Brendan Nutley EI1429 has recently been involved in the SWL Category of the Sprint / Worked All Europe tests where he has Achieved 2nd place.

RSGB General Manager to visit Northern Ireland

The RSGB General Manager Peter Kirby, G0TWW will be visiting clubs in Northern Ireland in November.

He will be speaking at the following clubs and would like to meet as many radio amateurs as possible, both RSGB members and non-members alike.

Tuesday 17th November: GEARS: The Knockagh Lodge, 236 Upper Road Greenisland.

Wednesday 18th November: West Tyrone: The Technology Education Centre, Spillers Place, Omagh BT78 1FA

Times to be confirmed.

For further information please Email:: mi5jyk at rsgb.org.uk

YI/KV4EB DXCC credits

Bill Moore, NC1L, ARRL Awards Branch Manager, reports DXCC credit for this operation originally noted dates from April 20, 2003, to November 28, 2003.

An update to this operation has been received and the DXCC approval dates are now from April 20, 2003, through January 9, 2004.

This credit is only if your QSO falls within the date period noted above. The email address to send the details to for the above credit is dxcc /at/ arrl.org

---

Visitors to EI

Oliver EI/ON4EI is back in Ireland until the 26th October 2009 to enter the CQ WW DX SSB 2009 from the top of Benneshill.

Marc EI/W4MPS is currently visiting also until the 26th of October and has been worked by EI's on the AO-51 Satellite from his location in the Fermoy area. Marc hopes to be active on the low bands also during his visit.

Tipperary Amateur Radio Group

The 2009 Annual General Meeting of the Tipperary Amateur Radio Group will take place on Thursday the 5th of November at 8.00 pm in Raheen House Hotel, Raheen Road, Clonmel. All are Welcome.

Rallies

Sunday 1st November 2009 Foyle and District ARC Rally Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA (same hotel as last year)

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

For more information on Rallies please check the
IRTS website.

2346. [RAC-Bulletin] IARU Announces “GlobalSET 2009”

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-27 16:13:13 UTC
From: rac-bulletins@eton.ca
Message-ID: <4AE71BB3.4060006@rac.ca>
Source record: 6310
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

IARU Announces ï¿½GlobalSET 2009ï¿½

On Saturday November 14, 2009, from 1800 to 2200 UTC, the
International Amateur Radio Union will activate ï¿½GlobalSET
2009ï¿½, a Global Simulated Emergency Test that encourages Hams to
pass simulated emergency traffic using standard National Traffic
System format.

The Radio Amateurs of Canada, a member society of IARU Region 2,
encourages all Canadian Radio Amateurs having an interest in
emergency communications to participate.

Rules and a list of participating stations may be found at
http://www.iaru-r1.org. Search under the heading, ï¿½Emergency
Communicationsï¿½, working group.

This is great opportunity for RAC members to observe and
practice important traffic passing skills that are so important
to the fundamentals of the Amateur Radio Emergency Service.

Those Amateurs planning to participate are requested to register
with the RAC Vice President for Field Services as soon as
possible by emailing vo1dtm@hotmail.com .

Doug Mercer VO1DTM (RAC CEC)

Vice President Field Services

Radio Amateurs of Canada Inc.

2347. FS: NEW Minicircuits ZKL-1R5 RF MICROWAVE AMPLIFIER(s) 10MHz-1.5GHz. $38.70 or $50 on Ebay [LOT of TEN, ZKL1R5]

Newsgroup: rec.radio.amateur.misc
Date: 2009-10-28 21:08:22 UTC
From: Mark Levitski <Stars@nyc.rr.com>
Message-ID: <cd9c7e23-0258-4708-b2f0-931c2fc23e7b@2g2000prl.googlegroups.com>
Source record: 6311
Cross-posted to: rec.radio.scanner,rec.radio.amateur.misc

LOT of TEN or Singles.
Minicircuits ZKL-1R5 [ZKL1R5] RF MICROWAVE AMPLIFIER(s), Wideband 10MHz-1.5GHz.
High-end Amps, MedPower +18.7dBm, LowNoise 3dB, Gain 39-40dB. NEW - in original Minicircuits/antistatic packaging (never used, USA origin & location, ships worldwide).
Either Singles or entire LOT (price shown for a Lot, but message us if you want single(s) - shipping is CHEAPER than shown ($5.20), etc. however on a quantity basis you save by dealing as a Lot, not Singles - message us if you just need a few, not all 10 units).

Posted on Ebay, item# 330371507322 - goto www.ebay.com & enter 330371507322 into search. "BuyNow" OPTION is AVAILABLE - NO need to wait for Auction ending.
Contact via Ebay (best) or Email. By Email, can hit "Reply" in Newsgroups but REMOVE "nospam" strings if appears in my address (edit address manually, but sometimes it’s already done) so I could respond from a real address/name. Do NOT reply on Newsgroups (I posted here, but will NOT read), and if I get much spam that address will be DISABLED, so you'll have to communicate via Ebay (which, incidentally, is more secure anyway). My Ebay feedback is 100% positive, not to mention 14 YEARS of Newsgroups trading without complains. Again, description is on Ebay but a few facts are copied here (for convenience):

** TECHNICAL SPECS:
A DATASHEET PDF is at manufacturer's site www.minicircuits.com-->enter "ZKL-1R5" into search--> datasheet (do not omit dash, ZKL1R5 instead of ZKL-1R5 will result in an error); so only a few specs are copied below. Finally, check the price Minicircuits is asking - $150/unit, we're asking $39 "auction start" & $56 "buynow" options - new/sealed units but @33% cost (reason to sell is explained below)
** PHOTOS are at EXTERNAL SERVER (as I CANNOT POST on EBAY for free beyond 1st free photo); at http://photos.starium.org ----> select Gallery named "Minicircuits ZKL-1R5"..
• Wideband, 10MHz to 1.500 GHz
• IP3 +31 dBm typ.
• LowNoise 3 dB typ. (not bad for a MedPower amp, rather than dedicated LNA)
• Gain 40 dB typ., Flatness 1.2dB
• VSWR IN 1.4, OUT 1.6
• P1dB Compression Point +15dB min, however charts indicate 17.6 to 18.7dBm

• Connectors - SMA (50 Ohm impedance), gold-plated.
• DCpower +12V nom @115mA max, but will take a range of 9-13V or wider.
• More data, plots, etc. are in a datasheet (PDF) downloadable from manufacturer's website.
Example of applications: communication systems e.g. cellular, satellite distribution, GSM/ISM; Radars, we're using them in a Middle-Stage Amplifier block in an MRI (magnetic) scientific instrument.

** REASON to SELL::
Our RF Engineer has changed Product design in which this amplifier was previously used (a scientific instrument); so not all purchased lots of ZKL-1R5 could be finished before new design "kicked in". In the new design, ZKL1R5 overloads the newly designed next amplifying stage (which became more sensitive) & we don't know a clean way to attenuate ZKL1R5's gain (38-40dB!, lowering powersupply is not a solution & not enough). So instead we switched to using ZFL-500 amps with lower gain & narrower bandwidth (0.5Ghz, in fact all we need is 0.2GHz, not even 0.5GHz). Minicircuit's policy is not to take them back & it's laborious to try to retrofit these into a new system - it's better if we simply sell, at a loss or not, but it's easier. We're already stocked on 60 ZFL-500's, so design change is permanent/verified.

I, in fact, come from a competing RF company (not to be mentioned) so not interested in promoting Minicircuits, but this is one of Minicircuits better models; as far as I know it's using Gallium/Indium PHEMT/etc. FET’s or something to that effect, not surprising but $150 price is already difficult to attain, yet we ask even 3-4x times less or to exchange for ZFL500 (Minicircuits said ‘no”). It's a pity at the new company where I moved in 2008, which is using RF Amps (not designing them), we cannot use ZKL1R5 due to gain excessive for a new design (was normal in an older design), also we decided don't need 1.5GHz expensive amps considering our signals are under 200MHz.

P.S. Again, more photos are at that http://photos.starium.org site - pictures are better than a lengthy verbal description.

==> + OPERATING: CHANGES FOR THE 2009 NOVEMBER SWEEPSTAKES

Next month, amateurs throughout the US and Canada will take part in the
longest-running domestic contest, the 76th ARRL November Sweepstakes.
Since 1930, this tradition in Amateur Radio has brought out all kinds
of amateurs -- from seasoned contest veterans to neophytes, from
long-time traffic handlers to operators new to HF. The CW running of
Sweepstakes takes place next weekend, November 7-9, while the SSB
weekend is November 21-23. Each event runs from 2100 UTC Saturday until
0300 UTC Monday. All entrants may operate 24 out of the 30 hours. Click
here <http://www.arrl.org/news/stories/2009/10/28/11166/?nc=1> for more
information, including changes to the log submission deadline.

==> + PUBLIC SERVICE: FCC ISSUES FIRST WAIVER FOR GOVERNMENT-SPONSORED
DISASTER DRILL
```

On October 27, the FCC's Wireless Telecommunications Bureau (WTB) granted the first waiver that allows amateurs who participate in a government-sponsored emergency preparedness and disaster drill to communicate on behalf of their employers during the drill. The waiver request was made on behalf of the Commonwealth of Kentucky. That state conducted a full-scale exercise on Wednesday, October 28, 2009 from 8 AM-5 PM (EDT) to test their emergency response to the possible release of chemical agents at Blue Grass Army Depot, located near Richmond, Kentucky. Click here <http://www.arrl.org/news/stories/2009/10/28/11165/?nc=1> for more information.

==> + PUBLIC SERVICE: SANTA CRUZ COUNTY HAMS CALLED TO ASSIST DURING WILDFIRES

Almost 20 years to the day since the Loma Prieta Earthquake shook California's Bay Area, a wildfire was burning through Santa Cruz County (approximately 75 miles south of San Francisco) just miles from the epicenter of the quake that caused part of the Bay Bridge to collapse. Just as Amateur Radio operators responded to calls for assistance for the earthquake, 20 years later on October 25, they responded when needed for a 485 acre wildfire. Click here <http://www.arrl.org/news/stories/2009/10/29/11168/?nc=1> for more information.

==> + THE DOCTOR IS IN: ANTENNAS FOR DOMESTIC CONTESTS

By ARRL News Editor S. Khrystyne Keane, K1SFA

Just the other day, the Doctor and I got to talking about ARRL Sweepstakes <http://www.arrl.org/contests/rules/2009/novss.html>. I showed him my crystal mug and whisk broom from last year's Sweepstakes running (the W1AW team did quite well), and he showed me what kind of antennas I should look into for domestic contests. Being more of a DX RTTY contester, I really don't know much about the domestic side of things. I dabbled in the February NAQP RTTY Contest <http://www.ncjweb.com/naqprules.php> last year from K1TTT <http://www.k1ttt.net> -- and will do so again in 2010 -- so I made sure to listen attentively. Here is what the good Doctor had to say:

<http://www.arrl.org/news/files/DoctorARRL_Letter102909Figure1.pdf>
Each contest brings its own special requirements to the antenna designer. While many popular contests focus on communications outside North America and require the ability to send signals to all points of the compass, Sweepstakes is different, with a need to cover just the US and Canada. That means generally shorter range contacts and contacts in a limited range of directions, depending on station location.

In addition, points are gathered based on individual contacts multiplied by ARRL Sections. Thus, it is desirable to have the capability to reach all 80 sections on at least one band that will have propagation available. ARRL Contest Manager Sean Kutzko, KX9X, notes that many a contest superstation's secret weapon for Sweepstakes is a

40 meter dipole up between 25-30 feet. He says 40 meters is the Sweepstakes "money band" -- you can get close-in contacts during daylight and rake in the distant Sections when the band goes long in the evening hours. He said he had never put in a serious effort at Sweepstakes without a low dipole for 40, no matter how much aluminum he had up in the air.

<http://www.arrl.org/news/files/DoctorARRL_Letter102909Figure2.pdf>
Another great solution is a multiband Yagi that can be pointed towards the areas with the best propagation. If possible, have it relatively low -- perhaps at a half-wave length above ground -- to be able to cover the close-in stations, as well as those at the continent's far edge. Obviously, from the Central US or Canada, distances tend to be shorter than they are from the coasts with stations near the edges better able to make use of higher antennas. If you have the ability to try different heights, by all means try lowering your antenna from the optimum height for transcontinental contacts and see what works best for you.

If you're like me and don't have rotatable HF arrays available, all is not lost. First you need to figure out what azimuths you need to cover and then try to match those to fit your location. From my Connecticut location, I would want to cover from the direction toward old friend Don, WT1I, in Ocala, Florida (bearing 214Â°) up to Mark, KL7TQ, my old Army buddy in Eagle River, Alaska (322Â°).

There are many ways to compute the bearing to a station. The easy way out is to just use www.qrz.com <http://www.qrz.com/>. If your listing includes your latitude and longitude, bringing up another station and "looking at the details" will provide you with the bearing to their station. If you don't know anyone at the edges of the desired coverage area, just put a city name in the "Name Search" function and pick one that comes up. It doesn't get much easier -- or, if you must, you can use spherical trigonometry.

<http://www.arrl.org/news/files/DoctorARRL_Letter102909Figure3A.pdf>
Using my station as an example, the range of bearings I want to cover requires a beamwidth of 322Â° minus 214Â°, or 108Â°. A half-wave dipole at a height of half a wave length has a -3 dB beamwidth of 87Â° (see Figure 1). At a width of 108Â° it's only down to -4.6 dB from the peak. That's pretty close, and might be good if I had a lot of distant stations behind me, as in Central US or Canada, but I don't.

If I were to put a wire reflector, 5 percent longer than the original dipole, 6 feet behind it (for 20 meters), I would have an easy to deploy 2-element Yagi with the pattern shown in Figure 2. To make it resonate in mid band, I need to trim about 4 inches from each end of the now driven element and I'm good to go. Note what I have -- a bit more gain in front, a lot less in the back, but still plenty of signal toward northern New England. My signal at the edges of my coverage area is now stronger than the dipole's -3 dB points.

If I don't have many stations to my rear, an additional 1 dB of forward gain can be achieved at the expense of rearward signals (see Figure 3) and a higher SWR by shortening the reflector a few inches -- about 2.5 percent over the driven element should do the trick. This may be worthwhile if you are right at a corner of the country. For more bands, just use parallel elements and multiple reflectors. See the article <http://www.arrl.org/tis/info/pdf/0111035.pdf> by Marcus Hansen, VE7CA, to get the idea. Azimuth plots represented in Figures 1, 2 and 3 represent the output from the EZNEC antenna modeling software <http://www.eznec.com/> by Roy Lewallen, W7EL.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + DID YOU KNOW?: ARRL SWEEPSTAKES

The ARRL November Sweepstakes was once called "The January Contest." First held in 1930, the first running of what we know of today as ARRL Sweepstakes, last two weeks. J. F. Feely, W1ADW, of Danbury, Connecticut, came in first place with 153 contacts in 43 Sections, giving him a score of 13,158 points. Click here <http://www.arrl.org/news/stories/2009/10/29/11170/?nc=1> for more information on this event, now in its 76th running.

==> + PRODUCT REVIEW: A "SNEAK PEEK" AT DECEMBER QST

<http://www.youtube.com/watch?v=IX6f6SktdLA> ARRL Test Engineer Bob Allison, WB1GCM, offers ARRL Letter readers a "sneak peek <http://www.youtube.com/watch?v=IX6f6SktdLA>" at the two items featured in the Product Review column of the December 2009 issue of QST. Get up close and personal with the ICOM IC-80AD dual band handheld transceiver, reviewed by QST Editor Steve Ford, WB8IMY, and the Ten-Tec 715 RF speech processor, reviewed by Allison. Check it out!

==> SOLAR UPDATE

In for Tad "Tall chestnuts keep away the Sun and moon <http://englishhistory.net/keats/poetry/songoftheindianmaid.html>" Cook, K7RA, Steve Nichols, G0KYA, of Wymondham in Norfolk, England, gave us this report: What a week for sunspots! This was a huge surprise -- and a wonderful event for the CQ World Wide SSB DX Contest last weekend, with many stations reporting excellent HF DX, even on 10 and 15 meters. Many Southern California hams, including K6GEP, were surprised to work Romanian station YO4ATW on 10 meters in the contest. It helped that YO4ATW was operating with a tri-band beam atop a 10-story building! Look for more information in the Solar Update, available on the ARRL Web site on Friday, October 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad

Cookism" brought to you by John Keats' Song of the Indian Maid <http://englishhistory.net/keats/poetry/songoftheindianmaid.html>.

==> + ORGANIZATIONAL: ARRL PRESIDENT JOEL HARRISON, W5ZN, NOT TO SEEK REELECTION

After serving two terms as ARRL President, Joel Harrison, W5ZN, has decided not to seek reelection when his current term expires January 16, 2010. Harrison began his ARRL career as a volunteer ARRL elected official in 1983 when he became the Section Manager in the League's Arkansas Section. Subsequently, he has served as Delta Division Director and Vice President. In 2000, he was elected First Vice President; he was elected President in 2006.

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/contests/> This week, look for runnings of the NCCC Sprint on October 30 and November 5. The High Speed Club CW Contest is November 1 and the ARS Spartan Sprint is November 3. Next week, the CW portion of the ARRL Sweepstakes <http://www.arrl.org/contests/rules/2009/novss.html> is November 7-9 and the ARRL EME Competition <http://www.arrl.org/contests/rules/2009/eme.html> is November 7-8. There is another running of an NCCC Sprint on November 6. The Ukrainian DX Contest is November 7-8. The North America Collegiate ARC Championship (CW) is November 7-9. The SKCC Weekend Sprint is November 8. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> DO YOU KNOW?: A TRIVIA QUESTION FOR OUR READERS

The ARRL Sweepstakes has a long and proud history. At one point, The Philippines was a multiplier in the Sweepstakes, as was Cuba (as part of the West Indies Section). In what year did The Philippines cease to be a multiplier in Sweepstakes? When did the West Indies Section cease to be a multiplier? If you know the answer to both these questions, send one e-mail <k1sfa@arrl.org> with both answers (incomplete entries will be discarded) to ARRL News Editor S. Khrystyne Keane, K1SFA. Each entry that has both answers correct will be put into a hat and one winner will be selected to win their choice of a desktop <http://www.arrl.org/catalog/?item=1318> or pocket <http://www.arrl.org/catalog/?item=1288> edition of the 2009/2010 ARRL Repeater Directory. Good luck!

==> SILENT KEYS

Former Hudson Division Director Paul Vydareny, WB2VUK (SK): Paul Vydareny, WB2VUK, of Tarrytown, New York, passed away Thursday, October

22, from a brain aneurism. He was 65. An ARRL Life Member and member of the ARRL's A-1 Operator Club <http://www.arrl.org/awards/a1-op/>, Vydareny served as Director of the ARRL's Hudson Division from January-September 1996. Vydareny had a long record of volunteer service with the ARRL: Prior to becoming Director, he served as Section Manager of the Eastern New York Section from 1980-1996 and as Vice Director from 1987-1996 (Vice Directors were once allowed to serve simultaneously as Section Managers). Vydareny -- who was elevated from Vice Director to Director when then-Director Steve Mendelsohn, W2ML (ex-WA2DHF), was elected ARRL First Vice President -- resigned as Director in 1996, citing job and church obligations as preventing him from doing what he considered "a proper job of fulfilling his duties as Director."

Former San Diego Section Manager Paul Thompson, N6PC (SK):Paul Thompson, N6PC (ex-W6SRS), of San Diego, California, passed away Wednesday, October 21. He was 69. According to his cousin Michelle Harvey, Thompson was taking antennas off his roof on Monday, October 19, when he slipped and fell, sustaining fatal injuries. Thompson, a longtime QCWA <http://www.qcwa.org/> member, served as Section Manager of the ARRL San Diego Section from January 1971-October 1973.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, November 22, 2009, for these online course sessions beginning on Friday, December 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

==> FEEDBACK

In last week's ARRL Letter <http://www.arrl.org/arrlletter/index.html?issue=2009-10-22>, we reported that Randy Hargenrader, K4QO (SK), accompanied his friends and fellow hams Ed Steeble, K3IXD/C6AXD (SK), Dallas Carter, W3PP (SK), and Pete Radding, W2GJ/C6APR (SK), and Bob Biss, W8ZA, to the Bahamas for the 2008 CQWW SSB Contest. In fact, Hargenrader was not on that trip. We apologize for the error.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1681 - October 30 2009

Note: This weeks newscast runs 35 minutes and 16 seconds and contains three ID breaks. Newscast begins right now.

Amateur Radio Newsline report number 1681 with a release date of Friday, October 30th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Sweden says no to radio pollution from B-P-L, a new South African ham satellite gets is Oscar designation, three hams file a petition to make all emergency communications legal and the biggest yearly ham radio public service event takes place in New York City a few hours after this weeks newscast goes to air. Find out the details on Amateur Radio Newsline(tm) report number 1681 coming your way right now.

THE BPL WAR: A BIG WIN IN SWEDEN

We begin this week with news that one European nation is saying no to interference caused by Broadband over Powerline Internet access. Bill Pasternak, WA6ITF, is in the studio with more:

--

Telecommunications regulators in Sweden have withdrawn certain Broadband over Powerline or Powerline Transmission Internet access equipment from the public marketplace. A recent C-E-P-T Electronic Communications Committee report notes that the Swedish regulator ordered the sale of such gear to cease because some BPL gear pollutes the radio spectrum.

Mention of the Swedish action in withdrawing the equipment appears in the Report from the Working Group Spectrum Engineering Bordeaux, 07 11 September 2009. It gives the reasons behind the decision to impose these latest anti RF interference standards on BPL service in that nation.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

You can read the report in its entirety at

NEWSLINE FOLLOW-UP: MORE ON THE C6APR TRAGEDY

The contesting world is still in shock at the tragic news that four members of the C6APR team perished when their light aircraft crashed soon after take-off in South Carolina the pre dawn hours of Wednesday, October 21st.

Killed when the twin engine Piper Aztec PA-23 plummeted to the ground shortly after takeoff from Summerville Airport in South Carolina were the pilot Peter Radding W2GJ, along with passengers Ed Steeble, K3IXD, Randy Hargenrader K4QO and Dallas Carter W3PP.

According to news reports, Radding had been flying for over 40 years and Hargenrader was also a licensed pilot. All four were on their way Crooked Island in the Bahamas by way of Ft. Pearce, Florida, to operate the CQ World Wide DX Contest when the accident occurred. Crooked Island is a location used on seven previous occasions by the team since 2006.

The National Transportation Safety Board in Washington D.C., is the lead investigating agency. NTSB investigator Shawn Etcher said the plane banked to the left after takeoff. He said that judging by marks found on trees near the wreckage, it appears the plane climbed to an altitude of at least 90 feet before crashing. The crash scene was engulfed in flames when firefighters arrived.

Sixty-six year old Stella Bazzle lives about a half-mile from the crash site. She is quoted as saying that the plane's engines didn't sound right as it passed near her house. She described it as a roaring and grinding sound. Bazzle, then heard what sounded like two explosions, with the first one bigger than the second.

The wreckage was to have been transported to Atlanta, Georgia, for closer examination. Typically, it takes the N-T-S-B between 12 and 18 months to determine the cause of a crash, but a preliminary report is expected out shortly. (Summerville Journal, Charleston Press, others)

HAM RADIO IN SPACE: SUMBANDILASAT DESIGNATED AS SO-67

The recently launched South African SumbandilaSat has now been designated as SO-67. AMSAT's OSCAR Number Coordinator Bill Tynan, W3XO, made the designation shortly after receiving an e-mail from the secretary South Africa AMSAT requesting that an OSCAR number be allocated to the new ham radio bird. .

As previously reported, the amateur radio payload on SumbandilaSat was developed by South Africa AMSAT and incorporated by the University of Stellenbosch into the main payload. The ham radio payload was

officially coordinated through the IARU Satellite Frequency Coordination Panel with an uplink of 145.880 MHz and a downlink of 435.350 MHz.

Late word is that the F-M transponder on SumbandilaSat will be activated for the first time over North America on Saturday October 24 at 19:52 UTC. In this mode SumbandilaSat will uplink on 145.875 MHz and downlink on 435.345 MHz. A CTCSS tone of 233.6 Hz is needed to access this F-M repeater in the sky. (ANS)

**

HAM RADIO IN SPACE: AMSAT REVEALS ITS NEXT GEN CUBESAT

AMSAT will work with a university student engineering team to develop the NextGen Cubesat. Program Manager, Alex Harvilchuck, N3NP, introduced this new program at the recent AMSAT Symposium. That's where he also revealed the program goals. These include an initial analysis of ARISSat-1, analysis of the lessons learned from the renamed SuitSat 2 project and other prior spacecraft. This, to create a building block architecture for future satellites. N3NP says that NextGen will feature an open, modular, evolutionary, and documented design based on this analysis. More on this new bird is at the AMSAT website at www.amsat.org. (ANS)

RADIO LAW: GROUP PROPOSES REVISING 97:111 TO PERMIT UNRESTRICTED HAM RADIO EMCOMM

Meantime, a small group of hams has petitioned the FCC to add a new section to Part 97:111 of the Amateur Service rules. The Amateur Radio Policy Committee has filed a request to the regulatory agency to add a sub-part6 t that rule to permit any ham to participate in emergency training drills, whether or not he or she is in the employ of an entity taking pat in the exercise.

The wording that the group is proposing would permit transmissions necessary for disaster relief or emergency response, including training exercises, planning, drills or tests without regard to whether the amateur operator has related employment. This, where the transmissions are for the exclusive use of amateur radio operators for non-commercial purposes.

The request is signed by three prominent radio amateurs. They are Tom Blackwell, N5GAR, of Dallas, Texas; David Coursey, N5FDL, from Tracy, California, and ham radio educator Gordon West, WB6NOA, of Costa Mesa, California. They say that their petition is presented in what they term as Section 97 point 1 of the FCC rules. 97 point 1 defines FCC licensed amateur operators as part of a voluntary non-commercial communications service, particularly with respect to providing emergency communications.

The petition was accepted by the FCC on October 15th, but so far it has not been assigned a rule making number nor has it been released for public comment. (QRZ.com, others)

RESCUE RADIO: NEW ADVANCES IN EMCOMM FEATURED ON THE BBC

Recent developments in emergency broadband communications is the topic of a BBC interview with Mike Outmesguine KG6NHH. Outmesguine is the president and founder of TransStellar, Inc., a successful technology services company with an emphasis on wireless mobility and energy information systems.

The BBC news item says that KG6NHH has demonstrated an easy way to produce what it calls a "Network Relief Kit." This is described as an ultra portable method of connecting to the internet from almost any location in the world.

The system works by contacting one of three satellites orbiting the earth to get an internet connection. The receiver can then be plugged in, using ethernet cables, to a standard router, VoIP phone or similar devices.

The BBC says that In 2003-2004 the equipment cost some $40,000 . but these days the whole kit, Now, thanks to advances in technology the entire kit can be carried in a back-pack with its cost down to around $3,000 including the solar panel. Connectivity is said to be fast enough to watch videos on YouTube.

You can read the full BBC report at http://news.bbc.co.uk/1/hi/technology/8318156.stm The BBC Digital Planet radio interview with Mike Outmesguine, KG6NHH, is at http://www.bbc.co.uk/programmes/p004l2hz (BBC)

RESCUE RADIO: FEMA SELECTS NEXT GENERATION EAS TESTING LAB

The Federal Emergency Management Agency has selected a site for a lab to test new Emergency Alert System equipment. This as the next step to assure that the equipment fully complies with the new Common Alerting Protocol or CAP system that is still being developed.

FEMA has awarded Eastern Kentucky University a contract to test the next generation of EAS equipment to make sure it conforms with the CAP

protocol developed by the Integrated Public Alert and Warning or IPAWS System. Making equipment available that can receive a Common Alerting Protocol message is the first of several objectives that must be accomplished before FEMA adopts the system. (FEMA)

PUBLIC SERVICE: DELTA ARC TO SUPPORT MEMPHIS ST. JUDE MARATHON

The Memphis based Delta Amateur Radio Club will be providing communications support to the upcoming St. Jude Marathon. This December 5th event is sponsored by St. Jude children's' hospital. More information on the marathon is on-line at www.stjudemarathon.org. Information on the club is at www.deltaclub.org. (NF5B)

**

ENFORCEMENT: BANK OF AMERICA VS. THE FCC

It's the FCC versus one of the nations largest banking institutions in a dispute over a satellite earth station. Fred Vobbe, W8HDU, has the details:

--

Even those at the very top can hear the word no from the FCC. Take the giant Bank of America which has been told that it has to apply for a new permit to operate an Earth station because it accidentally let its old license expire.

The story goes like this. On September 10, 2009, Bank of America filed a petition to request reinstatement of its earth station license for call sign E990192, which had expired this past July 20th. Bank of America states that the oversight was inadvertent and due to a new monitoring and maintenance contract. Bank of America further explained that the new contractor has put this earth station into its database to ensure timely renewal filings in the future.

But in its October 9th denial, the FCC said that under its rules a petition for reinstatement of an expired license will be considered only if the petition is filed within 30 days of the license expiration date. It said that Bank of America did not file its petition within this time frame, nor did it ask for a waiver of this rule. So based on this it has denied Bank of America's request for re-instatement of authority for earth station call sign E990192. It also said that if Bank of America seeks regular authority to operate this earth station, it must file an application for a new license for this station.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU.

--

In rendering its decision the FCC did say that the bank can file for a Special Temporary Authority to operate the station that the agency

indicates that it will be granted. (FCC)

NEWSLINE FOLLOW-UP: AMAZON PAYS $150,000 TO SETTLE KINDLE SUIT

Amazon has agreed to pay $150,000 to settle a tort action filed by 17 year old Justin Gawronski. He's the Michigan teen who sued the online retailer after George Orwell's novels "1984" and "Animal Farm" along with his homework were deleted from his Kindle electronic book.

The Orwell novels had been added to the online retailer's site by a company that did not have the rights to sell them. In mid-July, with no notice to customers about the error, Amazon remotely deleted the e-books. Gawronski was adversely affected when the deletion also partially destroyed his homework.

The money, after going to the law firm representing the teen, will be donated to charity. Gawronski had already been compensated for the loss with a $30 gift certificate. (Published news reports)

RADIO RESEARCH: OLD LOGS NEEDED T STUDY THE EARLY 20TH CENTURY

Researchers at the University of Wisconsin and Miami University of Ohio are seeking copies of amateur station logs from 1913 through 1927. This, in hopes they may offer insights into the relationship between individuals' work and leisure activities, technology, and their social networks of he era.

Phil Kim is an Assistant Professor at the Wisconsin School of Business. He notes that diaries, letters, QSL cards and station logs can contain valuable insights into the link between an individual's occupation, hobbies and friends.

Kim notes that early in amateur radio history, thousands of ham radio enthusiasts were licensed by the government to comply with the Radio Act of 1912. At that time and due to newly enacted rules, that those early hams began to more carefully document the new communications era.

In an effort to uncover new information about approaches to work and leisure time and the development of social networks, Kim and other researchers are comparing early ham licensing records from the Department of Commerce with detailed information in amateur operators' station logs. If you happen to have an old ham station log from that period that you would like to see included in the study, please contact Steve Johnston, WD8DAS, via e-mail to johnson at wpr dot net. (WD8DAS, QCWA)

NAMES IN THE NEWS: KB2GSD PERSONAL PAPERS GO TO HIS COLLEGE

The estate of the late Water Cronkite, KB2GSD, has made public. The retired CBS newsman has bequeathed his college alma mater what amounts to a treasure trove of papers and memorabilia chronicling his career.

Cronkite dropped out of the University of Texas at Austin in 1935 as a junior. Instead, he decided to pursue a career in the news business but the broadcasting legend never abandoned his Texas-based educational roots.

According to his last will and testament now on file at Manhattan Surrogate's Court, KB2GSD bequeathed his personal papers to the university. This is really a process that actually started before his death on July 17 but will now end with the release of materials he had held onto at his office and homes in Manhattan and on Martha's Vineyard.

After becoming a television anchor, Cronkite returned often to campus as a lecturer and lent his announcing skills to the university as the narrator of ads that are still used at athletic events and to promote Longhorn accomplishments. (Published reports)

**

NAMES IN THE NEWS: TAPR ELECTS NEW OFFICERS

Tucson Amateur Packet Radio has elected Steve Bible, N7HPR, as it new President. Other leadership positions include Scott Cowling, WA2DFI, as Vice President; Tom Holmes, N8ZM, as Treasurer; and Stan Horzepa, WA1LOU, as Secretary. TAPR also recently elected three new members to their Board of Directors. They are Scott Cowling, WA2DFI; John Koster, W9DDD, and Mark Thompson, WB9QZB.

The election results were made public at the recent ARRL and TAPR Digital Communications Conference in Chicago, Illinois. At the gathering the TAPR Board of Directors of selected named Dr David Toth, VE3GYQ, as President Emeritus of the group. Dr. Toth served as TAPR President from 2005 to 2009 and as a member of the Board from 1987 through 1993 and 2004 to the present. (TAPR)

**

NAMES IN THE NEWS: DL3OAP NEW CHAIR OF DARC EXECUTIVE BOARD

Some names in the news. First over to Germany where Dr. Walter Schlink, DL3OAP has been elected as Chairman of the Deutscher Amateur Radio Club's Executive Board. He succeeds Jochen Hindrichs, DL9KCX. Hindrichs had served as Chairman since May, 2001, but decided not to run for anther term.

Also elected to the Executive Board are Steffen Schï¿½ppe, DL7ATE, Dr. Jï¿½rgen Sturhahn, DL8LE, Martin Kï¿½hler, DL1DCT, and Mitch Wolfson, DJ0QN. Wolfson who is originally from Los Angels California held the call WA6GSN. He still holds a U.S. license and the call K7DX. He's also believed to be the first non German ever elected to this post in the DARC.

The meeting where the election took place was n the city of Bad Lippspringe and took place on October on 24th. (Southgate)

**

NAMES IN THE NEWS: VE4HAY RE-ELECTED RAC MIDWEST DIRECTOR

And congratulations to Derek Hay, VE4HAY, of Winnipeg who has been re-elected as the Midwest Region Director of Radio Amateurs of Canada. Hey ran unopposed and was declared re-elected on September 16th. (RAC)

EMERGING TECHNOLOGY: COMMUNICATIONS IN A SHRIMP'S EYE

>From the technology page comes the story of the remarkable eyes of a marine crustacean could inspire the next generation of DVD, CD players and possibly telecommunications gear. This, according to a new study from the University of Bristol published in Nature Photonics. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of this fascinating story of communications under the sea:

--

The mantis shrimps used in the study are found on the Great Barrier Reef in Australia and have the most complex vision systems known to science. They can see in twelve colors while humans see in only three. Also, it can distinguish between different forms of polarized light.

Special light-sensitive cells in mantis shrimp eyes act as quarter wave plates which can rotate the plane of the polarization of a light wave as it travels through it. This capability makes it possible for mantis shrimps to convert linearly polarized light to circularly polarized light and vice versa.

Manmade quarter-wave plates perform this essential function in CD and DVD players and in circular polarizing filters for cameras. However, these artificial devices only tend to work well for one color of light while the natural mechanism in the mantis shrimp's eyes works almost perfectly across the whole visible spectrum from near-ultra violet to infra-red.

Dr. Nicholas Roberts is the lead author of the Nature Photonics paper. He says that the work of his team reveals for the first time the unique design and mechanism of the quarter-wave plate in the mantis shrimp's eye. He describes it as exceptional and out performing anything we humans have so far been able to create.

Exactly why the mantis shrimp needs such exquisite sensitivity to circularly polarized light isn't clear. However, polarization vision is used by animals for secret communication that avoids the attention of other animals, especially predators. It could also assist in the finding and catching of prey by improving the clarity of images underwater. If this mechanism in the mantis shrimp provides an evolutionary advantage, it could help scientists create better optical devices in the future using liquid crystals that have been chemically engineered to mimic the properties of the cells in the mantis shrimp's eye.

This would not be the first time humans have looked to the natural world for new ideas. In another bit of research the lobster's compound eye recently inspired the design of an X-ray detector for an astronomical telescope.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, looking at communications technology in the briny deep.

--

This new research into the amazing vision capabilities of the mantis shrimp and how it might one day improve communications in the human world was conducted at the University of Bristol's School of Biological Sciences in collaboration with colleagues the University of Queensland in Australia. (Adapted from Science OnLine)

EMERGING TECHNOLOGY: MOBILE AND HANDHELD DTV STANDARD IS APPROVED

A fast-track effort by broadcasters, transmission vendors and consumer electronics manufacturers to create a technical standard for transmitting digital TV signals to cellular telephones and other mobile devices has come to fruition. This, with the Advanced Television

Systems Committee announcing that it has approved a ATSC Mobile Digital television Standard.

The Advanced Television Systems Committee says that the mobile standard formally known as A/153 and also received overwhelming support in balloting by its full membership tallied at midnight on October 15th. The formal approval of the standard, which has been circulating in preliminary form since last November, should pave the way for mobile DTV receivers to hit retail shelves next year.

Development of the standard officially began in May 2007, when the Advanced Television Systems Committee released a request for proposals for a standard for the mobile and hand held telecasting system. It has progressed at record setting pace since then. (RW)

**

EMERGING TECHNOLOGY: ON-STAR USES RADIO TO END PURSUIT

For the first time since it was created, the On-Star highway safety system pioneered by General Motors has been used to bring an end to a high speed pursuit. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

It all took place about two weeks ago when the victim identified as Jose Ruiz, of Lindsay, California, was sitting in his Tahoe in a lighted parking lot about 3 a.m.. This, while his cousin was talking on a cell phone in the passenger seat. Out of the corner of his eye, Ruiz says that he saw a man walking toward him. The man then allegedly pointed a sawed-off shotgun at Ruiz and ordered both men to get out of the Tahoe and empty their pockets. Ruiz's cousin at first refused, but Ruiz told him to obey, knowing that OnStar could find the stolen truck with the built-in global positioning system.

The cousin relented and the man sped off in the truck. Ruiz then ran toward a nearby pay telephone to call police. As luck would have it he spotted a sheriff's deputy on her break who in turn notified the Visalia police. Officers quickly contacted OnStar and got Ruiz's permission to find the vehicle.

Police spotted it a few miles away. As officers made a U-turn to pursue it, the Tahoe sped off at a high speed. At about the same time, police dispatchers told the pursuing officers that OnStar was about to disable the stolen vehicle by radio command. It did, the Tahoe rolled to a halt, and the robber was quickly captured without any injuries except maybe to the alleged robbers pride.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The bottom line. Technology may soon make it very unattractive to try to steal a car if the thief knows that there is a 1 in 2 chance that he will be caught by radio remote control. (Future Technology)

**

EMERGING TECHNOLOGY: BOSE INTRODUCES WIRELESS STREAMING AUDIO SPEAKER

Audio equipment maker Bose has introduced its new SoundLink wireless music system. This is a one-piece portable speaker system that allows users to play streaming audio from their computer wirelessly in and around the home.

The new SoundLink system was designed as a simple solution for people who listen to sound stored on their computer, but do not necessarily want to be at their computer to hear it. No software or Wi-Fi connection is required. Just plug the included USB key into the computer, select the sound from any Internet source and the audio will stream to the SoundLink system via a long-range wireless link that works through most walls and floors.

The included infrared remote control operates the power and volume. It c an also send transport control commands to most applications, allowing users to skip tracks or play/pause from a distance. More information about this novel product is on-line at www.Bose.com (New Product News)

**

EMERGING TECHNOLOGY: FLO TV TO BE AVAILABLE BY CHRISTMAS

A new form of television will soon be at arms reach. Jim Davis, W2JKD, has the details:

--

Coming in time for Christmas is a wireless handheld TV that will have its own dedicated network. The new FLO TV Personal Television, or PTV, is a live mobile TV service from Qualcomm that is used for AT&T Mobile Television and Verizon's V-Cast.

The PTV will sell for $250, and subscriptions begin at $9 a month. FLO TV isn't saying yet what content it has lined up, but the AT&T and V-Cast products have 15 channels apiece, including CBS Mobile, CNBC, Comedy Central, ESPN Mobile, Fox News Channel, MSNBC, MTV and Nickelodeon.

Plans call for DVR functionality down the road. The big question is just how many people will be willing to pay for a service that supplies programs to a miniscule 2 or 3 inch screen.

I'm Jim Davis, W2JKD

--

The answer as to weather we will some day see a world of humans walking aimlessly down a street with their eyes glued to a tiny screen will be interesting to watch out for. And if it does catch on, then we do mean to watch out! (TV Tech)

**

WORLDBEAT: RADIO SWEDEN TO STOP QSL'ING LISTENER REPORTS

Radio Sweden says that it is discontinuing mailing QSL cards to listeners in response to reception reports. Also, the station will be discontinuing mass mailouts of its program schedules.

According to Media Network, with the start of the new transmission period on October 25th, Radio Sweden will only be publishing its broadcast schedule on the World-Wide-Web. Radio Sweden says that this is a logical consequence of the increasing importance of the Internet as a broadcast platform and because it has stopped broadcasting its own programs in the Swedish language.

The only exception is when the station receives a specific request for a printed version of its schedules Listeners can contact Swedish Radio's Listener Service department with these requests. (Media Network)

**

HAM HAPPENINGS: ARECIBO OBSERVATORY ON NOVEMBER 1st

And while this is kind of short notice, word that the second activation of station KP4AQ located at the Arecibo Observatory Radio Club will take place on Sunday November 1st. This, to commemorate 46 years of operations of still the single largest radio telescope antenna in the world. The operation will also commemorate the 35th anniversary of the Arecibo Message, which was sent on November 16, 1974,in binary code and transmitted to the globular star cluster M13. Its purpose was for if it to be received by intelligent life and to let them know about our existence. The special event will run from 1300 to 2000 UTC on 20 meters SSB. More information about the Arecibo Message is in cyberspace at at http://en.wikipedia.org/wiki/Arecibo_message (E-mail)

**

HAM HAPPENINGS: NORTH AMERICAN SUMMITS ON THE AIR

This North American Summits on the Air or SOTA activation day is Saturday, November 14th. To celebrate, the four North American Summits on the Air associations are planning a multi-hilltop activation spanning the North American continent. Portable, mountain top stations will be operating from the VE2, W1, W2, and W6 call areas. The operators will be using the extensive spotting and alerting system devised by the SOTA organization. To join in the fun, please visit the www.sota.org.uk to get the latest details. (KI6J)

DX

In DX, KL7JR reports that plans are underway for the activation of Jacquot Island before and during ARRL's December 11th to the 13th Ten Meter Contest. Listen out for VY1RST to concentrate on 10 meters for the contest and 14.260 for non-contest activities. QSL via KL7JR at his callbook address.

And ZS6TAF, who works in Maputo Mozambique from time to time will be operate mobile using the callsign C91BA. He has a Yaesu 857D and Watson mobile antenna for 80 through 6 meters. QSL via his home callsign.

A team of operators will be on the air from Arturo Prat-Greenwich Island in the South Shetland archipelago between January 10th to the 24th of 2010. Their callsign will be XR9JA. Activity will be on 160-6 meters using CW, SSB,PSK31 and the AO-51 ham radio satellite. QSL via CE5JA.

CT1DRB, is active as T6AG from Afghanistan for the next 6 months. His operation will be CW only.. QSL via EA3GHZ direct.

Lastly, N1EMC and N1IW and will be active as T30KI and T30IW, respectively, from Western Kiribati. This, between November 10th and the 16th. Activity will be on H-F plus 6 meters as conditions permit using SSB and CW. QSL via N1EMC.

(Above from various DX news sources)

**

THAT FINAL ITEM: PUBLIC SERVICE - HAM RADIO - AND THE ING NYC MARATHON

And finally, its once again time for the biggest annual ham radio public service event found anywhere in the world. The New York City Marathon began in 1970 with 127 runners, a budget of $1,000 and a small group of ARES operators who tried to provide communications. Today, the I-N-G sponsored race has grown to the status of World Class Marathon with over 38,000 runners, two million spectators and a corps of over 400 ham radio volunteers holding it all together.

This years New York City Marathon takes place on Sunday, November 1st. In planning for marathon day there is a coordinated effort between the

New York Road Runners and several New York City agencies. While each agency has its own dedicated communications system, no two have the ability to talk to one another. Enter ham radio.

Since 1976, Steve Mendelsohn, W2ML, has been the volunteer Director of Communications for the New York City Marathon. He says that the hams are the only ones who can communicate with everyone involved:

--

Steve Mendelsohn, W2ML: And the reason we can communicate with everyone involved is not because of the iron, its not because of the radios -- its because of our skills. As technology has advanced and we have brought in the use of cellphones and the use of the Nextel system and trunked radio, time and again, marathon organizers from the original Fred Lebow through his successor Alan Steinfeld, W2TN, to todays New York City Marathon Director Mary Wittenberg all say the same thing: '-you can by any amount of radios with any amount of money, but all the money in the world won't buy the skills the ham radio community has.' "

--

Mendelsohn's words have long been echoed by Paul Ortolano, who is the events director for the New York Road Runners. In a 2007 interview, Ortolano told the Hofstra Chronicle newspaper that amateur radio operators are the key source of communications for the marathon. He said that the marathon cannot happen each year without the dedication of the ham radio community. Ortolano called them the eyes and ears of the event and Mendelsohn is quick to agree:

--

Steve Mendelsohn, W2ML: "The New York Road Runners cannot put staff out there nor can the New York Police put the quantity of staff that we use with over 400 ham radio operators providing eyes -- walking quarter mile segments of the course, patrolling for fallen runners. We have the the hardware. We have the expertise and the New York City Marathon has long said very, very good things about our operation."

--

In addition to his volunteer work with the NYC Marathon, Steve Mendelsohn, W2ML, is a senior engineer at the ABC Television Network in New York. He is the recipient of a Technical Emmy for his part in ABC's special turn of the century telecast titled "2000: Millennium Around the World." And to top it off in 1990 he was named Hamvention Radio Amateur of the Year for his development of the ham radio communications network that keeps the New York City Marathon on track. He became involved with the marathon when its founder, the late Fred Lebow came to a Tri-State Repeater Council meeting looking for an amateur radio expert. Steve said that he didn't exactly volunteer. Rather he was volunteered by the other hams at the repeater coordinators gathering:

--

Steve Mendelsohn, W2ML: "In point of fact, I listened to the late Fred Lebow talk about shutting down the city, running a huge number of people -- I think the original number was about 1300 -- through the streets of the city -- and I turned to the then president of TSARC and I said that this man is out of his mind. I then excused myself to go to the mens room. When I came back the first thing that struck me was listening to Fred talk about how excited he was to work with us and the fact that amateur radio was going to provide a very, very important safety point for the New York City Marathon. I casually sat down, turned to the president and said '-who would volunteer for something like this?' He smiled and said '-the one that was out of the room.' And to this day I have never volunteered."

--

Since then, W2ML has been the New York Marathon Director of Communications. Under his aegis, the ham radio communications network for the event has grown in size to become the largest all volunteer ham radio communications group found anywhere: --

Steve Mendelsohn, W2ML: "We are very fortunate to have a lot of people who really enjoy doing public service. This year we will have over 400 hams -- I think we are up to 406 or 407 at this with the two volunteers we got tonight. They come in from Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Florida, Ohio and we even have a gentleman who comes in from Denver. K2AD comes in from the Denver Marathon to provide a hand.

"Most of us, while we all celebrate ham radio and what it can do for the running public. In fact we have become a very close knit family to the point where there is a group from Columbus, Ohio, that actually rents an RV as part of a three-day weekend, and they drive to New York. They then go into Manhattan and enjoy the city on Friday and Saturday and Sunday morning they do the marathon. Then they drive back to Ohio and that's their idea of a vacation."

--

W2ML is responsible for more than just recruiting ham radio operators. He has to know how to strategically place them in vital positions along the course. Some of these include the start and finish lines, the water trucks, the medical stations, and of coarse the checkpoints throughout the race path.

This year Mendelsohn expects to have volunteer operators from nine different states. Many of these are the same volunteer ham radio operators that placed their own lives on the line to assist following the attack of the World Trade Center in 2001. That act of terrorism also destroyed the ability for police, fire and rescue workers to communicate in lower Manhattan. Jumping in immediately as communications first responders were the regions ham radio operators. They volunteered their time and radio gear as substitute communications

for police, fire and other emergency agencies responding to the disaster area. The hams also served at numerous shelters and at temporary rescue stations as the only available communications. In the process earned the respect ad admiration of city, state and federal level government officials.

Since then many have been back to offering communications for the annual race through the streets of the Big Apple, but because of the lessons that they have learned over the years in service to the New York City Marathon, these hams are prepared to face just about any emergency that might come their way. (ARNewsline(tm))

GB2RS NEWS

Sunday 1st November 2009

The news headlines

* Sweden bans polluting PLT equipment

* New solar message board service

* 500th Schools contact from the International Space Station

A CEPT Electronic Communications Committee report notes that Sweden has removed from the market some of the Powerline Networking equipment that pollutes the radio spectrum. The 54th meeting of the CEPT Working Group Spectrum Engineering in Bordeaux covered recent developments of the harmonised emission standard for IT equipment EN55022. Mention of the Swedish action in withdrawing polluting PLT equipment appears under `13 EMC' in the Working Group report. If you wish to read this in full, just type `Working Group Spectrum Engineering Bordeaux' into your favourite search engine and go to the www.ero.dk reference you will see listed.

Neil, G0CAS, our solar and propagation news reporter for GB2RS, has started a new messaging board service on solar activity and propagation. People are encouraged to take a look and ask any questions relating to the terms used in his weekly report, or find the latest news on solar, geomagnetic activity and propagation. The site is at http://spotsandflares.lefora.com.

On 27 October International Space Station Commander Frank De Winne, ON1DWN, answered questions from students participating at the brand new Copernic Science Centre in Warsaw, Poland. This was the 500th School Contact since ARISS began operations in the year 2000.

The forthcoming Winter Olympic Games in Canada will be celebrated on the amateur bands. The Vancouver Olympics Amateur Radio Group will be activating three special event stations until March 2010. VG7V is on the air until 30 November, then VG7W will be on the air from 1 December until 31 January. VG7G will be on air from 1 February until 31 March 2010. Commemorative QSL cards will be available.

The Swedish Amateur Radio Society has recently announced the Marconi Nobel 100 Award. European stations outside Sweden must work, or Short Wave Listeners must hear, ten different SI stations between 9 November 2009 and 10 December 2009. SM stations may use the prefix SI and there

will be several anniversary calls on the air, SI0GM to SI7GM. Each station counts once per band. The fee for the award is 5 euro or 5 US dollars. Full details can be found on the internet at www.awardmanager.se, where you should click on the Union Jack flag.

A new technical website has been launched in Ireland, www.techtir.ie. It contains discussions, tutorials and articles on a wide range of technology subjects. There is an anti-spammer signup filter as well as Catchpa and strict Moderation, so the site should be suitable for youngsters too. Mayo Radio Experimenters are holding their annual Radio Rally on Sunday 22 November, in The Welcome Inn, Castlebar, Co Mayo. They also have an interesting evening planned for 21 November. Declan Craig EI6FR to give a talk the evening on DXpeditions and IOTA.

And now for the details of rallies and events for the coming week

Today, Sunday 1 November, the Great Northern Hamfest will take place at the Metrodome Leisure Centre, Queens Road, Barnsley S71 1AN. Opening time is 11am. There will be trade stands an RSGB bookstall, Foundation, Intermediate and Advanced licence information, special interest groups and local radio clubs. There are a limited number of tables available at a reduced price for amateurs, but not trade, wishing to sell their surplus equipment. To book a table and for any other enquiries, contact the Hamfest Manager, Ernie, G4LUE on 01226 716339 or 07984 191873.

The North Wales Radio Rally is on Saturday 31 October and Sunday 1 November in Llandudno at John Bright School, which is postcode LL30 1LF. Doors are open from 10am to 5pm both days. Talk in will be on S22. The rally is all on one level and there is disabled access. Entry is £3 and you'll find many large traders attending and there will be an RSGB bookstall as well as a Bring and Buy. For more information please contact Liz Cabban, GW0ETU on 01690 710257 or by e-mail at lizcabban@vodafoneemail.co.uk

The Holsworthy ARC Rally will take place today, 1 November, at the Holsworthy Community College, Holsworthy, Devon EX22 6JD. Doors open at 10am and the entry fee is £2. There will be trade stands and a Bring & Buy. More details from Don, G0RQL on 01409 261223.

Also today, 1 November, the Foyle & District ARC Rally will be held in the Best Western White Horse Hotel, Derry BT47 3PA. Doors open at 12 noon and there will be trade stands, special interest groups and Bring & Buy.

Now for the news of special events

Reading and District Amateur Radio Club will be running GB2RD on 31 October at the Museum of Berkshire Aviation in Woodley. The event is celebrating 75 years of RADARC and its links with Woodley. The club venue is just a few miles from the Museum and many radio amateurs have interests in aviation too. They will be operational on 80, 40, 20, 4 and 2m from 10am till 5pm. Visitors are most welcome.

Over three weekends of November, members of the Galway VHF Group will be operating an HF station for a 24 hour period from lifeboat stations in County Galway. The purpose of this operation is to promote the 185th anniversary of the lifeboat service in Ireland. The first operation will take place from the Galway Lifeboat Station over the weekend of 7 and 8 November. The following weekend, 14th and 15th, will see an operation from the Aran Island Lifeboat station at Kilronan, Inishmore. The final operation will take place from Clifden Lifeboat Station, Ballyconneely, over the weekend of 28 and 29 November. All operation will take place on the HF bands with two stations in operation at all times. There will be operation on phone and digital modes with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed.

Celebrating the British Amateur Radio Teledata Group's Golden Jubilee, Andrew, M5AEX was in control of GB50ATG last month and worked some nice DX. His activity was mainly in the CQWW and JARTS contests and all contacts were on RTTY. Andrew managed 372 QSOs in 61 countries and 5 continents. November sees G3LDI operating GB50ATG once again.

Special event station K0V will be on the air on Saturday 7 November and on Veterans Day, Wednesday 11 November. The Emporia Amateur Radio Society will be operating the K0V station from a site adjacent to the Emporia All Veterans Memorial in Kansas. The operating times will be 1900 to 2300UTC on 7 November and 1400 to 2400UTC on 11 November using frequencies of 14.268, 7.262 and 3.920MHz, ±20kHz. A special QSL card will be available.

And now the HF DX news compiled from 425 DX News and other sources.

Rick, AI5P will be signing ZL/AI5P from North Island, New Zealand between 1 and 6 November. QSL via AI5P either direct or through the bureau.

FT5WO will be active from Crozet Islands in the southern Indian Ocean until 15 November. He is usually on 17 and 20m between 0600 and 1300UTC on Saturdays and Sundays. QSL via F4DYW.

Between 7 and 16 November, EI6DX will sign /6W from Senegal using mainly the low bands and CQ. QSL via RX3RC.

In Argentina, PY2TJ will be /LU from 1 to 7 November from the Island Tierra Del Fuego. QSL via PT2OP.

VP2MUM will be on the air from Montserrat from 3 to 15 November. QSL either direct or via the bureau to his home callsign of DL2RUM.

Now the contest news

The annual contest of the International Police Association Radio Club is taking place over the weekend of 7 and 8 November. CW is on 7 November from 0600 to 1000UTC and 1400 to 1800UTC. SSB is on 8 November also from 0600 to 1000 and 1400 to 1800UTC. More details from www.iparc.de.

The 144MHz UK Activity contest and club championship takes place between 1900 and 2130UTC on 3 November. All modes can be used and the exchange is signal report, serial number and locator.

The Marconi CW Contest is on 7 and 8 November between 1400 and 1400UTC. There are four categories to enter, depending on the amount of time you can devote and whether you are a single operator fixed station or not. The exchange is signal report, serial number and locator. Internationally, the IARU 144MHz CW Contest coincides with the Marconi CW Contest and the exchange is the same. Now the solar factual data for the period from the 19th to the 25th of October, compiled on 26th of October by Neil Clarke, G0CAS.

A small single sunspot appeared on the 20th and disappeared again on the same day. However, on the 23rd, a larger spot group emerged and on the 24th had 13 spots within the group. Both groups belonged to the new cycle. Solar activity was very low but during the early morning of the 24th a C1.5 solar flare took place, lifting activity to low. Solar flux levels increased from 71 units on the 19th to 76 by the 24th. That's the highest daily figure so far this year. The average was 73 units. The 90 day solar flux average on the 24th was 69 units, that's the same level as last week. X-ray flux levels still remained below the minimum reporting level until the 25th and then increased to A1.2 units. Geomagnetic activity was quiet everyday except for the 22nd. This was due to a coronal mass ejection that occurred on the 17th and was mentioned in last weeks report. The CME travelled at 320 kilometres per second and took 5 days to travel between the Sun and Earth. This is relatively a slow speed for a CME. The Ap index on the 22nd was 14 units. This is the most disturbed day since the 30th of August. The average for the week is 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 270 kilometres per second on the 19th to 490 by the 25th. Particle densities were low except for a brief increase to 19 particles per cubic centimetre during the evening of the 24th. Bz varied between minus 2 and plus 3 nanoTeslas on the quiet days and between minus 9 and plus 10 nanoTeslas during the storm of the 22nd. People interested in the latest solar activity can visit http://spotsandflares.lefora.com/ which gets updated most days and is run by Neil, G0CAS.

And finally the solar forecast.

This week solar activity is expected to be at very low levels. Sunspots could be visible on some days. Solar flux levels should be around the 70 mark when no spots are visible and slightly higher if any spots do appear. Geomagnetic activity is expected to be quiet throughout the coming week. MUFs during daylight hours at equal latitudes should be about 22MHz for the south and 19MHz for the north. The darkness hour lows should be around 9MHz. Paths this week to Australia should have a maximum usable frequency of about 22MHz. The optimum working frequency with a 50 per cent success rate will be about 18MHz. The best time to try this path will be between 0900 and 1400 hours UTC.

And that's all for this week from the propagation team.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Monday 2 November Braintree and District Amateur Radio Society is having a junk sale. Contact John, M5AJB, on 01787 460 947. On Monday 2 November Southdown Amateur Radio Society is having its annual dinner at the Eastbourne Toby Carvery. Contact John, G3DQY, on 01424 424 319. On Monday 2 November Surrey Radio Contact Club is having a talk. Contact Ray, G4FFY, on 020 8644 7589. On Tuesday 3 November Andover Radio Amateurs Club is having an introduction to satellite working. Contact Martin, M0MWS, on 0777 618 1646. On Tuesday 3 November Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 3 November Chelmsford Amateur Radio Society is having a talk on the FlexRadio FLEX-5000A software defined radio by Gwyn Williams, G4FKH. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 3 November Dover Radio Club is having a natter and operating evening. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Tuesday 3 November Horndean and District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846. On Tuesday 3 November Leiston Amateur Radio Club is holding its AGM in Room 63 of Leiston High School. Contact Dave, G4HUP, on 01473 737 717. On Wednesday 4 November Chesham and District Amateur Radio Society is having a general meeting. Contact Terry, G0VFW, on 01442 831 491. On Wednesday 4 November Havering and District Amateur Radio Club is having a talk on eBay for dummies by Rob, M0MCP. Contact John, M0UKD, on 07817 365354. On Wednesday 4 November Norfolk Amateur Radio Club is having a visit from RSGB President Colin Thomas, G3PSM. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 4 November Southdown Amateur Radio Society is operating G3WQK at Hailsham shack. Contact John, G3DQY, on 01424 424 319. On Wednesday 4 November Worthing and District Amateur Radio is having a discussion evening on wires, poles and aerials. Contact Roy, G4GPX, on 01903 753 893. On Thursday 5 November Basingstoke Amateur Radio Club is having tales of the unexpected by Tim Doncaster, G3PJD. Contact Clive, G4ODM, on 01256 326050. On Thursday 5 November Cray Valley Radio Society is having a natter night. Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm. On Thursday 5 November Horsham Amateur Radio Club is having a talk on electrical oddities by John Narborough. Details on the web at www.harc.org.uk. On Thursday 5 November King's Lynn Amateur Radio Club is having a club night and 2m club net. Contact Ray, G3RSV, by email to ral-g3rsv<at>supanet.com. On Thursday 5 November Lowestoft and District

Pye Amateur Radio Club is having a shack night. Contact Phil, G0JSG, on 01502585448. On Thursday 5 November Shefford and District Amateur Radio Society is having a talk by Paul, M0PSW on power projects with a difference. Contact David, G8UOD, on 01234 742 757. On Friday 6 November Cambridge and District Amateur Radio Club is having a shack evening. Contact Lawrence Micallef, M0LCM, on 07941 972724. On Friday 6 November Crystal Palace Radio and Electronics Club is having a talk by RSGB Regional Manager Alison Johnston, G8ROG followed by a short history of power supplies by Victor, G1PKS and Bob, G3OOU. Contact Bob, G3OOU, on 01737 552 170. On Friday 6 November Loughton and Epping Forest Amateur Radio Society is having a LF night on the air. Contact Marc Litchman, G0TOC, on 020 8502 1645. On Friday 6 November Wey Valley Amateur Radio Group is having a visit by Rob Mannion, G3XFD. Details on the web at www.weyvalleyarg.org.uk. On Saturday 7 November Brede Steam Amateur Radio Society is at the bunker. Contact Steve, on 01424 720815. On Saturday 7 November Mid-Sussex Amateur Radio Society is providing radio assistance at St. Wilfrids Fireworks. Contact Sue, G6YPY, on 01273 845 103.

NEWS FOR THE SOUTH-WEST Swindon & District Amateur Radio Club are running a Foundation Licence course November 7, 16 and 21. Further information from Tony, G4LDL on 01793 525523 or by email to tony.ldl<at>ntlworld.com. On Monday 2 November Cornish Radio Amateur Club is having a committee meeting. Contact Steve, G7VOH, on 01209 844939. On Wednesday 4 November Cornish Radio Amateur Club is having a surplus sale. Contact Steve, G7VOH, on 01209 844939. On Wednesday 4 November Exmouth Amateur Radio Club is having a barbecue and fireworks. Contact Mike, G1GZG, on 01395 274172. On Wednesday 4 November Thornbury and South Gloucestershire Amateur Radio Club is having a garage sale at Stan's QTH. Contact Tony, G0WMB, on 01454 417048. On Wednesday 4 November Trowbridge and District Amateur Radio Club is judging entries for the G2BQY and G4UNU Constructor's Cup. Contact Ian, G0GRI, on 01225 864 698, evenings and weekends. On Thursday 5 November South Bristol Amateur Radio Club is having a DX challenge evening led by Len, G4RZY. Contact Len, G4RZY, on 01275 834 282. On Thursday 5 November Swindon and District Amateur Radio Club is having a talk by Den, M0ACM entitles "We CQ here, we CQ there". Contact Den, M0ACM, on 07810 317750. On Thursday 5 November Yeovil Amateur Radio Club is having a talk on short vertical antennas by Rob, G3MYM. Contact Steve Crask, G7AHP, by email to steve<at>g7ahp.co.uk. On Friday 6 November Lymington Community Association Radio Club is having a talk on the DMV Pro and Comet 250 antennas by G3ZPR. The club meets at Lymington Community Centre, Cannon Street, Lymington, Hampshire, SO41 9BQ. All radio amateurs and shortwave listeners are very welcome, and there is talk-in on S22. Details of this, and forthcoming Foundation licence courses, from Keith Cromar, G8MZF, on 02380 849395. On Friday 6 November Saltash & District ARC is holding its AGM at the Burraton Community Centre. Members and visitors are welcome. Details from Brian on 01752 844321.

NEWS FOR THE MIDLANDS On Monday 2 November Gloucester Amateur Radio And Electronics Society is having a talk on aerials by Tom, G3XMM. Contact

Anne, 2E1GKY, on 01452 548478, daytime. On Monday 2 November Leicester Amateur Radio Society is having a talk on Worked All Britain by G4IAR. Contact the duty committee member on 07804 595749. On Tuesday 3 November Derby and District Amateur Radio Society is having a junk sale. Contact Richard Buckby, by email to radio<at>dadars.org.uk. On Tuesday 3 November Loughborough and District Amateur Radio Club is having a computer problem night. Contact Chris, G1ETZ, on 01509 504 319. On Tuesday 3 November South Notts Amateur Radio Club is taking part in the 2m contest. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 4 November Lincoln Short-Wave Club is having a talk on EME by Howard Ling, G4CCH. Contact Pam Rose, G4STO, on 01427 788356. On Wednesday 4 November South Birmingham Radio Society is holding its AGM. Contact Don, on 0121 458 1603. On Wednesday 4 November South Notts Amateur Radio Club is having an Intermediate Practical Assessment by RSGB Regional Manager M0BWY. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 4 November Telford and District Amateur Radio Society is having an open house and on the air night. Contact Mike, G3JKX, on 01952 299 677. On Friday 6 November Bromsgrove and District Amateur Radio Club is operating special event station GB75XX. Contact Chris, M0BQE, on 01905 776 869. On Friday 6 November Cheltenham Amateur Radio Association is having a talk on repeaters by Steve, G4FPV. Contact Derek Thom, G3NKS, on 01242 241099. On Friday 6 November Coventry Amateur Radio Society is having a bangers and mash night. Contact John, G8SEQ, on 07958 777363. On Friday 6 November Nunsfield House Amateur Radio Group is having a talk on the NHARG packet cluster by Pete Walker and Andy Barker. Contact Ken Frankcom, G3OCA, on 01332 720976. On Friday 6 November South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND On Monday 2 November Angel Of The North Amateur Radio Club is taking to the air and continuing its Advanced Licence course. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 2 November Sheffield Amateur Radio Club is having a talk on RAYNET by G0JJR. Contact Trevor Wood, M0TWS, by email to trevorwood6<at>yahoo.co.uk. On Monday 2 November Thornton Cleveleys Amateur Radio Society is having a natter night. Contact John Foster, M3WAZ, on 01253 399377. On Tuesday 3 November Chester and District Radio Society Club is holding a review of club equipment. Contact Barbara Green on 0151 339 9183. On Tuesday 3 November Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 07852 200232. On Tuesday 3 November Otley Amateur Radio Society is taking part in the 144MHz UKAC from the shack and having technical chatter in the Village Hall. Contact Paul, 2E0PAK, on 07768 996370. On Wednesday 4 November Denby Dale Radio Club is having an introduction to amateur microwaves by Peter Day, G3PHO. Contact Gerald, G3SDY, on 01484 602905. On Wednesday 4 November Hornsea Amateur Radio Club is having an activity night. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Wednesday 4 November Mid-Cheshire Amateur Radio Society is on the air and working on the club project. Contact Peter

Paul Fox, G8HAV, on 01606 553401. On Thursday 5 November South Manchester Radio And Computer Club is having a talk and demonstration of chilli con carne for contests by Ron, G3SVW. Contact Ron, G3SVW, on 0161 969 3999. On Thursday 5 November Wakefield and District Radio Society is having a pie and peas supper at HQ. Contact Ken, 2E0SSQ, on 07900 563117. On Friday 6 November East Cleveland Amateur Radio Club is on the air. Contact Alistair, G4OLK, on 01642 475 671. On Friday 6 November Tynemouth Radio Club is having an operating night with technical topics and a Morse class. Contact Graham Errington, on 07812 172136. On Saturday 7 November Wakefield and District Radio Society is holding its Foundation Licence exam. Contact Ken, 2E0SSQ, on 07900 563117.

NEWS FOR SCOTLAND On Tuesday 3 November Livingston and District Amateur Radio Society is having a club evening. Contact Norman, on 07740 946192. On Wednesday 4 November Ayr Amateur Radio Group is having a group discussion. Contact Charlie, MM0GNS, on 01563 551704. On Wednesday 4 November Kingdom Amateur Radio Society Club is having a shack night. Contact Brian, MM0XBD, on 01383 738905. On Wednesday 4 November Paisley YMCA Amateur Radio Club is having a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633. On Thursday 5 November Aberdeen Amateur Radio Society is holding a junk sale. Contact Lewis, GM4AJR, on 01224 575 663. On Friday 6 November Cockenzie and Port Seton Amateur Radio Club is having a club night. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES The North Wales Radio Rally takes place on Saturday 31 October and Sunday 1 November in Llandudno at John Bright School, LL30 1LF. Doors are open from 10am to 5pm both days. Talk in is on S22. The rally is all on one level and there is disabled access. Entry is £3 and you'll find many large traders attending including an RSGB bookstall. There is also a Bring and Buy. For more information please contact Liz Cabban, GW0ETU on 01690 710257. On Monday 2 November Dragon Amateur Radio Club is holding its AGM. Contact Stewart Rolfe, GW0ETF, on 01248 362229. On Monday 2 November Llanelli Amateur Radio Society is having a members-only pool tournament. Contact Craig, MW0MXT, on 01269 840292. On Tuesday 3 November Carmarthan Amateur Radio Society is having Intermediate exam tuition. Contact Alastair Underwood, GW0AJU, on 01267 290822. On Tuesday 3 November Wrexham Amateur Radio Society is having a Morse exercise night. Contact Glyn, MW0BNB, via the web at www.qsl.net/wars. On Wednesday 4 November Conwy Valley Amateur Radio Club is having a talk by Safer Roads Officer Martyn Schlangen on equipment used by the police for speed enforcement and the achievements of speed cameras. Contact Wynne, GW6PMC, on 01745 855 068. On Thursday 5 November Meirion Amateur Radio Society Club is having a is having a quiz night. Contact John, MW0VTK, on 07868 738016. On Friday 6 November Newport Amateur Radio Society is having a talk on the TR4 by Ross, GW3NWS. Contact Gareth Price on 01633 880081.

NEWS FOR NORTHERN IRELAND On Thursday 5 November Bangor and District Amateur Radio Club is having its annual surplus sale. Contact Mike,

GI4XSF, on 028 4277 2383. Mayo Radio Experimenters in Ireland are holding their annual Radio Rally on Sunday 22 November at The Welcome Inn Castlebar, Co Mayo. They also have an interesting evening planned for 21 November, when Declan Craig, EI6FR, will give a talk on DXpeditions and IOTA.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

2351. Re: EMI prevention / protection?

I'm using the wein bridge to generate audio tones that are fed to the transmitter for digital radio communication (basically a homebrew ASK radio modem). I'd be open to using that, but I'm not aware of any radio modems that output square waves.

This oscillator also has 2 digital pots attached: 1 to trim the space tone, and 1 to trim the mark tone. There's a high speed switch between the two pots to rapidly switch between mark and space tones. I could use this same setup with a 555 and trim the resistor to vary the pulse duration, but I'm not sure what impact a square wave would have on transmission, reception, decoding, etc...?

Has anyone heard of a square wave being used as an audio tone for digital radio communication?

Thanks in advance,
Dave

Hi Dave, I know nothing about ASK radio modem.
I think you can get a triangle wave out of a 555 (Or some other charge/
discharge osc.) You can then low pass filter the triangle to get rid
of the sharp peaks.. There are also some trianlge wave to sine wave
converter circuits that use diodes or transistors to 'smooth' the
tiangle wave. If you don't care too much about harmonic content then
either approach may work.

RAC Bulletin 2009-034E - Canadian Experiments at 500 kHz
authorized - 2009-10-30

After months of negotiations between RAC and Industry
Canada over the details of the licence applications and
reporting conditions, the first two licences granted
to Canadians for experiments at 504 ï¿½ 509 kHz in preparation
for WRC-12 have been issued by Industry Canada (see RAC
Bulletin 2008-29).

Jack Leahy, VE1ZZ, has been assigned call sign VX9PSO in
the Developmental Service for his experimental transmissions.
Joe Craig, VO1NA, has been assigned call sign VX9MRC. Both
of these stations have been on the air already, with
VX9PSO having been reported at 504.6 kHz and VX9MRC at
507.77 kHz. Signal reports can be addressed to the operators
at their call book addresses.

Two more authorizations, in Ontario and British Columbia, are
expected soon.

Richard Ferch, VE3KI

EVERY SUNDAY ON 70 CM THERE IS A NET WITH A DIFFERENCE BOTH THE SUMMERLAND AND GOLD COAST CLUBS HAVE JOINED TOGETHER AT 8PM NSW TIME ON 438.675 LISMORE AND 7PM QUEENSLAND 438.600 THERE IS A CASUAL NET VIA ECHOLINK, SO COME ALONG AND ENJOY TALKING TO WHOEVER IS THERE FROM BOTH CLUBS. LOTS OF FUN AND A GOOD WAY TO LINK THE CLUBS AND KNOW THE ACTIVITIES OF EACH AND CATCH UP WITH FRIENDS OR MAKE NEW ONES.

REMEMBER THE HAMFEST IS TO BE HELD AT THE ALBERT WATERWAYS HALL BROADBEACH ON SATURDAY 14TH NOVEMBER FROM 8.30AM.
IF YOU WOULD STILL LIKE TO HAVE A TABLE THEN CONTACT CAN BE MADE VIA THE CLUB WEBSITE.

COME ALONG AND ENJOY THE FUN OF CATCHING UP WITH FRIENDS AND WANDER THROUGH THE TABLES TO SEE WHAT GOODIES ARE THERE..

THE CLUB CHRISTMAS GET TOGETHER WILL BE HELD ON DECEMBER 5TH AT THE CLUB ROOMS AND IT WILL BE A BRING YOUR OWN AND SOMETHING TO SHARE. REMEMBER

THE $5 GIFT FOR THE TABLE. MORE NEWS AS IT GETS CLOSER.

THAT'S ALL FOR THIS TIME CHEERS FOR NOW KAYE VK4VKS

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

It seems that it was only a couple of weeks ago that I suggested the we amateurs could use some of our skills to support our local fire fighters. Since then the major wild fire on Mt. Archer brought the fieries out to deal with the "largest fire incident" in Queensland's history. Large areas of forest around the Gympie region and more fires near Bundaberg are a reminder to residents of the Wide Bay area that this could be a summer period to remember.

Regardless of the way in which our country is surviving the great global financial crisis, the politicians and economists are telling us that there will be more poeople losing their jobs over the coming year. What

has this to do with amateur radio? you ask. Well at club level, one of the hardest things is to maintain our membership numbers and recruit new members to the hobby. Many clubs provide concessional fees to pensioners and students, as does our WIA.

As people who have to depend on unemployment benefits receive less money than pensioners, they are surely deserving of similar assistance.

Club fees are a form of discretionary spending that are easily forgone
when times are tough.

One of the frequent visitors to Gympie club events has been Van, VK4VAN

from Maryborough. Last Sunday Van was involved in an accident and
suffered injuries which saw him medivaced to hospital in Bundaberg. We
wish you a speedy recovery and hope to hear you back on air soon.

WIANEWS FOR WEEK COMMENCING NOV 01 2009.

Clubs get on the VK100WIA callsign roster

ARRISS CONTACT IN AUSTRALIA

New mobile phones rules - beware of the changes

CANADA'S HAM COMMUNITY TO COMMEMORATE THE 2010 WINTER OLYMPICS

ALL UP AND COMING IN THIS EDITION OF WIANEWS WEEK COMMENCING NOV 01 2009

Geoff VK6NX died last Saturday, Funeral was Thursday. Geoff was OM of
our previous Education Reporter Kylea VK6XYL... our condolences from all
the WIA National News Team Kylea.

Clubs get on the VK100WIA callsign roster

In the first two weeks of online bookings for the special callsign VK100WIA to celebrate the Centenary of Organised Amateur Radio in Australia next year, some 20 clubs have registered for a rostered three day slot.

Their registration details can be seen under the Centenary section of the WIA website and demonstrate how they are to get right behind the Centenary celebrations and promote amateur radio to the public.

Some are to have a public open day at their club rooms, others are setting up in a local community facility and outdoors, and a few will be using the callsign during a traditional amateur radio activity.

The special issue call sign will be used by the WIA itself in May and shared amongst the WIA's affiliated radio clubs until the end of October.

Clubs have been sent information on how to register and are encouraged to consider combining the callsign in conjunction with other activities.

As a result, the VK100WIA roster is now 40% booked by clubs in all states.

Indications are that others are about to finalise their involvement in the Centenary celebration. Bookings for the callsign roster must close in March.

(Jim Linton VK3PC)

New mobile phones rules - beware of the changes

VicRoads, the road traffic authority in Victoria is to adopt a modified new rule in relation to using iPhones or other GPS-enabled phones for navigation purposes, and the audio/music function of phones.

Initially it announced that its new rules, to begin on the 9th of November, would make the use of those phones illegal whilst driving. That is in line with the intent of new nationally agreed rules.

Victoria was to be the first state or territory to say it will be applying the new rules, but VicRoads has more recently announced it will allow GPS phones and music playing phones to be used in cars provided they are in a commercially made cradle.

Learner and P1 plate drivers are totally banned from using a mobile phone at all whilst driving.

You do not have to be talking on a mobile phone to be using it! Simply having it in your hand or sitting on your lap can get you a fine for illegally using a mobile phone while driving.

The rules on mobile phone use do not apply to press-to-talk two-way radio systems.

For the full story visit the VicRoads website - the direct URL can be found in the edition of this broadcast.

www.roadrules.vicroads.vic.gov.au/14_rule_using_mobile_phones_and_visual_display_units.html

ARRISS CONTACT IN AUSTRALIA

A School east of Melbourne is the latest to have an amateur radio contact
with a crew member on the International Space Station (ISS)
and in doing so achieved a notable first for this activity.

A total of 11 students from Sherbrooke Community School put questions to
Astronaut Robert Thirsk, but in a spirit of friendship shared their
experience with two other schools.

The ARISS contact on Wednesday 28 October also included questions from
Sherbrooke's sister schools - the Jiaolun Middle School in China
and the Early Learning Centre at Thimphu in Bhutan.

CRARC MOVES

Canberra Region Amateur Radio Club held its first meeting at the new premises
Last Wednesday night the 28th October.

The club has moved from Farrer to the Mt Mugga scout hall Astrolobe St Redhill.

It was a packed night; with a presentation by Ian VK1IAN, going mobile HF and
APRS in the bush, subtitled what not to do, the second presentation was by
Waldis VK1WJ who introduced members to new digital audio techniques for HF.
Chris VK1DO was coopted to act as auctioneer for the auction of equipment
no longer required by the club. The auction raised $1,647 which will used to
build a new console and equip a new radio room in the hall.

There was a record attendance of 49 members, who expressed satisfaction
with the new premises.

MT GININI 2M repeater

It is believed that the 2M receiver has failed. The repeater can be used for
the broadcast via the broadcast link receiver, however we are unable to do
call backs. A new receiver will be tuned up and installed in the next
couple of weeks.

Most of the repeater team and club members are right now while you listen to
this broadcast are involved in a WICEN exercise supporting the Fitz's Challenge
bicycle endurance ride

COMBINED 70Cm NET WITH SUMMERLAND ' GOLD COAST ARS's.

Well it s finally happened, a net on 70 Cm with a difference on Sunday nights.

Both clubs, Summerland & Gold Coast at 8.00pm (VK2) on 438.675 Lismore and 7.00pm (VK4) 438.600 Gold Coast.

There will be an echolink connection, it is a casual net so come along, be there.

Talk to whoever is there from both clubs it will be a lot of fun.

A good way to let each club link their activities and catch up with friends or make new ones

News from Central Queensland

VK6
web service http://www.vk6.net/newswest-index.html

AN eight-year-old boy has been hailed a hero after he hot-wired a two-way radio to call for help as his dad lay trapped in the wreckage of a truck rollover.

Michael, who had been sitting in the sleeper cab, crawled out of the wreck through the windscreen and tried to free his dad with a tyre lever.

When that didn't work, he rummaged for the radio.

``It was pretty bunged up,'' Mr Bowron said. ``It couldn't work because it wasn't connected to the truck anymore.

``I told Michael he could get it going with the spare battery.'' .

Michael would be nominated for a bravery award.

CONGRATS CATHY VK2FCRW, PASSED REGS.

Cathy VK2FCRW has passed her Regulations exam. Congratulations Cathy.
Now she's turning her focus onto passing the Standard Theory exam.

ARK's Academy will conduct an upgrade course early in the new year, the

course will be in two parts Regulations and Theory

Regulations Course Sat 27th March and Sunday 28th March

Standard / Advanced theory upgrade course over five Sundays April 25th May 2nd May 9th May 16th With Exams May 23rd

All ARK's Academy courses are free of charge and these will be conducted at our Nunnawading classroom

So when you have finished your Christmas Celebrations why not consider and upgrade to your License

Please contact John VK3ARK@wia.org.au

ARK's Academy also conducts regular Foundation license courses with the

first course for 2010 to be held over the weekend Feb 27th / Feb 28th

ARK's Academy will also conduct courses at your club location on request
please contact vk3ark@wia.org.au

(John Fisher VK3DQ / VK3ARK)

Fox hunting and other amateur related activities wooed the kids at the HMO Science Advancement days in South Africa recently. John and Lynn Willescroft organized various activities.

John reports that the 450 MHz licence free foxhunt receivers and transmitters worked very well with no reflection problems and the receivers were very good in demonstrating the principle of the Yagi antenna.

John told SARL News "We first assembled the folded dipole and showed the pattern against a transmitter, we then added each element in turn and demonstrated how the antenna pattern changed. It made clear and precise patterns for each element added and the kids commented that they had never seen it work before.

In a letter the Managing Director of the HMO, Dr Sandile Malinga, wrote "On behalf of the Hermanus Magnetic Observatory (HMO) and the National Research Foundation (NRF), I would like to express our sincere gratitude and heartfelt appreciation to you for visiting the HMO and running the fox hunting activity.

The event was enjoyed by all and went a long way in showing the young ones that science can be fun. My daughter enjoyed it greatly; she was still talking about how enjoyable the hunt was at home at night.

It is things like these that make a lasting and positive impression in these young minds and advance science for our future."

Students from Ghana, Mauritius, the Philippines, Sri Lanka and Zambia attended the United States Telecommunications Training Institute Amateur Radio Administration Course at ARRL Headquarters October 12-16.

ARRL Technical Relations Manager Brennan Price, N4QX, coordinated the sessions and led the course. "The curriculum covered a wide variety of Amateur Radio topics and concerns, including licensing, spectrum requirements, disaster communications and antenna requirements," Price said.

The curriculum also covered the ITU and its regulations, as well as the

process leading to the next World Radiocommunication Conference 2012 (WRC-12).

www.arrl.org/news/stories/2009/10/22/11154/?nc=1>

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

CANADA'S HAM COMMUNITY TO COMMEMORATE THE 2010 WINTER OLYMPICS

Ham radio will be a part of the 2010 Olympics. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

The upcoming Olympic games in Canada will be celebrated on the ham bands. This with word that members of the Vancouver Olympics Amateur Radio Group will be activating three special event stations to promote and commemorate the Vancouver Winter Olympic and Paralympic Games to be held in February and March of 2010.

The special activity is already under way and will continue through March 2010. Operations will be on all bands and modes with the first station

VG7V on the air from October 1st through November 30th. Then comes VG7W from December 1st of this year through January 31st of 2010. The final call will be VG7G taking to the airwaves on February 1st and continuing through March 31st 2010.

The Vancouver Olympics Amateur Radio Group says that it will be consolidating all contacts and intends to post them electronically to the ARRL's Logbook to the World. In addition, commemorative paper QSL cards for those who want them will be available at the conclusion of the events in April 2010. Cards received via the QSL Bureau will be returned the same way.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

In addition to the commemorative operation radio amateurs will also be handling many of the logistics for the games. Word is that most of this will be short range communications on the 1.3 meter or 220 MHz band using FM and numerous local repeaters.

NEW 23 CM DISCUSSON GROUP FORMED

A new Internet based reflector group has been created to discuss the use of D-STAR Digital Voice and High-Speed Data on the 1.2 GHz band . Called D-STAR_23cm, the group discussions center around the use of the Icom ID-1 mobile, IC-9100 transceiver, RP-1V and RP-2V digital voice repeaters and all aspects of 23 centimeter data and voice communications using D-Star

technology. The group can be joined groups dot yahoo dot com slash D-Star_23 cm

IRAN MAY PUT SATELLITE IN THE HAM SATELLITE BANDS

Turning to ham radio space relayed news, there is a possibility that Iran's Mesbah-2 satellite, slated for launch early 2010, could operate on frequencies allocated to the Amateur Satellite Service.

An on-line report at astronautix.com says that the original Mesbah satellite, lost in a 2005 launch failure, was to have operated on Amateur Satellite Service frequencies. Now its being reported that Iran's Minister of Communications and Information Technology, Reza Taqipour, has said that the replacement Mesbah satellite has successfully completed pre-launch tests and is now ready for liftoff early next year.

Most observers think that there will be little difference between the transponder set-up between the lost Mesbah satellite on the new replacement bird. More is at www.astronautix.com/craft/mesbah2.htm

SWEDENS SAQ ON THE AR OCTOBER AND DECEMBER

The historic Alexanderson alternator transmitter located at Grimton, Sweden, will next take to the airwaves on October 24th at 09:00 UTC and

again on December 24th at 08:00 UTC.

This museum station is operated by volunteers on special days throughout the year. It transmits CW on the frequency of 17.2kHz signing the call

SAQ. If nothing else, the station is well worth listening out for because its C-W is a musical sound and is very unique.

No reports required and no QSL cards are given for the October transmission but QSLs are available for the Christmas Eve transmission. For more information check out www.alexander.n.se

RADIO ST HELENA DAY - NOVEMBER 14th

If you like to listen out for rare shortwave stations then this is for you. Amateur Radio Newsline's Jim Davis, W2JKD:

Radio St. Helena Day will be on Saturday 14th of November 2009. This rare station is located on the Island of St Helena which lies in the South Atlantic off the coast of Angola.

The station normally provides a local radio service to the island and has a range of about 100 km. But once a year it broadcasts internationally on Shortwave at 11.092.5 MHz on upper sideband with its famed Party On-The-Air program.

This years operation will begin at 20:00 UTC and conclude at 01:00 UTC with the last 90 minutes beaming toward North America, Central America and the Caribbean. A special QSL card will be available to confirm reception reports.

To get a QSL from Radio St. Helena, you must send a written and verifiable reception report by Air Mail and include sufficient return postage to Radio St. Helena, P.O. Box 93, Jamestown, St. Helena, STHL 1ZZ, South

Atlantic Ocean. Mark your envelope via Air Mail via United Kingdom & Ascension For those not aware, Saint Helena was named after St Helena of Constantinople.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD.

And less we forget, E mail reports will be not be verified and off air recordings cannot not be returned. At least that's what the press release says.

RF Technology/SCAM News

How to Lock Your Car and Why - Not a Joke! - IS THIS A NEW URBAN MYTH?

"While travelling, my friend's son stopped at a roadside rest to use the bathroom. When he came out to his car less than 4-5 minutes later, someone had gotten into his car and stolen his cell phone, laptop computer, GPS navigator, briefcase.....you name it.

He called the police and since there were no signs of his car being broken into, the police told him he had been a victim of the latest robbery tactic

Seems there is a device that robbers are using now to clone your security code when you lock your doors on your car using your key-chain locking device.

"Baddies" sit a distance away and watch for their next victim. They know you are going inside of the store, restaurant, or bathroom and that they now have a few minutes to steal and run.

The police officer said to manually lock your car door-by hitting the lock button inside the car -- that way if there is someone sitting in a parking lot watching for their next victim, it will not be you.

When you hit the lock button on your car upon exiting, it does not send the security code, but if you walk away and use the door lock on your key chain, it sends the code through the airwaves where it can be instantly stolen.

Why do we believe this is probably a myth?

Purely because of the next line, a FAVOURITE with the "Lets pass on a virus warning" brigade!

"Be wisely aware of what you just read and please PASS THIS NOTE ON".

(Supplied by Dale VK7NDH to the vk7wi news desk)

WEIRD AND WONDERFUL

DID YOU KNOW? THE WOUFF HONG

Every amateur should know and tremble at the history and origins of this fearsome instrument for the punishment of amateurs who cultivate bad operating habits and who nourish and culture their meaner instincts on the air.

The Wouff Hong <http://www.arrl.org/tis/info/history.html#hong> was invented -- or at any rate, discovered -- by "The Old Man" himself, just as amateurs were getting back on the air after World War I. The Old Man (who later turned out to be Hiram Percy Maxim, W1AW, co-founder and first President of ARRL) first heard the Wouff Hong described amid the howls and garble of interference as he tuned across a band filled with signals that exemplified all the rotten operating practices then available to amateurs (considering the state of the art as they knew it).

As The Old Man heard it, the Wouff Hong was being used on some hapless offender so effectively that he investigated. After further effort, "T.O.M." was able to locate and identify a Wouff Hong. The Old Man never prescribed the exact manner in which the Wouff Hong was to be used, but amateurs need only a little imagination to surmise how painful punishments were inflicted on those who stoop to liddish behavior on the air.

The Original Wouff Hong is on display at ARRL Headquarters.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010

March 21-22 John Moyle Field Day

CQIR Contest

Following the success of the first CQIR contest held during the IRTS 75th Anniversary celebrations in 2007, the Irish Society's Committee at their last meeting discussed requests from at home and abroad for a repeat event.

You may recall that this HF event celebrated the Irish diaspora overseas and gave an opportunity for those with green blood in their veins to enjoy a Worldwide Irish Contest.

The committee decided to consider running the event every five years on a weekend close to St. Patrick's Day which would mean that the next event would be in March 2012 to coincide with the IRTS 80th Anniversary celebrations.

The Committee will consider revising the rules based on lessons learnt during the first event. If you have any suggestions or comments please forward them to the Contest Manager, Thos EI2JD.

WSPR beacon on air from Africa

On Friday 16th October, the WSPR beacon V53ARC went online.

RSGB News says the beacon is working well and transmitting on the 80, 40, 30, 20, 17, 15 and 10m bands with 5W and on 6m with 2W. It has been spotted already around the globe including VK, KH8, J, S and many other countries.

It can be heard on each band every 16 minutes on the WSPR frequencies. More information can be found at www.oe1ifm.at

Listen for W1ACB/US on 7,045 and 14,045kHz and operating CW. It is a permanent station for the US Army Signal Corps and the British Royal Naval Signals of WWII. Go to QRZ.com to view their WWII tower. They also operate on other bands from Top Band to 10m and can usually be heard on frequencies ending in 45.

On 31st October, GB0BME will be on the air for Bancroft Mill Engine from Barnoldswick.

1st November sees two stations going on the air. GB4RN is the Royal Naval Amateur Radio Society station in Waterlooville and GB0AD is for Armistice Day and is stationed in Aberdare.

WIRELESS WEATHER

BIG SUNSPOT:

The sun is showing signs of life. Sunspot 1029 emerged over last weekend and it is crackling with B- and C-class solar flares. The active region's magnetic polarity identifies it as a member of new Solar Cycle 24. If its growth continues apace, sunspot 1029 could soon become the biggest sunspot of 2009.

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN

End of an era for early websites

A service that gave many people their first taste of building and owning a web page is set to close.

Yahoo-owned GeoCities once boasted millions of users and was the third most popular destination on the web.

The free site has since fallen out of fashion with users, who have switched to social networks.

Sites became unaccessible October 26.

However, many of the pages have been archived and will still be available to view via the nonprofit Internet Archive project.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Tassies North West and South Team Up for the Horses

WICEN Tasmania (South) has developed a reputation for client focussed excellence, and promoted the capabilities of Amateur Radio generally, through it's involvement with Equine Endurance riding.

Providing communications, checkpoints and tracking, initially for the Southern Tasmanian Endurance Riders, and more recently also for Portland Endurance Riders in the St Helens area, WICEN has gradually been able to be rid of the title of `the CB'ers' and be referred to in the endurance riding community as `the Amateur Radio guys'.

The fame is spreading - state-wide.

WICEN has now been asked to provide services for the Country Club State Championship to be held near Latrobe in late November. Two rides, one of 160km and another of 93km, starting at midnight 5:30 am respectively will be serviced.

Given the location and scope in terms of time span and distance, the capacity of WICEN would have been overstretched. More resourced were needed. Coincidentally, the Cradle Coast Amateur Radio Club have been talking about getting into some WICEN type activities, so it was fortuitous that Roger VK7ARN, the WICEN Secretary, contacted David VK7DC, Secretary of CCARC, to enquire if they were interested in joining forces with WICEN South for the event. David responded within 24 hours, after consulting with the CCARC committee, with an affirmative.

(Roger,VK7ARN)

Hams prepare for emergencies

IARU member societies and amateur radio emergency communications groups around the world are getting ready for next month's Global Simulated Emergency Test.

It will be on Saturday the 14th of November between 1800 and 2300 UTC, on or near the emergency centre of activity frequencies on the 80, 40, 20, 17 and 15 metre bands.

These frequencies are now listed in band plans around the world. GlobalSET is not a contest but a training exercise in the handling of emergency communications and testing of equipment.

It puts a world-wide focus on the training that regularly occurs in some countries in preparation for the time when amateur radio plays its role in providing communications in times of an emergency.

For more details check out the IARU Region 1 website (www.iaru-r1.org) under the Emergency Communications Working Group section.

REWIND - A LOOK BACK IN HISTORY
(Will McGhie VK6UU is WIA National Historian)

DID YOU KNOW? WWV AND WWVH

Today, most amateurs know that radio stations WWV and WWVH broadcast time and frequency information 24 hours a day, seven days a week to millions of listeners worldwide.

The ARRL Letter says that the stations are administered by the National Institute of Standards and Technology, WWV is located in Fort Collins, Colorado, about 60 miles north of Denver; WWVH is located on the Island of Kauai, Hawaii on a 30 acre site near Kekaha at Kokole Point. Both stations broadcast information that includes time announcements, standard time intervals, standard frequencies, UT1 time corrections, a BCD time code, geophysical alerts, marine storm warnings and Global Positioning System (GPS) status reports.

Most hams today think of WWV and WWVH as "time stations." According to QST Editor Steve Ford, WB8IMY, that's only half-true: they are really time and frequency stations.

"The time signals that you hear are regulated by an atomic clock that uses the oscillations of Cesium atoms as its standard;

9,162,361,770 oscillations equal 1 second," wrote Ford in the June 1994 issue of QST.

Hey OM:

ASK is CW pure and simple. What you have is infinitely variable speed
CW. And some times the speed varies so much you can't tell if it's a
dit or a dah.

You can't beat CW, no way, no how, for the best source, of signal, in
an EMI environment.
Towit you can't beat ASK either.

Just keep on doing what you are doing.

As for square wave for audio, we are looking at an infinite number of
harmonics in a square wave, and that may be a good thing, but is it
what you want?

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

I think you mean "AFSK". At least that's what I think you mean. ASK =
Amplitude Shift Keying.

Something in the transmitter chain stops (or should stop!) the square
wave from being square with all the odd harmonics going out to
infinity.

This something may be in the audio stage (example: low pass audio
filter), or the IF stage (example: bandpass filter), or in the RF
stage (example: tuned circuits).

It is very doubtful that after going through the transmitter and
receiver that it'll come out as a square wave on the other end.
Choosing to transmit a square wave audio waveform is usually a poor
choice because you know that it can't come out looking that pretty on
the other end. This sort of design decision might be made for a very
low-end radio control transmitter of the 60's or 70's out of
ignorance, but today we know how to do far better with little extra
effort.

Most designs make a conscious choice to be a friendly transmitter, and
limit splatter and unnecessary bandwidth that would be in violation of
the FCC rules, by running any square wave through a low pass audio
filter AND additionally using a rational choice for the IF filtering
too. Way better than nothing, is a simple RC low pass in the audio
stage. Still to be nice the resulting audio level has to be carefully
set to not cause splatter in subsequent stages.

Radio News Bulletin
Sunday 1st November 2009

GlobalSET 2009

Global Simulated Emergency Test Saturday

IARU Region 1 invites the HQ-Stations of all IARU
member societies and stations of Emergency
Communications Groups to participate in a Global
Simulated Emergency Test on Saturday November 14th,
2009 18.00 – 22.00 UTC.

The operation will take place on and near the emergency
Centre-of-Activity (CoA) frequencies on 80, 40, 20, 17
and 15 metres (+-QRM).

This is an exercise between stations interested in
emergency communications and is not a contest. Activity
will be concentrated around the IARU Emergency Centre
of Activity frequencies which are now incorporated in
band plans around the world.

The details of the exercise will be published on the
IARU Region 1 website (www.iaru-r1.org) under the
Emergency Communications Working Group section.

Galway APRS Digipeater

The Galway VHF Group are delighted to announce that the
Galway APRS Node will be active before the 1st of
November. The Digipeater will be located in Mervue,
Galway, and has a very good distance view to the
horizon. This will provide excellent coverage around
County Galway and beyond. The callsign of the APRS node
will be EI2GCP-2 and this will link into the already
established national system. This will fill in a large
gap that has been present on the western and
north-western side of the country.

Brendan, EI6IZ, has kindly offered to link into our
APRS node facilitating the north western area to give

additional coverage into Co. Mayo and above. We hope to add the facility of a weather station in the following months which will send its information via beacon text. By checking the data from the weather beacons on the APRS it is possible to form a general synopsis of the weather around the country. Such information can prove valuable to those active on VHF and more so on Microwaves.

Special thanks to Martin List-Peterson for providing a location for the Digipeater on the roof of his Airwire office building, Gerry, EI8DRB, and Enda, EI3IX, who finalised the installation of the antenna and associated equipment. Sadly the transceiver for this project has been held up in the post due to the Royal Mail dispute.

To view the activity in Ireland from the internet connect into www.aprs.fi and scroll the map to Ireland. At present, the bulk of the activity would appear to be in the southern direction and also in the Dublin area. To view activity from received signals off air, it would be necessary to run the program UIView and have a TNC running in Kiss-Mode to receive the local information. Further information about the Galway APRS can be obtained from Gerry EI8DRB or Steve EI5DD.

Galway VHF Group 24 hour Radio Operation from RNLI Stations

Using the callsign EI 185 RNLI, Over three weekends in November, members of the Galway VHF Group will be operating a HF station for a 24hour period from Lifeboat Stations in County Galway. The purpose of this operation is to promote the 185th Anniversary of the establishment if the Lifeboat Service in Ireland which is coinciding with a major fundraising effort.

Members of the Galway VHF group will also be raising money for these fundraising activities. These much needed funds will assist with the training of volunteers and assist with the maintenance of equipment and running of the Lifeboat Stations. It should be noted that the RNLI is completely funded by voluntary contributions and receives no funding from the government.

Crew member Mark Armour, EI6GUB, is also a member of the Galway VHF Group. Mark has recently completed his probationary training with the Lifeboat Service and is now a member of the crew regularly called out in the

event of an emergency. It doesn't stop there as there is a continuous ongoing program of training to follow on top of his weekly service.

The first operation will take place from the Galway Lifeboat Station over the weekend of the 7th and 8th of November. The following weekend, 14th and 15th of November will see an operation from the Aran Island Lifeboat station at Kilronan, Inishmore. The final operation will take place from Clifden Lifeboat Station, Ballyconneely, over the weekend of the 28th and 29th of November. The callsign will be EI 185 RNLI

All operation will take place on the HF bands with two stations in operation at all times. There will be operation on Phone and Digital Modes with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed. Varying types of antenna construction will be used including a Kite antenna for the LF bands.

Solar Cycle 24

Some additional information can be gained in relation to our solar cycle by checking out the following Internet link.

http://www.solarcycle24.com/

Marconi Nobel 100 Award

To celebrate the 100th anniversary of Marconi receiving the Nobel Prize, listen for and work 10 different special event 'SI' stations between November 9th and December 10th.

The following special anniversary callsigns will be on the air: SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM. Other SM stations may be using the special prefix SI, but only the above stations count.

Each anniversary station counts once per band. No endorsements.

More details via qrz.com

A 500khz First

Earlier this week Finbar O'Connor EI0CF had a QSO with Joe Craig, VX9MRC. Joe was on 507.77 khz and Finbar was

on .056 khz. The antenna at EI0CF was a 70 foot vertical with 6 X 50 foot top loading wires.

The respective reports were, EI0CF heard in Canada at 559 and VX9MRC heard at 529. The mode was CW, using straight morse keys.

This is the first MF/MF Irish / Canadian contact on the 500 khz band.

The QSO started at 2235z and ended at 2244z.

Finbar was the marine operator at malin head marine station who 'signed off' 500KHz when Ireland ended keeping a listening watch.

Tipperary Amateur Radio Group

The 2009 Annual General Meeting of the Tipperary Amateur Radio Group will take place on Thursday the 5th of November at 8.00 pm in Raheen House Hotel, Raheen Road, Clonmel. All are Welcome.

Easter Island activation

A Group of Amateurs are planning to activate Easter Island (SA-001) between Oct 31 and Nov 15.

They have a licence for all shortwave bands but will emphasize the bands 160m/80m/40m and most of all 30m (only CW allowed).

They plan to work with three radios at the same time (two of them with amplifiers) mainly in CW but also in SSB and RTTY.

Classic QSL cards for Europe/Asia/Africa/Pacific are managed by SQ8X, via bureau or direct. Logs will also be uploaded to Lotw.

Canadian Special Event Stations

The Vancouver Olympics Amateur Radio Group (VOARG) will activate three special calls to celebrate the Olympic Winter Games and Paralympics which will take place in Vancouver, British Columbia in February/March 2010.

VG7V: Oct 1,2009, until Nov 30,2009, VG7W: Dec 1,2009, until Jan 31,2010, VG7G: Feb 1,2010, until Mar 31,2010.

A website will go online soon, all logs will be uploaded to the LoTW.

QSL cards can be sent via bureau or direct to: VOARG.

15th World ARDF Championships

The Croatian Amateur Radio Association is pleased to invite ARDF competitors as well as guests from all over the world to 15th World ARDF Championships which will be held in Croatia in September 2010.

For more information, see the event's website: http://www.ardf2010.com/

Dundalk Amateur Radio Society

In addition to the Repeater Listen live link on the Dundalk Society's website. There is now a Listen live link also to the Echolink Internet Gateway EI2MOG. This Echolink gateway has been extremely popular and has seen a lot of traffic and will make some interesting listening for anyone who may have no direct RF access.

The Societies next meeting is next Wednesday 4th November at 20.30pm at the Premises in Dundalk. All are welcome to attend.

The Societies website is www.ei7dar.com for more information and the Echolink gateway can be accessed from the Gateway tab on the main page of the above site.

Rallies / Events

Sunday 1st November 2009 Foyle and District ARC Rally Venue: White Horse Hotel, 68 Clooney Road, Derry, BT47 3PA (same hotel as last year)

Dxpedition and IOTA Talk by Declan Craig EI6FR

The Mayo Club has organised Declan Craig EI6FR to give a talk the evening before the Mayo Radio Rally, Saturday 21st November.

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

Ohio/Penn DX Bulletin No. 932

The Ohio/Penn DX PacketCluster
DX Bulletin No. 932
BID: $OPDX.932
November 2, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1AC, K1XN & GoList, NC1L, NJ1Q, W2YR, NG3K, WP3GW, N4AA & QRZ DX, KH6BZF, KL7JR, K8YSE, K0DEQ, W0GJ, Amateur Radio Victoria, AT International, CT1BOH, CX3ZAN, DJ8NK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, EA4BB, F5NQL & UFT, HA0HW, I1JQJ/IK1ADH & 425 DX News, IK7JWX, OK1DOT, Pete's-DX-Newsdesk, PS7YL, PT7WA, PV8DX, PY2SEX, RSGB IOTA Web Site, RW3AH, SM6DEC, UY7IQ, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW, VK5AKH, YV5GRB and YV5IAL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th-October, through Sunday, 1st-November there were 227 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FS, FT5W, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP8, VP8/g, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4U1A, SWITZERLAND (Awareness about HIV/AIDS through Amateur Radio). According to UNAIDS (the Joint United Nations Programme on HIV/AIDS), estimates, there are now 33.2 million people living with HIV, including 2.5 million children. During 2008, some 2.5 million people became newly

infected with the virus. Around half of all people who become infected with HIV do so before they are 25 and die of AIDS-related illnesses before they are 35. Around 95% of people living with HIV reside in developing countries. However, HIV today is a threat to men, women and children throughout the world. Started on December 1st, 1988, the aim of "World AIDS Day" is to raise money, increase awareness, fight prejudice and improve education. "World AIDS Day" is important in reminding people that HIV has not gone away, and that much still needs to be done. A special amateur radio station will be operating at UNAIDS HQ in Geneva, Switzerland, from December 1-7th, 2009, with the special event callsign 4U1AIDS. They invite people to observe the "World AIDS Day" and demonstrate global HIV awareness.
International World Aids Day 2009 Amateur Radio Certificate: Those amateur radio stations which have a radio contact with 4U1AIDS on any 3 amateur radio bands, will awarded a special commemorative certificate ï¿½World AIDS Day Awardï¿½.
Amateur radio stations that have radio contact with 4U1AIDS on 5 amateur radio bands will be awarded a special commemorative UNAIDS pennant.
Special QSL card: For each radio contact with 4U1AIDS, a special QSL card will be sent.
QSL information: For further information, please get in contact with: Andrey Fedorov, UNAIDS, 20 Avenue Appia, CH-1211, Geneva 27, Switzerland.
WEB sites: Official UNAIDS WEB site: http://www.UNAIDS.org
Amateur Radio 4U1AIDS WEB site: http://www.DX-World.com/4u1aids

5H, TANZANIA. Harald, DL7VSN, is once again heading to Tanzania and will probably be active as 5H1HS, this time from the Kilimanjaro area, starting on November 1st. His length of stay was not mentioned. Activity will be 160-10 meters using mainly CW and RTTY. He will use various dipoles with 100 watts. If all plans go well, Harald may activate his 5th IOTA group from this DXCC entity for one or two days. Harald will also be in the Serengeti and Tarangire National Park starting November 18th, and hopes to be active from these areas. QSL via his home callsign.

5R, MADAGASCAR (Update/Also ZS5). Sam, G4OHX, will be active as 5R8HX from Madagascar (IOTA AF-013 and WLOTA L2455) between December 28th and January 3rd (2010). Activity will be mainly CW. He will also be active from South Africa as ZS5/G4OHX between January 4-17th. QSL via his home callsign direct only.

8R, GUYANA (Update). Paulo, PV8DX, a member/part of the "Amateur Brazilian Team", will be active as 8R1PY from Lethem, between now and November 4th. He states that he will try 160 meters. However, there is no electricity during the night, and he will use a generator, which is noisy. Other activity will be on 160-6 meters, including 30/17/12 meters, using CW, SSB, RTTY and PSK31. Other operators mentioned are: Edi/PU8TEP, Abilio/ PV8AZ, Ivan/PV8IG, Ivan/PY1YB, Anderson/PY2TNT and Alex/PY2WAS. QSL via PY2WAS.

9J, ZAMBIA. Niko, S53A, will once again be active as 9J3A from The Hippo Lodge, (see http://www.hippolodge.com), Kafue National Park, between

November 25-30th. He also plans to be active during the CQWW DX CW Contest (November 29-30th) as a Single-Op/Low-Power entry. His equipment will be a IC-7000, spiderbeam for the high bands (20-10m), 80m vertical, and a 40m 2 element wire delta loopa. QSL via S57S direct to: Aleksander Zagar, Golisce 132, SI-1281 SLOVENIA.

9V, SINGAPORE. James, 9V1JP, is a new operator from here and has been active on 20 meters. He states on QRZ.com that he is "in a very challenging environment and is trying hard to put out a decent signal on HF." He also states, "If you need a QSL card, please be patient. I am in the process of designing them, and they should be good and ready in the spring of 2010."

BA4, CHINA. Yoshihiro, JK2VOC, will be active from Dale's, BA4TB, QTH between November 27-30th. He will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via JK2VOC.

C4, CYPRUS. Operators Andy/LZ2HM, Ken/G0ORH and possibly others will be active as C4I during the CQWW DX CW Contest (November 28-29th). QSL via LZ2HM.

CARIBBEAN TOUR. Mike, DF8AN, will once again be active from the Caribbean. This time from two DXCC entities. He should be on the air by the time you read this. His schedule is as follows:
Galapagos Islands (HC8) - HC8/DF8AN between now and November 7th
Netherlands Antilles (PJ4) - PJ4/DF8AN from the Island of Bonaire between November 7-16th.
Activity will be mainly CW. He will be using wire antennas. QSL via DF8AN, by the Bureay or direct.

CE0, EASTER ISLAND (SA-001). Roberto, YV5IAL, will be active as CE0/YV5IAL between January 8-11th. This will be a QRP, portable, holiday style operation. Activity will be on PSK31 digital mode on 14070.15 kHz from 2200-0100z, and occasionally on 40/30/15 meters. QSL via his home callsign.

CR3/CT3, MADEIRA ISLANDS (Update/QSL Change). Jose, CT1BOH, will be using the special callsign CR3E during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. He will use the callsign CT3NT before the contest starting November 24th. All QSOs will be uploaded into LoTW. QSL Manager, Joe, W3HNK, is now taking over QSL chores for CT3NT and CR3E. See his Web page and station at: http://www.qsl.net/ct1boh

CR3/CT9, MADEIRA ISLANDS. Operators Ulrich/DJ2YA, Walter/DJ6QT, Arno/DL1CW, Ulf/DL5AXX and George/SV1RP will be active as CR3L during the CQWW DX CW Contest (November 28-29th) as a Multi-2 entry. QSL via DJ6QT. Operators will be active as CT9/homecall between November 24th and December 3rd.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
3D20CR - Conway Reef; 2009 Operation
3D2CV - Conway Reef; 2009 Operation

E4, PALESTINE. There is a E4X callsign listed on QRZ.com, but no other details are provided. Stay tuned!

EA8, CANARY ISLANDS. Mauri, OH2BYS, will once again be active as EA8CMX from Galdar, Isla de Gran Canaria (AF-004, DIE S-005, WLOTA L0969), during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (???) entry. QSL via OH2BYS.

EF8, CANARY ISLANDS. Val, RD3AF, will be active as EF8M from Santa Maria de Guia, Las Palmas Gran Canaria (AF-004, DIE S-005, WLOTA L 0969) during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/ High-Power entry. QSL via UA3DX.

EL, LIBERIA. Chris, ZS6RI (aka-ZS8IR, ZD9IR, 5H9IR), is expected to be here for about six weeks starting at the beginning of November. His callsign will be EL8RI. Activity will be QRP on the HF bands (mentioned 40/20/30m) using CW, SSB and the Digital modes. After his 6 week stay, he will return home and then return to EL-land after 3 weeks. QSL EL8RI via ZS6RI.

GD/MD, ISLE OF MAN. Operators Ron/PA3EWP and Tom/GM4FDM will be active as MD/PA3EWP and GD4FDM, respectively, between November 7-9th. Activity will be on the HF bands. QSL MD/PA3EWP via PA7FM and GD4FDM via GM4FDM.

GU, GUERNSEY. Bob, GU4YOX, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL via GU4YOX, direct or LoTW.

HB0, LIECHTENSTEIN. Operators Kazik/DL2SBY, Tomi/HA4DX and Laci/HA0HW will once again operate from Masessa between November 6-13th. Their main focus will be to do as many QSOs as possible on the 160, 80 and 40 meter bands. They will have 3 radios (2 with amplifiers). On 160m, they will use a 18m Spiderpole inverted L; on 80m an inverted Vee and a loaded GP; and on 40m a GP on another 12m Spiderpole. For the upper bands they will have a Spider beam on top of a 11m mast. Operations will be mostly CW, but some SSB also expected. QSL by the Bureau to each appropriate operator.

HC8, GALAPAGOS ISLANDS (Update). A group of the contesters from Quito Radio Club will be active as HC8N from Isla de San Cristobal (SA-004, WLOTA L0094) during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry. Some of the operators mentioned (and the bands that they will be on) are: Dave/N3RD (40m), Bob/W6RGG (20m), Dennis/K2SX (10m) and possibly others. QSL via W5UE.

HS, THAILAND (Good News). John, W2YR (aka-HS0ZDJ), informs OPDX that he just received this information from the International Secretary of the Radio Amateur Society of Thailand: FYI - the NTC is the National Tele-communications Council akin to our FCC in the USA -- "Hi, Good news (just received from Narissara, HS1CHB): the NTC has approved the RAST request made recently for the expansion of the 7-MHz for amateur radio on a primary basis in Thailand from 7.0-7.1 to 7.0-7.2 MHz. (This had been approved internationally at the WRC-03 conference and was to be effective March 29 this year, pending approval on a country-by-country

basis.) This becomes effective "next Friday," which I take to be November 6th, 2009."

IOTA NEWS.....
EU-031. Operators Alfredo/IK7JWX, Alessandro/IW8EHK, Leopoldo/I8LWL and Titti/IK8GQY (YL) will join Raul/IC8ATA and be active as IC8/homecall from Procida Island (I.I.A. NA-002, Grid JN70BR) between November 6ï¿½8th. Activity will be on all HF bands and 6 meters using SSB, RTTY and PSK31. It is possible that the group may operate from Ischia (Grid JN60XR) and Vivara Islands (Grid JN70AR) also.

NA-062. (Update/Reminder) Mark, KG8DP, will once again activate Grassey Key between November 2-9th. Operations will be stationary at Grassey Key (on the beach) and mobile as he travels to Key West and all points on the ocean. He will use the callsigns KG8DP, KG8DP/M, NA8KD or NA8KD/m. This will be a week trip. QSL all callsigns via info on QRZ.com (w/SASE). Mark will be using an IC-7000, 1.2 kw amp mobile and GLA-1000B portable amp. Antenna will be Tarheel M-100's. ADDED NOTES BY MARK: He states, "This trip will have plenty of ham radio, but he will be announcing an engagement of marriage to his future wife to be on 10/10/10. Look for him on the trip heading back as he will be activating different counties for the county hunters. Frequencies will be the county hunters, 14.336 and 7.188 MHz and the normal IOTA frequencies. Any scheds for needed IOTA QSOs can be made via E-mail at: kg8dp@yahoo.com

SA-062. (Update) With the support of the Island Radio Expedition Foundation (IREF), the Araucaria DX Group and the ForDX, a group of operators will be activating Coroa Vermelha Island and Coroa Da Barra Island, including the Lighthouse (ARLHS BRA-029), as PW6C between November 11-18th. Activity will be on 80-10 meters, including 17 and 12 meters, using CW and SSB. The team members are Leo/PP1CZ, Andre/PY0FF, Renner/PY7RP, Jim/PY7XC, Ciro/PY7ZY and Mike/K9AJ. QSL via K9AJ. QSL is valid for the South American Lighthouses Award issued by the Radio Club Grupo DX Bahia Blanca. For more details, visit their Web site at: http://www.pw6c.com

SA-071. (RARE IOTA) Operators Fred/PY2XB and Alex/PY2WAS will activate Cabras Island between November 19-23rd. IOTA SA-071 continues to have a high demand among IOTA program participants. They will use the callsign PW2IO (PY2XB) and PW2TA (PY2WAS), operating two separate stations running 300w and 100w, respectively. The antennas will be a yagi for 20/17/15m, and a multi-band ZEP. The team guarantees that at least one station will be on the air around the clock. Both stations will work CW and SSB. The main bands to be used are 40/30/20/17/15 meters on the IOTA frequencies. Alternative frequencies may be used if necessary. As far as they know, Cabras Island

has never been activated. The team will need to take a lot
of supplies to the island, including fuel, generator and
batteries for energy. The landing on the island is difficult
and the operation may be postponed in case of bad sea. Updates
will be forwarded through Luke, PT7WA. Additional information
will be available at QRZ.com. QSL routes are: PW2IO via PT7WA
and PW2TA via PY2WAS.

J5, GUINEA-BISSAU. Joao, CT2GQA, will be here for the next five years.
He will be using two different callsigns (reason not given), but look
for the following to be used: J5GQZ - on 20/17 meters
J5JUA - on 80/40 meters
QSL both callsigns via his home callsign.

JD, OGASAWARA. Kirk, JF3MYU, will be active as JD1BNN between March
28-31st (2010). He is expected to be there with three other operators
who will be staying long (hopefully more details will be forthcoming).
Kirk's activity will be focused on the WARC bands. QSL is "OK" via
JARL Bureau, but write JD1BNN on your QSL (so it can be sorted easily).
Also, you can receive his QSL direct if you send your QSL to his address
in Kobe, JAPAN: Kirk Itaya, 5-1-35, Daikaidori, KOBE, 652-0803 JAPAN.
Please enclose SAE plus sufficient return postage. For NA, SA, EU and
AF include one new IRC or 2 USDs. For Asia, one IRC or 1 USD.

K0,UNITED STATES (Special Event). Members of the EARS (Emporia Amateur
Radio Society - KB0SSR) will activate special event station K0V on November
7th and on Veterans Day, November 11th, to honor U.S. Veterans. The special
event station will be located adjacent to the Emporia All Veterans
Memorial. Operating times will be as follows:
November 7th - 1900-2300z (1-5PM CST)
November 11th - 1400-2400z (8AM-6PM CST); on Veterans Day
Suggested frequencies are: 14268, 7262 and 3920 kHz (+/- 20 kHz). Other
frequencies may be used depending on QRM and/or propagation. They may
also try some Digital QSOs, especially on Saturday, November 7th. Operating
hours maybe extend on the 11th beyond 2400z (6PM CST), depending on various
factors (such as operator fatigue, band conditions and the need for a QSO).
Special QSL cards will be available and will require a SASE sent to:
EARS, c/o Connie Steinel/K0UER, 950 Oxford Drive, Emporia, KS 66801-5439/.
Visit Ears Web page at: http://www.qsl.net/emporiaars/

KH6, HAWAII. Jim, N6TJ, will be active as KH6ZN (the Pu'u O'o Radio Club
callsign), from Hawaii's Big Island, during the CQWW DX CW Contest (November
28-29th) as a Single-Op/All-Band/High-Power entry. QSL via QSL via AI4U.

KH6, HAWAII (Special Event). Operators Claire/WL7MY and John/KL7JR will be
operating special event station "N7I" from Honolulu (Oahu Island HI-008S),
February 4-10th (2010). Activity is in celebration of the 16th anniversary
of the U.S. Islands Awards program. Main frequency will be: 28460 or 14260
kHz. They use a TS-50 and a vertical on mag mount. QSL Manager is KL7JR.
For additional info: http://www.usislands.org

KH6BZF PROPAGATION FORECAST/REPORT (For November 2-8th)....
Nov 2 AN SOLAR REFERENCE
Nov 3 AN ---------------
Nov 4 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 5 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 6 AN LN - Low Normal
Nov 7 AN
Nov 8 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MARCONI NOBEL 100 AWARD (Correction/Update). To celebrate the 100th anniversary of Marconi receiving the Nobel Prize, listen for and work 5 different special event "SI" stations (not 10 as first announced -- DX stations work only 3 special "SI" stations) between November 9th and December 10th and earn a special "Marconi Nobel 100 Award". The following special anniversary callsigns will be on the air: SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM. Other SM stations may be using the special prefix SI, but only the above stations count. Each anniversary station counts once per band. No endorsements. The fee is 50 SEK, 5 Euro or 5 USDs. Apply with log entry to SSA Awards Manager, Bengt Hogkvist, Ostbygatan 24 C, SE-531 37 Lidkoping, Sweden.

OH0, ALAND ISLAND. Tomi, OH6EI, will once again be active as OH0Z. His activity will include the CQWW DX CW Contest (November 28-29th). He will be a Single-Op/All-Band/High-Power entry. QSL via W0MM.

OQ3, BELGIUM. Mar, ON4RU, will be using his contest callsign OQ3R in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via his home callsign.

OX, GREENLAND. Members of the Spanish "DX4DX Team" will be active as OX/EA7SB and OX/EA4NA from the main island (NA-018) between November 12ï¿½19th. Activity will be on 160-10 meters using CW, SSB and the Digital modes. The group will be using FT-857s w/amps into vertical antennas. Operators mentioned are: Paco/EA4NT (SSB/Digi), Emilio/EA7AAW (CW), Ramon/EA4NA (CW) and Salvador/EA7SB (SSB/Digi). Pilot stations will be Jose/EA4DB and Txema/EA5BWR. QSL via EA4BT, direct or by the Bureau. This is the same group who was active as TK9Z and C57R. Visit the group Web page at: http://www.dx4dx.com/index1.html

PW2, BRAZIL (Special Event). Special event station PW2SIDC has been active (from several Brazilian states, including Fernando de Noronha Island) since October 22nd and will be on the air until November 22nd. Activity is in celebration of V DEFENCIL - V International Conference of Civil Defense - to be held between November 17-20th, at Anhembi - Meeting & Conventions of Sao Paulo City, with the participation of RENER - National Emergency Network Amateur Radio. QSL via PS7YL, by the Bureau, eQSL or direct to: Monica Freitas, Av. Sao Miguel dos Caribes 31, Natal, RN 59086-500 Brazil.

QSL INFO AND NEWS.....
3D20CR QSLS. From the 3D20CR Web page: "As promised, QSLs have already been mailed confirming Conway Reef QSOs with donors who made donations that were received on or before September 23, 2009."

4W6FR AND VK9LA OQRS PROBLEMS. QSL MANAGER Bill, VK4FW, announced this past weekend (October 31st): "Today, out of the blue, my faithful laptop has given up the ghost, worse is that the external backup stick drive has also collapsed (all suspected from an AC surge). So now all OQRS files for 4W6FR are at this time lost as well as any OQRS VK9LA files for the last 4 days..... if any of you have sent for QSL a request for the above, please kindly resend me full details to: vk4fw@westnet.com.au
"
His address is: Bill Horner, PO Box 612, Childers, 4660, Australia.

FT6GA ON LOTW. Didier, F5OGL, announced on Tuesday, October 27th, that the FT5GA log has been uploaded to the LoTW at 1235z. He states (edited), "Of course some stations will not find one or several of their QSOs on LoTW. To these hams I say 'don't worry!'. Every situation will be checked with big care. It had been possible, in the huge pile ups, that some mistakes happened. However, know also that FT5GA was pirated a lot of times, even on the scheduled DXpedition frequencies. These malevolences are not of our fact, and we ask the community to understand us if some QSOs will be rejected for having not be found in the log."

NCDXF PRESS RELEASE (K4M and LoTW). "NCDXF (Northern California DX Foundation) will be sending the K4M webmaster, Don, N1DG, a complete list of all contributors for K4M LoTW upload. Any NCDXF contributor in the last *eighteen* months will be included. This will be done as soon as we have booked October contributors which should be by November 4th. You *DO NOT* have to E-mail N1DG to make this happen, so please do not. 73, The Board of NCDXF"

NEW ADDRESS. QSL Manager Gene, UA9AB, who is a manager for several stations, says that his address has changed to:
Gene Shcumat, PO Box 18527, Chelyabinsk 454021, RUSSIA
Gene said that his old address is still valid for the immediate future.

DID YOU WORK KP4AO on November 1st? Special event station KP4AO was activated by the A.R.C. Arecibo Observatory. Activity was to celebrate 46th anniversary of operations at the Arecibo Observatory Radio Telescope (still the single largest radio telescope antenna in the world). Also, they will commemorate the 35th anniversary of the Arecibo Message, which was sent on November 16, 1974, in binary code and transmitted to the globular star cluster M13, for if it is received by intelligent life, it will let them know about our existence..... For every QSL received, a special certificate will be issued, so please include a #10 BUSINESS SIZE SASE with your QSL. QSL via W3HNK. Official Web site for the Arecibo Observatory is: http://www.naic.edu

QSL KP4KE via OK1DOT (For the recent 2009 CQWW DX SSB Contest and older QSOs as well).

VK9GWM QSL CARDS. It has been reported by Chris, HA5X/HG5XA, that he hopes all of you have received your VK9GMW cards by now, especially direct and OQRS requests. He states, "Although designing and printing the cards took a bit longer than expected, the OQRS system helped a lot in processing the requests. Tomi, HA7RY, was very busy the past few months processing all remaining requests for VK9WWI, 5K0T and VK9GMW QSL cards, and even if somebody had sent a request for only one of the expeditions, he checked if the same callsign was there in the other expedition logs and automatically sent a card for that expedition as well. Cards and OQRS requests for VK9GMW are still coming in and they will be processed after Tomi has returned from the currently ongoing TX3A expedition."

QSLS VIA LOTW: FO/G3BJ, FT5GA and K4M

QSLS RECEIVED VIA MAIL: 5B4AIF, TL0A, V51AS, VK9DWX, XU7TZG and ZB3B

QSLS RECEIVED VIA THE BUREAU: E4/OM2DX, EY7AF, FG/OM3LA, FP/KV1J, T32OU, T32Z, TA2MW/0, TI50DX, V25OP, V73NS, VO1IMD, VP5T and VY1JA

SOTA DAY. The North American "Summits on the Air" (SOTA) activation day, is Saturday, November 14th. The four North American associations of "Summits on the Air" are planning a multi-summit activation spanning the North American continent. Portable, mountain top stations will be operating from the VE2, W1, W2, and W6 call areas. The operators will be using the extensive spotting and alerting system devised by the SOTA organization. Seasoned "summit chasers" all over Europe will have the opportunity to work expeditions on SOTA's western frontier, and a new group of North American chasers will get a chance to work multiple summits. To join in the fun, visit the SOTA Web site at <http://www.sota.org.uk/> and set aside Saturday morning, November 14th, for Summits on the Air.

T8, PALAU. Pista, HA5AO, will once again be active as T88CI from the Island of Koror (OC-009) between November 25th and December 10th. This will be a holiday style operation, and his activity will be on the HF bands 80-10 meters, possibly 160m, mainly on CW. There is a chance he may also be on SSB and RTTY. Pista will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. A log search will be available on his Web site at: http://ha5ao.novolab.hu QSL via HA5AO, direct, by the Buraeu or LoTW.

TM1, FRANCE (Special Event). Members of the Havre Radio Club (F8KHN) will be active using the special callsign TM1TJV between November 4-8th. Activity will be on all HF bands using several different modes. The special event is to celebrate the departure of some 30 trans-Atlantic sailing ships during the "Transat Jacques Vabre 2009" race between Le Havre, France and Costa-Rica's Caribbean coast. QSL by the Bureau or direct to: Radio Club Havrais, BP101, 76050 Le Havre, Cedex, FRANCE. For more details on the race, visit the following Web page at: http://www.jacques-vabre.com/en/s01_home/s01p01_home.php#

TX3, CHESTERFIELD ISLAND. By the time you read this, TX3A should be close to Chesterfield Island (expected to arrive early Monday morning)

and may be on the air possibly Monday or Tuesday. Operators George/AA7JV and Tomi/HA7RY have had to fight rough seas and had to anchor at Saumarez Reef on October 27th for a fews day, but left again on October 31st. Latest reports -- "2 to 3 meter seas, with the boat rolling heavily." The good news that was announced this past week was the TX3A license has been extended, and they will be able to use the callsign between November 2nd and December 6th. For more detailed information and updates, visit their Web page at: http://www.TX3A.com

UR, UKRAINE (Contest/Mountain Op). Operators Alex/R7IRK, Vladimir/US5ID, Valery/UU1JN, Anatol/UU5JA, Elena/UV5ESZ and Roman/UY7IQ will be active as homecall/p from Crimea on Karaby Mountain (1000m high ASL) between November 2-9th. Activity will be on 160-10 meters, and the group will take part in the Ukrainian DX Contest as UU5JZA. Reference numbers for the Ukrainian Flora Fauna Award (UFF) is 201 and for the Ukrainian Regional Districts Award (URDA) is KR07. QSL UU5JZA via UY7IQ.

VI5, AUSTRALIA (Special Event). Members of the Elizabeth Amateur Radio Club will activate the special event callsign VI50LZ between October 31st and November 8th. Activity is to celebrate the club's 50th anniversary. Operations will be on all HF bands. Check out the club's Web site each day for exact operating times, frequencies and modes at: http://www.earc.org.au

VK8, AUSTRALIA. Stuie, VK8NSB, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via VK6NE.

VK9 C, L, M, N, W & X DELETED FROM DX EQUATION. The Australian Communications and Media Authority (ACMA) has decided to discontinue the use of a VK9 callsign suffix letter to denote each of the six Australian external territories, each a DX entity. The long-standing prefixes included VK9C for Cocos (Keeling) Island, VK9L Lord Howe Island, VK9M Mellish Reef, VK9N Norfolk Island, VK9W Willis Island and VK9X Christmas Island. For more details, please refer to the Amateur Radio Victoria Web page at: http://amateurradio.com.au/node/856

VP2M, MONTSERRAT (Update). Operators Tom/DL2RUM (as VP2MUM), Rudi/DM2XO (as VP2MXO) and 3D20CR op Jan/DJ8NK (as VP2MNK) will operate from here between November 3-16th. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via their home callsigns per the QRZ.com address or by the Bureau.

VP8, FALKLAND ISLANDS (Update/Reminder). Members of the CRAM and the Uruguay DX Group will be active from Port Stanley between November 14-21st. They hope to start operations at their local sunset on the 14th, starting on 40 meters, depending on transportation matters. The group will sign VP8BUH on SSB and VP8BUG on CW/Digital modes. Their activity will focus on the lower bands, Digital modes and the 30/17/12 meter bands. They plan to have 3 stations on around the clock. Operators mentioned include: Gus/CX2AM (CW), Gus/CX3CE (Low-Bander), Bert/CX3AN (CW/SSB), Mario/CX4CR (CW, SSB and Digital), Luis/CX4AAJ (Digital - CQWW RTTY Winner) and Horacio/CX3BH (who is 91 years young!). QSL Manager is David,

EB7DX. Pilot and Web master: Carlos, CX8ABF. For more details, see:
http://www.qsl.net/vp8bug

VP9, BERMUDA. Mark, AA1AC, will be operating from the Hamilton Parish, Bermuda, as VP9/AA1AC from December 6-12th. QSL via to his home callsign, direct or via the bureau.

XR0, EASTER ISLAND (Update/Reminder). By the time you read this, an international team of operators will be active as XR0Y from Rapa Nui between now and November 15th. This will be a lite and small DXpedition with 6 operators. Operators are: Marco/CE6TBN, Leszek/NI1L, Aart/PA3C, Zbig/SP7HOV, Stan/SQ8X and Victoria/SV2KBS. Their priority will be working Europe on 30 meters CW (since there is an incredibly high demand on 30m), and also 40 and 80m during the first 7 days of the DXpedition. This means their focus will be on the European during the first half of their activity. The second part of the DXpedition will be dedicated to all continents (especially Africa and Asia [other than JA]). For more details, please see their Web page at: ttp://rapanui2009.org
They plan to have three stations on the air at the same time (two of them with amps) mainly on CW, but also on SSB and RTTY. Their suggested band plan is as follows:
BAND/MODES CW RTTY SSB
---------- -------------- ------ ------
160m 1826 up 2-5 EU N/A 1843 up
up 5-10 NA N/A 1843 up
dwn 6-11 JA N/A 1843 up
80m 3505 up 2-5 3580 up 1-5 3725 up
40m 7005 up 7034 up 1-3 7075 up + 7145 RX NA
30m 10120 up N/A N/A
20m 14005 up 14091 up 14200 up
17m 18073 up 18102 up 1-5 18140 up 5-15
15m 21005 up 21083 up 21295 up
12m 24893 up 24923 up 1-5 24935 up
10m 28023 up 28085 up 1-5 28480 up

QSL policy and routes as follows:
* Europe, Asia, Africa, Oceania: direct/bureau via Stan, SQ8X:
Stan, P.O.Box 8, 38-600 Lesko, POLAND
* North, Central & South America: direct/bureau via RCCh:
Radio Club de Chile, P.O.Box 13630, 330996 Santiago, CHILE

They will have 2 QSL card types and 3 QSLing routes to chose voluntary from:

1] REGULAR QSL TYPE.
Direct requests: Cards received with 2 USDs or 1 VALID IRC (NO COINS PSE) + SAE = returned via direct. ATTENTION: Your IRC must be a NEW TYPE IRC VALID UNTIL 2013 (cards will be replied in 2010) and must be stamped IN A COUNTRY OF DESTINATION. For instance they can't reply to a card received from Japan if the IRC received from Japan is stamped in the USA etc. ï¿½ Their Post Office refuses such

IRCs. If coins, no SAE, invalid or incorrectly stamped 2010 IRC or insufficient funds to cover postage received = returned via bureau. KEEP IN MIND THE CORRECT QSL ROUTE DEPENDING ON YOUR LOCATION!

Bureau requests: Cards received via bureau = returned via bureau.

OQRS direct requests: 5 USDs or 4 EUROs via OQRS = returned via direct. OQRS will become available once XR0Y gets on the air.

2] SPECIAL, LIMITED EDITION QSL CARD.
There will be an unique, extraordinary QSL card designed and printed in a very limited amount ï¿½ available on voluntary request only via OQRS. Due to special arrangements regarding printing this type of cards, rates for this OQRS will be announced as soon they arrange printing conditions. No doubt it will be something amazing in your QSL collection!

LoTW & eQSL - They will upload logs to LoTW and eQSL after the DXpedition in several months in 2010.

ONLINE LOG - Once they upload their first log, it will become available at: http://www.clublog.org/charts/?c=XR0Y
They plan to upload their logs at this subpage once a day around local midnight or morning hours (so approx. 6.00 or 12 UTC hours each day of the DXpedition). Online log is subject to change due to conditions they will meet at the island (Internet accessibility etc).

LAST MINUTE UPDATE: Reports indicate that the team is missing some of the radio equipment which did not arrive on the island with the team (an Icom 756 pro III and RTTY units). Refer to their Web page for updates.

Z2, ZIMBABWE. Fernando, EA4BB (ex-ST2BF, TU5JL, D2BB, 9Q5BB), informs OPDX that he has obtained his license in Zimbabwe and is "already making some QRM from Harare." His callsign is Z21BB, and he hopes to be using it for the next two years or so. Fernando states, "For the time being I have only dipoles and delta loops for 10, 15 and 20 meters. I plan to build new antennas for the WARC bands as well as two loops for 40 and 80 meters, and maybe to increase power (for the time being I am limited to 100W). Also, later in the year I hope I will put up a 3-element beam for 10, 15 and 20 meters. For now I am mostly on CW, but I will scale up SSB operations as I improve my antenna system. My QSL Manager is Joe, W3HNK. Best regards from Zimbabwe, and CU on the air."

ZB2, GIBRALTAR. Jorma, OH2KI, will be active as ZB2X during the CQ World Wide DX CW Contest (November 28-29th) possibly as a Single-Op/ Single-Band or Single-Op/All-Band entry. QSL via OH2KI.

ZF, CAYMAN ISLANDS (NA-016). John, K6AM, will be active as ZF2AM during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via K6AM, direct or by the Bureau or LoTW. ADDED NOTE: John will also be active during the ARRL DX CW Contest (February 20-21st, 2010) as a

Single-Op/All-Band entry.

ZL, NEW ZEALAND. Rick, AI5P, will once again be active as ZL/AI5P between
November 1-6th. Activity will be from New Zealand's main island, North
Island (OC-036). Rick usually works mostly CW on 40-17 meters running
an IC-706 into wire antennas. QSL via AI5P.

Hey OM

I looked at this guys profile.

I would say he's into telemetry.

If you want to stay away from EMI take it to the 2.4Ghz band.

I don't think he's a ham..

I think he cross forumed this post.

My best guess is he is running into trouble on the VHF/UHF spectrum
where there is tonnes o EMI. QRN and QRM.

Here's a direct quote from the rec.radio.amateur.moderated posting guidelines:

--

"Posts containing unsolicited advice questioning the right, worthiness, suitability and/or readiness of any individual (or members of any group) to be an amateur radio operator are unacceptable in this newsgroup. If an individual chooses to post asking for advice on when or whether to obtain an amateur radio license, or to participate in any type of lawful activity in the Amateur Radio Service, respondents should be careful to address their comments only to the original poster and not explicitly generalize to others in similar situations.

"Similarly, posts that arbitrarily declare certain classes of amateur radio licenses, or certain members of national amateur radio societies (e.g., American Radio Relay League, Radio Amateurs of Canada, Radio Society of Great Britain, Wireless Institute of Australia, etc.), to be more or less worthy than others, are not permitted. Posts that politely encourage individuals to join their local amateur radio society, or to upgrade to higher classes of amateur radio license in order to enjoy greater operating privileges, are permitted, however. Posts that contain reasoned, civil, and fact-based discussion of the activities and internal politics of national amateur radio societies are also permitted."

--

Do portions of the preceding two paragraphs sound like something written by the Walt Disney corporate thought police? They do to me, and they are one of several reasons I continue to avoid moderated Usenet newsgroups. I choose web forums instead, because I find them to be superior to the current state of Usenet newsgroups in either of their possible modes (moderated or open). Moderated groups almost always drift into a state of repression, as exemplified by the two paragraphs quoted above, while the open groups are full of trolls, kooks and spammers.

The reason for the disarray is simple: Usenet is now obsolescent, and most of the serious users of it have already gone elsewhere. Even the open source movement has eschewed Usenet in favor of mailing lists and web forums. Linus Torvalds and the kernel developers of Linux are but one example. They have abandoned the comp.os.linux hierarchy almost completely.

Then there is the reality that major ISPs have been dropping their support of Usenet and shutting down their news servers. AT&T shut down its news servers just a few months ago, and others are following suit (Comcast, for example), afraid that the morality police will hold them liable for the contents of their newsgroups.

Usenet is dying. Eventually all that will probably be left will be Google Groups - a primitive newsgroup interface by almost any standard.

It's time to admit to ourselves that our time is better spent developing web forums than establishing new newsgroups on Usenet. The rec.radio.amateur hierarchy has served its purpose and now should simply be abandoned, along with Usenet itself.

See you around the web.

RAC Bulletin 2009-035E - New Executive Announced.
2009-11-03

During a RAC Board of Directors' teleconference meeting held by the Nomination Committee Chair Bj Madsen, VE5FX, on October 29th, 2009, the following new members of the Executive were elected:

Geoff Bawden, VE4BAW - President
Paul Burggraaf, VO1PRB - Secretary
Margaret Tidman, VA3VXN - Treasurer

These individuals will assume their respective responsibilities on January 1, 2010.

Subsequent to the October 29th meeting, the following Directors and Officers submitted their resignations:

Bob Cooke, VE3DBD (former President) - effective October 31, 2009

Geoff Smith, VA3GS (former Ontario South Director) - effective November 1, 2009

Noel Marcil, VE2BR (former Quebec Director) - effective November 1st, 2009

The remaining positions on the executive will be unchanged as the current officers were acclaimed.

First Vice-President Ian MacFarquhar, VE9IM, pursuant to the RAC By-laws, will assume the duties of President until December 31st, 2009.

The Board and Executive extend their most sincere thanks to Geoff and Noel for their past service to RAC and wish them all the very best in their future endeavours.

The Board also extends its thanks to Bob Cooke for the time he has devoted to RAC as a past Director, Past Vice-President of Field Services and as President during rather challenging times. Bob's involvement with RAC began in the early 1990s as an Assistant Director. He was elected as Ontario South Director in 2001 and served in that capacity until January 2005. Bob was subsequently elected as Vice President, Field Services in January 2006 and served in that role until February 2009 when he was asked by the Board to assume

the responsibilities of President of RAC.

The dedication and commitment of volunteers like Bob,
Geoff, Noel, and many others, result in Canadian Amateurs having
a voice which is heard locally, provincially, nationally
and internationally, and they are to be congratulated for
their outstanding contributions.

G. Linda Friars, VE9GLF
Corporate Secretary - Radio Amateurs of Canada

By your definition, Usenet newsgroups are never open either. Whoever provides Usenet access gets to make the rules, including the deletion of unapproved advertising. To assume that open Usenet newsgroups aren't subject to regulation is to ignore the real world. There is a small army of cancel bots attempting to delete thousands of Usenet posts every day. Just take a look in control.cancel.

> If Usenet "dies" it'll be because of its free nature. There was already
> that successful "child porn" Usenet smear campaign by the government of New
> York. IIRC the RIAA at one point tried to pull a Roe v. Wade by trying to
> get a judge to shut down "Usenet.com". It's only a matter of time...

I maintain that Usenet is dying due to lack of interest and a resulting lack of servers. There is a feedback loop in action: Former Usenet readers get their information and software from non-Usenet sources, and so they quit using their ISP's news server. The ISP notices the dwindling usage, and starts to think about how much money could be saved by simply shutting the server down completely. Someone like Mario Cuomo of New York State comes along and complains about porn, and the ISP uses that as a convenient excuse for shutting down the news server that it really wanted to shut down anyway.

Once the major servers go down, the small Mom and Pop servers start to lose content. That causes their users to leave, etc., etc.

The concensus is that Usenet has been shrinking for the last 10 years (for example, see PC Magazine or see http://dvorak.org/blog), and that the trend is not going to reverse -- not when 95% of Internet users

haven't even heard of Usenet.

As much as I would like to see things be otherwise, I can't see a way around the conclusion that Usenet is fading away. Time to move on.

Don;

Most of the shut downs have more to do with legal hassles with child porn
and file sharing of copyrighted material to name a couple. True more people
have moved to blogs, mailing lists and so on so there has been a reduction
in Usenet group usage over the years but the real reasons are the legal
ones. The US is getting so screwed up you almost can't do anything without
having a Lawyer in your pocket at all times to protect you from the sue
happy people out there.

>>> Do portions of the preceding two paragraphs sound like something written
>>> by the Walt Disney corporate thought police? They do to me, and they
>>> are one of several reasons I continue to avoid moderated Usenet
>>> newsgroups. I choose web forums instead, because I find them to be
>>> superior to the current state of Usenet newsgroups in either of their
>>> possible modes (moderated or open).
>>
>> Web forums are NEVER *open*. Whoever owns the site makes the rules,
>> including banning people for their views, and whoever hosts the site has
>> a
>> contract banning political incorrectness, unapproved advertising, and
>> other
>> speech necessary for a free society.
>
> By your definition, Usenet newsgroups are never open either. Whoever
> provides Usenet access gets to make the rules, including the deletion of
> unapproved advertising. To assume that open Usenet newsgroups aren't
> subject to regulation is to ignore the real world. There is a small
> army of cancel bots attempting to delete thousands of Usenet posts every
> day. Just take a look in control.cancel.
>

>> If Usenet "dies" it'll be because of its free nature. There was already
>> that successful "child porn" Usenet smear campaign by the government of
>> New
>> York. IIRC the RIAA at one point tried to pull a Roe v. Wade by trying to
>> get a judge to shut down "Usenet.com". It's only a matter of time...
>
> I maintain that Usenet is dying due to lack of interest and a resulting
> lack of servers. There is a feedback loop in action: Former Usenet
> readers get their information and software from non-Usenet sources, and
> so they quit using their ISP's news server. The ISP notices the
> dwindling usage, and starts to think about how much money could be saved
> by simply shutting the server down completely. Someone like Mario Cuomo
> of New York State comes along and complains about porn, and the ISP uses
> that as a convenient excuse for shutting down the news server that it
> really wanted to shut down anyway.
>
> Once the major servers go down, the small Mom and Pop servers start to
> lose content. That causes their users to leave, etc., etc.
>
> The concensus is that Usenet has been shrinking for the last 10 years
> (for example, see PC Magazine or see http://dvorak.org/blog), and that
> the trend is not going to reverse -- not when 95% of Internet users
> haven't even heard of Usenet.
>
> As much as I would like to see things be otherwise, I can't see a way
> around the conclusion that Usenet is fading away. Time to move on.

2369. The ARRL Letter for November 5, 2009

==>
+ PUBLIC SERVICE: HAM RADIO OPERATORS ASSIST IN CATALINA ISLAND RESCUE

Around 9:45 on the night of October 23, while attending an overnight
event at the Boy Scouts' Camp Emerald Bay on Santa Catalina Island,
Karl Tso, KI6PCW, and his wife, Deborah Ava, KJ6CRZ, of Topanga,
California, decided to climb a hill to check out the view -- and to see
if they could get into the repeater on the island with their handheld
transceivers. As they climbed the hill, the two radio amateurs heard a
sound; Tso turned his high-powered flashlight on the source, only to
discover a man who had fallen 48 feet to the rocks below, bleeding and
severely injured. Read here
<http://www.arrl.org/news/stories/2009/10/31/11174/?nc=1>.

==> + ARRL RECOGNIZES: GEORGE E. SMITH, AA2EJ, WINS NOBEL PRIZE

Around 5:30 on the morning of October 6, George E. Smith, AA2EJ, of
Barnegat, New Jersey, got a phone call that changed his life: He had
just found out he had won the Nobel Prize in Physics for 2009
```

<http://nobelprize.org/nobel_prizes/physics/laureates/2009/index.html>
"for the invention of an imaging semiconductor circuit -- the CCD
sensor
<http://www.wired.com/gadgetlab/2009/10/ccd-inventors-awarded-nobel-prize-40-
years-on/>."
Smith will share the prize money with two other recipients: Charles K.
Kao, of Standard Telecommunication Laboratories in the United Kingdom
and Chinese University of Hong Kong, and Willard S. Boyle, of Bell
Laboratories. Each recipient will receive a diploma
<http://nobelprize.org/nobel_prizes/diplomas/>, a medal
<http://nobelprize.org/nobel_prizes/medals/> and a document confirming
their share of SEK 10 million
<http://nobelprize.org/nobel_prizes/amounts.html> (about $1.4 million);
Kao will receive 50 percent, while Smith and Boyle will each receive 25
percent of the monetary award.

Kao was recognized by the prize committee for his "groundbreaking
achievements concerning the transmission of light in fibers for optical
communication." His discoveries paved the way for optical fiber
technology, used for almost all telephony and data communication today.
Boyle and Smith invented a digital image sensor -- the CCD -- that has
become an electronic eye in almost all areas of photography.

"My wife Janet, AA2EI, and I sailed around the world for 17 years,"
Smith told the ARRL. "While we were on our boat, we used Amateur Radio,
especially in the South Pacific. Janet was the principal radio
operator. With our radio, we could keep track of other boats in the
area. Over in the Southwest Pacific, there are shore stations there
that provide weather forecasts every day on the ham radio. We would
listen for these, as it was such a tremendous help for us as sailors."

The CCD -- invented in about an hour over lunch when Smith and Boyle
worked at New Jersey's Bell Labs -- was, according to Wired Magazine
<http://www.wired.com/gadgetlab/2009/10/ccd-inventors-awarded-nobel-prize-40-
years-on/>,
the first practical way to let a light-sensitive silicon chip store an
image and then digitize it. In short, it is the basis of today's
digital camera. According to Wired, the "most amazing thing about the
invention" is that Boyle and Smith came up with the design so quickly.
With Bell Labs threatening to take the funds from their department and
transfer the money to other research, Boyle had to come up with a
competing semiconductor design. He got together with Smith, and within
an hour, they came up with the idea and sketched it all out on a
blackboard.

"One morning in October, 1969," Boyle wrote on his Web site
<http://www.flickr.com/photos/cstmweb/3884295553/>, "I was challenged
to create a new kind of computer memory. That afternoon, I got together
with George Smith and brainstormed for an hour or so on a new kind of
semiconductor device, drawing a few sketches and equations on a
blackboard. We called it a charge-coupled device: A 'CCD.' When we had

the shops at Bell Labs make up the device, it worked exactly as expected, much to the surprise of our colleagues."

When asked by the ARRL how he felt about winning the Nobel Prize, he exclaimed, "I feel great! Even though there's a lot of nonsense to go through with it, it's worth it and winning it does wonders for your ego. Aside from the initial shock and having to go through piles of mail, e-mail and returning telephone calls, I know that will calm down. As for the long-range future, I'm getting many invitations to give talks. Next year, I've been invited to speak at a major conference in Seoul, South Korea, another in Portland Oregon and another in Switzerland. I've been invited to France to give a talk, China, too. We need to sit down with a calendar and figure it all out. Having a Nobel makes a big dent in your lifestyle."

Smith told the ARRL that he knew the CCD was under consideration for the Nobel Prize, "but we didn't know exactly if, or when, it would happen. Research that wins the Nobel is often done many years beforehand. In my case, this was 40 year old research. The Prize Committee wants to make sure the research has stood the test of time.

"Amateur Radio has always attracted individuals who want to understand and exploit nature's laws," fellow Nobel Laureate Joe Taylor, K1JT, told the ARRL. "These are essential characteristics for first-rate scientists, as well. The 2009 Nobel Prize in Physics honors the invention of an imaging semiconductor circuit -- the CCD sensor used in digital cameras, the Hubble Space Telescope and many other scientific and consumer devices. It was no great surprise to learn that one of the Laureates, George Smith, is also a radio amateur." Taylor was awarded the Nobel Prize in Physics in 1993 <http://nobelprize.org/nobel_prizes/physics/laureates/1993/> "for the discovery of a new type of pulsar, a discovery that has opened up new possibilities for the study of gravitation."

Next month, Smith will travel to Stockholm, Sweden for the award ceremony on December 10. It is certain that his picture will be taken scores of times by the international media, made possible through the technology that he and Boyle pioneered. Click here <http://www.arrl.org/news/stories/2009/11/03/11182/?nc=1> for more information, including how a CCD works.

==> + OPERATING: FALL FREQUENCY MEASURING TEST THIS MONTH

The W1AW Frequency Measuring Test (FMT) has taken several different formats over the past few years. This year, we return to the "classic" FMT -- measuring the frequency of an unmodulated carrier. Accurate frequency measurement is required of all hams for both regulatory compliance -- "stay in the band!" -- and operating convenience, particularly on the new digital modes. The W1AW FMT will run on November 12, 2009 at 0245 UTC (this is Wednesday evening, November 11, 2009 at 9:45 PM EST). It will replace any W1AW bulletin normally scheduled for that time. It is recommended that participants listen to

W1AW's transmissions prior to the event to get an idea of conditions to see which band (or bands) will be best for measurement purposes. Read more here <http://www.arrl.org/news/stories/2009/11/02/11175/?nc=1>.

==> + LOOK FOR THE DECEMBER QST IN YOUR MAILBOX

The December issue of QST <http://www.arrl.org/qst> is jam-packed with all sorts of news and information that today's Amateur Radio operator needs. From product reviews to experiments, from public service to on-the-air activities, the upcoming issue of QST has something for just about everyone. Click here <http://www.arrl.org/news/stories/2009/11/04/11183/?nc=1> to discover what's in store for you in the December issue of QST, the official journal of the ARRL.

==> ADVOCACY: MORE COSPONSORS FOR HR 2160

Earlier this week, two more Congressional Representatives -- Andre Carson (D-IN-7), and C.W. Bill Young (R-FL-10) -- pledged their support for HR 2160 <http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf>, The Amateur Radio Emergency Communications Enhancement Act of 2009, bringing the total number of cosponsors to 31, including original sponsor Sheila Jackson-Lee <http://www.arrl.org/news/stories/2009/04/30/10792/?nc=1> (D-TX-18). HR 2160 is also sponsored by W. Todd Akin (R-MO-2), Michael Arcuri (D-NY-24), Roscoe Bartlett (R-MD-6), John Boozman (R-AR-3), Madeleine Bordallo (D-Guam), Geoff Davis (R-KY-4), Bob Filner (D-CA-51), Scott Garrett (R-NJ-5), Bart Gordon (D-TN-6), Brett Guthrie (R-KY-02), Maurice Hinchey (D-NY-22), Michael Honda (D-CA-15), Mary Jo Kilroy (D-OH-15), Tom Latham (R-IA-4), Zoe Lofgren (D-CA-16), Blaine Luetkemeyer (R-MO-9), Thaddeus McCotter (R-MI-11), Charlie Melancon (D-LA-3), Candice Miller (R-MI-10), Dennis Moore (D-KS-3), John Olver (D-MA-1), Bill Posey (R-FL-15), Dana Rohrabacher (R-CA-46), Bennie Thompson (D-MS-2), Michael Turner (R-OH-3), Peter Welch (D-VT), David Wu (D-OR-1) and Don Young (R-AK). On the Senate side of Capitol Hill, S 1755 <http://www.arrl.org/news/stories/2009/10/07/11127/?nc=1> -- also called The Amateur Radio Emergency Communications Enhancement Act of 2009 -- cleared the Senate Homeland Security and Governmental Affairs Committee with a favorable recommendation by voice vote. It now proceeds to committee staff to prepare the report for the full Senate. Click here <http://www.arrl.org/news/stories/2009/05/12/10818> for information on how to encourage your Congressional representative to sponsor HR 2160.

==> ARRL RECOGNIZES: THREE AMATEURS INDUCTED INTO CONSUMER ELECTRONICS HALL OF FAME

Earlier this year, the Consumer Electronics Association (CEA) named 13 men -- including three radio amateurs -- to the Consumer Electronics Hall of Fame. The honorees were inducted last month at CEA's Industry

Forum in Phoenix, Arizona. Former ARRL Rocky Mountain Division Director Walt Stinson, W0CP, of Englewood, Colorado; Former ARRL Vice President and Central Division Director R.H.G. Mathews, W9ZN (ex-9ZN) (SK), and Karl Hassel, W9PXW (ex-8AKG) (SK). Read more here <http://www.arrl.org/news/stories/2009/11/02/11177/?nc=1>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, such as a recent webinar concerning Amateur Radio and pecuniary interests, the Fourth Annual ARRL On-Line Auction, orientation for newly elected Section Managers and more. This installment covers the month of October. Read more here <http://www.arrl.org/news/features/2009/11/02/11179/?nc=1>.

==> + MARS: MARS CUTS RIBBON ON NEW PENTAGON STATION

A military institution designed to provide emergency communications has moved to new quarters in the Pentagon. On October 21, John G. Grimes, the former Assistant Secretary of Defense for Networks and Information Integration, cut the ribbon on the new Military Affiliate Radio System (MARS) station, now located on the fifth floor of the Pentagon. The facility -- manned by the Pentagon Amateur Radio Club (PARC) -- is packed with amateur radios, radiotelephone patches, computers and data links. "This is a great facility, manned totally by volunteers," Grimes told the crowd who came to see the new station. "It's a crucial capability for our country." Read more here <http://www.arrl.org/news/stories/2009/11/03/11180/?nc=1>.

==> NOW YOU KNOW!: HIRAM PERCY MAXIM AND THE W1AW STATION

More than 1000 visitors come to see ARRL and operate W1AW each year. Each visitor has a chance to tour ARRL HQ and meet and talk with staff, and see all that the League does to promote the Amateur Radio Service. When they go over to W1AW, some guests want to know if the station was once the home of Hiram Percy Maxim, cofounder and first President of the ARRL.

In February 1936, when Maxim died of pneumonia on his way back from visiting Lick Observatory <http://www.ucolick.org/> on Mt Hamilton in San Jose, California, the ARRL HQ station -- W1MK -- was located at Brainard Field <http://en.wikipedia.org/wiki/Hartford-Brainard_Airport> in Hartford. In March 1936, the Connecticut River flooded and the building where the station was housed was destroyed by the flood waters. The League's Board of Directors decided that a new station be built on a more suitable site in memory of Maxim. In December 1936, the FCC -- in the first action of its kind -- assigned the call W1AW to ARRL in memoriam. The ARRL purchased a 7 acre site in Newington, about 5 miles southwest of Brainard Field. From the flood until September 1938, W1MK operated from ARRL Headquarters, then on LaSalle Road in

West Hartford. On September 2, 1938 -- what would have been Maxim's 69th birthday -- W1AW, the Hiram Percy Maxim Memorial Station, was dedicated, with the ceremony broadcast across the country by CBS Radio. So, no, the building where W1AW is located was never home to Hiram Percy Maxim; in fact, he never saw it. But even so, we know that his spirit lives on every time we sit down at a radio. Now you know!

==> SOLAR UPDATE

Tad "You may go, with Sun or moon <http://englishhistory.net/keats/poetry/robinhood.html>" Cook, K7RA, reports: The recent sunspot activity has drifted beyond view, but that region returns in the middle of November. The average daily sunspot number for October was 7, the highest in the past 19 months. Coming up this weekend is the ARRL CW Sweepstakes -- there is a possibility of a coronal hole causing unsettled geomagnetic activity, though the past few days have been exceptionally quiet. Look for more information in the Solar Update, available on the ARRL Web site on Friday, November 6. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' Robin Hood. To a Friend <http://englishhistory.net/keats/poetry/robinhood.html>.

==> + ARRL RECOGNIZES: JOHN E. PORTUNE, W6NBC, WINS OCTOBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for October is John E. Portune, W6NBC, for his article "The Quadrifilar Helix as a 2 Meter Base Antenna Station." Congratulations John! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the November issue by Monday, November 30.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=Xm1dTXtT5vg> This week is the ARRL Sweepstakes (CW) <http://www.arrl.org/contests/rules/2009/novss.html> on November 7-8. There is an NCCC Sprint on November 6 and the Ukrainian DX Contest is November 7-8. The North America Collegiate ARC Championship (CW) is November 7-9. The SKCC Weekend Sprint is November 8. Next week, there is another NCCC Sprint on November 13. The Bill Windle QSO Party is November 14. The Worked All Europe DX Contest (RTTY), the Kentucky QSO Party, the JIDX Phone Contest is November 14-15 and the OK/OM DX Contest (CW) are November 14-15. The CQ-WE Contest (SSB, CW and Digital) is November 14-16. The Run for the Bacon QRP Contest is November 16 and the NAQCC Straight Key/Bug Sprint is November 19. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest

Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> DO YOU KNOW?: A TRIVIA ANSWER FOR OUR READERS

Last week, ARRL News Editor S. Khrystyne Keane, K1SFA, told ARRL Letter readers about the long and proud history of the ARRL Sweepstakes <http://www.arrl.org/news/stories/2009/10/29/11170/?nc=1>, mentioning that at one point, The Philippines was a multiplier in the Sweepstakes, as was Cuba (as part of the West Indies Section). We wondered what years that The Philippines and the West Indies Sections ceased to be multipliers in Sweepstakes. Unfortunately, we didn't receive any correct answers. The Philippines was no longer a Section as of 1946 and in August 1988, two new Sections -- Puerto Rico and US Virgin Islands -- replaced the West Indies Section (Cuba disappeared from the West Indies Section in 1940). Thanks to everyone who sent in answers. Look for another trivia question in a future edition of The ARRL Letter.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, November 22, 2009, for these online course sessions beginning on Friday, December 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

I wish more Usenet newsgroups WERE moderated. It might even allow us to
reclain our newsgroups without having to put up with ads for Viagra and
kiddie porn, as well as the more egregious abusers who flame and spew their
vitriol everywhere.
>

Web Forums simply suck. They're much slower (for the reader) and increase
the bandwidth greatly for the same content. And they're full of net nazis,
too.

Amateur Radio Newsline(tm) Report 1682 - November 6 2009

Amateur Radio Newsline report number 1682 with a release date of
Friday, November 6th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Georgia hams are given a $165,000 grant to
build a D-Star rescue radio network, two hams help save a life on
Catalina Island, the next Global Amateur Radio Emergency
Communications Conference will take place in Curacao and two pre-teens
come up with a cheap solution to the Digital Reception problem in the
USA. Find out the details on Amateur Radio Newsline(tm) report number
1682 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: GEORGIA HAMS GIVEN $165,000 TO BUILD D-STAR RESCUE RADIO
NETWORK

Its one of the largest government grants ever given to ham radio
emergency communications. This as $165,000 in Federal funding has been
secured by Georgia Emergency Management Agency to complete a statewide
D-Star based ham radio emergency communications network.. Amateur
Radio Newsline's David Black, KB4KCH, has the story of the grant and
the all digital rescue radio network that it will create:

--

The network's creation is the result of a dream that started in 2005
according to John Davis, WB4QDX. That's when a vision was born for what
amateur radio emergency communications could one day achieve in the
state of Georgia. Mark Fehlig, WA6NGC, is the former director of
Engineering for the state's Public Broadcasting System. When the
opportunity arose to install two amateur radio antennas on each of nine
television towers providing statewide coverage, Fehlig jumped into
action. Fehlig designated Georgia's Amateur Radio Emergency Service to
control the use of those sites for emergency communications. The next
task was to figure out the best technology to use at those sites.

Linked FM repeaters and packet were among the modes considered. But
radio amateurs were also watching emerging D-Star technology. They
recognized it as a state of the art platform providing simultaneous
voice and data communications. Knowing that D-star also allows
repeaters to be linked on a flexible basis and that it permits
simultaneous voice and low speed data along with high speed Internet

connectivity at 1-point-2 Gigahertz...and the decision was made to go D-star for the state's new system.

When the network is finished, radio amateurs will have access to voice and data repeaters on all nine towers across the state, operating on 2 meters, 440 MHz and 1-point-2 Gigahertz. Because those towers are strategically located to provide maximum public television coverage, amateur radio communications will benefit from wide area coverage, as well. Commercial grade inch and 5/8 transmission lines will connect the antennas, which will be between 500 and 600 feet above ground. Georgia's Public Broadcasting Network will provide indoor space for equipment, along with backup power at each site. Internet access will be available, too, thanks to the broadcasting system's DS-3 data network...this means flexible linking of repeaters will be possible using a stock D-Star interface.

The federal money will also pay for 20 dual-band D-star radios to be installed at EMA offices across the state, along with a portable UHF D-Star repeater available for emergency deployment. In addition, three 1-point-2 Gigahertz D-star radios with laptops for sending data and photos from field locations will also be purchased. The money will also be used to build a robust reflector to serve the state's network during emergency conditions and also for general use during non-emergency times. Two of the emergency network's D-star repeaters are already on the air. One is located at Pembroke, Georgia, near Savannah. The second operates from atop Stone Mountain, serving the Atlanta metro area. The complete Georgia D-star amateur radio emergency communications network is expected to be in operation in early 2010.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, at the South-East bureau in Birmingham, Alabama.

--

The Georgia network will complement other D-Star based emergency communications systems planned or in operation in the neighboring states of Alabama, Florida and South Carolina. Once all are in operation, it will create a regional ham radio emergency capability across the American Southeast. This monetary grant is only second in size to one of $250,000 given by the governor of Oregon in 2007 to that states ham radio first responders. This, to build a Winlink-based state-wide amateur radio emergency communications network. (WB4QDX, Georgia ARES via Southgate)

**

RESCUE RADIO: TWO HAMS CREDITED WITH SAVING A LIFE ON CATALINA ISLAND

Karl Tso, KI6PCW, and wife Deborah Ava, KJ6CRZ, put their ham radio emergency training to use to help rescue an unidentified man after an accident on Catalina Island. This as the recently trained volunteer ham radio operators rescued a man after he fell more than 40 feet onto rocks below.

Tso and Ava are both of Topanga, California which is a Los Angeles suburb and are members of the Topanga Disaster Radio Team. The couple had climbed a hill on Catalina Island to check out a repeater when they saw a 61-year-old man bleeding and moaning.

Tso and Ava had their hand-held radios with them. They used the equipment to make contact with other radio amateurs on the California mainland, who called 911 to report the emergency. Los Angeles County firefighter paramedics responded and the injured man was quickly flown by medevac helicopter to St Mary's Hospital in Long Beach for treatment.

Authorities say that the couple's quick thinking and knowledge of ham radio helped save the injured man's life. The Topanga Disaster Radio Team they work with is a part of the Topanga Coalition for Emergency Preparedness. (Published news reports)

**

RESCUE RADIO: GAREC-2010 TO BE HELD IN OCTOBER 2010 IN CURACAO

GAREC-2010, the next Global Amateur Radio Emergency Communications Conference it will take place next fall in Curacao. The dates will be October 11th and 12th with the theme of the meeting to be "Learning through practicing.. More details of next Octobers gathering will be announced as they become available. Meantime keep an eye on the conference website for updates. The URL is www.rientola.fi/oh3ag/garec (OH1VR)

ON THE AIR: HAMS TO HELP FIGHT AIDS WITH HIV/AIDS AWARENESS THROUGH AMATEUR RADIO OPERATION

Ham radio is joining the world-wide campaign to help find a cure for Acquired Immune Deficiency Syndrome better known by the acronym AIDS. Bruce Tennant, K6PZW, has more:

--

To do its part to conquer this killer disease, a special amateur radio station will be operating at the Joint United Nations Program on HIV/AIDS or UNAIDS headquarters in Geneva, Switzerland. This, from December 1st to the 7th using the special event callsign 4U1AIDS. The operation is part of an invitation from UNAIDS to all peoples globally to observe the "World AIDS Day" and demonstrate global H-I-V awareness.

Begun on December 1st, 1988, the aim of "World AIDS Day" is to raise money, increase awareness, fight prejudice and improve education regarding H-I-V and AIDS. UNAIDS estimates, there are now 33.2 million people living with H-I-V, including 2.5 million children.

Those who hold QSO's with 4U1AIDS on any three bands will awarded a special commemorative World AIDS Day Award certificate. Amateur radio stations that have radio contact with 4U1AIDS on five bands will be

awarded a special commemorative UNAIDS pennant. All contacts will be sent a special 4U1AIDS QSL card.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For further information, please contact with Andrey Fedorov, UNAIDS, 20 Avenue Appia, CH-1211, Geneva 27, Switzerland. More information is on-line at www.DX-World.com/4u1aids (UNAIDS release)

RADIO RULES: CANADA BEGINS ISSUING 500 kHz EXPERIMENTAL LICENSES - FIRST TRANS-ATLANTIC CONTACT MADE

Some good news for our listeners to the North. After months of negotiations between Radio Amateurs of Canada and telecommunications regulator Industry Canada the first two licenses granted to Canadians for experiments at 504 to 509 kHz have been issued. This, in preparation for the 2012 World Radiocommunications Conference.

Jack Leahy, VE1ZZ, has been assigned call sign VX9PSO in the Developmental Service for his experimental transmissions. Joe Craig, VO1NA, has been assigned call sign VX9MRC. Both of these stations have been on the air already, with VX9PSO having been reported at 504.6 kHz and VX9MRC at 507.77 kHz.

And this late news. Finbar O'Connor, EI0CF, in County Donegal ,Ireland reports that he has had a QSO with Joe Craig, VX9MRC. He says that Joe was on 507.77 kHz while he was on 507..056 kHz. The respective reports were, EI0CF heard in Canada at 559 and VX9MRC heard at 529. The mode was CW, using straight Morse keys.

This is the first Ireland to Canada contact on the 500 kHz band. Signal reports to any of the now operational 500 kHz stations can be sent to their call book addresses. Two more authorizations, in Ontario and British Columbia, are expected soon. (Radio Amateurs of Canada, IRTS)

RESTRUCTURING: THAILAND EXPANDS 40 METER HAM ALLOCATION

Thailand's 7 MHz expansion has received a go ahead from that nations telecommunications regulator. John Gagen, W2YR reports that he's just received information from the International Secretary of the Radio Amateur Society of Thailand that the Thai National Telecommunications Council has approved the society's recent request for the expansion of 40 meters. This giving hams in that nation a primary status of 7.0 to 7.2 MHz.

For those not aware, this is the same bandplan that had been approved internationally at the WRC-03 conference and was to be effective March 29 this year, pending approval on a country-by-country basis. For Thailand it happens about the time that this weeks newscast goes to air on Friday, November 6th. (W2YR via OPDX)

ARISS CELEBRATES ITS 500th SCHOOL ROOM CONTACT

The 500th ARISS classroom to space station contact has taken[place. On Tuesday, October 27th, I-S-S Commander Frank De Winne, ON1DWN answered questions from students at the new Copernic Science Center in Warsaw, Poland. This was the 500th school contact since ARISS began operations in 2000.

This was a telebridge contact operated by ARISS ground station of Shayne Lind, VK4KHZ located in Queensland, Australia. At the end of the contact, De Winne thanked Lynd for the many years of providing ARISS telebridge contacts. Lynd in turn shared these thanks with his colleagues of the 11 other telebridge ground stations which cover all five continents. (ARISS)

HAM RADIO IN SPACE: STUDENT PAPERS INVITED TO FLY ON ARISSAT 1

Still with ham radio space and educational news, word that the ARISSAT One development team is inviting school students from around the world to submit papers or other visual items that will be flown on that ham radio satellite. Submissions should be in jpg or pdf format such as a paper or a study done on science, technology, engineering, or math. Also accepted will be items such as a drawing of space craft , a schematic, a journal kept on an educational topic, a story, photo or news article about a class doing a hands on educational project.

To take part, the student or teacher should submit the material by e-mail to Dave Jordan's to aa4kn (at) amsat (dot) org and also copied to gaston (dot) bertels (at) skynet (dot) be. They will check that content is appropriate to students and select those to fly on ARISSAT One. The deadline for submissions is on Sunday, November 15th. (ON4WF)

ENFORCEMENT: UNLICENSED BROADCASTER HIT WITH $2500 FINE

The FCC has issued a $2500 fine to Frankie Grover of Lakeland, Florida. This for operating an unlicensed transmitter on 87.9 MHz from a location known as the Kingston Lakeside Inn and using the unassigned call letters WGBC FM

According to the FCC, its agents used direction finding to locate the signal. On August 18, 2009, the Tampa Office issued a Notice of Apparent Liability for Forfeiture to Mr. Grover in the amount of $10,000. This, for the apparent willful and repeated violation of Section 301 of the Act.

Grover submitted a response to the NAL. He admitted to operating the station but requested a reduction or cancellation of the proposed forfeiture saying the level of proposed fine would pose a financial hardship. He also provided the FCC with the required financial records to prove his claim. The FCC accepted his evidence and has reduced the fine to $2500 which he was given the customary 30 days to pay or to file a further appeal. (FCC)

**

ENFORCEMENT: IRMA FRAUSTO HAS COMPANY IN THE UK

You probably remember the story of Irma Frausto of Compton, California that we reported on a few weeks ago. Her amplified TV antenna allegedly self-oscillated on 840 MHz and caused interfere to a cell site. The FCC sent her a Citation even though there was nothing in the Commission's write up to suggest that she knew about the self-oscillations or had the wherewithal to eliminate them.

Well now Irma has company. A 12 year old schoolboy in Great Britain by the name of Nickie Chamberlain has been busted because his self-oscillating TV antenna was interfering with air traffic over his home in Linslade, Beds in the UK. The Ofcom engineer ordered the father to dispose of the aerial immediately.

Air traffic controllers first noticed the communication problems on the flight path into London Luton Airport on October 6th .According to Ofcom, pilots coming into land at the airport were loosing contact with the control tower because the faulty antenna preamp was transmitting on the same frequency as the aircraft radios. You can read more at http://tinyurl.com/yhj37ab (CGC, Telegraph.com)

RESCUE RADIO: IARU GLOBALSET 2009 ON NOVEMBER 14

Saturday November 14TH, is the date of the International Amateur Radio Union will activate "GlobalSET 2009.", This is a Global Simulated Emergency Test running from 1800 to 2200 UTC that encourages hams world wide to pass simulated emergency traffic using standard National Traffic System format.

This drill is being billed as a great opportunity for all radio amateurs to observe and their practice important traffic passing

skills. These are skills that are deemed fundamental to the role of amateur radio in crisis communications conditions.

Rules and a list of participating stations may be found at www.iaru-r1.org. Search under the heading, Emergency Communications Working Group. (IARU)

**

RADIO LAW: REFARMING TV SPECTRUM FOR BROADBAND

Federal regulators are considering taking back some spectrum from television broadcasters and auctioning it off to wireless companies. This so as to increase the availability of wireless broadband services for the general public.

At this stage, FCC officials are mostly trying to get input from broadcasters and others. The proposal will be released in February of 2010. TV station owners are likely to fight the plan, although the FCC is envisioning paying broadcasters for any airwaves that are repossessed and auctioned away. (FCC)

**

HAM HAPPENINGS: SEVHFS CONFERENCE CALLS FOR PAPERS

The Southeastern VHF Society is calling for the submission of papers and presentations for the upcoming 14th Annual Southeastern VHF Society Conference. The event is slated to be held at Morehead State University in Morehead, Kentucky on April 23rd and 24th of 2010. The deadline for the submission is February 5, For more information please visit www dot sevhfs dot org on the World Wide Web. (K4IDC)

NAMES IN THE NEWS: WA6ITF RETIRES FROM FOX TV AFTER 30 YEARS

And from Los Angeles comes word that our own producer Bill Pasternak, WA6ITF, has retired from Fox Television after a career that spanned close to three decades at the networks flagship station KTTV. He started in 1980 as a bench technician maintaining 3/4 inch U-Matic videocassette recorders used by the stations news operation. Over the

years he did just about every job one finds at a television station. He says that the last 12 years working as the engineering contact with the news department have been the ones he has enjoyed the most. There he's not only worked the technical side but also has been on the air several times as an expert on all things electronic and radio communications for news stories reported by Hal Eisner, Phil Schuman and others.

Bill tells Newsline that he's only retired from broadcasting but not from life. He says that he has a number of projects he wants to undertake including the production of a television documentary on a medical researcher and completing the script for a two act stage play. He also will be continuing his V-H-F column in Worldradio Magazine and producing these weekly Amateur Radio Newsline reports. That coupled with a wife, daughter, son-in-law and four very active grandkids will keep Bill a very busy 67 year old boy.

Pictures of his surprise retirement party put on by his many friends at KTTV are on Bill's photo album page on the Facebook Social Networking service. Look for his album under the name Bill Pasternak +titled Saying Goodbye to KTTV after Almost 30 years. (ARNewsline(tm))

**

NAMES IN THE NEWS: ARRL PRESIDENT JOEL HARRISON, W5ZN, NOT TO SEEK REELECTION

Someone else retiring is ARRL President, Joel Harrison, W5ZN. Late last week Harrison announced that he has decided not to seek reelection when his current term expires on January 16, 2010.

Joel Harrison served two terms as ARRL president. He began his ham radio political career in 1983 when he became the Section Manager in the League's Arkansas Section. Subsequently, he has served as Delta Division Director and as an ARRL Vice President. In 2000, he was elected First Vice President. He was elected League President in 2006. (ARRL)

**

BREAK 2

Coming to you this week from beneath the Southern Cross in Auckland, New Zealand, this is ham radio news for today's radio amateur. We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

CHANGING OF THE GUARD: FORMER ARRL DIRECTOR PAUL VYDARNEY, WB2VUK - SK

Some sad news to report. Word that former ARRL Director Paul Vydareny, WB2VUK, of Tarrytown, New York, passed away Thursday, October 22, from a brain aneurysm.

Paul Vydareny had a long record of volunteer service with the ARRL. Prior to becoming Director, he served as Section Manager of the Eastern New York Section from 1980 to 1996 and as Vice Director from 1987 to 1996. In those days Vice Directors were once allowed to serve simultaneously as Section Managers.

Vydareny was elevated from Vice Director to Director when then-Director Steve Mendelsohn, W2ML, was elected ARRL First Vice President . But he resigned as Director in September of 1996, citing job and church obligations as preventing him from doing what he considered a proper job of fulfilling his duties as Director.

Paul Vydarney, WB2VUK, was only age 65 when he passed. In his honor every net in the 2009 New York City Marathon was announced as: "This is -- whomever -- at the mic of the WB2VUK Marathon Network." (ARRL, W2ML)

**

HAM RADIO IN SPACE: LUSAT-1 FALLS SILENT

AMSAT-Argentina reports that its LUSAT-1, LO-19 ham radio satellite stopped transmitting CW telemetry on 437.125 MHz on or around October 20th. LU1ESY says that he last received a signal on October 11th after which he noted a drift in the downlink frequency beyond the expected Doppler shift.

AMSAT-Argentina says that it hopes to revive LUSAT to allow it to celebrate its 20 years in space next January 23. It also adds that it welcomes any reception reports of the now out of communications ham radio bird. (AMSAT-Argentina)

**

RADIO HISTORY: THE WORLDS FIRST RADIO STATION

What is the world's first radio station? Although AM radio broadcasts were tested in 1906 and used for voice and music broadcasts up until WW1 it wasn't until 1916 in Wilkinsburg, Pennsylvania when 8XK began regularly scheduled broadcasts. 8XK would receive the first official broadcasting license in 1920 with the call sign KDKA.

But there's more to this story. At 6:00 PM on November 2, 1920 the US presidential election returns were announced from a shack in East Pittsburgh by Leo Rosenberg and KDKA became the world's first commercial radio station. More on this story is at the National Museum of Broadcasting website at the U-R-L found in this weeks printed Newsline report.

ON THE AIR: MARCONI NOBEL 100 AWARD.

To celebrate the 100th anniversary of inventor Guglieliamo Marconi receiving the Nobel Prize, a special on the air event from Sweden is planned. The idea is to listen for and work 10 different special event "SI" prefix stations between November 9th and December 10th.

The calls to listen out for are SI0GM, SI1GM, SI2GM, SI3GM, SI4GM, SI5GM, SI6GM and SI7GM. Other Swedish stations may be using the special prefix SI, but only the above stations count. Each anniversary station counts once per band. No endorsements. Logs go to SSA Awards Manager, Bengt Hogkvist, Ostbygatan 24 C, SE-531 37 Lidkoping, Sweden. (SSA AWARDS)

**

ON THE AIR: INTERNATIONAL NAVAL CONTEST DECEMBER 12 - 13

The International Naval Contest 2009 sponsored by Portuguese Navy Hamradio Club takes place starting at 16:00 UTC on Saturday, December 12th and concluding at 15:59 UTC on Sunday the 13th. Modes used are only CW and SSB on 80, 40, 20, 15 and 10 meters. For more information by e-mail please write to inc (dot)contest09 (at) nra (dot) pt

**

DX

In DX, word that DL7VSN is once again heading to Tanzania and will probably be active as 5H1HS, this time from the Kilimanjaro area. He was expected to begin his operations on November 1st but the length of his length of stay was not mentioned. Activity will be 160 through 10 meters using mainly CW and RTTY. If all plans go well he may also get to activate his 5th Islands on the Air group from this DXCC entity for one or two days. DL7VSN says that he will also be in the Serengeti and Tarangire National Park starting November 18th, and hopes to be active from these areas as well. QSL via his home callsign.

G4OHX, will be active as 5R8HX from Madagascar between December 28th and January 3rd of 2010. His operation will be mainly using CW. He will also be active portable ZS5 between January 4th to the 17th. QSL direct only via his home callsign.

If you are looking for a contact with Singapore then listen out for 9V1JP who is a new operator from there and has been active on 20 meters. James says via QRZ.com that he is in a very challenging environment and is trying hard to put out a decent signal on HF. He also says that in the QSL area that he is in the process of designing them, and they should be good and ready to begin sending them out in the spring of 2010.

JK2VOC says that he will be active from BA4TB station in China. This, between November 27th to the 30th including the CQ World Wide DX CW

Contest on November 28th and 29th. QSL via JK2VOC.

Lastly, YV5IAL will be portable CE0 from Easter Island between January 8th and 11th of 2010. This will be a QRP, portable, holiday style operation. Activity will use the PSK31 digital mode on 14070.15 kHz from 2200 to 0100 UTC daily. He may occasionally be on 40, 30 and 15 meters as well. QSL via this operation via his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: KIDS SOLVE THE DTV RECEPTION PROBLEM

And finally this week, if you or someone you know are having reception problems on your new digital television or converter box, the problem is likely with the antenna. Most rabbit ear or loop indoor antennas are insufficient for DTV reception. Unfortunately, a lot of folks are not allowed to put antennas on their roof. With a solution, enter Naiomi and Noah Miller. They are the pre-teen children of FCC O-E-T attorney James Miller. With a little help from dad, the two kids take you on a "Watch Mr. Wizard" like journey into how to homebrew your own indoor D-T-V antenna using the magic of science found in everyday living:

--

Audio here from YouTube.com

--

The antenna that the Miller kids built is based on the Gray-Hoverman Digital TV Antenna design but without the rear reflector. It in turn is rooted on the design of the late Doyt R. Hoverman who created and did the early work on this design long before the days of computer antenna modeling programs. More on this design can be found at www.digitalhome.ca/ota/superantenna. You can see the video of Naiomi and Noah Miller building their home-brew version of it on YouTube at www.youtube.com/watch?v=YaYDtOqpTOI. Trust me when I tell you that it's a few of the best moments you will spend on-line this week. (CGC, Audio courtesy of YouTube.com)

GB2RS NEWS

Sunday 8th November 2009

The news headlines

* Two Canadian stations on 500MHz

* St Helena Day broadcasts

* Notice of Variation for GB3WX

On 30 October, Canada issued two licences in the Developmental Service in the range 504 to 509kHz. VE1ZZ has been assigned VX9PSO and is reported to be on 504.6kHz. VO1NA has been assigned VX9MRC and is reported to be on 507.77 and 508.5 kHz. Two more stations, VE3OHH and VE7BDQ, are expected to become active soon.

Radio St. Helena Day will be on Saturday 14 November. For Europe, the broadcast will be from 2200 to 2330UTC on 11.0925MHz USB. To get a QSL from Radio St. Helena, you must send a written and verifiable reception report by airmail and include sufficient return postage, which should be 5 euros or 3 US dollars. E- mail-reports will be not be verified and recordings will not be returned. Your reports should be sent to Radio St Helena, PO Box 93, Jamestown, St. Helena, STHL 1ZZ, South Atlantic Ocean, via AIRMAIL, via United Kingdom & Ascension. The last two lines of the address are very important.

The recently postponed Train the Trainer for Reading, Berkshire has now been rescheduled for Saturday 21 November 2009. It will be located in the Boardroom, Nabishi UK Ltd, 16c Upton Road, Reading, Berkshire RG30 4BJ. The start time will be 9.30am. For further information please contact Dr Alison Johnston, G8ROG by email to g8rog@apj1.co.uk or by phone on 0118 954 5368 in the evenings or visit the regional RSGB website www.rsgb-region-9.org.uk.

A Notice of Variation for GB3WX, the 6m and 10m cross-band repeater, was issued on 3 November. The Wessex Repeater Group would like to express their thanks go to all at the ETCC and Ofcom for their support with this project.

Colchester Radio Amateurs are holding a Foundation licence course. Two evening tutorial sessions take place on Wednesday 11 and 18 November. The practical activities and examination take place during the day on Saturday 21 November. For further details contact Kevan, 2E0WMG on 0776

654 3784 or by e-mail to colchesterradioamateurs@hotmail.co.uk.

The next round of Advanced classes start in Bath on 7 January, aiming for the June/July exam. Classes run every Thursday from 7 to 9pm. Full details can be had from Steve Hartley, G0FUW, who is QTHR and can be e-mailed using his g0fuw@tiscali.co.uk. Steve and his team are also happy to support distance learning for those that cannot make the classes. Steve also has a few places left at the 3rd Bath Buildathon, which takes place on Saturday 5 December. The project is the Walford Electronics Brendon 80m double sideband transceiver. The Buildathon coincides with the Bath Christmas Market, should you wish to make a weekend of it. Rumour has it that Santa may be operating stroke sled mobile for the first QSOs with the newly constructed rigs.

2

And now for the details of rallies and events for the coming week

The Rochdale and District Radio Society Traditional Radio Rally will be held on Saturday 14 November at St Vincent's Church Hall, Caldershaw Road, Rochdale OL12 7QL. Doors open at 10.30am, admission is £2.50 and there are concessions for under 12 and seniors. There will be a Bring & Buy and tables are £5 for those wishing to sell their own radio related items. More details from Dave, G0PUD on 07710 243107.

On Sunday 15 November, the CATS Radio & Electronics Bazaar will take place at the 1st Coulsdon Scout HQ, at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. Doors open from 10am to 1pm and entry is £1. Car parking is free and you will find the usual Bring & Buy as well as catering. Details from Andy G8JAC, e-mail g8jac@btinternet.com.

Now for the news of special events

Members of the Galway VHF Group will be operating an HF station for a 24 hour period from lifeboat stations in County Galway. On 14 and 15 November they will operate from the Aran Island Lifeboat station at Kilronan, Inishmore. There will be a special QSL card for all contacts made and SWL reports will also be welcomed.

The Mid Ulster Amateur Radio Club will be transmitting from Brownlow House in Lurgan, Co Armagh on Wednesday 11 November from 10am for Armistice Day, using the special event callsign GB2AD. This location was chosen as it has been used in both World Wars. It was a Battalion HQ in WW1 and American HQ in WW2. The club will be operating all bands and modes throughout the day, so listen out.

Aberdare and District Amateur Radio Society will be running a special event station to commemorate Armistice Day on 11 November with the callsign GB0AD. The call will be active until 15 November and operating times can be viewed at www.radioclubs.net/aadars.

GB1HF will be on the air on 14 November from Northern Ireland to commemorate the life of Harry Ferguson the inventor and engineer.

And now the HF DX news compiled from 425 DX News and other sources.

T30KI and T30IW will be on the air from Western Kiribati between 10 and 16 November. Activity will be on HF plus 6m as conditions permit using SSB and CW. QSL via N1EMC.

PW2IO and PW2TA will activate Cabras Island, which is IOTA reference SA-071, between 19 and 23 November. They will operate two separate stations running 300W and 100W respectively. Both stations will work CW and SSB. The main bands to be used are 15, 17, 20, 30 and 40m, on IOTA frequencies. Additional information will be available at QRZ.com.

F6AML will be on the air from the Union des Comores using the callsign D68F from 13 to 23 November. QSL via F6AML, either via bureau or direct. More details on QRZ.com.

DJ8NK, DM2RUM and DM2XO will sign VP2MNK, VP2MUM and VP2MXO from Montserrat until 15 November, all bands and modes. QSL to their home calls direct or via bureau.

3

DL7DF and friends will operate from Phu Quoc Island, which is IOTA reference AS-128, until 17 November, with one station on CW and SSB and one station on RTTY, PSK31 and SSTV. They have a web page. QSL via DL7DF either direct or via the DL QSL Bureau.

An international team is heading to Samoa, prefix 5W, between 10 and 17 November. Plans are to have two stations including amplifiers for all-band activity. More details on IK1PMR's website.

Now the contest news

10 November sees the 432MHz UK Activity Contest between 1900 and 2130UTC. The exchange is signal report, serial number and locator.

RSGB HF events begin on Thursday 12th with the SSB leg of 80m Club Sprints. It takes place between 1900 and 2030UTC. The exchange is serial number and name. November is the final month of the series.

Two days later, on the 14th, it's the Club Calls Contest, when individuals from clubs compete as teams. The unique aspect of CCC is that part of the exchange is the name of your club (assuming you are a member of one). In the past it has been apparent that some less skilled ops have either not given the name of their club exactly the same way for every QSO or have given it wrongly, making it appear that there are multiple clubs with similar names, for example Shillingbury Radio Society or Shillingbury Radio Club. It could be a good idea for the co-ordinators of a club entry to give each operator a briefing and a card printed with the exact wording that should be given, because the adjudicator, Rob, G4LMW, is going to check them carefully. The contest takes place between 20000 and 2300UTC and the exchange is signal

report, serial number and club info.

Now the solar factual data for the period from the 26th October to the 1st of November, compiled on 2nd November by Neil Clarke, G0CAS.

Solar activity was low on some days. In total 9 C class solar flares occurred, five of which took place in a 6 hour period during the morning of the 27th. A coronal mass ejection took place on the 31st associated with a C class solar flare. All this activity was responsible to a new cycle sunspot group, the largest so far this cycle. Solar flux levels was 82 units on the 28th but then gradually declined to 72 units by the 1st as the group rotated out of view. If the group survives its transit on the far side of the Sun it should rotate back into view around the 12th or the 13th of November. This as been the most active week since the end of March last year. The 90 day solar flux average on the 1st was 71 units, that's two units up on last week. X-ray flux levels increased above the minimum reporting level all week and peaked at A7.5 units. The average was A4.2. All this adds up to more compelling evidence that sunspot minimum is now behind us. We must however, keep our feet on the ground. We are still in the minimum phase of the sunspot cycle and it will be a couple of years yet before activity will be routinely like this. The latest forecast for the next maximum is in the spring of 2013. Geomagnetic activity was quiet everyday except for the 30th which increased to `active' levels due possibly to a sector boundary crossing. The Ap index was 11 units on that day and the average was Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 300 and 430 kilometres per second. Particle densities increased to 15 and 17 particles per cubic centimetre on the 29th and the 30th respectively; otherwise they remained below 10 particles per cubic centimetre. Bz varied between minus and plus 2 nanoTeslas on the quiet days and between minus 8 and plus 11 nanoTeslas during the slight disturbance.

4

And finally the solar forecast. This week solar activity is expected to be at very low levels. The solar disc could be spotless for the next few days but later in the week the return of the large sunspot group could take place. Solar flux levels are expected to be around the 70 mark, but from midweek a steady increase could take place if the group returns into view. Geomagnetic activity is expected to be quiet throughout. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. The darkness hour lows are expected to be about 9MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of about 27MHz. The optimum working frequency with a 90 per cent success rate will be around 21MHz. The best time to try this path will be between 1000 and 1700 hours UTC.

And that's all for this week from the propagation team.

Bovine Lend-Lease? I didn't think they were into doing it with
cattle in Saudi! I'm pretty sure that's a capital offense there.

4U1AIDS - Awareness about HIV/AIDS through Amateur Radio

Started on December 1st, 1988, the aim of "World AIDS Day" is to raise money,
increase awareness, fight prejudice and improve education. "World AIDS Day"
is important in reminding people that HIV has not gone away, and that much
still needs to be done.

A special amateur radio station will be operating at UNAIDS HQ in Geneva, Switzerland, from December 1-7th, 2009, with the special event callsign 4U1AIDS. They invite people to observe the "World AIDS Day" and demonstrate global HIV awareness.

International World Aids Day 2009 Amateur Radio Certificate:
Those amateur radio stations which have a radio contact with 4U1AIDS on any 3 amateur radio bands, will awarded a special commemorative certificate "World AIDS Day Award".

Amateur radio stations that have radio contact with 4U1AIDS on 5 amateur radio bands will be awarded a special commemorative UNAIDS pennant.

For each radio contact with 4U1AIDS, a special QSL card will be sent.

Amateur Radio 4U1AIDS WEB site: http://www.DX-World.com/4u1aids

New non line-of-sight optical communications distance record of 288km has been set with a one-way transmission between VK7 and VK3.

The night-time contact saw Joe VK7JG assisted by Paul VK7KPG fire up a narrow beamwidth 60 Luxeon LED transmitter to scatter red light off the clouds.

The possibility of bridging Bass Strait by optical communications using weak signal technology now been proven with a distance of 288km.

More information on this story can be found in the text editions of this bulletin in "Special Interest Group News".

The Yarra Valley Amateur Radio Group conducts weekly technical training broadcasts on Thursdays at 14::00 hours local time on the clubs repeater VK3RYV which you can find by tuning to 146.725 MHz.

On occasions the broadcast is also repeated after the club 80m net on a Thursday evening 20.30 EADST dependant upon band noise and QRM Listener reports are always welcome and may be sent to Yarra Valley Amateur Radio Broadcast group via email to broadcast@yarravalley.ar.org.au

Radio Amateurs in the Macedon Ranges area of Victoria, are being called to form a new Amateur radio club.

The Macedon & District Amateur Radio club is almost up and going, and it has been decided that several informal meetings will be held at different radio amateurs homes over the next few months, and if all goes to plan, the club will form.

At this stage more than enough interest to start and a suitable long term venue is being sought. Each interim meeting will have a guest speaker with a topic to suit all radio amateurs and foundation licensees will be most welcome.

It is envisaged the first meeting will be in late November, so if your interested in going along to meetings and helping to build this dynamic club give Peter, VK3TQ a call on 0434 623 423 or you can email him vk3tq@wia.org.au

Those who have already contacted Peter need not reply

Mark this on your calendar now!

The major radio event in Victoria returns to the Kyneton Racecourse, only an hour from Melbourne, Ballarat and Bendigo, on Sunday the 14th of February.

The Centre Victoria RadioFest No. 3 will build of the major success of its predecessor events held in 2007 and 2008 that they're still talking about.

The major commercial traders have signed up giving it their strong endorsement.

Bookings are now open for second-hand sales spaces - tables or car boots.

A warm invitation is extended to all clubs and groups to be part of the popular Club Corner.

A program of interesting activities will be announced in coming months, making it another not to miss event.

For more information visit the website
www.radiofest.amateurradio.com.au

See you at the Centre Victoria RadioFest on the 14th of February.

ACMA NEWS

The Australian Communications and Media Authority has released a discussion paper proposing the release of spectrum in the 5.9 GHz band to permit the introduction of intelligent transport systems (ITS) for road users in Australia. The ACMA is proposing that spectrum would be allocated on a shared basis with incumbent services.

'Intelligent transport systems offer the potential for significant benefits to the Australian community as a whole,' said Chris Cheah, Acting Chair of the ACMA.

ITS technologies use dedicated short range communications (DSRC) to transfer real-time information over short distances between in-vehicle mobile radio units and roadside units, and can be used for a wide range of applications.

'The deployment of ITS could reduce road crashes, including those that result in fatalities. It could also decrease congestion, which would result not only in savings arising from time lost to delay and vehicle operating costs; but

reduce costs associated with air pollution and greenhouse gas emissions,' said Mr Cheah.

ACMA hopes that the release of a discussion paper will enable informed debate among stakeholders.

(Media contact: Donald Robertson, Media Manager).

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO

STANDARD LICENSE & REGS COURSE & EXAM IN NORTHERN NSW.

Proposed dates for the next Standard License Course are -
27-28 Feb - Theory weekend.
6- 7 March - Theory & Exam.
13-14 March - Regs & Exam.

Contact Duncan VK2DLR 02 66281337

ARK's Academy candidate peter VK3FGNM realized a lifelong ambition when he passed his regulations examination and completed the qualifications for his Standard license, Peter has been interested in Amateur Radio since he was a boy building crystal sets and other electronic kits and now having just qualified for the aged pension is looking forward to getting onto the HF bands with his upgraded license , Peter has requested the callsign of VK3PJS, well done Peter.

ARISSat-1 is a small satellite which will be launched from the International Space Station next year.

Gaston Bertels, ON4WF the ARISS Chairman has said that the ARISSat-1 Team wishes to include a memory stick of files prepared by students on board the satellite.

Catch is he needs it by NEXT Sunday, November 15th.

This could be a jpg or pdf of things a student has prepared such as a paper or a study done on a science, technology, engineering or math topic, a drawing of a space craft or a schematic, a photo of a class doing a hands-on activity -- that type of thing.

Having the student's work be a part of ARISSat means the student is a part of the satellite project and along for the spacewalk and deployment of ARISSat-1.

Please send files to aa4kn@amsat.org

A real eye-opener for the IT industry

An interesting article in Computerworld is certain to get some in the field of Information Technology thinking seriously about amateur radio.

The headline is 'Want to bone up on wireless tech? Try ham radio'.

The article centres on John Hays K7VE, an IT Manager in Washington who devotes most of his spare time to help develop a communications system designed to integrate portable two-way radios with the global telephone network.
He hopes to create a failure-proof voice communications infrastructure that can immediately connect first responders with the outside world, even when their own mobile cell phones are put out of service during an emergency.

The article points out that being a radio amateur he has access to abundant spectrum resources in which to engage his passion for research and wireless experimentation.

John K7VE attributes his ability to engage in such research would not be possible without being part of the amateur radio community.

The article quotes him saying: 'For IT professionals, ham radio can foster skills that are translatable into real-world wireless and wired networking applications.'

His hobby and profession have long been linked. With ham radio experimentation in the 1970s and 80s involving TCP/IP over the AX.25 protocol gave him an understanding of networking protocols and the use of wireless applications.
The American Radio Relay League Media and Public Relations Manager Allen Pitts, W1AGP was invited to comment and he did so in fine style.

The article even includes information about ham licensing and a few sample theory test questions.

If you know someone working in the IT industry who is not a radio amateur - then please send them a copy of the Computerworld article and give them all the support and encouragement to become a member of the amateur radio community.

(Computerworld: http://tinyurl.com/ComputerWorldHamRadio)

I'm Jim Linton VK3PC and you're listening to VK1WIA.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

FCC experts visiting New Zealand to present seminar on spectrum allocation methods and auctions.

The NZ Ministry of Economic Development welcomes William Sharkey and Mark Bykowsky, Senior Economists at the Office of Strategic Planning of the Federal Communications Commission, USA, as they present a seminar on Current Research in Spectrum Allocation Issues and Auctions.

This will be one of the activities to be carried out in November 2009 during their visit to New Zealand as part of a research initiative led by Fernando Beltran, Information Systems and Operations Management Department, University of Auckland Business School.

The purpose of this event is to share knowledge amongst participants about emerging research and best-practice for spectrum regulation of different uses.

(MED release)

Thailand's 7MHz expansion gets the go-ahead.

HS0ZDJ reports NTC, the National Telecommunications Council, has approved the R.A.S.T. request for the expansion of the 7-MHz for amateur radio on a primary basis in Thailand from 7.0-7.1 to 7.0-7.2 MHz.

This became effective Friday November 6th, 2009.

(sourced to southgate)

THE BPL WAR: A BIG WIN IN SWEDEN

Telecommunications regulators in Sweden have withdrawn certain Broadband over Powerline or Powerline Transmission Internet access equipment from the public marketplace. A recent C-E-P-T Electronic Communications Committee report notes that the Swedish regulator ordered the sale of such gear to cease because some BPL gear pollutes the radio spectrum.

Mention of the Swedish action in withdrawing the equipment appears in the Report from the Working Group Spectrum Engineering Bordeaux, 07 11 September 2009. It gives the reasons behind the decision to impose these latest anti RF interference standards on BPL service in that nation.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

You can read the report in its entirety at www.ero.dk/37D6714E-27DF-42D7-AF4B-D790B0083183?frames=no&

KB2GSD PERSONAL PAPERS GO TO HIS COLLEGE

The estate of the late Water Cronkite, KB2GSD, has made public. The retired CBS newsman has bequeathed his college alma mater what amounts to a treasure trove of papers and memorabilia chronicling his career.

Cronklite dropped out of the University of Texas at Austin in 1935 as a

junior. Instead, he decided to pursue a career in the news business but the broadcasting legend never abandoned his Texas-based educational roots.

According to his last will and testament now on file at Manhattan Surrogate's Court, KB2GSD bequeathed his personal papers to the university. This is really a process that actually started before his death on July 17 but will now end with the release of materials he had held onto at his office and homes in Manhattan and on Martha's Vineyard.

After becoming a television anchor, Cronkite returned often to campus as a lecturer and lent his announcing skills to the university as the narrator of ads that are still used at athletic events and to promote Longhorn accomplishments.

OLD LOGS NEEDED TO STUDY THE EARLY 20TH CENTURY

Researchers at the University of Wisconsin and Miami University of Ohio are seeking copies of amateur station logs from 1913 through 1927. This, in hopes they may offer insights into the relationship between individuals'

work and leisure activities, technology, and their social networks of the era.

Phil Kim is an Assistant Professor at the Wisconsin School of Business. He
notes that diaries, letters, QSL cards and station logs can contain valuable insights into the link between an individual's occupation, hobbies and friends.

Kim notes that early in amateur radio history, thousands of ham radio enthusiasts were licensed by the government to comply with the Radio Act of 1912. At that time and due to newly enacted rules, that those early hams began to more carefully document the new communications era.

In an effort to uncover new information about approaches to work and leisure time and the development of social networks, Kim and other researchers are comparing early ham licensing records from the Department of Commerce with detailed information in amateur operators' station logs. If you happen to have an old ham station log from that period that you would like to see included in the study, please contact Steve Johnston, WD8DAS, via e-mail to johnson at wpr dot net

March 21-22 John Moyle Field Day

The Swedish Amateur Radio Society has announced the Marconi Nobel 100 Award.

European stations outside Sweden must work, or Short Wave Listeners must hear, ten different SI stations between 9 November and 10 December 2009.

SM stations may use the prefix SI and there will be several anniversary calls on the air, SI0GM to SI7GM. Each station counts once per band.

The fee for the award is 5 euro or 5 US dollars.

Full details can be found on the internet at www.awardmanager.se
click on the Union Jack flag.

28.000 to 29.700

ENFORCEMENT ZONE - WITH A DIFFERENCE. ON-STAR USES RADIO TO END PURSUIT

For the first time since it was created, the On-Star highway safety system
pioneered by General Motors has been used to bring an end to a high speed
pursuit. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

It all took place when the victim identified as Jose Ruiz, of California,
was sitting in his Tahoe in a lighted parking lot about 3 a.m.
This, while his cousin was talking on a cell phone in the passenger seat.

Out of the corner of his eye, Ruiz says that he saw a man walking toward him.

The man allegedly pointed a sawn-off shotgun at Ruiz and ordered both men to get out of the Tahoe and empty their pockets. Ruiz's cousin at first refused, but Ruiz told him to obey, knowing that OnStar could find the stolen truck with the built-in global positioning system.

The cousin relented and the man sped off in the truck. Ruiz then ran toward a nearby pay telephone to call police. As luck would have it he

spotted a sheriff's deputy on her break who in turn notified the Visalia police. Officers quickly contacted OnStar and got Ruiz's permission to

find the vehicle.

Police spotted it a few miles away. As officers made a U-turn to pursue it, the Tahoe sped off at a high speed. At about the same time, police

dispatchers told the pursuing officers that OnStar was about to disable the stolen vehicle by radio command. It did, the Tahoe rolled to a halt, and the robber was quickly captured without any injuries except maybe to the alleged robbers pride.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

The bottom line. Technology may soon make it very unattractive to try to steal a car if the thief knows that there is a 1 in 2 chance that he will be caught by radio remote control.

UNLICENSED UK BROADCASTER GETS BANNED FROM ROOFTOPS

The British may have stumbled on a unique solution to keep pirate broadcasters off the air. Don't let them have outdoor antennas.

Don Carlson, KQ6FM, of ARNewsLine says an unlicensed broadcaster has been banned from every roof top in London, England. This, after he pleaded guilty to installing pirate radio equipment on a tower in the city.

According to a report on UK telecommunications regulator Ofcom website,

Kieran O'Sullivan received the anti-social behaviour order following a successful prosecution by the regulatory agency. He also received an 18 week custodial sentence suspended for 12 months, a three month curfew, a ï¿½1,200 fine, and had his radio equipment seized.

Ofcom worked with Camden Council and police to secure the prosecution following complaints from residents about Freeze FM operating from estates in Hampstead. Neighbours had complained about pirate radio operators using roof tops to install equipment, which caused a nuisance to residents and damaged property.

Also in OFCOM news

Late in the evening on 15th October, a team of enforcement officers from Ofcom, assisted by Humberside Police, apprehended an individual in the Hull region on suspicion of illegally transmitting on the region's amateur radio

bands.

Equipment was seized during the operation and Ofcom is continuing its investigations.

SUMBANDILLASAT DESIGNATED AS SO-67

Amateur Radio Newsline say the recently launched South African SumbandilaSat has now been designated as SO-67.

AMSAT's OSCAR Number Coordinator Bill Tynan, W3XO, made the designation shortly after receiving an e-mail from the secretary South Africa AMSAT requesting that an OSCAR number be allocated to their new ham radio bird.

As previously reported, the amateur radio payload on SumbandilaSat was developed by South Africa AMSAT and incorporated by the University of Stellenbosch into the main payload. The ham radio payload was officially coordinated through the IARU Satellite Frequency Coordination Panel with an uplink of 145.880 MHz and a downlink of 435.350 MHz.

F-M transponder on SumbandilaSat activates up on 145.875 MHz and down 435.345 CTCSS tone of 233.6 Hz is needed to access this F-M repeater in the sky.

288km NLOS Optical Record Set

Bass Strait crossed with Light off Clouds

On the night of October 27th 2009, Rex VK7MO and Joe VK7JG assisted by
Paul VK7KPG set a new one way NLOS Optical record of 288km across
Bass Strait using red (624nm - 474THz) light scattered of the clouds.

Rex was on Mt Liptrap (~150m) in South Gippsland in VK3 using his APDbased
receiver of KA7EOI design and Joe & Paul were on Mt Horror (~660m) in
NE VK7 using a 60 x 3watt Luxeon LED transmitter.

To make the contact possible they were using the new Weak Signal Communicator
(WSC) front end for the Spectrum Lab audio analysing application that has
been recently created by David VK3HZ. David has described this mode as
follows:

The concept behind WSC is simple. The two callsigns are split into 4 groups
of three characters and each group is sent in sequence. The actual
transmission is a tone with frequency determined by the encoding of the group
of letters. At the other end, the tone frequency is determined and the group
of letters decoded. Signal reports can also be uniquely encoded and exchanged.

The -44dB (on WSJT scale) capability comes from the narrow bandwidth used for the transmission, efficient coding and the time taken to send the information. The unique tones are separated by approx 3.8milliHz and it takes 20 minutes to send a complete pair of callsigns.

WSC uses Spectrum Lab (SL) as the signal processing engine. SL has a signal generator that is used for Tx. It also has an FFT function for RX that can be very long - I think we're treading on the edge of it.

The whole concept requires very high frequency accuracy and stability to the extent that Rex needed to GPS-lock the audio cards at both ends. Timing is much less critical given the length of an "over".

The mode is well suited to the optical comms which is baseband and so has no external influences on frequency (Doppler etc.) However, how it performs over an RF link is yet to be tested. We're hoping to try some VLF experiments soon to test it out.

Callsigns were decoded using the WSC application and signals were improving. Rex and Joe then raised the elevation of the TX and Rx up to approximately 3 degrees each end and signal further improved which indicated the presence of high cirrus cloud (~20,000ft) and WSJT was tried with sync being received at -30dB but unfortunately no decodes.

A full report will be posted to the REAST website Optical pages in the near future.

http://reast.asn.au/optical.php

Congratulations to Rex Joe, Paul and David.

(Justin, VK7TW)

WW SPECIAL INTEREST GROUP --- POLICE

SB QNEWS @ WW $QNEWS091108
QNEWS - NOV 08 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

I suppose that most clubs have their festive season arrangements in
hand by now. Not only are the social events good for morale but used
wisely they can be a boost to the club's finances. The experience of
many succesful clubs is that the more involved members are in their
activities the more "ownership" they have.

It is a simple solution to raise fees, apply levies or in other words use just money to directly fund club activities. The problem with

this approach is that different members have different financial resources and different demands on that resource. Over the years it has

been sad to see enthusiastic amateurs drop away from activities to which they contributed and enjoyed because they felt they were valued simply by the dollars they could throw at their hobby.

What we all have to do is grow our clubs in ways that make all members belong. It isn't enough to simply acknowledge there can be discrimination on the grounds of race, gender or other reasons. As the "Amateur's Creed" which has appeared in the front of the ARRL Handbook seemingly from the year dot, tries to express the idea of acceptance and equality of all members of our great hobby; that is a great reminder in

how we grow our club as well as how we conduct ourselves, individually.

The good news is that Van, VK4VAN, continues to improve and has been moved from intensive care and is looking forward to coming home. Van has had visits from amateurs from the Bundaberg area and best wishes for his recovery have been forwarded from the Gympie club, as well.

Those of us that were around for the WIA 75th anniversary may have one of the stamps and first day covers issued by Australia Post tucked away. I wonder will we see a similar collectable for the centenary?

NZART Headquarters Infoline Issue 195
08-NOVEMBER-2009
NZART Website: http://www.nzart.org.nz/

Greetings
Welcome to Headquarters-Infoline a twice-monthly bulletin of news from NZART Headquarters e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at:
http://www.nzart.org.nz/lists/infolinelist.html

In This Issue
*From The Business Manager Debby Morgan ZL2TDM
==Examination Supervisors
==NZART Examination Supervisor Appointment Process
==NZART HQ Change of Hours
*FMTAG Notes For November 2009
==Further Call For Comments - 2400 MHz Band Plan
==Final Recommendations to NZART Council
==The IARU Region 3 Newsletter -- Headlines and Internet URLs
*Wellington Radio EXPO '10
*Second Block Course/Weekend Study Course Proposed
*Contest News
==VHF/UHF/SHF Contest Notes
==HF Contests
*Upcoming Events
*Break-In and Infoline Information
*Dates for Official Broadcast (OB) and Head Quarter's Infoline
*Attachments for Branches:
NZART Headquarters Infoline 195.doc
****
>From The Business Manager Debby Morgan ZL2TDM
Hi all... sorry for my memory lapse last issue, I was so carried away with attending the IARU triennial conference in Christchurch, I neglected to write a note and tell of all my experiences down there.

I am sure by now you will all have heard from the various NZART attendees at the meeting and also from the NZART President of the great success and camaraderie that was felt by all societies in attendance. Suffice to say...there is still a very positive spirit out there regarding amateur radio...and more importantly the need for such communication during recent natural disasters, that affected so many in such a short space of time.

Examination Supervisors
There has been a considerable number of applications coming through for examination supervisors, therefore I felt it timely that all should be aware of the policy on approving these people.

NZART Examination Supervisor Appointment Process
A Policy Statement by NZART Council

The NZART ARX will accept nominations from Branches of NZART for the position of Examination Supervisor following receipt of the following:

* A copy of the minutes from the meeting of the nominating Branch in which the motion was passed nominating the candidate for the position.

* Two nominee character references from members of the nominating branch who also must be members of NZART.

* Confirmation that the nominee is a member of NZART. On receipt of the above the NZART ARX will check with the NZART General Secretary that the membership details of the nominee and referees are in order.

The nomination and supporting documentation is then sent to NZART Council for acceptance.

If NZART Council chooses not to approve the nomination it is not under obligation to disclose reasons.

Note: successful nominees must remain a member of NZART while occupying the position.

NZART HQ Change of Hours
Council approved a recommendation of the Finance Management Group for headquarters to review current operating hours.

As from 1 December 2009, NZART Headquarters will be open for three full days per week, TUESDAY, WEDNESDAY and THURSDAY from 9am to 5pm. These days were chosen as they will have the least impact of statutory holidays in a year.

This effectively reduces my working time from 25 hours per week to 24, however may see this reduce further in the longer term.

Talk soon...Debby ZL2TDM
****
FMTAG Notes For November 2009
At its November 2009, NZART Council approved publication of these notes.

Further Call For Comments - 2400 MHz Band Plan
NZART Council invites comments on the establishment of an alternative Narrow Band Mode segment on frequencies just above 2400 MHz. Members should send their comments to FMTAG:

fmtag@nzart.org.nz

INTERIM RECOMMENDATIONS TO NZART COUNCIL
None this month.

Final Recommendations to NZART Council
First published as Interim Recommendations in September/October 2009 Break-In.

Branch 22 Marlborough has applied for a 4575 APRS Digipeater, to be located at Jamies Knob, at map reference NZ260 P28 026586. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan on page 7-15 of Call Book. An engineering evaluation confirms that there will be no interference to other stations.

Branch 22 Marlborough has applied for a 4575 APRS Digipeater to be located at Kaikoura, at map reference NZ260 O31 673650. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan on page 7-15 of Call Book. An engineering evaluation confirms that there will be no interference to other stations.

Branch 26 Nelson has applied for a 2-metre APRS Digipeater, to be located at Takaka Hill, map reference NZ260 N26 983206. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan on page 7-15 of Call Book. An engineering evaluation confirms that there will be no interference to other stations.

Branch 26 Nelson has applied for a 2-metre APRS Digipeater, to be located at Fringed Hill, map reference NZ260 O27 366886. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan on page 7-15 of Call Book. An engineering evaluation confirms that there will be no interference to other stations.

Branch 26 Nelson has applied for a 2-metre APRS Digipeater, to be located at Mt. Murchison, map reference NZ260 M29 683418. The transmit and receive frequency will be 144.575 MHz, in accordance with the band plan on page 7-15 of Call Book. An engineering evaluation confirms that there will be no interference to other stations.

Branch 63 Upper Hutt has applied for a 23-centimetre repeater, to be located at Mt. Climie, map reference NZ260 899041. The repeater's transmit frequency will be 1292.000 MHz and its receive frequency will be 1272.000 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 66 Auckland VHF has applied for a 23-centimetre beacon, in accordance with the revised beacon band plan, to be located at Klondyke, map reference NZ260 705258. The transmit frequency will be 1296.253 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 74 Wellington VHF has applied for a 955 repeater at Ngaio Reservoir, map reference NZ260 R27 594933. The repeater transmit frequency will be 439.550 MHz and the repeater receive frequency will be 434.550 MHz. An engineering evaluation confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS
Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to:

fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

http://www.nzart.org.nz/nz/fmtag.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

SARL NEWS - SUNDAY 8 NOVEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin transmitted every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1,297 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

SILENT KEY

It is with deep regret that the passing away of Arthur Ronald Hersey on 6 November 2009 is announced. Arthur qualified as a radio amateur in 1938 at the age of 16 and received the call sign ZS1RS.

We extend our sincere condolences to his son, John, family and friends.

(PAUSE)

In the news today:

HAVE FUN WITH SATELLITES

A NEW BACAR TO BE DEMONSTRATED

RAE RESULTS IMMINENT

RADIO AMATEUR WINS A NOBEL PRIZE

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

NORTHWEST AMATEUR RADIO CLUB IS HOSTING ZS10WCS

The North West Amateur Radio Club is hosting the special ZS10WCS during the month of November. A good start was made by the Boland Amateur Radio Club in September when they made 2 639 contacts with amateurs from more than a hundred countries. The Oakdale Radio Club took charge in October. At this stage it is not known how many contacts were made. In December members of the East Rand Radio Club will operate ZS10WCS.

The preferred frequencies are as follows: CW on 28 010; 21 010; 14 010; 7 010 and 3 510 kHz. SSB on 28 480; 21 280; 14 180; 7 080 and 3 780 kHz.

QSL via the Bureau or directly via the SARL, P.O. Box 1721, Strubensvallei, 1735.

HAVE FUN WITH SATELLITES

AMSAT has arranged a Satellite Activity weekend from 13 to 15 November 2009. Radio Amateurs are invited to submit logs for the Satellite Activity Weekend. The purpose of the event is to encourage new operators to join the growing fraternity of users of Amateur Radio Satellites. AMSAT North America has specifically enabled the higher power QRP mode on AO-51 to make operation on this satellite easier for first-time users for the duration of the event.

The event will run from 16:00 UTC on Friday 13 November 2009 though to 16:00 UTC on Sunday 15 November 2009. Operation is permitted on any operational Amateur Satellite in any mode to count for points, with the proviso that all QSOs on AO-51 have to use the QRP V/U mode (145,880 MHz uplink and 435,150 MHz downlink).

RF Design will sponsor the prize of a TinyTrak 4 for the operator who accumulates the most overall points and a TinyTak3 for the best portable station. If these are the same operator, the TinyTrak3 will be awarded to the operator with the second highest points tally.

The full detail can be downloaded from www.amsatsa.org.za.

A NEW BACAR TO BE DEMONSTRATED

On Saturday 21 November at 14:00, John Willescroft, ZS6EF, will demonstrate the 2010 version of BACAR at the National Amateur Radio centre. Its maiden flight in the Western Cape will be on Sunday 24 January. BACAR is the acronym for Balloon Carrying Amateur Radio - a project first launched by SA AMSAT in the 70s.

BACAR will be demonstrated on a tethered launch. Radio Amateurs who are not able to be part of the demonstration at the NARC will be able to follow it on the Web. More details will be announced in next week's SARL news bulletin and published on www.amsatsa.org.za.

The demonstration will follow the first Home Constructor's Course at the NARC - which is now fully booked. Names are now recorded for a possible second series of Home Construction courses next year.

There are still places available on the Durban, Port Elizabeth and Cape Town courses. A list of those who have been booked and confirmed is available on the SARL web at www.sarl.org.za. Click on RTA under the heading 'activities' and follow the links.

RAE RESULTS IMMINENT

The long-awaited RAE results will be released within the next few days.

Since the last RAE, a few things have been changed to assist ICASA in easing the burden of doing additional admin work. The changes are as follows: Normally we would reserve the call signs ahead of the time for the RAE candidates. Candidates wanting to write the Class A exam have the opportunity to write the Class B examination as well.

Once all of the marking and moderation of the exam papers had been completed, we had to send a list back to ICASA asking them to release all the reserved call signs for those that had failed. We would then ask them to release call signs of those who had enrolled for the Class A exam that had failed, but passed the Class B exam, in order to reserve call signs for a Class B call sign. This alone created a tremendous load on the staff working with amateur licensing and a lot of double work had to be done.

The new process will be that only once the marking has been completed, will we send the call signs through to be reserved for those that have passed their exams.

We would like to urge all candidates to keep their eyes glued to the SARL's Web page for your result. We thank you for your patience.

Should you have any queries, you may contact Mariska at the SARL office on 011 675 2393 or e-mail her to admin@sarl.org.za.

ANOTHER RADIO AMATEUR WINS A NOBEL PRIZE

Around 05:30 on the morning of 6 October, George E Smith, AA2EJ, of Barnegat, New Jersey, received a phone call that changed his life: He had just heard he had won the Nobel Prize for Physics for 2009 "for the invention of an imaging semiconductor circuit - the CCD sensor". Smith will share the prize money with two other recipients: Charles K Kao, of Standard Telecommunication Laboratories in the United Kingdom and the Chinese University of Hong Kong, and Willard S Boyle of Bell Laboratories. Each recipient will receive a diploma, a medal and a 25% share of the R10 million prize money.

Kao was recognized by the prize committee for his "groundbreaking achievements concerning the transmission of light in fibers for optical communication". His discoveries paved the way for the optical fiber technology that is used for almost all telephony and data communication today. Boyle and Smith invented a digital image sensor - the CCD - that has become the 'electronic eye' in almost all areas of modern photography.

The CCD - invented in about an hour over lunch when Smith and Boyle worked at New Jersey's Bell Labs - was, according to Wired Magazine, the first practical way to let a light-sensitive silicon chip store an image and then digitize it. In short, it is the basis of today's digital camera. According to Wired, the "most amazing thing about the invention" is that Boyle and Smith came up with the design so quickly. With Bell Labs threatening to take away the funds from their department and transfer the money to other research, Boyle had to come up with a competing semiconductor design. He got together with Smith, and within

an hour, they came up with the idea and sketched it all out on a blackboard.

"One morning in October 1969," Boyle wrote on his website, "I was challenged to create a new kind of computer memory. That afternoon, I got together with George Smith and brainstormed for an hour or so about a new kind of semiconductor device, drawing a few sketches and equations on a blackboard. We called it a charge-coupled device: A 'CCD.' When we had the shops at Bell Labs make up the device it worked exactly as we had expected - much to the surprise of our colleagues."

Smith said that he knew the CCD was under consideration for the Nobel Prize, "but we didn't know exactly if, or when, it would happen. Research that wins the Nobel is often done many years beforehand. In my case, this was 40-year-old research. The Prize Committee wants to make sure the research has stood the test of time." More on Amateur Radio Mirror International later today at 10:00. Unfortunately, the show is about to end. The sunspot is moving toward the sun's western limb where it will soon disappear.

WONDERFUL ACHIEVEMENT BY ZS4JAN

During the past month Jan Botha, ZS4JAN, made a wonderful achievement by achieving the WAZS 1 000 award of the SARL. It means that Jan made 1 000 confirmed contacts with individual call signs in South Africa. It took Jan almost 6 years to reach this milestone.

What makes this achievement m&#65533;re unique is the fact that Jan is the first amateur to gain the WAZS 1 000 award.

The President of the SARL congratulates Jan with this unique achievement and trusts that that it will be an inspiration to other amateurs to be m&#65533;re active on the bands and to regularly confirm contacts by means of either a QSL card or the SARL's electronic QSL system.

Again many congratulations to Jan.

ANNUAL REMEMBRANCE DAY SERVICE

The annual Remembrance Day Service will be transmitted in Amateur Radio Mirror International today at 10:45 CAT. The service is in memory of South Africans who lost their lives in the protection of our country and our people. Please observe Radio Silence between 10:45 and 11:00 CAT as a mark of respect. The service will be conducted by Rev Hannes Enslin, ZS6JDE.

CONTEST NEWS

The second leg of the SARL HF Field Day will be on the weekend of 21 and 22 November 2009.

The contest committee has released the results of the second leg of the SARL 80 Metre QSO Party. 1st Jan Botha, ZS4JAN, 630 points; 2nd Charles

le Roux, ZS1CF, 415; 3rd Theuns Potgieter, ZS2EC, 265; 4th Sasolburg ARC, ZS4SRK, 255; 5th Geoff Levey, ZS6GRL, 230; and 6th The World Cup Soccer station, ZS10WCS, operated by Dave, ZS1SG, with 205 points.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. There were no sunspots visible during the last couple of days.

15 and 20 m will provide the best opportunities for DX. Conditions to the east and the west will be good from the afternoon onwards. During the late afternoons and early evenings, it will be good towards Europe. In the mornings it may be possible to make contacts with Australia on 20 m. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New Zealand are going to be challenging. During the afternoons and evenings, 15 and 12 m contacts may be promising with Brazil.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over shorter distances. 30 m will perform well over longer distances during the middle of the day. With summer here, 20 m is also once again becoming very useful for contacts between Divisions 1 and 6. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

8 November - Remembrance Day service at 10:45 this morning during the ARMI program; 9 November - closing date for Radio ZS articles; 13 to 15 November - Satellite activity weekend; 15 November - closing date for suggestions for the 2010 Contest; 21 and 22 November - SARL HF Field Day; 21 November - Home Construction course and BACAR demonstration in Gauteng at the NARC; 22 November -Intechnet with SumbandilaSat as subject; 30 November - closing date for the essay competition and closing date for SARL Council nominations.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League,
compiled by Dennis, ZS4BS. The editor was Jannie, ZR6PHD.

Thank you for listening, 73.
/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 8th November 2009

GlobalSET 2009

Global Simulated Emergency Test

IARU Region 1 invites the HQ-Stations of all IARU member societies and stations of Emergency Communications Groups to participate in a Global Simulated Emergency Test on Saturday November 14th, 2009 18.00 – 22.00 UTC.

The operation will take place on and near the emergency Centre-of-Activity (CoA) frequencies on 80, 40, 20, 17 and 15 metres (+-QRM).

The details of the exercise will be published on the IARU Region 1 website (www.iaru-r1.org)

Galway VHF Group 24 hour Radio Operation from RNLI Stations

Using the callsign EI 185 RNLI, The first operation will take place from the Galway Lifeboat Station over this weekend. The following weekend, 14th and 15th of November will see an operation from the Aran Island Lifeboat station at Kilronan, Inishmore.

The final operation will take place from Clifden Lifeboat Station, Ballyconneely, over the weekend of the 28th and 29th of November. The callsign will be EI 185 RNLI

All operation will take place on the HF bands with two stations in operation at all times. There will be operation on Phone and Digital Modes with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed. Varying types of antenna construction will be used including a Kite antenna for the LF bands.

Amateur Wins Nobel Prize

Radio Amateur George Smith, AA2EJ, was awarded the Nobel Prize in Physics for the invention of an imaging semiconductor circuit - the CCD sensor.

Around 5:30 on the morning of October 6 2009, George E. Smith, AA2EJ, of Barnegat, New Jersey, got a phone call that changed his life: He had just found out he had won the Nobel Prize in Physics for 2009 "for the invention of an imaging semiconductor circuit -- the CCD sensor."

Smith will share the prize money with two other recipients: Charles K. Kao, of Standard Telecommunication Laboratories in the United Kingdom and Chinese University of Hong Kong in Hong Kong, China, and Willard S. Boyle, of Bell Laboratories.

Updated PC-ALE now available

The latest version of the HF Automatic Link Establishment software PC-ALE is now available.

PC-ALE was devised by former Chelmsford radio amateur Charles Brain G4GUO.

The latest version of this popular digital mode software can now be downloaded from the website of N2CKH.

It can be downloaded from www.n2ckh.com

Students - Send you School Work to space!!

ARISSat-1 is a small satellite which will be launched from International Space Station in 2010, in a way comparable to the popular SuitSat-1.

Students are asked to send some of their work in relation to a paper in science, technology, engineering, schematic or math in jpg or pdf format to the e mail address below so that it can be placed on a USB memory stick that will be deployed in Space.

Having the student's work be a part of ARISSat means the student is a part of the satellite project and along for the space walk and deployment of ARISSat-1.

Dave Jordan, AA4KN, will take delivery of these files and copy them onto a memory stick, plus make them available on the web for anyone to see. The quantity of

files of reasonable size is not limited, since memory sticks provide for a very large amount of file space.

Files should be either .JPG or .PDF -- No Word documents, please.

Please send files to Dave Jordan's address : aa4kn /at/ amsat.org

The deadline to send the email with attachment is 15th November 2009

4U1AIDS - Awareness about HIV/AIDS through Amateur Radio

A special amateur radio station will be operating at UNAIDS HQ in Geneva, Switzerland, from December 1-7th, 2009, with the special event callsign 4U1AIDS. They invite people to observe the "World AIDS Day" and demonstrate global HIV awareness.

More Info on www.qrz.com/4u1aids

SOTA Day

The North American 'Summits on the Air' (SOTA) activation day, is Saturday, November 14th.

The four North American associations of 'Summits on the Air' are planning a multi-summit activation spanning the North American continent.

Portable, mountain top stations will be operating from the VE2, W1, W2, and W6 call areas. Seasoned "summit chasers" all over Europe will have the opportunity to work expeditions on SOTA's western frontier, and a new group of North American chasers will get a chance to work multiple summits.

To join in the fun, visit the SOTA Web site at http://www.sota.org.uk/

Canadian experiments at 500 kHz authorized

After months of negotiations between Radio Amateurs of Canada and Industry Canada over the details of the licence applications and reporting conditions, the first two licences granted to Canadians for experiments at 504 – 509 kHz in preparation for WRC-12 have been issued by Industry Canada.

Jack Leahy, VE1ZZ, has been assigned call sign VX9PSO
in the Developmental Service for his experimental
transmissions.

Joe Craig, VO1NA, has been assigned call sign VX9MRC.
Joe was mentioned in last weeks bulletin after having
the first QSO with Finbar O'Connor EI0CF between
Ireland and Canada on this band.

Both of these Canadian stations have been on the air
already, with VX9PSO having been reported at 504.6 kHz
and VX9MRC at 507.77 kHz. Signal reports can be
addressed to the operators at their call book
addresses.

Two more authorizations, in Ontario and British
Columbia, are expected soon.

Falkland Islands DXpedition

Members of the CRAM and the Uruguay DX Group will be
active from Port Stanley between November 14-21st.

They hope to start operations at their local sunset on
the 14th, starting on 40 meters, depending on
transportation matters.

The group will sign VP8BUH on SSB and VP8BUG on
CW/Digital modes. Their activity will focus on the
lower bands, Digital modes and the 30/17/12 meter
bands.

QSL Manager is David, EB7DX.

For more details, see: http://www.qsl.net/vp8bug

Limerick Radio Club Meeting

The next meeting of the Club takes place on Thursday
12th November at the Limerick Institute of Technology

Moylish, Limerick. Meeting commences at 19:30.

Special Event Station

The Mid Ulster Amateur Radio Club will be transmitting
from Brownlow House in Lurgan, Co Armagh on Wednesday
11th November from 10am for Armistice Day, using the
special event callsign GB2AD.

This location was chosen as it has been used in both
World Wars as a Battalion HQ in WW1 and American HQ in
WW2. The club will be operating all bands and modes

throughout the day.

Rallies / Events

Dxpedition and IOTA Talk by Declan Craig EI6FR

The Mayo Club has organised Declan Craig EI6FR to give a talk the evening before the Mayo Radio Rally, Saturday 21st November.

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

For more information on Rallies please check the IRTS website.

Ohio/Penn DX Bulletin No. 933

The Ohio/Penn DX PacketCluster
DX Bulletin No. 933
BID: $OPDX.933
November 9, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, AH7C, K8YSE, K9WZB, W0GJ, Algarve STAR DX Team, AT International, CO8ZZ, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, GM3WOJ, I1JQJ/ IK1ADH & 425 DX News, IK7JWX, OH9MM, Pete's-DX-Newsdesk, RSGB IOTA Web Site, TA1HZ, VA3RJ & ICPO, VE3LYC and VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 1st-November, through Sunday, 8th-November there were 219 countries active. Countries available: 3A, 3B8, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FK/c, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VP2M, VP2V, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4L, GEORGIA. Operator Vaho, 4L8A, will be active in the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via K1BV.

4L, GEORGIA. Dick, N6AA, will be active as 4L0A during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via EA7FTR.

5W, WESTERN SAMOA. Steve, WB2IQU, will be active (possibly) as 5W2IQU between November 18ï¿½22nd. Operations will be low key using an Icom 706 into a small MFJ antenna tuner and a 20m dipole.

5X, UGANDA. Nick, G3RWF, will once again be active as 5X1NH between January 21st and March 21st, 2010. Activity will be on the HF bands. Nick prefers CW and likes the Digital modes (PSK and RTTY), but may work SSB whenever signals are good enough. QSL via his home callsign.

9G, GHANA. Just a reminder that a team of Italian operators will be active from Busua Beach between November 13-27th. The group will also activate Abokwa Island (AF-084), during their stay with one station on 20 meters only. The time of operation on the island will be planned day by day, pending the sea condition and weather forecast. Activity will be on all HF bands and modes, 80-10 meters. The callsign 9G5TT will be used from the mainland while the callsign 9G5XX will be used from Abokwa Island. Operators mentioned are: Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/ IK2HKT, and Donato/IZ2CHO. QSL via I2YSB, direct only. More information can be found at: http://www.i2ysb.com

9L, SIERRA LEONE. Members of the VooDoo Contest Group will be active during CQWW DX CW Contest (November 28-29th), signing 9L5A. This year the operators are Ned/AA7A, Nick/G3RWF, Fred/G4BWP, Bud/N7CW and Gary/ ZL2IFB. They will enter the contest as a Multi-Two or Multi-Multi category. Their activity in the contest will be on all six contest bands (CW only). For pre-contest activity, there may also be some operations on 30/17/12 meter bands. QSL 9L5A via G3SXW (see QRZ.com). G3RWF may also activate his 9L1NH callsign, and AA7A his 9L7NS callsign. Please QSL via their home callsigns. There will be no daily logs, but LoTW upload will be done soon after returning home. No cash donations are requested for this project just the usual USD/IRC for direct cards.

AU8, INDIA (Special Event). Dattatry, VU2DSI, states that he will be operating the special event station AU8JCB between November 28th and December 1st. Suggested frequencies are: 7070, 14270, 14200, 21280 and 28510 kHz. Activity is to commemorate the 151th anniversary of Sir Jagadish Chandra Bose -"Father of Radio Communication". QSL direct to VU2DSI: Dattatry Deogaonkar, Surabhi Meherabad, Ahmednagar 414006, INDIA. ADDED NOTE: Other Indian Hams are expected to operate possibly with other special callsigns.

CN, MOROCCO. Jim, W7EJ, will once again be active as CN2R during the CQWW DX CW Contest (November 28-29th) as a Single-Op and possibly as a Single-Band (??) entry. QSL via W7EJ. See the station from CN2R at: http://www.arraysolutions.com/Users/cn2r.htm

D2, ANGOLA. Paulo, CT1ITZ, will be active as D2PJB from Porto Amboim, 300km from the capital Luanda, until November 29th. Activity will be

on 80-10 meters SSB only. Most of his activity so far has been on 20 meters. He is using an Icom 706 and a Windom antenna. QSL via CT1IUA. Direct QSL, please send 2 USDs or one new IRC (ending 2013). QSLs without enough postage will go via Bureau.

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
VQ9JC - Chagos Island; Current operation
This operation was previously rejected as a shipboard operation. DXCC exchanged correspondence with the operator and determined that this operation was actually land-based thereby satisfying the conditions of DXCC Rule 8. If you had this operation rejected send an email to <dxcc@arrl.org> to receive credit.

* DXCC YEAR-END SUBMISSIONS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "This is a reminder that the cut off date to have submissions in for the 2009 DXCC Annual and Honor Roll Listings is December 31, 2009. Applications must be postmarked by this date. December is expected to be a heavy period so applicants are en-couraged not to wait until the last minute to get their submissions in. Also, with the holiday season approaching mail handling will sharply increase.
Applicants are strongly encouraged to check the 'List of DXCC Applications Received' link on the DXCC web site to assure that their applications were logged in for 2009. With the mail being heavy in DXCC, last minute applications received after December 31st, may get logged in for 2010. Also, the USPS postmarks are often unreadable so this could also affect last minute submissions. If you find on this page that your 2009 submission was logged in for 2010, you must contact DXCC by February 1, 2010, to get this corrected. DXCC is not responsible for 2009 applications that are logged in for 2010 after February 1, 2010.
We expect for December that the turnaround will increase in excess of 12 weeks. This is normal for this time of yea,r and we appreciate your patience and understanding as we work to get all 2009 applications completed.
The 2009 DXCC Yearbook is expected to be in the mail by late May or early June 2010. Please remember that in order to receive the free copy you must:
- Be a member of ARRL
- Submit an application within the 2009 calendar year, or
- Be current on the DXCC Honor Roll (329 current entities or higher)
If you did not qualify for the yearbook, copies will be avaliable from the ARRL catalog. Send questions to: dxcc@arrl.org "

E2, THAILAND. Operator Tony, E21IZC, to be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m) entry. QSL via E21IZC direct (QRZ.com).

E4, PALESTINE (Update). Antonio, EA5RM, has announced that he has received the callsign E4X and license from the National Palestine Authority officials from Telecommunication Ministry. Operation will take place in 2010. QSL via EA5RM. No other details are available, but a Web page is up and running at: http://www.dxfriends.com/e4x/index.php
Stay Tuned!!!!

E51, SOUTH COOK ISLANDS. Henrik, OZ6TL, is now active as E51TLA from Raratonga Island (OC-013) until the end of November. Activity will be holiday style, and most of his operations so far as been mainly on RTTY 20 meters. QSL via his home callsign.

FP, ST. PIERRE AND MIQUELON (Rescheduled Op). Operators Eric/KV1J and Tom/W8TOM are now active as FP/homecall from Miquelon (NA-032, DIFO FP-002 WLOTA 1417, WW Loc. GN17TC) between November 7-15th. Activity will be on 160-2 meters and 70cm (Satellite AO-51), using CW, SSB, RTTY and PSK31, generally on the highest frequency band that is open (no permission for 60m). QSL via their home callsigns, direct or by the Bureau. Visit Eric's Web page for more details at: http://www.kv1j.com/fp/october09.html

GD, ISLE OF MAN. Dave, G3NKC, will be active as MD6V during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (20m) entry. He will be active outside of the contest using GD3NKC/P. QSL via G3NKC.

GS, SCOTLAND (Year Long Special Event - Yaesu Heritage Year 2010). Using their club callsign GS2MP (North of Scotland Contest Group GM7V), operators Chris GM3WOJ/ZL1CT and Jim/GM0NAI will be operating their vintage Yaesu transmitters/receivers and transceivers during the year 2010. Each calendar month they will use a different Yaesu radio, and amateurs worldwide are invited to work GS2MP and earn points towards the "Yaesu Heritage Year Award". Operation will mostly be on 40 and 20 meters, SSB and CW, using classic radios like the FT-dx-100 (original), FT-200, FT-dx-401, etc. Yaesu (UK) Ltd are kindly sponsoring the event by supplying special QSL cards, small trophies and a special prize to the overall 'winner' of this year-long fun event. More details to follow soon - please visit the following Web site for some photos of the vintage radios at: http://www.gm7v.com/yaesu2010.htm

HI7, DOMINICAN REPUBLIC. Ronny, ON4ARV/OT4R, will once again be active as HI7/OT4R from Punta Cana between May 1ï¿½22nd (2010). Activity will be mainly on 20/15/10 meters SSB. Suggested frequency for 20 meters maybe 14300 kHz. QSL via OT4R. Visit his Web page at: http://www.ot4r.net/index.html

IOTA NEWS.....
AF-019. Claudio, I1NVU, will be active as IG9U from Lampedusa Island during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via I1NVU.

AS-086. Vasily, RA9LI, will be active as RA9LI/0 from Troynoy Island for about a year. Activity will be on the HF bands. QSL via UA9LP.

EU-031. (Update) Operators Alfredo/IK7JWX, Alessandro/IW8EHK, Leopoldo/
I8LWL and Titti/IK8GQY (YL) will join Raul/IC8ATA and be active
as IC8/homecall from Procida Island (I.I.A. NA-002, Grid JN70BR)
between November 6ï¿½8th. Activity will be on all HF bands and
6 meters using SSB, RTTY and PSK31. It is possible that the
group may operate from Ischia (Grid JN60XR) and Vivara Islands
(Grid JN70AR) also. QSL via IK7JWX, direct or by the Bureau.
Visit their Web page at: http://www.iz8gdo.it/aristabia

NA-153. Operators Zalo/XE3N, Jose/XE3PP, Benigno/XE2WK and Juan/XE3RR
will be active as XF3RR from Isla Cerrito between December
4ï¿½14th. This operation is organized by the Radio Club Cancun,
and it will be a low scale operation as the island is a
protected area. More details are forthcoming.

NA-231. (NEW/RARE IOTA). After his recent and memorable trip to
Ottawa Islands (NA-230 as VY0O), Cezar, VE3LYC, will attempt
to activate East Pen Island, Nunavut, for three days during
the period between March 26-31st, 2010. Intended callsign will
be VY0V which will be applied for in due course. East Pen
Island is located in CQ Zone 4. Cezar would like to remind
everyone that an earlier try he undertook with Ken/G3OCA in
July 2007 was unsuccessful. The outcome of this new attempt
will be determined by local conditions, weather and safety
factors. At this time Cezar is looking for group and individual
donors who understand and appreciate the nature of this
difficult project and are willing to join in the effort. Support
for this project is welcome via PayPal at:
tiberius.trifu@gmail.com

JD1, OGASAWARA (Update). Operators Ted/K8AQM, Stan/AC8W, Brian/KG8CO and
possibly others will be operating from the Island of Chichijima (AS-031)
in the Ogasawara Island group, starting March 28th, for two weeks as
JD1BNM, JD1BNK and JD1BNJ, respectively. Activity will be on 160-10 meters
using CW, SSB and RTTY. JD1BNJ will be active only on RTTY and PSK. QSL
via LoTW or to K8AQM, direct or by the Bureau.

KH6, HAWAII. Tom, N1CE, will be active as N1CE/KH6 from Oahu Island
(OC-019, HI-008S) between December 17th and January 6th. He states that
his activity will be mobile using a Kenwood TS-480 w/100 watts, and it
will be SSB only on this trip. Tom will use a bunch of Ham Sticks, G5RV
and some end fed 1/2w dipoles (possibly a 160m dipole). QSL only direct
to his home callsign.

KH6BZF PROPAGATION FORECAST/REPORT (For November 9-15th)....
Nov 9 AN SOLAR REFERENCE
Nov 10 AN ---------------
Nov 11 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 12 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 13 AN LN - Low Normal
Nov 14 AN
Nov 15 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KP2, U.S. VIRGIN ISLANDS (Special Event). Operators Garry/K9WZB and Sharon/K7WZB will be operating from Saint Croix Island (NA-106) as K2V between December 2-14th, as a special "Christmas Festival" event. Activity will be on all bands 160-6 meters. They will be monitoring 6 meters most of the time for openings to the U.S. and Europe. Operations will be on SSB, RTTY, CW and PSK31. See QRZ.com under K2V for more information. QSL direct only via K9WZB (No Bureau QSLs); SAE outside of USA with USDs or 2 Euros...Please no IRCs. A special QSL will be available after their return. Log updates daily at: http://www.clublog.org/logsearch/K2V

MD, ISLE OF MAN. Martin, G4XUM, will be active as MD4K during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (15m) entry. QSL via G3NKC.

NCDXF PRESS RELEASE (Dated November 5th). "At a board meeting this week, the Northern California DX Foundation (NCDXF) elected officers for 2010. Bruce Butler, W6OSP, will remain as President. Glenn Johnson, W0GJ, will remain as Vice President. Tom McShane, NW6P, will remain as Secretary/ Treasurer. The NCDXF Board of Directors reluctantly accepted the retirement of Len Geraldi, K6ANP, and Al Burnham, K6RIM, from the Board of Directors after many years of excellent leadership. At the present time, the NCDXF Board is planning on operating with 9 directors.
The <http:/www.ncdxf.org> Web site has been upgraded and newsletters are now available in electronic format and can be downloaded from the Web site. The latest newsletter features 'the rest of the story' and an excellent summary of the 7O1YGF Yemen operation which was only recently approved for DXCC.
Please note that the NCDXF mailing address has been recently changed:
NCDXF, P.O. Box 2012, Cupertino, CA 95015-2012, USA
Please contact me if any questions..... 73 Glenn W0GJ <w0gj@arrl.net>"

OH9, FINLAND (Special Event - This one is for the kids!). Once again Santa's own amateur radio station OH9SCL will be active from Santa Claus Land (SCL) in the Arctic Circle, during the month of December. Activity will be on 160-10 meters using CW, SSB and the Digital modes. Among Santa's helpers, the following operators will be there operating: Raimo/OH3BHL, Erkki/OH9KL, Kimmo/OH9MDV, Juha/ OH9MM and Aaro/OH9RJ. QSL via OH9UV: Santa Claus Land, Napapiirin Yhdeksikot Ry, PL 50, 96101 Rovaniemi, Finland. A special "Santa Claus Land" award is available. For more information about the award, please visit the SCL Web page at: http://kotisivu.dnainternet.net/rakarttu/OH9SCL_2007/OH9SCL_2007

PC60, THE NETHERLANDS (Special Event). Fred, PA0FAW, will activate special event station PC60TROLLEY between 2300z, November 17th and 2300z, December 15th. Activity is to celebrate Arnhem 60th anniversary of the city's use of Trolleybusses. It is the only city in The Netherlands to have them. Fred will use CW, SSB and the Digital modes. QSL via PA0FAW, direct, by

the Bureau, LoTW and e-QSL. SWLs are welcome. Fred states, "I will ask for a special EPC-number and will try to be in at least 1 ISWL-SSB net."

QSL INFO AND NEWS.....
4W6AL QSL CARDS. The Algarve STAR DX Team reported that the 4W6AL picture QSL cards are now available for viewing at: http://algarvedx.com
A double-sided QSL card will be sent for direct request and a single cards for bureau request. QSLs were printed by LZ3HI. They also mentioned that all documents were sent this week to DXCC desk.

QSLS VIA LOTW: 9M2CNC, 9M6XRO, AO8A, CT3EN, CT3FQ, CQ9T, EA1AP, EA8/OH6CS, FO/G3BJ, GW4BLE, HI3TEJ, HK1X, HK6P, IK0YVV, K4M, LA/DL6JZ, LA9Z, LX7I, LY4L, LY9Y, OA4AI, OE9GHV, OG6N, OK1CF, OK2ZI, ON4QX, P49X, PA7LV, PF7M, PR1T, RW0LT, RZ9HT, SV2BFN, TI5/NP3D, TO4X, TS7C, UA3BS/3, UA3SAQ, UA3TCJ, V31MW, VK4MA, WH2X, XE1CQ, YL7X, YO9HP, YW4V, ZM2M and ZY0T

QSLS RECEIVED VIA MAIL: 3XM6JR, 4L5O, 9V1VV, HA5JI, J6/WB4WXE, KL5O, J79ZG, K9AJ/VY0, KD6WW/VY0, LA/DL6JZ, LA/DM2AUJ, LA1CI, LA9IAA, OK1DVM, OX3XR, RI1OP, TA1AN, TA3D, TU2/F5JJW, VC8B and YS1MAE

QSLS RECEIVED VIA THE BUREAU: 4W6R, 9M6/JF2OZH, A35ZS, D68WL, DL0CS, EB1LA, JA7COI, LZ1RAY, UN7MMM, V73WN and YJ0MM

T31, CENTRAL KIRTIBATI. Doug, NH6ZA, is in the process of putting together a DXpedition to Kanton Island using the callsign T31ZA. No other details available. Watch QRZ.com under T31ZA.

T4, CUBA. Members of the "Las Tunas Contest Crew" in Las Tunas will be active as T48K during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. Operators mentioned are: CO8DM, CO8DL, CO8KA, CO7RR and CO8ZZ. QSL via DK1WI.

T8, PALAU. Junichi "Jun", JJ1BMB, will be active as T88AA from Palau Island, Micronesia, between November 9-22nd. He will be there for diving and ham radio. Activity will be on 80-10 meters using CW and SSB. The best days to look for him, and he plans to spend most of his time on the radio, is November 14th, 15th, 21st and 22nd. QSL via his home callsign, direct or by the Bureau.

TC1, TURKEY (LH Activity). Members of the Turkish group called TCSWAT (TC Special Wireless Activity Team) in collaboration with the Directorate General of Coastal Safety
<http://www.kiyiemniyeti.gov.tr/default.asp?id=0&lng=en>
will activate the special callsign TC1YLH from Yesilkoy Lighthouse (TUR 055) between November 6-23rd. Activity will be mainly during the weekends on the HF bands using SSB and VHF-UHF on FM. This is the group's fifth leg of seven lighthouses to be activated for the Marmara Lighthouses On The Air (MLOTA) Award by TCSWAT; details can be found at:
http://www.tcswat.org/awards/MLOTA/index.html
Yesilkoy Lighthouse is one of the distinctive historical landmarks of Istanbul. See:
http://culturecityistanbul.spaces.live.com/Blog/cns!3E86C71118DDDCE5!524.ent

ry
Operators mentioned are: Urcun/TA0U, Leonardo/TA1FR, Tevfik/TA1HZ, Erhan/
TA2DJ, Serkan/TA2JN and Bekir/TA2RX. For more details and information about
the stations, see QRZ.com, and the TCSWAT Web page at: http://www.tcswat.org
Also see: http://www.ta0u.com/detay.asp?idC03

TX3, CHESTERFIELD ISLAND.. Operators George/AA7JV and Tomi/HA7RY are now
active as TX3A until December 6. Activity will be on all HF bands with an
emphasis on the lower bands. QSL via HA7RY. For more detailed information
and updates, visit their Web page at: http://www.TX3A.com

V4, ST. KITTS (NA-104). Andy, N2NT, will once again be active as V47NT
from the QTH of V47KP during the CQWW DX CW Contest (November 28-29th)
as a Single-Op/All-Band/High-Power entry. QSL via W2RQ.

V8, BRUNEI (OC-088). Hans, SM3TLG, will be active as V88/SM3TLG between
November 16-20th. Activity will be on all HF bands. QSL via his home
callsign, direct or by the Bureau.

VP2V, BRITISH VIRGIN ISLANDS. Gerd, DL7VOG, will be active as VP2V/DL7VOG
from Anegada Island (NA-023) between November 15th and December 2nd.
Activity will be on the HF bands, including 160m, mainly on CW and RTTY.
QSL via his home callsign, direct or by the Bureau.

VY1, CANADA (Yukon Territory). Steve, N6QEK, has announced that he is
planning a DXpedition to the Canadian Yukon Territory. He states, "I am
going to be activating VY1 during the American Radio Relay League 2010
RTTY Roundup. I will be based in Whitehorse in a cabin that I have rented."
Steve hopes to be on the air by December 30th (he arrives in Whitehorse
on December 29th). He plans to operate before and after the contest on
80-10 meters (including 17/12m and possibly 160m) using RTTY, PSK31 and
SSB. Operations will cease about January 4th. Check out his DXpedition
Web page at: http://www.n6qek.com

XR0, EASTER ISLAND (Update). The international team of operators continue
to be active as XR0Y from Rapa Nui until November 15th. For more details,
please see their Web page at: http://rapanui2009.org
Read their QSL policy and routes on their Web page or refer to OPDX.932.
LAST MINUTE UPDATE: The XR0Y team will be off-the-air between 1500z Monday,
November 9th and 0100z Tuesday, November 10th. The team will take this
time to see/visit the entire island and take team pictures. They were also
invited by the local community to give an interview at Radio Rapa Nui!

YB0, INDONESIA. Pri, YB0ECT, will be active during the CQWW DX CW Contest
(November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL
via K3AIR.

ZL, NEW ZEALAND (We Stand Corrected). Last week we mentioned that Rick,
AI5P, will once again be active as ZL/AI5P between November 1-6th, from
New Zealand's North Island (OC-036). We stated that North Island was the
main island. This is incorrect per Phillip, ZL2TZE, who informed us that
the main Island in New Zealand is the South Island also known as the Main
Land.

==> + PUBLIC SERVICE: LATE SEASON TROPICAL STORM IDA COMES CALLING ON
GULF COAST

With only weeks to go before the end of the 2009 hurricane season,
Tropical Storm Ida formed off the coast of Nicaragua, making landfall
as a hurricane in the morning hours of November 5. The storm lost
significant strength as it moved through Nicaragua and Honduras, only
to reemerge in the Caribbean a day later, impacting El Salvador and
Mexico. Ida gained strength, becoming a Category 2 storm with winds
peaking at 105 miles per hour in the Gulf of Mexico. The path for Ida
at this point was clearly toward the Gulf Coast of the US, with a
projected landfall somewhere between Louisiana and the Florida
panhandle. As Ida's path became more focused, Amateur Radio operators
and ARESÂ® groups concentrated on increasing their level of readiness
should there be a need to respond. Read more here
<http://www.arrl.org/news/stories/2009/11/12/11192/?nc=1>.

==> + OPERATING: ARRL SWEEPSTAKES TAKES TO THE PHONE BANDS NEXT WEEKEND
```

The SSB portion of the ARRL November Sweepstakes <http://www.arrl.org/contests/rules/2009/novss.html> -- the premier domestic HF contest -- takes place next weekend, running 2100 UTC Saturday, November 21 to 0300 Monday, November 23 (or 4 PM Saturday to 10 PM Sunday EST). According to ARRL Contest Branch Manager Sean Kutzko, KX9X, the event -- first called "The January Contest <http://www.arrl.org/news/stories/2009/10/29/11170/?nc=1>" -- started back in 1929 as a competition for handling formal traffic messages. "Sweepstakes is one of the oldest traditions in Amateur Radio," Kutzko said. "The contest exchange contains more elements than usual, an homage to traffic-handling. If you have never participated in Sweepstakes, you are really missing out on some serious fun!" Read more here <http://www.arrl.org/news/stories/2009/11/12/11194/?nc=1>.

==> + OPERATING: WRTC 2010 ORGANIZERS ANNOUNCE TEAMS

Last month, after a grueling selection process, the organizers of the 2010 World Radiosport Team Championships (WRTC) selected the 44 team leaders who will compete in the event next year. These 44 team leaders, representing all six continents, have each chosen a partner. The rules state that while the leader's partner may be from a different call sign area, they must be from the same country as the leader. WRTC, held every few years, takes place during the 2010 IARU HF World Championships, July 10-11 and will be held just outside Moscow. Read more here <http://www.arrl.org/news/stories/2009/11/11/11191/?nc=1>.

==> ATLANTIC DIVISION TO HOST WEBINAR

<https://www1.gotomeeting.com/register/333780681> Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. On Friday, November 13 at 9 PM EST, Chuck Blocher, PhD, KC2IQV, will present a webinar entitled The Emotional Go Kit: Are You Prepared? "As hams serve as emergency and public service communicators, we prepare our Go Kits and necessary gear to provide essential communications," said webinar sponsor ARRL Atlantic Division Director Bill Edgar, N3LLR. "How prepared are you concerning your emotional wellness during one of these events? This webinar addresses the emotional well-being and preparedness for those Amateur Radio communicators who participate in emergency and public service situations." Please click here <https://www1.gotomeeting.com/register/333780681> to register for this informative, interactive Internet meeting.

==> + AMATEUR RADIO IN SPACE: STS 129 -- STOCKING THE INTERNATIONAL SPACE STATION

Besides taking spare parts to the International Space Station (ISS) this coming Monday, the space shuttle Atlantis (STS-129) will deliver the module antennas for Columbus -- the laboratory built by the European Space Agency (ESA) and host of two Amateur Radio on the International Space Station (ARISS) antennas. "Lou McFadin, W5DID, a member of the AMSAT Board of Directors and a key volunteer for ARISS,

showed the astronauts the best ways for them to safely unpack and assemble the antennas and associated cables once they and the hardware reach the ISS," said ARRL ARISS Program Manager Rosalie White, K1STO. "They reviewed how to maneuver and install the antennas during the spacewalk. Lou also oversaw the re-packing of the antennas and the onboard flight kit that accompanies shipments going to the ISS." Read more here <http://www.arrl.org/news/stories/2009/11/12/11195/?nc=1>.

==> + AMATEUR RADIO IN SPACE: IDAHO SCHOOL INCORPORATES ARISS INTO CURRICULUM

With more than 500 Amateur Radio on the International Space Station (ARISS) contacts conducted, thousands of students have experienced intriguing science and technology lessons -- plus the thrill of speaking with an astronaut who was on the International Space Station (ISS). According to ARRL ARISS Program Manager Rosalie White, K1STO, each school uses the ARISS events in different ways. From school to school, ARISS volunteers see a great range in the types of activities around the event, including integrating the activities into each grade level's curriculum. The lesson in common to all schools includes discussions on what Amateur Radio is, what ARISS is and how the worldwide ARISS Team works together. Click here <http://www.arrl.org/news/stories/2009/11/05/11185/?nc=1> to read about how one elementary school in Idaho integrated Amateur Radio, space -- and more -- into their curriculum.

==> ARRL SAYS "THANK YOU" TO VETERANS

On Wednesday, November 11, Veterans Day -- called Remembrance Day or Armistice Day outside the US -- was celebrated all over the world. Originally a holiday that marked the end of World War I -- the "War to End All Wars" -- has been set aside to honor all who have served their country. It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending the hostilities that had been ongoing since 1914.

The ARRL would like to take this opportunity to thank our service veterans. Whether they served on active duty or reserve, during peace time or time of conflict, they served their county with honor. We also would be remiss if we did not remember the families of those veterans who kept the homefires burning bright; without their love and support, our veterans would have indeed been alone.

ARRL Headquarters has its share of service veterans: Contributing Editor Al Brogdon, W1AB (Army); Publications Sales Associate Mark Dzamba, KB1FMY (Air Force); Assistant VEC Manager Perry Green, WY1O (Army); Volunteer Archivist Charles Griffen, W1GYR (Air Force); Technical Editor Joel Hallas, W1ZR (Army); News Editor S. Khrystyne Keane, K1SFA (Coast Guard); DXCC Manager Bill Moore, NC1L (Army); Reprints Specialist Tony Nesta, AA1RZ (Navy); Membership and Volunteer Programs Manager Dave Patton, NN1N (Navy); Technical Relations Specialist Jon Siverling, WB3ERA (Army); Field and Regulatory

Correspondent Chuck Skolaut, K0BOG (Air Force); Education & Technology Program Coordinator Mark Spencer, WA8SME (Air Force), and Archivist Perry Williams, W1UED (Air Force).

Thank you for your service -- your sacrifice and the sacrifice of your fellow service members is not forgotten.

==> NOW YOU KNOW!: US CALL SIGNS NOT ISSUED BY THE FCC

If you're an American ham, chances are that your call sign was issued by the Federal Communications Commission. A "no brainer," right? Well, if you're an American ham who happens to be stationed at Guantanamo Bay or at one of the US bases in the Antarctic, your call sign is not issued by the FCC -- it's issued by the base commander. Guantanamo Bay (or Gitmo as it's commonly called) uses the KG4 prefix, followed by a two-letter suffix; this block is reserved exclusively for American hams at Gitmo. As for Antarctica, the Antarctic Treaty <http://en.wikipedia.org/wiki/Antarctic_Treaty_System>, signed on December 1, 1959 (and entered into force on June 23, 1961), established the legal framework for the management of Antarctica, including allocation of amateur call signs; the National Science Foundation received their block on July 1, 1959. US military hams in Japan and Korea are also issued special call signs:

- KA2AA-KA9ZZ -- reserved for US Army-authorized amateur stations in Japan.
- KC4AAA-KC4AAF -- reserved for the National Science Foundation's use at the South Pole <http://antarcticsun.usap.gov/features/contentHandler.cfm?id=1701>.
- KC4USA-KC4USZ -- reserved for US Navy-authorized amateur stations at their Antarctic bases.
- KG4AA-KG4ZZ -- reserved for US Navy-authorized amateur stations at Guantanamo Bay). <http://members.visi.net/%7Everb/index.html>
- KL9KAA -- KL9KHZ -- reserved for assignment to US personnel stationed in Korea.
- The 40 call signs having the first two letters AF, KF, NF or WF and the letters "EMA" following a numeral are available to the Federal Emergency Management Agency (FEMA).

The FCC once issued call signs to hams who lived in the Caroline Islands and the Marshall Islands. Even though these entities -- former United Nations Trust Territories -- now have their own sovereignty (and DXCC prefixes), the FCC will not issue call signs in the following blocks:

- KC6AA-KC6ZZ -- KC6 was two DXCC entities: The Eastern Caroline Islands and the Western Caroline Islands. The Eastern Carolines became the Federated States of Micronesia (V6) and the Western Carolines became the Republic of Palau (T8).
- KX6AA-KX6ZZ -- the former Marshall Islands, now the Republic of the Marshall Islands (V73).

You can find out more
<http://wireless.fcc.gov/services/index.htm?job=call_signs_3&id=amateur&page=
1#2&ref=>
on the FCC's Web site. Now you know!

==> SOLAR UPDATE

In for Tad "While the wonders of nature exploring
<http://englishhistory.net/keats/poetry/tosomeladies.html>" Cook, K7RA,
reports: Sunspot region 1029 disappeared after October 30, as it began
transiting the Sun's back side. Six days after it was gone, a new
region -- region 1030 -- appeared for several days. By November 8,
region 1030 had faded away and looked like other weak spots we've seen
over the past couple of years, except they appeared for one day with a
sunspot number of 11. Sunspot region 1030 ran for three days with
sunspot numbers of 15, 16 and 11. Then on November 9, the sunspot
region re-emerged, with sunspot numbers of 14, 13 and 11 through
November 11. While 1030 passes over the Sun's western limb, we can
still see sunspot region 1029 transiting the far side of our local
star, now approaching the eastern horizon. None of this observation
would be possible but for the STEREO mission
<http://stereo.gsfc.nasa.gov/>. Old region 1029 appears as a bright
area of magnetic disturbance, and we can't actually determine what the
sunspot number or the total area of the region might be, but it still
appears to have a large and robust magnetic signature. The 45 day Air
Force and NOAA Ap and flux forecast gives us some clue about the dates
it will emerge into view, and when it is most directly facing Earth.
Predicted solar flux is 72 for November 12-13, 73 on November 14-15, 74
on November 16-17, 75 on November 18-21 and 80 for November 22-24.
After that, the forecast shows it declining to 75, 72 and 70. This
suggests it might reach the most geoeffective position, that is, the
position where it is near the Sun's central meridian relative to the
Earth, around November 22-24. Conditions have been good, with continued
weak or missing solar wind, and very quiet geomagnetic indicators. Look
for more information in the Solar Update, available on the ARRL Web
site on Friday, November 13. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation
page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad
Cookism" brought to you by John Keats' To Some Ladies
<http://englishhistory.net/keats/poetry/tosomeladies.html>.

==> + INTERNATIONAL: NORWEGIAN AMATEURS RECEIVE NEW PRIVILEGES

On November 6, radio amateurs in Norway were granted privileges
<http://www.lovdata.no/ltavd1/filer/sf-20091105-1340.html> on three new
bands, as well as primary status on the extended 40 meter band and a
frequency extension on 12 meters. According to IARU Vice President Ole
Garpestad, LA2RR, Norwegian amateurs received new secondary user
privileges on 60 meters (5.260-5.410 MHz), the 600 meter band (493-510
kHz) and in five blocks in the 4 meter (70 MHz) band. Amateur Radio
operators in Norway will also enjoy upgraded privileges on 40 meters,
moving from secondary to primary users between 7.100-7.200 MHz and 1000

W output. They have also received a new secondary allocation from 24.740-24.890 MHz in the 12 meter band, expanding upon Norway's existing primary allocation of 24.890-24.990 MHz. Garpestad said that "minor adjustments" were also made in the SHF (3-30 GHz) and EHF (30-300 GHz) portions of the band. "Congratulations to our Norwegian colleagues," said ARRL Chief Executive Officer David Sumner, K1ZZ. "The new domestic allocations in Norway are consistent with the present and future spectrum requirements for the Amateur Service as determined by the IARU Administrative Council. We hope that other administrations will consider taking similar steps."

==> THIS WEEK ON THE RADIO

<http://www.arrl.org/contests> This week, look for an NCCC Sprint on November 13. The Bill Windle QSO Party is November 14. The Worked All Europe DX Contest (RTTY), the Kentucky QSO Party, the JIDX Phone Contest is November 14-15 and the OK/OM DX Contest (CW) are November 14-15. The CQ-WE Contest (SSB, CW and Digital) is November 14-16. The Run for the Bacon QRP Contest is November 16 and the NAQCC Straight Key/Bug Sprint is November 19. Next week, the ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/contests/rules/2009/novss.html> is November 21-23. The Feld Hell Sprint is November 21. The LZ DX Contest is November 21-22 and the NA Collegiate ARC Championship (SSB) is November 21-23. The EU PSK63 QSO Party is November 22. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, November 22, 2009, for these online course sessions beginning on Friday, December 4, 2009: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1683 - November 13 2009

The following is a closed circuit advisory and not necessarily for air.

OK, you all know why I am here. Its almost fall and all the bills from summertime have been mounting up. And, as usual, there is really not very much left in the treasury to pay them.

Its always this way. During June, July and August, people are spending more time away from home. You are out camping or at a ball game. Maybe it's a concert or traveling on vacation. We all do it, but most of you also find a local repeater to listen to this weekly newscast no matter where you go.

Now think of this. Our expenses to bring you the news are the same no matter if you are listening on the road, on an HT or from your hamshack at home. Eventually the bills have got to get paid and that time has come.

Now that everyone back at home and into their fall and winter life schedule, we ask that you take a few moments to send a donation to the Amateur Radio Newsline support fund so that we can keep these newscasts coming your way. Making a contribution is only a mouse click away if you have Pay Pal. Just go to www.arnewsline.org and click on the button at the top of the page marked "Make Donation." Or you can send in a donation to the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066.

Whichever way you choose, the all volunteer crew at the Amateur Radio Newsline will be eternally grateful.

Once again that's the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066. Or by Pay Pal at www.arnewsline.org

For the Support Fund, I'm Andy Jarema, N6TCQ. Our newscast follows.

**

The following is a QST. A new record down-under as hams use red light off clouds to cross the Bass Strait. Also, Indonesia announces that it will launch a rescue radio ham satellite, Finland and Norway say yes to 4 meter operation and an unlicensed broadcaster tries a truly unusual defense after being fined. Find out the details on Amateur Radio Newsline(tm) report number 1683 coming your way right now.

(Billboard Cart Here)

**

EMERGING TECHNOLOGY: NEW LED HAM RADIO LIGHT COMMUNICATIONS RECORD SET DOWN-UNDER

A new, non line-of-sight optical communications distance record of 288 km has been set down-under with a one-way transmission between two hams transmitting with Light Emitting Diodes. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

On the night of October 27th, Rex Moncur, VK7MO, and Joe Gelston,VK7JG, assisted by Paul Godden,VK7KPG, set a new one way non line-of-sight optical record of 288 km across Australia's Bass Strait. And they did this using red light scattered of the clouds.

VK7MO was on Mt. Liptrap in South Gippsland listening on his A-P-D based receiver. This while VK7JG and VK7KPG were on Mt. Horror in North-East V-K-7 transmitting with a 3 watt Luxeon LED transmitter. The signals from Mt. Horror were bounced off of some high altitude cirrus clouds estimated to have been at about 20,000 feet.

On the receiving end, the callsigns from Mt. Horror were decoded by VK7MO using a new program called Weak Signal Communicator. Weak Signal Communicator is actually a new front end for the Spectrum Lab audio analyzing application that has was recently created by David Smith,VK3HZ.

The experimenters also tried the WSJT decoding program developed a few years ago by Joe Taylor, K1JT. The sync signal was received at -30dB but unfortunately there were no decodes.

None the less. the possibility of bridging Bass Strait by optical communications using weak signal technology now been proven. A full report will be posted to the Radio and Electronics Association of Southern Tasmania website in the near future.

>From Los Angeles, I'm Bruce Tennant, K6PZW, reporting for the Amateur Radio Newsline.

--

Only the inquisitive minds of radio amateurs could make a feat like this possible and doing it with relatively inexpensive gear. The U-R-L for the REAST website is http://reast.asn.au/optical.php (VK7TW)

**

HAM RADIO IN SPACE: INDIANOSIA TO LAUNCH RESCUE RADIO HAMSAT

Indonesia is planning a rescue radio ham satellite. Amateur Radio Newsline's Jerry Gaul, KE7GGV, reports:

--

The Bernama dot com on line newspaper reports that the Indonesian Amateur Radio Organization called Orari and the Indonesian National Institute of Aeronautic and Space plan to launch the ham radio bird next year. But so far the president of the Orari has not revealed the satellite's size nor its orbital distance from Earth.

According to the website, the new ham radio bird will be used to expand the nations ham radio communication network to remote districts. It went on to note that the satellite will play a major role in linking land, sea and air communication for rescue radio operations.

The article also noted that ham radio operators from Orari had become the alternative communication tool. This, during disasters like the tsunami in Aceh and the recent earthquake in Padang.

For the Amateur Radio Newsline, I'm Jerry Gaule, KE7GGV, in Albany, Oregon, reporting.

--

You can read the entire story on-line at http://www.bernama.com/bernama/v5/newsgeneral.php?idE31790 (Bernama.com)

**

RESTRUCTUTRING: FINLAND ALLOWS LIMITED 4 METER ACCESS

Amateurs in Finland, as well as the separate DXCC entities of Aaland Island and Market Reef, can now operate in 70.000 to 70.175 MHz and 70.225 to 70.300 MHz. But a report on the Four Meters web site by OZ2M says that 4 meter operation is not permitted within the 13 border municipalities. Also, that transmissions within 50 km of the Russian border are only permitted with the antenna's main lobe pointed away from that nation. A maximum transmission power is limited to 25 watts within 50 km of the Norwegian border will also be enforced.

But there is some good news on the 6 meter front. This as hams residing in Finnish coastal areas are now free for 50 MHz operations which were previously forbidden due to former Swedish Channel 2 television broadcasting. (OH1ZAA, via UKSMG Announcement)

**

RESTRUCTURING: NORWAY GIVES HAMS 4 METERS

And Norway has joined Finland in giving its radio amateurs limited access to 70 MHz operation. As of November 5th hams in Norway plus those on Svalbard, Bear Island, Jan Mayen, Bouvet Island, Peter I Island and in the Norwegian land areas on Antarctica can run up to 100 watts in five small subbands on the 4 meter band.

But Norway's restructuring of its hamband allocations does not end there. In addition to the new 70 MHz allocation Norwegian radio amateurs have also gained new bands at 500 kHz and 5.2 MHz as well as a

150 kHz. They have also been granted an extension to the 24 MHz band

In addition to 135.7 to 137.8 kHz and 7.1 to 7.2 MHz, Norwegian amateurs can now use 493 to 510 kHz on secondary basis at 100 watts using Morse only. Also added were allocations at 5 dot 260 to 5dot 410 MHz on secondary basis and 24 dot 740 to 24 dot 890 MHz, also on secondary basis.

The complete Norwegian Amateur Radio Regulations in Google translated English are at tinyurl.com/NorwayRadioRegs. (Southgate)

**

AWARD CONFLICT: C91VM QSL 'S FOR RECENT IOTA REJECTED

Hams planning to claim Islands on the Air credit for October 2009 contacts with C91VM are being told that these three operations will not be accepted for IOTA accreditation. This, because of the operator's current published QSL card policy.

According to G3KMA the operator of the expeditions has been notified that a policy change must be made that states that the request of 5 dollars in U-S currency is not obligatory. Also, IOTA award sponsors want a promise that cards sent direct to C91VM with sufficient return postage will be answered direct and in a timely fashion.

According to the November 7th release, a prompt amendment to this QSL policy notice as posted on QRZ.com is required if accreditation is to be reconsidered. (G3KMA)

RESCUE RADIO: I.T. HAM SPEARHEADS RESCUE RADIO TECHNOLOGY

An interesting article in Computerworld Magazine is certain to get some in the field of Information Technology thinking seriously about amateur radio. The title is ï¿½Want to bone up on wireless tech? Try ham radio' and Jim Linton, VK3PC, has the story behind the story:

--

The article centers on John Hays K7VE, an IT Manager in Washington who devotes most of his spare time to help develop a communications system designed to integrate portable two-way radios with the global telephone

network. He hopes to create a failure-proof voice communications infrastructure that can immediately connect first responders with the outside world, even when their own mobile cell phones are put out of service during an emergency.

The article points out that being a radio amateur he has access to abundant spectrum resources in which to engage his passion for research and wireless experimentation. John K7VE attributes his ability to engage in such research would not be possible without being part of the amateur radio community.

The article quotes him saying: ï¿½For IT professionals, ham radio can foster skills that are translatable into real-world wireless and wired networking applications.'

For the Amateur Radio Newsline, I'm Jim Linton VK3PC.

--

The article includes information about ham licensing and a few sample theory test questions. A link to it can be found at http://tinyurl.com/ComputerWorldHamRadio) (WIA News)

RESCUE RADIO: W6FOG SOON BACK OUT TO SEA

Hams following the news about Neil Hays, W6FOG, sailing trip will be pleased to hear he has recovered and plans to be back out to sea soon.

As of November 2nd, Neil had survived very bad weather and high seas along with hypothermia. According to reports the sea was so heavy his tow line to the Coast Guard cutter broke three times during the rescue.

Late word is that once back on the water his plans are to travel along the west coast to the Panama Canal and then through it into the Caribbean. According to his home page on QRZ dot com. W6FOGF hopes to contact over 2000 gridsquares using the ham radio satellites during the voyage. He will also be on H-F at 14.280, 7.280 and 3.980 MHz, The H-F frequencies will be monitored 24 hours a day. (Southgate)

**

RADIO LAW: CONDO RESIDENTS WIN DECLATORY RULING TO KEEP TV ANTENNA

In an October 30th ruling, the FCC granted Constance and Daniel Lane of Palantine, Illinois a Declatory Ruling permitting them to put up a rooftop TV antenna. This, after the board of their homeowners association told them they could not do so. Amateur Radio Newsline's Frank Haas, KB4T, has the details:

--

Constance and Daniel Lane had installed a television antenna on the roof of their townhome. In their petition to the FCC they had sated

that they own the deeded townhome with exclusive use of their roof .

Their homeowners association does not dispute this assertion. However, the association's rules require that antennas must be installed in the attic of a townhome and any deviation from this requirement must be approved by the Board of Directors.

But an exception in this rule exists where an owner cannot get an usable signal with an antenna in the attic. The Lane's allege that they cannot get an acceptable quality air signal in their attic and that therefore they have installed a roof mounted antenna.

In their petition to the FCC the Lane's stated that the Association was imposing continuing fines with respect to this installation. Because of this they requested the Commission to prohibit the association from enforcing its rule. The homeowners association was aware that the Lanes had taken the matter to the FCC but never filed any response.

In granting the Lane's petition the FCC weighed heavily on its own Over-the-Air Reception Devices Rule. This is the 1996 law which prohibits governmental and private restrictions that impair the ability of antenna users to install, maintain, or use over-the-air reception devices. It applies to satellite antennas that are one meter or less in diameter and, as in the Lane's case, to antennas designed to receive over the air television broadcast signals.

In granting the Lane's the request the FCC noted that by declining to oppose the petition, the homeowners association has failed to carry its burden. It therefore concluded that the Lane's antenna installation on their roof is permissible under the Commission's Rule as well as the homeowners association's rules.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida.

--

At airtime its unknown if the homeowners association plans to file an appeal. (FCC)

RADIO LAW: PHILADELPHIA CELL BAN COULD IMPACT MOBILE HAMS

Operating a two-way radio mobile in Philadelphia may cost you $75 a pop beginning December 1st. This, thanks to a new cell phone law about to fully take effect in that city.

While the purpose of the law is to discourage the use of cell phones while driving there is a clause which prohibits the use of a wireless communication device for voice communication while operating a motor vehicle on any Philadelphia street. Hands free operation is permitted.

An article in the Philadelphia Inquirer quotes a 9th District Police Officer saying there are some exceptions to the new law. These are to call the 911 emergency line or while using a two-way radio to conduct official business for the city, state, or federal government. Otherwise the law says to pull over and put the car in park or neutral before making a call.

Local hams have been in touch with ARRL Volunteer Counsel to get their opinion of the bill. More information can be found in the Holmesburg Amateur Radio Club November newsletter at www dot harcnet dor org. Updates on the how this new law will affect on ham radio will be posted there as well. (WA3PZO)

**

RADIO BUSINESS: PANASONIC TO BUY SANYO

Panasonic Corp. will make formal its takeover bid for rival Sanyo Electric. This, as part of a move by Japan's largest consumer electronics company to transform itself into a green energy supplier as well.

Panasonic says that it has received sufficient assurance from regulators around the world to proceed with the $4.45 billion deal. If approved it would place Panasonic a strong position in the solar panel, fuel cell and rechargeable battery areas. All three are important to the future of both broadband and radio communications advancement. (Shoptalk)

HOLIDAY HAM RADIO: OH9SCL FROM SANTA CLAUS LAND

Ham radio will again be active from Santa Clause Land in the arctic Circle. This as station OH9SCL will takes to the holiday airwaves during the month of December. Plans are to have the station operational on 160 through 10 meters using CW, SSB and the digital modes. QSL's go via OH9UV. (Via e-mail)

**

HOLIDAY HAM RADIO: OPERATION SANTA CLAUS INVITE

And speaking about the upcoming ham radio holiday season, this note to those clubs and groups planning an on-the-air Operation Santa Claus. The event aimed at bringing some of the holiday joy to hospitalized youngsters.

For those not aware, Operation Santa Claus is a helping hand event begun by April Mell, WA6OPS, more than two decades ago. This, when she was an Occupational Therapist at a hospital in Orange County, California. Being an active radio amateur she came up with the idea of using ham radio to let hospitalized youngsters chat for a moment with the man with the white beard wearing the red suit. Usually that Santa is a ham somewhere on the hospital premises who has both a love of

children and that great Santa laugh.

Anyhow, it was only a few short years before her Operation Santa Claus idea was being copied by radio clubs nationwide and eventually worldwide. For some clubs, it has become an annual way for them to provide a very special service to their community.

If you or your group are planning an Operation Santa Clause event this holiday season, please let us know the date, time and the hospital that you will be serving. Also tell us who will be your Santa and whom his radio equipped helpers will be so that they can be given the recognition that they deserve. If you do this, then we will do our best to get that information out to the rest of the world-wide ham radio community. (ARNewsline(tm))

HAM HAPPENINGS" HAM RADIO UNIVERSITY 2010 IN NY ON JANUARY 10th

The eleventh annual Ham Radio University held in conjunction with the ARRL New York City/Long Island ARRL Section Convention on Sunday, January 10, 2010. The venue will be Briarcliffe College in Bethpage, New York.

For those not aware, Ham Radio University is a day to learn and experience the many aspects of amateur radio. The theme this year is Digital Communications and so far more than fifteen seminars are already scheduled. There will also be a VE session for those who would like to take an FCC exam and Special Event Station W2V set up and operational on HF.

Ham Radio University 2010 is sponsored this year by the Great South Bay Amateur Radio Club and is a cooperative effort between over twenty clubs and organizations in the New York City- Long Island area. More information is on-line at www.HamRadioUniversity.org (K2DO)

THE SOCIAL SCENE: FLYING TO THE HUNTSVILLE HAMFEST WILL BE EXPENSIVE IN 2010

If you are planning to fly to next summers Huntsville Hamferst, you had best start saving for the trip right now. This is because New federal statistics show Huntsville has the nation's most expensive airplane ticket to purchase from anywhere.

A report from the Bureau of Transportation Statistics shows the average domestic airfare for the north Alabama city cost $471 in the second quarter of this year. That's $68 higher than the second-place city, Grand Rapids, Mich. Atlantic City, New Jersey, had the lowest average cost for an airplane ticket, at $185.

None of the prices include extra charges like bag fees. The statistics are for one-way and round-trip tickets. (Online Travler)

WORLDBEAT: UK GETS ITS FIRST 6 TO 10 METER REPEATER

Turning to news from across the Atlantic, word that the Wessex Repeater Group in the United Kingdom has announced that telecommunications regulator Ofcom has approved for immediate operation the UK's first 6 to 10 meter cross-band repeater. GB3WX will be co-sited with the 2m voice repeater GB3JB in South Wiltshire. The system, when not being used as a repeater, will transmit a beacon signal enabling those interested in propagation to directly compare signals between 6 and 10 meters. This is because both the 10 meter and 6 meter radios will transmit with the same ERP using the same dual-band omni-directional antenna system, and enabling direct comparisons to be made. More is on-line at the group's web site: http://twxrg.web.googlepages.com/home (GB2RS)

**

WORLDBEAT: EUROPE HAS NEW PC FOR THE ELDERLY

A new desktop PC aimed at people aged over 60 who are unfamiliar with Personal Computers and the internet has been unveiled in the United Kingdom. Called Simplicity, the simplified desktop has only six buttons directing users to basic tasks such as e-mail and chat.

The Simplicity computer has no log-in screen when it starts up, contains no drop-down menus and comes pre-loaded with 17 video tutorials. The operating system is a version of Linux that can be customized by users.

So far the SimplicITy computer system is only available in the Europe. According to the BBC story introducing it, more than 6 million people in the UK over the age of 65 have never used the internet, according to British government figures. (ScienceOnLine)

**

HAM RADIO IN SPACE: AMSAT - NA CREATES STUDENT MEMBERSHIP CATEGORY

AMSAT North America now has a new category of membership aimed at the younger set. During the November 3rd board meeting a motion to add a student membership category was unanimously approved. The student membership will cost one half of the current membership.

The approved motion reads in part that to expand its educational outreach efforts, AMSAT-North America is establishing a student category of membership. The yearly dues will be half the standard applicable rate, and shall be available to all students in primary and secondary schools. Also, post-secondary school students enrolled in classes at least half of the time will also be eligible for a maximum of 6 post-secondary years in this membership category. Any student membership application should indicate the school being attended, the course of study and the expected graduation date. (ANS)

**

ON THE AIR: TUBE / VALVE QRP OPERATING DAY NOVEMBER 15

On the air, word that Tube or Valve Radio QRP Day takes place on Sunday November 15 from 1600 until 2359 UTC. Originated in the United Kingdom, the basic idea is to communicate using tube or valve based equipment that was popular a generation ago.

Tube or Valve Radio QRP Day limits itself to a power level of 5 watts or less, usually using separate receivers and transmitters. However planners note that vintage higher power rigs throttled back to 5 watts or below are fine.

This event is not a contest. Rather this is a celebration of ham radio in days gone by,. As such, its planners suggest that those taking part try and send some slow CW. They add that if you are a bit shaky to have the hot shot stations slow down for you.

There is one warning we want to pass along to those not familiar with tube or valve based radio gear. All of it uses voltages that can harm or even kill you if you come in contact with it. If you have never played with this type of equipment, please at least partner with someone who has and is aware of the safety precautions that must be taken.

Lastly, if you do decide to take part, please send any reports and photographs by e-mail to g3vtt at aol dot com before November 20th. More on this event is on-line at www.gqrp.com (G3VTT)

**

DX

In DX, word that DL7DF and some of his friends will operate from Phu Quoc Island through November 17th. Two stations are operational. One is concentrating on CW and SSB with the other operating RTTY, PSK31 and SSTV. QSL via DL7DF either direct or via the DL QSL Bureau.

An international team is heading to Samoa and will be operating portable 5W through November 17th. Their announced plans are to have two stations including amplifiers for all-band activity. QSL as directed on the air.

KL7JR reports that plans are underway for the activation of Jacquot Island before and during ARRL's December 11th to the 13th Ten Meter Contest. Listen out for VY1RST to concentrate on 10 meters for the contest and 14.260 for non-contest activities. QSL via KL7JR at his callbook address.

AA7JV, and HA7RY are reportedly active as TX3A from the Chesterfield Islands. They are expected to be there for at least another two weeks with priorities given to operating on 160, 80 and 40 meters. They will also try to make time the contacts on the higher bands as time permits. Updates can be found at www.tx3a.com. QSLs via the bureau or direct. E-QSL and Logbook to the World are also being accepted.

EI6DX, will be operational from Somone Senegal through November 16th. He plans to focus on the lowbands and CW. QSL via bureau or direct to RX3RC.

Lastly, T30KI and Mike,T30IW are expected to show up from Abatao Islet on the Tarawa atoll working CW and SSB on 60 through 6 meters/ This, from November 10th to the 16th. QSLs for both calls go via N1EMC.

(Above from various DX news sources)

**

ENFORCEMENT: TEXAS REALLY IS A STATE AND YOU NEED AN FCC LICENSE TO BROADCAST THERE

And finally this week an enforcement story with a novel twist. This as an unlicensed broadcaster who tried to use the United States Foreign Sovereign Immunities Act as his reason not to have an FCC license is now facing a $10,000 fine. Amateur Radio Newsline's Jim Hendershot, WA6VQP, has the details:

--

By way of background, on February 22nd 2007, the Dallas FCC Office issued a Notice of Unlicensed Operation to Raymond Frank. It warned him that the radio transmissions on 100.1 MHz from his residence were not authorized by the Commission. The letter also outlined the possible penalties for continued unlicensed operation. On March 5th 2007, the Dallas Office received a reply from Mr. Frank stating that the transmissions had ceased.

But the matter did not end there. On July 22nd 2009, in response to a complaint about an unlicensed radio station in the Austin area, FCC agents traced the signal to Frank's home. So on August 13th 2009, the Houston FCC Office issued a Notice of Apparent Liability for Forfeiture to Frank in the amount of $10,000 for the apparent willful and repeated violation of Section 301 of the Communications Act.

Raymond Frank submitted his responses to the proposed fine that seemed to be based on a law called the United States Foreign Sovereign Immunities Act. This is the code that lets foreign delegates to the United States get away with such things as double-parking and then

ignoring the ticket on their car. But it seems as if Raymond Frank was trying to invoke it in his defense whether he knew the law applied or not. Here's why:

In his response to the proposed fine, Frank claimed that the Commission had no jurisdiction over the matter. He asserted that as a citizen of the Republic of Texas, he was not subject to the laws of the United States or the Commission's Rules. Specifically, he claimed that the Commission lacks jurisdiction over his actions, because he operated a radio station solely within the boundaries of the state of Texas. He also claimed that the Commission's licensing policies violate the First Amendment of the constitution.

As you might expect, the FCC did not buy his defense. In affirming the fine the FCC noted that Section 301 of the Communications Act explicitly sets forth the Commission's jurisdiction over all radio transmissions, both interstate and intrastate. It also states that no person shall use or operate any apparatus for the transmission of energy or communications or signals by radio from one place in any state to another place in the same state, or from one place within a state to another state without a license. Thus, contrary to Raymond Frank's assertion, the Commission does indeed have full jurisdiction over the use of radio transmitting equipment within the state of Texas and it was invoking that jurisdiction in his case.

The FCC also noted that the U.S. Supreme Court has repeatedly held that there is no constitutional right to use radio facilities without a license. It said that issuing a forfeiture for operating a radio station without a license simply represents the enforcement of the Communications Act, and as such it is not some abridgment of Mr. Frank's Constitutional rights.

In summary, the FCC said that it had examined Mr. Frank's response to the proposed fine in conjunction with the Forfeiture Policy Statement. As a result of its review, the FCC said that it finds no basis for cancellation or reduction of the $10,000 fine proposed for this violation.

For the Amateur Radio Newsline. I'm Jim Hendershot, WA6VQP, in Grants Pass, Oregon.

--

The bottom line: Whether or not Raymond Frank recognizes the authority or jurisdiction of the FCC does not matter. Right now he has only 30 days from the date the order was issued to pay up or to file a further appeal. (FCC)

GB2RS NEWS

Sunday 15th November 2009

The news headlines

Electronic Voting available for the RSGB 2009 elections

Some UK licences get an extended validation period

New allocations for Finnish and Norwegian radio amateurs

An electronic voting system is now up and running for voting in the RSGB 2009 elections. It is being run by the Electoral Reform Society. There are four Board places to be filled and Region 9 also has an election for the Regional Representative position. Full details of all the candidates and how to vote are in the December RadCom and on the RSGB website at www.rsgb.org. Members may still send in a postal vote if preferred and an envelope is included with this month's RadCom. Please note that RSGB members have until noon on 10 December to register their vote and you must only use one method of voting.

Ofcom introduced a new, easy online licensing system in 2006 that requires amateur radio licensees to validate their licence details at least once every five years. If you have not already got your licence, you can see how easy it is at Ofcom's website. If your licence has an issue date between November 2006 and August 2007 and licensing details have not been amended since then, your licence will be due for validation around the time of the London Olympic and Paralympic Games in 2012. During this time, Ofcom will be busy preparing for the event, making sure that the extra demand for spectrum is met without causing interference. Therefore, Ofcom has decided this time round to automatically extend the validation period of these amateur licences for a further year, giving 6 years from the issue date. After this, these licence holders will need to update their licences themselves. Full details can be found in the December RadCom and on the RSGB website at www.rsgb.org.

The Finnish Communications Regulatory Authority has given stations in Finland and its territories access to the 70MHz band. This includes Finland, OH, Aaland Island, OH0, and Market Reef, OJ0. The new allocation is 70.000 to 70.175MHz and 70.225 to 70.300MHz with 25, 30 or 100 watts depending on licence class. Restrictions apply for stations closer than 50km to Norwegian and Russian borders.

Updated amateur radio licensing regulations have also come into force in Norway. New allocations have been made available to all Norwegian radio amateurs in addition to the 135.7 to 137.8kHz and the 7.1 to 7.2MHz bands. In the LF bands there is a secondary allocation at 493 to 510kHz with 100 watts, CW only. At HF there is a secondary allocation at 5.260 to 5.410MHz, all modes with a 6kHz maximum bandwidth and 24.740 to 24.890MHz on a secondary basis, with 1kW and 6kHz maximum bandwidth. In the 70MHz band there are several changes. All allocations are on a secondary basis with 100 watts maximum and a maximum bandwidth of 16kHz. Norway has extra allocations at 70.0625 to 70.0875MHz, 70.1375 to 70.1875MHz, 70.2625 to 70.3125MHz, 70.3625 to 70.3875MHz and 70.4125 to 70.4625MHz.

2

Thailand's 7MHz expansion has received the go ahead from their telecommunications regulator. The Thai National Telecommunications Council has approved the expansion of the 40m band giving Thai radio amateurs a primary status between 7.0 and 7.2MHz.

The recently postponed Train the Trainer course for Reading, Berkshire has now been rescheduled for Saturday 21 November 2009. It will be located in the Boardroom, Nabishi UK Ltd, 16c Upton Road, Reading, Berkshire RG30 4BJ, starting at 9.30am. For further information please contact Dr Alison Johnston, G8ROG by e-mail to g8rog@apj1.co.uk or by phone on 0118 954 5368, in the evenings please, or visit the regional RSGB website www.rsgb-region-9.org.uk.

Castles and Stately Homes OnThe Air have launched a new website for Northern Ireland. It can be found at www.cashota-ni.org. All information and details of historical sites and how to activate them can be found here, including activation forms for those amateurs that wish to have a go gaining the award. Information can also be obtained from The Northern Ireland Representative, Bobby 2I0ULL on 0774 701 9438.

Amateur wishing to claim IOTA credit for October 2009 contacts with C91VM, whilst activating IOTA references AF-061, AF-066 and AF-088, should be aware that, in response to the operator's current published QSL policy, these three operations will not be accepted for IOTA accreditation. Clarification is awaited from the operator that a policy change will be made immediately to the effect that payment of 5 US dollars is not obligatory and that cards sent direct with sufficient return postage will be answered direct in a timely fashion. A prompt amendment to the policy notice on QRZ.com is therefore required if accreditation is to be reconsidered.

The ARMMS RF and Microwave Society is an independent professional society comprised of Electronics Engineers with an interest in RF & microwave design and measurement. The two-day ARMMS Conference will take place on 23 and 24 November at the Rockingham Forest Hotel, Corby. Full details of the conference programme can be found on their website www.armms.org.

And now for the details of rallies and events for the coming week

Today, Sunday 15 November, the CATS Radio & Electronics Bazaar will take place at the 1st Coulsdon Scout HQ, at the rear of the Council Car Park, Lion Green Road, Coulsdon, Surrey. Doors open from 10am to 1pm and entry is £1. Car parking is free and you will find the usual Bring & Buy as well as catering. Details from Andy G8JAC, e-mail g8jac@btinternet.com.

The Mayo Radio Experimenters in Ireland is holding their annual Radio Rally on Sunday 22 November, in The Welcome Inn, Castlebar, Co Mayo. The Mayo Club has also organised Declan Craig, EI6FR to give a talk the evening before the rally, at 8.30pm. He will have an interesting account about past expeditions and IOTA activity that he has taken part in, how to plan future events and what is involved. The hotel is offering a special rate for those wishing to stay the night before the rally. More information can be found on their website http://ei7mre.org/rally.htm.

Also on 22 November, the Plymouth Radio Club Rally will take place at the Elm Community Centre, Leypark Walk, Estover, Plymouth PL6 8UE. There is plenty of car parking and the doors open at 10.15 for disabled visitors and 10.30am for other visitors. There will be trade stands and a Bring & Buy as well as suitable catering facilities.

3

Now for the news of special events

Members of the Galway VHF Group will be operating an HF station for a 24 hour period from lifeboat stations in County Galway. On 15 November they will operate from the Aran Island Lifeboat station at Kilronan, Inishmore. There will be a special QSL card for all contacts made and SWL reports will also be welcomed.

Members of Chorley & District Amateur Radio Society will be operating GB0LD from the village of Hoghton in central Lancashire. The station will be celebrating Lancashire Day, the actual date of which is Friday 27 November. However, they are so proud of Lancashire that the station will be active from Thursday 26 November to Sunday 29 November inclusive. The station will be operating on the HF bands dependent on propagation, with activity also planned on 2 metres & possibly 70 centimetres. QSL will be via the bureau. More information can be found on QRZ.com.

To celebrate the Winter Olympic Games, VG7V will be on the air from Canada until 30 November. QSL via VE7OM.

And now the HF DX news compiled from 425 DX News and other sources.

The Uruguay DX Group Falkland Islands DXpedition will be on the air from Port Stanley until 21 November. They plan to start operation at local sunset on the 14th working 40 meters. Listen out for VP8BUH on SSB and VP8BUG on CW and digital modes. The QSL manager is David,

ED7DX.

DL2RMC, DL2JRM and DM5TI will be on from Christmas Island, the VK9 one, from 21 November to 5 December. They will be on all bands and modes, with emphasis on the low bands, mostly operating CW.

An international team is heading to Tonga, prefix A3, from 18 November to 1 December. Plans are to have two stations including amplifiers for all-band activity. Full details are on IK1PMR's website, which can be found using your favourite search engine.

RA9LI will be active from Troynoy Island, which is IOTA reference AS-086, in Asiatic Russia for about a year using the callsign RA9LI/0. He will be active on the HF bands. QSL via UA9LP.

WB2IQU will be active from Western Samoa between 18 and 22 November as 5W2IQU. He will be active mainly on 20m. QSL via his home call.

Now the contest news

The UHF UK Activity Contest takes places on 17 November between 1900 and 2130UTC. Using all modes on the 1.3 and 2.3GHz bands, the exchange is signal report, serial number and locator.

The 2nd 1.8MHz Contest takes place on Saturday 21 November. It's a 4-hour CW `bash' in which entrants can expect to work plenty of continental stations, as well as the UK. Conditions permitting, well-equipped stations can also expect to make some QSOs across the Atlantic and sometimes even further. It takes place between 2100 and 0100UTC and the exchange is signal report, serial number and district.

4

Now the solar factual data for the period from the 2nd to the 8th of November, compiled on 9th of November by Neil Clarke, G0CAS.

Solar activity was very low with no solar flares taking place. The solar disc was spotless till the 5th when a small sunspot group emerged. It had no effect on solar flux levels which remained steady all week. The average was 71 units. The 90 day solar flux average on the 8th was 71, that's the same level as last week. X-ray flux levels remained below the minimum reporting level throughout the period. Geomagnetic activity was extremely quiet until a small coronal hole disturbance arrived early on the 8th. There was three days with the Ap index at zero units. The Ap index is calculated from 8 three hourly measurements which is called the Kp index. This is on a scale from zero to nine, zero equals very quiet levels and nine equals extreme storm conditions. For the first 6 days of the period all the Kp indices were zero except for 4. The Ap on the 8th increased to 6 units. The average was Ap 1 unit. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 390 kilometres per second on the 2nd to 233 by the 7th. On the 8th speeds increased to 450 kilometres per second. Particle densities were very low, often below one particle per cubic centimetre

until the 8th when they increased to 16 particles per cubic centimetre. Bz showed little variation and was around plus 3 nanoTeslas for long periods. On the 8th fluctuations to minus 9 and plus 8 nanoTeslas took place during the slight disturbance. One parameter not used before in this section of the news is the temperature of the solar wind. This week temperatures where the lowest that I have seen.

And finally the solar forecast. This week solar activity is expected to be very low. There is a slight chance that a small C class solar flare could take place. However, the sunspot group that was visible a few weeks back could be visible again if it as survived its transit on the far side of the Sun. Solar flux levels are expected to be around the mid 70's. Geomagnetic activity is expected to be mostly quiet. Activity could increase slightly after midweek due to a small coronal hole. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. The darkness hour lows should be about 8MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. The best time to try this path will be between 0900 and 1400 UTC.

And that's all for this week from the propagation team.

WIANEWS FOR WEEK COMMENCING NOV 15 2009.

News this week is presented by Radio Announcers who also hold their
Ham Ticket PLUS on the digital radio service in Brisbane tune TAB+ and
hear this weeks news PLUS lots and lots of music with a "radio" theme!

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING NOV 15 2009

This weekend being the special "Radio Announcers" who are also hams edition
of WIA National News is missing one "voice" we were super keen on hearing
from again, that being Barry VK7FR

Some will remember that former ABC announcer Barry VK7FR suffered a minor
stroke several weeks ago, spending much of the time since in rehabilitation.
We are pleased to learn that Barry has made very good progress and has
finally been allowed home, permanently!

His progress has been very good and we hope it is not too much longer before
his distinctive golden voice is heard on the amateur airwaves.

Not only are we using Announcers, but we are "taking back the streets".

Radio (or the wireless) as we know it today DID evolve from radio amateurs so this weeks news forms the cenre piece of a special broadcast on TAB+ a digital channel in Brisbane. Featuring the news of course but also heaps and heaps of music with a radio/communication theme.

ABBAS SOS... we gave both CQ Serenade and CQ Boohie, there's Slim Dusty dot com anf "Grand-dad was a telegraphist, the tracks from "The Ham Band" (Google that one it's well worth a surf".. and what radio show would be worth it's salt without COMMERCIALS! Yes plenty of plugs on how to become a ham and the WIA-BOOK SHOP.

So if you are in Brisbane, look for TAB+ or if (shame shame) you have yet to purchase a digital radio visit your local electronics store and ask them about Digital Radio!

Brisbane area clubs listen up!

Here is a REAL opportunity to meet with an Amateur Radio Dignatory.

VU2RBI Mrs Bharathi Chief Co-ordinator of India's National Institute of Amateur Radio will be visiting the City November 30 - December 7.

Bharathi can tell some interesting stories especially regarding her inaugural VU4 DXpedition in 2004 that had the earthquake & subsequent tsunami. Bharathi changed over to being the only emergency comms in/out of the islands & hence Amateur Radio now is regarded highly by the highest powers in India.

bharathi prasad <bharathipd@yahoo.com>

32 WIA affiliated clubs have so far registered for the commemorative callsign roster. There are 19 three-day slots still available.

The wide range of activities notified by clubs include the International Museum Weekend, JOTA, Royal Show, an historic theme park, the VHF/UHF field day, contests and more.

The WIA Centenary Committee encourages all clubs, who have not already done so, to firm up the details of their planned activities wherever possible in the next few weeks and put these on the WIA website.

Interesting to note the use of it in association with the field day as ACMA Rules state that

"A club using the callsign VK100WIA may not participate in any contest or submit any log (including a check log) for any contest or apply for any award or participate in IOTA, engage in fox hunts or the like under

that callsign".

ARISS CELEBRATES ITS 500th SCHOOL ROOM CONTACT THANKS TO VK4

A Ham Radio telebridge station situated in Queensland was swung into action to help the 500th ARISS classroom to space station contact! I-S-S Commander Frank De Winne, ON1DWN answered questions from students at the new Copernic Science Center in Warsaw, Poland.

This was the 500th school contact since ARISS began operations in 2000.

And whilst "in space".. AMSAT-Argentina reports that its LUSAT-1,
ham radio satellite has stopped transmitting CW telemetry on 437.125 MHz.

AMSAT-Argentina says that it hopes to revive LUSAT to allow it to celebrate
its 20 years in space next January 23. It also adds that it welcomes any
reception reports of the now out of communications ham radio bird.

RadioComms Connect Conference

RadioComms Connect returns to Melbourne 18-19 November for the third year.

40+ exhibitors and a panel of expert speakers along with the annual
radio communications industry gala dinner.

The conference program includes presentations from experts on the
digital dividend, IP-based technology, communications for transport
and spectrum management.

There are eight overseas speakers in the line-up of 28, including the
chairman of the International TETRA Association, Phil Godfrey, and
Sir Chris Fox, former president of the Association of Chief Police Officers,
UK.

A continuing problem facing two-way radio is the shortage of qualified
RF engineers and technicians who can service and set up the modern
analogue/digital two-way. In a bid to alleviate this critical situation,
RMIT University will outline its thoughts on the current state of play
in its presentation, '2015 and beyond - Are you ready to converge?
Vocational upskilling to meet new technology demands in the
radio communications industry'.

www.radiocommsconnect.com.au/connect/2009.

(vk7wia)

>From the ARVictoria twitter service we learn that VK is set to tackle
e-waste.

e-waste?

e-waste, such as computers, monitors and TV sets, is expected to be in
force begin from 2011 and the program will require manufacturers and
importers of electronic equipment to have membership of a
Government-accredited Producer Responsibility Organisation.

The first products to be regulated under the new system will be computers
and TV sets, with predictions that 80% of that material will be recycled by
2021.

It is expected that we householders will be able to drop off used computers
and TVs for recycling free of charge.

Is this a welcome end to ham radio boot sales and pre loved junk sales?

One can only hope! hihi.

As we said at the top of the news this is the special "radio announcers" edition, current and ex announcers are all set to join us from around Australia and one in a lounge at JFK New Yourk!

Yes our education news presented by John Maizell is being read and uploaded from the departure terminal!

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

AN APPLE FOR THE TEACHER?

Not quite but Uruguay has become the first country in the world to provide a laptop computer for every child attending a state primary school.

The last school and pupils received theirs at a presentation by that country's President in Montevideo.

Uruguay is part of the "One Laptop Per Child" scheme, an organisation set up by internet pioneer Nicholas Negroponte.

Oh and the cost? Would you believe LESS than 5% of the country's education budget!

There are plans to extend the scheme to secondary schools and pre-school children next year.

And still with an internet theme, "FINS" AREN'T WHAT THEY USED TO BE.

>From July 2010, all Finnish citizens are to be granted the right to a broadband internet connection.

>From that date, Finnish telecommunications companies will be compelled to offer all 5.2 million Finns Internet connections of at least one megabit per second. By 2015, the connections must be 100 times faster.

The new act is also intended to ensure that even the country's remotest regions are connected to the World Wide Web.

Finland is now one of the countries with the best Internet access in the world. At least 95 percent of all Finns have an Internet connection.
The Finnish government believes a broadband Internet connection is a vital component of a modern society.

AMATEUR RADIO - HOME OF THE GOOD GUYS - OR " Tip of the Hat".

Amateur Wins Nobel Prize

Radio Amateur George Smith, AA2EJ, was awarded the Nobel Prize in Physics for the invention of an imaging semiconductor circuit - the CCD sensor. aa2ej shares the prize money with two other's Charles K. Kao, of Standard Telecommunication Laboratories and Willard S. Boyle, of Bell Laboratories.

(irts)

In a survey in England out of 50,000 votes cast, one in five people have voted the X-ray machine as the invention having the greatest impact on past and present contenders, ahead of the Apollo 10 space capsule and Stephenson's Rocket.

Ten of the most significant objects in science, engineering, technology and medicine were selected for the vote. The results were:

1st place - X-ray machines
2nd place - Penicillin
3rd place - DNA double helix
4th place - Apollo 10 capsule
5th place - V2 Rocket Engine
6th place - Stephenson's Rocket
7th place - Pilot ACE Computer
8th place - Steam Engine
9th place - Model T Ford
10th place - Electric Telegraph.

Another Ham Radio "Good Guy" is David, VK7EX, President of the Cradle Coast Amateur Radio Club.

He has opened his clubs Inaugural Christmas Dinner/ Social evening at the Best Western Bass & Flinders Convention Room, the 5th of December to not only members of the club but ANYONE that would like to go along and enjoy an evening with people interested in Radio and Electronics and that goes for any Short-wave listener or CB operator that is thinking that they might like to give Amateur Radio a try.

or Rick VK4NRL ricklammas@optusnet.com.au

VK5
www.qsl.net/vk5bar/

In VK5 last week Greg VK5ZBD took a record number of call-backs on their Two Meter transmission of this news. Finally cracking the 100 call-backs from Adelaide Ham Listeners by SEVEN.

Yes 107 call-backs after the news, and this included 27 Foundation calls.

Well done Greg and the listeners who DO check in from Adelaide!

Nov 25th is South Coast Amateur Radio Club's 2009 Annual General Meeting.

Elections, Reports & Russell Smith Award

At SCARC Clubrooms - 16 Roberts Road, Hackham West.

Members are requested to attend, with visitors and guests more than welcome.

Apologies and or questions to Club Secretary secretary@scarc.org.au

Saturday Afternoon Groups

Tony VK7FTCL lets us know that a date has been set for the trip to Hobart Airport. Saturday 12th of December is the day so if you wish to attend please get in touch ASAP to lock in your spot.

You will visit the tower and Rotorlift looking at their rescue helicopters and a general run down on how they undertake their missions with a hands on look at their birds, a chat with the Australian Federal Police who will explain what their role is at airports around Australia, Fire and Rescue

who will show their range of fire fighting and rescue equipment and finishing off in the tower which is a highlight.

For your spot please contact Tony at toneman@bigpond.com

(Tony VK7FTCL and the Saturday Afternoon Group)

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

WA6ITF RETIRES FROM FOX TV AFTER 30 YEARS

>From Los Angeles comes word that our good friend and Amateur Radio Newsline producer Bill Pasternak, WA6ITF, has retired from Fox Television after a career that spanned close to three decades at the networks flagship station KTTV.

He started in 1980 as a technician, over the years he did just about every job one finds at a television station. He says that the last 12

years working as the engineering contact with the news department have been the ones he has enjoyed the most. There he's not only worked the technical side but also has been on the air several times as an expert on all things electronic and radio communications for news stories.

Pictures of his surprise retirement party put on by his many friends at

KTTV are on Bill's photo album page on the Facebook Social Networking service. Look for his album under the name Bill Pasternak +titled Saying Goodbye to KTTV after Almost 30 years.

A NEW BACAR TO BE DEMONSTRATED

Saturday 21 November ZS6EF, will demonstrate the 2010 version of BACAR (Balloon Carrying Amateur Radio) at the National Amateur Radio centre in South Africa.
Its maiden flight in the Western Cape will be on Sunday 24 January 2010.
NEXT Saturday BACAR will be demonstrated on a tethered launch.
Radio Amateurs from around the globe will be able to follow it on the Web.
www.amsatsa.org.za

TWO HAMS CREDITED WITH SAVING A LIFE!

Karl, KI6PCW, and wife Deborah, KJ6CRZ, put their ham radio emergency training to use to help rescue an unidentified man after an accident on Catalina Island who had fallen more than 40 feet onto rocks below.

The ham couple had climbed a hill on Catalina Island to check out a repeater when they found a 61-year-old man bleeding and moaning.

Tso and Ava had their hand-held radios with them. They used the equipment to make contact with other radio amateurs on the California mainland, who called 911 to report the emergency. Los Angeles County fire-fighter paramedics responded and the injured man was quickly flown by medevac helicopter to St Mary's Hospital in Long Beach for treatment.

Gadget problems divide the sexes

OM's and YL's have different approaches to dealing with technology problems, according to a gadget helpline.

64% of its male callers and 24% of its female callers had not read the instruction manual FIRST.

Gadget Helpline, surveyed 75,000 calls received between 25 September and 23 October. Women spent 32% longer on the phone to their helpers than men.

In general terms men treat technology as something to be understood and conquered while women are more motivated by appliances that benefit them.

Getting gadgets to communicate with each other was the subject of possibly the largest number of requests for help.

"Syncing one gadget with another REALLLY causes problems."

GAREC-2010 TO BE HELD IN OCTOBER 2010 IN CURACO

GAREC-2010, the next Global Amateur Radio Emergency Communications Conference it will take place next fall in Curaco. The dates will be October 11th and 12th 2010 with the theme of the meeting to be "Learning through practicing.. More details of next years gathering will be announced as they become available.

Meantime keep an eye on the conference website for updates.

www.rientola.fi/oh3ag/garec

Spectacles that can provide subtitles have been created by hi-tech firm NEC. Resembling glasses but lacking lenses, the headset uses a tiny projector to display images on a user's retina.
NEC said it planned a version that used real-time translation to provide subtitles for a conversation between people lacking a common language.

==========

WEIRD AND WONDERFUL

China is planning to hold a 16 event robot Olympics in 2010.

Yes ROBOTS will compete in familiar Olympic sports such as athletics as well as those more suited to machines such as cleaning.

Entry to the competition will be restricted to robots resembling humans. They must possess two arms and legs. Wheels are banned.

The Chinese event will face competition from the RoboGames that also stages sports events for robots. The 2010 RoboGames will take in California in April.

Robots already have their own world cup. The 2009 competition saw entries from 400 teams that hailed from 35 separate nations.

The 2010 event will be held in June in Singapore.
A rival event is run by the Federation of International Robot-Soccer Associations.

The Chinese robot games will be one among an increasingly crowded calendar for robot sports and other competitive events. One event, Roboexotica, is for robots that can mix cocktails, light cigarettes and chat with bar patrons.

No word that Robot-Exotica will feature energiser "bunnies" as hostesses.

SPECIAL EVENT CALLS, BEACON DX AND NET ADVICE

Vancouver Olympics Amateur Radio Group celebrate Olympic Winter Games and Paralympics, British Columbia in February/March 2010.

VG7V: Oct 1,2009, until Nov 30, 2009,
VG7W: Dec 1,2009, until Jan 31, 2010,
VG7G: Feb 1,2010, until Mar 31, 2010.

If you are looking for a contact with Singapore then listen out for 9V1JP who is a new operator from there and has been active on 20 meters. James says via QRZ.com that he is in a very challenging environment and is trying hard to put out a decent signal on HF. He also says that in the QSL area that he is in the process of designing them, and they should be good and ready to begin sending them out in the spring of 2010.

JK2VOC says that he will be active from BA4TB station in China. This, between November 27th to the 30th including the CQ World Wide DX CW Contest on November 28th and 29th. QSL via JK2VOC.

YV5IAL will be portable CE0 from Easter Island between January 8th and 11th of 2010. This will be a QRP, portable, holiday style operation. Activity will use the PSK31 digital mode on 14070.15 kHz from 2200 to 0100 UTC daily. He may occasionally be on 40, 30 and 15 meters as well. QSL via this operation via YV5IAL.

Santa's amateur radio station

Once again Santa's own amateur radio station OH9SCL will be active from Santa Claus Land in the Arctic Circle during December.

Activity will be on 160-10 meters using CW, SSB and the Digital modes.

QSL via OH9UV:
Santa Claus Land
Napapiirin Yhdeksikot Ry
PL 50
96101 Rovaniemi
Finland

A special "Santa Claus Land" award is available.

AWARDS

WONDERFUL ACHIEVEMENT BY ZS4JAN

During the past month Jan Botha, ZS4JAN, made a wonderful achievement by achieving the WAZS 1000 award of the South African Radio League.
It means that Jan made 1000 confirmed contacts with individual call signs in South Africa.
It took Jan almost 6 years to reach this milestone.
What makes this achievement more unique is the fact that Jan is the first amateur to gain the WAZS 1000 award!

INTRUDER WATCH - ENFORCEMENT ZONE
Remember our Region 3 IARUMS Coordinator is now Peter Young VK3MV

VU2UR Arasu Manohar has been doing a wonderful job in the intruder watch service over a number of years. Arusu steps down from that position from 1st Jan 2010.

VU2DSI Datta will take over in India and Arusu has kindly agreed to pass on his very extensive knowledge to the new incumbent so that a smooth transition will evolve.

(Gopal VU2GMN)

IRMA FRAUSTO HAS COMPANY IN THE UK

You probably remember the story of Irma Frausto of Compton, California that we reported on a few weeks ago. Her amplified TV antenna allegedly self-oscillated on 840 MHz and caused interfere to a cell site. The FCC sent her a Citation even though there was nothing in the Commission's write up to suggest that she knew about the self-oscillations or had the wherewithal to eliminate them.

Well now Irma has company. A 12 year old schoolboy in Great Britain by the name of Nickie Chamberlain has been busted because his self- oscillating TV antenna was interfering with air traffic over his home in Linslade, Beds in the UK. The Ofcom engineer ordered the father to dispose of the aerial

immediately.

Air traffic controllers first noticed the communication problems on the

flight path into London Luton Airport on October 6th .According to Ofcom, pilots coming into land at the airport were loosing contact with the control tower because the faulty antenna preamp was transmitting on the

same frequency as the aircraft radios.

(arnewsline)

An off-air Low Power FM (LPFM) transmission audit

New Zealand Radio Inspectors recently visited the Dargaville area to track and assess the source of a previously unaudited Low Power FM (LPFM) transmission.

Because the signal appeared stronger than expected, and an off-air audit does not require the assistance of the licensee, signal strength measurement was promptly commenced.

After correction for all factors, the measured field strength was calculated indicating the output of the transmitter was slightly over 10 Watts e.i.r.p.

As the transmitter was not operating in accordance with the licence conditions, an infringement fine was issued to the company responsible.

KIDS SOLVE THE DTV RECEPTION PROBLEM

If you or someone you know are having reception problems on your new digital television or set top box, the problem is likely with the antenna.

Most rabbit ear or loop indoor antennas are insufficient for DTV reception.

Unfortunately, a lot of folks are not allowed to put antennas on their roof.

With a solution, enter Naiomi and Noah Miller. They are the pre-teen children of FCC O-E-T attorney James Miller. With a little help from dad, the two kids take you on a "Watch Mr. Wizard" like journey into how to homebrew your own indoor D-T-V antenna using the magic of science found in everyday living:

You can see the video of Naiomi and Noah Miller building their home-brew antenna on YouTube.

www.youtube.com/watch?v=YaYDtOqpTOI

Trust me when I tell you that it's a few of the best moments you will spend on-line this week.

QNEWS - NOV 15 - VK4 ON AIR

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

As the news goes out, this Sunday morning, many people are heading towards the Geebung RSL Club for an important annual event.

As a means of directly reporting to clubs and receiving direct feedback from the clubs, the Queensland Advisory Committee chairman, Don, VK4BY organises the President's Lunch when the delegates get to mingle and listen to reports from the WIA President, Michael Owen, VK3KI and Vice President, Ewan, VK4ERM, as well as the QAC.

This is one of the ways in which having your club affiliated with the WIA helps keep your members "in the loop". No doubt one of the major topics for the day's discussions will be participation in the WIA Centenary celebrations. We look forward to our delegates' reports.

And talking of the Centenary, it is good to see the number of clubs around VK4 whose names are filling spaces in the operating roster for VK100WIA - there are still gaps to fill but this looks like an activity which will stir the bands in 2010.

For those not already aware, VK4VAN is now at St Stephen's Private Hospital, Maryborough. Not quite home yet but I believe he has some repair work awaiting him before he can sign QTHR again.

WIANEWS FOR WEEK COMMENCING NOV 15 2009.

News this week is presented by Radio Announcers who also hold their
Ham Ticket PLUS on the digital radio service in Brisbane tune TAB+ and
hear this weeks news PLUS lots and lots of music with a "radio" theme!

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING NOV 15 2009

This weekend being the special "Radio Announcers" who are also hams edition
of WIA National News is missing one "voice" we were super keen on hearing
from again, that being Barry VK7FR

Some will remember that former ABC announcer Barry VK7FR suffered a minor
stroke several weeks ago, spending much of the time since in rehabilitation.
We are pleased to learn that Barry has made very good progress and has
finally been allowed home, permanently!

His progress has been very good and we hope it is not too much longer before his distinctive golden voice is heard on the amateur airwaves.

Not only are we using Announcers, but we are "taking back the streets".

Radio (or the wireless) as we know it today DID evolve from radio amateurs so this weeks news forms the cenre piece of a special broadcast on TAB+ a digital channel in Brisbane. Featuring the news of course but also heaps and heaps of music with a radio/communication theme.

ABBAS SOS... we gave both CQ Serenade and CQ Boohie, there's Slim Dusty dot com anf "Grand-dad was a telegraphist, the tracks from "The Ham Band" (Google that one it's well worth a surf".. and what radio show would be worth it's salt without COMMERCIALS! Yes plenty of plugs on how to become a ham and the WIA-BOOK SHOP.

So if you are in Brisbane, look for TAB+ or if (shame shame) you have yet to purchase a digital radio visit your local electronics store and ask them about Digital Radio!

Brisbane area clubs listen up!

Here is a REAL opportunity to meet with an Amateur Radio Dignatory.

VU2RBI Mrs Bharathi Chief Co-ordinator of India's National Institute of Amateur Radio will be visiting the City November 30 - December 7.

Bharathi can tell some interesting stories especially regarding her inaugural VU4 DXpedition in 2004 that had the earthquake & subsequent tsunami. Bharathi changed over to being the only emergency comms in/out of the islands & hence Amateur Radio now is regarded highly by the highest powers in India.

bharathi prasad <bharathipd@yahoo.com>

32 WIA affiliated clubs have so far registered for the commemorative callsign roster. There are 19 three-day slots still available.

The wide range of activities notified by clubs include the International Museum Weekend, JOTA, Royal Show, an historic theme park, the VHF/UHF field day, contests and more.

The WIA Centenary Committee encourages all clubs, who have not already done so, to firm up the details of their planned activities wherever possible in the next few weeks and put these on the WIA website.

Interesting to note the use of it in association with the field day as ACMA Rules state that

"A club using the callsign VK100WIA may not participate in any contest or submit any log (including a check log) for any contest or apply for any award or participate in IOTA, engage in fox hunts or the like under

that callsign".

ARISS CELEBRATES ITS 500th SCHOOL ROOM CONTACT THANKS TO VK4

A Ham Radio telebridge station situated in Queensland was swung into
action to help the 500th ARISS classroom to space station contact!
I-S-S Commander Frank De Winne, ON1DWN answered questions from students at
the new Copernic Science Center in Warsaw, Poland.
This was the 500th school contact since ARISS began operations in 2000.

And whilst "in space".. AMSAT-Argentina reports that its LUSAT-1,
ham radio satellite has stopped transmitting CW telemetry on 437.125 MHz.

AMSAT-Argentina says that it hopes to revive LUSAT to allow it to celebrate
its 20 years in space next January 23. It also adds that it welcomes any
reception reports of the now out of communications ham radio bird.

RadioComms Connect Conference

RadioComms Connect returns to Melbourne 18-19 November for the third year.

40+ exhibitors and a panel of expert speakers along with the annual
radio communications industry gala dinner.

The conference program includes presentations from experts on the
digital dividend, IP-based technology, communications for transport
and spectrum management.

There are eight overseas speakers in the line-up of 28, including the
chairman of the International TETRA Association, Phil Godfrey, and
Sir Chris Fox, former president of the Association of Chief Police Officers,
UK.

A continuing problem facing two-way radio is the shortage of qualified
RF engineers and technicians who can service and set up the modern
analogue/digital two-way. In a bid to alleviate this critical situation,
RMIT University will outline its thoughts on the current state of play
in its presentation, '2015 and beyond - Are you ready to converge?
Vocational upskilling to meet new technology demands in the
radio communications industry'.

www.radiocommsconnect.com.au/connect/2009.

(vk7wia)

>From the ARVictoria twitter service we learn that VK is set to tackle
e-waste.

e-waste?

e-waste, such as computers, monitors and TV sets, is expected to be in
force begin from 2011 and the program will require manufacturers and
importers of electronic equipment to have membership of a
Government-accredited Producer Responsibility Organisation.

The first products to be regulated under the new system will be computers
and TV sets, with predictions that 80% of that material will be recycled by
2021.

It is expected that we householders will be able to drop off used computers and TVs for recycling free of charge.

Is this a welcome end to ham radio boot sales and pre loved junk sales?

One can only hope! hihi.

As we said at the top of the news this is the special "radio announcers" edition, current and ex announcers are all set to join us from around Australia and one in a lounge at JFK New Yourk!

Yes our education news presented by John Maizell is being read and uploaded from the departure terminal!

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

AN APPLE FOR THE TEACHER?

Not quite but Uruguay has become the first country in the world to provide a laptop computer for every child attending a state primary school.

The last school and pupils received theirs at a presentation by that country's President in Montevideo.

Uruguay is part of the "One Laptop Per Child" scheme, an organisation set up by internet pioneer Nicholas Negroponte.

Oh and the cost? Would you believe LESS than 5% of the country's education budget!

There are plans to extend the scheme to secondary schools and pre-school children next year.

And still with an internet theme, "FINS" AREN'T WHAT THEY USED TO BE.

>From July 2010, all Finnish citizens are to be granted the right to a broadband internet connection.

>From that date, Finnish telecommunications companies will be compelled to offer all 5.2 million Finns Internet connections of at least one megabit per second. By 2015, the connections must be 100 times faster.

The new act is also intended to ensure that even the country's remotest regions are connected to the World Wide Web.

Finland is now one of the countries with the best Internet access in the world. At least 95 percent of all Finns have an Internet connection.
The Finnish government believes a broadband Internet connection is a vital component of a modern society.

AMATEUR RADIO - HOME OF THE GOOD GUYS - OR " Tip of the Hat".

Amateur Wins Nobel Prize

Radio Amateur George Smith, AA2EJ, was awarded the Nobel Prize in Physics for the invention of an imaging semiconductor circuit - the CCD sensor.

aa2ej shares the prize money with two other's Charles K. Kao, of
Standard Telecommunication Laboratories and Willard S. Boyle, of
Bell Laboratories.

(irts)

In a survey in England out of 50,000 votes cast, one in five people have
voted the X-ray machine as the invention having the greatest impact on
past and present contenders, ahead of the Apollo 10 space capsule and
Stephenson's Rocket.

Ten of the most significant objects in science, engineering, technology and
medicine were selected for the vote. The results were:

1st place - X-ray machines
2nd place - Penicillin
3rd place - DNA double helix
4th place - Apollo 10 capsule
5th place - V2 Rocket Engine
6th place - Stephenson's Rocket
7th place - Pilot ACE Computer
8th place - Steam Engine
9th place - Model T Ford
10th place - Electric Telegraph.

Another Ham Radio "Good Guy" is David, VK7EX, President of
the Cradle Coast Amateur Radio Club.

He has opened his clubs Inaugural Christmas Dinner/ Social evening at
the Best Western Bass & Flinders Convention Room, the 5th of December
to not only members of the club but ANYONE that would like to go along
and enjoy an evening with people interested in Radio and Electronics
and that goes for any Short-wave listener or CB operator that is thinking
that they might like to give Amateur Radio a try.

WA6ITF RETIRES FROM FOX TV AFTER 30 YEARS

>From Los Angeles comes word that our good friend and Amateur Radio Newsline producer Bill Pasternak, WA6ITF, has retired from Fox Television after a career that spanned close to three decades at the networks flagship station KTTV.

He started in 1980 as a technician, over the years he did just about every job one finds at a television station. He says that the last 12

years working as the engineering contact with the news department have been the ones he has enjoyed the most. There he's not only worked the technical side but also has been on the air several times as an expert on all things electronic and radio communications for news stories.

Pictures of his surprise retirement party put on by his many friends at

KTTV are on Bill's photo album page on the Facebook Social Networking service. Look for his album under the name Bill Pasternak +titled Saying Goodbye to KTTV after Almost 30 years.

A NEW BACAR TO BE DEMONSTRATED

Saturday 21 November ZS6EF, will demonstrate the 2010 version of BACAR (Balloon Carrying Amateur Radio) at the National Amateur Radio centre in South Africa.
Its maiden flight in the Western Cape will be on Sunday 24 January 2010.
NEXT Saturday BACAR will be demonstrated on a tethered launch.
Radio Amateurs from around the globe will be able to follow it on the Web.
www.amsatsa.org.za

TWO HAMS CREDITED WITH SAVING A LIFE!

Karl, KI6PCW, and wife Deborah, KJ6CRZ, put their ham radio emergency training to use to help rescue an unidentified man after an accident on Catalina Island who had fallen more than 40 feet onto rocks below.

The ham couple had climbed a hill on Catalina Island to check out a repeater when they found a 61-year-old man bleeding and moaning.

Tso and Ava had their hand-held radios with them. They used the equipment to make contact with other radio amateurs on the California mainland, who called 911 to report the emergency. Los Angeles County fire-fighter paramedics responded and the injured man was quickly flown by medevac helicopter to St Mary's Hospital in Long Beach for treatment.

Gadget problems divide the sexes

OM's and YL's have different approaches to dealing with technology problems, according to a gadget helpline.

64% of its male callers and 24% of its female callers had not read the instruction manual FIRST.

Gadget Helpline, surveyed 75,000 calls received between 25 September and 23 October. Women spent 32% longer on the phone to their helpers than men.

In general terms men treat technology as something to be understood and conquered while women are more motivated by appliances that benefit them.

Getting gadgets to communicate with each other was the subject of possibly the largest number of requests for help.

"Syncing one gadget with another REALLLY causes problems."

GAREC-2010 TO BE HELD IN OCTOBER 2010 IN CURACO

GAREC-2010, the next Global Amateur Radio Emergency Communications Conference it will take place next fall in Curaco. The dates will be October 11th and 12th 2010 with the theme of the meeting to be "Learning through practicing.. More details of next years gathering will be announced as they become available.

Meantime keep an eye on the conference website for updates.

www.rientola.fi/oh3ag/garec

Spectacles that can provide subtitles have been created by hi-tech firm NEC. Resembling glasses but lacking lenses, the headset uses a tiny projector to display images on a user's retina.
NEC said it planned a version that used real-time translation to provide subtitles for a conversation between people lacking a common language.

WEIRD AND WONDERFUL

China is planning to hold a 16 event robot Olympics in 2010.

Yes ROBOTS will compete in familiar Olympic sports such as athletics as well as those more suited to machines such as cleaning.

Entry to the competition will be restricted to robots resembling humans. They must possess two arms and legs. Wheels are banned.

The Chinese event will face competition from the RoboGames that also stages sports events for robots. The 2010 RoboGames will take in California in April.

Robots already have their own world cup. The 2009 competition saw entries from 400 teams that hailed from 35 separate nations.
The 2010 event will be held in June in Singapore.
A rival event is run by the Federation of International Robot-Soccer Associations.

The Chinese robot games will be one among an increasingly crowded calendar for robot sports and other competitive events. One event, Roboexotica, is for robots that can mix cocktails, light cigarettes and chat with bar patrons.

No word that Robot-Exotica will feature energiser "bunnies" as hostesses.

AWARDS

WONDERFUL ACHIEVEMENT BY ZS4JAN

During the past month Jan Botha, ZS4JAN, made a wonderful achievement by
achieving the WAZS 1000 award of the South African Radio League.
It means that Jan made 1000 confirmed contacts with individual call signs
in South Africa.
It took Jan almost 6 years to reach this milestone.
What makes this achievement more unique is the fact that Jan is the first
amateur to gain the WAZS 1000 award!

INTRUDER WATCH - ENFORCEMENT ZONE
Remember our Region 3 IARUMS Coordinator is now Peter Young VK3MV

VU2UR Arasu Manohar has been doing a wonderful job in the intruder watch
service over a number of years. Arusu steps down from that position
from 1st Jan 2010.

VU2DSI Datta will take over in India and Arusu has kindly agreed to pass on
his very extensive knowledge to the new incumbent so that a smooth
transition will evolve.

(Gopal VU2GMN)

IRMA FRAUSTO HAS COMPANY IN THE UK

You probably remember the story of Irma Frausto of Compton, California that
we reported on a few weeks ago. Her amplified TV antenna allegedly
self-oscillated on 840 MHz and caused interfere to a cell site. The FCC
sent her a Citation even though there was nothing in the Commission's write

up to suggest that she knew about the self-oscillations or had the wherewithal to eliminate them.

Well now Irma has company. A 12 year old schoolboy in Great Britain by the name of Nickie Chamberlain has been busted because his self- oscillating TV antenna was interfering with air traffic over his home in Linslade, Beds in the UK. The Ofcom engineer ordered the father to dispose of the aerial

immediately.

Air traffic controllers first noticed the communication problems on the

flight path into London Luton Airport on October 6th .According to Ofcom, pilots coming into land at the airport were loosing contact with the control tower because the faulty antenna preamp was transmitting on the

same frequency as the aircraft radios.

(arnewsline)

An off-air Low Power FM (LPFM) transmission audit

New Zealand Radio Inspectors recently visited the Dargaville area to track and assess the source of a previously unaudited Low Power FM (LPFM) transmission.

Because the signal appeared stronger than expected, and an off-air audit does not require the assistance of the licensee, signal strength measurement was promptly commenced.

After correction for all factors, the measured field strength was calculated indicating the output of the transmitter was slightly over 10 Watts e.i.r.p.

As the transmitter was not operating in accordance with the licence conditions, an infringement fine was issued to the company responsible.

KIDS SOLVE THE DTV RECEPTION PROBLEM

If you or someone you know are having reception problems on your new digital television or set top box, the problem is likely with the antenna.

Most rabbit ear or loop indoor antennas are insufficient for DTV reception.

Unfortunately, a lot of folks are not allowed to put antennas on their roof.

With a solution, enter Naiomi and Noah Miller. They are the pre-teen children of FCC O-E-T attorney James Miller. With a little help from dad, the two kids take you on a "Watch Mr. Wizard" like journey into how to homebrew your own indoor D-T-V antenna using the magic of science found in everyday living:

You can see the video of Naiomi and Noah Miller building their home-brew antenna on YouTube.

www.youtube.com/watch?v=YaYDtOqpTOI

Trust me when I tell you that it's a few of the best moments you will spend on-line this week.

2394. SARL NEWS - SUNDAY 15 NOVEMBER 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-11-14 20:00:20 UTC
From: website@sarl.org.za
Message-ID: <20091114200006.A332233CBF@panix2.panix.com>
Source record: 6208
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 15 NOVEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

AFRICA REPRESENTED AT WRTC-2010

ANOTHER OPTICAL COMMUNICATION RECORD DOWN UNDER

SARL HF FIELD DAY NEXT WEEKEND

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

EA8CAC AND EA8DP TO REPRESENT AFRICA AT WRTC

Two Radio Amateurs from the Canary Islands will represent Africa at the 2010 World Radiosport Team Championships or WRTC, which is the major Amateur Radio contest event of the year 2010. The team leader is a well know DXer Juan J Hidalgo from Las Palmas.

WRTC-2010 will take place from 8 - 12 July near the Russian capital of Moscow where 50 teams from all over the world will compete under the same field conditions. The Russian National Amateur Radio Society hosts the event.

In 2006, at the event held in Brazil, Bernie van der Walt, ZS4TX, represented Africa. His teammate was N2IC. They were placed 26th.

ANOTHER OPTICAL COMMUNICATION RECORD DOWN-UNDER

A new, non line-of-sight optical communications distance record of 288 km was set down-under with a one-way transmission between two radio amateurs transmitting with Light Emitting Diodes (LEDs).

On the night of 27 October, Rex Moncur, VK7MO, and Joe Gelston, VK7JG, assisted by Paul Godden, VK7KPG, set a new one-way non line-of-sight optical record of 288 km across Australia's Bass Strait. Moreover, they did this using red light scattered off the clouds.

VK7MO was on Mount Liptrap in South Gippsland listening on his APD-based receiver. This, while VK7JG and VK7KPG were on Mount Horror in the Northeast transmitting with a 3 watt Luxeon LED transmitter. The signals from Mount Horror were bounced off some high altitude cirrus clouds estimated to have been at about 6 080 m.

On the receiving end, the call signs from Mt Horror were decoded by VK7MO using a new programme called Weak Signal Communicator. Weak Signal Communicator is a new application from the Spectrum Lab audio analysing that was recently created by David Smith, VK3HZ.

The experimenters also tried the WSJT decoding programme developed a few years ago by Joe Taylor, K1JT. The sync signal was received at -30 dB but unfortunately, there was no decoding.

NEW MEMBERS

The SARL welcomes the following new members - Jarred Brown, Conrad Buitendag, Petrus Jacobus Delport, Noel Hammond, Edwin Isted, Andr&#65533; le Roux, Louis le Roux, Du Plessis Naude, Jacomina Elizabeth Nortman, Daniel Rueppel, Rohan Schreuder and Anna Christina van der Heever. They all have recently passed the RAE and are awaiting their call signs. Welcome and congratulations.

We also welcome -- TJ Greyling, ZR1ROM, Francois Moller, ZS3F, M Sowden, ZR5CAR, Johan Sevenster, ZS1A, Louis Botha, ZSL641, Don Bryant, ZS6BTP and Hughie Young, ZS1YS.

The current membership is approaching the 1 300 mark. If you were a member last year and have not paid your membership due, please do so as soon as possible. Contact Mariska for details on 011 675 2393.

NOMINATIONS FOR THE SARL COUNCIL

Nominations for the Council close on 30 November. To nominate a person, please submit a short amateur radio related CV of the person you are nominating. Please get a seconder for your nomination and ask the person you are nominating to sign the declaration that he or she is prepared to serve on the Council - if elected.

BACAR TEST

There will be a tethered BACAR test on Saturday 21 November from around 13:30. There will also be live coverage on the SA AMSAT web. For more details visit www.amsatsa.org.za.

FAMILY MEMBERSHIP CLARIFIED

The SARL offers a family membership category. The family membership requires that the there must be one full member in the family before

other members of the family can qualify for the lower family membership. Family membership is limited to a spouse or children under 25 who live at the same address. Family members do not receive a printed copy of Radio ZS but have access to the web version.

SARL HF FIELD DAY NEXT WEEKEND

The second leg of the SARL HF Field Day will be run next weekend, 21 and 22 November 2009 with phone and CW activity on 10 to 160 metres. The Field Day starts at 12:00 CAT on Saturday and ends 24 hours later. Stations can participate as a single operator or multi-operator field station or as a general station. More information can be found in the 2009 SARL Contest Manual.

The Overberg Amateur Radio Club, ZS1OAR, will be operating a field station in the Marloth Nature Reserve at Swellendam on Field Day weekend. Visitors and operators are welcome. Contact Andr&#65533;, ZS1AZ, on 028 514 2018 or Sam, ZS1OR, on 028 316 1470 for further details.

The following radio clubs and individuals have indicated that they will be on the air during the Field Day - Sandton; Sasolburg; Pretoria; Highway and Midlands; West Rand; Suid-Kaap; Robbie, ZS1RAP, and Johan, ZR5JF. You still have this week to get your club activated!

CONTEST NEWS

PEARS HF Contest. The annual PEARS HF Contest will take place on Sunday 6 December from 14:00 to 18:00 CAT on 40 and 80 metres.

SARL VHF/UHF Contest. The contest committee has released the results of the second leg of the SARL VHF/UHF (analogue) contest. The contest committee is concerned about the small number of logs submitted.

Multi-operator station:

1st Magalies Radio Amateur Club, ZS6MRK, with 20 573 points; 2nd John Vorster Technical School Radio Club, ZS6JVT, 4 222 points.

Single operator station:

1st Johan van Aarde, ZS2I, 4 702 points; 2nd Tienie Herbst, ZS6MHH, 4 079; 3rd Carl Minnie, ZS6CBQ, 3 449; and 4th Bert Howes, ZS6HS, 220 points.

The combined results of the March and September legs of the SARL VHF/UHF (analogue) contest are as follows:

Multi-operator station:

1st Magalies Radio Amateur Club, ZS6MRK, with 41 650 points; and 2nd John Vorster Technical School Radio Club, ZS6JVT, 8 961 points.

Single operator station: 1st Johan van Aarde, ZS2I, 7 513; with points; 2nd Tienie Herbst, ZS6MHH, 5 364; 3rd Carl Minnie, ZS6CBQ, 3 449; 4th Marius Preston, ZS4MP, 2 008; 5th Bert Howes, ZS6HS, 633; and 6th

Theunis Potgieter, ZS2EC, 165 points.

SARL 80 Metre QSO Party. The contest committee has notified SARL News that the Sasolburg ARC did not participate in the QSO contest. The 4th place as published last week belongs to Marius Preston, ZS4MP, a member of the Sasolburg ARC. The Contest Committee apologises for this error.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Fortunately, three sunspots made their appearance during last week although they eventually rotated out of view.

15 and 120 m will provide the best opportunities for DX. Conditions to India and Brazil will be good from the afternoons onwards. During the late afternoons and early evenings, it will be good towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New Zealand and Australia are going to be challenging.

Local conditions are going to be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is also once again becoming very functional for contacts over the longer distances. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 November - closing date for the 2010 Contest suggestions; 21 and 22 November - SARL HF Field Day; 21 November - Home Construction course and BACAR demonstration at the NARC; 22 November -Intechnet with SumbandilaSat as subject; 30 November - closing date for the essay competition and closing date for SARL Council nominations; 6 December - PEARS HF Contest.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Dennis, ZS4BS. The editor was Jannie, ZR6PHD.

Thank you for listening, 73.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 15th November 2009

Donation to the Society

The Society has recently received a very generous donation from one of our members John EI6IJ. For health reasons, John has been forced to cease driving and has presented the Society with his 08 Kia Rio hatchback automatic. The car has been converted for disabled use and professionally fitted out with a Fox Tango 857 rig.

The IRTS committee at it's recent meeting passed a sincere vote of thanks to John and a sub group has been appointed to manage the practicalities. It is intended that the proceeds from the sale of the car would be ring fenced in a fund that would be used to assist members who for reasons of changed circumstances such as ill health or change of accommodation are finding it difficult to practice and enjoy their hobby.

The fund would also support the promotion of Amateur Radio in schools and other youth organisations. Once again our sincere thanks to John EI6IJ for his gift to the Society.

IRTS Radio News via ATV

In an effort to increase interest in amateur television in the southeast SEARG intends to read the Tuesday evening news on EI8WDT (input freq 1249) which is the ATV repeater as well as through SERN (south eastern repeater network) on Tuesday the 17th of November all going well.

Jim EI8IG is the ATV repeater keeper on Helvic Head and has been the main driving force behind amateur TV in this area for the past 12 years or more, if interest is strong enough this exercise might take place on a more regular basis.

Galway VHF Group 24 hour Radio Operation from RNLI Stations

Using the callsign EJ 185 RNLI, This weekend the 14th and 15th of November will see an operation from the Aran Island Lifeboat station at Kilronan, Inishmore.

The final operation will take place from Clifden Lifeboat Station, Ballyconneely, over the weekend of the 28th and 29th of November. The callsign will be EI 185 RNLI

All operation will take place on the HF bands with two stations in operation at all times. There will be operation on Phone and Digital Modes with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed. Varying types of antenna construction will be used including a Kite antenna for the LF bands.

CASHOTA Northern Ireland

Cashota-NI (castles and stately homes on air), have launched a new website for Northern Ireland.

All information and details of historical sites and how to activate them can be found there, including activation forms for those amateurs that wish to have a go gaining the award.

Information can also be obtained from The Northern Ireland Representative, Bobby 2i0ull on 07747019438.

The website is located at www.cashota-ni.org

New secondary allocations for Norwegian radio amateurs

As of November 6th 2009 the updated amateur radio licensing regulations in Norway went into force. The main news are the following new allocations made available to all Norwegian radio amateurs (in addition to the 135,7 - 137,8 kHz and the 7,1 - 7,2 MHz bands):

LF:493 - 510 kHz on secondary basis, 100 W, A1A (CW) only.

HF: 5260 - 5410 kHz on secondary basis, all modes (6 kHz max bandwidth) 24740-24890 kHz on secondary basis, 1kW (6 kHz max bandwidth)

VHF 70,0625-70,0875 MHz on secondary basis, 100 W, max bandwidth 16 kHz

70,1375-70,1875 MHz on secondary basis, 100 W, max bandwidth 16 kHz

70,2625-70,3125 MHz on secondary basis, 100 W, max bandwidth 16 kHz

70,3625-70,3875 MHz on secondary basis, 100 W, max bandwidth 16 kHz

70,4125-70,4625 MHz on secondary basis, 100 W, max bandwidth 16 kHz

plus some minor adjustments at SHF and EHF.

Kells Radio Club Visit to CARA

Ronnie McGrane EI9ED and Kells Radio Club Chairman John Fitzgerald EI9HW with PJ Reilly EI8IP had a visit to the recent Crossakiel Amateur Radio Association meeting.

Ronnie gave an introductory talk on his role as a member of the repeater management group, with an insight into some of his on going work and future projects. Notably his Green Repeaters and some of his ATV Projects. More info on these to follow when available.

CARA Meet every Wednesday at 20.30pm in the Welcome Wagon in Crossakiel, all are welcome to attend.

Ghana operation

A team of Italian amateur radio operators will be active from Busua Beach between November 13-27th.

The group will also activate Abokwa Island (AF-084), during their stay, with one station on 20 meters only.

The time of operation on the island will be planned day by day, pending the sea condition and weather forecast.

Activity will be on all HF bands and modes, 80-10 meters. The callsign 9G5TT will be used from the mainland while the callsign 9G5XX will be used from Abokwa Island.

QSL via I2YSB, direct only.

More information can be found at: http://www.i2ysb.com

Rejection of C91VM QSL IOTA activities

For those wishing to claim credit for October 2009 contacts with C91VM (AF-061, AF-066, AF-088), please be aware that, in response to the operator's current published QSL policy, these three operations will not be accepted for IOTA accreditation.

Clarification is awaited from the operator that a policy change will be made immediately to the effect that payment of USD 5 is not obligatory and that cards sent direct with sufficient return postage will be answered direct in a timely fashion.

A prompt amendment to the policy notice on QRZ.com is therefore required if accreditation is to be reconsidered.

Rallies / Events

Dxpedition and IOTA Talk by Declan Craig EI6FR

The Mayo Club has organised Declan Craig EI6FR to give a talk the evening before the Mayo Radio Rally, Saturday 21st November.

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

For more information on Rallies please check the IRTS website.

This week in History

1818 Australia's first lighthouse, South Head, Sydney. 1888 Tamworth, NSW, first town in Southern Hemisphere to be lit by electricity. 1897 Marconi transmits ship to shore 18 miles. 1899 First US radio company incorporated in Prescott, Arizona.

Items mentioned in the IRTS Radio news are of a general, educational or informative nature, there is no guarantee that stations mentioned can be heard or worked

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to
�charlie dot Carolan at gmail dot com
Or by phone to

087-6265418 News can also be submitted via e-mail to
newsteam at irts dot ie for automatic forwarding to
both the radio and printed news services.

Please note that items for the radio news should
reach the editor no later than midday on Thursday in
order to be guaranteed inclusion in the following
Sunday s bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 934
BID: $OPDX.934
November 16, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, WP3GW, N4AA & QRZ DX, KH6BZF, WB6RSE, W7ISG, K8YSE, A35A, Algarve STAR DX Team, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, E73Y, G3SWH, I1JQJ/ IK1ADH & 425 DX News, JT1CD, Pete's-DX-Newsdesk, PS7YL, RSGB IOTA Web Site, SP5UAF, UR4LRQ, VA3RJ & ICPO, VE3ZIK, VHF-DX-Portal (MMMonVHF) and YT3W for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th-November, through Sunday, 15th-November there were 225 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FK/c, FM, FO, FP, FR, FT5W, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T7, T8, TA, TF, TG, TI, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP8/g, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5R, MADAGASCAR (IOTA Op). Just a reminder that Eric, F6ICX, will be active as 5R8IC from Saint Marie Island (AF-090) between November 17th and December 15th. Activity will be on 80-10 meters. QSL via his home callsign.

6V, SENEGAL. Dim, UT5UGR, will be active as 6V7R from La Somone during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via UT5UGR.

6W, SENEGAL. Jacques, F6BEE, will once again be active as 6W1RW during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to F6BEE, by the Bureau or direct. Look for activity before the contest on 30/17/12 meters.

6W, SENEGAL. Operators Tom/GM4FDM and Ronald/PA3EWP are planning a DXpedition to Le Calao between January 26th and February 9th (2010). They will sign as 6W/GM4FDM and 6W/PA3EWP. Activity will be concentrated on the low bands and RTTY, with an emphasis on North America and Japan. Tom will attempt to upload his logs on LoTW (InterNet permitting), if not, he will upload them as soon as he arrives home. QSL 6W/GM4FDM via GM4FDM. QSL 6W/PA3EWP via PA7FM.

9G, GHANA. The Italian team is now active from Busua Beach until November 27th. Look for the group to activate Abokwa Island (AF-084) with one station on 20 meters only during their stay. The time of operation on the island will be planned day by day pending the sea condition and weather forecast. Activity will be on all HF bands and modes, 80-10 meters. The callsign 9G5TT will be used from the mainland while the callsign 9G5XX will be used from Abokwa Island. Operators mentioned are: Alfeo/I1HJT, Silvano/I2YSB, Carlo/IK1AOD, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA, Stefano/IK2HKT, and Donato/IZ2CHO. QSL via I2YSB, direct only. For more information and updates, go to: http://www.i2ysb.com

9G, GHANA. By the time you read this Alan, G3XAQ, will be heading to Accra and is expected to be active as 9G5XA again. He will be there until December 4th. Activity will be CW only on 160-10 meters. No word on whether he will be in the CQWW DX CW Contest, but do not count it out. QSL via G3SWH. The log will be uploaded to G3SWH's Web site upon Alan's return at: http://www.g3swh.org.uk

A3, TONGA. Paul, A35A, informs OPDX that Dave Lee, W6ZL/A35KL, has arrived in Nuku'alofa on the Island of Tongatapu (OC-049) the morning of November 11th. He will be in Tonga for about 6 weeks, but he probably won't be on the air until he gets to Ha'apai (OC-169). Pauls states, "He had no trouble clearing customs with all the radio gear and a brand-new Honda generator. Dave will remain in Nuku'alofa until the 20th, and then will fly up to Ha'apai. Tomorrow, however, he will airfreight all the gear to Lifuka Island, and the overhaul of the A35A station will then commence! The 'to do' list includes lots of antenna work, installation of additional filters in the K3, and re-wiring the shack. We're still 'on' for the CQWW CW contest."

A4, OMAN (Special Event). Members of the Royal Omani Amateur Radio Society have activated special event station A43ND in celebrating Oman's "National Day". Activity will last until November 25th. Operations have been on 40/20 meters CW and 20/15 meters SSB, but look for activity on other bands and modes. QSL via A47RS.

A6, UNITED ARAB EMIRATES. The LARC (Lufthansa Amateur Radio Club) in cooperation with the Emirates Amateur Radio Society (EARS) will be operating out of Dubai as A65DLH between November 23-30th. Activity is planned for all bands 160-10 meters using CW, SSB and the Digital modes. They will also be in the CQWW DX CW Contest (November 28-29th). They will QSL via the Bureau, but if you want to QSL direct, please only use the new IRCs as they will not be ready to print and distribute QSLs by December 2009. QSL via DO7ZZ. A blog has been set up at: http://a65dlh.blogspot.com

C9, MOZAMBIQUE. With the support of the Kharkov University Contest Club (UT7L), operator Igor, UY5LW, is once again active as C91LW from Maputo until December 3rd. He has been on the air since November 13th. Activity will be on 80-10 meters using mostly CW with some RTTY and PSK operations. He will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. Activity on 160 meters will depend upon his situation, however skeds are welcome at: uy5lw@ukr.net
QSL via UY5LW direct (QRZ.com). For more details, updates, logs and photos, please visit: http://www.c91lw.dxer.com.ua

CO, CUBA. Luis, CO6LP, will be active during the CQ World Wide DX CW Contest (November 28-29th) as a Single-Op/Single-Band (40m)/Low-Power entry. He plans to use only a dipole. QSL via CO6LP.

CR6, PORTUGAL (LH Op). Members of the Algarve STAR DX Team will activate CR6A from Fuzeta-Barra Lighthouse on Armona Island (East Side) on November 22nd, between 0700-1300z. Activity will be on 40-15 meters using CW, SSB and RTTY. QSO is valid for: ARLHS POR-116, DPRN FF-04, WFF CTFF-07, DIA Ai-04 and DFFA Fa-45. Operators mentioned are: CT1CQK, CT1EHX, CT1FNT, CT1GFK, CT1GPQ, CT1IUA, CT2GFJ, CT2HTN and CT2IHP. QSL via CT1GFK. For more info, visit: http://algarvedx.com
Pictures and an online log will be available during activity on their Web site.

D2, ANGOLA (Update). Paulo, CT1ITZ, continues to be active, but is now signing D2CQ (instead of D2PJB) from Porto Amboim, 300km from the capital Luanda, until November 29th. Activity is expected to be on 80-10 meters SSB only. However, his activity so far has been on 20 meters. He is using an Icom 706 and a Windom antenna. QSL via CT1IUA. For direct QSL, please send 2 USDs or one new IRC (ending 2013). QSLs without enough postage will go via Bureau.

D4, CAPE VERDE. Ranko,4O3A, will be active as D4C from Sao Vicente Island during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. QSL via IZ4DPV. For the latest information, check the D4C Web page at: http://www.d4c.cc

DXCC NEWS.....
* Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
YI9TM - Iraq; Current Operation

* 7O1YGF REMINDER. Bill Moore, NC1L, ARRL Awards Branch Manager, states:
"This is a reminder that free update for 7O1YGF Yemen cards will expire
on December 31, 2009. Starting January 1, 2010 normal submission fees
will apply. If you are planning to submit an update for this operation
I strongly recommend that you do not wait for the last minute as mail
around the holiday season is very heavy and delays can occur. All DXCC
needs is the card and SASE, or, in LoTW do an application with just
7O1YGF and remember to select payment by mail on Part four and leave
the paper QSO number at zero on Part two."

E21, THAILAND. Champ, E21EIC, will be active during the CQWW DX CW Contest
(November 28-29th) as a Single-Op/ALL-Band entry. QSL via LoTW. JA stations
QSL via JR5XPG and all others via E21EIC. Visit Champ's Web page at:
http://www.e21eic.net

E4, PALESTINE (Update). A little more details about the upcoming E4X
operation were released this past week. Specific dates were not announced
yet, but the 2010 operation lead by Antonio, EA5RM, will have at least
3 stations on the air at the same time on different bands and modes.
Activity will be on 160-6 meters (including 30/17/12 meters) using CW,
SSB and RTTY. Suggested frequencies were announced:

BAND	CW	SSB	RTTY
160m	1824	1845	
80m	3501	3780	
40m	7004	7056/7180	7035
30m	10104	10140	
20m	14024	14195	14080
17m	18074	18145	18100
15m	21024	21295	21080
12m	24894	24945	24920
10m	28024	28495	28080
6m	50103	50103	

Some of the equipment has been listed on the E4X Web page, and the QSL
route for the operation will be via EA5RM. An interesting survey is being
taken on the Web site for bands/modes needed for this operation. The
survey is in real-time (it lists the results and your callsign). It looks
like there "may" be online logs during the operation. For updates and
possible other details, visit the E4X Web page at:
http://www.dxfriends.com/e4x/index.php

HS8, THAILAND. Wut, HS8JYX, will be active during the CQWW DX CW Contest
(November 28-29th) as a Single-Op/Single-Band (20m)/Low-Power entry. QSL
via HS8JYX, LoTW, direct or eQSL. Visit his Web page at:
http://www.hs8jyx.com

II0, ITALY (Special Event). Look for special event station II0TRM to be
active between November 16-22nd. Operations will be only CW. Suggested
frequencies are: 3563, 7025, 10115 and 14045 kHz. Operators mentioned
are Fabio/IK0IXI and other members of the Italian Naval Old Rhythmers
Club (INORC). Activity is to celebrate the World's Champion Radio Tele-
grapher T.R. McElroy (1901-1963). QSL by the Bureau or direct to IK0IXI:

Fabio Bonucci, via delle Sterlizie, 10, Civitavecchia, RM I-00053, ITALY.
For more details about Theodore R. McElroy, see:
http://www.qrz.com/db/II0TRM

IOTA NEWS.....
AS-079. Take, JI3DST, will once again be active as either JS6RRR or JI3DST/JS6 from the Miyako Islands between November 21-30th. His activity will include the CQWW DX CW Contest (November 28-29th). He will operate mainly from Miyako-Jima (JIIA AS-079-005), but he may also operate from Ikema-Jima (AS-079-001) and Kurima-Jima (AS-079-003). QSL by the Bureau only.

EU-118. (Update) RARE IOTA! Operators Oscar/EA1DR, George/EC2ADN, Christian/EA3NT, Col/MM0NDX and Bjorn/SM0MDG are planning a DXpedition to Flannan Isles (a extremely difficult island to land on) between June 18ï¿½21st (2010). Callsign will be MS0INT. Last activation was in 2002 (also in 1989 and 1995). QSL Manager will be M0URX. More details and a Web site will be forthcoming.

EU-125. Juergen, DL4MAQ, will be active as OZ/DL4MAQ from Roemoe Island (DIA NS-001), in the Jylland West Group, between December 12-19th. QSL via his home callsign.

NA-153. (Update) Operators Zalo/XE3N, Jose/XE3PP, Benigno/XE2WK and Juan/XE3RR will be active as XF3RR from Isla Cerrito between December 10-14th. This operation is organized by the Radio Club Cancun, and it will be a low scale operation as the island is a protected area. QSL via EB7DX. Suggested frequencies are:
SSB - 3790, 7060, 14260, 18140 and 21260 kHz
RTTY - 3585, 7044, 10104, 14085, 18104 and 21085 kHz

JTDX CONTESTS. Khos, JT1CD, wants to remind everyone that next weekend is the "2009 Mongolian DX Contest (CW/SSB)", November 21-22nd. The Mongolian Amateur Radio Society (MARS) promotes and organizes the "Mongolian DX Contest". MARS has the honor to invite all licensed amateurs and SWLs throughout the world to participate the annual "Mongolian DX Contest". For rules, go to:
http://www.harts.org.hk/Rules_JTDXContest_Eng.pdf
Also, plan to be active in the "2010 Mongolian DX Contest (RTTY)", to be held January 9-10th. For rules, go to:
http://www.harts.org.hk/Rules_JTDXContest_Eng.pdf

JT, MONGOLIA. Members of the Mongolian Amateur Radio Society (MARS) will be active as JT1T during the Mongolian DX Contest (CW/SSB), November 21-22nd. Operators Enkhbayar/JT1DA and Nekhiit/JT1DN will be a Multi-Op/All-Band/Mixed-Mode entry. QSL via LoTW or via the address on QRZ.com.

KH6BZF PROPAGATION FORECAST/REPORT (For November 16-22nd)....
Nov 16 AN SOLAR REFERENCE
Nov 17 AN ---------------

Nov 18 HN-LN AN - Above Normal/Geomagnetic Level is QUIET
Nov 19 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 20 AN LN - Low Normal
Nov 21 AN
Nov 22 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE FOR VHF'ER: Lee reported that the 2009 Leonid meteor shower is expected to peak on November 17th. Look for a sprinkling of meteors over North America and a possibly an outburst over Asia. For more deatils,
please refer to:
http://science.nasa.gov/headlines/y2009/10nov_leonids2009.htm?list35439

DISTURBANCES TO PROPAGATION (Webinar). The Potomac Valley Radio Club will be hosting a Webinar presentation by Carl Luetzelschwab, K9LA. The event will be held on Thursday, November 19th at 9 PM EST (November 20 - 0200z).
Discussion will be on disturbances to propagation, which "may" take place during some days in Cycle 24 and (possibly!) we "may" start seeing more solar flares, radio blackouts, and geomagnetic field activity. To understand these disturbances, join K9LA as he explains them and provides real world examples tied to our amateur radio operations. The event is free and open to the amateur community. Pass the word. To register go to:
https://www2.gotomeeting.com/register/681745378

KP2, U.S. VIRGIN ISLANDS. Operators John/K3CT and John/K3TEJ will be active as KP2/K3CT and KP2/K3TEJ, respectively, between November 24th and December 1st. Activity will include the CQWW DX CW Contest (November 28-29th) as a Multi-? entry using the callsign KP2M. Outside of the contest, their activity "usually" will have an emphasis on 160m and 30/17/12 meter bands using CW and RTTY. QSL KP2M via AI4U. QSL their KP2/homecall to their home addresses.

LX, LUXEMBOURG. Operators Willfried/DF4PD, Detlef/DK3QZ, Joerg/DL3QQ, Kai/DL3HAH, Hans/DL1XW, Chris/DL7CS, Mike/DF3VM, Stefan/DL5XX and Philippe/LX2A will be active as LX7I during the CQWW DX CW Contest (November 28-29th) as a Multi-Multi entry (for the first time). QSL via LX2A. Visit the following Web page at: http://www.lx2a.com

MZ, SCOTLAND. Ian, G3WVG, will be active as MZ5B from Eshaness, Shetland Island (EU-012, IOSA SH01, SCOTIA SI11, ARLHS SCO-075, BARLS A3838, WLH GM-026, WLOTA LH-0867, WAB HU27) during CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (??m) entry. QSL via LoTW or to G3TXF, direct or by the Bureau.

NEW OFFICERS FOR 2010. Members of the Central Arizona DX Association are pleased to announce the officers for the year 2010:

Jim Henderson, KF7E - President
Al Koblinski, W7XA - Vice President
Bill Maynard, W7ZT - Secretary
Bill Ellis, WB9CAC - Treasurer
Jim Hoggard, K7MY - Board Member at Large, two-year term
Bob Hansen, NA7RH - Board Member at Large, one-year term
Mike Johnson, KW7V - Past President

NP3, PUERTO RICO (Special Event). Members of the Western Amateur Radio Club will activate special event station NP3M/516 this coming Thursday, November 19th, starting at 0000z to 2359z. Activity is to commemorate the 516th anniversary of the discovery of Puerto Rico. Operations will be on 80-10 meters using CW, SSB and possibly PSK31. QSL via NP3M.

PACIFIC TOUR. Just a reminder that Chris, DO7AG, is expected to be in the South Pacific with his family between November and January. He plans to be active as 5W1QX from Western Samoa and A31CE from Tonga. Activity will only be on 40 and 20 meters (this is due to the type of license he has). Complete dates of activation have not been announced yet. Be listening.

PACIFIC DXPEDITION/TOUR (Update/Reminder). Operators Andrea/IK1PMR, YL Claudia/K2LEO/PA3LEO, Wil/PA0BWL, Joe/AA4NN, Franz/OE2SNL and Gerhard/DJ5IW are expected to be active from the following Pacific location between now and December 18th. The tentative schedule is as follows:
Samoa (5W) - November 11-18th; minus OE2SNL; Vaiala Beach Resort on the northern side of the Island of Upolu (OC-097);
callsigns are: 5W0AP (IK1PMR), 5W0CF (PA3LEO), 5W0WL (PA0BWL), 5W0IW (DJ5IW) and 5W0JC (DJ7JC).
Tonga (A3) - November 19th- December 1st; Otuhaka Beach Resort on the western side of the Island of Tongatapu (OC-049);
Group callsign for the CQWW DX CW Contest will be A31A;
Individual callsign are: A31MR (IK1PMR), A31LEO (PA3LEO), A31WL (PA0BWL), A31SN (OE2SNL), A31IW (DJ5IW) and A31JC (DJ7JC).
New Zealand (ZL) - December 2-5th; Waiheke Island (OC-201); Callsigns are: ZL/IK1PMR, ZL/PA3LEO, ZL/PA0BWL, ZL/OE2SNL, ZL/DJ5IW and ZL/DJ7JC.
South Cook Islands (E5) - December 5-12th; Rarotonga (OC-013);
Callsigns
are: E51PMR, E51LEO, E51BWL, E51SNL, E51XIW and E51NAA.
Singapore (9V) - December 15-17th; Callsigns are: 9V1/IK1PMR, 9V1/PA3LEO, 9V1/PA0BWL and 9V1/DJ7JC.

Activity is planned for 160-10 meters using CW, SSB and the Digital modes. The team will use three Elecraft K2/100 with DSP and amps. For more information and updates, watch: http://www.pacificdxpedition.com/index.php?s=intro

PW2, BRAZIL (Update/Special Event). Special event station PW2SIDC has been active from several Brazilian states since October 22nd, and will be on the air until November 30th (not the 22nd as first announced and also no activity from Fernando de Noronha Island). Activity is in celebration of

V DEFENCIL - V International Conference of Civil Defense - to be held between November 17-20th, at Anhembi - Meeting & Conventions of Sao Paulo City, with the participation of RENER - National Emergency Network Amateur Radio. Operators mentioned are: Monica/PS7YL, Ed/PS7DX, Flavio/PT2IW, Murilo/PR7AYE, Paulo Cesar/PT2PC, Alisson/PU5AAD, Angel/PT2ZUY, Junior/ PY2ZA and Silva/PY8ELO. Operations have been on 40/20 meters using CW and SSB. QSL via PS7YL, by the Bureau, eQSL or direct to: Monica Freitas, Av. Sao Miguel dos Caribes 31, Natal, RN 59086-500 Brazil. QSL will be sent out after November 30th, after receipt and consolidation of logs received from the various operators.

QSL INFO AND NEWS.....
Algarve STAR DX Team announced that the 4W6AL QSL cards have arrived from LZ3HI (printer). Direct requests will be answered very soon. All 4W6AL information can be found on: http://algarvedx.com

7X0DX & 9M8DX QSL INFO UPDATE. Tom, SP5UAF, reports: "At the begining of November 1st, received 7X0DX and 9M8DX directs unanswered by late DL4DBR. As perhaps you remember Ted, DL4DBR, passed away at the begining of 2009 and during last months of his life he was not able to deal with QSL cards (basicaly callsigns 7X0DX and 9M8DX managed by him). Ted's wife, Renia, DL3DBR, was for some time too affected by the loss to prepare the package of unanswered QSLs. She tried many times but always started to cry. She sent me the package of unanswered direct QSLs at the beginning of November. Now all of them are answered and sent to recipients. However, there is a problem with cards sent via DL4DBR via the bureau. Ted, DL4DBR, had computer records but unfortunately all data was lost. So if anyone is still waiting for a bureau card, please re-send your card via the bureau via SP5UAF or send an e-mail request to my e-mail tom.sp5uaf@gmail.com or sp5uaf@sp5zcc.net ."

TF4X QSL ROUTE. Phil, G3SWH, informs OPDX that he has been appointed the QSL Manager for TF4X. There is already a log search facility on his Web site and any direct QSL requests already sent to TF4X will be forwarded to him.

NOT THE QSL MANAGER FOR V51AS. Steve, WB6RSE, reports that he has received another request for V51AS. Steve states, "I am NOT and never have been the QSL Manager for Frank, V51AS. He told me in 2003 that his mail is routinely pilfered. Frank's QRZ.com page now shows an address in Germany: Frank Steinhauser, Am Rosenkothen 17, 40880 Ratingen, Germany."

Acim, YT3W, informs OPDX that logs for both YT1AD and YU1DW Pacific tour are on online at: http://www.YT1AD.info/t31
The logs include: 3D2AD, 3D2DW, 5W7A, 5W0DW, KH8/N9YU, T30AW and T30M.

QSLS VIA LOTW: TX3A

QSLS RECEIVED VIA MAIL: CE1KR, CO8LY, EA8AK, EK6LP, F6KMH, FT5WP/MM, GI6ATZ, K9AJ/VY0, KL5O, OX2A, OY3AA, PJ5/AH6HY, VU2PAI,

QSLS RECEIVED VIA THE BUREAU: NONE reported this week!

RW2, KALININGRAD. Members of the UA2 Contest Club will be active as RW2F in the CQWW DX CW Contest (November 28-29th) as a Multi-? entry. QSL via DK4VW.

SV9, CRETE. Dimitrios, SV9COL, will be active in the CQWW CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or to SV9COL.

T7, SAN MARINO. Aurelio, IZ0EGM, will be active as T70A during ARRL 10 Meter Contest between December 12-13th, using CW and SSB. QSL information is on QRZ.com.

TO4/FG, GUADELOUPE. Serge, F6AUS, will be active as FG/homecall from Les Saintes (NA-114) until March 2010. His activity will include contests, but he will be using the callsign TO4D. Look for him to possibly be on 160 and 80 meters. QSL via his home callsign.

TO5, MARTINIQUE. Albert, F5VHJ, will once again be active as TO5A during the ARRL DX SSB Contest (March 6-7th) as a Single-Op/All-Band/High-Power entry. QSL via LoTW or via F5VHJ.

TT8, CHAD. Jovica, E78A (aka 6W1SJ, ex. T98A, ST0RM, ST2A), who has been in Chad since September 25th, has received his renewed TT8JT license and will be on the bands during the next three or four weeks from Abeche (GL: KK03KU). As in 2008, the main purpose of Jovica's travel to Chad is his work for United Nations High Commissioner for Refugees (UNHCR). Activity will be mostly CW during his free time. Activity during CQWW DX CW Contest is not confirmed at this moment. QSL via E73Y: Boris Knezovic, P.O. Box 59, BA-71000 Sarajevo, Bosnia and Herzegovina, or via E7 bureau.

TX3, CHESTERFIELD ISLAND.. Operators George/AA7JV and Tomi/HA7RY continue to be active as TX3A until December 6th. As of print time, their log shows about 16k QSOs. Activity has be on all HF bands but with an emphasis on the lower bands. Modes used have been on CW, SSB and RTTY. QSL via HA7RY. For more detailed information and updates, visit their Web page at: http://www.TX3A.com

VU2, INDIA. Pai, VU2PAI, in Mangalore, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. He will try to be active on 160 meters, if possible, with a new Inverted L antenna. QSL via VU2PAI direct (QRZ.com address).

WP3, PUERTO RICO. Alfredo (Al), WP3C, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via W3HNK.

XR0, EASTER ISLAND (Update). The international team of operators active as XR0Y from Rapa Nui are now QRT. For more details, please see their Web page at: http://rapanui2009.org

XU7, CAMBODIA. Peter, NO2R, will once again be active as XU7ACY from Sihanouk Ville. He will also be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Lower-Power entry. QSL via W2EN.

YI9, IRAQ. Paul, N6PSE, has reportedly been issued the callsign of YI9PSE by the Iraqi Ministry of Telecom and is currently planning a 6-8 person DXpedition to Northern Iraq (Kurdistan) for late spring/early summer of 2010. There will be three stations on the air from the International Hotel in Erbil, Northern Kurdistan (near Turkey). Operations are expected to be on all bands and modes. More details are forthcoming.

ZD8, ASCENSION ISLAND. Bob, G4DBW, will once again be active as ZD8RH. His activity will include the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via LoTW or to G4DBW.

ZM4, NEW ZEALND. Members of the East Coast Contesters ZM2M Team will be active using a new callsign, ZM4T, in the CQWW DX CW Contest (November 28-29th) as a Multi-2 entry. Operators mentioned are: Lee/ZL2AL, Stan/ ZL2ST, Holger/ZL3IO, Peter/ZL2LF and Mike/ZL2FAR. QSL via ZL2AL, direct or by the bureau. Visit the ZM2M Web page at: http://www.zm2m.com

2397. Re: Sloped dipole question

Newsgroup: rec.radio.amateur.misc
Date: 2009-11-16 19:46:03 UTC
From: dplatt@radagast.org
Message-ID: <rom8t6-av9.ln1@radagast.org>
Source record: 6211

>Hi,
>
>I know that sloped dipoles transmit directional out from the center. But at
>what part of the sloped dipole does reception occur?

Possible answer #1: "all parts". Every part of the dipole plays a
role in reception.

Possible answer #2: "the same parts that transmit". The principle of
reciprocity says (to simplify it) that an antenna's pattern of RF
emissions (when transmitting) and sensitivity (when receiving) are one
and the same, and that the relationships between the currents flowing
through the antenna when transmitting and receiving are the same.

Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2009-036E: RAC target of phishing attempt

Several messages have been received from users of the @rac.ca
e-mail alias system who have received e-mails purporting to be
from RAC claiming that maintenance was to be performed on the
e-mail system and that certain information was requested to be
sent to the sender of the message.

Please note that this message was not originated by anyone at
RAC. We would not ask for such information as usernames and
passwords in an e-mail. It can safely be ignored. E-mails
relating to the @rac.ca e-mail alias system would come from
alias-help@aliases.rac.ca or vptas@rac.ca or other
identifiable RAC e-mail address.

Thanks to Earle Smith, VE6NM, who sent me the message
with complete headers which made it possible to report this
activity to the provider from which the messages originated
as well as the provider of the e-mail address to which
replies were to de sent.

James R. Hay, VE2VE ve2ve@rac.ca
Vice President, Technical and Administrative Services
Radio Amateurs of Canada

Bulletin RAC 2009-036F : RAC est l'object d'un essai de "phishing"

{Malheureusement l'ordinateur avec lequel j'ai
ecrit ce bulletin ne peut pas faire les accents.}

Quelques messages ont ete recu des usagers de la systeme d'alias
@rac.ca qui ont recu des messages qui se present comme etre
vennant do RAC. Ces messages dit qu'il y aura d'entretien qui
requis que les recipients des messages donne des renseignements
a l'expediteur de la message.

S'il vous plait noter que cette message n'a pas ete envoye par
personne chez RAC. Nous ne demandons pas les renseignements
comme noms d'usager ou mots-de-passe dans un couriel. Vous
pouvez ignorez ce message. Couriels au sujet de la systeme
alias @rac.ca vient de alias-help@aliases.rac.ca ou
vptas@rac.ca ou un autre adresse identifiable d'etre relie a RAC.

Merci a Earle Smith, VE6NM, qui m'a envoye une copie de la
message avec les ligne entete complete qui m'a permis d'avertir
le pourvoyeur d'ou vient le message et aussi le pourvoyeur ou

l'adresse ou vous etes demande d'envoyer les renseignements.

November 18, 2009

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

Within days, the almost non-existent 2009 hurricane season will draw to a close. It was the quietest season I can remember. We did get a shot across the bow from storm Ida, which turned out be mainly a non-event; although as this is written, remnants are pounding the mid-Atlantic region.

According to a report forwarded by Northern Florida SEC Joe Bushel, W2DWR, Section Manager Paul Eakin, KJ4G, monitored the progress of Ida and called contacts in Tallahassee for information and coordination. He alerted section officials to be ready to handle storm traffic. Mutual assistance plans with neighboring sections were trotted out to effect regional coordination and requests for assistance with Florida state EOC officials. Communication with ARRL HQ was started as well.

The National Weather Service station at Tallahassee was in operation with amateurs taking observations over the air via HF, and Echolink via its UHF repeater. The staff was in the process of running a portable D-STAR radio. Working with John Davis, WB4QDX, in Atlanta, the Southeast WX Net on a D-STAR reflector was ready to serve Georgia, Alabama and Florida along with any other areas of need.

Northern Florida Section net managers set up a list of net control stations for round-the-clock monitoring of emergency frequency 3950 kHz for potential traffic. The net would also mean having an HF station listening for any amateur anywhere who called for assistance to get a reply and help if needed. They had 22 assigned amateurs who shared various shifts. Some 45 amateurs checked in from around the east coast of the US.

Two northern Florida county EOCs were manned 24/7 with ARES ops on the radios. The state EOC-ESF2 staff had called for two amateurs to report to a shelter and the EOC of Walton county. A quick check into the Northern Florida Data Base of operators quickly provided the contact information and within minutes, a duplication request was averted as

the Walton county EC was on the scene and provided the personnel for the assignment. The new database proved invaluable on its first test.

Eakin was proud of the approximately 50 amateurs from the Northern Florida Section responding. The West Central Florida, Alabama, and Georgia Sections also displayed the true amateur spirit and dug in. Information from the West Panhandle DEC and his ECs kept both Bushel and Eakin completely informed. Eakin concluded: "The amateurs did a great job.This event brought out good teamwork and training paid off." For a more comprehensive report, see the ARRL Web story here <http://www.arrl.org/news/stories/2009/11/12/11192/?nc=1>.

==> GEORGIA RECEIVES $165,000 TO SUPPLEMENT D-STAR NETWORK

Federal funding has been secured by the Georgia Emergency Management Agency to complete a statewide D-STAR emergency communications network. The network's creation was started by Mark Fehlig, WA6NGC, the former Director of Engineering for the state's Public Broadcasting System. When the opportunity arose to install two Amateur Radio antennas on each of nine television towers providing statewide coverage, Fehlig jumped into action and designated Georgia ARES to control the use of those sites for emergency communications.

The next task was to pick the best technology to use. FM repeaters and packet were among the modes considered, but the emerging Digital Smart Technology for Amateur Radio (D-STAR) was chosen. The state of the art technology provides simultaneous voice and data communications. D-STAR allows repeaters to be linked on a flexible basis and permits simultaneous voice and low speed data along with high speed Internet connectivity at 1.2 GHz.

When the network is finished, radio amateurs will have access to voice and data repeaters on all nine towers across the state, operating on 2 meters, 440 MHz and 1.2 GHz. Because those towers are strategically located to provide maximum public television coverage, amateur radio communications will benefit from wide area coverage as well. Georgia's Public Broadcasting Network will provide tower space, feed line, indoor

space for equipment, backup power and Internet access at each site.

This grant will help ARES provide better service to its partners, enhance Amateur Radio technology, and add to the tremendous coverage of digital Amateur Radio in the Southeastern Division. See the Georgia ARES <http://gaares.org/>Web site for more information.

John Davis, WB4QDX, was appointed as District Emergency Coordinator in charge of the network. Davis said "After considering several technology options and modes for creating a statewide Amateur Radio network, the D-STAR technology made the most sense." Further, "the funding also provides 20 dual-band D-STAR radios for installation at EMA offices around the state, a portable UHF D-STAR repeater for emergency deployment, three 1.2 GHz D-STAR radios with laptops for sending data and photos from field locations and a robust reflector to serve the Georgia network during emergency conditions and available for general use during non-emergency times."

The complete Georgia D-STAR network should be in operation by early 2010. Davis said "the Georgia network will complement other D-STAR systems planned or in operation in neighboring states of Alabama, Florida and South Carolina, creating regional capabilities in the southeast. Weather systems approach Georgia either as severe thunderstorms and tornadoes from the west or tropical systems from the Gulf or the Atlantic. Having flexible statewide communications will provide new capabilities to support emergency communications." - Greg Sarratt, W4OZK, ARRL Southeastern Division Director, and John Davis, WB4QDX, District Emergency Coordinator, Georgia ARES

==> NATIONAL WEATHER SERVICE/ARRL SKYWARN RECOGNITION DAY: DECEMBER 5

The 11th annual SKYWARN Recognition Day (SRD) will take place this year on Saturday, December 5. Radio amateurs will operate from many National Weather Service (NWS) offices around the United States.The purpose of the event is to recognize Amateur Radio operators for the vital public service they perform during times of severe weather and to strengthen the bond between radio amateurs and their local National Weather Service office. The event is co-sponsored by the American Radio Relay League and the National Weather Service.

Traditionally, hams have assisted the National Weather Service during times of severe weather by providing real-time reports of severe events and storm evolution. The assistance that radio amateurs provide to the NWS throughout the year is invaluable.

SKYWARN Recognition Day this year will be held from 0000 UTC to 2400 UTC on Saturday, December 5, 2009. (That means the event officially begins on Friday evening in the United States). To learn more, check the NOAA Web site <http://www.wrh.noaa.gov/mtr/hamradio>. -- Steve Ewald, WV1X, Supervisor, Field Organization Team

==> GAREC 2010 SLATED FOR CURACAO

The Global Amateur Radio Emergency Communications Conference (GAREC <http://www.rientola.fi/oh3ag/garec/>) will return to Region 2 next year in Curacao, October 11-12. The theme of the conference will be "Learning through practicing." Details will be announced as they become available.

The GAREC mission is to help Amateur Radio operators to be better prepared for emergency communications and create exercises at both the national and international levels. GAREC exists to foster the exchange of information and experiences among all Amateur Radio operators and groups that are interested in emcomms. Their vision is to have regular world wide cooperation and understanding between governments and the Amateur Radio Service in the field of emcomms. -- Seppo Sisatto, Ph.D, OH1VR, Tampere, Finland

==> ARRL OFFICIALS ATTEND EMERGENCY MANAGERS CONFAB

The International Association of Emergency Managers (IAEM) 2009 Annual Conference was held earlier this month in Orlando, Florida. ARRL Emergency Preparedness and Response Manager Dennis Dura, K2DCD and Southeastern Division Director Greg Sarratt, W4OZK represented the League. During the event, Dura and Sarratt networked with emergency management staff from around the United States giving Amateur Radio exposure in the superb five-day conference. The results of this interaction were a clear invitation by all that Amateur Radio needs to maintain its status as a significant contributor to the readiness and response capabilities of this country.

The IAEM Conference and EXPO promoted current trends and topics, information about the latest tools and technology in emergency management, homeland security and overall preparedness. Sessions included stakeholders at all levels of government, the private sector, public health and related professions that exchanged ideas and information on collaborating to protect lives and property from disaster. This year's conference attendance was a record breaking 2043 attendees, including emergency managers, homeland security officials, first responders, NGO's, military, private industry and Amateur Radio.

FEMA Administrator Craig Fugate was the Keynote Speaker. Mr. Fugate was previously the Director of Florida's Division of Emergency Management. He talked about the need to build teams, relationships and partnerships with all sectors of volunteer or unpaid professionals in all phases of emergency management.

Not surprisingly, many emergency management staff are Amateur Radio licensees--something that comes forth clearly in the many discussions that were had. Dura and Sarratt had discussions with IAEM leadership on pending legislation and regulatory issues. Outgoing President Russell Decker, in one of his last official acts on behalf of the IAEM-USA Board came forth with written support of Amateur Radio with Senate Bill 1755 and House of Representatives Bill HR-2160. This effort was spearheaded within the IAEM by Past President Larry Gispert, KR4X. Additionally, IAEM leadership expressed the strong desire that Amateur

Radio and the ARRL participate more actively in IAEM around the country and at future annual conferences through training classes, workshop sessions and informational exhibits. -- Greg Sarratt, W4OZK, ARRL Southeastern Division Director

==> H1N1 FLU GUIDE AVAILABLE

The Department of Health and Human Services Center for Faith Based and Neighborhood Partnerships has announced a new resource for community and faith-based organizations: H1N1 Flu: A Guide for Community & Faith-based Organizations <http://www.flu.gov/professional/community/cfboguidance.html>.

Community and faith-based organizations are essential partners in comprehensive state and local flu response, and this guide was created to support them this flu season. The guide provides specific action steps that community and faith-based organizations can take to help keep communities healthy during flu season, including:

* Communicating important information about flu.

* Supporting vaccination efforts

* Linking vulnerable and hard-to-reach populations to vital information and resources

Visit http://flu.gov/professional/community/ to download the guide. - Dennis Dura, K2DCD, ARRL Emergency Preparedness and Response Manager

==> 2009 KENTUCKY DISASTER INSTITUTE COURSES OF INTEREST TO ARES

The American Red Cross Louisville (Kentucky) Area Chapter Disaster Services is currently presenting the 2009 Kentucky Disaster Institute, November 16- 21. This year it is being held in a new location: Campbellsville University (Louisville Campus). The Institute is bigger and better than ever, with 40 Disaster Services courses in six days, including several new courses.

Disaster Training courses are offered free of charge to registered Red Cross disaster volunteers only through many Regional Red Cross offices throughout the country. For information on registering for a disaster class, please contact your local chapter. To find your local Red Cross Chapter, click here <http://www.redcross.org/portal/site/en/menuitem.b5a0414b8a13bb88110dab5fc23f78a0/?vgnextoid=6d65e821cbdf9110VgnVCM1000002bf3870aRCRD&vgnextfmt=default>.

A few of the more relevant courses for ARES operators include:

* Disaster Assessment Basics

The purpose of this course is to provide a general overview of the tasks performed by Red Cross Disaster Assessment workers in support of a disaster relief operation and a local incident such as a single or multi-family fire. This course is not a replacement for the

"Fundamentals of Disaster Assessment" course, which is still the required course for members who wish to participate in the Disaster Assessment activity on a disaster relief operation.

* Disaster Mental Health: An Overview

Introduces participants to the roles, responsibilities and benefits of the Disaster Mental Health activity within the Individual Client Services group. Participants will learn how Disaster Mental Health supports both the disaster relief operations workers and clients within the disaster affected community.

* Emergency Operations Center/Incident Command Liaison

Because the consequences of the Red Cross' ability to manage relationships with the government, emergency management, and its partners can have significant and high profile ramifications, government and emergency management assignment settings require knowledgeable disaster workers, who can understand the inner workings of both government and Red Cross disaster response. The course will prepare participants who will be assigned to government and emergency settings to work collaboratively with Red Cross partners, helping to ensure a coordinated response that results in effective service delivery.

* ERVs: Ready, Set, Roll

Prepares course participants to operate an Emergency Response Vehicle (ERV) and its equipment safely and effectively to meet feeding and other service needs of people affected by disaster.

* Foundations of Disaster Mental Health

This course prepares Licensed Mental Health Professionals to provide for and respond to the psychological needs of people across the continuum of disaster preparedness, response and recovery.

* Fundamentals of Disaster Assessment

The purpose of this course is to introduce the critical role of Disaster Assessment, explore related preparedness tasks, learn how to collect and communicate disaster assessment information, and become familiar with how disaster assessment information supports management and service delivery decisions.

* Mass Care Overview

The purpose of this course is to provide an overview of the activities performed by the Mass Care group in support of a disaster relief operation.

* Mass Casualty Disasters

The purpose of this course is to prepare Red Cross volunteers and employees to provide a more effective initial response to a mass

casualty disaster.

* Psychological First Aid

The purpose of this course is to prepare all American Red Cross workers to provide basic care, comfort and support to people who are experiencing disaster-related stress. This course provides a framework for understanding the factors that affect stress responses in disaster relief workers and the clients they serve.

* Shelter Operations

The purpose of this training is to prepare volunteers and employees of the Red Cross and other agencies to effectively and sensitively manage shelter operations as a team while meeting the needs of people displaced as a result of a disaster.

* Shelter Simulation

The purpose of this training is to provide participants with an opportunity to apply the knowledge, skills and abilities required to operate a successful shelter.

* Weapons of Mass Destruction/Terrorism: An Overview

This course is designed to create awareness and provide basic information about the issues and safety concerns related to responding to a disaster incident in an environment involving Weapons of Mass Destruction/Terrorism (WMD/T).

Summary

As mentioned earlier, the above courses and others are available through your local Red Cross Chapters and also through the American Red Cross Learning Management System on-line. They are pertinent to ARES operators' emergency communications and disaster relief interests, not only in connection with Red Cross operations, but in general. Check them out. -- Thanks to Robert Bauer, KC4HM, who wrote: "I receive various e-mails from the Community Disaster Education Associate at the Louisville Chapter of the American Red Cross. I thought that this would be appropriate for ARES. Since Amateur Radio operators routinely assist the American Red Cross, I believe some of the courses would be beneficial for both amateur operators and the Red Cross. Additionally, in-person courses would provide an opportunity to make contacts and to develop a common understanding of each entity's functions and capabilities."

==> FCC ISSUES PUBLIC NOTICE ON AMATEUR RADIO AND GOVERNMENT DISASTER DRILLS

In September, the ARRL released guidelines <http://www.arrl.org/news/stories/2009/09/25/11094/?nc=1> that address numerous aspects of the issue of business communications in the Amateur Service. After last month's ARES E-Letter report on the policy paper,

the FCC released a Public Notice clarifying the Commission's rules relating to the use of Amateur Radio by licensed amateurs participating in drills and exercises on behalf of their employers. Entitled Amateur Service Communications During Government Disaster Drills, the Public Notice addresses participation by paid employees of organizations taking part in drills.

The Public Notice -- DA 09-2259 <http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-09-2259A1.pdf> -- affirms that the Commission's rules "specifically prohibit amateur stations from transmitting communications 'in which the station licensee or control operator has a pecuniary interest, including communications on behalf of an employer.'" The Public Notice states that, in order to facilitate participation by employees who wish to engage in government-sponsored drills and emergency exercises on behalf of their employers, a waiver can be requested from the FCC by the government agency sponsoring the drill or exercise (and not by the individual who wishes to participate in the drill or exercise). The government entity conducting the drill must include in its waiver application the following information:

* When and where the drill will take place;

* Identification of the amateur licensees expected to transmit amateur communications on behalf of their employer;

* Identification of the employer(s) on whose behalf the amateur(s) will be transmitting; and

*A brief description of the drill.

The waiver request must be filed and acted upon in advance of the drill. The waiver must be actually granted by the Commission before the amateurs participate in the drill. It is not enough to apply -- the waiver must be granted first.

Government entities requesting a waiver for their emergency/disaster drill should submit a written request addressing the factors listed above to Wireless Telecommunications Bureau, 445 12th St SW, Washington, DC 20554, Attn: Scot Stone.

A waiver is needed only for those licensees transmitting messages on behalf of their employer during the State and local government public safety agency's "occasionally conducted emergency preparedness or disaster test or drill." This may, after analysis, turn out to be very few licensees or, by rearranging functions of participants, a waiver may not be needed. The Commission has also emphasized that only governmental agencies may apply for a waiver.

On October 27, the FCC's Wireless Telecommunications Bureau (WTB) granted the first waiver that allows amateurs who participate in a government-sponsored emergency preparedness and disaster drill to communicate on behalf of their employers during the drill. The waiver

request was made on behalf of the Commonwealth of Kentucky. That state conducted a full-scale exercise on Wednesday, October 28, 2009 from 8 AM-5 PM (EDT) to test their emergency response to the possible release of chemical agents at Blue Grass Army Depot, located near Richmond, Kentucky.

==> SANTA CRUZ COUNTY HAMS CALLED TO ASSIST DURING WILDFIRES

Almost 20 years to the day since the Loma Prieta Earthquake shook California's Bay Area, a wildfire was burning through Santa Cruz County (approximately 75 miles south of San Francisco) just miles from the epicenter of the quake that caused part of the Bay Bridge to collapse. Just as Amateur Radio operators responded to calls for assistance for the earthquake, 20 years later on October 25, they responded when needed for a 485 acre wildfire.

==> LETTERS

CPR Training Options

I thoroughly enjoy your E-Letters. I do take exception when you indicate that two of the training courses that ARES members should have are the ARC CPR and First Aid Training. I do agree that these courses are of paramount importance knowing what we do as ARES members. I am a Red Cross instructor but would not teach the course to my people if it was a directive. Reason being, I attempted to get the materials for free or at least at cost and I would do the training for free. I was told that each trainee needed to pay the full price. I have asked in the past why ARRL does not include any other training disciplines and have not gotten a good answer. I for one do not think that any agency with the exception of the FCC should dictate training platforms. They all sit on the same emergency care forums. I am looking forward to an explanation as to why only Red Cross training is mentioned. Thanks and sorry for the rant. -- Tom Cook, KB3HZA, Washington County, Tennessee ARES EC

[Editor's note: Tom, the American Heart Association also provides CPR/Basic Life Support training, and indeed, it's the AHA courses that I take as a Registered Nurse to keep my certifications current. For information on the AHA courses, click here <http://www.americanheart.org/presenter.jhtml?identifier=3011764>. - K1CE]

Commercialization of Amateur Radio Guidelines

Long over due! Thanks much! -- Rolan Clark, W3FDK, Adamstown, Maryland

Rack Mounting

I liked your item in the last ARES E-Letter on racking up your gear. I've been an adherent of using standardized equipment racks for years, and wish more radio manufacturers and those of aftermarket gear would think about adding rack mounting hardware from the get-go.

I'm an audio professional, and I live and die by equipment in 19" racks. A few comments that might help you, and your readers: The standard 19 inch equipment rack is a great way to get that station deployable. Now, before you rush right out to Musician's Friend or your local guitar center to buy one of those nice racks with the front and rear covers on the caster wheels, think a minute. Avoid the units with the fake plastic tuck and roll look. Instead, spend a little more money, and go with Anvil <http://www.anvilcase.com/>, Calzone <http://www.calzonecase.com/> or Road Ready <http://store.roadreadycases.com/dyn_category.php?k=113874&gclid=CIfEyriIiJ4CFc9h2godmRddoA>.
These racks are built with shock dampening capabilities and are good fits for your equipment for deployability. You can easily find rack mountable shelves, drawers for small parts, etc. Check with your local professional audio emporium and ask for Middle Atlantic <http://www.middleatlantic.com/> products.

Another thought from years in the trenches of doing on site audio: Those caster wheels look like a good investment, but I find that I don't like anything bigger than an 8 space rack--small enough for one man to manhandle in and out of a truck, but still big enough to handle plenty of gear. I forego the caster wheels. Instead of the caster wheels I prefer my two wheeled hand truck. Just try wrestling a rack on caster wheels to the emergency ops location across the gravel parking lot, or through the grass, or the sand. If the dealer tells me they can't sell me the rack without caster wheels, I buy the darned thing, drive home, and pop off the little cheap-o wheels. -- Richard Webb, NF5B <elspider@bellsouth.net>, NTS Central Area Net Manager, Eads, Tennessee

Saw your rack mount in the ARES E-Letter and thought I would forward a photo of mine. I built this about a year or so ago from a rack case that I had lying around. The advantage of the rack case is that both the front and rear have covers that pop on and off with secure latches. Set the unit

on a table, pop the front and back, hookup power and antenna and you are good to go. Originally I had planned to have batteries in the case but decided against it because: (1) So far in every instance I have been deployed we had AC or DC power available; (2) If I need to run off external batteries the case is wired so that I can plug in my battery pack or even clip to a car battery; and (3) No battery means less weight. The blank space at the left contains wiring for my Yaesu FT 100D if I need to go HF. My case

was published in an issue of Popular Communications a year or so ago, and it won me a year's subscription! - John Gionatti, W9WY <w9wy@sbcglobal.net>, Munster, Indiana

==> K1CE FOR A FINAL

Although it was a quiet tropical weather season, we cannot become complacent, and it is now time for the 2009-2010 hurricane preparedness

period when plans are reviewed, improved and circulated, and gear is also checked and inventories enhanced. Hurricane conferences will be held, and exercises, like December's SKYWARN Recognition Day will help radio amateurs gain proficiency. See story above. SRD is a blast of fun, too, by the way. Don't miss it!

Web Site Of The Month: Presidential Disaster Declarations <http://www.fema.gov/pdf/hazard/map/declarationsmap2000_07.pdf>

This FEMA graphic shows the types of disasters by region of the U.S. It can help serve ARES planning goals on a regional basis. Check it out -- it's fascinating. Tnx to Greg Sarratt, W4OZK, for the tip.

Also, here's a nice item <http://www.nccrimecontrol.org/div/em/newsletters/November2009.pdf> involving Amateur Radio and MARS in the interoperability soup, forwarded by Tom Brown, N4TAB, North Carolina ARES ASEC, and Steve Waterman, K4CJX/AAA9AC, Winlink 2000 Network Administrator, Winlink Development Team; Army MARS Automation Coordinator/Agency Liaison; and Assistant Director, ARRL Delta Division. Thanks, gentlemen.

I am finally back on the air after a lightning hit took out my entire station and computer systems in June. It feels great to be back on my old friendly Northern Florida ARES Net on 3950 kHz every morning. You cannot find a more dedicated, and finer group of OMs and YLs on the air anywhere.

I have to also say how nice 40 meters is without the broadcasters there! It feels like a whole new band. When deciding on what organizations to give to this holiday season, think about making a donation to ARRL. It is the ARRL, over many years and conferences, to achieve the vastly more utilitarian 40 meter band. I just signed up for the ARRL Life Member payment plan. Happy Holidays to readers, from all of us here on the corporate mega-campus of the ARES E-Letter Editorial Staff and Board! 73! Rick, K1CE, Flagler County, Florida

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

==> + ADVOCACY: END IN SIGHT FOR "THIRD BATTLE OF BULL RUN"?

ARRL Chief Executive Officer David Sumner, K1ZZ, once termed the battle
of Broadband over Power Lines (BPL) in Manassas, Virginia as the "Third
Battle of Bull Run." While the war against harmful interference to
Amateur Radio via BPL is not yet over, the battle in Manassas might
soon be coming to an end.

In a Special Meeting on Monday, November 16 of the Manassas City
Council, the Council voted "To allow the [City of Manassas] Utility
Commission to make a recommendation to the [Manassas] City Manager as
part of the FY 2011 Budget regarding the decision to continue offering
Internet service; additionally, staff was instructed to discontinue all
marketing and advertising of Internet service." This motion passed 4-2.

At the meeting, Manassas Director of Utilities Michael Moon told the
Council that "it is not cost-effective to continue the internet service
on the Main.net BPL communication system as a stand-alone cost center"
and that the City "need[s] to make the decision for internet service in
the context of what communication system will be used for the City's
```

AMI [Advanced Metering Infrastructure]." Read more here <http://www.arrl.org/news/stories/2009/11/19/11206/?nc=1>.

==> + OPERATING: NCVEC TO RELEASE NEW TECHNICIAN QUESTION POOL IN JANUARY

The Question Pool Committee (QPC) of the National Conference of Volunteer Examiner Coordinators (NCVEC) is due to release the new Technician class (Element 2) question pool to the 14 VECs on December 1, 2009; it will be released to the public in January 2010. Each question pool for the three Amateur Radio license classes -- Technician, General and Amateur Extra -- is reviewed on a four-year rotation. This new Technician class pool will become effective on July 1, 2010. Read more here <http://www.arrl.org/news/stories/2009/11/19/11203/?nc=1>.

==> + OPERATING: SKYWARN RECOGNITION DAY SET FOR DECEMBER 5

The 11th Annual SKYWARN Recognition Day (SRD) Special Event will take place Saturday, December 5, 2009. SRD is co-sponsored by the ARRL and the National Weather Service (NWS) as a way to recognize the commitment made by Amateur Radio operators in helping to keep their communities safe. According to SRD Coordinator David Floyd, N5DBZ, Amateur Radio operators can visit their local participating NWS office to contact other hams across the world throughout the 24 hour event. Read more here <http://www.arrl.org/news/stories/2009/11/17/11199/?nc=1>.

==> HINTS & KINKS : PL-259 CONNECTOR TOOL FOR COAX CABLES

Tired of using pliers to screw on the PL-259 connectors when you are preparing cables? Pliers always seem to do some damage by the amount of force this task requires. I use an inexpensive 1/2 inch PVC female to male coupler. Simply use a step drill and ream out the female end (see the arrow in the photo). This works for most half inch coaxial cables. PL-259s do vary in diameter. Be sure to measure yours before you ream out the PVC adapter. It will not take a lot of reaming for the connector to fit snugly. The outer part of the PL-259 that fits into the connector is 0.55 inch diameter. This makes a secure fit. If you wear out the adapter, purchase another, as they are inexpensive. This works for me. -- 73, Paul Marsha, K4AVU, 200 Garden Trail Ln, Lexington, SC 29072-7341

==> + ARRL RECOGNIZES: DEADLINE LOOMING FOR NOMINATIONS FOR THE BILL LEONARD PROFESSIONAL MEDIA AWARD AND ARRL INTERNATIONAL HUMANITARIAN AWARD

Did you see an article or news segment on Amateur Radio this past year in the papers, on TV, radio or a professional Web site? ARRL Media and Public Relations Manager Allen Pitts, W1AGP, reminds you that you can recognize the professional reporter's work by nominating them for the Bill Leonard Professional Media Award <http://www.arrl.org/pio/pro_media_award.html>. "Time is running out," he warns. "Nominations for this prestigious award -- which conveys an

engraved plaque and a donation of $250 to be made in their names to the charity of their choice -- must be sent in to the League no later than December 11." Find out more about the Bill Leonard Professional Media Award here <http://www.arrl.org/pio/pro_media_award.html>.

Nominations are also open for the 2009 ARRL International Humanitarian Award <http://www.arrl.org/FandES/field/awards/humanitarian.html>. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. All nominations and supporting materials for the 2009 ARRL International Humanitarian Award must be submitted in writing no later than December 31, 2009. Read more about the ARRL International Humanitarian Award here <http://www.arrl.org/news/stories/2009/09/28/11098/?nc=1>.

==> + PUBLIC SERVICE: GAREC RETURNS TO REGION 2 FOR 2010

The 2010 Global Amateur Radio Emergency Communications Conference (GAREC <http://www.rientola.fi/oh3ag/garec/>) will take place October 11-12 on the Dutch island of Curacao in the Caribbean. The theme of the conference will be Learning through Practicing.

According to GAREC 2010 Organizing Committee Chairman Seppo Sisatto, PhD, OH1VR, GAREC's mission is two-fold: To help Amateur Radio operators be better prepared for emergency communications and to create emergency communications exercises at both the national and international levels. Exchanging information and experiences among all Amateur Radio operators and groups that are interested in emergency communications helps to promote GAREC's vision of having regular worldwide cooperation and understanding between governments and the Amateur Radio Service in the field of emergency communications.

GAREC 2010 is organized in cooperation with the Dutch Amateur Radio Emergency Service (DARES <http://www.dares.nl/>) and Club for Experimental Radio Examination Netherland Antilles (VERONA <http://www.muurkrant.nl/verona/uk/index.html>). Sisatto said that details on the upcoming conference will be announced as they become available.

==> THE 2009 ARRL SPECTRUM DEFENSE CAMPAIGN NEEDS YOUR SUPPORT

<https://www.arrl.org/forms/fdefense/> ARRL Chief Development Officer Mary Hobart, K1MMH, reports that the ARRL has raised $126,828 toward the goal $310,000 for the 2009 Spectrum Defense Fund <http://www.arrl.org/defense>. "The messages I receive from the ARRL members and hams who contribute to this much needed fund are heartening," she said, "expressing appreciation for all the work ARRL does for the Amateur Radio community to protect our frequencies. And we can all be proud of the successes that have come from the work of ARRL

leadership -- the Board and staff here at HQ. But there is always more to do." Hobart said that year after year, ARRL members tell her that the League's representation of radio operators -- both in Washington and on the international stage -- is one of, if not the most important activities that the ARRL does. "The cost of that representation at meetings in Washington, at IARU gatherings and working party meetings to prepare for world telecommunications conferences is the key to the continued success of our defense efforts," she said. "Spectrum Defense is one of those areas that is not covered completely by member dues. So we ask ARRL members to do what they can to help cover those expenses." Amateurs wishing to make a contribution may do so easily online <http://www.arrl.org/defense>, via postal mail or by calling the ARRL Development Office at (860) 594-0397.

==> NOW YOU KNOW!: IT'S ALL GREEK TO ME

Ask any high school physics student and they'll tell you that electrons govern pretty much everything we do. We call electrons in motion an electrical current, and those radio waves that we hams are so fond of are the result of high frequency electrons traveling in our antenna conductors. Think of a 40 meter wave as an accidental tourist who wants to go somewhere (somewhere nice and warm, maybe a rare DX station). But how to get there? It needs some mode of transport -- think of electrons as the transport providers.

We use our transmitters to move the electrons in our antennas to-and-fro to produce radio waves, hopefully to that rare DX destination. When the radio waves get there, they set electrons in another antenna in motion. That current -- electrons in motion -- is amplified and detected at the receiving location and a QSO is made.

But why do we call them electrons? The ancient Greeks noticed that amber attracted small objects when rubbed with fur; apart from lightning, this phenomenon is thought to be man's earliest known experience of electricity. Back in the year 1600, the English physician William Gilbert -- in his treatise De Magnete <http://rack1.ul.cs.cmu.edu/is/gilbert/> -- coined the New Latin <http://en.wikipedia.org/wiki/New_Latin> term electricus to refer to this property of attracting small objects after being rubbed. Both electric and electricity are derived from the Latin Ã□Â□lectrum, which came from the Greek word Ã□Â®Ã□Â»Ã□ÂµÃ□ÂºÃ□Â□Ã□Â□Ã□Â¿Ã□Â½ (Ã□Â□lektron) for amber. Now you know!

==> SOLAR UPDATE

Tad "Flutters in sun-beams <http://englishhistory.net/keats/poetry/shell.html>" Cook, K7RA, reports: Sunspot activity seems to be growing steadily of late: Daily sunspot numbers for November 5-18 were 15, 16, 11, 0, 14, 13, 11, 11, 0, 0, 11, 12, 0 and 29. Sunspot 1029 made its trip around the Sun and has re-emerged as sunspot 1032. A new sunspot -- number 1033 -- has

come over the eastern limb of the Sun. This steady appearance of sunspots has raised the MUF over many paths, and 15 meters is beginning to open regularly. In the southern hemisphere -- which gets more solar radiation this time of year -- you can see a pronounced effect on the f0F2 reading around mid-day <http://www.swpc.noaa.gov/ftpdir/lists/iono_day/Cocos_Is_iono.txt>. This is a measurement taken with an ionospheric sounder on Cocos-Keeling Islands in the Indian Ocean, 12.5 degrees South latitude and 96.8 degrees East longitude. The instrument sweeps a radio signal across the spectrum, beams straight up to the ionosphere overhead and measures the strength of the signal bouncing back to determine optimum frequency. You can see during mid-day f0F2 is going above 10 MHz. Another interesting tool to see varying MUF around the world updated every five minutes is here <http://www.spacew.com/www/realtime.php>. The contour lines show the MUF over that particular area. During the day recently, some areas over Africa were going above 30 MHz. Of course, this weekend is the ARRL SSB Sweepstakes Contest <http://www.arrl.org/news/stories/2009/11/12/11194/?nc=1>, and conditions are expected to be good for this domestic contest. There is a possibility of some disturbance from unsettled geomagnetic conditions, possibly peaking on Saturday. Predicted planetary A index for November 19-23 is 7, 10, 15, 9 and 6. Look for more information in the Solar Update, available on the ARRL Web site on Friday, November 19. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' On Receiving a Curious Shell, and a Copy of Verses, by the Same Ladies <http://englishhistory.net/keats/poetry/shell.html>.

==> SILENT KEYS

+ Prolific Amateur Radio and SWL Author Harry Helms, W5HLH (ex-AA6FW) (SK)

After a long bout with cancer, Harry Helms, W5HLH (ex-AA6FW), passed away Sunday, November 15. He was 57. Notorious for his witticisms and geniality, Helms was known for his many books -- such as Shortwave Listening Guidebook: The Complete Guide to Hearing the World, All About Ham Radio, How to Tune the Secret Short Wave Spectrum and Handbook of Radio Communications Servicing and Maintenance -- and his monthly column "You Should Know: Interesting Thoughts and Ideas for Enjoying the Hobby" in Popular Communications. Read more here <http://www.arrl.org/news/stories/2009/11/18/11201/?nc=1>.

QST Author George Badger, W6TC (SK)

George Badger, W6TC, of Portola Valley, California, passed away on Sunday, November 15. He was 84. Originally licensed in 1939 as W6RXW when he was 14, Badger was a member of the ARRL for 67 of his 69 year amateur career. After World War II service with the 89th Infantry Signal Company in Europe, he graduated from the University of

California with a degree in electrical engineering. Badger held seven patents on microwave tube and circuit design and was Marketing Director for EIMAC <http://www.cpii.com/division.cfm/9>, was President of Svetlana <http://www.svetlana-tubes.com/svetlana_main.swf> and consulted for CPII Econco <http://www.cpii.com/division.cfm/9>. Badger published many technical articles professionally and in the amateur press. First published in QST in 1981, Badger's most recent article, "The Pileup Buster," was published in October 2008; his next article, "Easy to Make Four-to-One Coreless Baluns," is scheduled to be published in a spring 2010 issue. Badger was a Fellow <http://radioclubofamerica.org/doc/Fellow%20Nomination%20form.pdf> in the Radio Club of America <http://www.radioclubofamerica.org/>. His Amateur Radio interests included building equipment, antennas and working DX. Badger held DXCC Top of Honor Roll (Mixed), DXCC Honor Roll (both Phone and CW), 5BDXCC (with endorsements on 160, 30, 17 and 12 meters), DXCC on all bands (160-10) and 5BWAZ. He also exceeded 2500 points on the DXCC Challenge. Contributions in memory of Badger can be made to the Stanford University Medical Center, Department of Immunology, 2700 Sand Hill Rd, Menlo Park, CA 94025. Funeral arrangements are pending.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=WGvRnqII0j8> This week, the ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/contests/rules/2009/novss.html> is November 21-23. The Feld Hell Sprint is November 21. The LZ DX Contest is November 21-22 and the NA Collegiate ARC Championship (SSB) is November 21-23. The EU PSK63 QSO Party is November 22. Next week, look for an NCCC Sprint on November 27. The CQ Worldwide DX Contest (CW) is November 28-29. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, December 27, 2009, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, January 8, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1684 - November 20 2009

The following is a closed circuit advisory and is not necessarily for air. Ladies and gentlemen Here's Amateur Radio Newsline's Support Fund Administrator Andy Jarema, N6TCQ.

--

Well, we have some good news and some not so good. The good news is that some of you responded and we are now only a month behind in paying our bills. The bad news is -- well -- that we are still a month behind in paying our bills and we need your help to get caught up to date.

With the holiday season approaching, I am going to ask you to remember to add the Amateur Radio Newsline to your gift list. The simple fact of the matter is that we can only bring you the news if we have the ongoing monies to do it. And it is you and only you that is the source of the funds that keep Amateur Radio Newsline coming your way.

Remember, Amateur Radio Newsline is a federal tax exempt 501(c)(3) not for profit corporation and your donations are tax deductible. Making a contribution is only a mouse click away if you have Pay Pal. Just go to www.arnewsline.org and click on the button at the top of the page marked "Make Donation." Or you can send in a donation to the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066.

Whichever way you choose, the all volunteer crew at the Amateur Radio Newsline will be eternally grateful.

Once again that's the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California, 91066. Or by Pay Pal at www.arnewsline.org

Also, less we forget, best wishes for a Happy Thanksgiving from our home to yours.

For the Support Fund, I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1684 with a release date of Friday, November 20th, 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC's new chairman testifies before congress on distracted driving. Is congress looking at some sort of nationwide ban? Also, BPL to disappear in Manassas Virginia, 60 meters

comes to Trinadad and Tobago, a ham in India waits 13 years to get his license and radio controlled robots to hold their own Olympic like games. Find out the details on Amateur Radio Newsline(tm) report number 1684 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC CHAIRMAN TESTIFIES ON DISTRACTED DRIVING

Distracting driving has become a major issue in congress and could eventually impact on all communications to and from vehicles including ham and CB radio. Bill Pasternak, WA6ITF, is in our newsroom with more.

--

The hot button issue of distracted driving was the reason that FCC Chairman Julius Genachowski was recently summoned to Capitol Hill to testify before the Senate Committee on Commerce, Science and Transportation. This to explain where the agency he heads up could fit in if the nations legislative body eventually takes action to curb the rising tide of accidents and deaths being blamed on driving distractions such as talking on cellphones and texting while in motion.

While his October 28th testimony before the subcommittee hearing on Combating Distracted Driving never mentioned ham radio, CB or any other type of vehicular two way system, he did agree with that distracted driving endangers life and property and the current levels of injury and loss are unacceptable. He called an urgent problem that simply must be addressed.

But Genachowski said that he does not believe there is a single solution to this challenge. He said that the responsibility lies with individuals and companies in the wireless space as well as government.

He stated his belief that all individuals should take personal responsibility. Adults should drive responsibly, and families and friends should encourage each other and help each other drive responsibly. He believes that drivers of all ages should refrain from text messaging while driving. He goes so far as to say that the nation should develop a cultural norm that driving while texting is totally unacceptable.

Genachowski said that the FCC also has a role to play by helping to educate the public and supporting innovative problem-solving. He said that education is vital to any comprehensive plan addressing distracted driving.

Most important to those who operate two-way radio from their vehicles was Genachowski statement that mobile communications can be a life-saver by improving emergency response by, for example, providing stranded motorists with immediate means to reach help and by giving

first responders instant access to 21st century communications networks.

Genachowski also noted that government at all levels has a role to play in ending the distracted driving problem. On the Federal level he applaud the Department of Transportation for leading an impressive, coordinated effort to increase public awareness of the dangers of distracted driving. He also said that because the FCC licenses and regulates mobile services and approves devices for use in the consumer marketplace, the agency can potentially play a useful role in enabling technology and encouraging the development of marketplace solutions.

Obviously there is a lot more to come as Federal legislators mull over the distracted driving issue. It also means that hams and other mobile two-way radio users will need to keep an eye on Congress in the coming months.

For the Amateur Radio Newsline Im Bill Pasternak, WA6ITF, in los Angeles.

--

The National Highway Traffic Safety Administration reported in 2008 that driver distraction in general is the cause of 16% of all fatal crashes and 21% of crashes resulting in an injury. And according to AAA, nearly 50% of teens admit to texting while driving even though laws in some states forbid it. More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-294326A1.txt (FCC, published reports)

RADIO RULES: FCC HOLDING WORKSHOP ON DISTRACTED DRIVERS

In a related development, word that the FCC is holding a holding a staff workshop on distracted driving as this newscast goes to air.

The November 20th workshop comes as the result of Chairman Julius Genachowski recent pledge to Congress that the FCC would gather data on exactly what drivers do in their vehicles. Also. To explore technology innovations and applications that may eliminate or significantly reduce the problem of distracted driving.

The commission would then be tasked with developing ways to educate the public about such dangerous behavior. The one thing that you will not see come out of this meeting is proposed rules to ban any mobile electronics that could distract drivers. Such regulation is outside of the preview of the Commission and would require congressional legislation

The workshop was to have been held at FCC's Washington headquarters and is open to the public. Its unknown if non-cellular mobile two way radio was on the agenda. (FCC)

THE BPL WAR: MANASSAS VA TO PULL THE PLUG ON BPL

The Manassas City Council is saying goodbye to BPL. Inside Northern Virginia reports that the council is in the process of deciding whether to abandon its broadband over power line project now, or to let it die at the end of the city's fiscal year.

BPL was Manassas' attempt to bring the Internet into the homes of every resident by providing low-cost broadband service. Subscribers were told that they could access the Internet through the regular electrical outlets, but for a number of reasons it never caught on with the public. First, the connection proved to be slower than cable or DSL. It was expensive to maintain and caused massive reception interference to those using the spectrum it shared. This included the Manassas ham radio community which was highly vocal in its opposition.

The end result was that the project only garnered about 670 subscribers while costing the city hundreds of thousands of dollars in ongoing maintenance. It also faced a strong challenge from Comcast cable which claims the potential to serve the entire city and Verizon which has rapidly been expanding its FIOS service in the Manassas area. And now like a bad dream it will shortly be fading away. (InsideNoVa.com)

RESTRUCTURING: 60 METER OPERATION IN TRINIDAD AND TOBAGO

Trinidad and Tobago may by now be permitting Amateur Radio operation in a 200 kHz segment of the 60 meter band. In a posting to the Digital Radio Yahoo group Julian Dedier, 9Z4FZ, notes that his license permits operation from 5.250 to 5.450 MHz with 1.5 kilowatt maximum power output. While amateur radio operation in this band would be a welcome development although as yet no reference to the allocation could be found in the frequency allocation table issued by the Telecommunications Authority of Trinidad and Tobago. (Southgate)

**

RESTRUCTURING: INDIA EXPECTED TO EXPAND 40 METER HAM BAND

Hams in India will soon have access to the spectrum from 7 point 0 to 7 point 1 MHz. This according to an e-mail being circulated by VU2JOS that says positive information coming from the official sources indicate that Indian amateur radio operators are being allocated an additional spectrum of 100 KHz on the 40 meter band.

According to the VU2JOS note, this is in line with the recommendations at WRC-2007. Since then shortwave broadcasters in India have shifted their transmitting frequencies beyond 7 point 2 KHz. In fact, in the region only 7 dot 190 MHz is still in use by the Srilanka Broadcasting Corporation.

VU2JOS says that an official notification of the 40 meter expansion is likely to be released soon. He also says that this is not the first time that hams in his nation have had access to this spectrum, He notes that Indian amateur radio operators were allowed to operate between 7 to 7 point 1 MHz, with the allowance of additional spectrum. (VU2MYH)

**

RADIO DEDICATION: VU2DWA- 13 YEARS FROM EXAM TO LICENSE

And here's the story an amateur radio applicant in India has received his license. What makes this interesting is that it only took some 13 years to reach him, Heres the story as we know it.

Back in 1996 Digvijayam Paricharla passed that nations amateur service exam. It normally would have taken a few months for him to have received his license and permit to operate, but months pass and then years but still no license.

After waiting and waiting, he finally contacted India's National Institute of Amateur Radio which in turn took up his cause. He says that through the dedication of VU2IPA, VU2RBI, VU2RDM, VU3ATK and several others, his dream of becoming a licensed radio amateur was realized, On October 28th he was finally issued the callsign VU2DWA and announced that he planned to celebrate by attending the now concluded Bangalor Hamfest.

VU2DWA sent out an e-mail telling the world that he is very grateful to everyone in the National Institute of Amateur Radio for their helping to champion his cause. And before you ask, nobody has said why it took all these years for his license to be issued. (VU Forum via W7VOA)

RADIO CRIME: RAC E-MAIL ALIAS USED IN PHISHING ATTEMPT

In the world of cyberspace the word phishing means to impersonate someone to try to illegally obtain information. Now, Radio Amateurs of Canada says that its e-mail domain of at RAC dot CA is being used in an attempt by crooks to obtain personal information from members. Norm Seeley, KI7UP, reports:

--

According to Radio Amateurs of Canada several messages have been received from users of the at rac dot ca e-mail alias system who have received e-mails purporting to be from RAC. These notes claim that maintenance was to be performed on the e-mail system and that certain information was requested to be sent to the sender of the message.

But says Radio Amateurs of Canada, these messages were not generated by anyone at that group. Rather they are a phishing expedition by someone likely involved in the crime of identity theft. It says that it would never send an e-mail that asks for such information as usernames and passwords. Radio Amateurs of Canada says to please ignore them and not to respond.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona, reporting

--

The bottom line: Anytime you get an e-mail of which you are even the least suspicious of, hit the delete key. Both you, your bank account and your computer will be glad that you did. (RAC)

**

HAM RADIO TESTING: NEW TECHNICIAN QUESTION POOL TO BE RELEASED

The Question Pool Committee of the National Conference of Volunteer Examiner Coordinators is due to release the new Technician class question pool to the 14 VECs on December 1st. It will then be released to the public in January 2010.

Each question pool for the three Amateur Radio license classes is reviewed on a four-year rotation. This new Technician class pool will become effective on July 1, 2010. (NCVEC)

**

RESCUE RADIO: COMMERCIAL FM ASKS FOR FM FRECEIVERS IN CELLPHONES

The U.S. commercial radio industry is pressing the Federal Communications Commission to persuade wireless carriers to include FM radio in cell phones. In their ex parte filing, radio executives stress the enhanced public safety benefits of including FM tuners in wireless handsets.

The industry leaders argue that technical obstacles to incorporating FM chips in mobile handsets largely have been overcome, that the chips cost about $1 or less and internal FM antennas are already included in at least 17 models of handsets in the United States. More than 30% of cell phones worldwide include FM and the battery drain is minimal from the FM radio circuitry.

The executives also noted that the cellular industry is developing an emergency warning system based on text messaging with broadcast SMS technology. But the radio leaders say this kind of system is expensive

and deployment is years away. (RW)

**

PUBLIC SERVICE: HAM VOLUNTEERS NEEDED FOT HONOLULU MARATHON

Ham Radio volunteers are needed to assist at the 2009 Honolulu Marathon. The event is slated for Sunday, December 13th starting at 5 a.m. local time.

The marathon begins and ends at Kapiolani Park with volunteer communicators required at many locations along the route. If you can assist please contact Contact Greg, NH6ZS, by e-mail him at honu1 at juno dot com. (KH6QX)

**

RADIO LAW: SAFE HARBOUR WILL CONTINUE

The FCC will continue to restrict the broadcast of material that it believes to be to risquï¿½ for children's eyes and ears. Fred Vobbe, W8HDU, has the details:

--

Audio report only. Hear it in our MP3 file downloadable at www.arnewsline.org

--

While the concept of time channeling has seen more than one direct or indirect legal challenge, so far the courts have maintained that that the concept is both constitutional and within the purview of the FCC to enforce. (RW)

**

ENFORCEMENT: SAN FRANCISCO INLICENSED STATION ISSUED $10000 NAL

The owner of an unlicensed broadcast station in the San Francisco Bay area has taken it off the air. This after being hit with a proposed $10,000 fine from the FCC in August.

The Notice of Apparent Liability was issued to Daniel Roberts, the founder of unlicensed broadcast station Pirate Cat Radio. Now, the station website says the proposed fine effectively ends Pirate Cat Radio's thirteen-year run as one of the Bay Area's most consistent voices of protest against what it calls corporate-run media monopolies.

Pirate Cat Radio will continue as an Internet-only station and says that the majority of its listeners were already tuning in online or via podcasts. No word on whether or not Roberts will appeal the proposed fine. (Radio)

**

HAM HAPPENINGS: SKYWARN RECOGNITION DAY DECEMBER 5TH

The 11th Annual SKYWARN Recognition Day will take place on Saturday, December 5th. Co-sponsored by the ARRL and the National Weather Service SKYWARN Recognition Day is a way to recognize the commitment made by Amateur Radio operators in helping to keep their communities safe.

According to SKYWARN Recognition Day Coordinator David Floyd, N5DBZ, radio amateurs can visit their local participating National Weather Service office. There, working as a team thy will contact other hams around the world throughout the 24 hour event.

More information about SKYWARN Recognition Day is on line at the American Radio Relay Leagues' website at www.arrl.org. (ARRL)

**

CALL FOR PAPERS FOR THE 2010 SOUTHEASTERN VHF SOCIETY CONFERENCE

A "Call for Papers" to be presented at the 14th Annual Southeastern VHF Society Conference has gone out to the world-wide ham radio community. This 2010 conference will take place on April 23rd and 24th, at Morehead State University in Morehead, Kentucky and the sponsor is calling for the submission of papers and presentations for the to be presented at that gathering.

Papers and presentations are solicited on both the technical and operational aspects of VHF, UHF and Microwave weak signal amateur radio. Some suggested areas of interest include transmitter, receiver or transverter design, antenna design, low noise pre-amplification techniques. On the operational side topics might include DXpeditions, Rovers, EME operation, use of digital modes and exploring such items as Sporadic E propagation, Meteor Scatter and Troposphere Ducting.

In general papers and presentations on non weak signal related topics such as FM, repeaters and packet will not be accepted but exceptions may be made if the topic is related to weak signal. For example, a paper or presentation on the use of APRS to track rovers during contests would be considered.

The deadline for the submission of papers and presentations is February 5, 2010. Send all questions, comments and submissions to the program chair, Robin Midgett K4IDC. You can reach him at K4IDC (at) comcast (dot) net.

For further information about the conference please go to www dot svhfs dot org on the World Wide Web. (K4IDC)

NAMES IN THE NEWS: AA2EJ AWARDED NOBEL PRIZE IN PHYSICS

Some names in the news. First up is George Smith, AA2EJ, who has been awarded the Nobel Prize in Physics for the invention of an imaging

semiconductor circuit known as the CCD sensor. Smith shares the prize with two other researchers. They are Charles Kao, of Standard Telecommunication Laboratories and Willard Boyle, of Bell Laboratories. (ARRL, other published news reports)

**

NAMES IN THE NEWS: W8WDY SELECTED FOR 2009 DARA PRESIDENTIAL AWARD

And Dayton Amateur Radio Association president Steve Coy, K8UD, has named to George Potor, W8DWY, as recipient of the 2009 DARA Presidential Award. In making the announcement Coy said that Potor has contributed every year for the past several years in what we now know as Management Information Systems. He has created several computer programs including, Regis, Stubs and many others, including the program that shows the winning ticket numbers during Hamvention. Coy says that Potor's work has set the foundation for future programs, that includes Boothtracker which was first utilized for Hamvention this past year. (DARA)

**

NAMES IN THE NEWS: VK5ZAI FINALIST IN THE SENIOR AUSTRALIAN OF THE YEAR COMPETITION

An ham radio operator is a finalist in the Senior Australian of the Year competition. This as the South Australian Committee selects Tony Hutchison, VK5ZAI as one of the four South Australia finalists.

VK5ZAI was recognized for nomination based on his volunteerism as one of the satellite Earth stations for the Amateur Radio on the International Space Station program. Hutchison was also acknowledged for his work as Australian ARISS Coordinator and organizing the link ups for schools to contact the amateurs on the International Space Station, stimulating the interest of young people in science and technology.

The Australian of the Year Awards is a program of the National Australia Day Council, with state and territory selection committees selecting four finalists in each category, including the Senior Australian of the Year. The awards recognize the individual's contribution to their community.

CHANGING OF THE GUARD: HARRY HELMS, W5HLH - S.K.

Another sad changing of the guard in amateur radio. This as we learn of the passing of noted personal radio author Harry Helms, W5HLH, following a long fight against Cancer.

Helms, the former AA6FW, was best known for his many hobby radio related books including the Handbook of Radio Communications Servicing and Maintenance, the Handbook of Home Security Electronics, the Shortwave Listening Guidebook and The Complete Guide to Hearing the World. He was also the author of the book All About Ham Radio and had been a monthly contributor to Popular Communications magazine.

Helms was only age 57 when he succumbed to the disease at a hospice facility not far from his home in Fort Mill, South Carolina. In his last blog entry dated August 28th, he noted that he was now living just a few miles from the graves of his parents and grandparents. He continued by saying that while it might sound illogical that he found this comforting.

To quote W5HLH: " My journey began here, and it will soon end here."

Sadly for all of us, it did on Sunday, November 15th. Now everyone involved in private radio is mourning the passing of this gifted writer who contributed so much to every aspect of the personal communications hobby.

Harry Helms, W5HLH, is survived by his wife, Di. As we go to air, funeral arrangements are still pending. (NZ4O, ARRL, others)

**

CHANGING OF THE GUARD: FAMED INVENTOR LOUIS KING PASSES AWAY

Louis Arthur King, the well known founder of Kintronic Labs, passed away on Sunday morning, November 1st.

Considered to be one of the nations finest consulting engineers, Louis King started his engineering career as a professor in the electrical engineering department at Clemson College, now Clemson University. That's where he instituted the teaching of radio engineering courses. He later went on to help design the first air-cooled 50 kilowatt AM transmitter at RCA and received the patent for the bistable multi-vibrator, better known as the flip-flop circuit.

In 1949 he obtained his Professional Engineering license in Tennessee and Virginia and began a broadcast consulting business. This venture grew into what is now Kintronic Labs, which is the maker of AM broadcast antenna systems and components.

Louis King was recognized by the National Association of Broadcasters in 2007 as the recipient of the NAB Lifetime Radio Engineering

Achievement Award. Later that same year, King College honored him with an honorary Doctor of Laws Degree at their first winter commencement.

At the time of his death Louis Arthur King was 94 years of age. (CGC, RW)

HAM RADIO NEAR SPACE: NEXT BACAR TO LAUBCH JAN 24 2010

Turning to ham radio near space, ZS6EF will demonstrate the 2010 version of a Balloon Carrying Amateur Radio. This, on Saturday November 21st at the National Amateur Radio Center in South Africa.

The maiden flight of this latest near space ham radio equipped balloon flight will be on Sunday, January 24th 2010 from South Africa's Western Cape. Radio Amateurs from around the globe will be able to follow it on the Web. More information is at www.amsatsa.org.za (SARL)

**

WORLDBEAT: E-VOTING COMES TO THE RSGB

Electronic voting has come to Radio Society Great Britain's elections. This with word that a new electronic voting system administered by the Electoral Reform Society is now up and running for voting in the RSGB 2009 balloting.

There are four Board places to be filled and Region 9 also has an election for the Regional Representative position. RSGB members have until noon on 10 December to register their vote. Those who prefer can still send in a postal vote and an envelope is included with this month's Radio Communications magazine. (RSGB)

**

ON THE AIR: MAKE TUESDAYS 222 ACTIVITY DAY

If you own a radio capable of operation in the 222 to 225 MHz band then make Tuesday's the new 222 Activity Day. So says Todd Sprinkmann, KC9BQA, in Wisconsin who is suggesting that anyone with gear for the 1 and 1/4 meters use it to return activity to the underused band.

Todd suggests that those wanting to take part take to the air using either Morse on or near 222.100 or 223.500 on FM in the 0100 to 0400 U-T-C. He says to call CQ, swing your beams, create your own activity and invite a ham radio buddy to join in as well.

Sprinkmann also suggests that hams on 222 MHz consider using the www dot ON4KST dot com chat that thousands of other hams on other bands are already using. He notes that there are several steps in signing up and he has provided that information at his webite at www dor kc9bqa dot com.

And for those who were not around two decades ago when ham radio lost the 220 to 222 MHz portion of the band, the words true then could also be very apropos now as well: 222 - Use it or loose it. (VHF Reflector)

**

WORLDBEAT: OMAN CELEBRATION

Members of the Royal Omani Amateur Radio Society have activated special event station A43ND in celebrating Oman's "National Day". Activity will last until November 25th. Operations have been on 40 and 20 meters CW and 20/15 meters SSB, but look for activity on other bands and modes. QSL via A47RS. (ROARS)

**

DX

In DX, word that a team of Italian amateur radio operators will be active from Busua Beach Ghana through November 27th. Activity will be on all HF bands and modes, on 80 through 10 meters. The callsign 9G5TT will be used from the mainland while the callsign 9G5XX will be used from Abokwa Island. QSL via I2YSB, direct only.

F6ICX will be active as 5R8IC from Saint Marie Island through December 15th. Activity will be on 80 through 10 meters. QSL via his home callsign.

A35A reports that A35KL will be in Tonga for about 6 weeks, but he probably won't be on the air until he gets to Ha'apai on November 20th. No word on his length of stay on the island but he will be operational for the CQ World Wide CW contest.

Also during the contest listen out for Cuban station CO6LP. He will be on as a 40 meter single operator, single band low power station using only a dipole. QSL via CO6LP.

The Lufthansa Amateur Radio Club in cooperation with the Emirates Amateur Radio Society will be operating out of Dubai as A65DLH between November 23rd and the 30th. Activity is planned for 160 through 10 meters using CW, SSB and the Digital modes. Please QSL via the bureau.

IZ0EGM will be active as T70A during ARRL 10 Meter Contest between on December 12th and 13th. He will be operating both CW and SSB. His QSL information can be found on QRZ.com.

Lastly, UY5LW will be operational from Maputo, Mozambique as C91LW until December 3rd. Hes reportedly operating 80 through 10 meters using mostly CW with some RTTY and PSK. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: THE ROBOT OLYMPICS

And finally this week, China is planning to hold a 16 event robot Olympics in 2010. Spud Murphy, VK8ZWM, is down-under with more:

Yes robots will compete in familiar Olympic sports such as athletics as well as those more suited to machines such as cleaning. Entry to the competition will be restricted to robots resembling humans. They must possess two arms and legs. Wheels are banned.

Robots already have their own world cup. The 2009 competition saw entries from 400 teams that hailed from 35 separate nations. The 2010 event will be held in June in Singapore. A rival event is run by the Federation of International Robot-Soccer Associations.

The Chinese robot games will be one among an increasingly crowded calendar for robot sports and other competitive events. One event, Roboexotica, is for robots that can mix cocktails, light cigarettes and chat with bar patrons. No word that Robot-Exotica will feature Energizer "Bunnies" as hostesses.

This is Spud, VK8ZWM in Darwin.

--

The Chinese event will face competition from the RoboGames that also stages sports events for robots. The 2010 RoboGames will take in California in April. And less we forget to mention it, almost all of these robots are controlled by some form of a radio link. (WIA)

Hello, I'm after an antenna matching transformer from http://www.iceradioproducts.com and being in the UK, I need to ask them for shipping costs, and whether they take PayPal, as these are crucial matters for arranging international transactions with different currencies. They provide an email address, 'sales at TheirDomain.com' (Did that because I don't want web-archive spiders and Google-gropers to find that and spam it to hell). I've sent three polite, short requests to that email over the last 8 days or so and can't raise a response! Odd given that they supposedly want business. Can anyone reach them personally for me? Or perhaps point me to a UK supplier of what I'm after?

What I want is their 'Beverage' matching transformer 180A, or perhaps 183A for greater range at the longer wavelength end, (down to 100 KHz or so). I'm also trying to find John Doty's plans for winding my own, but the only mail addresses I've found for him so far have gone the way of the Norwegian Blue. John Doty says that the 180A is so good it makes good sense to buy it anyway, but right now I'm not at all sure I ever will without help.

QNEWS BROADCAST NOVEMBER 22 2009

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

Congratulations to all those who responded to Graham, VK4Baker Baker's call for members of the broadcast industry to get behind the WIA National News microphone. Further congratulations to Graham for organising what is probably a first, certainly for the Brisbane, VK4 area, the rebroadcast of the whole news on the 4TAB DAB+ channel.

The delegates to the President's Lunch with whom I have had a chance to

talk were impressed with the enthusiasm of the event. The participation

of delegates in the discussions were built upon by being able to individually raise issues of interest with the speakers. Not only that,

the represented Clubs were given copies of the new promotional posters and the centenary pin was available for purchase.

I believe that the Institute is addressing many issues and seeking to facilitate updates in the hobby and so expect over the next months to have further announcements via WIA News, on the pages of /Amateur Radio/ magazine and the WIA web page.

www.wia.org.au/newsevents/news/2009/20091116-2/index.php

As the holiday period rushes towards us, have a look at the merchandise

available from the WIA Bookshop. If you haven't caught up with the news

yet, copies of the new centenary year call book were expected at the WIA office, Friday 20th. If clubs can order by the box, they save the cost of delivery! Tell your treasurer today!

While listening to the virtual ionosphere program, HamSphere, Ray, VK4TPT was pleased to hear Bharathi, VU2RBI, with whom he had several contacts with during the Tsunami-interrupted DXpedition to the Andaman Islands. As VU2RBI will shortly be in Brisbane, Ray is planning to travel down from Maryborough and meet her and her husband.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

Jota de brief - Club secretary, Peter VK4TAA, reported of a fantastic success of the JOTA weekend despite the hot and dusty conditions. The weekend was well supported by our club members with about 50% of club members or about 60 members assisting in some way to make the weekend one to be remembered. Over 300 visitors attended the site and club members assisting in building over 120 kits.

Each year there are improvements to be made and these will be implemented to maintain the focus on the enjoyment of the scouts. Please watch the AR magazine for the club's article on the weekend.

The club will hold its Xmas party on 12/12/09 for a lunch time start around 11.30am - Rotary Park, Woorum, on Bribie Island. This is on the surf side of Bribie Island. Toilets & electric BBQ's available.

It's a BYO function but unfortunately the location is not listed as an IOTA site.

Scott, VK4FLAE , is currently looking about the possibility of a visit by the club to the Brisbane the airport control tower tour. Please stand by for all the dates early in 2010.

James, VK4TJF, the AWARDS and QSL MANAGER, has advised that two REDCLIFFE CITY awards will be issued to Doug VK4KET and one to Glen VK4FZ on the 23rd of November. Remember if you would like to achieve one of these awards please check out the details on the club's web site. James has also provided details of purchasing very professional QSL cards for $140 with the club logo on them and an aerial view of Redcliffe on it. $140 for 1000 cards that's just 14 cents per card! Great value!!, Please contact James for more details.

The Centenary Call book is available by ordering from Peter VK4TAA at $27 from the club, which is a $5 saving on individual purchases to the WIA & allows for a small profit to the club. Peter would like orders by 28th November please.

Until next time, I'm Ray from the Redcliffe club and your listening to QNEWS from VK1WIA

December General Meeting

This months meeting is on the 1st of December and is the Christmas BBQ meeting. The meeting starts at 6pm and will be very quick. Generally the onions start cooking at about 6:20pm and as we all know, that is a wonderful smell around dinner time. As that aroma wafts through the club, President Noel, VK4NL, has a difficult time keeping members focused.
Members to bring a salad or Dessert, everything else is provided.

Busy Club Members

The club was involved in quite a bit of activity last weekend. First there was the Gold Coast Hamfest to get to on Saturday, then Sunday morning was the Global Simulated Emergency Test which started in the wee hours, followed by the clubs 3rd Sunday of the month BBQ social meeting. And if that wasn't enough one alcoholic sugary type that had been to all of the other events, went to the Presidents Lunch in Brisbane on Sunday.
Well done guys.

WIA Grant Success

The club was recently awarded a $500 grant in support of developing better HF capabilities to further involvement in such events as the recent Global Simulated Emergency Test as mentioned above.

Thanks to the WIA.

Until next time, this is Gordon VK4VP.

GREETINGS ! THIS IS DON VK4FNQA WITH NEWS FROM NORTH QUEENSLAND.

AS THE NEWS GOES TO AIR IN MOST PARTS OF AUSTRALIA
THE TOWNSVILLE AMATEUR RADIO CLUB INC IS HOLDING
THE 2009 AGM AMONGST THE SHADY TREES AND WELL
MAINTAINED GARDENS OF ROSSITER PARK IN AITKENVALE.

AN EAGER THRONG OF ATTENDEES WERE AT THE VENUE FROM
7 AM WHEN KEN VK4QZ CRANKED UP HIS BBQ WITH WHEELS
AND PROCEEDED TO TURN OUT YUMMY PANCAKES MADE
BY RICHARD VK4FRJG. THE AGM PROCEEDINGS GOT UNDERWAY
FROM 8-30AM AND THE TRANSMISSION OF THE NEWS IN
THE TOWNSVILLE REGION WILL BE DELAYED UNTIL 1PM THIS AFTERNOON.

HERE IS A REMINDER ABOUT ONE OF THE FRIENDLIEST RADIO
NETS IN THE LAND WHICH IS HAPPENING THIS TUESDAY EVENING
ON THE TOWNSVILLE VHF REPEATER FROM 7-30PM.
THE ANN RENTON MEMORIAL LADIES NET IS OPEN
TO YOUNG AND OLD, YL OR OM. SO GET ON AIR
WITH THE NET AND LETS SEE IF THE YLS CAN
OUTNUMBER THE OMS FOR A CHANGE !

SOMETHING EXCITING IS ON THE HORIZON WITH THE TARC 2009
CHRISTMAS PARTY HAPPENING IN THREE WEEKS TIME
AT THE VK4TJS SATELLITE DISH CITY.
IT IS A CATERED EVENT SO YOUR ATTENDANCE NUMBERS
NEED TO BE CONVEYED TO GAVIN VK4ZZ BEFORE DECEMBER 8TH !

NOW SIT UP AND TAKE NOTICE ! THE WIRELESS INSTITUTE OF AUSTRALIA
HAS JUST ANNOUNCED THAT THE 2010 CENTENARY ANNIVERSARY CALLBOOK
IS BEING RELEASED. TARC, ALONG WITH OTHER WIA AFFILIATED CLUBS, IS
TAKING ORDERS FOR THE CALLBOOK.
FOR TARC ORDERS CONTACT GAVIN VK4ZZ SOONEST.

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE,
THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC,
AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

WIANEWS FOR WEEK COMMENCING NOV 22 2009.

Brought to you by members of North West Tasmania Amateur Television Group
from the studios of VK7AX.

It will be a hard act to follow the professional production presented by
our news readers last week, however we will do our best.

Presenting the broadcast will be:-

Susan VK7LUV on Education and advancement of Amateur Radio.
Jim VK7JH with Intruder Watch and Enforcement Zone.
Ron VK7RN with World Wide Special Interest Groups and Rewind.
Ivan VK7XL with Operational News.
Neil VK7ZNX Talking about our Hams across Australia.
Daniel VK7FDWB brings us up to speed with International News.

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING NOV 22 2009

ABU digital radio delegation visit Sydney and VK1WIA in DAB+

Twenty radio delegates from eight different countries visited Sydney this week as part of an Asia-Pacific Broadcasting Union digital radio delegation.

The delegation was hosted by Commercial Radio Australia in collaboration with the ABU Technical Department and included representatives from MRTBN - Mongolia, RTHK - Hong Kong, RTB - Brunei, VOV - Vietnam, TBS - Japan, LRN - Laos, RTM & IPPTAR - Malaysia and Mediacorp - Singapore.

The ABU delegation is made up of senior executives in engineering, programming and management eager to understand how Australia made the transition to digital radio and follows visits in the past couple of months from Korean and Indonesian radio broadcasters.

Joan Warner chief executive officer of Commercial Radio Australia said Australia's successful DAB+ has created a great deal of interest internationally.

Creating interest in Australia last week on the DAB+ platform in Brisbane was the highly successful transmission of the WIA national news and QNEWS. This was the edition read by current and past Radio Announcers, sort of "taking back the streets".

Radio (or the wireless) as we know it today DID evolve from radio amateurs so last weeks news formed the centre piece of a special broadcast on TAB+ a digital channel in Brisbane. Featuring the news of course but also heaps and heaps of music with a radio/communication theme.

ABBAS SOS... VK1WIA gave both CQ Serenade and CQ Boogie a play, there was Slim Dusty dot com and "Grand-dad was a telegraphist, the tracks from "The Ham Band" (Google that one it's well worth a surf".. and what radio show would be worth it's salt without COMMERCIALS! Yes plenty of plugs on how to become a ham and the WIA-BOOK SHOP.

Following on from that success it is planned to do it again in 2010 for our Centenary using VK100WIA if you are in Brisbane, look for TAB+ or if (shame shame) you have yet to purchase a digital radio visit your local electronics store and ask them about Digital Radio!

Click on the link on the WIA front page so see and hear a couple of video clips of the transmission.

VK JAMBOREE

The 22nd Australian Jamboree is the biggest event on the Australian Scouting calendar.

With more WIA JOTA co-ordinator Bob Bristow VK6POP

"Over 12,000 Scouts and Leaders from all around Australia and other countries will converge on Cataract Scout Park in January 2010 to take part in a 2 week long camp.

The theme of the Jamboree is "Test Your Limits", and Scouts will enjoy a wide variety of activities on and off site that will indeed test their limits.

Amateur Radio has been part of Scout Jamborees for more than 50 years, and this Jamboree will be no different, with activities based around the purpose built radio shack onsite.

The Amateur Radio activity at the Jamboree is being provided by the Fisher's Ghost Amateur Radio Club. Wal VK2ZWK tells me that they are providing several operating positions in the shack, as well as activities and passive displays around the shack.

The HF stations will operate around the JOTA frequencies. There will also be an IRLP node, number 6111, and APRS onsite. The FGARC has secured the magnificent callsign "VI 2 AJ 2010" for the duration of the event.
QSLs via the bureau.

As always, extra help would be appreciated. If you are able to help out either before the Jamboree, or during the Jamboree as a day worker, your assistance would be welcome. Anyone working during the Jamboree must be able to comply with the NSW working with children requirements, and prior registration is required. If you don't know how to contact FGARC, contact vk6pop@wia.org.au and I'll pass your enquiry on to Wal VK2ZWK.

WIA PRESIDENT MICHAEL OWEN VK3KI

Today, 2 news items.

The Australian of the Year Awards is a program of the National Australia Day Council, with state and territory selection committees selecting four finalists in each category, including the Senior Australian of the Year.

The awards recognise the individual's contribution to their community.

The South Australian Committee selected an amateur, Tony Hutchison VK5ZAI as one of the four South Australia finalists in the senior category for his work as one of the 9 approved Satellite Earth Stations for the Amateur Radio on the International Space Station (ARISS) program and as Australian ARISS Coordinator organising the link ups for schools to contact the amateurs on the International Space Station, stimulating the interest of young people in science and technology.

The national finalists were announced and the state finalists were presented at an impressive ceremony on the 11th November at the National Wine Centre in Adelaide in the presence of the Governor of South Australia and the Deputy Premier of South Australia.

While Maggie Beer of television fame went on as a national finalist the recognition of the contribution of amateur radio and of Tony to the community has delighted the WIA Board.

The WIA Board has accepted with regret the resignation of Robert Broomhead VK3KRB/VK3DN as Director of the WIA with effect from 31 December 2009.

Robert, who has served as Director of the WIA since 8 November 2004, advised the Board that he wished to resign after a 5 year commitment.

Robert has made a great contribution to the WIA, being responsible for the "corporate look" that has been adopted by the WIA, the IT side of our activities and is responsible for the incredibly successful Annual Meeting weekends that have become such a feature of the WIA. We are grateful that he will continue to assist the Centenary Committee, and, of course, we have accepted his offer to continue as Webmaster for the WIA website.

The Directors cannot adequately express their gratitude for all that Robert has done.

It falls to the WIA Board to appoint a Director for the balance of Robert's term, which ends at the AGM in 2011 and we are giving consideration to this.

HAMS ACROSS AUSTRALIA.

The Centre Victoria RadioFest No. 3 will be held in just 80 days

Interest is mounting about the biggest amateur radio event in Victoria. Major commercial traders have secured their Traders Hall bookings. Second-hand sellers also taking up trestle table or car-boot spaces.

Eager to be part of the Club Corner precinct are the centenary celebrating Wireless Institute of Australia, CW Operators' QRP Club, the Historical Radio Society of Australia and Royal Australian Signals Museum.

Other clubs and groups expected to take advantage of this excellent promotional display and membership recruitment opportunity.

The Mini-lecture program has a mystery presenter about the end of Amateur Radio, how it does not have a future because of the internet, email, mobile phone, Skype and social media.

On the same program, to provide a bit of balance, will be details of how a combined primary and secondary school is doing its bit to keep amateur alive.

Check out the website www.radiofest.amateurradio.com.au

It all sounds very interesting indeed. See you at the Centre Victoria RadioFest on Sunday the 14th of February, at the Kyneton racecourse just an hour from Melbourne, Ballarat and Bendigo.

I'm Bruce Lees VK3FFF and you're listening to VK1WIA.

VKR Roundup
http://www.police.qld.gov.au/News+and+Alerts/Media+Releases/

We heard Tony VK7AX make mention of last weeks WIA National News Broadcast in DAB+ , this just in from Geoff VK4ZPP of Gootchie.

"Congratulations to all those who responded to Graham, VK4Baker Baker's

call for members of the broadcast industry to get behind the WIA National News microphone. Further congratulations to Graham for organising what is probably a first, certainly for the Brisbane, VK4 area, the rebroadcast of the whole news on the 4TAB DAB+ channel.

The delegates to the President's Lunch with whom I have had a chance to

talk were impressed with the enthusiasm of the event. The participation

of delegates in the discussions were built upon by being able to individually raise issues of interest with the speakers. Not only that,

the represented Clubs were given copies of the new promotional posters and the centenary pin was available for purchase.

VK5
www.qsl.net/vk5bar/

The VK5TTY Packet BBS will scheduled to be decommissioned for operation on the 1st December 2009.

Due to changes and closures to the Adelaide Local Area Network (LAN) by SAPUG, VK5TTY will no longer be able to properly fulfil it's function in the South Australian Packet Network.

As a result, the club has decided to shutdown VK5TTY packet BBS.

It is a shame that the second longest serving Packet BBS's in Adelaide will no longer be operational, however, due to the decline in use and lack of interest in packet radio, they found it necessary for this decision.

This does not mean VK5TTY will be lost forever. The club has decided to convert the BBS over to an APRS Igate and Digipeater, meaning digital communications will still be operational from the site.

The club would like to thank all the users for their continued support and patronage over the 20 years of operation.

It was a great ride while it lasted and it's hoped that the BBS was a valuable service for the years it was operational

Best wishes and many thanks via WIA National News from all the SysOp's that have ever operated VK5TTY

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

INDONESIA TO LAUNCH RESCUE RADIO HAMSAT

The Bernama dot com on line newspaper reports that the Indonesian Amateur Radio Organization called Orari and the Indonesian National Institute of Aeronautic and Space plan to launch the ham radio bird next year.

According to the website, the new ham radio bird will be used to expand that nations ham radio communication network to remote districts. It went on to note that the satellite will play a major role in linking land, sea and air communication for rescue radio operations.

The article also noted that ham radio operators from Orari had become the alternative communication tool. This, during disasters like the tsunami in Aceh and the recent earthquake in Padang.

EUROPE HAS NEW PC FOR THE ELDERLY

A new desktop PC aimed at people aged over 60 who are unfamiliar with Personal Computers and the internet has been unveiled in the United Kingdom. Called Simplicity, the simplified desktop has only six buttons

directing users to basic tasks such as e-mail and chat.

The Simplicity computer has no log-in screen when it starts up, contains no drop-down menus and comes pre-loaded with 17 video tutorials. The operating system is a version of Linux that can be customized by users.

So far the SimplicITy computer system is only available in the Europe. According to the BBC story introducing it, more than 6 million

people in the UK over the age of 65 have never used the internet, according to British government figures.

If you're an American ham, chances are that your call sign was issued by the Federal Communications Commission.

A "no brainer," right?

Well if you're an American ham who happens to be stationed at Guantanamo Bay or at one of the US bases in the Antarctic, your call sign is not issued by the FCC -- it's issued by the base commander.

Guantanamo Bay uses the KG4 prefix, this block is reserved exclusively for American hams at "Gitmo".

As for Antarctica, the Antarctic Treaty signed in 1959 established the legal framework for the management of Antarctica, including allocation of amateur call signs. The National Science Foundation received their block on July 1, 1959.

US military hams in Japan and Korea are also issued special call signs:

OPERATIONAL NEWS -

ON AIR CONTEST COLUMN - D A T E L I N E 2009

NOV 28 - 29 VK SPRING VHF-UHF FIELD DAY
NOV 28 - 29 CQ WORLD WIDE CW

Westlakes Contest Coordinator Allan VK2JED has announced the winners from this years Westlakes Cup where logs submitted made this the best return to date.

Topping the count in the advanced class was VK4ZD.
While the Foundation class was won by VK2FSBB.

Congratulations to the winners as well as those who took part

Trophies have been sent and certificates are being prepared

Last month, after a gruelling selection process, the organizers of the 2010 World Radiosport Team Championships (WRTC) selected the 44 team leaders who will compete in the event next year.

These 44 team leaders, representing all six continents, have each chosen a partner.

The rules state that while the leader's partner may be from a different call sign area, they must be from the same country as the leader.

WRTC, held every few years, takes place during the 2010 IARU HF World Championships, July 10-11 and will be held just outside Moscow.

Two Radio Amateurs from the Canary Islands will represent Africa at the WRTC, team leader is well know DXer Juan Hidalgo from Las Palmas.

In 2006, at the event held in Brazil, Bernie van der Walt, ZS4TX, represented Africa. His team-mate was N2IC. They were placed 26th.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

ARKS

The date for the next ARK's Academy foundation course is Sat Feb 20 and Sunday Feb 21 2010, this course will be conducted at Nunnawading.

Please contact vk3ark@wia.org.au to register.

JOHN vk3ark asks "please note the date of this course has been changed so as not to clash with the Healsville Hamfest".

Registrations are also open for the Regulations Course which will be held over the weekend Sat 27th March and Sunday 28th March and for the Standard / Advanced Upgrade course over five Sundays April 25th May 2nd

may 9th May 16th With Exams May 23rd

ARK's Academy would also like to hear from any club or group of Amateurs who would like assistance with running education and training , and of course we are always looking for people willing to give of their time to assist new people into our hobby and to help those who wish to upgrade their licenses "

(John Fisher VK3DQ / VK3ARK)

Reg VK7KK, the REAST Learning Organiser lets us know about the next REAST Foundation training and assessment sessions.

The Training Sessions will be held on Monday 30th November, and Tuesday the 1st December with the Assessment session on Monday the 7th December.

All sessions will take place in the REAST Queen's Domain Clubrooms from 7pm to 10 pm.

Some participants may feel that they do not need to participate in the training programme, they would then just need to attend the assessment evening.

If there are candidates interested in Standard or Advanced assessments they should also enquire.

Reg can be contacted on 0417 391 607

>From Hong Kong Brett vr2bg has some disturbing news, it seems that here in VK La Trobe University has over-the-horizon radars in VK7 as well as ZL's Southland and they have been heard operating on the 20 & 30m amateur bands.

VR2BG went on to say "They put 600 watts into each of 16 ten-element log period yagis & are used to observe the southern auroral circle. The Tasmanian radar has been operational since 1999 & the New Zealand one since 2005.

NZART Monitoring System has reported hearing both the Australian & New Zealand radars in amateur bands, confirmed with the real time display of both, which is on the Internet. It is not known how long they have been operating in amateur service allocations contrary to licence conditions.

Since that report was filed Brett has notified us that "the relevant authorities had been approached by NZART & WIA, the New Zealand radar has QSYed to 13500 kHz & has not been seen operating elsewhere since. The Australian radar continues to indicate & has been heard from ZL transmitting in the 30m amateur band.

VK7YAD has Aurora BPL Papers Tabled in Parliament.

The following story comes from Greg VK7YAD who states one clear issue with the conduct of Aurora and the commercial Broadband over Power Line Trial, and it seems most of the other BPL participants is actually getting into the formal record, exactly what it was they got up to.

As a result of several years investigation and assessment, one aspect of the Aurora BPL project in Mt. Nelson has been documented and Tabled to the Parliament record. During the course of Parliament in Tasmania, Thursday 5th November, the set of complaint and evidence files raised under the

Fair Trading Act, referred to the Department of Justice on 31st March, were tabled formally into the records of the House of Assembly by the Hon. Kim Booth MHA.

Presently the Tabled Papers of such sessions, whilst available from the Parliament Library and accessible to the public are not currently available for on-line viewing, they will be eventually.

Now entered into the history of the State is a blow by blow, statement after statement, measurement after measurement, memo after memo, record of what it was that Aurora and the "Regulator" got up to in the course of the Broadband over Power Line Mt. Nelson commercial trial from mid 2005 until late 2008.

Regards, and enjoy the spectrum we have, others are not so lucky.
Greg, VK7YAD.

Ofcom - World Radiocommunication Conference 2012 issues

The UK regulator Ofcom has published a consultation on the issues to be covered during the World Radiocommunication Conference 2012 (WRC-12)

Among the questions in the consultation is:

Question 23: Should amateur radio be given an allocation in part of the band 415 - 526.5 kHz, and if so where?

Interesting reading indeed and available on the OFCOM website.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

Amateurs wishing to claim IOTA credit for October 2009 contacts with C91VM, whilst activating IOTA references AF-061, AF-066 and AF-088, should be aware that, in response to the operator's current published QSL policy, these three operations will not be accepted for IOTA accreditation.

Clarification is awaited from the operator that a policy change will be made immediately to the effect that payment of 5 US dollars is not obligatory and that cards sent direct with sufficient return postage will be answered direct in a timely fashion. A prompt amendment to the policy notice on QRZ.com is therefore required if accreditation is to be reconsidered.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO

EMERGENCY FREQUENCIES IARU REGION 3
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Global Simulated Emergency Test (GlobalSET)

This was held last Saturday 14 Nov and although no WIA station was advised to us at least one VK4 ham from the Sunshine Coast region was one of more than 200 stations taking part.

Here in VK it's said propagation was poor, but one station, maritime mobile of our coast proved a great "relay vessel".

The first GlobalSET was held in November 2006 and its participation has steadily grown since, due in part to the rules and procedures being available in the Dutch, English, French, German, Italian, Polish, Portuguese and Spanish languages.

GlobalSET provides an opportunity to demonstrate the provision of communications across national borders, test the emergency centre of activity frequencies, create practices for international emergency communications and the relaying of messages

SHE WHO MUST BE OBEYED

If you were thinking of saying 'Thank you' to your XYL for letting you play radio, how better to do it than by taking her out to lunch.

You can do this in the safe company of other amateurs all doing the same thing, or just plain celebrating, at the RIVERVIEW INN at Lower Sandy Bay on Saturday on the 12th. of December.

VK7's WICEN South group have booked the Inn for sole use so you are assured of pleasant company. Harmonics are welcome, as are non-licensed radio enthusiasts. Any amateurs visiting are equally invited.

RSVP to any WICEN South members, or Rod VK7TRF, on 0417 314 425

http://tas.wicen.org.au/

(Rod, VK7TRF)

REWIND - A LOOK BACK IN HISTORY
(Will McGhie VK6UU is WIA National Historian)

Bernie McCosker VK2XBF says the Taylor Centenary Re-enactment Trust on December 5 are holding a "First Flight Re-enactment."

"Taylors first flight in Australian aviation history."

George Taylor was before his time. He started the Aviation industry, the first radio telegraphy station, the WIA, became the first pilot, ran a competition to construct our first military aircraft, and was a "good bloke all round".

Commemorating his life with the centenary of his flight at Narrabeen on dec 5th at 9:59am.

GB2RS NEWS

Sunday 22nd November 2009

The news headlines

* Ofcom's World Radiocommunication Conference consultation

* Rowley Shears, G8KW, SK

* Presidential Installation Dinner to take place in Warrington

Ofcom has published a consultation on the issues to be covered during the World Radiocommunication Conference 2012. The purpose of the consultation is to seek views from those with an interest in the issues on the WRC-12 agenda. Among the questions in the consultation is Question 23: Should amateur radio be given an allocation in part of the band 415 to 526.5kHz and if so where? The consultation can be found at ww.ofcom.org.uk/consult/condocs/wrc_12.

The Society has learned with great sadness that Rowley Shears BEM, G8KW, passed away on Tuesday 17 November 2009. Responsible for re-introducing amateur radio into Germany after the second world war, he was perhaps best known for his KW range of amateur equipment from the 1950s to the 1970s. Through KW Electronics and the KW2000 transceiver, he was largely responsible for popularising SSB in the British amateur community. Rowley passed away peacefully at the ripe old age of 90.

The Presidential Installation Dinner will take place at the Daresbury Hotel in Warrington on 16 January 2010. Details are in the December RadCom. The Daresbury Hotel, Warrington is offering RSGB members the negotiated bedroom rate of £50 B & B for those wishing to stay on the night of the 16th. Members wishing to take up this offer will need to telephone 0844 980 2360, press Option 2 and quote Reference DE00762609. Details are also on the RSGB website.

The team of five GB2RS newsreaders in NW England have been given transceivers for 2m, 4m and 6m for use in transmitting the news. The radios have come from Graham, G1PYA, a regular listener to GB2RS. The five newsreaders, G4GSY, G0MRL, G0NAJ, M1NTO and M0HDE would like to record their very great thanks to Graham for this valuable gift, which is so clearly in the traditional spirit of amateur radio.

There are a few places left for any would-be radio constructors who would like to take part in the 3rd Bath Buildathon. The event is happening on Saturday 5 December and the project is the popular Walford Electronics Brendon 80m double sideband transceiver. The Buildathon coincides with the Bath Christmas Market, should you wish to make a family weekend of it. Further details can be had from Steve Hartley, G0FUW, who is QTHR and can be e-mailed using his callsign<at>tiscali.co.uk.

Voting in the RSGB 2009 elections is still open and both electronic and postal methods are available. It is being run by the Electoral Reform Society. There are four Board places to be filled and Region 8 also has an election for the Regional Representative position. Full details of all the candidates and how to vote are in the December RadCom and on the RSGB website at www.rsgb.org. RSGB Members have until noon on 10 December to register their vote and you must only use one method of voting.

2

Martin Lynch & Sons will be holding their annual Open Day on 5 December from 8am to 4pm. Sponsored by Yaesu, Icom and Kenwood, there will be a free hog roast and representatives from the main manufacturers on hand to chat about their products. This event leads up to the company's 20th year of trading.

The Next Foundation Course at the North Derbyshire Training and Exam Centre is due to start in mid January or early February. The Centre is at Clay Cross near Chesterfield. The course is held over eight evenings from 6.30 to 8.30pm, with refreshments included. Full details are on www.m0oct.com under the heading RAE Courses. Places are limited so call 01246 275 889 or e-mail exams@m0oct to book your place.

And now for the details of rallies and events for the coming week

Mayo Radio Experimenters in Ireland are holding their annual Radio Rally today, Sunday 22 November, in The Welcome Inn, Castlebar, Co Mayo. More information can be found on their website http://ei7mre.org/rally.htm.

Also today, 22 November, the Plymouth Radio Club Rally will take place at the Elm Community Centre, Leypark Walk, Estover, Plymouth PL6 8UE. There is plenty of car parking and the doors open at 10.15am for disabled visitors and 10.30am for other visitors. There will be trade stands and a Bring & Buy as well as suitable catering facilities.

On 29 November, the Bishop Auckland Radio Amateurs Club Rally will take place at the Spennymoor Leisure Centre, Co Durham DL16 6DB. There will be talk-in and plenty of car parking with the doors opening at 10.15 for disabled visitors and 10.30 for other visitors. Admission is £1.50 and under 14s may visit free of charge. Details from Mark, G0GFG, 01388 745 353.

These are the last rallies that we have details for in 2009. If you would like your 2010 rally mentioned in RadCom and on GB2RS, please send details to radcom<at>rsgb.org.uk.

Now for the news of special events

Members of Chorley & District Amateur Radio Society will be operating GB0LD celebrating Lancashire Day from the village of Hoghton in central Lancashire from Thursday 26 November to Sunday 29 November inclusive. The station will be operating on the HF bands dependent on propagation, with activity also planned on 2m and possibly 70cm. QSL will be via the bureau. More information can be found on QRZ.com.

Preston Amateur Radio Society is running special event station GB1LD on Friday 27 November from their HQ for Lancashire Day. For further details e-mail secretary<at>prestonars.co.uk.

Southport & District Amateur Radio Club will operate a special event station from the market town of Ormskirk, in the south of the county, between 8pm and 10pm on November 27 under the club's callsign GX2OA to celebrate Lancashire Day. They would like to encourage as many Lancastrian operators as possible to sign in during the event and make contact with the station. All stations making contact will receive a special QSL card in return. At 9pm, at the same times as many other events around the country, the Lancashire Day proclamation will be read out followed by the Toast to the Duke of Lancaster, HM The Queen.

3

And now the HF DX news compiled from 425 DX News and other sources.

3V3S will be on the air from Tunisia from 23 November to 2 December, including an entry in the CQWW Contest. QSL via DL9USA. More details at www.3V3S.tk.

Antarctica will see some amateur activity in the next few months. From the US base, KC4USV will be active, mainly on Sundays on 14.232MHz SSB, 14.070MHz PSK and 14.043MHZ CW. QSL via K1IED. He will be there until 20 February. From the Indian base listen out for AT10BP until March 2011. QSL via VU3MKE. On Adelaide Island, VP8DMH will on the air. The IOTA reference for this is AN-001. QSL via Mike's UK call of M0PRL.

The CQWW CW Contest on 28 and 29 November has many DX entries. Here are details of the ones we've heard about. 9J3A will be on the air from Zambia, QSL direct to S57S. KH6ZN will be active from Big Island in Hawaii. QSL as per details on qrz.com for N6TJ. HC8N will operate from Galapagos. QSL via W5UE. VK9XW will be on the air from Christmas Island. From Bermuda, KE0UI will be on as VP9I. QSL via N1HRA. Whilst on Koror Island until 10 December, T88CI will also take part in the contest. QSL via HA5AO.

Now the contest news

In the previous couple of GB2RS News broadcasts there has been an error in the timings of the UK Activity Contests. The remaining dates for

November and December are 50MHz on 24 November and 22 December between 2000 and 2230UTC. Then it's 144MHz on 1 December between 2000 and 2230UTC and 432MHz on 8 December from 2000 to 2230UTC. Later in December there is the 1.2 and 2.3GHz Activity Contest on 15 December between 2000 and 2230UTC and 70MHz on 29 December between 2000 and 2230UTC.

On 25 November, the 80 Club Sprint CW leg takes place between 2000 and 2130UTC. The exchange is serial number and name and there are two power levels allowed, 10 watts or 100 watts.

Without doubt November's biggest event of is the CQWW DX CW Contest, which takes place for the entire 48 hours of the weekend of 28&#65533;29 November. Rather like the CQWW SSB Contest that took place at the end of October, there will be a lot of DXpeditions, some by well-known operators from Britain. It starts at 0000 on 28th and finished as 2359 on 29th. The exchange is signal report and CQ Zone, which for the UK is 14.

Now the solar factual data for the period from the 9th to the 15th of November, compiled on 16th of November by Neil Clarke, G0CAS.

Only the 13th and the 14th saw the solar disc spotless. The remaining days only had single spots visible. The return of the active region from several weeks ago took place during the 14th. When it had rotated fully into view it became apparent that no sunspots were visible and only a plage region remained. Solar activity was very low. Solar flux levels increased slightly from 72 units on the 9th to 75 by the 14th. The average was 73. The 90 day solar flux average on the 15th was 72, that's one unit up on last week. X-ray flux levels remained below the minimum reporting level. Geomagnetic activity was quiet everyday. On the 10th, 11th and the 12th the Ap index was only one unit. The average was only Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 440 to a slow 270 kilometres per second by the 12th and the 13th. Particle densities were low throughout. Bz varied no more than minus 6 and plus 7 nanoTeslas for the period.

4

And finally the solar forecast. This week solar activity is expected to be very low. However, there is a slight chance that activity could increase to low with the possibility of a small C class solar flare taking place. Solar flux levels should be around the mid 70s. Other than the chance of a slight disturbance around midweek geomagnetic activity is expected to be at quiet levels. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. The darkness hour lows should be about 8MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 28MHz. The optimum working frequency with a 90 per cent success rate will be about 23MHz. The best time to try this path will be between 0900 and 1400 UTC.

And that's all for this week from the propagation team.

SARL NEWS - SUNDAY 22 NOVEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

SILENT KEY

It is with deep regret that the passing of John Hughes, K6MB, on 16 November, after suffering a stroke, is announced. Many South African contesters and DXers knew John. We extend our condolences to his family and many friends.

(PAUSE)

In the news today:

INTECNET RETURNS TONIGHT

GET AN EARLY CHRISTMAS PRESENT

ESSAY COMPETITION - CLOSING DATE EXTENDED

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

INTECNET RETURNS TONIGHT

This evening the SARL Intecnet returns after a few months' absence. The subject is "SO67 - SumbandilaSat," South Africa's second satellite. Presenting the subjects are Hannes Coetzee, ZS6BZP, who, with Andrew Roos, ZS6AA, were responsible for the amateur radio payload. Other participants are Jan-Albert Koekemoer, ZR1JAK, of Sunspace, who is the kingpin in the commissioning of the satellite and Allan Saul, ZS1LS, who has done extensive testing.

Intecnet is on the air at 19:30 CAT on a repeater near you. It will also be available on Echolink and web-casting by ZS6FCS. Check www.amateurradio.org.za/armi.htm for details.

GET AN EARLY CHRISTMAS PRESENT

If you are not a member of the SARL or you're membership expired more than 18 months ago, you can get yourself a Christmas present by becoming a member before 5 December at a half-year rate and get December free, as well as a copy of the November/December edition of Radio ZS.

This offer is not available to those whose membership fees were due on 1 July this year. If you fall in that category, pay the arrears now and make sure you get the next edition of Radio ZS.

Occasionally, one hears the question: "why should I join the SARL?"

The South African Radio League is the National Body of Amateur Radio in South Africa and a direct interface with the Department of Communication, The Independent Communication Authority of South Africa (ICASA) and other government- and non-governmental organisations. In everyday life many people belong to associations - some because the law requires it and others because the benefits accrue to their profession, sport or hobby. Here are three of many good reasons why a serious radio amateur should be a member of the National Body, the SARL:

(1) REPRESENTATION AT NATIONAL LEVEL The SARL represents all radio amateurs when dealing with the authorities to ensure that the amateur spectrum is protected. It is the number of members that gives the SARL the muscle to confer representatively.

(2) INTERNATIONAL REPRESENTATION The SARL is a member of the International Amateur Radio Union (IARU), who represents Radio Amateurs at the International Telecommunications Union (ITU) - the organisation that watches over the radio frequency spectrum allocation and usage. The IARU works constantly at World Radio Conferences behind the scenes to ensure that amateur allocations are protected and even expanded. The IARU derives its muscle from National Member Societies, such as the SARL, who have representation in their respective countries.

(3) KEEPING ABREAST OF THE LATEST TECHNOLOGY Through an interactive website, weekly news bulletins, Radio Technology-in-action symposia and a bi-monthly publication - Radio ZS - the SARL keeps Radio Amateurs abreast of new technologies.

Wouldn't it be great if you are part of the action and not just an onlooker? We are sure that if you look at the three reasons presented here, that you too should become a member. If you are already one, thank you for your support.

MEMBERSHIP FEES PAID INTO THE WRONG ACCOUNT

Mariska requests that the radio amateurs whose call signs are listed below contact her promptly at the NARC regarding their payments to the

SARL into the closed Standard Bank account, instead of the ABSA account. Mariska can be contacted at 011 675 2393 or e-mail to admin@sarl.org.za.

The following must please contact Mariska: ZS1ZU, ZS2AG, ZS2KW, ZS2-0273, ZS3G, ZS4NS, ZR5SEP, ZS5DCF, ZS5R, ZS5UA, ZR6APX, ZR6ARV, ZR6DG, ZR6NHA, ZS6BHE, ZS6BYQ, ZS6DGB, ZS6EU, ZS6IGR, ZS6KO, ZS6PHW, ZS6POT and ZS6TAF.

Mariska's contact details again: 011 675 2393 or e-mail to admin@sarl.org.za.

NOMINATIONS FOR THE SARL COUNCIL

This is a reminder that nominations close on 30 November. Is your area represented? It is now the time to take action.

ESSAY COMPETITION CLOSING DATE EXTENDED

The closing date for the Space Essay competition for learners has been postponed until 15 January 2010 to give students, who spent the past two months writing exams, more time to complete the essay. In the meantime, the list of prizes has grown. Visit www.amateurradio.org.za for more details.

HAMNET WESTERN CAPE

It has been decided, as of 25 November 2009, to change the Wednesday evening bulletin back to the summer time of 20:30 CAT. David, ZS1DDK, provides a relay on 80 m, on 3 760 kHz, and reports that the bands are opening later now. This means any distant stations listening on 3 760 kHz at 19:30 CAT, will find the band still closed and not hear it at all. The bulletin is open to all those interested in Emergency Communications in Southern Africa, and there are regularly call-ins from ZS2, ZS3, ZS4, ZS5, ZS6 and V51. Please call in on 3 760 kHz, and join Hamnet Western Cape on Wednesday evenings.

CONTEST NEWS

PEARS hosts two contests each year. The annual PEARS HF Contest will take place on Sunday 6 December from 14:00 to 18:00 CAT on 40 and 80 metres. The PEARS National VHF/UHF contest will be held from 15 - 17 January 2010. More detail in future bulletins.

The Antique Wireless Association HF QSO Party. The contest committee has released the results of the Antique Wireless Association HF QSO party held on 10 and 11 October 2009.

AM 1st Jan Botha, ZS4JAN, with 213 points; 2nd Don Radford, ZS5DR, 195; and 3rd Marius Preston, ZS4MP, 56 points.

SSB 1st Jan Botha, ZS4JAN, 354 with points; 2nd Rob Cohen, ZS5LA, 168; 3rd Marius Preston, ZS4MP, with 131.

Thanks to all who entered the QSO party and made it a great weekend. Certificates will be mailed to the winners shortly.

The ZS6JVT 40 m HF Contest. The competition drew a lot of support, but very few, only ten, log sheets were received, one was used as a check log and one was disqualified.

The results are: ZS/ZR GROUP 1st Andrew Mans, ZR3AM (20 years), with167 points; 2nd Mitchell Mynhardt, ZS6YH (12 years), 29; 3rd Phillip Cronje, ZS6JPC (16 years), 52 and 4th Tiaan van Eeden, ZS6TVE (16 years), and Wessels Welgens, ZR6WEW (16 years), 38 points.

ZU Group 1st Hugo Coetzee, ZU3H (15 years), 97; 2nd Ruan Maritz, ZU3R, (16 years), 62, and 3rd Jean-Pierre Coetzee, ZU6PJ (9 years), 58 points.

Congratulations and thanks to all the youngsters who participated. The certificates will be mailed shortly. Mr. Chris Steinman, the principal of the John Vorster Technical High School, drew the name of the winner for the lucky draw. Congratulations to Mitchell Mynhardt, ZS6YH, whose name was drawn. The prize will be mailed soon. The motto of ZS6JVT is fittingly: "Youth striving for high quality technological advance".

CLUB NEWS

The West Rand Amateur Radio Club is hosting its next flea market at 12:00 on Saturday 5 December 2009 at the clubhouse in Kroton Street, Weltevredenpark, Roodepoort. Everyone is very welcome. For more information, contact Willem at 082 890 6775.

The Port Elizabeth Amateur Radio Society (PEARS) is presenting a raffle for an ICOM IC718. This draw is open to all licensed Amateurs and they invite members of other clubs to join in the fun. Tickets are R50 each and can be ordered from Clive, ZS2RT, on 041 367 3203 or at cfife@absamail.co.za. There are still tickets available, so reserve yours now. The draw will take place on 18 December and the winner announced on Sunday, 20 December. Someone WILL have a new HF rig for Christmas. Remember tickets are a meagre R50.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. Fortunately, two sunspots made their appearance during the week.

15 and 20 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings, it will be moderate towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New Zealand and Australia will be challenging. During the afternoons and evenings, 15 and 20 m contacts may be possible with Brazil.

Local conditions will be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the

shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is also becoming very useful for contacts over the longer distances. 80 m is the frequency of choice in the evenings. Please visit www.spaceweather.co.za for further information.

To end SARL News today - IT'S ALL GREEK TO ME

Ask any high school physics student and they will tell you that electrons govern pretty much everything we do. We call electrons in motion an electrical current, and those radio waves that we radio amateurs are so fond of, are the result of high frequency electrons travelling in our antenna conductors. Think of a 40 metre wave as an accidental tourist who wants to go somewhere. But how does it get there? It needs some mode of transport - and electrons serve as the transport providers.

We use our transmitters to resonate electrons in our antennas to-and-fro to produce radio waves - and transmit them - hopefully to that rare DX destination. When the radio waves get there, they set electrons in another antenna in motion. That current - electrons in motion - is then amplified and detected at the receiving end - a QSO is achieved.

But, why do we call them electrons? The ancient Greeks noticed that amber attracted small objects when rubbed with fur. Apart from lightning, this phenomenon is thought to be man's earliest known experience of electricity. Back in the year 1600, the English physicist William Gilbert - in his thesis De Magnete - coined the new Latin term 'electricus' to refer to this property of attracting small objects after being rubbed. Both 'electric' and 'electricity' are derived from the Latin. (From an ARRL letter.)

DIARY OF EVENTS

Tonight at 19:30 CAT - Intechnet with SumbandilaSat as subject; 30 November - closing date for SARL Council member nominations; 5 December - West Rand Flea market; 6 December - PEARS HF Contest; 18 December - closing date for PEARS raffle; 15 January 2010 - closing date for essay competition; and 15 - 17 January 2010 - PEARS VHF/UHF Contest.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

/EX
Sentech sponsors the ARMI transmissions on the non-amateur frequencies.
You have listened to a bulletin of the South African Radio League,
compiled by Dennis, ZS4BS. The editor was Jannie, ZR6PHD.

Thank you for listening, 73.
/EX

>From The Business Manager Debby Morgan ZL2TDM
NZART HQ Office Hours
As from 1 December 2009, NZART headquarters office hours will be from 9am to 4:30pm Tuesday, Wednesday and Thursday each week. It will NOT be open Monday's and Friday's however if urgent a simple call to the office will advise my cell phone details, so you contact me.

Remits
It is time again for branches to consider any remits they wish Council to consider for the AGM in 2010.
Could all branch secretaries please send these in writing, either by post or e-mail before the 31st December 2009.

Final call for 2010 subscriptions at the reduced rate.
If you wish to take advantage of the $10 discount applicable to your NZART subscription, please forward your payment on or before the end of this month.

Talk soon...Debby ZL2TDM
****
New Web-Page Antennas & Planning

A new web-page can be found on the NZART Web-Site at:
http://www.nzart.org.nz/anten-plan/index.html

Antennas and Planning contains information relating to local authority planning and how it affects amateur radio antenna installations.

The current issues are

a) Wellington City District Plan Change No 74

Submissions have been made and further submissions close on 4 December.

A proforma further submission will appear on the web-site in a day or so, and all amateurs, whether NZART members or not, are invited to make a further submission.

You can use the proforma or write your own further submission.

b) Proposed Taurange District Plan

Submissions close on 15 December. A summary will be published and further submissions will then be invited.

Remember -- these are the only opportunities we get to persuade the Councils to meet our reasonable needs, so that antenna installations can be erected as permitted uses, and without the problems that can occur with overly restrictive planning rules and vexatious neighbours.

Visit these pages often to keep abreast of ongoing planning developments.

For further information email mnewman@nzart.org.nz
****
Updates from NZART Monitoring Service Coordinator

VU2UR B.L. Manohar was not re-elected recently for Region 3 Monitoring Service Coordinator.

He has been replaced by Peter Young, VK3MV Australia E-mail: spy4@tpg.com.au

By the way were you aware that New Zealand actually had OTHR (Over The Horizon Radar) transmitter sites?

They are part of the SuperDarn system which includes the Unwin A and B systems from New Zealand.

73 de ZL1GWE Monitoring Service Coordinator NZART
****
NZART World Wide Web

URLs Changes
>From Q-Bit for November 2009, the Newsletter of the Wellington VHF Group NZART Branch 74, comes the following, found at the bottom of page 4:

"REMIT 2
THAT, the FMTAG Coordination Procedure be amended to enable public scrutiny of applications by use of modem technology, such as notice via NZART website, and public response via email.

Explanation: The purpose of this remit is to overcome the frustration caused by the delay of notice due to the two-month cycle of Break-In magazine."

With the activity increase expected for the Antennas and Planning, The NZART Monitoring Service and the possible change in use of the FMTAG pages, it was time to bring about a change to the NZART Web pages, related to these three items, as they had been tucked away under a general folder 'nz'.

Effective immediately the following URLs have changed:

Local Government has now been renamed to ANTENNAS AND PLANNING

Antennas & Planning is at http://www.nzart.org.nz/anten-plan/index.html
(was http://www.nzart.org.nz/nz/locgvt.html)

FMTAG is at http://www.nzart.org.nz/fmtag/index.html
(was http://www.nzart.org.nz/nz/fmtag.html)

MS (Monitoring Service) is at http://www.nzart.org.nz/ms/index.html
(was http://www.nzart.org.nz/nz/ms.html)

The data is stored in a folder, below the main folder, with a name of the current year. For example, the October 2009 FMTAG Notes,would have an address of:
http://www.nzart.org.nz/fmtag/2009/oct.html, when the notes were given the name of 'oct.html'.

A redirection has been made on the original address as have the files for each address.

Progress Report on Transferring the NZART Web and E-mail Services to NZ
The physical position of the NZ server is Lower Hutt, not that it matters where it is located in NZ. The web is up and running and has been checked and tested successfully for some months now.

Getting e-mail successfully running has been the cause of the delay in transferring the service over, but progress is being made.

The NZART member e-mail alias service is still up and running on the USA server and is offered for any current or future member to join. Use e-mails NZART.HQ@NZART.ORG.NZ, WEBMASTER@NZART.ORG.NZ or ZL2NN@NZART.ORG.NZ to request to join the service.

HF Contests

KIWI DIGITAL KIWI DIGITAL GROUPS ï¿½ TWIN SPRINT DIGITAL CONTEST
When :- Saturday. 5 December 2009
Times :- 0800 UTC until 0900 UTC (2000 NZDT until 2100 NZDT)
Band :- 80m
Modes :- PSK31 - 0800 until 0830
RTTY - 0830 until 0900
Sprint/Contest Rules and other Operating Information - refer to Manawatu
Branch Website - http://zl2ko.org.nz

2010 JOCK WHITE MEMORIAL FIELD DAY CONTEST
When:- Saturday, 27th February 2010 and Sunday 28th February 2010
Times :- Saturday 1500 NZDT until 2400 NZDT and
Sunday 0600 NZDT until 1500 NZDT
Updated Contest Rules and Other Operating Information will be available from
the NZART Website prior to the commencement of the contest .
NZART Website http://www.nzart.org.nz/contests

2010 ARRL INTERNATIONAL CW CONTEST
When : - Saturday, 20 February 2010 and Sunday, 21 February 2010
Times :- 0000 UTC (20th) until 2400 UTC (21st).
Bands :- All Bands
Mode:- CW Only
Contest Rules and Other Operating Information are available from the ARRL
Website,
http://www/arrl.org
A good contest as is the later SSB Contest (March 6&7) to garner those
missing US States for the elusive Worked All States award.

2010 ARRL INTERNATIONAL PHONE CONTEST
When :- Saturday, 6 March 2010 and Sunday, 7 March 2010
Times:- 0000 UTC (6th) until 2400 UTC (7th)
Bands :- All Bands
Mode :- Phone Only
For Contest Rules and other Operating Information please refer to the
Contest

Website - http://www.arrl.org/contests

2010 RSBG COMMONWEALTH CONTEST (BERU)
When :- 13 & 14 March 2010
Times :- 1000 UTC (Sat.) until 1000 UTC (Sun.)
Bands :- All Bands
Mode :- CW Only
Considered to be one of the more gentlemany contests that has been in existence since the mid-1930's. Apart from the individual performances there is a Team's event, based on individual nation's participation. The NZART Team under the astute leadership of Frank Hunt, ZL2BR won this event in 2007 and finished third last year. Frank is looking for Team participants to make up the NZ Team. Interested - contact Frank by "snail mail" at :- 8 Manu Crescent, New Plymouth. 4310., or email :-
zl2br@ihug.co.nz
Contest Rules and other operating information is now available from the Contest
website :- http://www.hfcc.org/hfcc/rule/2009/beru.shtml

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

(Adapted, with permission, from the original article written by Mark Salyzyn, AG4YD, ex-VE6MGS.)

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1M, K1XN & GoList, NJ1Q, NO2R, K3IRV, N3SL, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, K8YSE, KE0UI, AT International, CO8TW, DJ7IK, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, JG7PSJ, OZ1JTE, PA1WLB, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK4FW and VU2PTT for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th-November, through Sunday, 22nd-November there were 220 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4W, 4X, 5B, 5H, 5N, 5R, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FK/c, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9X, VP2M, VP2V, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3V, TUNISIA (Update). Just a reminder/update that a German team will operate from the "Radio Club Station of Tunisian Scouts" (3V8SS) in Sousse, using the special callsign 3V3S between November 23rd and December 2nd. Operators mentioned are: Andy/DJ7IK, Jan/DJ8NK, Guenter/DJ9CB, Andreas/DL9USA and Lars/DF1LON. Also, operators Halim and Ashraf (from

the 3V8SS station) will join the German team. The team will set up and use a spiderbeam and verticals antennas. All antennas will be donated to the 3V8SS station. Look for them to also participate in the CQWW DX CW Contest (November 28-29th) as a Multi-Single/Low-Power entry. QSL via DL9USA. A Web page will be active soon at: http://www.3V3S.tk

5P15, DENMARK (Special Event/IOTA). Look for special event station 5P15COP from Zealand Island (EU-029) to be active between December 7-18th. Activity is taking place during the big United Nations "Copenhagen Climate Change Conference" <http://www.cop15.dk>. Operators would like to "invite all radio amateurs worldwide to show their concern and care about the environment and climate, by contacting this special event station." Operations will be on 160-6 meters using CW, SSB and the Digital modes. QSL via OZ5BAL, direct or by the Bureau. For more details about the project, QSL card and awards available, please visit: http://at www.5p15cop.dk

A2, BOTSWANA. Just a reminder that Mike, K9NW, will be active as A25NW between November 23rd and December 1st. Activity will include the CQWW DX CW Contest (November 28-29th). QSL via his home callsign (QRZ.com).

A7, QATAR. Operators Ali/A71BX, Juma/A71EM and David/K5GN will be active as A73A during the CQWW DX CW Contest (November 28-29th) as a Multi-Op/ All-Bands/Single-Transmitter entry. Operations will be from A71BX's QTH. QSL via EA7FTR.

AH2, GUAM. Members of the Guam Contest Club will be active as AH2R from Tumon (OC-026, USI GU003S, WLOTA L-0064) during the CQWW DX CW Contest (November 28-29th) as a Multi-Single entry. Operators mentioned are: Toshinobu/JI3ERV, Mikiawa/JR7OMD, Kazunori/JK3GAD, and Nozomu/JE8KKX. QSL via JH7QXJ.

C4, CYPRUS. Marios, 5B4WN, will be active as C4W during the CQWW DX CW Contest (November 28-29th) as Single-Op/All-Band entry. QSL is via the LoTW. QSLs via the Bureau are also available via the "self-QSL" button on: http://www.5b4wn.com

CO/CM, CUBA. Look for the following Cuban stations to be active in the CQWW DX CW Contest (November 28-29th):
CO8LY - Operator Eduardo as a Single-Op/Single-Band (15m)/Low-Power. QSL via EA7ADH.
CM8CAD - Operator Carlos as a Single-Op/Single-Band (40m)/Low-Power. QSL via info QRZ.com.
CO8TW - Operator Juan as a Single-Op/Single-Band (160m)/Low-Power. QSL via HB9SVT.

CN, MOROCCO. Stefano, IK2QEI, will be active as CN3A from Safi during the CQWW DX CW Contest (November 28-29th) as a Single-Op entry. He states that he will possibly be a "SOAB" if the new 80m system is ready for the contest. QSL via LoTW or via I2WIJ.

CQ MAGAZINE'S "DIAMOND JUBILEE WAZ AWARD" (#002 issued). Congratulations to James "Scotty" Scott, WK3N, of Hartstown, PA, for receiving the 2nd

75th anniversary limited-term "Diamond Jubilee WAZ" award. He submitted valid and proper confirmations of contacts with each of the 40 CQ WAZ zones to earn this special certificate. For complete details on the "Diamond Jubilee WAZ Award ", check out CQ's October 2009 issue, or visit the CQ Web site at: http://www.cq-amateur-radio.com

D6, COMOROS. Reports indicate that Serge, F6AML, who was expected to be active as D68F this past week, had to cancel his operation due to the political situation in D6-land. It was also reported that Serge apparently had all of his equipment confiscated and has returned to France.

DU, PHILIPPINES. By the time you read this, Gerard, F2JD, who was active as DU1/G0SHN will be back in France (around November 20th). OPDX was told that Gerarde was not very active while in Manilla (around 300 QSOs) due to a high noise level. He is expected to be back in the Philippines sometime in February and plans to get another antenna for his multiple activities while he travels the neighboring islands. His log is available at: http://LesNouvellesDX.fr/voirlogs.php

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (160m) entry. However, due to business commitment, Nodir will only be active during the first 24 hours of the contest. QSL K1BV via direct, by the Bureau or LoTW.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands (include topband). He has announced that he will be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band entry. QSL via F8BPN, direct, by the bureau, LotW.

FO/A, AUSTRAL ISLANDS. German operators Wulf/DL1AWI, Peter/DL3APO and Mat/DL5XU will be active as FO/homecall from Raivavae Island (OC-114, DIFO FO-122, WLOTA L-2581) in the Austral Islands group between January 18th and February 5th. Their focus will be mainly the lower bands 160-30 meters, but will work some higher bands on SSB and RTTY. QSL via their home callsigns, direct or by the Bureau.

IOTA NEWS.....
AS-105. Kang, DS2AGH, and a group of operators will be active as 6M0HZ/2 from Kanghwa Island during the CQWW DX CW Contest (November 28-29th). QSL via DS2AGH.

J3, GRENADA (NA-024). Operators Colin/G3VCQ and Sharon/M3VCQ will once again be active as J38CW and J38SW from Beru between March 11-25th. Activity will be on all HF bands and modes. All QSLs are via G3VCQ, direct or by the bureau.

J6, ST. LUCIA. Bill, K9HZ, will once again be active as J68HZ from Labrelotte Bay, Castries, St. Lucia (NA-108, WLOTA L-1336) between now and December 5th. Activity will be on 80/40/20 meters using CW and SSB. Suggested frequencies are: CW - 3550, 7050 and 14050 kHz
SSB - 3770, 7155 and 14155 kHz
He also mentions to watch 40 meters between 2000-2400z daily. Operations

from other local islands are possible. QSL via his home callsign.

J6, ST. LUCIA. Scott, NE1RD, will be active as J6/homecall between February 2-10th (2010). Activity will be on all HF bands and modes. QSL via his home callsign, direct or by the Bureau. Logs will be uploaded to LoTW.

J6, ST. LUCIA. Members of the "Buddies in the Caribbean" DXpedition group which specializes in 100 watt or less low power radios and the Buddipole portable antenna system is off again to a new DXpedition site on February 2-11th, 2010. This is an annual effort to demonstrate "ultra-lite" DXpeditioning into magnificent "vista" locations, operate a field portable battery-only radio with backpackable, lightweight antennas and most of all "have fun!" The nine operators from eight states will have fixed operations from a cliff-top villa and portable operations from various points on the island using CW, SSB, and the Digital modes. Operators mentioned are: Budd/W3FF, Chris/W6HFP, Scott/NE1RD, Dan/WZ1P, Steve/WG0AT, Mike/KC4VG, Guy/N7UN, Paul/KB9AVO and Wey/K8EAB. Licensing is not yet complete, but each operator is expected to receive their own callsign. QSL via LoTW, eQSL, or mail to operator's home callsign (SASE required). For more details, see:
http://sites.google.com/site/caribbeanbuddies/home
http://caribbeanbuddies.blogspot.com/

J8, ST. VINCENT. George, K2CM, will be active from the Island of Bequia, in The Grenadines (NA-025), between January 8th and February 12th (2010). Callsign was not provided. Activity will be on 20 meters using CW and SSB, and maybe 40 meters CW. QSL by the Bureau or direct (SASE/SAE) to K2CM.

JD1/O, OGASAWARA. OPDX was informed by Harry/JG7PSJ that Makoto/JI5RPT and he will once again be active from Chichijima Island (AS-031) between Sunday, December 27th, and Friday, January 1st (2010). Their callsigns will be JD1BLY (JI5RPT) and JD1BMH(JG7PSJ). Activity will be on all bands 160-10 meters using CW, SSB and RTTY. QSL via the Bureau to the JD1 callsigns or direct to their home callsigns. For more info, visit their Web pages at: http://www.ji5rpt.com/jd1
http://sapphire.es.tohoku.ac.jp/jd1bmh

KH6BZF PROPAGATION FORECAST/REPORT (For November 23-22nd)....
Nov 23 AN SOLAR REFERENCE
Nov 24 AN ---------------
Nov 25 AN AN - Above Normal/Geomagnetic Level is QUIET
Nov 26 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Nov 27 AN LN - Low Normal
Nov 28 AN
Nov 29 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

MJ0, JERSEY. Mat, F5SHQ, will be active as MJ0ASP during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (80m) entry. QSL via F5SHQ.

NP4, PUERTO RICO. Felipe, NP4Z, will be active during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/High-Power entry. QSL via WC4E. PLEASE NOTE: He may also use KP3Z as the callsign.

OFFICERS FOR 2009-2010. The following persons have been elected to committee the Oceania Amateur Radio DX Group Inc. for 2009/2010:
President : Bill Horner/VK4FW
Vice President : John Mcrae/VK5PO
Secretary/Treasurer : Eric Fittock/VK4NEF
Directors : Elvira Simoncini/IV3FSG
Mill Reiff/LX1CC
Chris Chapman/VK3QB
Eddie DeYoung/VK4AN
Web Master : John Mcrae/VK5PO
QSL Manager : Bill Horner/VK4FW

PB500, THE NETHERLANDS (Special Event). Look for special event station PB500GT to be active between November 28th and December 13th. Activity is to celebrate the 500th anniversary of the "GREAT TOWER of BREDA" (in Dutch Grote Toren). Operators will operate at a height of 65m from the Great Toren. This Great Tower is located in the middle of the city. Operations will be on 80/40/20/2 meters using SSB and the Digital modes. QSL Manager is Willem, PA1WLB. For more details about the tower, see: http://www.torenbreda.nl
Also, look under PB500GT on QRZ.com.

QSL INFO AND NEWS.....
GA2MP QSL/LOG STATUS. QSL Manager Steve, N3SL, reports: "The special event callsign, GA2MP, will be retired on November 30th. Current logs are in LoTW as of November 19th. QSLs are on order but will not be in-hand before the December 31st cutoff for DXCC. If anyone needs a card for their 2009 DXCC submission, N3SL can fill your request using a GS2MP card. Simply indicate that with your QSL. Those who already have sent an SASE, please E-mail N3SL at <n3sl@arrl.net> with a request to confirm using the GS2MP card. All others will be answered when the new cards arrive."

NEW QSL ROUTE FOR ZW5UN AND PT5UN. Irv, K3IRV, informs that he is now the QSL Manager for both ZW5UN and PT5UN. The QSL Manager was Oms, PP5EG. Since Irv was the QSL Manager for PP5EG, he talked to Oms and now he will also have the logs and cards for those two callsigns.

QSLS VIA LOTW: 7Q7AA, D2BB, PY1ZBA and S04R

QSLS RECEIVED VIA MAIL: 5H1EE, 5V7SE, 8R1DB, 8R1TO, 9G5ZZ, 9M6/JJ2CJB, 9Y4D, A61BK, A73A, BD9TD, C31CT, DX1J, EA9LZ, EK7DX, FK8GM, FO/G3BJ, FS/K1XM, GP0STH, J28JA, TK9X, VK9LA, WP3C, YI1RZ, ZK2NX and ZL7/N7OU

QSLS RECEIVED VIA THE BUREAU: 3X5A, 5J0A, 5L2MS, 7Q7CE, 8R1XR, 9Y4W, FJ/DJ2VO, J5UAP, and V73PX

S2, BANGLADESH (IOTA DXpedition). Operators Tutul/S21RC, Manjurul/S21AM, Sohel/S21S and Aminul/S21D are preparing a DXpedition in February 2010 to St. Martin's Island (AS-127) located in Chittagong Region Group. Dates mentioned are February 21-25th. QSL Manager will be EB7DX. More details will be forthcoming.

ST, SUDAN. Robert, S53R, will be active as ST2KSS from Khartoum during the CQWW DX CW Contest (November 28-29th) as a Single-Op/Single-Band (15m) entry. QSL via ST2M or by his instructions.

ST26, SUDAN. Look for the special callsign ST26ASC to be used between January 22ï¿½28th (2010). This activity coincides with the 26th Arab Scouts Conference from Khartoum, Sudan. No other details were provided. QSL Manager will be ST2M.

TF, ICELAND (On the Birds!). Ari, TF3ARI, has been worked on AO-51! Ari first appeared on AO-51 on October 24th, using a TS2000 and just a vertical antenna. John, K8YSE, reports that he has E-mailed Ari and learned he has now installed a UHF preamp (so he can hear better). Since North America is always near the horizon for him, his vertical antenna and preamp work well (Not many trees in Iceland!). Watch for Ari on early morning weekend passes on AO-51. John states that Ari will be on again during most Sunday mornings.

TI5, COSTA RICA. Phil, N0KE, will be active as TI5/N0KE starting November 25th. QSL via his home callsign. He also plans to be active as TI5N during the CQWW DX CW Contest (November 28-29th) as Single-Band (15m) entry. QSL via W3HNK or LoTW.

TJ, CAMEROON. Lionel, F5PSA, currently active as TJ3SL, will be here until around December 15th. His activity has been sporadic, but he is trying to be active daily, propagation permitting. Operations have been mainly 20 and 17 meters usually between 0930-1700z. QSL via F5PSA.

TM2, FRANCE. Look for TM2S to be used in the CQWW DX CW (October 28-29th) as a Multi-Single entry. QSL via F5PED. Operators mentioned are: Matt/ F5PED, Dany/F5CW, Bruno/F5AGB, Michel/F5IN, Emmanuel/F5NCU, Maurice/F5NQL, Serge/F6DZS and possibly Breton/F5QF.

TO4/FG, GUADELOUPE. Serge, F6AUS, will continue be active as FG/F6AUS until Match (2010). Look for him to be in the CQWW DX CW Contest (November 28-29th) as TO4D. He plans to be active on 160-6 meters. Over the past weekend Serge was on 80/40/30 meters CW. QSL via his home callsign.

TO5, MARTINIQUE (NA-107). Al, F5VHJ, will be active as TO5A during the ARRL DX SSB Contest (March 6-7th, 2010) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ, direct or by the Bureau. Logs will be uploaded to LoTW.

TX3, CHESTERFIELD ISLAND.. Operators George/AA7JV and Tomi/HA7RY continue to be active as TX3A until December 6th. As of print time, their log shows just under 27k QSOs. Activity has be on all HF bands but with an emphasis on the lower bands. Modes used have been on CW, SSB and RTTY. QSL via HA7RY. For more detailed information and updates, visit their Web page at:

http://www.TX3A.com

V3, BELIZE. Alex, KU1CW, will be active as V31CW between November 23rd and December 2nd. His wife Natasha, KD0AKI, will also be active as V31YL. Alex is also expected to be in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or direct to KU1CW.

V3, BELIZE. Wil, PA0WWV, will be active as V31WV from Sarteneja (northern Belize) between now and December 20th. Activity will be on CW and SSB using a FT1000mp MarkV w/amp at 750 watts. His antenna is a 30 ft. vertical close to the beach. QSL direct only with 2 USDs plus SAE (NO IRCs).

VP2M, MONTSERRAT. Mike, W1USN, will once again be active as VP2MPR between February 28th and March 13th (2010). Mike will work mainly SSB and PSK31. Bob, AA1M, will also return to Montserrat and will operate mostly CW as VP2MPL between March 6-11th. QSL both operators via their home callsigns.

VP9, BERMUDA (Update). Bob, KE0UI, will be active from here between November 25th and December 1st, and will operate as VP9I in the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Low-Power entry. QSL via N1HRA. For details about the station and QSL route, visit: http://vp9ge.com/vp9i.htm
Bob will operate as VP9/KE0UI before and after the contest on 160-10 meters with an emphasis on the 30/17/12 meter bands. QSL VP9/KE0UI via his home callsign.

VU, INDIA (News). OPDX was informed by Prasad, VU2PTT, that Gopal Madhavan, VU2GMN, who is the President of ARSI - the IARU recognized national organization of India, is reporting he spoke with the "Wireless Planning & Coordination Wing (WPC), India's Ministry of Communications and Inform-ation Technology Department of Telecommunications, and they have confirmed that the extra bandwidth (on 40m) has been officially released to VU radio amateurs based on the petitions given by ARSI on April 15, 2009, soon after the band was to be released as per agreement in WRC2003. VU hams can now officially use that extra bandwidth. Gopal also mentioned, "They have also confirmed that the other requests made by ARSI regarding 10 MHz and 50 MHz are also under consideration, so please wait for further news."

VU2, INDIA. Prasad, VU2PTT, will be active during the CQWW DX CW Contest (November 29-30th) as a Single-Op/All-Band/High-Power entry (or possibly a Single-Op/Single-Band [80m] entry). Entry depends on whether his beam will get fixed in time for the contest, or else he will do a full SOSB 80m running 400W to Inverted-L. QSL via the LoTW or direct using the info on QRZ.com.

XU7, CAMBODIA (Update). Last week we mentioned that Peter, NO2R, will once again be active as XU7ACY from Sihanouk Ville during the CQWW DX CW Contest (November 28-29th) as a Single-Op/All-Band/Lower-Power entry. He informs OPDX that he will be there for another year or more. Look for him to be active on all bands using CW and SSB. QSL via W2EN.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 22nd November 2009

AREN EMERGENCY NET

As a result of the ongoing threat from severe weather events, Aren has been regularly activating their net on 3.660 mHz. plus or minus the QRM. All stations are welcome to call into the net, whether or not you have participated in Aren activities before, but please wait until requested.

The net control station will indicate when you should call. Some 2 metre repeaters may also be used by AREN as and when the need arises. Stations are asked to keep clear of frequencies that are been used for emergency traffic and to offer assistance when they are in a position to do so.

Galway VHF Group 24 hour Radio Operation from RNLI Stations

The final operation from the Galway VHF Group will take place from Clifden Lifeboat Station, Ballyconneely, over the weekend of the 28th and 29th of November. The callsign will be EI 185 RNLI

All operation will take place on the HF bands with two stations in operation at all times. There will be operation on Phone and Digital Modes with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed. Varying types of antenna construction will be used including a Kite antenna for the LF bands.

Kish Lighthouse Activation

Daniel EI9FHB should be active from the Kish lighthouse from Sunday 22nd of November until Wednesday 9th of December. The Kish lighthouse is located about 10 miles

east of Dun Laoghaire and marks a sandbank on the route to Wales. The lighthouse was built in 1965 and is undergoing a major overhaul of power systems and navigational aids.

Daniel will be operational on HF voice and 2M & 70cm FM. Operating will be mainly on Sundays and after 7pm other days. The worked all Ireland frequencies will be used where possible.

Cashota-Ireland (castles and stately homes on air)

The Cashota-Ireland website may be found at http://cashota-ireland.org

Full details of how to activate castles or stately homes and also how to apply for awards may be found at the CASHOTA-Ireland website. To date only 3 castles have been activated in Ireland since the launch of Cashota-Ireland last January. Only 25 castles need be activated or worked in EI/GI to qualify for the Cashota-Ireland award. Castles worked or activated may also count towards the Cashota-UK award where a total of 50 are required to qualify.

To date very little interest has been shown in this award. From January 2010 members of the Galway VHF Group will be activating castles on a more regular basis. For those interested in activating or working castles do take a look as the Cashota-Ireland website at http://cashota-ireland.org . Further details may also be obtained from EI5DD at QTHR

Easter Island XR0Y

The XR0Y team completed their expedition last weekend with over 22,000 QSO's confirmed in the log,

Well done to the 24 EI stations that made it through the Hugh pile ups. Top of the EI List was Eoin Fagan EI9O & Fr Niall Foley EI4CF who worked Easter Island XR0Y on 4 bands.

Happy 35th Birthday to AO-7 Amateur Satellite.

Over the past week birthday celebrations have been in place to celebrate the 35th anniversary of Alpha Oscar 7, the Amateur Radio Satellite, which had reached its orbit 35 years ago.

Launched in November 1974 from Vandenberg Air Force Base, California U.S.A this Satellite is very fond amongst Amateur and SWL stations alike. To date AO-7 has completed over 160.000 orbits of the Earth.

In 1981 it was thought the batteries had short-circuited and AO-7 was off the air. After a QRT period of 21 years its 2m beacon was heard again in 2002. Since then AO-7 is active, but a little whimsical switching to one if its 4 modes during each orbit. Working solely on direct power to its Solar Panels, hence it is not possible to hear or work in periods of darknes.

AMSAT the Radio Amateur Satellite Corporation is currently involved in testing its new generation of Satellites, and involved with ground stations on the Commissioning of its new addition to the fleet SO-67 which should be complete from its commissioning period in the near future.

More information to follow on this when available.

International Space Station & Space Shuttle Atlantis

The STS-129 mission will focus on storing spare hardware on the exterior of the station. The 11-day flight will include three space walks and the installation of two platforms to the station's truss, or backbone. The platforms will hold spare parts to sustain station operations after the shuttles are retired. This equipment is large and can only be transported using the unique capability of the shuttle.

Atlantis is also carrying additional Amateur Radio antennas for the International Space Station (ISS).

Astronauts will install and deploy the antennas during the second space walk of STS-129. The radio team will monitor the space walk activity via a NASA real-time teleconference call.

The mission also will return station crewmember Nicole Stott to Earth and is slated to be the final space shuttle crew rotation flight.

Industry News

Rowley Shears G8KW who established KW Electronics passed away on Tuesday November 17 at the age of 90

Those Radio Amateurs who joined the hobby in the 1950's or 60's will be familiar with the range of Amateur rigs that KW Electronics produced at the Vanguard Works in Dartford, Kent. During this period KW Electronics was the UK's leading Amateur Radio manufacturer.

The 1960's saw the widespread adoption of Single Sideband and for many Radio Amateurs their first SSB radio was a KW. Even after the company stopped manufacturing in the 1970's KW equipment remained popular on the second-hand stands at rallies.

Rowley G8KW will be fondly remembered by users of rigs such as the KW Vanguard, KW Valiant, KW Viceroy, KW Vespa, and KW 2000.

Yaesu Heritage Year 2010 - GS2MP

During 2010, Jim GM0NAI and Chris GM3WOJ/ZL1CT will be putting a collection of vintage Yaesu rigs on the air from Inverness in Scotland.

Precise details of the event starting in January 2010 are still being worked out - please check for the latest information on

http://www.gm7v.com/yaesu2010.htm

Dundalk Amateur Radio Society

The DAR Group have added yet again another interesting link to their website, This enables to view on your PC Monitor live Aircraft Traffic.

For more information please visit www.ei7dar.com click on the Look Aircraft ADS-B link for more information.

The next meeting of the Society is at 8.30pm Wednesday 2nd December at our clubhouse in Dundalk, all are welcome to attend.

Shannon Basin Radio Club AGM

The Shannon Basin Radio Club will hold its AGM on Friday 11th Dec at 20.30 in Hannons Hotel, Roscommon.

All members are asked to attend and new members are always welcome. Festive Refreshments will be available on the night.

South Dublin Radio Club

This year's South Dublin Radio Club Christmas Party will take place on Tuesday the 15th of December.

The venue will be the same as last year, "The Morgue", Tempelogue Village from 8.00 pm until late.

Members of other clubs and visitors are as usual very welcome to this social event. Limited free food will be available for paid-up members; visitors can choose from the bar menu until 9.00 pm.

Rallies / Events

Dxpedition and IOTA Talk by Declan Craig EI6FR

The Mayo Club has organised Declan Craig EI6FR to give a talk the evening before the Mayo Radio Rally, Saturday 21st November.

Sunday 22nd November 2009 Mayo Radio Rally Venue: Welcome Inn, Castlebar, Co. Mayo

The rally organiser and main contact is Padraic Baynes EI9JA mobile 087 - 695 7154 or email pbaynes1 at eircom dot net Special Accommodation Rates are also available please check the full details on the www.ei7mre.org website

For more information on Rallies please check the IRTS website.

Items mentioned in the IRTS Radio news are of a general, educational or informative nature, there is no guarantee that stations mentioned can be heard or worked

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to
&#65533;charlie dot Carolan at gmail dot com&#65533; Or by phone to 087-6265418 News can also be submitted via e-mail to &#65533;newsteam at irts dot ie&#65533; for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday&#65533;s bulletin.

Please can someone tell me which group to post this in? This looked like the
right one but I've not seen much beyond bulletins that no-one replies to, and
a single discussion about a sloped antenna. If I can't get an answer by
following protocol, I might start thinking of ingenious ways to break it.

Try the rec.radio.amateur.antennas newsgroup. Continued posting in this
group is annoying for those wishing to read the bulletins. You should
find many folks in the antennas group familiar with the impedance
matching of Beverage antennas. I hope this helps.

"rec.radio.amateur.antennas" apparently doesn't exist. That's according to Giganews as accessed via BT in the UK too. They access more groups than pretty much anyone, so somethings wrong there..

Try "rec.radio.amateur.antenna"/ The added "s" was accidental.
```

Ok, thanks, that exists. Wasn't named in the monthly Posting Guidelines post I just read though, which is why I didn't know of it. Also, according to that post, this group is for "Amateur (ham) radio and related matters" so my post

should be fine here (misc means a lot more than bulletins). It has more to do with the firm selling radio stuff than the stuff itself, and their apparent want not to do business even with people who send on-topic and polite emails at infrequent intervals. That's strange, so I want help with that from someone who HAS done business with them, or knows something about why they refuse to answer a normal sales inquiry. I'll wait for answers here rather than post in another group, at least for now.

[Original message]
Hello, I'm after an antenna matching transformer from http://www.iceradioproducts.com and being in the UK, I need to ask them for shipping costs, and whether they take PayPal, as these are crucial matters for arranging international transactions with different currencies. They provide an email address, 'sales at TheirDomain.com' (Did that because I don't want web-archive spiders and Google-gropers to find that and spam it to hell). I've sent three polite, short requests to that email over the last 8 days or so and can't raise a response! Odd given that they supposedly want business. Can anyone reach them personally for me? Or perhaps point me to a UK supplier of what I'm after?

What I want is their 'Beverage' matching transformer 180A, or perhaps 183A for greater range at the longer wavelength end, (down to 100 KHz or so). I'm also trying to find John Doty's plans for winding my own, but the only mail addresses I've found for him so far have gone the way of the Norwegian Blue. John Doty says that the 180A is so good it makes good sense to buy it anyway, but right now I'm not at all sure I ever will without help.

==> ARRL HEADQUARTERS CLOSED FOR THANKSGIVING HOLIDAYS

ARRL Headquarters will be closed November 26 and 27 in observance of
Thanksgiving. There will be no W1AW bulletins or code practice
transmissions those days <http://www.arrl.org/w1aw.html#w1awsked>. This
edition of The ARRL Letter is being published a day early on Wednesday,
November 25, but there will be no ARRL Audio News
<http://www.arrl.org/arrlletter/audio/> on Thursday, November 26. ARRL
Headquarters will reopen Monday, November 30 at 8 AM Eastern Standard
Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> ARRL LEADERSHIP: NEW VICE DIRECTORS IN CENTRAL, ROANOKE DIVISIONS

On Friday, November 20, ARRL staff members started opening ballots
for the Vice Director races in the Central and Roanoke Divisions. After
all the ballots were counted, both the Central and Roanoke Divisions
gained new Vice Directors, with their three-year terms beginning at
noon on January 1, 2010.

In the Central Division, challenger Kermit Carlson, W9XA, of Batavia,
Illinois, edged out incumbent Howard S. Huntington, K9KM, of Hawthorn
Woods, Illinois; Huntington has served as the Central Division's
```

second-in-command since 1983. Carlson received 1808 votes, while Huntington received 1466 votes.

Roanoke Division Vice Director Patricia Hensley, N4ROS, decided not to seek another term. South Carolina Section Manager Jim Boehner, N2ZZ, of Aiken, and former West Virginia Section Manager Hal Turley, W8HC, of Huntington, were both nominated to succeed her. Boehner won the election with 1692 votes; Turley received 1496 votes. Read more here <http://www.arrl.org/news/stories/2009/11/20/11212/?nc=1>.

==> ARRL FIELD ORGANIZATION: INCUMBENT SECTION MANAGERS WIN NEW TERMS OF OFFICE

Three incumbent Section Managers were re-elected in races that concluded on Tuesday, November 24. In Alabama, Jay Isbell, KA4KUN, received 513 votes; challenger Les Rayburn, N1LF, received 167 votes. Isbell, of Bessemer, will begin his second term as Section Manager on January 1, 2010. In the Alaska Section Manager election, Jim Larsen, AL7FS, of Anchorage, won his second two-year term of office when he received 176 votes; challenger David Stevens, KL7EB, received 65 votes. Ron Cowan, KB0DTI, of LaCygne, Kansas, will continue as Section Manager; he received 382 votes while challenger Joseph Plankinton, WD0DMV, received 175 votes. Cowan has been the Kansas Section Manager since 2003. The following incumbent ARRL Section Managers did not face opposition and were declared elected for their next terms of office beginning January 1, 2010: Jim Latham, AF6AQ (East Bay); Frank Filipkowski, AD3M (Delaware); Dale Williams, WA8EFK (Michigan); Don Wood, W5FHA (New Mexico); Glen Clayton, W4BDB (Tennessee); Robert Griffin, K6YR (Santa Barbara), and Ed Emco, W1KT (Western Massachusetts).

==> REGULATORY: FCC LOOKS TO REVISE, CLARIFY VANITY CALL SIGN RULES

On Wednesday, November 25, the FCC issued a Notice of Proposed Rule Making (NPRM) -- WT Docket No. 09-209 -- seeking to amend the Commission's Amateur Radio Service rules to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations.

According to the FCC, almost 80,000 licensees have replaced their sequentially issued Amateur Radio call signs with a vanity call sign since the program began in 1996. When the program began, the Commission established what they called "the broad outlines" of the vanity call sign system, concluding that call signs generally should not be available for reassignment for two years following the death of a licensee, or expiration or termination of the license for that call sign. In doing so, the Commission made exceptions for former holders of the call sign, close relatives of a deceased former holder and club stations of which a deceased former holder was a member.

The Commission did not, however, specify all of the procedures governing the vanity call sign system, but indicated that the

procedures "would be set out in the Public Notices announcing 'starting gates' for the groups receiving initial priority and that the procedures would be adjusted from gate to gate as experience dictated." The procedures announced in the Public Notices announcing the gates are still in effect, but they are not set forth in the Commission's Rules. The NPRM states that the FCC "now believe[s] that certain provisions should be codified in our rules, and others added, so that the vanity call sign system will be fair, equitable and transparent to all amateur service licensees. The Commission also decided in the Vanity Report and Order [issued in 1996] to resume issuing new club station licenses. We believe that certain rule changes to the club station licensing rules may be appropriate."

The comment period for WT Docket No. 09-209 will extend for 60 days after it is published in the Federal Register. Historically, items appear in the Federal Register approximately 7-10 days after they appear on the FCC Web site. Reply comments can be made up to 75 days after publication in the Federal Register. Read more here <http://www.arrl.org/news/stories/2009/11/25/11220/?nc=1>.

==> SILENT KEY: ARRL SWEEPSTAKES MANAGER KEN ADAMS, K5KA (SK)

Ken Adams, K5KA, succumbed to cancer and passed away on Sunday, November 22. He was 64. Adams -- an ARRL Life Member -- served as the first-ever Contest Manager for the ARRL Sweepstakes, coming on board in 2005. "Ken was a 'get it done' kinda guy," recalled ARRL Contest Branch Manager Sean Kutzko, KX9X. "He took on the task of Sweepstakes Manager with great enthusiasm, rolled up his sleeves and championed the event like nobody else I've ever seen." Read more here <http://www.arrl.org/news/stories/2009/11/23/11213/?nc=1>.

==> AMATEUR RADIO AND TECHNOLOGY : ARRL, MCSNYDER SOFTWARE TEAM UP TO PROVIDE ITUNES APPS

ARRL is pleased to announce the availability of a new suite of Amateur Radio mobile software -- designed specifically for use with the Apple's iPhone and iPod Touch. The applications -- or "apps" -- are named ARRL Technician
<http://phobos.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=304482342&mt=8>,
ARRL General
<http://phobos.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=306443425&mt=8>
and ARRL Extra
<http://phobos.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=306931606&mt=8>
and function as an electronic version of practice exam flash cards. Amateur Radio exam candidates can use the applications as a study companion to the ARRL license manuals <http://www.arrl.org/catalog/lm/> and classroom instruction. The apps include all the possible questions and answers that will be on each of the license tests. Users can flag questions that need more review,

segment questions for study by sub-element, or even study the questions in a random order. The ARRL apps are produced and sold by McSnyder Software who has partnered with ARRL to provide the iPhone app series. McSnyder has also produced study applications for other organizations -- including exam preparation software for standardized educational testing in Texas, as well as US Citizenship immigration testing. "We are excited to introduce Amateur Radio and ARRL into the rapidly expanding mobile and portable technology arena," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "Not only do these applications demonstrate ARRL's commitment to users of these popular devices, the software helps promote Amateur Radio outside of our traditional publication channels." The ARRL apps are available for $1.99 each on Apple's iTunes "App Store."

==> NOW YOU KNOW!: THE ARRL LAB

By ARRL News Editor S. Khrystyne Keane, K1SFA

The hams who work in the ARRL Lab -- Ed Hare, W1RFI; Mike Gruber, W1MG; Zack Lau, W1VT, and Bob Allison, WB1GCM -- receive more than 100 calls each week, requesting assistance. I know that whenever I venture into the Lab, rife with deep, dark secrets of the Amateur Radio world, one, if not all four of these guys are either on the phone or on the computer, answering questions posed to them by members.

One afternoon, I wandered down to the Lab, and asked Zack, Mike and Bob, "What is the most common question you guys receive from our members?" Zack quickly answered: "They want to know what kind of radio to buy." Now, no one here at League Headquarters can tell you which radio to buy, but Zack explained to me how he walks through a question set with the caller: What do you want to do with the radio? Do you want to get on HF, or are you interested in emergency communications or just ragchewing on your local repeater? How much room do you have to set up a station? How much money is in your budget for a new rig? Once the caller answers these questions, Zack guides them toward certain classes of radios, giving the caller a narrower field to look at. He also suggests that they take a look at the ARRL online publication, Choosing a Ham Radio <http://www.arrl.org/members-only/choosingaradio/>, as well as the Technical Information Service (TIS <http://www.arrl.org/tis/>) section on the ARRL Web site.

The next most popular questions (in order) are:

- What kind of antenna should I get?
- When are the sunspots coming back?
- Why can't I get on HF?

So, even if you're an experienced ham who has seen just about everything, or if you just got your Technician license in the mail (or, like me, you're somewhere in between), and you have a technical question that you just can't seem to figure out the answer to, try calling on the ARRL Lab -- they just might be able to help you figure

it out. Now you know!

==> SOLAR UPDATE

Tad "That its mild light creates to heal again
<http://englishhistory.net/keats/poetry/woman.htmlhttp:/englishhistory.net/keats/poetry/woman.html>"
Cook, K7RA, reports: This edition of the Solar Update will be brief. Since ARRL Headquarters is closed on Thanksgiving Day and the day after, I hope to have another bulletin out Monday morning to catch up with the sunspot, solar flux and geomagnetic data information. In last Friday's Solar Update <http://www.arrl.org/news/stories/2009/11/20/11208/?nc=1>, we reported sunspot numbers for November 12-18 as 11, 0, 0, 11, 12, 0 and 29. Since then, from November 19-24, they were 30, 31, 14, 13, 0 and 0 -- definitely nice conditions for the ARRL SSB Sweepstakes last weekend. This weekend, November 28-29, is the CQ Worldwide CW DX Contest. Although recent activity seems a good trend, we have no indications when sunspots will return. Look for more information in the Solar Update, available on the ARRL Web site on Monday, November 30. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' Woman! When I Behold Thee Flippant, Vain... <http://englishhistory.net/keats/poetry/woman.html>

==> AMATEUR RADIO IN SPACE: NEW ANTENNAS INSTALLED ON ISS

<http://www.youtube.com/watch?v=TjWqN3fVQ0w> On Saturday, November 21, astronauts Mike Foreman and Randy Bresnik completed the second EVA (extra-vehicular activity) -- NASA's term for a spacewalk -- of their mission. While on the 6 hour, 8 minute EVA, Foreman installed the Amateur Radio on the International Space Station (ARISS <http://www.rac.ca/ariss/oindex.htm>) antennas for 2 meters and 70 cm on the Columbus module. NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, told the ARRL that this new antenna -- along with another VHF antenna -- was developed by ARISS in cooperation with the European Space Agency (ESA <http://www.esa.int/esaCP/index.html>) to support an experiment involving the maritime Automatic Identification System (AIS <http://en.wikipedia.org/wiki/Automatic_Identification_System>). "Both antennas were installed on the Earth-facing starboard edge of the Columbus module," he explained. "The AIS antenna is forward and the ARISS antenna is aft. The ARISS team is planning to migrate some stowed Amateur Radio gear to take advantage of the new antenna." Frequencies available for transmission to and from Columbus will be 2 meters, 70 centimeters and 13 cm. To start, two radios for 2 meters and 70 cm that don't see much use on the ISS will be moved and installed in Columbus . The space shuttle Discovery is expected to return to Earth on Friday, November 27 and will bring Nicole Stott, KE5GJN, back from her stay on the ISS.

==> THIS WEEK ON THE RADIO

This week, look for an NCCC Sprint on November 27. The CQ Worldwide DX Contest (CW) is November 28-29. Next week, the ARRL 160 Meter Contest <http://www.arrl.org/contests/rules/2009/160-meters.html> is December 4-6 and the ARRL International EME Competition <http://www.arrl.org/contests/rules/2009/eme.html> is December 5-6. The TARA RTTY Melee and the Wake-Up! QRP Sprint are December 5. The TOPS Activity Contest is December 5-6, the ARS Spartan Sprint is December 8 and the NAQCC Straight Key/Bug Sprint is December 9. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, December 27, 2009, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, January 8, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

RAC Bulletin 2009-037E Alberta/NWT/Nunavut Director Elected

It is with pleasure to report that in keeping with the
Constitution of the Radio Amateurs of Canada (RAC) Section
7, Article 6, and because Earle W. Smith, VE6NM withdrew
from the race after the deadline, Mr. J. T. (Mitch) Mitchell,
VE6OH is declared elected as the RAC Director representing
Alberta/Northwest Territories/ Nunavut for the term
January 2010-December 2011. Mr. Mitchell can be contacted
via email ve6oh@rac.ca.

G. Linda Friars, VE9GLF
Corporate Secretary - Radio Amateurs of Canada

RAC Bulletin 2009-038E: New Section Manager for Maritimes
2009-11-26

RAC SECTION MANAGER ELECTION RESULTS

Congratulations to Jim Langille VE1JBL who was recently
re-elected Maritime's Section Manager for a two year term of
office that will begin on March 1, 2010. He ran unopposed
eliminating the need for a balloted election. Thanks Jim for
your continued support and effort in the Maritime's Section.

Thanks

Doug Mercer
Vice-President - Field Services Radio Amateurs of Canada

> CHANGING OF THE GUARD: FAMED INVENTOR LOUIS KING PASSES AWAY
>
> Louis Arthur King, the well known founder of Kintronic Labs, passed
> away on Sunday morning, November 1st.
>
> Considered to be one of the nations finest consulting engineers, Louis
> King started his engineering career as a professor in the electrical
> engineering department at Clemson College, now Clemson University.
> That's where he instituted the teaching of radio engineering courses.
> He later went on to help design the first air-cooled 50 kilowatt AM

> transmitter at RCA and received the patent for the bistable
> multi-vibrator, better known as the flip-flop circuit.
>
> In 1949 he obtained his Professional Engineering license in Tennessee
> and Virginia and began a broadcast consulting business. This venture
> grew into what is now Kintronic Labs, which is the maker of AM
> broadcast antenna systems and components.
>
> Louis King was recognized by the National Association of Broadcasters
> in 2007 as the recipient of the NAB Lifetime Radio Engineering
> Achievement Award. Later that same year, King College honored him with
> an honorary Doctor of Laws Degree at their first winter commencement.
>
> At the time of his death Louis Arthur King was 94 years of age. (CGC,
> RW)

>>
>> ==> REGULATORY: FCC LOOKS TO REVISE, CLARIFY VANITY CALL SIGN RULES
>>
>> ? ?On Wednesday, November 25, the FCC issued a Notice of Proposed Rule
>> Making (NPRM) -- WT Docket No. 09-209 -- seeking to amend the
>> Commission's Amateur Radio Service rules to clarify certain rules and
>> codify existing procedures governing the vanity call sign system, as
>> well as revise certain rules applicable to club stations.
>>
>> According to the FCC, almost 80,000 licensees have replaced their
>> sequentially issued Amateur Radio call signs with a vanity call sign
>> since the program began in 1996. When the program began, the Commission
>> established what they called "the broad outlines" of the vanity call

>> sign system, concluding that call signs generally should not be
>> available for reassignment for two years following the death of a
>> licensee, or expiration or termination of the license for that call
>> sign. In doing so, the Commission made exceptions for former holders of
>> the call sign, close relatives of a deceased former holder and club
>> stations of which a deceased former holder was a member.
>>
>> The Commission did not, however, specify all of the procedures
>> governing the vanity call sign system, but indicated that the
>> procedures "would be set out in the Public Notices announcing 'starting
>> gates' for the groups receiving initial priority and that the
>> procedures would be adjusted from gate to gate as experience dictated."
>> The procedures announced in the Public Notices announcing the gates are
>> still in effect, but they are not set forth in the Commission's Rules.
>> The NPRM states that the FCC "now believe[s] that certain provisions
>> should be codified in our rules, and others added, so that the vanity
>> call sign system will be fair, equitable and transparent to all amateur
>> service licensees. The Commission also decided in the Vanity Report and
>> Order [issued in 1996] to resume issuing new club station licenses. We
>> believe that certain rule changes to the club station licensing rules
>> may be appropriate."
>>
>> The comment period for WT Docket No. 09-209 will extend for 60 days
>> after it is published in the Federal Register. Historically, items
>> appear in the Federal Register approximately 7-10 days after they
>> appear on the FCC Web site. Reply comments can be made up to 75 days
>> after publication in the Federal Register. Read more here
>> <http://www.arrl.org/news/stories/2009/11/25/11220/?nc=1>.
>>
>> ==> SILENT KEY: ARRL SWEEPSTAKES MANAGER KEN ADAMS, K5KA (SK)
>>
>> ? ?Ken Adams, K5KA, succumbed to cancer and passed away on Sunday,
>> November 22. He was 64. Adams -- an ARRL Life Member -- served as the
>> first-ever Contest Manager for the ARRL Sweepstakes, coming on board in
>> 2005. "Ken was a 'get it done' kinda guy," recalled ARRL Contest Branch
>> Manager Sean Kutzko, KX9X. "He took on the task of Sweepstakes Manager
>> with great enthusiasm, rolled up his sleeves and championed the event
>> like nobody else I've ever seen." Read more here

>> <http://phobos.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=304...
>> mt=8>,
>> ARRL General

>> <http://phobos.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=306...
>> mt=8>
>> and ARRL Extra
>> <http://phobos.apple.com/WebObjects/MZStore.woa/wa/viewSoftware?id=306...
>> mt=8>
>> and function as an electronic version of practice exam flash cards.
>> Amateur Radio exam candidates can use the applications as a study
>> companion to the ?ARRL license manuals
>> <http://www.arrl.org/catalog/lm/> and classroom instruction. The apps
>> include all the possible questions and answers that will be on each of
>> the license tests. Users can flag questions that need more review,
>> segment questions for study by sub-element, or even study the questions
>> in a random order. The ARRL apps are produced and sold by McSnyder
>> Software who has partnered with ARRL to provide the iPhone app series.
>> McSnyder has also produced study applications for other organizations
>> -- including exam preparation software for standardized educational
>> testing in Texas, as well as US Citizenship immigration testing. "We
>> are excited to introduce Amateur Radio and ARRL into the rapidly
>> expanding mobile and portable technology arena," said ARRL Marketing
>> Manager Bob Inderbitzen, NQ1R. "Not only do these applications
>> demonstrate ARRL's commitment to users of these popular devices, the
>> software helps promote Amateur Radio outside of our traditional
>> publication channels." The ARRL apps are available for $1.99 each on
>> Apple's iTunes "App Store."
>>
>> ==> NOW YOU KNOW!: THE ARRL LAB
>>
>> By ARRL News Editor S. Khrystyne Keane, K1SFA
>>
>> The hams who work in the ARRL Lab -- Ed Hare, W1RFI; Mike Gruber, W1MG;
>> Zack Lau, W1VT, and Bob Allison, WB1GCM -- receive more than 100 calls
>> each week, requesting assistance. I know that whenever I venture into
>> the Lab, rife with deep, dark secrets of the Amateur Radio world, one,
>> if not all four of these guys are either on the phone or on the
>> computer, answering questions posed to them by members.
>>
>> ? ?One afternoon, I wandered down to the Lab, and asked Zack, Mike and
>> Bob, "What is the most common question you guys receive from our
>> members?" Zack quickly answered: "They want to know what kind of radio
>> to buy." Now, no one here at League Headquarters can tell you which
>> radio to buy, but Zack explained to me how he walks through a question
>> set with the caller: What do you want to do with the radio? Do you want
>> to get on HF, or are you interested in emergency communications or just
>> ragchewing on your local repeater? How much room do you have to set up
>> a station? How much money is in your budget for a new rig? Once the
>> caller answers these questions, Zack guides them toward certain classes
>> of radios, giving the caller a narrower field to look at. He also
>> suggests that they take a look at the ARRL online publication, Choosing
>> a Ham Radio <http://www.arrl.org/members-only/choosingaradio/>, as well
>> as the Technical Information Service (TIS <http://www.arrl.org/tis/>)

>> section on the ARRL Web site.
>>
>> The next most popular questions (in order) are:
>>
>> - What kind of antenna should I get?
>> - When are the sunspots coming back?
>> - Why can't I get on HF?
>>
>> So, even if you're an experienced ham who has seen just about
>> everything, or if you just got your Technician license in the mail (or,
>> like me, you're somewhere in between), and you have a technical
>> question that you just can't seem to figure out the answer to, try
>> calling on the ARRL Lab -- they just might be able to help you figure
>> it out. Now you know!
>>
>> ==> SOLAR UPDATE
>>
>> ? ?Tad "That its mild light creates to heal again
>> <http://englishhistory.net/keats/poetry/woman.htmlhttp:/englishhistory...
>> ats/poetry/woman.html>"
>> Cook, K7RA, reports: This edition of the Solar Update will be brief.
>> Since ARRL Headquarters is closed on Thanksgiving Day and the day
>> after, I hope to have another bulletin out Monday morning to catch up
>> with the sunspot, solar flux and geomagnetic data information. In last
>> Friday's Solar Update
>> <http://www.arrl.org/news/stories/2009/11/20/11208/?nc=1>, we reported
>> sunspot numbers for November 12-18 as 11, 0, 0, 11, 12, 0 and 29. Since
>> then, from November 19-24, they were 30, 31, 14, 13, 0 and 0 --
>> definitely nice conditions for the ARRL SSB Sweepstakes last weekend.
>> This weekend, November 28-29, is the CQ Worldwide CW DX Contest.
>> Although recent activity seems a good trend, we have no indications
>> when sunspots will return. Look for more information in the Solar
>> Update, available on the ARRL Web site on Monday, November 30. For more
>> information concerning radio propagation, visit the ARRL Technical
>> Information Service Propagation page
>> <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad
>> Cookism" brought to you by John Keats' Woman! When I Behold Thee
>> Flippant, Vain... <http://englishhistory.net/keats/poetry/woman.html>
>>
>> ==> AMATEUR RADIO IN SPACE: NEW ANTENNAS INSTALLED ON ISS
>>
>> ?<http://www.youtube.com/watch?v=TjWqN3fVQ0w> ? ? ? On Saturday, November
>> 21, astronauts Mike Foreman and Randy Bresnik completed the second EVA
>> (extra-vehicular activity) -- NASA's term for a spacewalk -- of their
>> mission. While on the 6 hour, 8 minute EVA, Foreman installed the
>> Amateur Radio on the International Space Station (ARISS
>> <http://www.rac.ca/ariss/oindex.htm>) antennas for 2 meters and 70 cm
>> on the Columbus module. NASA ISS Ham Radio Project Engineer Kenneth
>> Ransom, N5VHO, told the ARRL that this new antenna -- along with
>> another VHF antenna -- was developed by ARISS in cooperation with the

>> European Space Agency (ESA <http://www.esa.int/esaCP/index.html>) to
>> support an experiment involving the maritime Automatic Identification
>> System (AIS
>> <http://en.wikipedia.org/wiki/Automatic_Identification_System>). "Both
>> antennas were installed on the Earth-facing starboard edge of the
>> Columbus module," he explained. "The AIS antenna is forward and the
>> ARISS antenna is aft. The ARISS team is planning to migrate some stowed
>> Amateur Radio gear to take advantage of the new antenna." Frequencies
>> available for transmission to and from Columbus will be 2 meters, 70
>> centimeters and 13 cm. To start, two radios for 2 meters and 70 cm that
>> don't see much use on the ISS will be moved and installed in Columbus .
>> The space shuttle Discovery is expected to return to Earth on Friday,
>> November 27 and will bring Nicole Stott, KE5GJN, back from her stay on
>> the ISS.
>>
>> ==> THIS WEEK ON THE RADIO
>>
>> This week, look for an NCCC Sprint on November 27. The CQ Worldwide DX
>> Contest (CW) is November 28-29. Next week, the ARRL 160 Meter Contest
>> <http://www.arrl.org/contests/rules/2009/160-meters.html> is December
>> 4-6 and the ARRL International EME Competition
>> <http://www.arrl.org/contests/rules/2009/eme.html> is December 5-6. The
>> TARA RTTY Melee and the Wake-Up! QRP Sprint are December 5. The TOPS
>> Activity Contest is December 5-6, the ARS Spartan Sprint is December 8
>> and the NAQCC Straight Key/Bug Sprint is December 9. All dates, unless
>> otherwise stated, are UTC. See the ARRL Contest Branch page
>> <http://www.arrl.org/contests/>, the ARRL Contest Update
>> <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar
>> <http://www.hornucopia.com/contestcal/index.html> for more info.

>> <http://www.arrl.org/arrlletter/audio/> on Thursday, November 26. ARRL
>> Headquarters will reopen Monday, November 30 at 8 AM Eastern Standard
>> Time. We wish everyone a safe and bountiful Thanksgiving holiday.
>>
>> ==> ARRL LEADERSHIP: NEW VICE DIRECTORS IN CENTRAL, ROANOKE DIVISIONS
>>
>> ? ?On Friday, November 20, ARRL staff members started opening ballots
>> for the Vice Director races in the Central and Roanoke Divisions. After

>> all the ballots were counted, both the Central and Roanoke Divisions
>> gained new Vice Directors, with their three-year terms beginning at
>> noon on January 1, 2010.
>>
>> In the Central Division, challenger Kermit Carlson, W9XA, of Batavia,
>> Illinois, edged out incumbent Howard S. Huntington, K9KM, of Hawthorn
>> Woods, Illinois; Huntington has served as the Central Division's
>> second-in-command since 1983. Carlson received 1808 votes, while
>> Huntington received 1466 votes.
>>
>> ? ?Roanoke Division Vice Director Patricia Hensley, N4ROS, decided not
>> to seek another term. South Carolina Section Manager Jim Boehner, N2ZZ,
>> of Aiken, and former West Virginia Section Manager Hal Turley, W8HC, of
>> Huntington, were both nominated to succeed her. Boehner won the
>> election with 1692 votes; Turley received 1496 votes. Read more here
>> <http://www.arrl.org/news/stories/2009/11/20/11212/?nc=1>.
>>
>> ==> ARRL FIELD ORGANIZATION: INCUMBENT SECTION MANAGERS WIN NEW TERMS
>> OF OFFICE
>>
>> Three incumbent Section Managers were re-elected in races that
>> concluded on Tuesday, November 24. In Alabama, Jay Isbell, KA4KUN,
>> received 513 votes; challenger Les Rayburn, N1LF, received 167 votes.
>> Isbell, of Bessemer, will begin his second term as Section Manager on
>> January 1, 2010. In the Alaska Section Manager election, Jim Larsen,
>> AL7FS, of Anchorage, won his second two-year term of office when he
>> received 176 votes; challenger David Stevens, KL7EB, received 65 votes.
>> Ron Cowan, KB0DTI, of LaCygne, Kansas, will continue as Section
>> Manager; he received 382 votes while challenger Joseph Plankinton,
>> WD0DMV, received 175 votes. Cowan has been the Kansas Section Manager
>> since 2003. The following incumbent ARRL Section Managers did not face
>> opposition and were declared elected for their next terms of office
>> beginning January 1, 2010: Jim Latham, AF6AQ (East Bay); Frank
>> Filipkowski, AD3M (Delaware); Dale Williams, WA8EFK (Michigan); Don
>> Wood, W5FHA (New Mexico); Glen Clayton, W4BDB (Tennessee); Robert
>> Griffin, K6YR (Santa Barbara), and Ed Emco, W1KT (Western
>> Massachusetts).
>>
>> ==> REGULATORY: FCC LOOKS TO REVISE, CLARIFY VANITY CALL SIGN RULES
>>
>> ? ?On Wednesday, November 25, the FCC issued a Notice of Proposed Rule
>> Making (NPRM) -- WT Docket No. 09-209 -- seeking to amend the
>> Commission's Amateur Radio Service rules to clarify certain rules and
>> codify existing procedures governing the vanity call sign system, as
>> well as revise certain rules applicable to club stations.
>>
>> According to the FCC, almost 80,000 licensees have replaced their
>> sequentially issued Amateur Radio call signs with a vanity call sign
>> since the program began in 1996. When the program began, the Commission
>> established what they called "the broad outlines" of the vanity call

>> sign system, concluding that call signs generally should not be
>> available for reassignment for two years following the death of a
>> licensee, or expiration or termination of the license for that call
>> sign. In doing so, the Commission made exceptions for former holders of
>> the call sign, close relatives of a deceased former holder and club
>> stations of which a deceased former holder was a member.
>>
>> The Commission did not, however, specify all of the procedures
>> governing the vanity call sign system, but indicated that the
>> procedures "would be set out in the Public Notices announcing 'starting
>> gates' for the groups receiving initial priority and that the
>> procedures would be adjusted from gate to gate as experience dictated."
>> The procedures announced in the Public Notices announcing the gates are
>> still in effect, but they are not set forth in the Commission's Rules.
>> The NPRM states that the FCC "now believe[s] that certain provisions
>> should be codified in our rules, and others added, so that the vanity
>> call sign system will be fair, equitable and transparent to all amateur
>> service licensees. The Commission also decided in the Vanity Report and
>> Order [issued in 1996] to resume issuing new club station licenses. We
>> believe that certain rule changes to the club station licensing rules
>> may be appropriate."
>>
>> The comment period for WT Docket No. 09-209 will extend for 60 days
>> after it is published in the Federal Register. Historically, items
>> appear in the Federal Register approximately 7-10 days after they
>> appear on the FCC Web site. Reply comments can be made up to 75 days
>> after publication in the Federal Register. Read more here
>> <http://www.arrl.org/news/stories/2009/11/25/11220/?nc=1>.
>>
>> ==> SILENT KEY: ARRL SWEEPSTAKES MANAGER KEN ADAMS, K5KA (SK)
>>
>> ? ?Ken Adams, K5KA, succumbed to cancer and passed away on Sunday,
>> November 22. He was 64. Adams -- an ARRL Life Member -- served as the
>> first-ever Contest Manager for the ARRL Sweepstakes, coming on board in
>> 2005. "Ken was a 'get it done' kinda guy," recalled ARRL Contest Branch
>> Manager Sean Kutzko, KX9X. "He took on the task of Sweepstakes Manager
>> with great enthusiasm, rolled up his sleeves and championed the event

Amateur Radio Newsline(tm) Report 1685 - November 27 2009

The following is a QST. Here is our producer Bill Pasternak, WA6ITF:

--

NEWSLINE SUPPORT FUND ADMINISTRATOR ANDY JAREMA, N6TCQ - SK

It is with deep personal sorrow that I report the sudden passing of our Newsline Support Fund Administrator and my personal friend of more than two decades, Andy Jarema, N6TCQ.

According to Andy's life companion and domestic partner Judy Hurst, late last week Andy was admitted to a local hospital for some tests. His condition deteriorated very quickly he was placed on life support. The diagnosis was multiple organ failure. Andy passed away just before noon on Tuesday, November 24th.

In a conversation with Judy just prior to writing this report I was told that no services are planned at this time. Instead a "Celebration of Andy's Life" will be held here in Los Angeles sometime in January, 2010. We will let you know an exact time, date and location as soon as plans have been completed.

Those of you wishing to send condolences to Judy and members of the Jarema family can do so by e-mail to newsline@arnewsline.org or by regular mail through me. My address is 28197 Robin Avenue, Saugus California, 91350. Either way, we will deliver anything we receive to Judy within the next few weeks.

In the meantime, there is an old saying that the show must go on. Knowing Andy as well as I did, he would want it to be that way. We will do just that and also dedicate this weeks newscast to Andy Jarema, N6TCQ, and his everlasting memory.

I'm Bill Pasternak, WA6ITF. Now, here's Frank Haas, KB4T, with this weeks report. Frank.

--

Now, Amateur Radio Newsline report number 1685 with a release date of Friday, November 27th, 2009 to follow in 5-4-3-2-1. Fear of the Swine Flu puts the North Pole Network on hold, U-K hams go on alert as flooding continues, Cuba to start supplying its ham community with electronic parts, and a U-K radio amateur starts spreading holiday cheer early. Find out the details on this good Samaritan ham radio operator on Amateur Radio Newsline(tm) report number 1685 coming your

way right now.

HELPING HAMS: H1N1 SWINE FLU SCARE HALTS THE NORTH POLE NETWORK

An annual holiday tradition in Orange County, California will be interrupted this year by a bug, and it's not the computer kind. Newsline's Joe Moell, K0OV has the story.

--

For 32 years, the voice of Santa Claus has echoed in the halls and patient rooms of Childrens Hospital in Orange County, California just before Christmas Eve. St. Nick wants to make sure that the kids have a chance to put in their holiday requests, and he has used a group of ham operators to make it happen. With their portable gear, members of the Hospital Disaster Support Communications System have gone from room to room and given each child a personal one-on-one chat with the fellow in the big red suit, who is up in his office at the North Pole getting ready for his big trip. They call it the North Pole Network.

--

Previous contact audio

--

But this year, because of the H1N1 virus, kids in hospitals will probably just have to send Santa an e-mail. North Pole Network is cancelled, says its founder, April Moell WA6OPS:

--

"For infection control, hospitals throughout Orange County have instituted new visitor policies limiting who can go into patient rooms. Most of them limit the number of people in a patient room to two, and those people typically need to be immediate family members or guardians. No outside visitors are now being allowed into the patient rooms at Childrens Hospital, and the group playrooms are being closed as well."

North Pole Network won't be active this year, but April and her crew are already planning to go to Childrens Hospital in 2010. You can read all about the North Pole Network and see photos going all the way back to 1976 on the Web at hdscs.org. That's hdscs.org, which is short for the Hospital Disaster Support Communications System. It's an ARES group that provides emergency communications for 35 hospitals in the county.

>From southern California, this is Joe Moell, K0OV, for Amateur Radio Newsline.

--

If you know of other Operation Santa Claus or North Pole Network functions that have been cancelled due to fear of spreading of that dreaded H1N1 Swine Flu, please let us know. We in turn will pass that information along in our newscast. (K0OV, NPN)

**

CHANGING TIMES: CUBA TO PROVIDE PARTS TO HAMS AND WILL MANUFACTURE 160 METER RADIO

According the Cuban news service CAN, that nations Ministry of Informatics and Communications will soon start providing ham radio operators with the components and parts for their equipment. This, from stock that had been left idle for some time.

Pedro Rodriguez, president of the Cuban Amateur Radio Federation told the press that the first 600 units are ready for delivery. He says that by using them his nations ham radio community will be able to assemble new stations or update those they already have.

But that's not all. During the recently concluded 8th Cuban Ham Radio Federation Congress, a prototype of a domestically designed transceiver was shown. With the brand name "Caiguaran," the gear was designed by several specialists and will be manufactured at one of the Ministry of Informatics factories.

Josï¿½ Tanquero is one of the hams that worked on the creation of the radio. He told the news service that it Runs 20 watts out on 160 meters which it's the legal for Cuban Third Category ham radio license holders. By adding modules both 80 and 40 meters can be covered as well.

The Cuban Amateur Radio Federation has over 5500 members many of whom are involved in both severe weather watch and emergency communications operations. (CAN)

**

RESTRUCTURING: BELGIUM GIVES HAMS A 4 METER SLIVER ALLOCATION

Radio Amateurs in Belgium now have limited access to a small allocation at 4 meters. Holders of Class A holders have access to 69.950 MHz, plus or minus 5 kHz with 10 Watts Effective Radiated Power. This, on a non-interference basis with other users of this spectrum.

Hams in Belgium that wish to use this frequency must first inform their telecommunications regulator the Belgian Institute for Postal services and Telecommunications of their plans. Although this frequency is outside the 70.0 to 70.5 MHz allocation used elsewhere in Europe it is none-the-less a very welcome first step by radio amateurs in that nation. (Southgate)

**

RESCUE RADIO: UK RAYNET ACTIVATES FOR CUMBRIA FLOODING

Flooding in parts of the United Kingdom have put one ham radio response teams on alert. In North Pennines, that area's RAYNET group was put on standby by the Cumbria Emergency Planning Office on Friday morning, 20th November. Neighboring groups from RAYNET Yorkshire Zone 2 the North-West Zone 10 were also placed an call-up alert. While they were permitted to stand down on Friday night, after a review of the situation on Saturday, and with weather conditions set to deteriorate once again overnight Saturday into Sunday, the groups were again placed into stand-by on Saturday afternoon. More on this UK rescue radio activation as soon as information is released. (Southgate)

RADIO LAW: FCC CHAIRMAN SPEAKS ABOUT FUTURE SPECTRIUM SHORTAGE

FCC Chairman Julius Genachowski still maintains that there is a looming spectrum crisis, but he now appears to be trying to calm the waters a bit. This, after several weeks of increasing alarm from broadcasters over FCC talks about reclaming some of their spectrum for wireless broadband services. Amateur Radio Newsline's Norm Seeley, KI7UP, has more;

--

In an interview Friday, November 20th for C-SPAN's Communicators series, FCC Chairman Julius Genachowski expressed his view there are many ideas being offered as to what the commission could do to address the need for more spectrum. He stated that his agency has not decided anything about which ideas were the best. Genachowski also repeated a point he made earlier in the week at a press conference, which is that this is a long-term planning issue for the nation to deal with..

Genachowski admitted that his agency does not operate on impulse noting that it has historically taken the FCC between 6 and 13 years to reclaim spectrum. He said the FCC would be looking at government and commercial spectrum, but that there were no easy pickings on the spectrum chart, and hard choices will have to be made.

And he did have a rather dyer warning. He stated -- and we quote:

"We know the problem is coming. It's not coming next week; it's not coming next month; it's not coming next year, but it is coming."

And added Chairman Genachowski, the FCC has to start coming up with the policies to address it now.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

While ham radio was never mentioned by the FCC chairman, the big question for the service is how much of our spectrum, especially in the microwave region might come under consideration for possible reallocation in the years to come. (B&C)

**

TELECOMMUNICATIONS LAW: FCC SAYS YES TO NET NEUTRALITY

The FCC has said yes to the concept of Internet Neutrality. This as the regulatory agency take an important step toward prohibiting broadband providers from favoring or discriminating against certain kinds of Internet traffic.

Despite the concerns of many telecommunications companies who believe that they have the right to regulate connection speed and capacity. The broadband providers insist they need flexibility, free from government intervention, to keep their networks running smoothly

But telecommunications regulators disagree. Now the Federal Communications Commission has voted to begin writing so-called "network neutrality" regulations with a vote on whether to adopt them expected to come by next summer.

Proponents say the rules would prevent phone and cable companies from abusing their control over the market for broadband access. FCC Chairman Julius Genachowski said regulations are needed to ensure that broadband subscribers can access all legal Web sites and services, including Internet calling applications and video sites that compete with the broadband companies' core businesses. (W8HDU)

**

RADIO LAW: FCC RELEASES NOI ON CHILDRENS USE OF ELECTRONIC MEDIA

The Federal Communications Commission has issued a Notice of Inquiry seeking comment on issues related to children's use of electronic media. In its press release, the regulatory agency notes that the evolving electronic media landscape presents parents with both tremendous opportunities and critical challenges.

On the one hand, electronic media technologies present many benefits for children, such as offering an almost unlimited potential for ways to educate children and provide them with the technological literacy needed to compete in a global economy. On the other, the technological developments that produce these benefits also present risks for children.

The FCC says that its goal with the Notice of Inquiry is to gather data and recommendations from experts, industry, and parents that will enable it to identify actions that all stakeholders can take to enable parents and children to navigate this promising electronic media landscape safely and successfully. As such, it seeks information on the extent to which children are using electronic media today, including television, cell phones and other mobile devices, DVD players and VCRs, video games iPods and other MP3 players, and the Internet. The Notice of Inquiry also asks about the benefits and risks these technologies bring for children and the ways in which parents, teachers, and children can help reap the benefits of electronic media while minimizing the risks.

The FCC's Notice of Inquiry is titled Empowering Parents and Protecting Children in an Evolving Media Landscape. Comments are due January 25, 2010 and reply comments are due February 22, 2010. A link to it can be found at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-09-94A1.doc. (FCC)

**

ENFORCEMENT: FCC BACKS AWAY FROM KWVE FINE AFTER INDUSTRY PROTEST

The Federal Communications Commission has reversed itself in a case that raised broadcaster hackles, and rescinded a $5,000 levied on KWVE FM of San Clemente, California. Instead, the commission has now admonished the Calvary Chapel owned station for transmitting an unauthorized Required Monthly Test of the Emergency Alert System.

As previously reported, the Enforcement Bureau had been asked to reconsidered its earlier fine issued in September against the station and to set it aside because of the unique circumstances at hand. This included the voluntary and critical nature of the service provided by local primary stations in enabling statewide EAS activity.

Fifty state broadcast associations had protested the fine and asked the agency to reconsider or cancel the penalty. They feared that such a punitive measure for an accidental wrong transmission might deter other stations in the EAS chain from volunteering as Local Primaries because of fear of penalties for errors made during good faith operation. (CGC, RW)

**

RADIO LAW: CALIFORNIA BANS HIGH ENERGY USE TV RECEIVERS

TV sets that use excessive levels of mains power will be banned from store shelves in California. This, after state regulators voted on Wednesday, November 18th to adopt a mandate to reduce electricity demand.

On a unanimous vote, the California Energy Commission required all new televisions up to 58 inches to be more energy efficient, beginning in

2011. The requirement will be tougher in 2013, with only a quarter of all TVs currently on the market meeting that standard. TV sets larger than 58 inches, which account for no more than 3 percent of the market, would not be covered by the rule. This is viewed as a concession to independent retailers that sell high-end home-theater TV systems. However, the commission is expected to regulate them in the future.

The commission estimates that TV receivers account for about 10 percent of a home's electricity use. The concern is that the energy draw will rise by as much as 8 percent a year as consumers buy larger televisions, add more to their homes and watch them longer. Commissioners say energy efficiency standards are the cheapest and easiest way to save electricity. More than 1,050 models sold today comply with the 2011 California standards, and more than 300 comply with the 2013 standard, according to the Energy Commission. (Published reports)

**

NAMES IN THE NEWS: W9XA AND N2ZZ ELECTED AS NEW ARRL VICE DIRECTORS

A upset in the ARRL Central Division Vice Director's race where VUAC Chairman Kermit Carlson, W9XA, has routed longtime incumbent Vice Director Howard Huntington K9KM in his bid to retain he position he has held since 1983. When the votes were tallied Carlson had received 1808 while Huntington garnered only 1466.

Kermit Carlson is an engineering physicist with Fermi National Accelerator Lab. He was appointed to the League's VHF/UHF Advisory Committee in 2005 and served as Chairman since this past January.

Meantime in the Roanoke Division, Vice Director Patricia Hensley, N4ROS, decided not to seek another term. That left the field wide open with South Carolina Section Manager Jim Boehner, N2ZZ, and former West Virginia Section Manager Hal Turley, W8HC, both nominated to succeed her. When the votes were tallied, Boehner won the election with 1692 votes while Turley received 1496.

Boehner is a physician specializing in women's healthcare. He has served four terms as the ARRL South Carolina Section Manager.

In addition to Carlson and Boehner, seven incumbent directors and vice directors were declared elected without opposition. All will begin three-year terms of office beginning at noon on January 1, 2010. (ARRL)

THE CHANGING OF THE GUARD: REPEATER PIONEER KARL PAGEL, N6BVU - S.K.

It is with much sadness that we report the passing of on our friend and former Newsline Survey-master Karl Pagel, N6BVU. Karl had been in declining health for some time and being treated in a nursing home in Orange County, California.

Among his many achievements was his co-authoring with Kevin Karamanos, WD6DIH, of the most accurate and inclusive repeater directory covering the great American South-West. Its been said that if a repeater actually existed that it could be found in Karl's database and in the directories that he and Kevin published for more than half a decade.

Karl was also heavily involved in repeater coordination issues. While he never owned or operated a repeater it was his work with all three of Southern California's regional frequency coordination bodies that helped many a new system come on the air. His work did not go unnoticed nationally and he was appointed as the Southwestern Division representative on the ARRL's VHF Repeater Advisory Committee where he also as chairman for one term. He was also presented with the ARRL Southwestern Division's Meritorious Service Award for his dedication to repeaters and frequency coordination.

In addition to all of this, when Amateur Radio Newsline gained its original corporate status in the mid-1980's and we needed to find out who was listening, it was Karl who offered his services to us. And for about two years he dutifully tallied all of responses to the survey questions we put out.

Karl Pagel was gifted had the knowledge needed to do complex database work and gave of himself unselfishly for the betterment of the hobby. Dick McKay, K6VGP, is one of the founding fathers of the original Southern California repeater Association. In an e-mail to Newsline, McKay said that N6BVU was certainly a good man and a true friend of ham radio.

Karl Pagel, N6BVU, was age 66 when he passed away on November 10th. He is survived by his mother Mary, KA6IGG, his brother Kent and a Southern California ham radio community that truly admired his dedication and work on their behalf. (ARNewsline(tm), K0OV, K6VGP)

**

EMERGING TECHNOLOGY: THE NANOTOM

Turning to the Newsline science page, there's now a new, non destructive way for scientists to take a look at objects that are a part of mankind's present and its history. Fred Vobbe, W8HDU, tells us about the newly developed Nanotom.

--

Researchers at the University off Nottingham have a new weapon in their arsenal of tools to push back the boundaries of science, engineering and archeology.

Call it Nanotom. It is described as the most advanced 3-D x-ray microcomputed tomography scanner in the world. The Nanotom is expected to help researchers in a wide variety of scientific disciplines to literally see through solids.

The machine will make previously difficult investigation much easier as it allows researchers to prove inside objects without having to break them apart.

I'm Fred Vobbe, W8HDU.

--

The Nanotom is being viewed as an amazing step forward in the science of looking at the past and present as a doorway to the future of scientific advancement. (Science OnLine)

**

HAM RADIO IN SPACE: ISS GETS NEW DUAL BAND ANTENNA

Turning to space related ham radio news, word that a new dual band amateur radio antenna system has been installed on the International Space Station's Columbus Module. The antenna project was funded entirely by AMSAT-North America and the volunteers who built the antennas for both an European Space Agency experiment and for ARISS use.

The new antenna is described as very similar to the antennas already on the Russian service module. Once all antennas are in place the ARISS team will be working to bring amateur radio to the Columbus module.

Lou McFadin, W5DID is the ARISS US Hardware Manager. He says that this is an example of what can be achieved by ham radio volunteers hams working closely with a space agency. (ARISS)

**

HAM RADIO IN SPACE: AO-7 TURNS AGE 35

A happy birthday to the Amsat Oscar 7 ham radio satellite that turned 35 on November 15th. A O 7 was carried into orbit on November 15, 1974 by a Delta 2310 launcher from Vandenberg Air Force Base in California. It used a circularly polarized canted turnstile VHF and UHF antenna system and High Frequency dipole for 10 meters.

The second in the phase 2 satellite generation, A O 7 weighed 28.6 kilograms. And what is truly amazing is that after all these years it is still possible to hold an occasional QSO over that bird.

The middle of the Mode B downlink passband is 145.950 MHz, and you will find most of the activity occurring between 145.940 MHz and 145.960

MHz. Generally, you'll hear CW operators below 145.950 and SSB operators above.

A Oh 7 was a part of a multiple payload mission. That same launcher also carried the NOAA 4 weather satellite and the Spanish INTASAT into space. (ANS)

**

ON THE AIR: IRELANDS GALWAY VHF GROUP FRPM CLIFDEN

On the air, word that the final operation from Ireland's Galway VHF Group will take place from the Clifden Lifeboat Station over the weekend of the 28th and 29th of November. This all band operation will have two stations in operation at all times using the special commemorative call EI 185 RNLI. Varying types of antenna construction will be used including a Kite antenna for the Low Frequency bands. Primary modes will be SSB and digital with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed. A QSL route will be released shortly. (IRTS)

**

DX

In DX, word that F6AUS will operate portable FG from Les Saintes Guadaloupe until March 2010. Look for him to possibly be on 160 and 80 meters. QSL via his home callsign.

K3CT and K3TEJ will be active slash KP2 from the U S Virgin Islands through December 1st. Their activity usually has an emphasis on the 160, 30, 17 and 12 meter bands. QSL to their individual home callsigns.

And a reminder that DO7AG, is expected to be in the South Pacific with his family between November and January. He plans to be active as 5W1QX from Western Samoa and A31CE from Tonga but only on 40 and 20 meters. Complete dates of his operations have not been announced yet.

The Algarve STAR DX Team has announced that the 4W6AL QSL cards have arrived from the printer and are being readied for mailout. All 4W6AL information can be found in cyberspace at algarvedx.com

AA7JV and HA7RY will be active from the Chesterfield Islands as TX3A until December 6th. Their operation has be on all of the HF bands but with an emphasis on the lower bands. Modes used have been on CW, SSB and RTTY. QSL via HA7RY.

Lastly, IZ0EGM, will be active as from San Marino as T70A during ARRL 10 Meter Contest between December 11th and 13th, using CW and SSB. His QSL information is on QRZ.com.

Above from various DX news sources

**

THAT FINAL ITEM: A GIFT FROM THE HEART

And finally, in keeping with the spirit of the upcoming holiday season we have the story of benevolence from one ham to several others. It took place in the United Kingdom where Jeramy Boot, G4NJH, has the details:

--

The team of five GB2RS newsreaders in North West England have been given transceivers for 2, 4 and 6meters for use in transmitting the news. The radios have come from Graham, G1PYA, a regular listener to GB2RS.

The five newsreaders, G4GSY, G0MRL, G0NAJ, M1NTO and M0HDE would like to record their very great thanks to Graham for this valuable gift, which is so clearly in the traditional spirit of amateur radio.

Im Jerany Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

And we cannot think of a better story with which to start out the 2009 holiday season. (GB2RS)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us for the moment at Amateur Radio Newsline(tm), 28197 Robin Avenue, Saugus California 91350.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Frank Haas, KB4T, saying 73, happy Thanksgiving, and we thank you for listening.

GB2RS NEWS

Sunday 29th November 2009

The news headlines

RAYNET on hand in Cumbria

Tragic death of 1996 Young Amateur of the Year runner-up

A DXpedition with a Difference

The flooding in Cumbria has been in the news for several days now. Following a meeting with Cumbria Police and the Emergency Planning Unit, North Pennines RAYNET group are on standby. They are expected to be called in once the anticipated collapse of the Calva bridge happens. The bridge carries 999 phone lines. Police vehicles would provide immediate cover but RAYNET would be tasked with providing further cover of 3 or 4 strategic locations on a 24 hr basis for up to 14 days.

The Society is saddened to report the death of Ben Clarkson, G7WHO, at the tragically young age of 27. Runner-up 1996 Young Amateur of the Year, Ben gained his licence on his 14th birthday. An enthusiastic member of the Reading and District Radio Club and a Scout Leader, Ben will be sadly missed by all who knew him.

Leaving in February 2011, John Edwards, M0JAX, is looking for 22 people with a full licence to join a DXpedition to Bahrain. He's planning a two week trip based at the InterContinental hotel with eight stations on the air 24 hours a day. Operators will be working in three shifts to keep the station on the air for the two weeks. John is making all the various arrangements including travel and accommodation but would be interested in hearing from radio amateurs who have an interest in making the trip. A preliminary trip is being organised for February 2010 to check suitability for antennas and the stations, including drawing up a list of the necessary equipment. If you are interested, send your details and why you think you would be an asset to this DXpedition to the RadCom offices and your letters will be passed on to M0JAX.

On Saturday, November 21, the new ARISS VHF/UHF antenna as well as the Automatic Identification System, or AIS, VHF antenna was installed on the ISS Columbus module during the second extravehicular activity of the STS-129 mission. ARISS plans to move an onboard radio to the

Columbus module to make use of its new antenna. The other antenna will be used to support the AIS maritime experiment to help track the passage of ships across the world's oceans.

GB3ET went live on 19 November from its new location near the Hannington TV transmitter north of Basingstoke. It is on RB13, which is 433.325MHz output and 434.925MHz input with either 1750Hz tone burst access or 71.9Hz CTCSS access. The main service areas are Basingstoke, Fleet, Newbury, Thatcham and Reading. The Repeater Keeper is Noel Matthews, G8GTZ and he can be contacted at g8gtz1<at>googlemail.com.

Phil Catterall, G4OBK has become the first licensed amateur to claim an award under the Wainwrights On The Air scheme. On 11 November, after a walk that started in Patterdale and took in Helvellyn and Striding Edge via several Wainwright summits, Phil completed activations of all the summits in Alfred Wainwright's

2

Guide to the Eastern Fells. He then became eligible to claim an award. Wainwrights On The Air was set up in March 2009 by Julian Moss, G4ILO. More details can be found at www.wota.org.uk.

Martin Lynch & Sons are holding their annual open day on 5 December at their Chertsey Showroom. Kindly sponsored by Yaesu, Icom and Kenwood, there will be a free hog roast. Doors open at 8 am and close 4pm. This will mark the start of the 20th year of trading for ML&S.

Darwen Amateur Radio Club has been re-launched and is looking for new, or not so new members. The original Darwen club was active for many years under the leadership of Bill Lishman, G2AKK and a group of local amateurs decided that the club should be revived. It is still early days yet but already a chairman, secretary and treasurer have been elected and the club will be seeking RSGB affiliation very shortly. The club meets fortnightly on Monday evenings from 7pm at The Golden Cup public house, Blackburn Road, Darwen BB3 0AJ adjacent to junction 4 of the M65. The next meeting is on Monday 7 December. All are welcome to attend.

The Sausage and Scouse Net Christmas Meeting will take place on Sunday 6 December at 12.30pm at The Old Quay in Parkgate, the Wirral. Details from Bill, G4USW on 07870 325537.

And now for the details of rallies and events for the coming week

Today, 29 November, the Bishop Auckland Radio Amateurs Club Rally will take place at the Spennymoor Leisure Centre, Co Durham DL16 6DB. There will be talk-in and plenty of car parking with the doors opening at 10.15 for disabled visitors and 10.30 for other visitors. Admission is

1.50 and under14s may visit free of charge. Details from Mark, G0GFG, 01388 745 353.

This is the last rally we have details for in 2009. If you would like your 2010 rally mentioned in RadCom and on GB2RS, please send details to radcom<at>rsgb.org.

Now for the news of special events

Aberdare & District ARS will be putting GB0NG on the air throughout December to celebrate the Nos Galan Races that are held every New Years Eve at Mountain Ash near Aberdare. More details can be found at www.radioclubs.net/aadars.

To celebrate the Winter Olympic Games in Canada, from 1 December to 31 January VG7W will be on the air. QSL via VE7OM.

On 5 December GB0RCS will be on the air for Rickmansworth Cub Scouts.

And now the HF DX news compiled from 425 DX News and other sources.

An international team is planning to be in Tonga until 1 December. Plans are to have two stations including amplifiers for all-band activity. The special contest call A31A has been issued that will be used in the CQWW CW contest going on this weekend, 28 and 29 November.

Daniel, EI9FHB should be active from the Kish lighthouse until 9 December. The Kish lighthouse marks a sandbank on the route to Wales. The lighthouse was built in 1965 and is undergoing a major overhaul of

power systems and navigational aids. Daniel will be operational on HF voice as well as 2m and 70cm FM. Operating will be mainly on Sundays and after 7pm other days. The worked all Ireland frequencies will be used where possible.

G3XAQ will be active from Ghana until 4 December as 9G5XA. He will be active on all bands using CW. QSL via G3SWH.

YB3MM/P will operate from Bawean Island in Indonesia between 4 and 8 December. Operation will only be on 15m CW in his spare time with limited electricity. QSL via IZ8CCW either direct or through the bureau.

Dave Burton, VK4ABD will be operating from the Willis Island Bureau of Meteorology site in the Australian Coral Sea Territories from early December 2009 until July 2010 as VK9WBM. Due to shift work commitments there will be no fixed schedule or pre-arranged contacts. Operation will be on the 40m band and above. QSL via Bureau or WIA.

Now the contest news

Without doubt November's biggest event of is the 48 hour CQWW DX CW Contest, which finishes at 2359 today, Sunday 29th. There will be a lot of DXpeditions, some by well-known operators from Britain. The exchange is signal report and CQ Zone, which for the UK is 14.

The 144MHz UK Activity Contest will take place on 1 December between 2000 and 2230UTC and the 432MHz event on 8 December from 2000 to 2230UTC. The exchange is signal report, serial number and locator.

The VHF next event is the 144MHz AFS Contest on Sunday 6th. If you operate as a member of a club there's no need to be a member of RSGB, just the club. However, if you operate as an individual, you do need to be a member (although check logs from non members are always welcome). There is a maximum of five members per team, but nothing to prevent a really active and ambitious club from fielding more than one team. It takes place between 0900 and 1700UTC and the exchange is signal report, serial number and locator.

The ARRL 160m Contest takes place over the weekend 4 to 6 December between 2200 and 1600UTC. In this event UK stations with modest set-ups often find themselves pleasantly surprised if they dip their toe in the water, because there will be a lot of top-notch operators taking part from the US with excellent antennas and receiving systems. times to be in the shack are from late evening until just after dawn, and you've got two nights in which to try.

On the same weekend, the ARRL EME (Earth-Moon-Earth) contest can result in well-equipped VHF operators making some real DX QSOs. 144.110 to 144.160MHz and 432.000 to 432.025MHz are probably the frequencies that will yield results easiest, but that's not to say it will be quick or at all easy to complete a QSO! Expect most DX signals to be very weak. The times for UK-based stations without elevation control are approximately 0900 to 1020 and 1940 to 2100 on 5 December and 0935 to 1055 and 2110 to 2230 on 6 December. Those with elevation control get much bigger bites of the cherry and benefit from lower noise levels.

4

Now the solar factual data for the period from the 16th to the 22nd of November, compiled on 23rd of November by Neil Clarke, G0CAS.

On the 18th two sunspot groups emerged on the solar disc, one a new group which was the larger of the two and the other spots appeared in what was the old active region on the last rotation. Solar activity was very low as neither group produced any solar flares. Solar flux levels averaged 76 units and varied little day to day. The 90 day solar flux average on the 22nd was 72, that's the same level as last week. X-ray flux remained below the minimum reporting level everyday. Geomagnetic activity was quiet everyday even though a coronal hole disturbance arrived on the 20th. However, the Ap for that day was only 8 units. Before that the Ap was at one unit for 3 days and two for 2 days. The average was Ap 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds initially decline to 270 kilometres per second on the 18th. Speeds then increased to 570 by the 21st. Particle densities were low except for the 19th which increased briefly to 17 particles per cubic centimetre. Bz varied between minus and plus 2 nanoTeslas on the quiet days and between minus 7 and plus 10 nanoTeslas during the weak disturbance.

And finally the solar forecast. This week solar activity is expected to be at very low levels. The solar disc could exhibit some spots particularly during the first half of the week. Solar flux levels should decline and be around the 70 mark towards next weekend. Geomagnetic activity is expected to be quiet with maybe some more days with the Ap index heading towards zero again. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. The darkness hour lows are expected to be about 8MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 18MHz. The optimum working frequency with a 90 per cent success rate will be about 14MHz. The best time to try the path will be between 0800 and 1100UTC.

And that's all for this week from the propagation team.

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 29 November Bittern DX Group continues its Foundation licence course. Contact Linda, G0AJJ, on 01692 404154. On Monday 30 November Felixstowe and District Amateur Radio Society is holding a junk sale. Contact Paul, G4YQC, by email to pjw<at>btinternet.com. On Tuesday 1 December Andover Radio Amateurs Club is holding its AGM and having a talk on digital modes including Olivia. Contact Martin, M0MWS, on 0777 618 1646. On Tuesday 1 December Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Tuesday 1 December Chelmsford Amateur Radio Society is having a talk on multi Tx radio direction finding by Roy Emeny, G4JAC. Contact Martyn, G1EFL, on 01245 469 008. On Tuesday 1 December Horndean and District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 023 9247 2846. On Tuesday 1 December Verulam Amateur Radio Club is having its Christmas dinner. Contact Ralph, on 01923 265572. On Wednesday 2 December Chesham and District Amateur Radio Society is having a general meeting and CW practice. Contact Terry, G0VFW, on 01442 831 491. On Wednesday 2 December Dover Radio Club is having a natter and operating evening. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Wednesday 2 December Southdown Amateur Radio Society is operating at the Hailsham shack. Contact John, G3DQY, on 01424 424 319. On Thursday 3 December Cray Valley Radio Society is having a demonstration of PLT interference

by Colin, G3SPJ and a discussion on the implications for the HF bands. Contact Bob, 2E0RCV, on 020 8265 7735 after 8pm. On Thursday 3 December Crystal Palace Radio and Electronics Club is having its Christmas social. Contact Bob, G3OOU, on 01737 552 170. On Thursday 3 December Horsham Amateur Radio Club is holding its AGM. Details on the web at www.harc.org.uk. On Thursday 3 December Lowestoft and District Pye Amateur Radio Club is in the shack. Contact Phil, G0JSG, on 01502 585448. On Thursday 3 December Newbury and District Amateur Radio Society is having its Annual Christmas Dinner at The Sun in the Wood. Contact Richard, G3ZGC, on 01635 46241.

6

On Thursday 3 December Shefford and District Amateur Radio Society is having a talk by Ian, G3NRW, on the AIM4170 Antenna Analyzer. Contact David, G8UOD, on 01234 742 757. On Friday 4 December Crawley Amateur Radio Club is having its annual fish and chip supper. Contact John, G3VLH, on 01342 714 402. On Friday 4 December Loughton and Epping Forest Amateur Radio Society is having its Christmas buffet and bring and buy. Contact Marc Litchman, G0TOC, on 020 8502 1645. On Friday 4 December Mid-Sussex Amateur Radio Society is having its Christmas dinner at the Gardeners Arms, Ardingly. Contact Sue, G6YPY, on 01273 845 103. On Friday 4 December Reading and District Amateur Radio Club is having its annual dinner. Contact Pete, G8FRC, on 01189 695 697. On Friday 4 December Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk. On Saturday 5 December Brede Steam Amateur Radio Society is at the bunker. Contact Steve, on 01424 720815. On Saturday 5 December Chelmsford Amateur Radio Society is having its Christmas lunch at The Chimes Restaurant. Contact Martyn, G1EFL, on 01245 469 008. On Saturday 5 December Horsham Amateur Radio Club is having its Christmas dinner. Details on the web at www.harc.org.uk. On Sunday 6 December Chesham and District Amateur Radio Society is taking part in the 144MHz Affiliated Societies contest. Contact Terry, G0VFW, on 01442 831 491.

NEWS FOR THE SOUTH-WEST On Monday 30 November Bristol RSGB Group is having a talk by Martyn, G3RFX. Contact Robin, G3TKF, on 01225 420442. On Tuesday 1 December Blackmore Vale Amateur Radio Society is having a VHF evening in the club shack. Contact Tony G0GFL, on 01258 860741. On Wednesday 2 December Cornish Radio Amateur Club is having a combined Christmas party. Contact Steve, G7VOH, on 01209 844939. On Wednesday 2 December Exmouth Amateur Radio Club is having a talk on logic chips and other ICs by Dean, G0UIL. Contact Mike, G1GZG, on 01395 274172. On Wednesday 2 December Taunton and District Amateur Radio Club is having a talk on digital modes by Eugene Morgan, G4AIU. Contact William, G3WNI, on 01823 666 234. On Wednesday 2 December Thornbury and South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417048. On Wednesday 2 December Trowbridge and District Amateur Radio Club is having its Christmas social and presentation night. Contact Ian, G0GRI, on 01225 864 698, evenings and weekends. On Thursday 3 December South Bristol Amateur Radio Club is having an

amateur radio software workshop with David, G7PKJ. Contact Len, G4RZY, on 01275 834 282. On Thursday 3 December Swindon and District Amateur Radio Club is having a fun quiz. Contact Den, M0ACM, on 07810 317750. On Thursday 3 December Yeovil Amateur Radio Club is having a photo quiz night with Derek, M0WOB. Contact Steve Crask, G7AHP, by email to steve<at>g7ahp.co.uk.

7

NEWS FOR THE MIDLANDS On Monday 30 November Gloucester Amateur Radio And Electronics Society is having a workshop and HF operating evening. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Tuesday 1 December Derby and District Amateur Radio Society is having a junk sale. Contact Richard Buckby, by email to radio<at>dadars.org.uk. On Tuesday 1 December Loughborough and District Amateur Radio Club is having a practical evening. Contact Chris, G1ETZ, on 01509 504 319.

On Tuesday 1 December South Notts Amateur Radio Club is taking part in the 2m Contest. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 2 December Lincoln Short-Wave Club is having its Christmas dinner at the Carpenter's Arms, Fiskerton. Contact Pam Rose, G4STO, on 01427 788356. On Wednesday 2 December Midland Amateur Radio Society is having an open meeting and training classes. Contact Norman, G8BHE, on 01214 229 787.

On Wednesday 2 December South Notts Amateur Radio Club is having a radio quiz. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 2 December Telford and District Amateur Radio Society is closed. Contact Mike, G3JKX, on 01952 299 677. On Friday 4 December Bromsgrove and District Amateur Radio Club is having a review of contests and special events. Contact Chris, M0BQE, on 01905 776 869. On Friday 4 December Cheltenham Amateur Radio Association is holding its AGM. Contact Derek Thom, G3NKS, on 01242 241099. On Friday 4 December Coventry Amateur Radio Society is having a talk on APRS by Iain Young, G7III. Contact John, G8SEQ, on 07958 777363. On Friday 4 December Nunsfield House Amateur Radio Group is having a talk by Ken Clarke. Contact Ken Frankcom, G3OCA, on 01332 720976. On Friday 4 December South Birmingham Radio Society is having a Construction evening. Contact Don, on 0121 458 1603.

8

NEWS FOR THE NORTH OF ENGLAND On Monday 30 November Angel Of The North Amateur Radio Club continues its Advanced licence course and is having a session on learning how to operate the club radios with Chris Herring, G7AQY. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 30 November Sheffield Amateur Radio is having a social and video night. Contact Trevor Wood, M0TWS, by email to trevorwood6<at>yahoo.co.uk. On Monday 30 November South Manchester Radio And Computer Club has its monthly technical forum. Contact Ron, G3SVW, on 0161 969 3999. On Monday 30 November Thornton Cleveleys Amateur Radio Society is having a technical talk by John, G8RDP. Contact John Foster, 2E0EZY, on 01253

399377. On Tuesday 1 December Chester and District Radio Society is having its Christmas social evening at Whitby Sports and Social Club, Ellesmere Port. Contact Barbara Green on 0151 339 9183.

On Tuesday 1 December Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 01524 848193. On Tuesday 1 December Otley Amateur Radio Society is taking part in the 144MHz UKAC from the shack and having technical chatter in the village hall. Contact Paul, 2E0PAK, on 07768 996370. On Wednesday 2 December Denby Dale Radio Club is having a presentation on the RSGB Club Calls Contest by Richard, M0RBG. Contact Gerald, G3SDY, on 01484 602905.

On Wednesday 2 December Hornsea Amateur Radio Club is having an activity night. Contact Gordon MacNaught, G3WOV, on 01377 240573. On Thursday 3 December Mid-Cheshire Amateur Radio Society is having a talk on laser communications by M0STR and G8ATB. Contact Peter Paul Fox, G8HAV, on 01606 553401. On Thursday 3 December South Manchester Radio And Computer Club is having a talk on digital photography techniques by Robin, G3RJQ. Contact Ron, G3SVW, on 0161 969 3999. On Thursday 3 December Wakefield and District Radio Society is having a general knowledge and radio quiz with Dave, G4CLI. Contact Ken, 2E0SSQ, on 07900 563117. On Friday 4 December East Cleveland Amateur Radio Club is on the air. Contact Alistair, G4OLK, on 01642 475 671.

9

NEWS FOR SCOTLAND On Tuesday 1 December Livingston and District Amateur Radio Society is holding its AGM. Contact Norman, on 07740 946192. On Wednesday 2 December Ayr Amateur Radio Group is having a talk on the Isle of Coll Mini DXpedition by GM4ZNC. Contact Charlie, MM0GNS, on 01563 551704, cgnstewart<at>hotmail.com. On Wednesday 2 December Paisley YMCA Amateur Radio Club is having a training evening. Contact Bill Anderson, 2M0BZZ, on 01505 613633.

On Thursday 3 December Aberdeen Amateur Radio Society is holding a junk sale. Contact Lewis, GM4AJR, on 01224 575 663. On Thursday 3 December Moray Firth Amateur Radio Society is having a 10GHZ night with GM4TOE. Contact Jim, MM0SMD, on 01340 820 134. On Friday 4 December Cockenzie and Port Seton Amateur Radio Club is having a normal club night. Contact Bob, GM4UYZ, on 01875 811 723.

NEWS FOR WALES On Monday 30 November Llanelli Amateur Radio Society is having a junk sale. Contact Craig, MW0MXT, on 01269 840292. On Tuesday 1 December Wrexham Amateur Radio Society is having a planning meeting for 2010. Contact Glyn, MW0BNB, via the web at www.qsl.net/wars. On Thursday 3 December Meirion Amateur Radio Society is having a rag chew night and looking back on 2009. Contact John, MW0VTK, on 07868 738016.

On Thursday 3 December Swansea Amateur Radio Society is holding its AGM. Contact Nick Lewis, MW0JGE, on 01792 402035.

NEWS FOR NORTHERN IRELAND On Thursday 3 December Bangor and District Amateur Radio Club is having talks by Harry, GI4JTF, on "QSO bureau

updated" and by Richard, GI4DOH on "Morse Runner". Contact Mike, GI4XSF, on 028 4277 2383. On Sunday 6 December Orchard County DX Club will be holding its first Christmas dinner from 1pm at the Lough Neagh Discovery Centre, Lurgan. Mambers and their families are welcome. Menus and information are on the club web site at www.MN0OCG.co.uk. Now some advance information for next week. On Saturday 12 December the Mid Ulster Amateur Radio Club will be holding its Christmas dinner from 1pm at the Lough Neagh Discovery Centre. This replaces the normal monthly meeting. The next formal meeting will take place on Sunday 10 January at 3pm. More information on the club web site at www.muarc.com.

And that's the end of this week's GB2RS news broadcast,

prepared by the Radio Society of Great Britain.

SARL NEWS - SUNDAY 29 NOVEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

RAE - ZU SPONSORSHIP

SADC RECIPROCAL LICENSE PROPOSAL

IARU SAYS WRC-12 PREPARATIONS ARE ON TRACK

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

2009 RAE - ZU SPONSORSHIP

Kobus Conradie of LetsPlayRadio in Cape Town informed SARL News that the ZU sponsorship has been awarded to Ben Erasmus, ZU1TN. The sponsorship comprises a VX2E twin-band handheld, a soft case, an antennae adapter, a speaker-microphone and a dual-band magnetic antenna, sponsored by two anonymous benefactors. Congratulations Ben!

The SARL thanks LetsPlayRadio for its support of amateur radio in South Africa and in particular, its support to the development of the youth.

ICASA TO PUT SADC RECIPROCAL LICENSE PROPOSAL TO CRASA

At the quarterly ICASA/SARL Liaison Committee meeting held on Thursday, the SARL requested that ICASA consider a reciprocal licensing agreement with SADC countries. Some SADC countries are already issuing licenses to South African visitors and the SARL requested ICASA to do so reciprocally and to include all SADC countries.

ICASA responded positively and will set the wheels in motion from both a South African, as well as a SADC perspective. The concept will be put to the Communication Regulators' Association of Southern Africa (CRASA).

CRASA is an association of Information and Communications Technologies (ICT) regulators and other stakeholders in the information and communications industry in Southern Africa. CRASA was founded in 1997 within the framework of the Southern Africa Development Community (SADC) Protocol on Transport, Communications and Meteorology.

This was a response to the SADC leadership's common vision, which recognised that the individual information and communications sectors in the region were too small to have a comparative advantage in the global arena - and furthermore to attract adequate investment to build modern infrastructure for provision of universally accessed ICT services. In essence, our historical linkage to our regional economic community - the SADC - positions us better to lobby for a conducive regulatory environment to investment throughout the region.

Other issues discussed included the table of frequency allocation, access to 135,7 to 137,8 kHz, expansion of the 160 metre band, a new allocation around 5 MHz and various issues regarding the microwave bands. It was also agreed that in future, ZS9 call signs would only be allocated to competition stations.

The next meeting will be held in mid-February.

IARU SAYS WRC-12 PREPARATIONS ARE UNDERWAY

WRC-12 will commence in January 2012. The year 2012 seems far away, but it is only slightly more than two years from now. Preparations within national telecoms administrations have been under way for some time. Regional telecoms organisations have been meeting to discuss the WRC agenda items and to arrive at regional positions on each issue.

IARU Secretary Rod Stafford, W6ROD, said that every IARU member society capable of doing so, should take the initiative to liaise with their own administration and let the administration know what the IARU's position is on those WRC agenda items that influence the amateur radio service.

The SARL is participating in the WRC preparatory meetings and will attend a WRC capacity-building workshop on ITU-R procedures and processes on 7 and 8 December.

The most significant WRC agenda items are: 1. Agenda Item (AI) 1.14 - Implementation of the radiolocation service in the range 30 to 300 MHz; 2. AI 1.15 - Possible allocations in the range 3 to 50 MHz to the radiolocation service for oceanographic radar applications; 3. AI 1.19 - Software-defined radio systems; 4. AI 1.22 - The effect of emissions from short-range devices; and 5. AI 1.23 - To consider an allocation of about 15 kHz in parts of the band 415 to 526,5 kHz to the amateur service on a secondary basis, taking into account the need to protect

existing services.

OCTOBER 2009 RAE STATISTICS

The last Radio Amateur Examination (RAE) of 21 October saw an excellent pass rate of 86% for the Class A examination and a Pass rate of 90% for the Class B examination.

The oldest candidate was 66-year-old, BR van Heerden, ZR3BVH, from Prieska and the youngest was 11-year-old MC Boschoff, ZU3C, who hails from Upington. The highest Class A score was achieved by two candidates who achieved a whopping 93% overall; these candidates are E Isted, ZS6EDI, and PJ Delport, ZR6BVS, both from Gauteng. Congratulations to these two candidates.

Six candidates, all of them achieving 100% in their Class B examination, share the highest Class B score. They are S Erasmus, ZU1SE, F Rahim, ZU5FHR, N Barnes, G Fisher, ZU5DF, G Koster, ZU1GC, and J Ashworth. Congratulations to these candidates.

There are still a few candidates who have not yet submitted some of the required documentation to the SARL office, so their call signs have been withheld. Please submit your outstanding documentation to the SARL office within the next week. The SARL cannot submit the relevant paper work to ICASA and this will result in frustrating delays in issuing of your licenses and loading your information on the SARL call sign book.

Listen out for the new call signs and extend a warm and hearty on-air-welcome to the new radio amateurs.

For those who did not make it this time around, do not give up. In May 2010 there will be another opportunity for you to take the examination, so study hard and set yourself a challenge to have your name honoured as one of the top achievers and stand a chance to be in line for an award.

Should you have any queries, please contact Mariska at the SARL office on 011 675 2393 or e-mail her to admin@sarl.org.za.

SARL OFFICE CLOSED OVER THE HOLIDAY PERIOD

The SARL office at the National Amateur Radio Centre will be closed from 15 December 2009 and reopen on Monday 11 January 2010. During that period any urgent matters should addressed to the secretary to secretary@sarl.org.za.

SARL MEMBERSHIP TOUCHES THE 1 300 MARK

The membership of the SARL stood at 1 294 on Thursday last week. We set the target of 1 300 by end November which we are likely to reach. Our target for 31 December is 1 400.

If you have not joined the national body for amateur radio - the South African Radio League - we invite you to do so now. New members can join

at the half-year rate and get December free, including the November/December Radio ZS, which is currently at the printers. It is packed with interesting article and projects. To join get the form from www.sarl.org.za or call Mariska at 011 675 2393. If you still have not paid your current subscription, which was due on 1 July, please do it as soon as possible.

This week we welcome the following new members: Michael Sender, ZS1MBM, Colin Porter, ZS1RS, Juan Genovart, ZR6DAY, and Paul Odendaal, ZS6PCO.

SATELLITE ACTIVITY WEEKEND RESULTS ANNOUNCED

The overall winner was Andr&#65533;, ZS2BK, with 192 points. He made 192 QSOs, receiving one point per contact. He is the winner of the TinyTrak4 prize. Some of the points were achieved at 02:00 UTC.

The winner of the TinyTrak3 prize for Best Portable Station goes to Sian, ZS3SVD, who operated from a rare grid location near Christiana (KG22). He completed 59 QSOs over the contest period and achieved a very commendable 177 points.

Sian told SARL News that he was in Christiana for the weekend. The exact grid locator is KG22NC. "I used a Kenwood TS-B2000 mounted in the Jeep with SATPC32 on the laptop with CAT control. The antennas were a Diamond X-50 vertical on a 7 m portable mast and a Diamond NR770 mobile on a magnetic base mounted on the edge of the roof - tilted 45 degrees. The NR770 on the roof outperformed the X50 by far, so I dismantled down the X50 and its mast Saturday morning and only used the NR770." It goes to show that even with modest equipment satellites can be fun.

Some interesting long range QSOs were between Pierre, ZS6BB, and SV1EEK in Greece and with Jim, VQ9JC, in Diego Garcia, both on AO7, using SSB. Hal, ZS6WB, also made a contact with Jim. Congratulations to all participants. The full results are available on www.amsatsa.org.za.

CONTEST NEWS

SARL VHF/UHF Digital contest.

The contest committee received only two logs for the September leg of the VHF/UHF Contest. The results are as follows: 1st place and overall winner, Andr&#65533; Botes, ZS2ACP, with 32 109 points, and 2nd place - and Division 6 winner - Bert Howes, ZS6HS; 885 points.

The annual PEARS HF competition starts at 14:00 and ends at 18:00 CAT on Sunday 6 December. It is a phone competition with activity on 7,060 to 7,100 and 7,130 to 7,200 MHz as well as 3,603 to 3,650 and 3,700 to 3,800 MHz.

There are four classes of participation: Novice - stations with ZU prefixes; Restricted - stations with ZR prefixes; Unlimited - stations with ZS prefixes, and lastly; DX - stations outside South Africa.

The exchange is the operator's call sign, a signal report and the operator's name. Full details are available on the PEARS website at www.zs2pe.co.za as well as in the 2009 SARL Competition Handbook.

The ARRL 160 m contest will be on the weekend of 5 and 6 December and the ARRL 10 m contest over the weekend of 12 and 13 December.

HAMNET GAUTENG SOUTH

Hamnet Gauteng South and the Ekurhuleni Disaster Management Specialised Communication Volunteers were once again in action when the Austin Jordaan Night Race was held last week. The race consisted of a five, ten and fifteen km race and all water points and major intersections were monitored. Michelle, ZS6TO, ran the Joint Operations Centre and the volunteers were able to practice their radio procedures. With the 2010 Soccer World Cup just round the corner, these radio amateurs are making use of every opportunity to sharpen their skills and make sure that the command and control structures are in place. All those involved with the event are thanked for their participation.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that solar activities are still at low levels. The surface of the sun has been void of any sunspots for the majority of the week.

15 and 20 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings, it will be moderate towards Europe. In the afternoons there are good possibilities of contacts with the USA on 15 m. Contacts with New Zealand and Australia will be possible for a short while on 15 m during the mornings. During the afternoons and evenings, 15 and 20 m contacts may be possible with Brazil.

Local conditions will be good on 40 m during the daytime. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here, 20 m is once again becoming very useful for contacts over the longer distances. 80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

30 November - closing date for SARL Council nominations; 5 December - West Rand Flea market; 6 December - PEARS HF Contest; 18 December - closing date for the PEARS raffle; 15 January 2010 - closing date for the essay competition; 15 to 17 January 2010 - the PEARS VHF/UHF Contest.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding

the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by Dennis, ZS4BS. The editor was Jannie, ZR6PHD.

Thank you for listening, 73.
/EX

At The Center For Family Development we do not use wraps, compression hold, or holds that utilize provocative stimulation. The following are interventions that we DO NOT USE . . . . shaming a child or eliciting fear to get compliance. Coercing a child to engage in long or painful physical activities in order to get compliance or a response. Wrapping a child, lying on top of a child, rebirthing, or similar techniques. Interventions based on power/control and submission. Interventions that are based solely on compliance.

DID YOU TELL ANYONE ABOUT AMATEUR RADIO THIS WEEK?

QNEWS BROADCAST NOVEMBER 29 2009

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

Here is an initiative aimed at better health that is being promoted Australia wide.

Called Join in Join Up! it is being promoted in pharmacies around the country with the backup of a web site ourcommunity.com.au

The 34 page booklet explaining the Join in Join Up! program is free at your local chemist shop. You can register your local community group on the web site.

What has this to do with amateur radio? Well community groups are part of the community and amateur radio fits nicely into the category Science and Technology, as illustrated on p.25 of the booklet.

Behind this program is a world of research which shows the individual health benefits of involvement in community groups. Clubs and the like help grow stronger ties in their local area and the ripple effect spreads from there.

When we list our club on the WIA web site that is the major point of focus for a person looking for radio amateurs. Here is another way of announcing our presence to people who are looking but may not have a specific idea that our hobby, amateur radio is what they are seeking. Put your club details on ourcommunity.com.au and get to know your pharmacy assistant who is promoting Join in Join Up!.....let's spread the word!

TOWNSVILLE

GREETINGS ! THIS IS DON VK4FNQA WITH THE LATEST NEWS FROM
A SWEATY NORTH QUEENSLAND.

ITS SILLY SEASON AND THERE ARE A LOT OF END OF YEAR FUNCTIONS
TO ATTEND. AMONGST ALL THOSE PARTIES YOU NEED TO DECIDE TO GO TO
INCLUDE THAT STELLAR EVENT ON THE AMATEUR RADIO CALENDAR,
THE TARC 2009 CHRISTMAS PARTY.
IT IS HAPPENING IN TWO WEEKS TIME AT THE VK4TJS SATELLITE DISH CITY.
THE PARTY INCLUDES A MONSTER AUCTION, A MYSTERY PRESSIE AUCTION
AND IS A CATERED EVENT SO YOUR ATTENDANCE NUMBERS
NEED TO BE CONVEYED TO GAVIN VK4ZZ BEFORE DECEMBER 8TH !

NOW HERE IS AN OPPORTUNITY TO OWN A PIECE OF HISTORY.
THE WIRELESS INSTITUTE OF AUSTRALIA HAS JUST RELEASED
THE 2010 CENTENARY ANNIVERSARY CALLBOOK AND TARC IS
GETTING AN ORDER TOGETHER FOR A BOX OF THE BEASTIES.
IF YOU WANT TO BE IN ON THE ORDER THEN CONTACT GAVIN VK4ZZ SOONEST.

DONT FORGET THAT THE TARC MANAGEMENT MEETING WILL BE HAPPENING
THIS TUESDAY DECEMBER FIRST STARTING 7-30PM AT THE CLUB ROOMS
ON TOP OF SES HEADQUARTERS GREEN STREET WEST END.
EVERYONE WELCOME TO ATTEND. EX OFFICIO POSITIONS FOR 2010 WILL
BE DECIDED AT THIS MEETING AND YOU MIGHT GET A JOB EVEN IF YOU DONT
ATTEND. SO MAKE SURE TO ATTEND AND HAVE A SAY !

WELL THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE,
THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC,
AND YOU HAVE BEEN ENJOYING LISTENING TO QNEWS FROM VK4WIA.

NATIONAL AND WIA NEWS HERE.....

TRIPLE ZERO

A man lying in a hospital bed phoned triple zero to get urgent medical help when no one responded to the nurse call button.

The man was in the Hobart Private Hospital's high-dependency unit here in VK7 after an operation and woke to find he was bleeding.

He rang his bell to obtain help from nursing staff, said the Health Complaints Commissioner annual report released yesterday.

Finally, the man called the emergency triple-zero telephone number before he was treated.

Commissioner Allston's report says a night duty supervisor arrived at the man's bedside at the same time as two nurses who had been attending other patients in the ward.

Did space radiation nearly down a jetliner?

Cosmic rays are the latest theory as to the cause of a Qantas flight in October last year that gave its passengers and crew a roller-coaster ride, as the aircraft's nose pitched violently downward twice in rapid succession.

The Australian Transport Safety Board is now seriously considering whether cosmic radiation corrupted the aircraft's flight control systems throwing passengers and in-cabin luggage around.

Eleven passengers and a flight attendant were seriously injured. The jet made an emergency landing rather than continue after plunging 650 feet, leveling out only to drop a further 400 feet.

A stream of high-energy galactic and solar radiation constantly interacts with the Earth's upper atmosphere. This can create neutrons with the potential to affect aircraft avionics systems.

Earlier thoughts that electromagnetic radiation from passenger laptop computers, or powerful radio signals from a military base near the flight path, have both been ruled out as a cause of the malfunction.

The International Space Station experiences cosmic rays interactions and special precautions are taken to protect the space-craft and its crews.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

HAMS ACROSS AUSTRALIA.

Last weekend, Nov 22 Townsville Amateur Radio Club held her 2009 AGM amongst the shady trees and well maintained gardens of Rossiter Park in Aitkenvale.

An eager throng of attendees were at the venue from 7am when Ken VK4QZ cranked up his BBQ with wheels and proceeded to turn out yummy pancakes made to Lex's modified recipe by Richard VK4FRJG.

Not ONLY pancakes, but a true "ham and eggs" feast!

The AGM proceedings got underway from 8-30am and, with a lot of local hams present at the meeting! Details from "MATMAN" in the local QUEENSLAND QNEWS thismorning.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

NOW YOU KNOW!: IT'S ALL GREEK TO ME

Ask any high school physics student and they'll tell you that electrons govern pretty much everything we do. We call electrons in motion an electrical current, and those radio waves that we hams are so fond of are the result of high frequency electrons traveling in our antenna conductors. Think of a 40 meter wave as an accidental tourist who wants to go somewhere (somewhere nice and warm, maybe a rare DX station). But how to get there? It needs some mode of transport -- think of electrons as the transport providers.

We use our transmitters to move the electrons in our antennas to-and-fro to produce radio waves, hopefully to that rare DX destination. When the radio waves get there, they set electrons in another antenna in motion. That current -- electrons in motion -- is amplified and detected at the receiving location and a QSO is made.

But why do we call them electrons? The ancient Greeks noticed that amber attracted small objects when rubbed with fur; apart from lightning, this phenomenon is thought to be man's earliest known experience of electricity. Back in the year 1600, the English physician William Gilbert -- in his treatise De Magnete -- coined the New Latin term electricus to refer to this property of attracting small objects after being rubbed.

(sourced to arrl)

Donation to Irish Society

The IRTS has received a very generous donation from one of its members, John EI6IJ. For health reasons, John has been forced to cease driving and has presented the Society with his 2008 Kia Rio hatchback automatic!

The car has been converted for disabled use and professionally fitted out with a FT857.

It is intended that the proceeds from the sale of the car would be used to assist members who for reasons of changed circumstances such as ill health or change of accommodation are finding it difficult to practice and enjoy their hobby.

The fund would also support the promotion of Amateur Radio in schools and other youth organisations.

Well done John EI6IJ!

INTERNATIONAL NEWS

Icom IC706 has ceased production

News has filtered through from ICOM Japan that the very popular IC-706 Mark 2 G HF VHF UHF Transceiver has ceased production. Advice has also been received from ICOM premium dealer Navcom Electronics that there are only 14 units currently held in stock in Australia and that this stock is expected to deplete rapidly.

There is good news as well though, as from 16 November 2009 all ICOM amateur radio equipment is being backed with a 5 year warranty.

Thanks to Bazz VK4TBD at Navcom Electronics for most of this information.

E-VOTING COMES TO THE RSGB

Electronic voting has come to Radio Society Great Britain's elections. This with word that a new electronic voting system administered by the Electoral Reform Society is now up and running for voting in the RSGB 2009 balloting.

There are four Board places to be filled and Region 9 also has an election for the Regional Representative position. RSGB members have until noon on December 10 to register their vote.

(arnewsline)

FAMED INVENTOR LOUIS KING PASSES AWAY

Louis Arthur King, 94, the founder of Kintronic Labs has passed away.

Considered to be one of the nations finest consulting engineers, Louis King started his engineering career as a professor in the electrical engineering department at Clemson College, now Clemson University. That's where he instituted the teaching of radio engineering courses. He later went on to help design the first air-cooled 50 kilowatt AM transmitter at RCA and received the patent for the bistable multi-vibrator, better known as the flip-flop circuit.

Louis King was recognized by the National Association of Broadcasters in 2007 as the recipient of the NAB Lifetime Radio Engineering Achievement Award.

(arnewsline)

G8KW Silent Key

Rowley Shears G8KW who established KW Electronics has passed away at the age of 90

Those UK Radio Amateurs who joined the hobby in the 1950's or 60's will be familiar with the range of Amateur rigs that KW Electronics produced at the Vanguard Works in Dartford, Kent. During this period KW Electronics was the UK's leading Amateur Radio manufacturer.

Rowley G8KW will be fondly remembered by users of rigs such as the KW Vanguard, KW Valiant, KW Viceroy, KW Vespa, and KW 2000.

(SOUTHGATE)

COMMUNICATIONS IN A SHRIMPS EYE

>From the technology page comes the story of the remarkable eyes of a marine crustacean could inspire the next generation of DVD, CD players and possibly telecommunications gear. This, according to a new study from the University of Bristol published in Nature Photonics. Amateur Radio Newsline's Bruce Tennant, K6PZW, in a recent 'cast said that the mantis shrimps used in the study are found on the Great Barrier Reef here in Australia and have the most complex vision systems known to science. They can see in twelve colours while humans see in only three. Also, it can

distinguish between different forms of polarized light.

Special light-sensitive cells in mantis shrimp eyes act as quarter wave

plates which can rotate the plane of the polarization of a light wave as it travels through it. This capability makes it possible for mantis shrimps to convert linearly polarized light to circularly polarized light and vice versa.

Manmade quarter-wave plates perform this essential function in CD and DVD players and in circular polarizing filters for cameras. However, these

artificial devices only tend to work well for one colour of light while the natural mechanism in the mantis shrimp's eyes works almost perfectly across the whole visible spectrum from near-ultra violet to infra-red.

This would not be the first time humans have looked to the natural world for new ideas. In another bit of research the lobster's compound eye recently inspired the design of an X-ray detector for an astronomical telescope.

This new research into the amazing vision capabilities of the mantis shrimp and how it might one day improve communications in the human world was conducted at the University of Bristol's School of Biological Sciences in collaboration with colleagues the University of Queensland here in VK.

Daniel EI9FHB should be active from the Kish lighthouse until Wednesday 9 December. The Kish lighthouse is located about 10 miles east of Dun Laoghaire

and marks a sandbank on the route to Wales.

It's a 'newish' light, built in '65 and is undergoing a major overhaul of power systems and navigational aids.

Daniel will be operational on HF voice.

WIRELESS WEATHER

Solar Cycle 24 continues to ramp up

Cycle 24 sunspot group has been numbered 11033 by the NOAA/SWPC.
It is located near N17E20 and contains a beta magnetic signature capable of producing very small B class solar flares. SIDC Belgium assigned it Catania #28.

The old solar cycle 24 sunspot group #11029 has produced new sunspots and has been re-numbered 11033 by NOAA/SWPC. SIDC Belgium has given the sunspot group Catania 30.
It is located near N21E47 and contains a beta magnetic signature capable of producing very small B class solar flares.

The NOAA/SWPC sunspot number is 29 (the second highest so far for cycle 24) and the SIDC Belgium sunspot number is 30. The solar flux index (SFI) is 77.4

The new sunspot groups could push the SFI above 80 in coming days. This would raise the maximum usable frequency (MUF) of the F layer high enough to improve propagation conditions on 20, 17 and 15 meters.

Solar cycle 24 continues to ramp up this month!

(Thomas F. Giella, NZ4O via southgate news)

THE QNEWS WORK BENCH - the nuts and volts report -
(Measure twice - Cut once!)

BOSE INTRODUCES WIRELESS STREAMING AUDIO SPEAKER

Audio equipment maker Bose has introduced its new SoundLink wireless music system. This is a one-piece portable speaker system that allows users to play streaming audio from their computer wirelessly in and around the home.

The new SoundLink system was designed as a simple solution for people who listen to sound stored on their computer, but do not necessarily want to be at their computer to hear it. No software or Wi-Fi connection is required. Just plug the included USB key into the computer, select the sound from any Internet source and the audio will stream to the SoundLink system via a

long-range wireless link that works through most walls and floors.

The included infrared remote control operates the power and volume.
It can also send transport control commands to most applications, allowing users to skip tracks or play/pause from a distance. More information about this novel product is on-line at www.Bose.com

(ARNewsLine)

PL-259 CONNECTOR TOOL FOR COAX CABLES

Tired of using pliers to screw on the PL-259 connectors when you are preparing cables?

This work bench tip from the pages of the ARRL Letter.

Pliers always seem to do some damage by the amount of force this task requires.

I use an inexpensive 1/2 inch PVC female to male coupler.

Simply use a step drill and ream out the female end. This works for most half inch coaxial cables.

PL-259s do vary in diameter.

Be sure to measure yours before you ream out the PVC adapter.

It will not take a lot of reaming for the connector to fit snugly. The outer part of the PL-259 that fits into the connector is 0.55 inch diameter. This makes a secure fit.

If you wear out the adapter, purchase another, as they are inexpensive.

This works for Paul K4AVU.

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

OLD TIMERS
Members and friends of the Radio Amateurs Old Timers Club Australia are reminded that the next news and information broadcast will take place on the first Monday of the Month.

using the RAOTC callsign of VK3OTN.

10.00 am Victorian time on 7.060 and 3.650 MHz plus 1.843 MHz AM, and 145.700.

On 14.150 MHz at 01.00 UTC beaming north and 02:00 UTC west from Melbourne

For those not yet retired, 8.30 PM Victorian time tune 80 metres 3.650 MHz and in Tasmania, but at Victorian time, 8:30 on the Mount Duncan repeater 146.625.

With the objective to maintain interest and good fellowship among those who qualify for membership, full membership of the RAOTC is available to any person who has held, or has been qualified to hold, an Amateur Licence for a minimum of 25 years.

Associate membership is available to any person who has held, or has been qualified to hold, an Amateur Licence for a minimum of 10 years.

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN

Become a Martian

NASA and Microsoft Corp. have collaborated to create a Web site where
Internet users can have fun while advancing their knowledge of Mars.

Drawing on observations from NASA's Mars missions, the 'Be a Martian' Web site
will enable the public to participate as citizen scientists to improve Martian
maps, take part in research tasks, and assist Mars science teams studying data
about the Red Planet.

"We're at a point in history where everyone can be an explorer,"
said Doug McCuistion, director of the Mars Exploration Program at
NASA Headquarters in Washington. "With so much data coming back from
Mars missions that are accessible by all, exploring Mars has become a shared
human endeavor. People worldwide can expand the specialized efforts of a few
hundred Mars mission team members and make authentic contributions of their
own."

Participants will be able to explore details of the solar system's grandest
canyon, which resides on Mars. Users can call up images in the
Valles Marineris canyon before moving on to chart the entire Red Planet.
The collaboration of thousands of participants could assist scientists in
producing far better maps, smoother zoom-in views, and make for easier
interpretation of Martian surface changes.

To enroll as a virtual Martian citizen and start exploring, visit the url
typed up in this weeks text editions of WIA National News.

http://beamartian.jpl.nasa.gov

(SouthGate)

WW SPECIAL INTEREST GROUPS --- QRP

Version 2.0 of WSPR released

Joe Taylor K1JT has released a new version of his Weak Signal Propagation
Reporter software WSPR

WSPR (pronounced "whisper") stands for "Weak Signal Propagation Reporter."
This program is designed for sending and receiving low-power transmissions
to test propagation paths on the MF and HF bands. Users with internet access
can watch results in real time at WSPRnet.

WSPR 2.0 introduces a number of new features including a user-friendly setup screen with drop-down selection of audio devices and rig-control parameters, support for compound callsigns, fine selection of the fractional time for transmitting, and a Tune button.

A new Advanced setup screen offers optional CW identification and tools for frequency calibration and automated frequency corrections for your radio.

Full details are presented in the WSPR 2.0 User's Guide, which you will need to read in order to use the new features.

WSPR 2.0 can be downloaded from
http://physics.princeton.edu/pulsar/K1JT/wspr.html

VK3RTV DATV update

The digital amateur television VK3RTV on Mt Dandenong east of Melbourne is now operational with analogue inputs on 1250MHz and 10.41GHz, and now DVB-S on 1276MHz.

A new downlink antenna is being built for DVB-S on 1250MHz.

Repeater custodian Peter Cossins VK3BFG advises that it is resulting in very good quality and no pixellation on fast moving objects.

VK3RTV operates on 446.5MHz with a multiplexed output providing VK3RTV1 and VK3RTV2. Each channel runs at 5.5 Megabits.

There are many Set Top Boxes, and some USB digital receivers with manual tune capability that will receive the signal.

Further developments with the VK3RTV project include touch tone selected signal and quality reports.

A number of radio amateurs are receiving VK3RTV on a domestic television antenna. Others need a good 70cm yagi.

The digitisation of VK3RTV is funded by Amateur Radio Victoria with additional support of $1,000 from the WIA Club Grants Program, plus volunteer out of pocket and in-kind donations.

I'm Barry Robinson VK3PV and you're listening to VK1WIA

REWIND - A LOOK BACK IN HISTORY

THE WORLDS FIRST RADIO STATION

What is the world's first radio station? Although AM radio broadcasts were tested in 1906 and used for voice and music broadcasts up until WW1 it wasn't until 1916 in Wilkinsburg, Pennsylvania when 8XK began regularly

scheduled broadcasts. 8XK would receive the first official broadcasting license in 1920 with the call sign KDKA.

But there's more to this story. At 6:00 PM on November 2, 1920 the US presidential election returns were announced from a shack in East Pittsburgh by Leo Rosenberg and KDKA became the world's first commercial radio station.

More on this story is at the National Museum of Broadcasting website at the U-R-L found in this weeks printed report.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 29th November 2009

IRTS Callbook 2010

A copy of the printed Call Book 2010 has been posted to all members, including those who receive newsletters by electronic distribution only.

As you may wish to add the Call Book pdf to your collection, the electronic version has been made available on the Electronic Distribution download page. Which members who have opted for electronic distribution can access.

IRTS Radio News via ATV

The IRTS radio news which is normally broadcast by South Eastern Amateur Radio Group at 9.30 p.m. on Tuesday nights via the Southern Ireland Repeater Network is now available live via the EI8WDT, ATV (television) repeater from Dungarvan, Co. Waterford.

A live video feed is available each Tuesday night at www.ei8ffb.com (details and link to EI8FFB are available on the SEARG web site at www.searg.com).

Galway VHF Group 24 hour Radio Operation from RNLI Stations

The final operation from the Galway VHF is taking place from Clifden Lifeboat Station, Ballyconneely, this weekend the 28th and 29th of November. The callsign will be EI 185 RNLI

All operation will take place on the HF bands with two stations in operation at all times. There will be operation on Phone and Digital Modes with some operation on SSTV also possible. There will be a special QSL card for all contacts made and SWL reports will also be welcomed. Varying types of antenna

construction will be used including a Kite antenna for the LF bands.

Mayo Radio Rally

The Mayo Radio Experimenters' would like to sincerely thank the traders and customers who turned up in Castlebar on Sunday last, for the Mayo Radio Rally. While numbers were slightly down on last year's record high, the huge turnout on the day was totally unexpected given the horrible road and weather conditions.

The door prize, which was sponsored by the Welcome Inn Hotel, was won by Mr. Mark Hillary, of Bearvaish, Rathmuller, Ballymote, Co. Sligo.

There was a great turnout on the Saturday night for the very entertaining and interesting presentation by Declan Craig, EI6FR, and the club wishes to thank Declan and those who attended. The next meeting of the club is on Wednesday December 2nd. at 9.30pm in the Welcome Inn Hotel.

Trans Atlantic re-mailer

There is a Trans-Atlantic email re-mailer established with the help of websites QSL.net & QTH.net If you are interested, Please subscribe. In addition to Amateur Radio Licensees, FM & TV DX'ers are welcomed as well as anyone that has a real interest. Please feel free to pass on this information to anyone that you feel would be sincerely interested.

Transatlantic--This remailer is amateur radio operators and dxers that are interested in completing or helping to complete a contact across the Atlantic from North or South America or the Caribbean to Europe or Africa and their associated islands on 144 MHz or above. Reports, discussion and liason activities are welcomed. This includes discussion of possible or actual Trans-Atlantic propagation above 70MHz, including the FM Broadcast, TV, and all Amateur bands. General information about the mailing list is at: http://mailman.qth.net/mailman/listinfo/transatlantic

Kish Lighthouse Activation

Daniel EI9FHB should be active from the Kish lighthouse from Sunday 22nd of November until Wednesday 9th of

December. The Kish lighthouse is located about 10 miles east of Dun Laoghaire and marks a sandbank on the route to Wales. The lighthouse was built in 1965 and is undergoing a major overhaul of power systems and navigational aids.

Daniel will be operational on HF voice and 2M & 70cm FM. Operating will be mainly on Sundays and after 7pm other days. The worked all Ireland frequencies will be used where possible.

Lufthansa Amateur Radio Club on-the-air from Dubai

The LARC (Lufthansa Amateur Radio Club) in cooperation with the Emirates Amateur Radio Society (EARS) will be operating as A65DLH out of Dubai, United Arab Emirates, from 23-30 November.

Activity is planned on all bands 160-10m, using CW/SSB/Digi Modes and also in the CQWWDX CW contest.

QSL via DO7ZZ info on QRZ.com

Great Tower of Breda - Special Event Station

Look for special event station PB500GT to be active between November 28th and December 13th.

Activity is to celebrate the 500th anniversary of the 'Great Tower of Breda'

Operators will operate at a height of 65m from the Great Toren. This Great Tower is located in the middle of the city.

Operations will be on 80/40/20/2 meters using SSB and the Digital modes.

QSL Manager is Willem, PA1WLB.

Crossakiel Amateur Radio Association

CARA are organising a visit to the Hurdy Gurdy Radio Museum EI0MAR on 13th December Members are requested to contact CARA Secretary, John to secure their place.

John can be contacted at ei6ghb /at/ o2.ie CARA meet every Wednesday at 20.30 Visitors welcome.

Shannon Basin Radio Club AGM

The Shannon Basin Radio Club will hold its AGM on
Friday 11th Dec at 20.30 in Hannons Hotel, Roscommon.

All members are asked to attend and new members are
always welcome. Festive Refreshments will be available
on the night.

South Dublin Radio Club

This year's South Dublin Radio Club Christmas Party
will take place on Tuesday the 15th of December.

The venue will be the same as last year, "The Morgue",
Tempelogue Village from 8.00 pm until late.

Members of other clubs and visitors are as usual very
welcome to this social event. Limited free food will be
available for paid-up members; visitors can choose from
the bar menu until 9.00 pm.

Joint Club Christmas Dinner

The North Dublin Radio Club, Fingal Radio Club and the
Howth Martello Radio Group are having a joint Christmas
dinner on Saturday 19th December. The restaurant in the
Coachman's Inn near Dublin Airport is the venue and the
meal will start at 8:30pm.

The Christmas menu is €19.25 with an a la carte menu
also available. This is the second year that this joint
dinner has been organised. Last year's dinner was a
great success and so this year it has been decided to
invite other amateurs, SWLs and friends. Lapsed members
of both clubs would be particularly welcome.

Places are limited and early booking is recommended. If
interested please email tony /at/ ei0mar.org as soon as
possible to make a reservation.

for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday�s bulletin.

2433. Invitation to take part in Skywarn Appreciation Day (Valley, Nebraska)

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-01 06:19:44 UTC
From: ARRL NE Section <memberlist@www.arrl.org>
Message-ID: <20091130183801.EC84E32A92B@bmailer.arrl.org>
Source record: 6247
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,oma.general,nebr.misc,nebr.gov,rec.radio.info

This was forwarded to me by Dave, W0NRW:

Greetings:
NWS (National Weather Service) here in Valley wishes to extend an
invitation to come out and operate the W0NWS station as part of the
Skywarn Appreciation Day.

The times are 6PM Friday Dec. 4 to Saturday 6PM Dec. 5. The address is
6707 N. 288th Street Valley Ne.

If you get lost 402-359-5166 or someone will be listening on
146.94MHz.

I believe this is year 11 for the event.
Geri Norris N5RIG

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

2435. GRE Invitation to CES 2010

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-03 00:53:44 UTC
From: me@privacy.net
Message-ID: <hf726o$2t6$1@news.eternal-september.org>
Source record: 6249
Cross-posted to: rec.radio.scanner,rec.radio.swap,rec.radio.shortwave,rec.radio.amateur.misc

CES 2010 is just around the corner and we would like to see you there.

We would like to invite you to CES 2010 and ask you to stop by the GRE booth #37008 in the South Hall 4. This year GRE will have a great exhibition of Classic Radios from years past. This Exhibit will definitely take you back in time and relive some old tuning memories. Along with the Classic Radio Exhibit, GRE will also bring the GRECOM product family, LCD Division, the GRE Team, and some new additions to the GRE family that will definitely spark your interest. Stay tuned for some more information…
CES Schedule:

Thursday, January 7: 10 a.m.-6 p.m.
Friday, January 8: 9 a.m.-6 p.m.
Saturday, January 9: 9 a.m.-6 p.m.
Sunday, January 10: 9 a.m.-4 p.m.

Visit http://www.CESweb.org/register before December 15 and register for free. Use Priority code INVT , and CES will waive the registration fee. For over four decades the Consumer Electronics Association (CEA) has hosted the International Consumer Electronic Show (CES), bringing together a number of different innovative corporations that make up the exciting Consumer Electronics Industry. CES 2010 will be held at the Las Vegas Convention Center from January 7th through the 10th (Thursday-Sunday) and GRE, the leader in communication technology and the #1 scanner manufacturer, will be exhibiting along with the rest of the Industry’s leaders.

==> + ADVOCACY: ARRL CEO, GENERAL COUNSEL PRESENT ARRL'S STANCE ON BPL
TO FCC COMMISSIONERS

ARRL Chief Executive Officer David Sumner, K1ZZ, and General Counsel
Chris Imlay, W3KD, made the rounds of the five FCC Commissioners'
offices during November to acquaint them with the ARRL's position on
the regulation of interference from Broadband over Power Lines (BPL
<http://www.arrl.org/tis/info/HTML/plc/>) systems. The meetings were
conducted in accordance with the rules governing ex parte
communications in pending rulemaking proceedings, in this case the
Further Notice of Proposed Rule Making (FNPRM) in ET Docket No. 04-37.

==> + OPERATING: FROM ONE END OF HF TO THE OTHER: THE ARRL 160 METER
AND 10 METER CONTESTS
```

Both MF and HF offer a lot of breathing room for all interests in Amateur Radio. As the 2009-2010 Contest Season continues, two single-band events in December will highlight the magic of the opposite ends of the shortwave spectrum: the ARRL 160 Meter Contest (2200 UTC Friday, December 4 through 1559 UTC Sunday, December 6) and the ARRL 10 Meter Contest (0000 UTC Saturday, December 12 through 2359 UTC Sunday, December 13). Read more here <http://www.arrl.org/news/stories/2009/12/01/11222/?nc=1>.

==> + OPERATING: ARRL'S LOGBOOK OF THE WORLD REACHES NEW MILESTONES

To date, more than 30,000 hams have entered more than 250 million QSOs into Logbook of The World (LoTW), the ARRL's online logging program. At this time last year, 22,959 hams had made just more than 192 million QSOs, marking an upswing in both users and QSOs of about 24 percent. The LoTW system is a repository of log records submitted by amateurs from around the world. When both participants in a QSO submit matching QSO records to LoTW, the result is a QSL that can be used for ARRL award credit. While US amateurs do not need to be members of the ARRL to use LoTW, only members can use LoTW to apply for ARRL awards, such as DXCC and Worked All States (WAS). Some awards, like the Triple Play Award, only use LoTW credits instead of traditional QSL cards (foreign amateurs do not need to be ARRL members to apply for ARRL awards). Read more here <http://www.arrl.org/news/stories/2009/12/03/11229/?nc=1>.

==> + THE DOCTOR IS IN: THE FUN -- AND CHALLENGES -- OF TOPBAND

By ARRL News Editor S. Khrystyne Keane, K1SFA

I have been fascinated with the 160 meter band even before I upgraded to General back in 2007 -- it amazes me that amateurs can use radio waves that stretch out that long. I've also been working on getting my CW skills up to speed -- while I can send fairly quickly and cleanly, I know that my receiving skills need some work. The idea of combining my favorite band with a new (for me) mode of operating -- in a contest, no less -- is very titillating, to say the least. Can you tell I'm itching for the ARRL 160 Meter Contest <http://www.arrl.org/contests/rules/2009/160-meters.html> to get here now?

So the other day, the Doctor and I got to talking (his clinic is right next to my office, so we have quite a few conversations about Amateur Radio during his office hours). I asked him if he knew why the 160 meter band has what some might consider "special properties" during the North American winter. And when I get on the air this weekend for the contest, is there anything I should watch out for?

The Doctor -- who was in between patients at the time -- told me that atmospheric noise tends to increase with decreasing frequency -- since there is generally much less noise in winter, 160 meters is much more usable in the colder months. Our current position in the sunspot cycle makes the maximum usable frequency quite low on most days. The combination of these factors makes 160 a great spot -- just in time for

the upcoming contest.

The key challenge, he told me -- and perhaps the most important factor for success on topband -- is antenna design and deployment. Since horizontal antennas need to be hundreds of feet high to provide useful low angle performance, the successful 160 meter DX operator will use vertical antennas. While arrays of full size 1/4 wave (126 feet) verticals are feasible for some, most use shortened antennas, either as a single element or in multi-element arrays with reasonable success. Recent QST articles have provided a variety of designs of such elements, some almost invisible. Improved reception can be obtained using special receive antennas that reduce noise pickup faster than reducing signal reception. The resulting weak signal generally has a higher signal-to-noise ratio than that from the transmitting antenna.

Wow! If you haven't tried 160, a contest like the ARRL 160 Meter Contest provides an abundance of signals to let you know what your station can do. Do you have a question or a problem for the Doctor? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> COMING UP IN QST : LOOK FOR THE JANUARY ISSUE OF QST TO ARRIVE SOON

<http://www.youtube.com/watch?v=KZGs12TPGws> The January issue of QST <http://www.arrl.org/qst> -- our first-ever DIY edition -- is jam-packed with all sorts of news and information that today's Amateur Radio operator needs. With a focus on "do it yourself" projects that you can build in as little as a couple of days (or even an afternoon!), the January issue also includes product reviews, experiments, public service and on-the-air activities -- something for just about everyone. Click here <http://www.arrl.org/news/stories/2009/12/02/11228/?nc=1> to discover what's in store for you in the January issue of QST, the official journal of the ARRL.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature -- including convenient Web links to useful information -- is a concise monthly update of some of the things ARRL is doing on behalf of its members, such as holding elections for the two positions on the ARRL Board of Directors and 10 Section Managers, providing support for affected Sections during Tropical Storm Ida, conducting a frequency measuring test, sending out certificates and plaques for various ARRL contests and more. This installment covers the month of November. Read more here <http://www.arrl.org/news/features/2009/12/01/11225/?nc=1>.

==> + NOW YOU KNOW!: A BRIEF HISTORY OF MODERN DAY 160 METERS

By ARRL News Editor S. Khrystyne Keane, K1SFA

This year marks the 40th anniversary of the ARRL 160 Meter Contest. In 1970, the ARRL Board of Directors authorized this new event at their meeting in May. According to the announcement that appeared in the October 1970 edition of QST <http://p1k.arrl.org/cgi-bin/topdf.cgi?id=63900&pub=qst>, the ARRL Contest Advisory Committee (CAC <http://www.arrl.org/contests/cac.html>) and "numerous 'top banders'" provided the guidance for the contest; based on their recommendations, they created its initial format.

<http://www.arrl.org/news/files/LimitationsFor160_1979.pdf> Those licensed prior to May 1981 can surely remember the limitations on 160 meters due to the LORAN-A (Long Range Aid to Navigation) stations. These stations -- developed during World War II -- used signals that were transmitted on frequencies in and around our present-day 160 meter band. The LORAN-A stations were responsible for reduced Amateur Radio operations -- including frequency and power limitations -- on 160 meters in the United States.

If you look at license manuals from this time, you will find a chart (Part 97.61, Authorized Frequencies and Emissions) that dictated how much power amateurs could use on topband. This was broken up into band segments of 25 kHz, going from 1800 kHz up to 2000 kHz. In band segments of 25 kHz, it lists each US state and dictated how much power could be used during the day and during the night. For example, amateurs in Connecticut on 1844 kHz could use 100 W during the day, but had to go down to 25 W at night; Connecticut hams were not even allowed on during the day or night between 1850-1975 kHz! Conversely, Oklahoma hams had daytime topband privileges of 1000 W and could use 200 W at night on 1800-1825 kHz.

On May 21, 1981, US amateurs got some good news when the FCC lifted most of the restrictions on 1800-1900 kHz: For the first time, kilowatt powers were authorized for both daytime and nighttime use as the LORAN-A stations were being phased out. In 1979, the Coast Guard began replacing the LORAN-A stations with LORAN-C stations. These newer stations operate on 100 kHz, enabling the restrictions on 160 meters due to LORAN functions to be dropped.

Most amateur transceivers didn't even begin to include 160 meters until the influx of Japanese imports began in the 1970s. As a result of that -- as well as the elimination of the HF LORAN system -- 160 meters has grown in popularity over the past couple of decades. Now in its 40th year, the ARRL 160 Meter Contest is still growing. From the first running in 1970 with 270 logs submitted, to 2008 with 1280 logs submitted, more amateurs are becoming fascinated with all that topband has to offer. If you've never been on 160 before, try making a few contacts. If you're a topband veteran, this is the chance to strut your stuff. For more information on 160 meters, check out DXing on the Edge: The Thrill of 160 Meters <6354> by Jeff Briggs K1ZM. Now you know!

==> + ARRL RECOGNIZES: A. ROBERT PATZLAFF, W9JQT , WINS NOVEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for October is A. Robert Patzlaff, W9JQT , for his article "The Rockless, a VFO Controlled Low Power Transceiver." Congratulations Robert! The winner of the QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/members-only/QSTvote.html>. Cast a ballot for your favorite article in the December issue by Thursday, December 31.

==> + SILENT KEY: JERRY SEVICK, W2FMI (SK)

Jerry Sevick, W2FMI -- renowned for his research and publications related to short vertical antennas and transmission line transformers -- passed away on Sunday, November 29. He was 90. In 2004, Sevick, an ARRL Technical Advisor, received the ARRL Hudson Division Technical Achievement Award; in 2005, he received the Dayton Hamvention Technical Excellence Award. The Hamvention Awards Committee noted that Sevick's April 1978 QST article on short ground-radial systems "now serves as the world's standard for earth conductivity measurements." Read more here <http://www.arrl.org/news/stories/2009/12/01/11226/?nc=1>.

==> SOLAR UPDATE

Tad "The snake all winter-thin cast on sunny bank its skin <http://englishhistory.net/keats/poetry/fancy.html>" Cook, K7RA, reports: The recent sunspot activity, which ended on November 22, pushed up the moving average we've been tracking for several years. Because we have all the data for November, we now know the 3-month average of daily sunspot numbers centered on October. For 2009, the 3 month moving average (centered on January through October) was 2.19, 2.02, 1.49, 2.01, 4.23, 5.2, 4.0, 4.0, 4.64 and 7.1. The latest value is the highest since April 2008, when it was 8.89. The monthly averages of daily sunspot numbers are also rising, although not as smoothly as the three month average. The monthly averages for March through November 2009 are 0.77, 1.27, 3.97, 6.6, 5.07, 0.39, 6.6, 7.0 and 7.7. The November average is the highest since March 2008 when it was 15.87. Geophysical Institute Prague predicts quiet to unsettled conditions December 4, unsettled December 5 and quiet December 6-10. Current projections show a steady quiet planetary A index of 5 for December 3 and 4, then 8 for December 5-6 and back to 5 through the end of the month. Solar flux predictions show December 3-7 at 71, 72 on December 8-10 then 75 on December 11-23. The predicted solar flux value of 75 seems to correspond to the return of an active region that we can see emerging from the dark spot on STEREO. An area that looked promising a few days ago has moved over the horizon and not produced any sunspots. Look for more information in the Solar Update, available on the ARRL Web site on Friday, December 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' Fancy <http://englishhistory.net/keats/poetry/fancy.html>.

==> ARRL PUBLICATIONS: TWO NEW PRODUCTS -- JUST IN TIME FOR THE HOLIDAYS!

If you're still looking for that "just right" stocking stuffer for the ham in your life (or maybe you want to treat yourself), look no further than the ARRL Online Store. This holiday season, we are proud to present two new items: the ARRL holiday ornament and the Pocket Ref by Thomas Glover. Check them out here <http://www.arrl.org/news/stories/2009/11/30/11223/?nc=1>.

==> THIS WEEK ON THE RADIO

This week, the ARRL 160 Meter Contest <http://www.arrl.org/contests/rules/2009/160-meters.html> is December 4-6 and the ARRL International EME Competition <http://www.arrl.org/contests/rules/2009/eme.html> is December 5-6. The TARA RTTY Melee and the Wake-Up! QRP Sprint are December 5. The TOPS Activity Contest is December 5-6, the ARS Spartan Sprint is December 8 and the NAQCC Straight Key/Bug Sprint is December 9. Next week, the ARRL 10 Meter Contest <http://www.arrl.org/contests/rules/2009/10-meters.html> is December 12-13. The Feld Hell Sprint is December 12. The MDXA PSK DeathMatch and the International Naval Contest are December 12-13. The NA High Speed Meteor Scatter Winter Rally is December 12-16. The SKCC Weekend Sprint and the CQC Great Colorado Snowshoe Run are December 13. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, December 27, 2009, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, January 8, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1686 - December 4 2009

Amateur Radio Newsline report number 1686 with a release date of
Friday, December 4th 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC says its finally time to codify the
Vanity Callsign system, more waivers granted by the FCC for employers
to use ham employees in rescue radio drills, U-K hams stand ready if a
bridge falls and Irelands national ham radio society gets an unexpected
gift. Find out the details on Amateur Radio Newsline(tm) report number
1686 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC LOOKS TO CODIFY VANITY CALLSIGN SYSTEM

The FCC has issued a Notice of Proposed Rule Making titled WT Docket
09-209 that seeks to amend the Commission's Amateur Radio Service
rules. This, to clarify certain regulations and codify existing
procedures governing the vanity call sign system. It also would
revise certain rules applicable to club stations. Bruce Tennant,
K6PZW, reports:

--

According to the FCC's November 25th release, almost 80,000 ham radio
licensees have replaced their sequentially issued call signs with a vanity
call sign since the program began in 1996. The FCC says the program began
it established what tit called "the broad outlines" of the vanity call sign
system to function under. As part of it the FCC concluded that call signs
generally should not be available for reassignment for two years following
the death of a licensee, or expiration or termination of the license for
that call sign. In doing so, the Commission made exceptions for former
holders of the call sign, close relatives of a deceased former holder and
club stations of which a deceased former holder was a member.

The Commission did not, however, specify all of the procedures governing
the vanity call sign system. Rather it indicated that the procedures would
be set out in the Public Notices announcing 'starting gates' for the groups
receiving initial priority and that the procedures would be adjusted from
gate to gate as experience dictated. The procedures announced in that 1996
Public Notices announcing those gates are still in effect, but they are not
set forth in the Commission's Rules. WT Docket 09-209 states that the FCC
now believes that certain provisions should be codified into its rules, and

others added, so that the vanity call sign system will be fair, equitable and transparent to all amateur service licensees.

Also when it released the 1996 vanity callsign Report and Order it used the opportunity to resume issuing new club station licenses. It now says that it believes that certain rule changes to the club station licensing rules may be appropriate.

For the Amateur Radio Newsline, I'm Bruce Tenant, K6PZW, in Los Angeles.

--

The comment period for WT Docket No. 09-209 will extend for 60 days after it is published in the Federal Register. Historically, items appear in the Federal Register approximately 7 to 10 days after they appear on the FCC Web site. Reply comments can be made up to 75 days after publication in the Federal Register.
You can fine out more at
www.arrl.org/news/stories/2009/11/25/11220/?nc=1. (ARRL)

RADIO EDUCATION: UNDERASTANDING THE VANITY CALLSIGN PROGRAM

And speaking about the Vanity Callsign System, have you ever wondered how it really works? Well the December issue of CQ Magazine truly does have all the answers. And it has them in a way that anyone can understand without having to have a copy of the Part 97 Amateur Service Rules at hand.

The article is titled The Perils and Pitfalls of Getting a Vanity Casllsign and its author is none other than, Fred Maia, W5YI, who was the founder of the nations second largest Volunteer Examiner Coordinator simply known as the W5YI VEC. And using a very simple question and answer format, Fred takes us on a trip from the dawning of the Vanity Callsign System to the present. Along the way he explains who is eligible for what type of vanity call, the reasons for this, the exceptions to the mandatory waiting time for a call to become available and much more.

If you have ever had any questions about the Vanity Callsign system and how to navigate it, this is your chance to get every detail in a clear and concise manner. Again the article is titled The Perils and Pitfalls of Getting a Vanity Casllsign by Fred Maia, W5YI. It begins on page 30 of the December 2009 issue of CQ Magazine that's on-sale right now. (CQ)

RESCUE RADIO: MORE PART 97:113(a) (3) WAIVERS GRANTED BY FCC

The FCC has granted several more requests by hospitals and government agencies to permit hams in their employ to take part in emergency communications preparedness drills. Covered under this latest round of waivers to Section 97.113(a)(3) of the Amateur Service Rules are the Murray County Medical Center in Slayton, Minnesota; the Center for Emergency Response to Terrorism of the Missouri Department of Health and Senior

Services in Jefferson City, Missouri; the Culver City Fire Department in Culver City, California; the Draper City Police Department of Draper, Utah and the Town of North Attleboro and its Board of Health of North Attleboro, Massachusetts.

While most of the requests were for single day events, some like the request from the Draper City Police Department and the Murray County Medical Center were for multiple drills spread across several months. Both were given permits use of on staff hams on December 2, 2009 plus January 6, February 3, March 3, April 7, May 5, and June 2 of 2010. The FCC also opened to door to granting further dates and additional hams by filing a separate waiver request.

The FCC issued its first waiver of 97.113(a)(3) back on October 27th to the Commonwealth of Kentucky for a full-scale exercise on October 28th. In granting all of these waivers the FCC stated that it was in the public's interest to do so. (FCC)

RADIO POLITICS: IARU SAYS TO GET READY FOR WRC-12

The next World Radiocommunications Conference takes place in January of 2012 and ham radio is making ready to face any challenges that it might bring to the service.

The International Amateur Radio Union's Secretary is Rod Stafford, W6ROD. He says that every IARU member society capable of doing so, should take the initiative to be in contact with their own telecommunications administration and let the it know what the Union's position is on those agenda items that influence the amateur radio service.

The most significant of these so far are the implementation of the radiolocation service in the range 30 to 300 MHz; the possible allocations in the range 3 to 50 MHz to the radiolocation service for oceanographic radar applications and the effect of emissions from short-range devices.

Also likely to be discussed is a ham radio allocation of about 15 kHz in parts of the band from 415 to 526.5 kHz. This, on a secondary basis and taking into account the need to protect existing services. (Southgate)

RESCUE RADIO: UK HAMS WILL REPLACE PHONES IF CALVA BRIDGE FALLS

Preparations have been made to use amateur radio instead of telephones for calls to the emergency services. This if the Calva bridge near the United Kingdom city Cumbria collapses due to flooding. The North Pennines RAYNET Group website says should the bridge fall that it will be called out to cover 999 calls and this will be 24 hours a day operation until other lines of communications can be re-established.

According to a Cumbria County Council news release, if a collapse of the bridge takes place telephone communications would be lost to around 3,000

homes north of the river. To maintain communications to that area it says that ham radio operators will be available at certain locations to pass on calls to the various emergency services. Telephone service to the community affected is carried by cables that span the bridge. Ehile British Telecom believes alternate lines could handle any calls, the RAYNET hams are prepared for a full scale callout if they are needed.

In other U-K flood related news, the North Pennines RAYNET group, supported by RAYNET members from Merseyside, Lancashire and Dumfries & Galloway manned a single radio link from Friday morning, November 27th. It was set up between North Workington and Carlisle to provide resilience for 999 calls following the localized failure of British Telecom's cables due the Northside bridge collapse. The requirement for this finished at 15.30 U-T-C the following day when all lines were restored. (Southgate)

**

BREAK 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N5NBI repeater serving New Orleans Louisiana.

(5 sec pause here)

**

RADIO LAW: ARRL VS MUSTANG OKLAHOMA ON TRANSMISSION BAN

Mustang, Oklahoma officials have yet to respond to a letter from ARRL Attorney Christopher D. Imlay, W3KD. This, regarding the city's attempt to keep a ham radio operators from transmitting. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

The Mustang News on-line newspaper says that back on November 6th, ARRL General Counsel Christopher D. Imlay sent a seven page letter to Mustang city officials In it he urged the city to rescind a certified letter officials sent to Mustang Heights resident John Ripley, KD5WFT on October 30th. That letter told Ripley to stop transmitting from his radio tower.

The city claimed that has jurisdiction over transmissions made by hams based on an ordinance that it enacted in 2000. That law states that any tower, or antenna, not more than 70 feet in height can be owned and operated by a federally licensed amateur radio station operator if it is used exclusively as a receive only facility.

But that law appears to be in direct conflict with the Federal Communications Commission's long standing concept of Federal preemption. That's the mandate that it and only it has jurisdiction over radio transmission.

In his letter Imlay noted that all radio and telecommunications are regulated by the Communications Act of 1934 and cited a half dozen federal cases supporting this position. One was a 1936 lawsuit titled Fisher's Blend Station vs. Tax Commission of the State of Washington. In that action the Supreme Court held that by its very nature broadcasting transcends state lines and is national in its scope and importance. This characteristics said the court brings it within the purpose and protection, and subject to the control, of the commerce clause.

In his letter Imlay wrote that if no action was taken by Mustang that the ARRL would seek a "declaratory ruling" from the Federal Communications Commission. According to the news article Imlay said that if he does not receive a response from Mustang city officials that plans to send another before filing with the FCC.

City Manager Mike Rutledge told the on-line newspaper that he had received Imlay's letter and had referred it to Mustang's attorney. He said any response to the letter is up to the city's legal counsel.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

If the ARRL decides to bring the matter before the FCC and if the agency grants such a declaratory ruling, it would likely at minimum direct the city to rescind its letter banning Ripley from transmitting. It could also go as far as warning the city that it had best keep out of matters that are preempted by Federal government mandate. (MustingNews.info)

RADIO LAW: KEEN EYED HAM HELPS CRAFT ANTENNA ORDENANCE

New regulations for antennas and transmission towers in Dixon, California should not affect amateur radio operators there. This, thanks to a keen eyed local ham who took notice of a proposed ordinance under consideration by the Dixon City Council and made his voice heard.

In May, during a public hearing before the Planning Commission, Dixon resident Bill Paul, KD6JUI, voiced a concern about how a proposed ordinance to set standards regarding antennas and transmission towers might affect ham radio operators in the area. He was also concerned, according to a staff report, that a zoning ordinance that limits the area an antenna or tower can cover, might affect the type or height of antennas a ham radio operator could construct.

Commissioners recommended that the City Council adopt the proposed ordinance, subject to staff working with Paul to try and address the issues. During it's last meeting, the council tentatively approved the ordinance subject to staff removing any regulations that apply to amateur radio antennas. (Vacaville Reporter)

**

RADIO LAW: UK TOWNSHIP OK'S 11 METER HIGH HAM RADIO TOWER

Meantime, some good antenna related news for a ham in Stetton In the U.K.. That's where an amateur radio tower mast which is more than 11 meters high has been given the go ahead by town planners.

Members of Stretton Parish Council had objected to the proposed tower and antenna based on visual impact when the mast was raised. There were also four objections from the ham operators neighbors who claimed it would be out of keeping with the area and could interfere with TV reception in the area.

But the committee was given expert evidence that U.K. telecommunications regulator Ofcom is the agency with jurisdiction over the antenna and that therefore it should not be a consideration. The Radio Society of Great Britain told the planners that the installation of the hams tower and antenna could be of value to the area for use in emergency situations.

After hearing that when retracted that the tower will only be about 5 meters high and weighing all the other evidence before it, the borough council's development control committee backed the plans. An 11 meter high
tower is roughly 36 feet here in the USA. (Southgate)

RADIO BUSINESS: ICOM CONFIRMS IC-706 PRODUCTION HAS NOT CEASED

Contrary to Internet rumors production of the popular IC 706 Mark 2 G has not ceased. The erroneous report of the radio's demise came in a Wireless Institute of Australia news report that said that the 706 was no longer being made and that Navcom Electronics that there are only 14 units currently held in stock in Australia.

While that might be the case down-under, Amateur Radio Newsline has received word from Icom America that the decision to stop selling the IC - 706 was likely a one made by Icom Australia. On this side of the Pacific Icom America says that the IC - 706 MK 2 G will continue in the Icom America product line.

The original IC-706 was introduced over a dozen years ago and quickly developed what might best be described as a cult following. The radio was not all that much bigger than a dual-band FM transceiver of that era, but it packed an amazingly sensitive all band receiver and powerful transmitter ham band transmitter into a relatively tiny package measuring only 6.56" x 2.28" x 7.88".

Over the years the IC-706 has seen many upgrades. The latest version is the Mark II G which adds many new features and capabilities not found in the previous 706 and 706Mk II versions including the UT-106 DSP module as a standard feature. Many hams called it the perfect mobile and portable station and stayed with it even after rival manufacturers brought out their own tiny all band transceivers with similar or even more advanced features. Its also a radio with one of the highest resale values on the used equipment market.

Also included in the WIA story was a claim that Icom was instituting a five year warranty on all of its products. Well that's true only if you live in
Australia. According to Icom America, That is an Icom Australia only project. No other Icom distributor is offering a 5 year warranty. (ARNewsline(tm))

**

RADIO BUSINESS: VK FIRM GENESIS TO OFFER HAM RADIO SDR TRANSCEIVER KIT

Made in Australia may be the label on the next piece of ham gear you buy. This as a company down-under called Genesis Radio announces that it will be producing a new multi-band low power Software Defined Radio transceiver kit to be available world-wide.

The Genesis G59 transceiver will cover the amateur bands from 1.8 to 54 MHz and produce up to 10 watts output when coupled with the GPA10 amplifier. A version with extended band coverage, the G59D that covers the increasingly popular pan-European 70 MHz band should be available sometime next year as well.

More information on this new Australian ham radio transceiver kit available at www.genesisradio.com.au. (Press release)

**

NAMES IN THE NEWS: THREE INCUMBENT ARRL SM'S RE-ELECTED

Three incumbent ARRL Section Managers were re-elected in races that concluded on Tuesday, November 24th. In Alabama, Jay Isbell, KA4KUN out polled challenger Les Rayburn, N1LF by a vote of 513 votes to 167.

Meantime, up in the Alaska Section Manager election, Jim Larsen, AL7FS, of Anchorage, won his second two-year term of office when he received 176 votes. His challenger David Stevens, KL7EB, received only 65.

Lastly, Ron Cowan, KB0DTI, will continue as Kansas Section Manager after he received 382 votes while challenger Joseph Plankinton, WD0DMV, received only 175.

Eight other Section Managers ran unopposed and were declared re-elected. All begin their new terms of office on January 1, 2010. (ARRL)

**

NAMES IN THE NEWS: WA2HWV VIDEO TOUR OF THE VOA TRANSMITTER SITE A

Jim Hawkins, WA2WHV, says that he has uploaded a video of my 1998 tour of Voice of America Transmitter Plant 'A' to YouTube .

Jim says that the title is "Tour of Voice of America Transmitter Plant" and is hosted by Carl Lineberger, former senior technician. In it you will see a lot of the heavy iron that brings V-O-A programming to the world. This includes the giant 500,000 watt Marconi and Continental transmitters as well as some lower power units by Technical Materials Corporation and

General Electric. In the case of the GE transmitter lower power means 250,000 watt capability.

According to WA2WHV the show runs 40 minutes and is broken into 5 parts. You can search for it using the find feature on the YouTube website by inputting the search argument "Tour of Voice of America or Transmitter Plant" or simply "Voice of America Transmitter." Jim adds that he hopes you enjoy taking the video tour. (Southgate)

THE CHANGING OF THE GUARD: DR. JERRY SEVICK, W2FMI - S.K.

One of ham radio's most prolific writers has become a silent key. This with word that Dr. Jerry Sevick, W2FMI, passed away on Sunday, November 29th at age 90.

Jerry Sevick, was a graduate of Wayne State University and a member of its Athletic Hall of Fame. He was drafted by both the Chicago Bears and Detroit Lions, but did not play professional football. He served as a pilot in the US Army Air Corps in WWII. He later graduated from Harvard University, with a doctorate in Applied Physics. He then taught at Wayne State University and worked as the local weather forecaster at WXYZ TV in Detroit. Dr. Sevick also worked for Bell Laboratories in Murray Hill, New Jersey and retired as the Director of Technical Relations. He was also a member of the New
Providence Amateur Radio Club.

It was his interest in amateur radio that launched Dr. Sevick into experiments with short vertical antennas and broadband matching networks. He is noted for a classic series on short vertical antennas that appeared in QST magazine. His April 1978 article on short ground-radial systems now serves as the world's standard for earth conductivity measurements.

In the course of designing networks to match coaxial cable to short ground mounted vertical antennas, the transmission line transformer was looked at as a possible vehicle. He undertook the characterization and design of transformers for low impedance applications. This resulted in his book Transmission Line Transformers, first published in 1990 by the ARRL and currently available from Noble Publishing. He also presented a series on baluns in Communications Quarterly and a series on unbalanced to unbalanced transformers in CQ magazine. The latter was lead to his book titled

Building and Using Baluns and Ununs that was published by CQ in 2003.

Dr. Sevick was a Technical Advisor for the ARRL and a member of IEEE, Sigma Xi, Sigma Pi, Sigma and Phi Delta Kappa. A memorial service was scheduled for December 2nd at the Fellowship Village in Basking Ridge, New Jersey. (Information supplied by KT1B, K9AY, K2SSQ, CQ Magazine, bytemark.com, others)

**

HAM HAPPENINGS: ANNUAL VOIP CONFERENCE IN LAS VEGAS

The 2010 Voice over Internet Protocol Conference will take place on Saturday, April 10th at the Circus-Circus Conference Area in Las Vegas, Nevada.

The event is sponsored by Nevada Amateur Radio Repeaters, Inc. which began it in 2002 as the Internet Radio Linking Project or IRLP was starting to grow world wide. Nowadays the conference is open to all forms of VoIP communications, including IRLP, Echo link, D-Star, All Star Link, and various other associated applications.

The conference starts at 8:30 a.m. and runs until to 5 p.m. local Las Vegas time. Those interested in presenting a topic should let that be known as they register. Questions to w7aor(at) narri (dot) org. More information about the event along with registration forms are on-line at www.narri.org/voip_registration.html (W7AOR, others)

**

HAM RADIO IN SPACE: TIME SHARING ON SO-67

Controllers of the SO-67 SumbandilaSat ham radio transponder are looking for input on the best way to utilize the new ham radio bird. This, because it is a shared payload that cannot be in operation all of the time.

In an effort to make this as painless as possible, SO-67 controller Jan Albert, ZR1AJK, is requesting comments on the possible use of regional coordinators to schedule access to SumbandilaSat. Coordinators would be responsible for setting up agenda's in advance for their specific regions. This, while taking into account the pool of possible satellite passes, as well as the need of the bird for local events. The SO-67 Command Station would then simply load the schedules on a weekly basis.

Initial focus has on Europe, the Republic of South Africa, South and North America including Canada, Japan and Australia, and New Zealand. Now, ZR1JAK is inviting suggestions for amateur radio use of the SumbandilaSat as it flies over other regions as well.

Interested satellite operators are invited to e-mail responses to the AMSAT bulletin board, or if you prefer, to ZR1JAK's work address: jak "at" sunspace "dot" co "dot" za. (Amsat News, ZR1JAK)

**

HAM RADIO IN SPACE: SPECIAL EVENT STATION COMMEMORATES LAUNCH OF XW-1 HAMSAT

To celebrate the launch of China's first amateur satellite called XW-1, AMSAT-China has set up a special event station using the callsign BT3WX. Operations at BT3WX have already commenced and the special event station will remain active until XW-1 is launched. The station plans to operate on all High Frequency amateur bands from 10 to 160 meters and on VHF and UHF amateur satellite bands. On satellites the modes include FM, SSB, CW, RTTY and PACSAT.

A specific launch date for XW-1 has not been released as but is expected in mid-December. The satellite's communications payload will include a beacon and three cross band transponders operating in FM, linear, and digital modes.

Meantime stations completing two-way communications with BT3WX on 9 different bands and modes can apply for the BT3WX H-F Communications Award. Stations completing two-way communications with BT3WX through at least two different modes of transponders can apply for the BT3WX Satellite Communications Award. (ANS)

**

HAM RADION IN SPACE: STRAIGHT KET NIGHT ON OSCAR 2010

AMSAT is inviting hams worldwide to participate in Straight Key Night on OSCAR 2010. Taking part in this event is both fun and quite easy. Just operate CW through any OSCAR satellite between 0000 and 2400 UTC on January 1st 2010, using a straight hand key. There are no other rules, no scoring and no need to send in a log.

In keeping with the friendly nature of this event, all participants are encouraged to nominate someone they worked for "Best Fist" of those you worked. Please send your nomination to w2rs@amsat.org. A list of those nominated will appear in the Amsat News Service and will also be published in the AMSAT Journal. (W2RS, ANS)

**

DX

In D-X word that Willis Island is back on the air. David Burton reports that he has been assigned to the Bureau of Meteorology station on Willis for the next 6 months and will be operating with the call-sign VK9WBM. His station consists of a Icom IC-718 and an Alinco DX70. He will be activating the HF bands and 6 meters using a 2 element quad. QSL via VK4DMC.

K7WZB and K9WZB will be operating as K2V from the island of St. Croix from December 2nd to the 14th. They will use 160 through 6 meters and will be monitoring 6 most of the time for openings to the United States and Europe. Modes available will be SSB, RTTY, CW and PSK-31 on all bands. QSL via K9WZB, direct only. Further info at QRZ.com under the callsign K2V.

M0JAX is looking for 22 people with a full amateur radio license privileges to join a DXpedition to Bahrain in Leaving in February 2011. He is planning a two week trip based at the InterContinental hotel with eight stations on the air 24 hours a day. Operators will be working in three shifts to keep the stations on the air for the two weeks. I you are interested, send your details and why you think you would be an asset to this DXpedition to the Radio Society of Great Britain and attention RadCom Magazine. Your letters will be passed-on to M0JAX.

The S2DX team is preparing for another DXpedition to St. Martin's Island in the Bay of Bengal. The scheduled dates are February 21st to the 25th depending on the dates the licenses that they receive carry. This is the second DXpedition carried out by the group to the same location. They made over 3000 QSO's from there last January.

(Above from various DX news sources)

**

THAT FINAL ITEM: DISABLED HAM DONATES MOBILE TO IRTS

And finally this week, in keeping with the spirit of the upcoming season comes word that the Irish Radio Transmitting Society has received a very generous donation from one of its members. A complete mobile ready to go.

The story goes this way. For health reasons EI6IJ was been forced to cease driving. Instead of putting his car up for sale he instead gifted his 2008 Kia Rio hatchback to Irelands national ham radio society. The vehicle had already been converted for disabled use and professionally outfitted out with a Yaesu FT-857 all band transceiver.

The society says that it won't actually keep the car very long. Instead it will put it up for sale with the proceeds used to assist members who for reasons of changed circumstances such as ill health or change of accommodation are finding it difficult to practice and enjoy their hobby. The monies will also support the promotion of amateur radio in schools and other youth organizations. (IRTS)

GB2RS NEWS

Sunday 6th December 2009

The news headlines

* RSGB election voting closes 10 December

* Date set for start of National Amateur Radio Centre construction

* Commemorating a century since Braun and Marconi won Nobel Prize

Members of the RSGB are reminded that voting for the 2009 elections closes at 12 noon on 10 December. An electronic voting system run by the Electoral Reform Society is available as well as the traditional postal method. There are four Board places to be filled and Region 8 also has an election for the Regional Representative position. Full details of all the candidates and how to vote are in the December RadCom and on the RSGB website at www.rsgb.org.

RSGB General Manager Peter Kirby, G0TWW has announced the start date for building work at the new National Amateur Radio Centre. The work will commence at Bletchley Park on 11 January 2010. Subject to favourable progress, the work is expected to finish in June of the same year. Further details of progress will be announced on GB2RS and in RadCom in due course.

On 10 December 1909 both Braun and Marconi were given the Nobel Prize for physics for their efforts in wireless communication. Long wave transmitter DDH47 of National Weather Service at Pinneberg in Germany will conduct a special broadcast from 9 December, 2300UTC until 10 December 0100UTC on 147.3kHz using 20kW. Special slow Morse code transmissions will take place at the former silence periods of the maritime radio service, 15 to 18 past each hour and 45 to 48 minutes past each hour. Using QRS3, which is one dot in 3 seconds, the names of famous wireless pioneers will be transmitted. Reception reports from distant places are welcome. Amateurs may contact DL0PFB on the HF amateur bands. For further information, check out their website at www.mmqtc-award.org.

The Interim Meeting of the IARU Region 1 HF Committee and the VHF, UHF and Microwave Committee will take place over the period 19 to 21 February 2010 in Vienna, Austria. The IARU Region 1 website now has the full set of both HF and VHF stroke microwave papers for the meeting

from the various National Societies including the RSGB. Check out www.iaru-r1.org for details.

Belgian full licence amateurs are now allowed to operate on 69.950MHz on a secondary basis with 10 watts EIRP and a maximum bandwidth of 10kHz.

Once again Santa's own amateur radio station OH9SCL will be active from Santa Claus Land in the Arctic Circle, during the month of December. Activity will be on 160 through to 10m using CW, SSB and the digital modes. Among Santa's helpers will be operators Raimo, OH3BHL, Erkki, OH9KL, Kimmo, OH9MDV, Juha, OH9MM and Aaro, OH9RJ. The QSL address is on qrz.com under OH9SCL. A special Santa Claus Land award is available.

The Widnes and Runcorn ARC are running an Advanced examination course at Kingsley Parish Church Hall in Pike Lane, Kingsley, Frodsham. The course has been running for one week and is expected to run until March 2010. Any prospective candidates will be more than welcome to attend. The classes are from 7.30 to

2

9.30pm each Friday evening. Further details are available from course tutor Dave Bibby, G1PIX by e-mail to rdbibby@rdbibby.com or telephone 07957 907930.

On Saturday, 19 December Waters & Stanton will hold an open day at their showroom in Hockley and in Glenrothes. The event will be sponsored by Yaesu UK with Yaesu staff on hand to discuss their radios.

And now for the details of rallies and events for the coming week

We have received no details of any rallies taking place in December 2009. The next rallies we have details for in 2010 are the Red Rose Winter Rally and the Dover Amateur Radio Club Rally both taking place on 17 January 2010. If you would like your 2010 rally mentioned in RadCom and on GB2RS, please send details to radcom<at>rsgb.org..uk.

Now for the news of special events

Look for special event station 5P15COP from Sjaelland Island, which is IOTA reference EU-029, to be active between 7 and 18 December. Activity is taking place during the United Nations Copenhagen Climate Change Conference. QSL via OZ5BAL, direct or by the bureau.

On 14 December the special event callsign GB1HF will be on the air in Northern Ireland to commemorate Harry Ferguson, the engineer and inventor who made the first powered flight in Ireland and invented the modern tractor.

And now the HF DX news compiled from 425 DX News and other sources.

EA1BT will be active from Martinique Island between 8 and 15 December as TO1BT. He will be active on HF bands. QSL via home call.

Lee, DS4NMJ will be active from the Korean Antarctic base King Se-Jong on King George Island, South Shetland Islands, which is IOTA reference AN-010, until 31 January 2011 as DT8A. He will be active on all bands mainly CW but also some SSB and RTTY.

Mark, AA1AC, will sign VP9/HC from Bermuda until 12 December. He will be active on the HF bands. QSL via HC direct or bureau.

XE3RR, XE3PP, XE2WK and XE3N will be active from Isla El Cerrito, which is IOTA reference NA-153, between 10 and 14 December as XF3RR

Now the contest news

Today, 6 December, the RSGB 144MHz AFS Contest takes place. If you operate as a member of a club there's no need to be a member of RSGB, but the club must be affiliated. However, if you operate as an individual, you do need to be a member, although check logs from non-members are always welcome. Teams can have a maximum of five members, but there is nothing to prevent a really active and ambitious club from fielding more than one team. The contest takes place between 0900 and 1700UTC and the exchange is signal report, serial number and locator.

3

The 432MHz UK Activity Contest takes place on 8 December from 2000 to 2230UTC. The exchange is signal report, serial number and locator.

Now the solar factual data for the period from the 23rd to the 29th of November, compiled on 30th of November by Neil Clarke, G0CAS.

The solar disc was spotless every day. That's the first spotless week since the middle of October. Solar activity was very low. Solar flux levels declined from 76 units on the 23rd to 72 by the 29th. The average was 74. The 90 day solar flux average on the 29th was 73. That's one unit up on last week. X-ray flux levels remained below the minimum reporting level everyday. Geomagnetic activity was quiet every day. The most disturbed days were the 24th and the 26th with an Ap index of 6 units. The average was 3 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 470 kilometres per second. Particle densities were low except for a brief increase to 18 particles per cubic centimetre on the 24th. Bz varied between minus 7 and plus 5 nanoTeslas on the 24th with variations somewhat less on the quieter days.

And finally the solar forecast. Solar activity is expected to be at very low levels. The solar disc could be spotless on most days. Solar flux levels should be around the 70 mark, but could show a slight increase towards next weekend. Geomagnetic activity is expected to be quiet everyday. MUFs during daylight hours at equal latitudes should be round 23MHzs for the south and 20MHz for the north. Darkness hour lows are expected to be around 7MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90

per cent success rate will be about 17MHz. The best time to try this path will be between 1200 and 1700 UTC.

And that's all for this week from the propagation team.

4

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Sunday 6 December Chesham and District Amateur Radio Society is taking part in the 144MHz Affiliated Societies contest. Contact Terry, G0VFW, on 01442 831 491.

Officially summer is with us and locally to mark the change of season the weather put on a demonstration. As vehicles marked their passage down the local road with a pall of dust and the pastures and household yard now seem covered with faded Christmas tinsel instead of the green grass, it was fair to say that we needed rain.

The Bureau of Meteorology rainfall radar images suggested that the storm cell was going to slither past and out to sea. As the old Brisbane area Storm Watch nets proved time and again, local observed conditions are not necessarily reported, even by good technology. With low level wind bringing rain from one direction meeting the storm rain and hail aprroaching from the opposite direction, we were left with the roar of the wind and a complete whiteout.

>From news reports, it appears that our local school suffered the most damage from the winds and fallen trees. Locally, our access road was closed by two trees blasted out of the ground.

The good thing was that the antenna systems all survived. It has been a lesson well learned from the advice of old timers and experience that when you live in summer storm areas to engineer for expected conditions. Many people, in the early days of CB, learned that their shiny sky hook raised to the sky on water pipe could still be destroyed when the pipe bent or the over tightened guys fractured.
There is good reason to use thin walled mast and to leave sufficient slack in the guys to allow the forced vibrations and stresses to be disappated in the structure.

Even the inverted V survived when a large branch was blown from the tree that is used as a tie off point for the feedline. With our backup battery system, the station was able to stay available for use.

I hope that your preparations have been completed and you don't have to subject them to such a field test. Let us all enjoy the benefits of amateur radio this summer.

Errors and "Emissions"

This note in from our LA studio and Bill Pasternak Editor in Chief of
Amateur Radio News Line

"After rading the story on the IC-706's demise I decieded to check the info
with Ray Novak at Icom. He says its not quite accurate. To quote Ray,

"I guess I was not clear when I said: "'It seems they have decided to
discontinue the product. At this time, it will continue in the ICOM
America product line'." What I meant was in reference to ICOM Australia,
not the production in Japan.

So it seems that its more a local marketing decision by Icom Australia
rather than a global product availability situation. Ill add that I got a
bit suspicious of the item because the IC -706 MK 2 G is still the worlds
biggest selling ham transceiver and I just could not see Icom killing the
goose that lays the proverbial golden radio egg. At least not yet.

Oh and overeas readers.. note that the 5 year warranty seems to be an
ICOM Australia only project as no other ICOM distributor is offering
the 5 year warranty.

Enjoy...

Bill Pasternak, WA6ITF
ARNewsline

During 2009 our Wireless Institute of Australia has been considering training of amateurs for activities associated with emergency communications preparedness. In the July and September issues of Amateur Radio magazine, the WIA Comment focussed on issues surrounding amateur operator emergency communications, training and general preparedness.

>From the feedback received, the Board considered that a national accredited training system was an essential element in the broad range of issues associated with emergency communications provided by amateur operators.

In association with the WIA' s Recognised Training Organisation (RTO), TrainSafe, a nationally recognised training package has now been developed.

The WIA Board has prepared a statement on "where it is at" in the development of the training package and a summary of feedback and issues. The statement and attachments can be found when you visit wia.org.au

Art VK4GO/JA1OGS as we reported some months ago has finished his APRS work in Japan with Kenwood/Yaesu Japan and has settled down in Cairns

>From Cairns he is running an APRS Digipeater, VK4GO-3.

At the latst Cairns Radio Club meeting he told how by replacing an old BBS system a club APRS will soon be "on the airwaves".

With the latest Radioclub meeting seeing 10 members turn up, they got a very good discussion going on how to creat more club activity in the Cairns region.

The next Radio Club meeting in Cairns will be 8 December.

www.wia.org.au/clubs/vk4/CairnsAmateurRadioClub/

(73 all the best Art VK4GO/JA1OGS)

Down the road a piece from Cairns is the garrison city, Townsville and Townsville Amateur Radio Club held its 2009 AGM Sunday November 22rd at Rossiter Park.

The election of the 2010 TARC Management Committee was conducted by Gavin Reibelt VK4ZZ and confirmed the Honorary Membership of

To our Very good buddies in Tassie..

If you were thinking of saying 'Thank you' to your XYL for letting you play radio, how better to do it than by taking her out to lunch.

You can do this in the safe company of other amateurs all doing the same thing, or just plain celebrating, at the RIVERVIEW INN at Lower Sandy Bay on Saturday on the 12th. of December 12:00

Harmonics are welcome, as are non-licensed radio enthusiasts.

RSVP to any WICEN South members, or Rod VK7TRF.

0417314425

(Rod, VK7TRF)

VK9

Of all places we learn the RSGB has details on a local chap who is off to Willis.

They also point out that you can QSL via the WIA on this one or the Bureau.

Seems Dave Burton, VK4ABD will be operating from the Willis Island Bureau of Meteorology site in the Australian Coral Sea Territories from early December 2009 until July 2010 as VK9WBM. Due to shift work commitments there will be no fixed schedule or pre-arranged contacts. Operation will be on the 40m band and above. As the RSGB reports, QSL via

Bureau or WIA

Late news in is that Dale VK4DMC is on top of this dxpedition and will keep WIA National News abreast of our "Weather Man".

HOME OF THE GOOD GUYS

The team of five GB2RS newsreaders in NW England have been given transceivers for 2m, 4m and 6m for use in transmitting the news. The radios have come from Graham, G1PYA, a regular listener to GB2RS. The five newsreaders, G4GSY, G0MRL, G0NAJ, M1NTO and M0HDE would like to record their very great thanks to Graham for this valuable gift, which is so clearly in the traditional spirit of amateur radio.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

An e-mail from France a few weeks ago resulted in ARK's Academy's first

international student registration and today Ted M6EAW (An English Foundation call holder) attended a special short course and then sat and passed his VK foundation license.

Ted arrived in Australia a couple of days ago and braved a rather rainy Melbourne Sunday morning waiting to greet Ted were Lino VK3BAD and John VK3DQ after a brief coffee and one of Jean VK3VIPs home made chocolate muffins it was down to study and a special four hour foundation revision course was done , a lunch of ham and salad rolls went down very well and just after lunch Lionel VK3NM arrived to help with the assessments but not before having his share of the timtams.

After the course of instruction Lino had to leave for a family function

so Lionel and John Put Ted through is exams, the result a pass with flying colours.

Ted has requested the callsign VK3FEAW , Ted will return to France in a

few days time but hopes to return home to Melbourne in a years time , when he would like to study to upgrade his licence , well done Ted !"

CUBA TO PROVIDE PARTS TO HAMS AND WILL MANUFACTURE 160 METER RADIO

According the Cuban news service CAN, that nations Ministry of Informatics and Communications will soon start providing ham radio operators with the components and parts for their equipment. This, from stock that had been left idle for some time.

Pedro Rodriguez, president of the Cuban Amateur Radio Federation told the press that the first 600 units are ready for delivery. He says that by

using them his nations ham radio community will be able to assemble new

stations or update those they already have.

But that's not all. During the recently concluded 8th Cuban Ham Radio Federation Congress, a prototype of a domestically designed transceiver was shown. With the brand name "Caiguaran," the gear was designed by several specialists and will be manufactured at one of the Ministry of Informatics factories.

Josï¿½ Tanquero is one of the hams that worked on the creation of the radio. He told the news service that it
Runs 20 watts out on 160 meters which it's the legal for Cuban Third

Category ham radio license holders. By adding modules both 80 and 40 meters can be covered as well.

The Cuban Amateur Radio Federation has over 5500 members many of whom are involved in both severe weather watch and emergency communications operations. (CAN)

SILENT KEYS

Tragic death of 1996 Young Amateur of the Year runner-up

The RSGB news website carries a report of the death of a runner-up in the 1996 Young Amateur of the Year award.

The GB2RS article says:

The Society is saddened to report the death of Ben Clarkson, G7WHO, at the tragically young age of 27.

Runner-up 1996 Young Amateur of the Year, Ben gained his licence on his 14th birthday.

An enthusiastic member of the Reading and District Radio Club and a Scout Leader, Ben will be sadly missed by all who knew him.

(GB2RS News)

NZ Radio Spectrum 08-09 Review and 09-12 Outlook

The New Zealand Ministry of Economic Development (MED) has published the Radio Spectrum 2008-2009 Review and 2009-2012 Outlook.

This new look interactive annual report and business plan reviews the policy, planning and operational achievements from the past year, and focuses on business development for the next three years.

Key outcomes planned in 2009-2010 are:

Strengthen spectrum planning and forecasting capability.

Implement a risk-based compliance framework.

Enhance our business systems to encourage industry self-help.

On Wednesday, November 25, the FCC issued a Notice of Proposed Rule Making seeking to amend the Commission's Amateur Radio Service rules to clarify certain rules and codify existing procedures governing the vanity call sign system, as well as revise certain rules applicable to club stations.

According to the FCC, almost 80,000 licensees have replaced their sequentially issued Amateur Radio call signs with a vanity call sign since the program began in 1996.

IARU SAYS WRC-12 PREPARATIONS ARE UNDERWAY

WRC-12 will commence in January 2012. The year 2012 seems far away, but it is only slightly more than two years from now. Preparations within national telecomsadministrations have been under way for some time. Regional telecoms organisations have been meeting to discuss the WRC agenda items and to arrive at regional positions on each issue.

IARU Secretary Rod Stafford, W6ROD, said that every IARU member society capable of doing so, should take the initiative to liaise with their own administration and let the administration know what the IARU's position is on those WRC agenda items that influence the amateur radio service.

The most significant WRC agenda items are:

Implementation of the radiolocation service in the range 30 to 300 MHz;

Possible allocations in the range 3 to 50 MHz to the radiolocation service for oceanographic radar applications;

Software-defined radio systems;

The effect of emissions from short-range devices;

and

To consider an allocation of about 15 kHz in parts of the band 415 - 526,5 kHz to the amateur service on a secondary basis.

2010 RSBG COMMONWEALTH CONTEST (BERU)
13 & 14 March 2010
1000 UTC (Sat.) until 1000 UTC (Sun.)
All Bands

CW Only

Considered to be one of the more gentlemany contests that has been in existence since the mid-1930's. Apart from the individual performances there is a Team event, based on individual nation's participation.

No word in from our contest director of any WIA involvement next year.

www.hfcc.org/hfcc/rule/2009/beru.shtml

March 21-22 John Moyle Field Day
Denis Johnstone vk4ae@hotmail.com reminds National WIA listeners and readers the National Field day for all bands HF, VHF, UHF, and above emphasising portable operation is only a few months away!

Now Peter Harding VK4OD Rd Contest Manager with his final report for this years Remembrance Day Contest.

"Now that the contest is over and all the logs are in, and having checked them all I'm able to present the winners with their Certificates. I will not go through all the individual results as that would take up the entire broadcast, details for all of their availability will be covered towards the end of my report.

I received a total of 310 Logs compared to 314 Last Year, with the overall Points totalling to 42356 points compared to last year total of 3634. Last year we received 21 logs from the Foundation calls this year it dropped to 16. This year we received 3 logs from ZL and 1 log for the receiving only section

This year saw for the first time several stations operating WWII original Transceivers.

It is no surprise that VK6 once again will get their name engraved on the RD Trophy as the Winning State for 2009.

This year I have issued a Certificate to the First 3 place getters.

By now they should have received their Documents.

By the time this goes to air, I anticipate that a comprehensive listing will be in the December/January edition of AR Magazine, or you can simply log onto http://www.wia.org.au and click on the contest link, followed by the Remembrance Day link this will take you to the RD page, and at the BOTTOM of the page all will be revealed.

Until next we meet next year in the RD this is Peter Harding VK4OD RD Contest manager".

YL 90 AIR 90yrs of Latvian Air Force Till Dec 31

The VK7RSC 10 metre beacon has recently been relocated and is on the air from Alanvale campus of the Tasmanian Skills Institute. Launching its 10 watts CW signal into the air is a half wave dipole, and reports are that it's been heard in VK2 & VK6 already. Listen out on 28.267 MHz for this beacon.

In DX, word that F6AUS will operate portable FG from Les Saintes Guadaloupe until March 2010. Look for him to possibly be on 160 and 80 meters. QSL via hf6aus his home callsign.

Kish Lighthouse activation
Daniel, EI9FHB should be active from the Kish lighthouse until Wednesday 9th of December.

The Kish lighthouse is located about 10 miles east of Dun Laoghaire and marks a sandbank on the route to Wales.

The lighthouse was built in 1965 and is undergoing a major overhaul of power systems and navigational aids.

Daniel will be operating mainly on Sundays and after 7pm other days.

Great Tower of Breda - Special Event Station

Look for special event station PB500GT to be active until December 13th.

Activity is to celebrate the 500th anniversary of the 'Great Tower of Breda'

Operators will operate at a height of 65m from the Great Toren. This Great Tower is located in the middle of the city.

Operations will be on 80/40/20/2 meters using SSB and the Digital modes.

QSL Manager is Willem, PA1WLB.

A DXpedition with a Difference

Leaving in February 2011, John Edwards, M0JAX, is looking for 22 people with a full licence to join a DXpedition to Bahrain.

He's planning a two week trip based at the InterContinental hotel with eight stations on the air 24 hours a day. Operators will be working in three shifts to keep the station on the air for the two weeks. John is making all the various arrangements including travel and accommodation but would be interested in hearing from radio amateurs who have an interest in making the trip.

A preliminary trip is being organised for February 2010 to check suitability for antennas and the stations, including drawing up a list of the necessary equipment. If you are interested, send your details and why you think you would be an asset to this DXpedition to

the RadCom offices and your letters will be passed on to M0JAX.

India blocks millions of mobiles

Millions of Indian mobile phones with no valid unique identification code have been blocked for security reasons.

The International Mobile Equipment Identity (IMEI) number is a 15-digit code which appears on the operator's network whenever a call is made.

The absence of this number makes it impossible to trace either the caller or the phone or to access call details.

Indian intelligence agencies say phones without the code have been used in attacks by militant groups.

Mobile phones without the code were blocked - operators were asked to bar calls to them "in the wake of increased threat perception from militants".

India has the fastest growing mobile phone market in the world, with more than 488 million subscribers.

Every month millions of new subscribers are added to the list.

With that many users maybe they will soon need to utilise a couple of "Aussie" call centers!

Special Event Station BT3WX for launch of XW-1

The Amateur Radio satellite XW-1 is scheduled for launch on December 20 and a special event station BT3WX will be run to celebrate the launch.

The XW-1 will be the first Amateur Radio satellite to be launched by Beijing and it will carry a 145 to 435 MHz linear transponder for CW/SSB as well as a FM 145/435 transponder.

To celebrate the launch of XW-1 China'S first amateur satellite and inspire radio amateurs and young people leaning to amateur satellite communication technology and space knowledge, enthusiasm, popular amateur satellite communications activities in China, AMSAT-China will set UP special event station BT3WX, QRV on all of HF amateur bands from 10 to 160 meters and on VHF/UHF amateur satellite bands, including FM, SSB, CW, RTTY and PACSAT modes.

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN

The FCC has said yes to the concept of Internet Neutrality. This as the regulatory agency take an important step toward prohibiting broadband providers from favoring or discriminating against certain kinds of Internet traffic.

Despite the concerns of many telecommunications companies who believe that they have the right to regulate connection speed and capacity. The broadband providers insist they need flexibility, free from government intervention, to keep their networks running smoothly

But telecommunications regulators disagree. Now the Federal Communications Commission has voted to begin writing so-called "network neutrality" regulations with a vote on whether to adopt them expected to come by next summer.

Proponents say the rules would prevent phone and cable companies from abusing their control over the market for broadband access. FCC Chairman Julius Genachowski said regulations are needed to ensure that broadband

subscribers can access all legal Web sites and services, including Internet calling applications and video sites that compete with the broadband companies' core businesses.

SARL NEWS - SUNDAY 06 DECEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

ARRL'S LOGBOOK OF THE WORLD REACHES NEW MILESTONES

STRAIGHT KEY NIGHT ON OSCARs

ICOM CONFIRMS IC-706 PRODUCTION HAS NOT CEASED

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

ARRL'S LOGBOOK OF THE WORLD REACHES NEW MILESTONES

Since its inception on September 15, 2003, more than 30 000 radio amateurs have signed on to Logbook of The World (LoTW), ARRL's online logging program -- an increase of more than 7 000 amateurs since 2008. These 30 000 amateurs have made upwards of 250 million QSOs -- more than 58 million QSOs in 2009 alone. In 2009, there was an increase of more than 24 percent for both the number of registered users and the number of QSOs over 2008.

The LoTW system is a repository of log records submitted by amateurs from around the world. When both participants in a QSO submit matching QSO records to LoTW, the result is a QSL that can be used for ARRL award credit. While US amateurs do not need to be members of the ARRL to use LoTW, only members can use LoTW to apply for ARRL awards, such as DXCC and Worked All States (WAS). Some awards, like the Triple Play Award, only use LoTW credits instead of traditional QSL cards (foreign amateurs do not need to be ARRL members to apply for ARRL awards).

When an amateur uses LoTW to apply for an ARRL award, the award is processed much faster than if they are sent in traditional cards. According to Administrative Manager for the ARRL Membership and Volunteer Programs Department Sharon Taratula, an award applied for via LoTW can be processed in 24 hours versus sending in the cards. "Cards could take anywhere from 6-8 weeks," she explained." It is definitely much quicker to apply for awards via Logbook of The World."

Logbook of The World Specialist Kathy Allison, KA1RWY, said she answers more than 500 questions and inquiries each month from amateurs, ranging from replacing lost certificates, obtaining additional certificates and getting started in Logbook, as well as guiding people through the directions on how to enter in their QSOs. In November 2009, Allison answered 532 questions that came in via e-mail (no statistics are kept on the number of phone calls concerning LoTW, but Taratula estimated that it's "at least several hundred a month").

"One of the more common questions we receive has to do with using LoTW on multiple computers," Allison explained. "Now that a lot of people have a desktop computer and a laptop computer, we get this question a lot. We also get a lot of questions about what to do when a computer crashes." There are step-by-step instructions -- with pictures -- on how to navigate Logbook on the LoTW Web page.

"Logbook is not only for the serious DXer or contester -- it's for any active amateur," said ARRL Membership and Volunteer Programs Department Manager Dave Patton, NN1N. "Even though we knew that Logbook of The World would explode in its popularity, 250 million QSOs in roughly the first six years of its existence show that LoTW's concept and ideas have worked beyond our expectations as we continue to improve and expand the system."

STRAIGHT KEY NIGHT ON OSCAR 2010

AMSAT is inviting radio amateurs worldwide to participate in Straight Key Night on OSCAR 2010. Taking part in this event is both fun and quite easy. Just operate CW through any OSCAR satellite between 00:00 and 24:00 UTC on 1 January 2010, using a straight hand key. There are no other rules, no scoring and no need to send in a log.

In keeping with the friendly nature of this event, all participants are encouraged to nominate someone they worked for "Best Fist" of those you worked. Please send your nomination to w2rs@amsat.org. A list of those nominated will appear in the AMSAT News Service and will also be published in the AMSAT Journal.

RADIO BUSINESS: ICOM CONFIRMS IC-706 PRODUCTION HAS NOT CEASED

Contrary to Internet rumors production of the popular IC 706 Mark 2 G has not ceased. The erroneous report of the radio's demise came in a Wireless Institute of Australia news report that said that the 706 was no longer being made and that Navcom Electronics that there are only 14 units currently held in stock in Australia.

While that might be the case down-under, Amateur Radio Newsline has received word from Icom America that the decision to stop selling the IC - 706 was likely a one made by Icom Australia. On this side of the Pacific Icom America says that the IC - 706 MK 2 G will continue in the Icom America product line.

The original IC-706 was introduced over a dozen years ago and quickly developed what might best be described as a cult following. The radio was not all that much bigger than a dual-band FM transceiver of that era, but it packed an amazingly sensitive all band receiver and powerful amateur band transmitter into a relatively tiny package measuring only 167 x 58 x 200 mm.

Over the years the IC-706 has seen many upgrades. The latest version is the Mark II G which adds many new features and capabilities not found in the previous 706 and 706Mk II versions including the UT-106 DSP module as a standard feature. Many amateurs called it the perfect mobile and portable station and stayed with it even after rival manufacturers brought out their own tiny all band transceivers with similar or even more advanced features. Its also a radio with one of the highest resale values on the used equipment market.

Also included in the WIA story was a claim that Icom was instituting a five year warranty on all of its products. Well that's true only if you live in Australia. According to Icom America, that is an Icom Australia only project. No other Icom distributor is offering a 5 year warranty. (ARNewslineT)

CONTEST NEWS

The annual PEARS HF competition starts at 14:00 and ends at 18:00 CAT this afternoon. It is a phone competition with activity on 7,060 to 7,100 and 7,130 to 7,200 MHz as well as 3,603 to 3,650 and 3,700 to 3,800 MHz. There are four classes of participation: Novice - stations with ZU prefixes; Restricted - stations with ZR prefixes; Unlimited - stations with ZS prefixes, and lastly; DX - stations outside South Africa.

The exchange is the operator's call sign, a signal report and the operator's name. Full details are available on the PEARS website at www.zs2pe.co.za as well as in the 2009 SARL Competition Handbook.

ARRL 10 Metre Contest. The ARRL 10 Metre Contest will be run over the weekend of 12 and 13 December. It is CW and phone activity and operators may only work 36 hours out of the 48 hours, listening time counts as operating time.

Stations in the USA and Canada will give a RS(T) report and their state or province abbreviation. All other stations will give a RS(T) report and a serial number starting at 001. The contest rules are available on the ARRL web site as well as in HF Happenings 382.

There are about 30 radio amateurs on the East Rand who are challenging radio amateurs in South Africa to get on the air for the ARRL 10 metre

contest

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. The surface of the sun has been blank of any sunspots for more than eleven days in a row.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards. During the late afternoons and early evenings it will be moderate towards Europa. In the afternoon there is a good possibility of contacts with the USA on 15 m. Contacts with New-Zeeland and Australia will be possible for a short while on 15 m during the mornings. During the afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here 20 m is also once again very useful for contacts over the longer distances.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

5 December - West Rand Flea market; 6 December - PEARS HF Contest, 14:00 - 18:00; 18 December - closing date for the PEARS raffle; 1 January 2010 - Straight key night on OSCARs; 12 - 13 December - ARRL 10 Metre Contest; 15 January 2010 - closing date for the essay competition; 15 to 17 January 2010 - the PEARS VHF/UHF Contest.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by Dennis, ZS4BS. The editor was Jannie, ZR6PHD.

Thank you for listening, 73.

NZART Headquarters Infoline Issue 197
06-DECEMBER-2009
NZART Website: http://www.nzart.org.nz/

Greetings
Welcome to Headquarters-Infoline a twice-monthly bulletin of news from NZART Headquarters e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at:
http://www.nzart.org.nz/lists/infolinelist.html

In This Issue
*FMTAG Notes For December 2009
*ZL3 Radio Buildathom
*Monitoring Service Reports
*Contest News
==VHF/UHF/SHF Contest Notes
==HF Contests
*Upcoming Events
*Break-In and Infoline Information
*Dates for Official Broadcast (OB) and Head Quarter's Infoline
*Attachments for Branches: NZART Headquarters Infoline 197.doc
****
FMTAG NOTES FOR DECEMBER 2009

At its December meeting, NZART Council approved publication of the following notes.

INTERIM RECOMMENDATIONS TO NZART COUNCIL

Branch 20 Manawatu has applied for a 5725 Repeater, to be located at Pahiatua track, at map reference NZ260 T24 416857. The repeater transmit frequency will be 145.725 MHz and receive frequency will be 145.125 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 20 Manawatu has applied for a 7125 Repeater, to be located at Pahiatua track, at map reference NZ260 T24 416857. The repeater transmit frequency will be 147.125 MHz and receive frequency will be 147.725 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 20 Manawatu has applied for a 8525 Repeater, to be located at Pahiatua track, at map reference NZ260 T24 416857. The repeater transmit frequency will be 438.525 MHz and receive frequency will be 433.525 MHz. An

engineering evaluation confirms that there will be no interference to other stations.

Branch 26 Nelson has applied to relocate its 4575 APRS Digipeater from Fringed Hill to Observatory Hill, at map reference NZ260 027 313906. The transmit and receive frequency will be 144.575 MHz. An engineering evaluation confirms that there will be no interference to other stations.

Branch 27 New Plymouth has applied for a 720 Repeater, to be located at Robe Street, at map reference NZ260 P19 029375. The repeater transmit frequency will be 147.200 MHz and receive frequency will be 147.800 MHz. An engineering evaluation confirms that there will be no interference to other stations.

FINAL RECOMMENDATIONS TO NZART COUNCIL

None this month.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters and recommendations, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART web site:

PLEASE NOTE THE REVISED URL FOR THE FMTAG AS SHOWN BELOW
http://www.nzart.org.nz/fmtag/index.html
PLEASE NOTE THE REVISED URL FOR THE FMTAG AS SHOWN ABOVE

Completed forms should be sent by e-mail to fmtag@nzart.org.nz
****
ZL3 Radio Buildathon

The 3rd ZL3 Radio Buildathon will be held on Saturday January 30th in Christchurch and all radio amateurs from ZL3 District are invited to come along and build a ZL3 Pixie Twins kit. Youngsters and budding hams 8 - 80 are most welcome. There's a kit for them too!

After building your fun 80m QRP CW transceiver you can enter two competitions.

One is for the best DX CW contact within NZ using a ZL3 Pixie Twin. The other is for the funniest housed unit. Let your imagination run wild!

A superb 40 m QRP CW kit transceiver from www.smallwonderlabs.com USA will be awarded to each of the winners.

Please register your interest now as places must be limited. Bring along your friends, members of clubs you belong to, and workmates. Here's a great way for them to find out about the fun you're having in amateur radio.

Email David at ZL3DWS@nzart.org.nz or call 03 358 2424

Visit http://sites.google.com/site/zl3buildathon/

27-NOVEMBER-2009a
Latest infos about the beacon D:
Beacon D, main transmission on 7038.700 kHz, location: UKR, Sevastopol,
probably the Russian naval base of the "Black-Sea-Fleet". Spurious emissions
on 7000.000 and 7077.400 kHz often observed. Harmonic emissions on 14077.400
(2nd) and 2116.100 (3rd) kHz during the last days.
Today I informed the German PTT (BNetzA) about the situation. Concerning
7038.700: In 2004 and 2005 the German PTT filed 3 complaints to the UKR
authorities. No reaction, no change. Regarding 14077.400: The German PTT
will file another complaint.
TNX for your observations and reports, DK2OM, Wolf, IARUMS R1!

27-NOVEMBER-2009b
Dear friends,
DL8AAM (Tom) sent me very helpful infos about the Russian cluster-beacons.
TNX dear Tom, great action!
73 from Wolf

Hi,
Beacon D, main transmission on 7038.700 kHz, location: UKR, Sevastopol,
probably the Russian naval base of the "Black-Sea-Fleet".
The letters versus their fleets and their regular "ITU-callsign":
P = Baltic Sea Fleet HQ, Kaliningrad = RMP
S = Northern Fleet HQ, Severomorsk (in Murmansk Oblast) = RIT
D = Black Sea Fleet HQ, Sevastopol (Ukraine) = RCV
C = Naval HQ, Moscow = RIW
F = Pacific Fleet HQ, Vladivistok = RJS
K = Pacific Fleet, Base Petropavlovsk Kamchatskiy = RCC
M = Pacific Fleet, Base Magadan = RTS
The SLHFB "A" is related to the Caspian Sea Flotilla (HQ Astrakhan), but for
this one I don't have the ITU callsign.
Their collective call is RKN, means bulletins for all members of this

flotilla are addressed to RKN. These transmissions are sometimes reported to be coming maybe from the Black Sea Fleet COMSTA "RCV"? But so far we haven't any official QSL for this. (BTW QSL, the Baltic Sea Fleet COMSTA "RMP" aka "P" recently send out real QSLs for SWL reports too !)
For the Caspians we never saw any "RKN de RCV" preamble (as all the other fleet COMSTAs always do "REO DE RMP QTC ... "), therefore we can't be sure if they don't have an own larger Caspian HQ COMSTA who handles to the "A beacon" transmission from (near) Astrakhan itself. And it would be silly if the propagation beacon A comes from the same area as D/RCV...hi
Maybe any local Russian MS-members could confirm any Caspian flotilla COMSTA (callsign?, address for SWL reports etc.) ?
BTW, "bulletins" by the COMSTAs are not send via channels of the cluster beacon sub-system - that system just act as a simple propagation beacon network.
73, Tom
DL8AAM

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 6th December 2009

Congratulations

Congratulations to Revere Richardson EI9EYB and XYL Marcella on the arrival to the world of their baby daughter, Emma on December 1.

I'm reliably informed she has signed up for theory classes, and an ownership dispute over a handheld has already erupted in the household!! Hi hi

Well done to you both from all your friends in radio.

IRTS Radio News via ATV

The IRTS radio news which is normally broadcast by South Eastern Amateur Radio Group at 9.30 p.m. on Tuesday nights via the Southern Ireland Repeater Network is now available live via the EI8WDT, ATV (television) repeater from Dungarvan, Co. Waterford.

A live video feed is available each Tuesday night at www.ei8ffb.com (details and link to EI8FFB are available on the SEARG web site at www.searg.com).

EI 185 RNLI

The Galway VHF Group apologise for the disappearance of the station EI185RNLI on Sunday the 29th of November following the news. Just after the call-in they did QSY to 3.670 MHz but following just two QSO's the Lifeboat was launched and we had to cease operations. After the launch the tractor was parked under the antenna whilst the trailer was hosed down following its dunking in the sea and there was no way that a transmission could be made as the antenna would not re-tune with such a load underneath it.

Approximately 1,600, or more, contacts were made during the three 24 hour periods of operation despite the poor

band conditions. Following this activity it is hoped that a similar operation will be set up on an annual basis for just one weekend of each year.

The Galway VHF Group would like to take this opportunity to thank all operators at home and abroad who supported this operation.

Kish Lighthouse Activation

Daniel EI9FHB should be active from the Kish lighthouse until Wednesday 9th of December. The Kish lighthouse is located about 10 miles east of Dun Laoghaire and marks a sandbank on the route to Wales. The lighthouse was built in 1965 and is undergoing a major overhaul of power systems and navigational aids.

Daniel will be operational on HF voice and 2M & 70cm FM. Operating will be mainly on Sundays and after 7pm other days. The worked all Ireland frequencies will be used where possible.

Willis Island - back on the air

David Burton has been posted to the Bureau of Meteorology station on Willis Island for the next 6 months and will be operating with the call sign VK9WBM.

The station was first set-up in 1921 by the bureau and over the years, many of the officers posted there were amateur radio operators. The Bavarian Contest club last activated Willis Island in 2008 where they made 95,178 contacts.

David has just arrived at the weather station and will be setting up an amateur radio station shortly.

QSL manager is Dale VK4DMC.

Station details will be placed on QRZ.com in the near future.

Wicklow Town Club Formation

Lain EI5GN is interested in starting up a radio club in Wicklow Town. Lain has a premises confirmed and it is virtually free of charge! If there is anyone interested please email Lain at ei5gniain /at/ gmail.com or at QTHR.

DXpedition with a difference

Leaving in February 2011, John Edwards, M0JAX, is looking for 22 people with a full amateur radio licence to join a DXpedition to Bahrain.

He's planning a two-week trip based at the Intercontinental hotel with eight stations on the air 24 hours a day.

Operators will be working in three shifts to keep the station on the air for the two weeks. John is making all the various arrangements including travel and accommodation but would be interested in hearing from radio amateurs who have an interest in making the trip.

A preliminary trip is being organised for February 2010 to check suitability for antennas and the stations, including drawing up a list of the necessary equipment.

If you are interested, send your details and why you think you would be an asset to this DXpedition to the RadCom offices and your letters will be passed-on to M0JAX.

IRCs - important information

Please be aware that the batch of IRCs that have been used for the last few years will no longer be valid at the post office.

31st December 2009 is the dead line for the current style ... but it's best to stop using them ASAP to allow transit time.

The new one has the expiry date of 31st December 2013 ... just above the 'UPU' logo at your right hand side.

Limerick Radio Club

The next meeting of the Club will be held on Thursday 10th December 2009 at the Limerick Institute of Technology at 7:30 pm.

The annual Christmas Quiz will be held once again under the stewardship of Pat (EI9GY) & Liam (EI4GB). The Quiz, with prizes galore, has proven a most enjoyable evening in previous years so a large attendance of members is expected on the night.

Shannon Basin Radio Club AGM

The Shannon Basin Radio Club will hold its AGM on Friday 11th Dec at 20.30 in Hannons Hotel, Roscommon.

All members are asked to attend and new members are always welcome. Festive Refreshments will be available on the night.

South Dublin Radio Club

This year's South Dublin Radio Club Christmas Party will take place on Tuesday the 15th of December.

The venue will be the same as last year, "The Morgue", Tempelogue Village from 8.00 pm until late.

Members of other clubs and visitors are as usual very welcome to this social event. Limited free food will be available for paid-up members; visitors can choose from the bar menu until 9.00 pm.

Joint Club Christmas Dinner

The North Dublin Radio Club, Fingal Radio Club and the Howth Martello Radio Group are having a joint Christmas dinner on Saturday 19th December. The restaurant in the Coachman's Inn near Dublin Airport is the venue and the meal will start at 8:30pm.

The Christmas menu is €19.25 with an a la carte menu also available. This is the second year that this joint dinner has been organised. Last year's dinner was a great success and so this year it has been decided to invite other amateurs, SWLs and friends. Lapsed members of both clubs would be particularly welcome.

Places are limited and early booking is recommended. If interested please email tony /at/ ei0mar.org as soon as possible to make a reservation.

Items for inclusion in next weeks Radio News should be forwarded to Charlie EI8JB, preferably via e-mail to €charlie dot Carolan at gmail dot com€ Or by phone to 087-6265418 News can also be submitted via e-mail to €newsteam at irts dot ie€ for automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday€s bulletin.

Ohio/Penn DX Bulletin No. 937

The Ohio/Penn DX PacketCluster
DX Bulletin No. 937
BID: $OPDX.937
December 7, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, AA1MI, K1XN & GoList, NJ1Q, K3GV, NG3K & ADXO, K4UEE, N4AA & QRZ DX, KH6BZF, N6RV, KL7JR, K8YSE, K9EL, A35A, AT International, BA1DU, DL4MDO, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, I1JQJ/IK1ADH & 425 DX News, ON5NT, Pete's-DX-Newsdesk, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF) and YV5KAJ for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 29th-November, through Sunday, 6th-December there were 233 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FK/c, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2E, VP2M, VP2V, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2009 CQ DX MARATHON (Less than a month to go!) John, K9EL, Program Manager for the CQ DX Marathon, wants to remind everyone that there is less than a month left in the 2009 version of CQ Magazine's annual DX Marathon! Each year from January 1st to December 31st, CQ Magazine sponsors a challenge

to work as many countries and zones as possible in the calendar year. This year's edition ends soon, but there is still time to fill in some missing countries and zones. Last year's winner was determined by a QSO made on December 21st, so keep working DX! For complete rules and submission information, please see their Web site at: http://www.dxmarathon.com

3W, VIETNAM (Update/Operator Needed!! [VERY RARE IOTA - #2]). An international group of operators will be active as 3W6C from Con Co Island (AS-185), Vietnam, in April 10-18th, 2010 (See OPDX.926 for more details). Paul, AA1MI/HB9DST, EUCW Communications Manager for the "Helvetia Telegraphy Club", reports that the 3W6C DXpedition has an opening for one additional experienced CW operator. He states, "This DXpedition is being headed up by several members of the Helvetia Telegraphy Club, but we also have members from other countries including Vietnam. German language is NOT required to participate. Full details about the DXpedition are available at: http://www.3w6c.qrv.ch
If you or any members of your organization would like to be considered a candidate for this open spot on our crew, please send details about your background and DXing experience to Hans-Peter at: hb9bxe@3w6c.qrv.ch
He can likewise give you further details about expenses, travel, etc."

3V10, TUNISIA (Special Event). The Radio Club Station of Tunisian Scouts (3V8ST) in the CAST will commemorate their 10th anniversary by activating special event station 3V10A from the headquarters of Tunisian Scouts in Tunis Mahrajens (Tunisia's capital city). Activity will last until December 31st. QSL via: AMATEUR RADIO CLUB STATION TUNIS, P.O. Box 339, 1082, Tunisia.

5I, TANZANIA. Igor, UA3DJY, is currently in Dar Es Salaam, and plans to operate from the DIT Communications Club station, 5I3A, until December 15th. Over the past weekend, Igor has been very active on 17 meters CW between 0730-1400z. QSL via RK3AOL.

61ST IDXC. The 61st Annual International DX Convention sponsored by the Southern California DX Club will be held at the Holiday Inn Hotel & Conference Center, Visalia, CA, April 16th, 17th, 18th, 2010. Pre-registration begins December 1st, 2009. The International DX Convention is the world's foremost DX convention. If you are a DXer or interested in any aspect of ham radio, you need to be at Visalia. Top DX operators from around the world will be there. Meet the big guns from the US, Asia, Europe, Africa and Oceania. Meet the people on the other side of the mic or key. Shake hands with the person you have had that sked with for the past 10 years. Renew friendships. Don't forget your YL! We will have something special for them as well. Top DXpeditioners from every continent tell you how they did it. Learn the secrets for big signals on the top band, how to have fun and adventures chasing IOTA, contest forum, antenna forum, DX forum, seminars for everyone from the seasoned pro to the beginning DXer. Attend the traditional Saturday night banquet where great friends and good food are met with lively presentations. The Sunday breakfast buffet has a terrific selection and variety. Enjoy more presentations and the parody, "Are You Smarter Than a DXer. This year there is

a twist! Visit the manufacturers' midway where you can talk to the people who design and use the latest and best equipment. Don't forget the raffle prizes which top even the famed Dayton Hamvention! For the early arrivers NCCC will be hosting the Contest Academy on Friday! Stop by their Web site for more details at: http://www.dxconvention.org
For questions regarding registration or DX stations who need lodging assistance, please E-mail Cathy Gardenias, K6VC, at the address located on the Web site under registration.

8Q, MALDIVES. Thomas, OE2ATN, is planning to be active as 8Q7AT from the Island of Velidhu (AS-013) next year between May 23rd and June 4th (2010). Activity will be mainly SSB on 80/40/20 meters using a Yaesu FT-897D (w/LDG Auto-Tuner and 100 watts) into possibly a G5RV antenna. QSL via OE2ATN (QSL cards will go out via GlobalQSL.com).

A3, TONGA (Island News/Update). Paul, A35A, informs OPDX on December 2nd, that Dave/W6ZL (A35KL) was leaving Ha'apai on December 3rd. Dave should be in New Zealand by the time you read this. Paul states, "Dave probably won't be QRV again from Tonga until perhaps April 2010. He may be able to get on the air from ZL, when he visits some of his radio buddies down there. I'll let him fill you in if/when that happens." He also mentions, "All antenna work here at A35A is 99% complete. The SteppIR yagi (w/6m add-on) is up and working fine; the 4 element 6m beam has been cleaned up and is working fine; the SteppIR BigIR vertical (w/80M add-on) is up, but I still have some tweaking to do on the elevated radials to get a good impedance match. I intend to be more active from now on, especially on 80m. I want to finish up on 5BDXCC before my QSL manager (W7TSQ) gets tired of waiting! HI... The 6m Es season is fast approaching down here, so that should provide some excitement....especially since both North and South Cook Islands (E51CG and E51WL) are now QRV. Incidentally, our announced move to Vava'u (OC-064) has been postponed indefinitely, and perhaps cancelled altogether. A35A remains QRV from Lifuka Island, Ha'apai (OC-169) until further notice. QSL via W7TSQ or LoTW."

AFRICAN TOUR (Western). Peter, HA3AUI, is once again heading to Africa in early 2010. Look for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau between January 15th and March 31st. Peter used these callsigns once before. His stays in Senegal (6W) will be very near to the border of Guinea-Bissau (J5), and he plans to make regular trips to J5-land for the beautiful beaches there (plans to also operate from there). Using his Elecraft K3 with 500w into a 5-Band Spiderbeam and verticals, Peter's activity will be on 160-10 meters, mainly on the digital modes, but he will use the other modes on request. QSL direct via HA3AUI. Visit his Web site at: http://cqafrica.net

BT3, CHINA (Special Event). Look for special event station BT3WX to be active until possibly mid-December. Activity is to celebrate the launch of XW-1, China's first amateur satellite, as well as inspire radio amateurs and young people to learn about amateur satellite communication technology, space knowledge, and the popular amateur satellite activities in China. AMSAT-China will set up special event station in Taiyuan, Shanxi Province

of China. Activity will be on all of HF amateur bands from 160-10 meters and on VHF/UHF amateur satellite bands, including FM, SSB, CW, RTTY and PACSAT modes. The BT3WX activities have already started (but QSNs have been reported) and will last until the end of the launch (expected December 20th). QSL Manager is BA1DU: Alan Kung, P.O.Box 8091, Beijing, CHINA 100088. Operators mentioned are: BA4RB, BA4RN, BA4RS, BA4RX, BA4TA, BA4TB, BD4IBW, BD4REB, BD4RPJ, BD4XX, BH4REQ, BA6AA, BD6BW, BA7CK, BA7JG and BD7PZL. There are "BT3WX Communications Awards available" (HF Award and Satellite Award). For details, see AMSAT's Web site at: http://www.amsat.org/amsat-new/news

CE0Z, JUAN FERNANDEZ ISLAND. Toshi, JA8BMK, will be active as CE0Z/JA8BMK between January 19th and February 2nd. Marco, CE6TBN, will be joining him, but for only 5 days (dates were not provided). Activity will be on 160-10 meters, with a focus on the lower band, and they are expected to be using CW, SSB and the Digital modes. They will use an amp, and antennas will be a yagi and vertical. QSL direct to JA8BMK at: Toshi Fukuta, 2115-3 Nobori, Yoichi, Hokkaido 046-0002 Japan.

CO7, CUBA (IOTA Op). Edor, CO7PH, will activate the following Cuban IOTAs as CO7PH/P in the coming weeks in Cuba's 7th District:
NA-086 - Cayo Coco Island between December 17-31st
NA-201 - Cayo Anclitas Island between January 2-5th.
Bands and modes of activity as well as QSL route was not provided.

D2, ANGOLA (Update). Paulo, CT1ITZ, active as D2CQ, will be in Porto Amboim until December 27th. Activity will be on 80-10 meters SSB only. Most of his activity this past week has been on 20/17 meters between 0830-1730z. He is using an Icom 706 and a Windom antenna. QSL via CT1IUA. Direct QSL, please send 2 USDs or one new IRC (ending 2013). QSLs without enough postage will go via Bureau.

DR09, GERMANY (WAP Op). German radio amateurs in the district Upper Bavaria (Southern Germany) will activate the special callsign DR09ANT (DOK "IPY" and WAP-Nr. 156) for the "Worldwide Antarctic Program" (WAP) for the last time between December 14-31st. Activity will be on all bands and modes. QSL via Bureau.

DU, PHILIPPINES. Lee, HL1IWD, will be active as DU1/HL1IWD from Manila between December 31st and January 3rd. Activity will probably be on 80-10 meters using mainly CW. QSL via his home callsign.

DVD AVAILABLE FOR THE HOLIDAYS! The "KP1-5 Project" announced today that the long anticipated Desecheo K5D DVD entitled "so rare, so near, yet so far" is now available for sale. The DVD was 5 months in production and is receiving rave reviews. It was written, produced and narrated by Bob Allphin/K4UEE, and edited by Ed Boutwell/W4ZSB. This is their seventh DXpedition DVD. To purchase your personal copy or for a great Holiday gift, go to <http://www.kp5.us> and click on the link on the first page.

IOTA NEWS.....
AS-133. Operators Peter/XU7ACY (ex-NO2R) and Wim/XU7TZG (ex-ON6TZ)

will be active as XU7KOH from Koh Russei (aka Bamboo Island)
between December 11-14th. Activity will be on all bands,
80-10 meters on the regular IOTA and PSK frequencies. Modes
will be PSK31, SSB and CW. Peter will do the CW and Wim will
be on SSB and PSK31. QSL ONLY DIRECT with 2 USDs and a SAE
to the QSL Manager ON7PP.

NA-153. (OPERATION POSTPONED!) Operators Zalo/XE3N, Jose/XE3PP, Benigno/
XE2WK and Juan/XE3RR, who were expected to be active as XF3RR
from Isla Cerrito this week, have postponed their operation
(due to logistics) until possibly early 2010. Activity was
planned for 80-15 meters using SSB and RTTY. QSL via EB7DX.
This operation is organized by the Radio Club Cancun, and
was expected to be a low scale operation as the island is a
protected area of the government of Mexico. To avoid the
tranquillity of the thousands of birds and species that inhabit
the island, this island is subjected to many restrictions
including the amount of equipment and individuals on the
island. For updates, please visit the following Web page at:
http://www.xf3rr.net

SA-044. Pasquale, YV5KAJ, informs OPDX that he is celebrating his 25th
year in amateur radio by going on a DXpedition to the Island
of Tortuga and honoring Anacleto, IW5EID, for introducing the
hobby to him. He will also be using the special callsign,
YW5EID, during his operation between December 26-29th. Activity
will be on 40/30/20/17/15/12 meters using SSB and the Digital
modes (RTTY/BPSK/Olivia). QSL via EA5KB or see info on QRZ.com.

KH6BZF PROPAGATION FORECAST/REPORT (For December 7-13th)....
Dec 7 AN SOLAR REFERENCE
Dec 8 AN ---------------
Dec 9 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 10 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 11 AN LN - Low Normal
Dec 12 AN
Dec 13 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

LCL 2009. Lighthouse Christmas Lights QSO Party will be held between December
19th and January 3rd (2010). More details about awards, certificates, prizes
and rules for the ARLHS 2009 Lighthouse Christmas Lights QSO Party (LCL 2009)
are available on the following Web page at:
http://arlhs.com/LCL-2009-guidelines.html

NEW OFFICERS FOR 2010. Members of the National Capitol DX Association
(NCDXA) <http://www.qsl.net/ncdxa> elected the following officers to
serve in 2010 at their October 2009 annual meeting:

Dick Mayott/W2YE - President
John Kanode/N4MM - Vice President
George Vincent/K3GV - Secretary
Brian Bayus/N1KC - Treasurer

QSL INFO AND NEWS.....
TX3A'S OQRS NOW ACTIVE. The TX3A's "Online QSL Request System" (OQRS) is now active at: http://tx3a.com/qsl.html

QSLS VIA LoTW: F9IE, FR5MV, K4M and TX3A

QSLS RECEIVED VIA MAIL: 3D2GM, 4W6AL, 5B4KH, BA4DW, CU3EJ, E7/KX7M, EA3BOX, ES1WN, ET3JA, ES3AX, FK/JA1NLX, FP/G3ZAY, FR5ZL, HK3JJH, JT1CO, K9RR/4, KH7C, KH0/JR4GPA, LX1NO, LY2ZZ, OH1AA, OX3XR, R1ANC, R1ANY, RW6HS, T2G, T30GM, T68G, TF3CW, TG9NX, TI7DBS, TX5SPA, TX5SPM, UA2FFW, UN8GV, VY0O, W3HNK, WP4U, YW5F and ZK2NX

QSLS RECEIVED VIA THE BUREAU: 3V8SS, 4K9W, 4O/EA1DR, 5W0UK, 6V7O, 8J1RL, 9J2FM, 9K2/SP4R, 9M2TO, 9M6/N1UR, A52RY, C91YI, CE8A, CE0Y/SM6CUK, D68WL, DP1POL, DU7/PA0HIP, DX1J, E51CUK, H40FN, J3/DL7CM, J6/W0SA, KG4SS, KH6OO, KL7HBK, T88IW, UK/JI2MED, V5/DL2SL, VP6PR, XR7A, YS1G, ZD7X and ZK3MW

SOUTH AMERICAN TOUR (Update). As we mentioned last week, Ghis, ON5NT, will once again be on a South American trip through Brazil and Uruguay in December. He informs OPDX that there will not be any activity from Brazil as there is no reciprocal license between ON and PY (He states, "I can't get a PY license. Operating with my CEPT license/PY does not seem to be fully legal."). However, Ghis will be active from Uruguay between December 12-17th. His callsign will be CX5DNT (not CX5NT as first announced). He states, "The rule says the first letter after the number in the callsign indicates the region. The Montevideo region is A, B, C or D." As this is a holiday trip, he plans to be active mostly during the local evening/night hours. So check 30m (10107 being his preferred frequency) and 40m (CW in general); they will be the best options to catch him. QSL via ON5NT.

T6, AFGHANISTAN. Jack, W4JJ, currently in Gardez (Paktia Province, Eastern Afghanistan), is working with the Afghan National Army, and has been issued the callsign T6LC from the Government of the Islamic Republic of Afghanistan. There have been a couple of QSNs reported on 40m SSB and 20m CW. Jack expects to operate between 1430-1800z, as time permits. QSL via K4MJN. Visit his Web page at: http://www.w4jj.com

VK9W, WILLIS ISLAND. Reports indicate that David Burton (home callsign not provided) has been assigned to the "Bureau of Meteorology" station on Willis Island for the next 6 months and will be operating as VK9WBM. The last activation of Willis Island was by the Bavarian Contest Club in October 2008 as VK9DWX, and the team made +95k QSOs. David is currently on the island, but no QSNs have been reported. His activities will be limited to his free time, but he plans to be active as much as possible on the HF bands and 6 meters using an IC-718 and an Alinco DX70. Details of the station's setup are expected to be on QRZ.com. His QSL Manager is VK4DMC.

VR2, HONG KONG (Special Event). Members of the Hong Kong Amateur Radio Communications Association (VR2HAM) will activate special event station VR2EAG to celebrate 5th East Asian Games 2009 being hosted in Hong Kong. Activity will last until December 13th. QSL via: HK Amateur Radio Communications Association, GPO Box 7191 Hong Kong. Visit their Web page at: http://vr2ham-hk.com -- or -- http://vr2ham.org

VY1, CANADA (Need the Yukon!). "Yukon John", KL7JR, informs OPDX this week that he will be active as VY1RST from Destruction Bay, Yukon, between December 17-22nd. Activity will be on 80-10 meters SSB using various homebrew antennas. E-mail skeds are available at: KL7JR@Yahoo.com
John mentions that he will attempt to activate Jacquot Island on Kluane Lake for a "new one" (for the CISA) provided the ice is thick enough to drive on. QSL via the address on QRZ.com or the CBA.

YI, IRAQ. A group of operators called the "YI9PSE DXpedition team" are planning to visit Kurdistan and be active in the spring of 2010. Activity will be on 160-10 meters including 30/17/12 meters using CW, SSB and RTTY. They will have at least 3 stations on the air. Suggested frequencies are:
CW - 1824, 3504, 7004, 10104, 14024, 18074, 21024, 24894 and 28024
SSB - 1845, 3780, 7065/7180, 14195, 18145, 21295, 24945 and 28495
RTTY - 7035, 14080, 18100, 21080, 24920 and 28080 kHz

The current YI9PSE Team consists of the following operators: Paul/N6PSE (Team Leader), Andreas/N6NU, Bob/N6OX, Bruce/W8HW, Garry/NI6T, David/AH6HY and Jun/JH4RHF. Pilot station will be Chuck/AA6G. QSL via N6NKT. Online logs will be available during and after the DXpedition. For more details and updates, visit: http://www.yi9pse.com

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

Well, good news and bad news -- the good news first. I want to let you know that I completed my graduate program at UNL successfully. It's been a dream of mine for nearly 4 decades to finish my doctorate. So you may now refer to me as Dr. K&#65533;AIZ. However, I prefer Art. The bad news is that I've run out of the "I'm busy with school" excuse. The six weeks of September/October I spent in California dealing with the illness and death of my mother took its toll on trying to complete the degree. So the time since her passing has consisted of 15 to 20 hour days trying to catch up on finishing a dissertation and preparing for a final defense oral exam. I hope I didn't cause too much consternation while I was distracted.

At the top of my "I really needed to" list is one of the more pleasurable things I put off. That is to recognize the dedication, talent, and insight offered by one of our own. Joe Eisenberg, K&#65533;NEB, is well known as a ham, an expert in kit building, and a photographer. He has given many presentations on kit building and the technical aspects of ham radio in venues ranging from club meetings to conventions. His enthusiasm is unmatched and the skill he brings to his endeavors is phenomenal.

CQ magazine noticed that, too. I am very pleased to acknowledge that Joe is now a contributing editor for the magazine. He is writing a column called "Kit Building" for each issue. I think you will find his columns interesting and well worth the time to read. I've been building electronics almost since Marconi twisted two wires together (or at least I feel that way sometime) and I find things to learn from Joe.

Congratulations, Joe. You are an asset to the Section, a great contributor to the hobby, and a wonderful friend to have.

I'll be playing more catch-up soon. Until then, enjoy winter, the hobby, and your family.

73,
Art K&#65533;AIZ

2456. LiveJournal: Libel, Lessig, Lies!

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-10 20:05:18 UTC
From: berkman.center@yahoo.com
Message-ID: <38c7accd-0417-4a8f-ad12-749d0e40e510@x15g2000vbr.googlegroups.com>
Source record: 6270
Cross-posted to: comp.lang.java.programmer,rec.radio.shortwave,rec.radio.amateur.misc,alt.slack,alt.religion.scientology

LiveJournal is a safe haven for defamation, libel, and pedophilia.

Until nearly a year ago, LiveJournal did nothing about the NUMEROUS pedophile journals hosted there. Many were deleted, along with “fan fiction” blogs to make it appear as though pedophiles were not being targeted.

LiveJournal, now owned by Russian company <SUP> still supports libelous and defamatory content. Why? Because content means traffic, and traffic means revenue. <SUP> is interested in nothing but revenue.

They have “safe harbor” as long as they comply with DMCA notices, so their only worry might be having to disclose a subscriber’s identity.

They allow just about anything defamatory to stand: accusations of child trafficking and abuse, as well as fabricated criminal histories.

LiveJournal also misrepresents the membership of its advisory board. One person who had been defamed by LiveJournal contacted Harvard Law Professor Lawrence Lessig, whose name appeared on LiveJournal’s site as a member of their advisory board. Lessig’s office replied, apologetically, that Lessig was no longer a member.

Tupshin Harper, who managed LiveJournal for several years, has been replaced by Angelika Petrochenko. Even though Harper was more than tolerant of libel and defamation, and he was the one who steered LiveJournal through the pedophilia minefield, his bottom line did not satisfy the new owners.

It is not clear what Petrochenko can, or will, do. Advertisers are disgusted by LiveJournal’s policies, and are canceling complete campaigns, often based on what they see on a single journal.

==> + PUBLIC SERVICE: UTAH HAMS COORDINATE RESCUE

In areas where cell phone signals just won't work, Amateur Radio
gets through. That's what Brent Yeates, KA7FAP, of North Logan, Utah,
found out just before noon on Wednesday, December 2: He came across a
dairy truck that had crashed and rolled over in the Logan River as he
drove on Route 89 through Logan Canyon. As 38,000 pounds of dairy
products were spilling into the Logan River, Yeates waded through the
cold river to help get the driver out of the truck's cab and then put
out a call on his handheld transceiver. Read more here
<http://www.arrl.org/news/stories/2009/12/07/11235/?nc=1>.

==> + SPOTLIGHT ON AMATEUR RADIO: MAJOR COMPUTER PUBLICATION DEVOTES
JANUARY 2010 ISSUE TO AMATEUR RADIO

Emergencies may get all the attention in the press, but lately, the
technological side of Amateur Radio has been showing up a lot in places
```

that are read by the people who make next year's trends. Hams indeed are technical and creative people, consummate MacGyvers. To kick off the new year, the computer magazine Linux Journal has come out with an entire issue dedicated to Amateur Radio and the creative uses of open source computer programs. This 80 page issue features Tux, the Linux mascot on its cover wearing a pair of headphones, holding a microphone -- and even sporting an Emergency Coordinator badge around his neck -- hooked up to an HF transceiver. The issue has headlines on the cover such as "Amateur Radio and Linux -- Open Source for the New Generation," and "Get Started with Amateur Radio," and includes articles like "When All Else Fails -- Amateur Radio, the Original Open-Source Project" by David Lane, KG4GIY. Read more here <http://www.arrl.org/news/features/2009/12/09/11239/?nc=1>.

==> + SCOTT ROBBINS, W4PA, TO PURCHASE VIBROPLEX

Scott Robbins, W4PA, of Knoxville, Tennessee, told the ARRL that he has signed an agreement to purchase The Vibroplex Company, Inc from present owner Felton "Mitch" Mitchell, W4OA, effective December 21, 2009. "Vibroplex represents the great tradition of CW operation in Amateur Radio going back many, many years," Robbins told the ARRL. "I'm tickled to be able to continue the more than 100 years of history that has gone into this company." Robbins -- who has been employed with Ten-Tec Inc since 1995 (he has been Product Manager for Ten-Tec's Amateur Radio equipment line since 1997) -- will leave his position in mid-December to take over full-time management and ownership of Vibroplex. "It's a great opportunity to continue the more than 100 years of tradition that the Vibroplex name represents," Robbins said. Read more here <http://www.arrl.org/news/stories/2009/12/07/11233/?nc=1>.

==> ARRL PUBLICATIONS: ARRL LICENSING STUDY GUIDES -- COMING TO AN EBOOK READER NEAR YOU

ARRL is pleased to announce that owners of Kindle <http://www.amazon.com/Kindle> -- an electronic book reader sold by Amazon.com <http://www.amazon.com/> -- can now download ARRL's Tech Q&A <http://www.amazon.com/ARRLs-Tech-Q-A-ebook/dp/B002YNSBNE/ref=sr_1_2?ie=UTF8&s=books&qid=1259944328&sr=8-2-catcorr>
directly from the online bookseller for use on their Kindle. Kindle is shaped much like a book with a paper-like screen that displays text and pictures. Those who have the Kindle application installed on their Apple <http://www.apple.com/> iPhone <http://www.apple.com/iphone/> or iPod touch <http://www.apple.com/ipodtouch/> can also download the book for use on these devices. When you download the Tech Q&A, you can gain access quickly and easily, smoothing the path to your first ham radio license. This ideal study tool -- whether you're at home, in the office, traveling or just on the go -- lets you review the questions and answers from the entire Technician question pool so you can pass the 35-question exam. Kindle versions of the General Q&A and the Amateur Extra Q&A will be available sometime in January. All three can be purchased from Amazon.com for $9.99 each.

==> + ORGANIZATIONAL: MARC TARPLEE, N4UFP, APPOINTED SOUTH CAROLINA SECTION MANAGER

Marc Tarplee, N4UFP, of Rock Hill, has been appointed the new ARRL South Carolina Section Manager. He will complete the term of Jim Boehner, N2ZZ, who was elected ARRL Roanoke Division Vice Director last month. When Boehner announced that he was stepping down from the Section Manager post he has held since January 2003, he recommended Tarplee, the South Carolina Section Technical Coordinator, for the position. Tarplee and Boehner both take on their new positions January 1, 2010. According to the Rules and Regulations of the ARRL Field Organization, when a vacancy in the office of Section Manager occurs between elections, the position is filled by appointment by the Membership and Volunteer Programs Manager in consultation with that Division's Director. MVP Manager Dave Patton, NN1N, consulted with Roanoke Division Director Dennis Bodson, W4PWF. Tarplee has been South Carolina's Technical Coordinator for almost seven years, first appointed by Boehner in January 2003. Tarplee's term of office as Section Manager will continue through December 31, 2010.

==> THE DOCTOR IS IN: FOCUSING ON 10 METERS

By ARRL News Editor S. Khrystyne Keane, K1SFA

Now with the ARRL 160 Meter Contest come and gone, it's time for me to focus on the opposite end of the HF spectrum: 10 meters. You guessed it -- I'm gearing up for the 37th running of the ARRL 10 Meter Contest. This contest has a bit of a twist to it: Operators have the choice of using CW only, SSB only or they can mix it up and use both. So as I prepare this week for the 'test, I went to ask the Doctor what is so special about 10 meters. Is there anything I need to be aware of and watch out for this weekend? Check up on what the Doctor has to say here <http://www.arrl.org/news/features/2009/12/09/11238/?nc=1>.

==> + REGULATORY: FCC DISMISSES TWO PETITIONS

On Wednesday, December 9, the Federal Communications Commission dismissed two separate Petitions for Rulemaking. The first Petition was filed by Murray Green, K3BEQ, concerning the operation of repeater stations in the Amateur Service. The other Petition, filed by Glen Zook, K9STH, requested amending Section 97.119(a) to change how often stations must identify themselves. Read more here <http://www.arrl.org/news/stories/2009/12/10/11241/?nc=1>.

==> + NOW YOU KNOW!: THE ARRL 10 METER CONTEST AND SATELLITES

By ARRL News Editor S. Khrystyne Keane, K1SFA

This weekend marks the 37th running of the ARRL 10 Meter Contest <http://www.arrl.org/contests/rules/2009/10-meters.html>. Back in November 1973 when the contest was first announced in QST <http://p1k.arrl.org/cgi-bin/topdf.cgi?id=62388&pub=qst>, the rules differed slightly from how they stand now. This event began due to the interest that radio amateurs showed in the 10 meter band, thanks to the

5-band awards offered by the ARRL. "Occupancy is an important issue of the day as is proof that there's life in the old band yet," the article stated. "At a recent convention the matter was raised and met with enthusiastic response. Rather than postpone the idea for another year, the consensus was 'let's give it a try for '73,' prompting a recommendation by the Contest Advisory Committee."

<http://www.amsat.org/amsat-new/satellites/satInfo.php?satID=29&returl=satellites/history.php>
In 1973, each completed two-way QSO was worth 2 points, except QSOs with a US Novice were worth double that. The article pointed out that certain FCC-issued Novice call signs look a little strange: "Novices in KZ5 and KG4 have strange call signs -- a Canal Zone Novice has an 'N' at the end of the call, such as KZ5AAN. A Novice in Guantanamo Bay has an 'N' after the number, such as KG4NAA. All others replace the K with a W (i.e. WL7, WH6, etc.). If you work a station once on cw you can work him again on phone. Oscar QSOs also count."

Oscar QSOs? As in the satellite? Yes! The 1973 rules stated that "Oscar 6 contacts may be counted. All cw QSOs must take place between 28.0-28.5 MHz except those made though Oscar 6." The article also advised contest participants to stay clear of 29.45-29.55 MHz, as these were the Oscar downlink frequencies. Beginning in 1973 and continuing through 1979, QSOs made via the Oscar satellites counted for credit in the ARRL 10 Meter Contest. Beginning in 1980, after 10 meters had seemingly come back to life, the CAC no longer accepted the QSOs for credit in the contest. Now you know!

==> + SILENT KEY: AMBASSADOR WILLIAM A. WILSON, K6ARO (SK)

William A. "Bill" Wilson, K6ARO -- the first US Ambassador to the Holy See (the Vatican) -- passed away from cancer early on the morning of Saturday, December 5. He was 95. First appointed as presidential envoy to Rome in 1981 by President Ronald Reagan, Wilson was appointed the first full ambassador to the Holy See in 1984, once official relations were established, serving until 1986. Read more here <http://www.arrl.org/news/stories/2009/12/07/11234/?nc=1>.

==> SOLAR UPDATE

<http://sohowww.nascom.nasa.gov/data/realtime/realtime-update.html>
Tad "When I behold, upon the night's starr'd face <http://englishhistory.net/keats/poetry/whenihavefears.html>" Cook, K7RA, reports: Finally! A sunspot appeared on Wednesday, December 9, giving us a daily sunspot number of 13 -- this followed 16 days of no sunspots. The new group is number 1034, and need we say it is a Solar Cycle 24 spot? Cycle 24 spots were news at one time, but we haven't seen a Solar Cycle 23 spot since number 1016 on April 29-30, 2009. Solar Cycle 23 peaked around 8-9 years ago. Excitement builds for this weekend's ARRL 10 Meter Contest <http://www.arrl.org/contests/rules/2009/10-meters.html>. Will sunspot activity amount to enough to enhance 10 meter propagation? The latest

prediction shows a rising solar flux, 74 and 75 on December 10-11 and 77 from December 12-16; this must correspond to the new sunspot swinging into view, instead of peeking over the horizon as it did on Wednesday. Even without sunspots, Geminids meteor showers <http://meteorshowersonline.com/geminids.html> have intensified with each passing year as Earth moves deeper into the debris stream from extinct comet 3200 Phaethon <http://en.wikipedia.org/wiki/3200_Phaethon>. The predicted peak of the meteor shower is about five hours after the end of the contest and there is a good chance that ionized comet trails could enhance 10 meter propagation this weekend. Look for more information in the Solar Update, available on the ARRL Web site on Friday, December 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' When I Have Fears That I May Cease to Be <http://englishhistory.net/keats/poetry/whenihavefears.html>.

==> THIS WEEK ON THE RADIO

This week, the ARRL 10 Meter Contest <http://www.arrl.org/contests/rules/2009/10-meters.html> is December 12-13. The Feld Hell Sprint is December 12. The MDXA PSK DeathMatch and the International Naval Contest are December 12-13. The NA High Speed Meteor Scatter Winter Rally is December 12-16. The SKCC Weekend Sprint and the CQC Great Colorado Snowshoe Run are December 13. Next week, the Russian 160 Meter Contest is December 18. The OK DX RTTY Contest is December 19. The Croatian CW Contest is December 19-20 and the Lighthouse Christmas Lights QSO Party Is December 19-January 3. The ARCI Holiday Spirits Homebrew Sprint is December 20, the Run for the Bacon QRP Contest is December 21 and the SKCC Sprint is December 23. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> + ARRL HEADQUARTERS CLOSED FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Friday, December 25, 2009 and Friday, January 1, 2010 in observance of Christmas and New Year's Day. There will be no W1AW bulletins <http://www.arrl.org/w1aw/> or code practice transmissions <http://www.arrl.org/w1aw.html#w1awsked> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> or ARRL Audio News <http://www.arrl.org/arrlletter/audio/> on Thursday, December 24 and 31. We wish everyone a safe and joyful holiday season and a prosperous 2010.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, December 27, 2009, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, January 8, 2010: Amateur Radio Emergency Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1687 - December 11 2009

Amateur Radio Newsline report number 1687 with a release date of
Friday, December 11th 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC again denies a petition aimed at
outlawing closed and private repeaters, a Utah ham is first on scene at
a rollover accident, the Wireless Institute of Australia says it will
start training V- hams in rescue radio operations and amateur radio
pays homage to a great World War 2 fighting machine of the sea. Find
out the details on Amateur Radio Newsline(tm) report number 1687 coming
your way right now.

RADIO LAW: FCC SAYS NO TO ANOTHER PETITION TO OUTLAW CLOSED AND
PRIVATE REPEATERS

Another petition to the FCC aimed at outlawing closed and private
repeaters has been denied by the FCC. Amateur Radio Newsline's Bill
Pasternak, WA6ITF, takes an in depth look at this story:

--

Like everyone who had tried before him, Maury Green, K3BEQ, had the best of
intentions when he filed his rules change request. A request aimed at
banning repeater owners from barring anyone from using a repeater other
than hams who would use the system to blatantly violate the FCC rules.

But good intentions are not the stuff that radio rules are made of and on
December 8th the FCC once again made it clear that it is not going to
involve itself even remotely in the political or social aspect of owning
and operating a repeater. Nor is it going to tell a repeater owner
operator whom he or she must have his system repeat.

In his petition for rule making filed several month ago Green had asked the
FCC to amend Section 97.205(e) of its Rules. This, to prohibit a repeater
station licensee or control operator from limiting the use of a repeater to
only certain user stations, unless a user blatantly violates the
Commission's Rules.

Green argued that Section 97.205(e), which permits a repeater station
licensee or control operator to limit the use of a repeater to certain user
stations, conflicts with Section 97.101(b). That rule states that no
frequency is for the exclusive use of a particular amateur station, and

each station licensees must cooperate in selecting transmitting channels and in making the most effective use of the amateur service frequencies.

But in what might best be described as a cookie-cutter decision not unlike responses to similar requests going back more than 30 years, the FCC flatly disagreed. As in the past, the regulatory agency once again stated that Section 97.205(e) does not establish an exclusive assignment of a frequency to a repeater. And with regard to Green's contention that a coordinated closed repeater has exclusive control of an amateur service frequency, the FCC again noted that coordination is not required as a condition of operating a repeater.

The FCC went on to note that coordination does not and cannot result in assignment or establish control of an amateur service channel, and nothing in the rules prohibits other amateur stations from using the channels for which a repeater has been coordinated when they are not being used by the repeater. Rather, Section 97.205(e) merely enables a repeater licensee or control operator to control the repeater, so that he or she can ensure the repeater is properly operated as required by Section 97.105(a). Accordingly, says the FCC there is no conflict between the rules, and no grounds for the Commission to propose to amend Section 97.105(a).

So what about operating on a repeaters input or output frequency when it is not in use. Well a quick history lesson is in order. Back in the early days of repeater rules the FCC required system owners to have lock-out receivers listening to the output frequency. These receivers would inhibit the repeater transmitter from coming on if the output frequency was in use.

When repeaters were deregulated in the mid-1970's the lock-out receivers were deemed to be unnecessary. Instead the FCC simply said that it expected hams to use common sense when using a repeater input or output for other than repeater purposes. It said that if you operate simplex on a repeater input you might be repeated whether you want to or not. It also inferred that if you operate simplex on a repeater output and got clobbered by the repeater transmitter to not complain to the FCC. Again the agency expected hams to have enough common sense to know this might happen and find other frequencies on which to operate. And that's been the unofficial rule of thumb for over three decades.

So what does this most recent decision mean to the average ham? In reality not very much. With the exception of Southern California, closed and private repeaters make up less than 1% of the nations total of machines. Also, most of the time those hams who are excluded from operating on a particular system have been asked to leave after the system owner or his control operators find that he or she is disruptive to the normal flow of repeater traffic. In other words they were ordered to leave and to date the FCC has backed every repeater owner who has asked enforcement assistance in keeping unwanted users off their machines.

Is this the end of it? Likely not. In another two or three years another well meaning ham will likely file a similar request to ban closed and private repeaters. Unless he or she cab come up with a far more compelling argument than has Maury Green, K3BEQ, and those who petitioned in the past, its likely that request will also fall on deaf FCC ears. In this area of the Part 97 rules, history does have a way of repeating itself.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

As far as we can tell, this is the 9th or 10th attempt at getting the FCC to prohibit a repeater licensee from restricting access to a repeater to those whom he or she wants to be filed the last three decades. And as in all past attempts, this one has met with failure as well. (FCC with historic background from Looking West archive.)

**

RADIO RULES: FCC SAYS NO TO MODIFYING STATION ID RULES

The FCC has also denied a rules change request filed by Glen Zook, K9STH, of Richardson, Texas. Zook had request that Section 97.119(a) of the Commission's Rules be amended to incorporate certain portions of the Commission's former station identification rule so as to assure that hams properly identified their stations at specific times.

Back in 2006, Zook filed a petition requesting that the Commission amend the Amateur service rules to incorporate certain portions of the FCC's earlier station identification rule. This would include requiring that the call sign be transmitted at the beginning of each transmission or series of transmissions.

In response, the Commission received approximately one hundred comments, generally opposing the Zook petition. And in 2007 the FCC dismissed this petition, concluding that the requested rule changes were not necessary and were not supported by the amateur radio community.

Zook filed again on April 7, 2009. After considering his latest request for some nine months the FCC concluded that his present Petition does not assert or demonstrate that circumstances have changed since 2007 with respect to the adequacy of the current station identification rule. It went on to note that his current proposal, like his previous petition, does not demonstrate that revising the station identification requirement would address the concern that many amateur radio operators do not identify their station in a timely manner or at all.

In its dismissal order the FCC says that this is really a matter better addressed by enforcement of the present rule rather than a rule change. If he desires to do so Zook has the option to file an appeal. (FCC)

RESCUE RADIO: HAMS ASSIST AT UTAH DAIRY TRUCK CRASH

Amateur radio was first on the scene on Wednesday, December 2nd. This, after a dairy truck crashed near Logan, Utah, and rolled into the Logan River.

According to the Logan Herald Journal, Brent Yeates, KA7FAP, happened across the accident scene and stopped to help. With cellular telephone service sparse at best Yates used a local repeater to contact Brent Carruth, AD7VF in Logan. Carruth listened to Yeates give a first-hand account of the condition of the driver and the seriousness of the crash. He then notified authorities which dispatched assistance to the scene.

The accident occurred on Utah Route 89 as it passed through Logan Canyon. The semi-trailer was filled with 38,000 pounds of dairy products much of which was leaked into the river. More is on-line http://hjnews.townnews.com/articles/2009/12/06/news/news04-12-06-09.txt (HJ News)

RESCUE RADIO: WIA TO DEVELOP RESCUE RADIO TRAINING COURSE

The Board of Directors of the Wireless Institute of Australia says its time for an organized effort to train VK hams in rescue radio techniques. Robert Broomhead, VK3DN, has the details from down-under:

--

During 2009 the Wireless Institute of Australia has been considering training of amateurs for activities associated with emergency communications preparedness. In the July and September issues of Amateur Radio magazine, the WIA Comment focussed on issues surrounding amateur operator emergency
communications, training and general preparedness.

From the feedback received, the Board considered that a national accredited training system was an essential element in the broad range of issues associated with emergency communications provided by amateur operators.

In association with the WIA' s Recognized Training Organization (RTO), TrainSafe, a nationally recognized training package has now been developed. The WIA Board has prepared a statement on "where it is at" in
the development of the training package and a summary of feedback and

issues.

I'm Robert, VK3DN

--

For those interested, the statement and attachments that Robert referred to can be found when you visit wia.org.au (WIA News)

RESTRUCTURING: INDIA GRANTS HAMS 30 METERS

Hams in India have received government permission to permanently operate on 30 meters on a secondary basis, though not all details of the new allocation are yet known.

India's hams had previously been granted experimental access to 30 meters for a one-month period between August 31st and September 30th of 2007. At that time, A1A and J3E modes with 100 watts maximum were allowed between 10.100 and 10.150 MHz.

VU2GMN has been in contact with the authorities in Delhi. He says that he is trying to clarify if SSB will be included with the permanent allocation. Australia is believed to be the only other major country allowing SSB on 10 MHz for amateur radio use in ITU Region 3. (W7VOA)

**

RADIO BUSINESS: VIBROPLEX CHANGING OWNERSHIP

A famed Morse key manufacturer is changing hands. Our CW man, Frank Haas, KB4T, has the details:

--

Vibroplex will have a new owner effective December 21st, 2009. Scott Robbins, W4PA, of Knoxville, Tennessee, has agreed to buy Amateur Radio's oldest manufacturer from present owner Mitch Mitchell of Mobile, Alabama who recently decided to retire. In a report detailed at arrl.org, Robbins says he will leave his post as Amateur Radio Product Manager at TenTec in Mid-December to take over and relocate Vibroplex. Newsline asked Robbins why he decided to buy the company:

--

Robbins: "It was my desire to own my own business. Its something I had thought about for a number of years but the right opportunity had never presented itself until now. And its something I gave a lot of thought to once it was made known that Vibroplex was available and I decided that my time had arrived and I would go ahead and give it a shot."

--

Vibroplex will move to Knoxville before the New Year. Business operations are expected to resume on January 5th, 2010. Vibroplex has been

internationally renowned for its semi-automatic keys, known by most as "bugs," for professional and amateur telegraphers since Inventor Horace Martin first created the device in 1904 as a cure for telegrapher's "glass arm," a painful condition similar to carpal tunnel syndrome. The product line expanded to include straight keys, keyer paddles and a wider variety of bugs. When asked what changes he plans for the product line, Robbins said:

--

Robbins: "No changes to the current products. The changes would be that I have every intention of offering new products under the Vibroplex name in 2010 and beyond."

--

The 800 number, web site and email contacts will remain the same. For the Amateur Radio Newsline, I'm Frank Haas KB4T in Florida.

--

The bottom line: Frank says that the change of ownership means that the Vibroplex side-swiper should be with us for a long time to come. (KB4T)

RADIO EDUCATION: NEW HF LEARNING AWARD FROM QCWA CHAPTER 119

In an effort to encourage newer amateur radio operators to enter into the mainstream of HF amateur radio the Chapter 119 of the Quarter Century Wireless Association has introduced the Worked All 10 U.S. Call Areas Award. According to the announcement this award provides an achievement goal for the new operator, or any operator beginning to explore the HF bands.

Because new hams with entry level licenses have limited access to the amateur radio bands on 160 through 10 meters, the award is unique in that it contains provisions to permit HF operation under the guidance of a mentor, or Elmer, who can, if necessary, act as a control operator. The sponsors say that becoming involved in HF operations will assist the new amateur operator to gain operating skills and to earn higher classes of license with his or her own increased operating privileges.

Full details and a sample of the award can be found on-line at the Chapter 119 web page. Its in cyberspace at qcwa-ch119.org. (QCWA)

NEW PRODUCTS: OH THOSE BUDTRAPS

And here is a neat and cheap product that you can use to keep those very popular ear-bud type earphones from becoming a tangled mess. BudTrap International has introduced its new BudTrap new cable management device engineered to trap ear-buds and avoid headphone tangles in your Apple iPod, Microsoft Zune or maybe your HT.

BudTrap stays attached to your earphone jack and helps you secure your ear-buds the way you want quickly. The device works with either straight or curved device jacks. The small form factor offers portable users the convenience of headphone cable management, without adding bulk to the device. This makes BudTraps a natural for hams to experiment with and find new ways to use that the manufacturer likely never dreamed of.

The new Bud-Traps are available online for less than three dollars. More information is at www.budtrap.com/ (RW)

EMERGING TECHNOLOGY: RESEARCHERS DEVELOP SINGLE ATOM TRANSISTOR

Researchers from Helsinki University of Technology in Finland, the University of New South Wales Australia and University of Melbourne have succeeded in building a micro-sized transistor whose active region composes only of a single phosphorus atom in silicon. The working principles of the device are based on sequential tunneling of single electrons between the phosphorus atom and the source and drain leads of the transistor. The tunneling can be suppressed or allowed by controlling the voltage on a nearby metal electrode with a width of a few tens of nanometers.

In the recently developed transistor, all the electric current passes through the same single atom. This allows researchers to study the effects arising in the extreme limit of the transistor size. The results of the development of this transistor has been published in Nano Letters. That's a journal of the American Chemical Society. (Science OnLine)

CHANGING OF THE GUARD: WILLIAM WILSON, K6ARO, FIRST AMBASSADOR TO THE VATICAN - S.K.

We have said it far to many times of late, but the changing of the guard in amateur radio continues. This with the sad news tat William A.Wilson, K6ARO, the first US Ambassador to the Vatican has passed away at age 95.

According to the Los Angeles Times, Wilson died in his Carmel Valley, California home from complications related to cancer on Saturday, December 5th.

William Wilson was a Los Angeles businessman who became a member of President Ronald Reagan's "kitchen cabinet" early on in Reagan's career. Wilson first met the Reagan at a dinner party in the early 1960s, when the future president was still an actor. Wilson soon became a member of the inner circle of wealthy advisers who persuaded Reagan to run for governor of California in 1966 and then helped guide his political campaigns.

Soon after Ronald Reagan was sworn in as president in 1981 he named Wilson as his personal envoy to the Vatican. The United States had not had formal diplomatic relations with the Holy See since 1867, when Congress repealed funds for the consular post, citing a need to separate church and state.

In 1984, the United States reestablished official relations with the Vatican recognizing it as a sovereign body and the pope as an international statesman. At that time Wilson was elevated from personal envoy to full ambassador but was ultimately forced to resign over what news reports termed as political missteps.

William Wilson, K6ARO is survived by two daughters, , six grandchildren and eleven great-grandchildren .
His wife of 58 years, Elizabeth died in 1996. Funeral services were planned for Friday, December 11. In lieu of flowers donations in his name can be made to the St John's Health Center or Thomas Aquinas College. (LA Times, others)

HAM RADIO IN SPACE: METEOR SCATTER OFF THE GEMINIDS

The annual Geminid meteor shower has been intensifying, and researchers say 2009 could be the best year yet. This year's display peaks on December 13th and 14th with meteor scatter enthusiasts certain to be out for magical contacts. QSO's that can only be made by bouncing their signals off of ionizing meteor trails as the space rocks burn up in the Earth's atmosphere.

For many years meteor scatter contacts were the domain of the most skilled of high speed CW operators. In more recent times digital modes such as JT2 and JT4 are superseding the use of Morse because of their ability to hear well into and below the spectrum noise floor.

JT2 uses 2-tone FSK modulation for synchronization and differential BPSK for the encoded user information. JT4 uses 4-tone FSK, so it can also include both a sync bit and a data bit in each symbol. JT2 and JT4 are both designed for making QSOs under extremely weak-signal conditions making them ideal for making meteor scatter contacts.

More about these modes can be found on-line at
http://physics.princeton.edu/pulsar/K1JT/JT2_JT4.TXT
(VHF Reflector)\

WORLDBEAT: DATE ANNOUNCED FOR CONSTRUCTION OF UK NATIONAL AR CENTER

RSGB General Manager Peter Kirby, G0TWW has announced the start date for building the new National Amateur Radio Center in the United Kingdom. The work will commence at Bletchley Park in London on January 11, 2010. Subject to favorable progress, the work is expected to finish in June.

The National Amateur Radio Center will house the United Kingdom's National Amateur Radio Heritage exhibition, the National Amateur Radio Library and the Archive the Radio Society of Great Britain. The Bletchley Park center will be open to both RSGB members and members of the public, hopefully in 2010. Further details of progress will be announced as work progresses. (GB2RS)

**

ON THE AIR: ACTIVATING HUNGARIAN PARKS

On the air, listen out for HA0HW, HG0NDZ, HA0IH, HA4DX and HA4XG. This, as they activate more Hungarian National Parks during the month of December. Look for them to using the call HG0WFF/P through months end. QSL to HA0HW via the bureau. (ICPO)

**

ON THE AIR: TUNISIA SPECIAL EVENT

The Radio Club Station of Tunisian Scouts station 3V8ST will commemorate their 10th anniversary by activating special event station 3V10A from the headquarters of Tunisian Scouts in Tunis Mahrajens. This operation will last until December 31st. QSL to the Amateur Radio Club of Tunis, P.O. Box 339, 1082, Tunisia. (Radio Club of Tunisia)

**

DX

In DX, word that three hams will be taking VHF, UHF and microwave equipment on a DXpedition to Norfolk Island that is slated to run from January 3rd to the 14th of 2010. The operators involved are VK3XPD, VK4UH and VK3KH. They say that digital modes will be an integral part of their operation, and they are set up to run WSJT on all bands. Other modes include CW, SSB, FSK441 and JT65A. They will also be active on the Meteor Scatter net, and will also be happy to consider skeds at other times. QSL via VK3KH.

N8OO and NP3D operating portable HR2 from Honduras should be on the air through Dsecember 20th using CW, RTTY and SSB on all bands. N8OO also plans to take part in the 10 Meter ARRL DX Contest while NP3D wants to join the OK DX RTTY Contest as HQ2S. QSL as directed by each operator.

OE2ATN, is planning to be active Island of Velidhu as 8Q7AT between May 23rd and June 4th of 2010.
Activity will be mainly SSB on 80, 40 and 20 meters using a Yaesu FT-897D into a G5RV antenna. QSL via OE2ATN.

JA8BMK, will be active as CE0Z from Juan Fernandez Island between January 19th and February 2nd of 2010. Activity will be on 160-10 meters, with a focus on the lower bands using CW, SSB and some digital modes. QSL direct to JA8BMK.

Lastly, YV5KAJ, says via the Ohio Penn DX Newsletter that he is celebrating his 25th year in amateur radio by going on a DXpedition to the Island of Tortuga between December 26th to the 29th. He will also be using the special callsign YW5EID on 40 through 12 meters using SSB and some digital modes. The operation is also dedicated to IW5EID who introduced YV5KAJ to the hobby. QSL via EA5KB

(Above from various DX news sources)

THAT FINAL ITEM: HAMS WORK TO CREATE USS INDIANAPOLIS RADIO ROOM

And finally, this past week America paused to remember the attack that took place on Pearl Harbor sixty-eight years ago. One of the Navy ships that helped bring World War Two to a close was the USS Indianapolis. She was torpedoed and sunk in 1945 after delivering Atom bomb components to Tinian Island. Those parts were later used on bombs dropped on major Japanese cities.

Now, sixty four years later a group of Indianapolis amateur radio operators have re-created an operational radio room like that aboard the USS Indianapolis. Jack Parker W8ISH has the rest of the story.

--

After months of research and nearly two years of planning the USS Indianapolis radio room is on the air. This real life display is located in the World War Memorial in downtown Indianapolis.

The radio room features 67 World War Two pieces of equipment donated from people around the county. According to Chuck Christ, W9IH, they lucked out when an appeal for used Naval radio equipment caught the eye of one internet user.

--

Chuck: "We put that list of things that we wanted on an E-Bay type thing and a guy by the name of Stan Wine calls me 12-hours later from Sequaro, NM and says I have everything you want."

--

The USS Indianapolis sank in just 12 minutes after being struck by two torpedoes. There were nearly 1200 souls on board. Only 316 survived after spending four days floating in shark infested waters of the Philippine Sea.

Historians don't know if the ship's radio men ever had a chance to send an
SOS. They were on a secret mission. Today, the re-created ship's station
shows four working positions where secret messages were sent and received as the USS Indianapolis carried out it's secret mission across the Pacific.

Barry Fairfax-KW9DX, says four months of research taught them how the radio room worked.

--

Barry Fairfax: "The radio men you see here would have been receiving coded
messages from the main land or Pearl Harbor. They would type them out, the coded messages in code, then send them to the room behind us which is the

coding room where they were decoded".

--

One of those hams working the radios and giving tours is World War Two veteran Bob Begeman, W9KVK He saw duty as a naval radio man.

--

Begeman: "I was on an attack transport, APA 27, the USS George Climer, and
we had radio equipment similar to this and I was a radio technician and took care of the equipment".

--

Begeman says amateur radio operators are welcome to come visit the display and operate CW or Side-band from one of the four operating stations.

--

Christ: "This is exactly what would have been on the ship".

The call sign is WW2IND. This truly is, living history.

Reporting from Indianapolis, this is Jack Parker, W8ISH.

--

The recreated radio room is located in the World War Memorial just four blocks north of Monument Circle in downtown Indianapolis. The actual memorial for the USS Indianapolis is about seven blocks away. Tours are Wednesday through Sunday from 9 a.m. to 5 p.m. local Indianapolis time. Amateur Radio operators are welcome to operate the equipment when an appropriately licensed ham is acting as the guide. (W8ISH)

> RESCUE RADIO: ?WIA TO DEVELOP RESCUE RADIO TRAINING COURSE
>
> The Board of Directors of the Wireless Institute of Australia says its time
> for an organized effort to train VK hams in rescue radio

> techniques. Robert Broomhead, VK3DN, has the details from down-under:
>
> --
>
> During 2009 the Wireless Institute of Australia has been considering
> training of amateurs for activities associated with emergency
> communications preparedness. In the July and September issues of Amateur
> Radio magazine, the WIA Comment focussed on issues surrounding amateur
> operator emergency
> communications, training and general preparedness.
>
> From the feedback received, the Board considered that a national
> accredited training system was an essential element in the broad range of
> issues associated with emergency communications provided by amateur
> operators.
>
> In association with the WIA' s Recognized Training Organization (RTO),
> TrainSafe, a nationally recognized training package has now been
> developed. The WIA Board has prepared a statement on "where it is at"
> in
> the development of the training package and a summary of feedback and
> issues.
>
> I'm Robert, VK3DN
>
> --
>
> For those interested, the statement and attachments that Robert referred to
> can be found when you visit wia.org.au (WIA News)

> RADIO BUSINESS: VIBROPLEX CHANGING OWNERSHIP
>
> A famed Morse key manufacturer is changing hands. Our CW man, Frank Haas,
> KB4T, has the details:
>
> --
>
> Vibroplex will have a new owner effective December 21st, 2009. Scott
> Robbins, W4PA, of Knoxville, Tennessee, has agreed to buy Amateur Radio's
> oldest manufacturer from present owner Mitch Mitchell of Mobile, Alabama
> who recently decided to retire. In a report detailed at arrl.org, Robbins
> says he will leave his post as Amateur Radio Product Manager at TenTec in
> Mid-December to take over and relocate Vibroplex. Newsline asked Robbins
> why he decided to buy the company:
>
> --
>
> Robbins: "It was my desire to own my own business. Its something I had
> thought about for a number of years but the right opportunity had never
> presented itself until now. And its something I gave a lot of thought to
> once it was made known that Vibroplex was available and I decided that my
> time had arrived and I would go ahead and give it a shot."
>
> --
>
> Vibroplex will move to Knoxville before the New Year. Business operations
> are expected to resume on January 5th, 2010. Vibroplex has been
> internationally renowned for its semi-automatic keys, known by most as
> "bugs," for professional and amateur telegraphers since Inventor Horace
> Martin first created the device in 1904 as a cure for telegrapher's "glass
> arm," a painful condition similar to carpal tunnel syndrome. The product
> line expanded to include straight keys, keyer paddles and a wider variety
> of bugs. When asked what changes he plans for the product line, Robbins
> said:
>
> --
>
> Robbins: "No changes to the current products. The changes would be that I
> have every intention of offering new products under the Vibroplex name in
> 2010 and beyond."
>
> --
>
> The 800 number, web site and email contacts will remain the same. For the
> Amateur Radio Newsline, I'm Frank Haas KB4T in Florida.
>
> --
>

> The bottom line: Frank says that the change of ownership means that the
> Vibroplex side-swiper should be with us for a long time to come. (KB4T)

> CHANGING OF THE GUARD: WILLIAM WILSON, K6ARO, FIRST AMBASSADOR TO THE
> VATICAN - S.K.
>
> We have said it far to many times of late, but the changing of the guard in
> amateur radio continues. This with the sad news tat William A.Wilson,
> K6ARO, the first US Ambassador to the Vatican has passed away at age 95.
>
> According to the Los Angeles Times, Wilson died in his Carmel Valley,
> California home from complications related to cancer on Saturday, December
> 5th.
>
> William Wilson was a Los Angeles businessman who became a member of
> President Ronald Reagan's "kitchen cabinet" early on in Reagan's
> career. Wilson first met the Reagan at a dinner party in the early 1960s,
> when the future president was still an actor. Wilson soon became a member
> of the inner circle of wealthy advisers who persuaded Reagan to run for
> governor of California in 1966 and then helped guide his political
> campaigns.
>
> Soon after Ronald Reagan was sworn in as president in 1981 he named Wilson
> as his personal envoy to the Vatican. The United States had not had formal
> diplomatic relations with the Holy See since 1867, when Congress repealed
> funds for the consular post, citing a need to separate church and state.
>
> In 1984, the United States reestablished official relations with the
> Vatican recognizing it as a sovereign body and the pope as an international
> statesman. At that time Wilson was elevated from personal envoy to full

> ambassador but was ultimately forced to resign over what news reports
> termed as political missteps.
>
> William Wilson, K6ARO is survived by two daughters, , six grandchildren and
> eleven great-grandchildren .
> His wife of 58 years, Elizabeth died in 1996. Funeral services were
> planned for Friday, December 11. In lieu of flowers donations in his name
> can be made to the St John's Health Center or Thomas Aquinas College. (LA

> HAM RADIO IN SPACE: METEOR SCATTER OFF THE GEMINIDS
>
> The annual Geminid meteor shower has been intensifying, and researchers say
> 2009 could be the best year yet. This year's display peaks on December 13th
> and 14th with meteor scatter enthusiasts certain to be out for magical
> contacts. QSO's that can only be made by bouncing their signals off of
> ionizing meteor trails as the space rocks burn up in the Earth's atmosphere.
>
> For many years meteor scatter contacts were the domain of the most skilled
> of high speed CW operators. In more recent times digital modes such as JT2
> and JT4 are superseding the use of Morse because of their ability to hear
> well into and below the spectrum noise floor.
>
> JT2 uses 2-tone FSK modulation for synchronization and differential BPSK
> for the encoded user information. JT4 uses 4-tone FSK, so it can also
> include both a sync bit and a data bit in each symbol. JT2 and JT4 are
> both designed for making QSOs under extremely weak-signal conditions making
> them ideal for making meteor scatter contacts.
>
> More about these modes can be found on-line athttp://physics.princeton.edu/pulsar/K1JT/JT2_JT4.TXT

> ==> ARRL PUBLICATIONS: ARRL LICENSING STUDY GUIDES -- COMING TO AN
> EBOOK READER NEAR YOU
>
> ? ?ARRL is pleased to announce that owners of Kindle
> <http://www.amazon.com/Kindle> -- an electronic book reader sold by
> Amazon.com <http://www.amazon.com/> -- can now download ARRL's Tech Q&A
> <http://www.amazon.com/ARRLs-Tech-Q-A-ebook/dp/B002YNSBNE/ref=sr_1_2?i...
> s=books&qid=1259944328&sr=8-2-catcorr>
> directly from the online bookseller for use on their Kindle. Kindle is
> shaped much like a book with a paper-like screen that displays text and
> pictures. Those who have the Kindle application installed on their
> Apple <http://www.apple.com/> iPhone <http://www.apple.com/iphone/> or
> iPod touch <http://www.apple.com/ipodtouch/> can also download the book
> for use on these devices. When you download the Tech Q&A, you can gain

> access quickly and easily, smoothing the path to your first ham radio
> license. This ideal study tool -- whether you're at home, in the
> office, traveling or just on the go -- lets you review the questions
> and answers from the entire Technician question pool so you can pass
> the 35-question exam. Kindle versions of the General Q&A and the
> Amateur Extra Q&A will be available sometime in January. All three can
> be purchased from Amazon.com for $9.99 each.
>
> ==> + ORGANIZATIONAL: MARC TARPLEE, N4UFP, APPOINTED SOUTH CAROLINA
> SECTION MANAGER
>
> ? ?Marc Tarplee, N4UFP, of Rock Hill, has been appointed the new ARRL
> South Carolina Section Manager. He will complete the term of Jim
> Boehner, N2ZZ, who was elected ARRL Roanoke Division Vice Director last
> month. When Boehner announced that he was stepping down from the
> Section Manager post he has held since January 2003, he recommended
> Tarplee, the South Carolina Section Technical Coordinator, for the
> position. Tarplee and Boehner both take on their new positions January
> 1, 2010. According to the Rules and Regulations of the ARRL Field
> Organization, when a vacancy in the office of Section Manager occurs
> between elections, the position is filled by appointment by the
> Membership and Volunteer Programs Manager in consultation with that
> Division's Director. MVP Manager Dave Patton, NN1N, consulted with
> Roanoke Division Director Dennis Bodson, W4PWF. Tarplee has been South
> Carolina's Technical Coordinator for almost seven years, first
> appointed by Boehner in January 2003. Tarplee's term of office as
> Section Manager will continue through December 31, 2010.

> <http://www.arrl.org/news/stories/2009/12/10/11241/?nc=1>.
>
> ==> + NOW YOU KNOW!: THE ARRL 10 METER CONTEST AND SATELLITES
>
> By ARRL News Editor S. Khrystyne Keane, K1SFA
>
> This weekend marks the 37th running of the ARRL 10 Meter Contest
> <http://www.arrl.org/contests/rules/2009/10-meters.html>. Back in
> November 1973 when the contest was first announced in QST
> <http://p1k.arrl.org/cgi-bin/topdf.cgi?id=62388&pub=qst>, the rules
> differed slightly from how they stand now. This event began due to the
> interest that radio amateurs showed in the 10 meter band, thanks to the
> 5-band awards offered by the ARRL. "Occupancy is an important issue of
> the day as is proof that there's life in the old band yet," the article
> stated. "At a recent convention the matter was raised and met with
> enthusiastic response. Rather than postpone the idea for another year,
> the consensus was 'let's give it a try for '73,' prompting a
> recommendation by the Contest Advisory Committee."
>
> <http://www.amsat.org/amsat-new/satellites/satInfo.php?satID=29&returl...
> ites/history.php>
> • In 1973, each completed two-way QSO was worth 2 points, except QSOs
> with a US Novice were worth double that. The article pointed out that
> certain FCC-issued Novice call signs look a little strange: "Novices in
> KZ5 and KG4 have strange call signs -- a Canal Zone Novice has an 'N'
> at the end of the call, such as KZ5AAN. A Novice in Guantanamo Bay has
> an 'N' after the number, such as KG4NAA. All others replace the K with
> a W (i.e. WL7, WH6, etc.). If you work a station once on cw you can
> work him again on phone. Oscar QSOs also count."
>
> Oscar QSOs? As in the satellite? Yes! The 1973 rules stated that "Oscar
> 6 contacts may be counted. All cw QSOs must take place between
> 28.0-28.5 MHz except those made though Oscar 6." The article also
> advised contest participants to stay clear of 29.45-29.55 MHz, as these
> were the Oscar downlink frequencies. Beginning in 1973 and continuing
> through 1979, QSOs made via the Oscar satellites counted for credit in
> the ARRL 10 Meter Contest. Beginning in 1980, after 10 meters had
> seemingly come back to life, the CAC no longer accepted the QSOs for
> credit in the contest. Now you know!
>
> ==> + SILENT KEY: AMBASSADOR WILLIAM A. WILSON, K6ARO (SK)
>
> • •William A. "Bill" Wilson, K6ARO -- the first US Ambassador to the
> Holy See (the Vatican) -- passed away from cancer early on the morning
> of Saturday, December 5. He was 95. First appointed as presidential
> envoy to Rome in 1981 by President Ronald Reagan, Wilson was appointed
> the first full ambassador to the Holy See in 1984, once official
> relations were established, serving until 1986. Read more here

>> RADIO LAW: ?FCC SAYS NO TO ANOTHER PETITION TO OUTLAW CLOSED AND
>> PRIVATE REPEATERS
>>
>> Another petition to the FCC aimed at outlawing closed and private
>> repeaters has been denied by the FCC. ?Amateur Radio Newsline's Bill
>> Pasternak, WA6ITF, takes an in depth look at this story:
>>
>> --
>>
>> Like everyone who had tried before him, Maury Green, K3BEQ, had the best of
>> intentions when he filed his rules change request. ?A request aimed at
>> banning repeater owners from barring anyone from using a repeater other
>> than hams who would use the system to blatantly violate the FCC rules.
>>
>> But good intentions are not the stuff that radio rules are made of and on
>> December 8th the FCC once again made it clear that it is not going to
>> involve itself even remotely in the political or social aspect of owning
>> and operating a repeater. ?Nor is it going to tell a repeater owner
>> operator whom he or she must have his system repeat.
>>
>> In his petition for rule making filed several month ago Green had asked the

>> FCC to amend Section 97.205(e) of its Rules. ?This, to prohibit a repeater
>> station licensee or control operator from limiting the use of a repeater to
>> only certain user stations, unless a user blatantly violates the
>> Commission's Rules.
>>
>> Green argued that Section 97.205(e), which permits a repeater station
>> licensee or control operator to limit the use of a repeater to certain user
>> stations, conflicts with Section 97.101(b). ?That rule states that no
>> frequency is for the exclusive use of a particular amateur station, and
>> each station licensees must cooperate in selecting transmitting channels
>> and in making the most effective use of the amateur service frequencies.
>>
>> But in what might best be described as a cookie-cutter decision not unlike
>> responses to similar requests going back more than 30 years, the FCC flatly
>> disagreed. ?As in the past, the regulatory agency once again stated that
>> Section 97.205(e) does not establish an exclusive assignment of a frequency
>> to a repeater. ?And with ?regard to Green's contention that a coordinated
>> closed repeater has exclusive control of an amateur service frequency, the
>> FCC again noted that coordination is not required as a condition of
>> operating a repeater.
>>
>> The FCC went on to note that coordination does not and cannot result in
>> assignment or establish control of an amateur service channel, and nothing
>> in the rules prohibits other amateur stations from using the channels for
>> which a repeater has been coordinated when they are not being used by the
>> repeater. ?Rather, Section 97.205(e) merely enables a repeater licensee or
>> control operator to control the repeater, so that he or she can ensure the
>> repeater is properly operated as required by Section
>> 97.105(a). ?Accordingly, says the FCC there is no conflict between the
>> rules, and no grounds for the Commission to propose to amend Section
>> ?97.105(a).
>>
>> So what about operating on a repeaters input or output frequency when it is
>> not in use. ?Well a quick history lesson is in order. ?Back in the early
>> days of repeater rules the FCC required system owners to have lock-out
>> receivers listening to the output frequency. ?These receivers would inhibit
>> the repeater transmitter from coming on if the output frequency was in use.
>>
>> When repeaters were deregulated in the mid-1970's the lock-out receivers
>> were deemed to be unnecessary. ?Instead the FCC simply said that it
>> expected hams to use common sense when using a repeater input or output for
>> other than repeater purposes. ?It said that if you operate simplex on a
>> repeater input you might be repeated whether you want to or not. ?It also
>> inferred that if you operate simplex on a repeater output and got clobbered
>> by the repeater transmitter to not complain to the FCC. ?Again the agency
>> expected hams to have enough common sense to know this might happen and
>> find other frequencies on which to operate. ?And that's been the
>> ?unofficial
>> rule of thumb for over three decades.
>>

>> So what does this most recent decision mean to the average ham? ?In reality
>> not very much. ?With the exception of Southern California, closed and
>> private repeaters make up less than 1% of the nations total of
>> machines. ?Also, most of the time those hams who are excluded from
>> operating on a particular system have been asked to leave after the system
>> owner or his control operators find that he or she is disruptive to the
>> normal flow of repeater traffic. ?In other words they were ordered to leave
>> and to date the FCC has backed every repeater owner who has asked
>> enforcement assistance in keeping unwanted users off their machines.
>>
>> Is this the end of it? ?Likely not. ?In another two or three years another
>> well meaning ham will likely file a similar request to ban closed and
>> private repeaters. ?Unless he or she cab come up with a far more compelling
>> argument than has Maury Green, K3BEQ, and those who petitioned in the past,
>> its likely that request will also fall on deaf FCC ears. ?In this area of
>> the Part 97 rules, history does have a way of repeating itself.
>>
>> For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.
>>
>> --
>>
>> As far as we can tell, this is the 9th or 10th attempt at getting the FCC
>> to prohibit a repeater licensee from ?restricting access to a repeater to
>> those whom he or she wants to be filed the last three decades. ?And as in
>> all past attempts, this one has met with failure as well. ?(FCC with
>> historic background from Looking West archive.)
>>
>> **
>>
>> RADIO RULES: ?FCC SAYS NO TO MODIFYING STATION ID RULES
>>
>> The FCC has also denied a rules change request filed by Glen Zook, K9STH,
>> of Richardson, Texas. ?Zook had request that Section 97.119(a) of the
>> Commission's Rules be amended to incorporate certain portions of the
>> Commission's former station identification rule so as to assure that hams
>> properly identified their stations at specific times.
>>
>> Back in 2006, Zook filed a petition requesting that the Commission amend
>> the Amateur service rules ?to incorporate certain portions of the FCC's
>> earlier station identification rule. ?This would include requiring that the
>> call sign be transmitted at the beginning of each transmission or series of
>> transmissions.
>>
>> In response, the Commission received approximately one hundred comments,
>> generally opposing the Zook petition. ?And in 2007 the FCC ?dismissed this
>> petition, concluding that the requested rule changes were not necessary and
>> were not supported by the amateur radio community.
>>
>> Zook filed again on April 7, 2009. ?After considering his latest request
>> for some nine months the FCC concluded that his present Petition does not

>> assert or demonstrate that circumstances have changed since 2007 with
>> respect to the adequacy of the current station identification rule. ?It
>> went on to note that his current proposal, like his previous petition, does
>> not demonstrate that revising the station identification requirement would
>> address the concern that many amateur radio operators do not identify their
>> station in a timely manner or at all.
>>
>> In its dismissal order the FCC says that this is really a matter better
>> addressed by enforcement of the present rule rather than a rule change. ?If
>> he desires to do so Zook has the option to file an appeal. ?(FCC)

>>
>> RESCUE RADIO: ?HAMS ASSIST AT UTAH DAIRY TRUCK CRASH
>>
>> Amateur radio was first on the scene on Wednesday, December 2nd. ?This,
>> after a dairy truck crashed near Logan, Utah, and rolled into the Logan
>> River.
>>
>> According to the Logan Herald Journal, Brent Yeates, KA7FAP, happened
>> across the accident scene and stopped to help. ?With cellular telephone
>> service sparse at best Yates used a local repeater to contact Brent
>> Carruth, AD7VF in Logan. ?Carruth listened to Yeates give a first-hand
>> account of the condition of the driver and the seriousness of the
>> crash. ?He then notified authorities which dispatched assistance to the
>> ?scene.
>>
>> The accident occurred on Utah Route 89 as it passed through Logan
>> Canyon. ?The semi-trailer was filled with 38,000 pounds of dairy products
>> much of which was leaked into the river. ?More is

>> RESCUE RADIO: ?WIA TO DEVELOP RESCUE RADIO TRAINING COURSE
>>
>> The Board of Directors of the Wireless Institute of Australia says its time
>> for an organized effort to train VK hams in rescue radio
>> techniques. ?Robert Broomhead, VK3DN, has the details from down-under:

>>
>> --
>>
>> During 2009 the Wireless Institute of Australia has been considering
>> training of amateurs for activities associated with emergency
>> communications preparedness. In the July and September issues of Amateur
>> Radio magazine, the WIA Comment focussed on issues surrounding amateur
>> operator emergency
>> communications, training and general preparedness.
>>
>> ?From the feedback received, the Board considered that a national
>> accredited training system was an essential element in the broad range of
>> issues associated with emergency communications provided by amateur
>> ?operators.
>>
>> In association with the WIA' s Recognized Training Organization (RTO),
>> TrainSafe, a nationally recognized training package has now been
>> developed. ?The WIA Board has prepared a statement on "where it is at"
>> ?in
>> the development of the training package and a summary of feedback and
>> ?issues.
>>
>> I'm Robert, VK3DN
>>
>> --
>>
>> For those interested, the statement and attachments that Robert referred to

>>
>> RADIO BUSINESS: ?VIBROPLEX CHANGING OWNERSHIP

>>
>> A famed Morse key manufacturer is changing hands. ?Our CW man, Frank Haas,
>> KB4T, has the details:
>>
>> --
>>
>> Vibroplex will have a new owner effective December 21st, 2009. ?Scott
>> Robbins, W4PA, of Knoxville, Tennessee, has agreed to buy Amateur Radio's
>> oldest manufacturer from present owner Mitch Mitchell of Mobile, Alabama
>> who recently decided to retire. ?In a report detailed at arrl.org, Robbins
>> says he will leave his post as Amateur Radio Product Manager at TenTec in
>> Mid-December to take over and relocate Vibroplex. ?Newsline asked Robbins
>> why he decided to buy the company:
>>
>> --
>>
>> Robbins: ?"It was my desire to own my own business. Its something I had
>> thought about for a number of years but the right opportunity had never
>> presented itself until now. ?And its something I gave a lot of thought to
>> once it was made known that Vibroplex was available and I decided that my
>> time had arrived and I would go ahead and give it a shot."
>>
>> --
>>
>> Vibroplex will move to Knoxville before the New Year. Business operations
>> are expected to resume on January 5th, 2010. ?Vibroplex has been
>> internationally renowned for its semi-automatic keys, known by most as
>> "bugs," for professional and amateur telegraphers since Inventor Horace
>> Martin first created the device in 1904 as a cure for telegrapher's "glass
>> arm," a painful condition similar to carpal tunnel syndrome. The product
>> line expanded to include straight keys, keyer paddles and a wider variety
>> of bugs. When asked what changes he plans for the product line, Robbins
>> ?said:
>>
>> --
>>
>> Robbins: ?"No changes to the current products. ?The changes would be that I
>> have every intention of offering new products under the Vibroplex name in
>> 2010 and beyond."
>>
>> --
>>
>> The 800 number, web site and email contacts will remain the same. ?For the
>> Amateur Radio Newsline, I'm Frank Haas KB4T in Florida.
>>
>> --
>>
>> The bottom line: ?Frank says that the change of ownership means that the
>> Vibroplex side-swiper should be with us for a long time to come. ?(KB4T)

>> RADIO EDUCATION: ?NEW HF LEARNING AWARD FROM QCWA CHAPTER 119
>>
>> In an effort to encourage newer amateur radio operators to enter into the
>> mainstream of HF amateur radio the Chapter 119 of the Quarter Century
>> Wireless Association has introduced the Worked All 10 U.S. Call Areas
>> Award. ?According to the announcement this ?award provides an achievement
>> goal for the new operator, or any operator beginning to explore the HF
>> ?bands.
>>
>> Because new hams with entry level licenses have limited access to the
>> amateur radio bands on 160 through 10 meters, the award is unique in that
>> it contains provisions to permit HF operation under the guidance of a
>> mentor, or Elmer, who can, if necessary, act as a control operator. ?The
>> sponsors say that becoming involved in HF operations will assist the new
>> amateur operator to gain operating skills and to earn higher classes of
>> license with his or her own increased operating privileges.
>>
>> Full details and a sample of the award can be found on-line at the Chapter
>> 119 web page. ?Its in cyberspace at qcwa-ch119.org. ?(QCWA)

>> EMERGING TECHNOLOGY: ?RESEARCHERS DEVELOP SINGLE ATOM TRANSISTOR
>>
>> Researchers from Helsinki University of Technology in Finland, the
>> University of New South Wales Australia and University of Melbourne have
>> succeeded in building a micro-sized transistor whose active region composes
>> only of a single phosphorus atom in silicon. ?The working principles of the
>> device are based on sequential tunneling of single electrons between the
>> phosphorus atom and the source and drain leads of the transistor. ?The
>> tunneling can be suppressed or allowed by controlling the voltage on a
>> nearby metal electrode with a width of a few tens of nanometers.
>>
>> In the recently developed transistor, all the electric current passes
>> through the same single atom. This allows researchers to study the effects

>> arising in the extreme limit of the transistor size. ?The results of the
>> development of this transistor has been published in Nano Letters. ?That's
>> a journal of the American Chemical Society. ?(Science OnLine)

>> CHANGING OF THE GUARD: ?WILLIAM WILSON, K6ARO, FIRST AMBASSADOR TO THE
>> VATICAN - S.K.
>>
>> We have said it far to many times of late, but the changing of the guard in
>> amateur radio continues. ?This with the sad news tat William A.Wilson,
>> K6ARO, the first US Ambassador to the Vatican has passed away at age 95.
>>
>> According to the Los Angeles Times, Wilson died in his Carmel Valley,
>> California home from complications related to cancer on Saturday, December
>> 5th.
>>
>> William Wilson was a Los Angeles businessman who became a member of
>> President Ronald Reagan's "kitchen cabinet" early on in Reagan's
>> career. ?Wilson first met the Reagan at a dinner party in the early 1960s,
>> when the future president was still an actor. ?Wilson soon became a member
>> of the inner circle of wealthy advisers who persuaded Reagan to run for
>> governor of California in 1966 and then helped guide his political
>> ?campaigns.
>>
>> Soon after Ronald Reagan was sworn in as president in 1981 he named Wilson
>> as his personal envoy to the Vatican. ?The United States had not had formal
>> diplomatic relations with the Holy See since 1867, when Congress repealed
>> funds for the consular post, citing a need to separate church and state.
>>
>> In 1984, the United States reestablished official relations with the
>> Vatican recognizing it as a sovereign body and the pope as an international
>> statesman. ?At that time Wilson was elevated from personal envoy to full
>> ambassador but was ultimately forced to resign over what news reports
>> termed as political missteps.
>>
>> William Wilson, K6ARO is survived by two daughters, , six grandchildren and
>> eleven great-grandchildren .
>> His wife of 58 years, Elizabeth died in 1996. ?Funeral services were

>> planned for Friday, December 11. ?In lieu of flowers donations in his name
>> can be made to the St John's Health Center or Thomas Aquinas College. ?(LA

>> HAM RADIO IN SPACE: ?METEOR SCATTER OFF THE GEMINIDS
>>
>> The annual Geminid meteor shower has been intensifying, and researchers say
>> 2009 could be the best year yet. This year's display peaks on December 13th
>> and 14th with meteor scatter enthusiasts certain to be out for magical
>> contacts. ?QSO's that can only be made by bouncing their signals off of
>> ionizing meteor trails as the space rocks burn up in the Earth's atmosphere.
>>
>> For many years meteor scatter contacts were the domain of the most skilled
>> of high speed CW operators. ?In more recent times digital modes such as JT2
>> and JT4 are superseding the use of Morse because of their ability to hear
>> well into and below the spectrum noise floor.
>>
>> JT2 uses 2-tone FSK modulation for synchronization and differential BPSK
>> for the encoded user information. ?JT4 uses 4-tone FSK, so it can also
>> include both a sync bit and a data bit in each symbol. ?JT2 and JT4 are
>> both designed for making QSOs under extremely weak-signal conditions making
>> them ideal for making meteor scatter contacts.
>>
>> More about these modes can be found on-line

>>
>> In DX, word that three hams will be taking VHF, UHF and microwave equipment
>> on a DXpedition to Norfolk Island that is slated to run from January 3rd to
>> the 14th of 2010. ?The operators involved are VK3XPD, VK4UH and
>> VK3KH. ?They say that digital modes will be an integral part of their
>> operation, and they are set up to run WSJT on all bands. ? Other modes
>> include CW, SSB, FSK441 and JT65A. ?They will also be active on the Meteor
>> Scatter net, and will also be happy to consider skeds at other times. ?QSL
>> via VK3KH.
>>
>> N8OO and NP3D operating portable HR2 from Honduras should be on the air
>> through Dsecember 20th using CW, RTTY and SSB on all bands. ?N8OO also
>> plans to take part in the 10 Meter ARRL DX Contest while NP3D wants to join
>> the OK DX RTTY Contest as HQ2S. QSL as directed by each operator.
>>
>> OE2ATN, is planning to be active Island of Velidhu as 8Q7AT between May
>> 23rd and June 4th of 2010.
>> Activity will be mainly SSB on 80, 40 and 20 meters using a Yaesu FT-897D
>> into a G5RV antenna. ?QSL via OE2ATN.
>>
>> JA8BMK, will be active as CE0Z from Juan Fernandez Island between January
>> 19th and February 2nd of 2010. ?Activity will be on 160-10 meters, with a
>> focus on the lower bands using CW, SSB and some digital modes. QSL direct
>> to JA8BMK.
>>
>> Lastly, YV5KAJ, says via the Ohio Penn DX Newsletter that he is celebrating
>> his 25th year in amateur radio by going on a DXpedition to the Island of
>> Tortuga between December 26th to the 29th. He will also be using the
>> special callsign YW5EID on 40 through 12 meters using SSB and some digital
>> modes. ?The operation is also dedicated to IW5EID who introduced YV5KAJ to
>> the hobby. ?QSL via EA5KB
>>

>>
>> THAT FINAL ITEM: ?HAMS WORK TO CREATE USS INDIANAPOLIS RADIO ROOM
>>
>> And finally, this past week America paused to remember the attack that took
>> place on Pearl Harbor sixty-eight years ago. ?One of the Navy ships that
>> helped bring World War Two to a close was the USS Indianapolis. ?She was
>> torpedoed and sunk in 1945 after delivering Atom bomb components to Tinian
>> Island. ?Those parts were later used on bombs dropped on major Japanese
>> cities.
>>
>> Now, sixty four years later a group of Indianapolis amateur radio operators
>> have re-created an operational radio room like that aboard the USS
>> Indianapolis. ? Jack Parker W8ISH has the rest of the story.
>>
>> --
>>
>> After months of research and nearly two years of planning the USS
>> Indianapolis radio room is on the air. ?This real life display is located
>> in the World War Memorial in downtown Indianapolis.
>>
>> The radio room features 67 World War Two pieces of equipment donated from
>> people around the county. ?According to Chuck Christ, W9IH, they lucked out
>> when an appeal for used Naval radio equipment caught the eye of one
>> internet user.
>>
>> --
>>
>> Chuck: ?"We put that list of things that we wanted on an E-Bay type thing
>> and a guy by the name of Stan Wine calls me 12-hours later from Sequaro, NM
>> and says I have everything you want."
>>
>> --
>>
>> The USS Indianapolis sank in just 12 minutes after being struck by two
>> torpedoes. ? There were nearly 1200 souls on board. ?Only 316
>> survived ?after spending four days floating ?in shark infested waters of
>> the Philippine Sea.
>>
>> Historians don't know if the ship's radio men ever had a chance to send
>> ?an
>> SOS. ?They were on a secret mission. ?Today, the ?re-created ship's
>> ?station
>> shows four working positions where secret messages were sent and received
>> as the USS Indianapolis carried out it's secret mission across the
>> ?Pacific.
>>
>> Barry Fairfax-KW9DX, ?says four months of research taught them how the

>> radio room worked.
>>
>> --
>>
>> Barry Fairfax: ?"The radio men you see here would have been receiving
>> ?coded
>> messages from the main land or Pearl Harbor. ?They would type them out, the
>> coded messages in code, then send them to the room behind us which is the
>> coding room where they were decoded".
>>
>> --
>>
>> One of those hams working the radios and giving tours is World War Two
>> veteran Bob Begeman, W9KVK ? ? He saw duty as a naval radio man.
>>
>> --
>>
>> Begeman: ?"I was on an attack transport, APA 27, the USS George Climer,
>> ?and
>> we had radio equipment similar to this and I was a radio technician and
>> took care of the equipment".
>>
>> --
>>
>> Begeman says amateur radio operators are welcome to come visit the display
>> and operate CW or Side-band from one of the four operating stations.
>>
>> --
>>
>> Christ: ?"This is exactly what would have been ?on the ship".
>>
>> The call sign is WW2IND. ? ? This truly is, living history.
>>
>> Reporting from Indianapolis, this is Jack Parker, W8ISH.
>>
>> --
>>
>> The recreated radio room is located in the World War Memorial just four
>> blocks north of Monument Circle in downtown Indianapolis. ?The actual
>> memorial for the USS Indianapolis is about seven blocks away. ?Tours are
>> Wednesday through ?Sunday from 9 a.m. to 5 p.m. local Indianapolis
>> time. ?Amateur Radio operators are welcome to operate the equipment when an
>> appropriately licensed ham is acting as the guide. ?(W8ISH)

GB2RS NEWS

Sunday 13th December 2009

The news headlines

* RSGB election results announced

* Spectrum Defence Fund announced

* Faraday Medal for Professor Sir Martin Sweeting, G3YJO

The results of the 2009 RSGB Board and Regional Elections were announced at 3pm on Thursday 10 December. John Gould, G3WKL, Robin Bellerby, GM3ZYE, Don Beattie, G3BJ and Iain Phillips, G0RDI were duly elected to serve as Board members from 1 January 2010. Peter Lowrie, MI5JYK was re-elected to serve as Region 8 Regional Manager. Alison Johnson, G8ROG was elected unopposed as Region 9 Regional Manager. The full results of the election are shown on the RSGB web site.

As announced in the January edition of RadCom, the Society has established a Spectrum Defence Fund to challenge Ofcom over its interpretation of the various Acts and Directives that cover PLA/PLT and the threat they pose. This may take the form of a Judicial Review, but we will be advised by our lawyers on the direction to take. The cost of a Judicial Review is likely to be in excess of £75,000 and we are not guaranteed success. But now is the time to stand up and be counted and make it known that we, as a community of radio amateurs and short wave listeners alike are not prepared to accept any level of interference from non-compliant devices. We are looking to our administration, Ofcom, to protect our interests, which is their statutory duty. This is a long term project and all monies donated will be ring-fenced for those actions alone.

To donate to the Spectrum Defence Fund please make cheques payable to The Spectrum Defence Fund and send them to Spectrum Defence, RSGB, 3 Abbey Court, Priory Business Park, Bedford MK44 3WH. Alternative methods of payment such as PayPal etc will be announced in due course.

The RSGB is appreciative of the efforts and support from Society members, the UKQRM group and its membership, among many others.

Professor Sir Martin Sweeting OBE FRS, G3YJO has been awarded the Faraday Medal by the Institute of Engineering and Technology, IET. The

medal is awarded for notable scientific or industrial achievement in engineering or for conspicuous service rendered to the advancement of science, engineering and technology. The citation said that Sweeting was awarded the Medal for "his visionary leadership, satellite expertise, ambition and drive, which among other things, brought the overheads involved in space exploration, down to earth. Sir Martin's work includes establishing the viability of the use of small satellites for earth observation, communication and navigation purposes and his founding of a company to design and supply small satellites to organisations throughout the world". G3YJO will be giving the 45th Appleton Lecture, entitled Small Satellites - Big Future, on Tuesday 19 January at the IET's headquarters in London.

Now news of RSGB Christmas deadlines and opening times. The last day for exam requests to be received at HQ is 15 December 2009. Given that the reliability of post can alter over the Christmas period, please telephone or email the RCE Exams Department to ensure that we have received your request. The last recommended day of posting for Christmas is 21 December, which will therefore be last day for posting exam scripts out from HQ. The deadline for Christmas orders from the RSGB Shop is noon on Monday 21

2

December. No orders received after that time can be delivered before Christmas. RSGB headquarters will close at noon on Wednesday 23 December for the festive season and re-open on Monday 4 January at 08.30. No exam results will be transferred to Ofcom between those dates.

Nominations are open for the 2009 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through amateur radio. The League established the annual prize to recognise amateur radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. Nominations should include the names and addresses of all references. Details appear on the ARRL website, www.arrl.org, where you can search for humanitarian award.

Preston ARS currently has places on both its Foundation and Intermediate courses at the club, which meets every Thursday night from 7pm. If you are interested please contact the lead instructor, Eric, G1WCQ on 01772 686708 or by e-mail to secretary<at>prestonars.co.uk.

A 10GHz beacon went on the air at St. Austell in early December. GB3MCB transmits on 10.36898GHz and beams East North East with 3dB points from just east of North through East to almost SE. The IARU locator is IO70OJ. Reports can be sent via the Beacon Spot website at

www.beaconspot.eu/.

On 19 December LAM Communications will be holding a Christmas Open Day at their Barnsley showroom. Open from 9.30am to 4pm, they promise plenty of festive bargains.

And now for the details of rallies and events for the coming week

We have received no details of any rallies taking place in December 2009. The next rallies we have details for in 2010 are the Red Rose Winter Rally and the Dover Amateur Radio Club Rally, both taking place on 17 January 2010. If you would like your 2010 rally mentioned in RadCom and on GB2RS, please send details to radcom<at>rsgb.org.

Now for the news of special events

Special event call GB2EI, standing for Great Britain to Ireland, will be operating to celebrate the reintroduction of the Swansea to Cork Ferry. A similar station, EI2GBW, will also be operating from Cork. The original service commenced in 1896. Both special event callsigns will be operational until 31 March 2010. Further details are available from qrz.com.

Bobby, 2I0ULL will be activating Narrow Water Castle in Warrenpoint on 16 December from 10am. The station will be active on HF bands and PSK. Details can be found at www.cashota-ni.org.

Celebrating the launch of the amateur radio satellite XW-1, special event station BT3WX will be active from Shanxi Province until 20 December. Look for activity on 160 to 10 metres and on VHF/UHF amateur satellite bands, including FM, SSB, CW, RTTY and PACSAT modes. QSL via BA1DU.

3

And now the HF DX news compiled from 425 DX News and other sources.

David Burton has been posted to the Bureau of Meteorology station on Willis Island for the next 6 months and will be operating with the callsign VK9WBM. The station was first set up in 1921 by the Bureau and, over the years, many of the officers posted there were amateur radio operators. The Bavarian Contest club last activated Willis Island in 2008, when they made 95,178 contacts. David has just arrived at the weather station and will be setting up an amateur radio station shortly. QSL manager is Dale, VK4DMC.

Ed, CO7PH plans to operate SSB and CW as CO7PH/P from Cayo Coco, which is IOTA reference NA-086, on 17 to 31 December. Then from 2 to 5 January he will operate from Cayo Anclitas, which is IOTA reference NA-201.

Now the contest news

On 15 December the UHF UK Activity Contest takes place on the 1.2 and 2.3GHz bands between 2000 and 2230UTC. The exchange is signal report, serial number and locator.

For a very different kind of challenge, how about the Russian 160m Contest that takes place on Friday 18 December? Using Google to translate the rules reveals that it consists of two separate 1-hour sessions that follow on from one another. It is permitted to work people on each mode in each session. A map of location squares, which are not the same as Locator squares, can be found at www.radio.ru/cq/contest/rule/map- 2.gif. It shows that the vast majority of Britain is in location square X4, so a phone exchange might go along the lines of 59001 X4 and a CW exchange along the lines of 599001/X4. Working someone in the same square as yourself will earn you one point, in an adjacent square two points, etc. This means that most contacts from the UK to Russia should be worth at least four points. The event has a bias towards people up to 20 years old, with those over that age having to enter the multi-op category even if they operate alone.

Now the solar factual data for the period from the 30th of November to the 6th of December, compiled on 7th of December by Neil Clarke, G0CAS.

On the 1st of December the GOES 10 satellite was decommissioned and in its place is GOES 14. This will be the primary satellite for measuring the X-ray output from the Sun that we use in GB2RS. GOES 10 was launched on the 25th of April 1997. GOES 11 and 12 are out of use due to a mechanical malfunction and GOES 13 got damaged by a strong solar flare not long after it was brought into use. There will be no secondary X-ray spacecraft till GOES 15 becomes operational sometime during the summer next year. GOES stands for Geostationary Operational Environmental Satellites.

The solar disc was spotless every day and solar activity was very low with no solar flares taking place. Solar flux levels varied little and averaged 72 units. The 90 day solar flux average on the 6th was 72 units. That's the same level as last week. Geomagnetic activity was quiet everyday with 3 days when the Ap index was at zero. Even though a small coronal hole disturbance arrived on the 5th it's impact was very limited. The Ap was only 3 units for that day. The average for the period was only Ap 1 unit. Back in October I reported that solar wind speeds were the lowest that at I seen them, they were around 240 kilometres per second, well this week the ACE spacecraft saw solar wind speeds even slower than that at around 225 kilometres per second. That was on the 5th, however, by the 6th speeds had increased to 430 kilometres per second. Particle densities were very low throughout. Bz varied little on the quietest days and only between minus 7 and plus 8 nanoTeslas on the 5th.

4

And finally the solar forecast. After the upsurge in sunspot numbers from the middle of October to the middle of November things are now

quiet again and are expected to remain so for the coming week. As always, things can change with very little warning. Solar activity is expected to be very low. Solar flux levels should be just above the 70 mark for most of the week. Geomagnetic activity is expected to be at quiet levels but later in the week activity could increase slightly. MUFs during daylight hours at equal latitudes should be around 20MHz for the south and 17MHz for the north. Darkness hour lows are expected to be about 7MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 21MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. the best time to try this path will be between 0900 and 1500 UTC.

And that's all for this week from the propagation team.

5

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including e-mail addresses

and website links where known.

[Note to newsreaders: Please read the local news items appropriate to the service area of your

transmission.]

NEWS FOR THE SOUTH-EAST

and EAST ANGLIA On Monday 14 December Felixstowe and District Amateur Radio Society is having its Christmas noggin, video and mince pies evening. Contact Paul, G4YQC, by email to pjw<at>btinternet.com. On Tuesday 15 December Basingstoke Amateur Radio Club is having its Christmas Dinner at Longbridge Mill, Sherfield on Loddon. Contact Clive, G4ODM, on 01256 326050. On Tuesday 15 December Brede Steam Amateur Radio Society is operating from the shack. Contact Steve, on 01424 720815. On Wednesday 16 December Chesham and District Amateur Radio Society is having a technical talk and bar evening. Contact Terry, G0VFW, on 01442 831 491. On Wednesday 16 December Dover Radio Club is having its Christmas social at the St Margarets Resort. Members should book with David Donohoe, M0DTI. Contact Brian, G4SAU, by email to g4sau<at>DARC.org.uk. On Wednesday 16 December Norfolk Amateur Radio Club is having its Christmas party. Contact Chris Danby, G0DWV, on 01603 419204. On Wednesday 16 December Peterborough and District Amateur Radio Club is having mince pies and sausage rolls. Contact David Howlett, M0VTG, by email to padarc<at>tesco.net. On Wednesday 16 December Worthing and District Amateur Radio Club is having its Christmas party at Lancing Royal British Legion. Contact Roy, G4GPX, on 01903 753 893. On Thursday 17 December Cray Valley Radio Society i shaving Christmas drinks at the Bull, Shooters Hill. Contact Bob,

2E0RCV, on 020 8265 7735 after 8pm. On Thursday 17 December Horsham Amateur Radio Club is having a social evening at the Victory Inn, Staplefield. Details on the web at www.harc.org.uk. On Thursday 17 December Lowestoft and District Pye Amateur Radio Club is having a night in the shack. Contact Phil, G0JSG, on 01502585448. On Friday 18 December Loughton and Epping Forest Amateur Radio Society is having an informal meeting at the Robin Hood, Loughton. Contact Marc Litchman, G0TOC, on 020 8502 1645. On Friday 18 December Mid-Sussex Amateur Radio Society is holding its Christmas quiz. Contact Sue, G6YPY, on 01273 845 103. On Friday 18 December Wey Valley Amateur Radio Group is having a club night. Details on the web at www.weyvalleyarg.org.uk. On Saturday 19 December Gorleston Amateur Radio Society is having its lunch time meeting at the Short Blue Hotel, Gorleston. Contact David, G3OEP, on 01493 662 323.

6

NEWS FOR THE SOUTH-WEST On Sunday 13 December Blackmore Vale Amateur Radio Society is having its Christmas dinner. Contact Tony G0GFL, on 01258 860741. On Monday 14 December Appledore and District Amateur Radio Club is having its Christmas party. Contact Brian Jewell, M0BRB, on 01237 473251. On Tuesday 15 December Blackmore Vale Amateur Radio Society is having an HF evening in the club shack. Contact Tony G0GFL, on 01258 860741. On Wednesday 16 December Exmouth Amateur Radio Club is having its Christmas party. Contact Mike, G1GZG, on 01395 274172. On Wednesday 16 December Taunton and District Amateur Radio Club is having its Christmas social meeting with mince pies. Contact William, G3WNI, on 01823 666 234. On Wednesday 16 December Thornbury and South Gloucestershire Amateur Radio Club is having a talk on file handling by John, G6RAZ. Contact Tony, G0WMB, on 01454 417048. On Thursday 17 December South Bristol Amateur Radio Club is having its Christmas social. Contact Len, G4RZY, on 01275 834 282. On Thursday 17 December Swindon and District Amateur Radio Club Is having a natter night. Contact Den, M0ACM, on 07810 317750. On Thursday 17 December Yeovil Amateur Radio Club is having a mince pie evening. Contact Steve Crask, G7AHP, by email to steve<at>g7ahp.co.uk.

NEWS FOR THE MIDLANDS On Monday 14 December Gloucester Amateur Radio And Electronics Society is having its Christmas buffet and raffle draw. Contact Anne, 2E1GKY, on 01452 548478, daytime. On Monday 14 December South Birmingham Radio Society is having a contest planning meeting. Contact Don, on 0121 458 1603. On Monday 14 December Stratford Upon Avon District Radio Society is having a test equipment evening with John, G0JUQ. Contact G0CHO, on 01608 664488. On Monday 14 December Sutton Coldfield Amateur Radio Society is having its Christmas meeting, which is the last meeting of 2009. Contact Robert Bird by email to spirit.guide<at>hotmail.co.uk. On Monday 14 December Welland Valley Amateur Radio Society is having its Christmas dinner. Contact Peter D Rivers, G4XEX, on 01858 432105. On Tuesday 15 December Derby and District Amateur Radio Society is having a Christmas-themed quiz night. Contact Richard Buckby, by email to radio<at>dadars.org.uk. On Tuesday

15 December Loughborough and District Amateur Radio Club is asking 'What does the team think?'. Contact Chris, G1ETZ, on 01509 504 319. On Wednesday 16 December Lincoln Short-Wave Club is holding its construction contest. Contact Pam Rose, G4STO, on 01427 788356. On Wednesday 16 December Midland Amateur Radio Society is having a laptop computer evening and training classes. Contact Norman, G8BHE, on 01214 229 787.

7

On Wednesday 16 December South Notts Amateur Radio Club is having coffee and mince pies. Contact Terry, M0RIA, on the web at www.radioclubs.net/snarc. On Wednesday 16 December Telford and District Amateur Radio Society is having its Christmas dinner. Contact Mike, G3JKX, on 01952 299 677. On Friday 18 December Bromsgrove and District Amateur Radio Club is having a committee meeting. Contact Chris, M0BQE, on 01905 776 869. On Friday 18 December Coventry Amateur Radio Society is having a curry night. Contact John, G8SEQ, on 07958 777363. On Friday 18 December Nunsfield House Amateur Radio Group is having 20 minute mini talks by members. Contact Ken Frankcom, G3OCA, on 01332 720976. On Friday 18 December South Birmingham Radio Society is having a construction evening. Contact Don, on 0121 458 1603.

NEWS FOR THE NORTH OF ENGLAND On Monday 14 December Angel Of The North Amateur Radio Club is holding its Christmas bazaar. Contact Nancy Bone, G7UUR, on 0191 4770036. On Monday 14 December Sheffield Amateur Radio Club is having its Christmas dinner. Contact Trevor Wood, M0TWS, by email to trevorwood6<at>yahoo.co.uk. On Monday 14 December Thornton Cleveleys Amateur Radio Society is having a technical talk by Peter, G4JGC. Contact John Foster, 2E0EZY, on 01253 399377. On Tuesday 15 December Chester and District Radio Society is holding its construction contest. Contact Barbara Green on 0151 339 9183. On Tuesday 15 December Morecambe Bay Amateur Radio Society is having a social evening. Contact Martin Hazel, M0ZIF, on 01524 848193. On Tuesday 15 December Otley Amateur Radio Society is having a members' presentation. Contact Paul, 2E0PAK, on 07768 996370. On Wednesday 16 December Bolton Wireless Club is having a joint Christmas party with Greater Manchester RAYNET. Contact boltonwireless<at>gmail.com. On Wednesday 16 December Denby Dale Radio Club is having its Christmas party, with entertainment by Robert, M0PIE and Christian, M0KLF. Contact Gerald, G3SDY, on 01484 602905. On Wednesday 16 December Hornsea Amateur Radio Club is having its Christmas party. Contact Gordon MacNaught, G3WOV, on 01377 240573. >>>
>>> RADIO LAW: ?FCC SAYS NO TO ANOTHER PETITION TO OUTLAW CLOSED AND
>>> PRIVATE REPEATERS
>>>
>>> Another petition to the FCC aimed at outlawing closed and private
>>> repeaters has been denied by the FCC. ?Amateur Radio Newsline's Bill
>>> Pasternak, WA6ITF, takes an in depth look at this story:
>>>
>>> --
>>>
>>> Like everyone who had tried before him, Maury Green, K3BEQ, had the best of
>>> intentions when he filed his rules change request. ?A request aimed at
>>> banning repeater owners from barring anyone from using a repeater other
>>> than hams who would use the system to blatantly violate the FCC rules.
>>>
>>> But good intentions are not the stuff that radio rules are made of and on
>>> December 8th the FCC once again made it clear that it is not going to
>>> involve itself even remotely in the political or social aspect of owning
>>> and operating a repeater. ?Nor is it going to tell a repeater owner
>>> operator whom he or she must have his system repeat.

>>>
>>> In his petition for rule making filed several month ago Green had asked the
>>> FCC to amend Section 97.205(e) of its Rules. ?This, to prohibit a repeater
>>> station licensee or control operator from limiting the use of a repeater to
>>> only certain user stations, unless a user blatantly violates the
>>> Commission's Rules.
>>>
>>> Green argued that Section 97.205(e), which permits a repeater station
>>> licensee or control operator to limit the use of a repeater to certain user
>>> stations, conflicts with Section 97.101(b). ?That rule states that no
>>> frequency is for the exclusive use of a particular amateur station, and
>>> each station licensees must cooperate in selecting transmitting channels
>>> and in making the most effective use of the amateur service frequencies.
>>>
>>> But in what might best be described as a cookie-cutter decision not unlike
>>> responses to similar requests going back more than 30 years, the FCC flatly
>>> disagreed. ?As in the past, the regulatory agency once again stated that
>>> Section 97.205(e) does not establish an exclusive assignment of a frequency
>>> to a repeater. ?And with ?regard to Green's contention that a coordinated
>>> closed repeater has exclusive control of an amateur service frequency, the
>>> FCC again noted that coordination is not required as a condition of
>>> operating a repeater.
>>>
>>> The FCC went on to note that coordination does not and cannot result in
>>> assignment or establish control of an amateur service channel, and nothing
>>> in the rules prohibits other amateur stations from using the channels for
>>> which a repeater has been coordinated when they are not being used by the
>>> repeater. ?Rather, Section 97.205(e) merely enables a repeater licensee or
>>> control operator to control the repeater, so that he or she can ensure the
>>> repeater is properly operated as required by Section
>>> 97.105(a). ?Accordingly, says the FCC there is no conflict between the
>>> rules, and no grounds for the Commission to propose to amend Section
>>> ?97.105(a).
>>>
>>> So what about operating on a repeaters input or output frequency when it is
>>> not in use. ?Well a quick history lesson is in order. ?Back in the early
>>> days of repeater rules the FCC required system owners to have lock-out
>>> receivers listening to the output frequency. ?These receivers would inhibit
>>> the repeater transmitter from coming on if the output frequency was in use.
>>>
>>> When repeaters were deregulated in the mid-1970's the lock-out receivers
>>> were deemed to be unnecessary. ?Instead the FCC simply said that it
>>> expected hams to use common sense when using a repeater input or output for
>>> other than repeater purposes. ?It said that if you operate simplex on a
>>> repeater input you might be repeated whether you want to or not. ?It also
>>> inferred that if you operate simplex on a repeater output and got clobbered
>>> by the repeater transmitter to not complain to the FCC. ?Again the agency
>>> expected hams to have enough common sense to know this might happen and
>>> find other frequencies on which to operate. ?And that's been the
>>> ?unofficial

>>> rule of thumb for over three decades.
>>>
>>> So what does this most recent decision mean to the average ham? ?In reality
>>> not very much. ?With the exception of Southern California, closed and
>>> private repeaters make up less than 1% of the nations total of
>>> machines. ?Also, most of the time those hams who are excluded from
>>> operating on a particular system have been asked to leave after the system
>>> owner or his control operators find that he or she is disruptive to the
>>> normal flow of repeater traffic. ?In other words they were ordered to leave
>>> and to date the FCC has backed every repeater owner who has asked
>>> enforcement assistance in keeping unwanted users off their machines.
>>>
>>> Is this the end of it? ?Likely not. ?In another two or three years another
>>> well meaning ham will likely file a similar request to ban closed and
>>> private repeaters. ?Unless he or she cab come up with a far more compelling
>>> argument than has Maury Green, K3BEQ, and those who petitioned in the past,
>>> its likely that request will also fall on deaf FCC ears. ?In this area of
>>> the Part 97 rules, history does have a way of repeating itself.
>>>
>>> For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.
>>>
>>> --
>>>
>>> As far as we can tell, this is the 9th or 10th attempt at getting the FCC
>>> to prohibit a repeater licensee from ?restricting access to a repeater to
>>> those whom he or she wants to be filed the last three decades. ?And as in
>>> all past attempts, this one has met with failure as well. ?(FCC with
>>> historic background from Looking West archive.)
>>>
>>> **
>>>
>>> RADIO RULES: ?FCC SAYS NO TO MODIFYING STATION ID RULES
>>>
>>> The FCC has also denied a rules change request filed by Glen Zook, K9STH,
>>> of Richardson, Texas. ?Zook had request that Section 97.119(a) of the
>>> Commission's Rules be amended to incorporate certain portions of the
>>> Commission's former station identification rule so as to assure that hams
>>> properly identified their stations at specific times.
>>>
>>> Back in 2006, Zook filed a petition requesting that the Commission amend
>>> the Amateur service rules ?to incorporate certain portions of the FCC's
>>> earlier station identification rule. ?This would include requiring that the
>>> call sign be transmitted at the beginning of each transmission or series of
>>> transmissions.
>>>
>>> In response, the Commission received approximately one hundred comments,
>>> generally opposing the Zook petition. ?And in 2007 the FCC ?dismissed this
>>> petition, concluding that the requested rule changes were not necessary and
>>> were not supported by the amateur radio community.
>>>

>>> Zook filed again on April 7, 2009. ?After considering his latest request
>>> for some nine months the FCC concluded that his present Petition does not
>>> assert or demonstrate that circumstances have changed since 2007 with
>>> respect to the adequacy of the current station identification rule. ?It
>>> went on to note that his current proposal, like his previous petition, does
>>> not demonstrate that revising the station identification requirement would
>>> address the concern that many amateur radio operators do not identify their
>>> station in a timely manner or at all.
>>>
>>> In its dismissal order the FCC says that this is really a matter better
>>> addressed by enforcement of the present rule rather than a rule change. ?If
>>> he desires to do so Zook has the option to file an appeal. ?(FCC)

>>> RADIO BUSINESS: ?VIBROPLEX CHANGING OWNERSHIP
>>>
>>> A famed Morse key manufacturer is changing hands. ?Our CW man, Frank Haas,
>>> KB4T, has the details:
>>>
>>> --
>>>
>>> Vibroplex will have a new owner effective December 21st, 2009. ?Scott
>>> Robbins, W4PA, of Knoxville, Tennessee, has agreed to buy Amateur Radio's
>>> oldest manufacturer from present owner Mitch Mitchell of Mobile, Alabama
>>> who recently decided to retire. ?In a report detailed at arrl.org, Robbins
>>> says he will leave his post as Amateur Radio Product Manager at TenTec in
>>> Mid-December to take over and relocate Vibroplex. ?Newsline asked Robbins
>>> why he decided to buy the company:
>>>
>>> --
>>>
>>> Robbins: ?"It was my desire to own my own business. Its something I had
>>> thought about for a number of years but the right opportunity had never
>>> presented itself until now. ?And its something I gave a lot of thought to
>>> once it was made known that Vibroplex was available and I decided that my
>>> time had arrived and I would go ahead and give it a shot."
>>>
>>> --
>>>
>>> Vibroplex will move to Knoxville before the New Year. Business operations
>>> are expected to resume on January 5th, 2010. ?Vibroplex has been
>>> internationally renowned for its semi-automatic keys, known by most as
>>> "bugs," for professional and amateur telegraphers since Inventor Horace
>>> Martin first created the device in 1904 as a cure for telegrapher's "glass
>>> arm," a painful condition similar to carpal tunnel syndrome. The product
>>> line expanded to include straight keys, keyer paddles and a wider variety
>>> of bugs. When asked what changes he plans for the product line, Robbins
>>> ?said:
>>>
>>> --
>>>
>>> Robbins: ?"No changes to the current products. ?The changes would be that I
>>> have every intention of offering new products under the Vibroplex name in
>>> 2010 and beyond."
>>>
>>> --
>>>
>>> The 800 number, web site and email contacts will remain the same. ?For the

>>> CHANGING OF THE GUARD: ?WILLIAM WILSON, K6ARO, FIRST AMBASSADOR TO THE
>>> VATICAN - S.K.
>>>
>>> We have said it far to many times of late, but the changing of the guard in
>>> amateur radio continues. ?This with the sad news tat William A.Wilson,
>>> K6ARO, the first US Ambassador to the Vatican has passed away at age 95.
>>>
>>> According to the Los Angeles Times, Wilson died in his Carmel Valley,
>>> California home from complications related to cancer on Saturday, December
>>> 5th.
>>>
>>> William Wilson was a Los Angeles businessman who became a member of
>>> President Ronald Reagan's "kitchen cabinet" early on in Reagan's
>>> career. ?Wilson first met the Reagan at a dinner party in the early 1960s,
>>> when the future president was still an actor. ?Wilson soon became a member
>>> of the inner circle of wealthy advisers who persuaded Reagan to run for
>>> governor of California in 1966 and then helped guide his political
>>> ?campaigns.
>>>
>>> Soon after Ronald Reagan was sworn in as president in 1981 he named Wilson
>>> as his personal envoy to the Vatican. ?The United States had not had formal
>>> diplomatic relations with the Holy See since 1867, when Congress repealed
>>> funds for the consular post, citing a need to separate church and state.
>>>
>>> In 1984, the United States reestablished official relations with the
>>> Vatican recognizing it as a sovereign body and the pope as an international
>>> statesman. ?At that time Wilson was elevated from personal envoy to full
>>> ambassador but was ultimately forced to resign over what news reports
>>> termed as political missteps.
>>>
>>> William Wilson, K6ARO is survived by two daughters, , six grandchildren and

>>> eleven great-grandchildren .
>>> His wife of 58 years, Elizabeth died in 1996. ?Funeral services were
>>> planned for Friday, December 11. ?In lieu of flowers donations in his name
>>> can be made to the St John's Health Center or Thomas Aquinas College. ?(LA

>>> THAT FINAL ITEM: ?HAMS WORK TO CREATE USS INDIANAPOLIS RADIO ROOM
>>>
>>> And finally, this past week America paused to remember the attack that took
>>> place on Pearl Harbor sixty-eight years ago. ?One of the Navy ships that
>>> helped bring World War Two to a close was the USS Indianapolis. ?She was
>>> torpedoed and sunk in 1945 after delivering Atom bomb components to Tinian
>>> Island. ?Those parts were later used on bombs dropped on major Japanese
>>> cities.
>>>
>>> Now, sixty four years later a group of Indianapolis amateur radio operators
>>> have re-created an operational radio room like that aboard the USS
>>> Indianapolis. ? Jack Parker W8ISH has the rest of the story.
>>>
>>> --
>>>
>>> After months of research and nearly two years of planning the USS
>>> Indianapolis radio room is on the air. ?This real life display is located
>>> in the World War Memorial in downtown Indianapolis.
>>>
>>> The radio room features 67 World War Two pieces of equipment donated from
>>> people around the county. ?According to Chuck Christ, W9IH, they lucked out
>>> when an appeal for used Naval radio equipment caught the eye of one
>>> internet user.
>>>
>>> --
>>>
>>> Chuck: ?"We put that list of things that we wanted on an E-Bay type thing
>>> and a guy by the name of Stan Wine calls me 12-hours later from Sequaro, NM
>>> and says I have everything you want."
>>>
>>> --
>>>
>>> The USS Indianapolis sank in just 12 minutes after being struck by two
>>> torpedoes. ? There were nearly 1200 souls on board. ?Only 316
>>> survived ?after spending four days floating ?in shark infested waters of
>>> the Philippine Sea.
>>>
>>> Historians don't know if the ship's radio men ever had a chance to send
>>> ?an
>>> SOS. ?They were on a secret mission. ?Today, the ?re-created ship's
>>> ?station
>>> shows four working positions where secret messages were sent and received
>>> as the USS Indianapolis carried out it's secret mission across the
>>> ?Pacific.

>>>
>>> Barry Fairfax-KW9DX, ?says four months of research taught them how the
>>> radio room worked.
>>>
>>> --
>>>
>>> Barry Fairfax: ?"The radio men you see here would have been receiving
>>> ?coded
>>> messages from the main land or Pearl Harbor. ?They would type them out, the
>>> coded messages in code, then send them to the room behind us which is the
>>> coding room where they were decoded".
>>>
>>> --
>>>
>>> One of those hams working the radios and giving tours is World War Two
>>> veteran Bob Begeman, W9KVK ? ? He saw duty as a naval radio man.
>>>
>>> --
>>>
>>> Begeman: ?"I was on an attack transport, APA 27, the USS George Climer,
>>> ?and
>>> we had radio equipment similar to this and I was a radio technician and
>>> took care of the equipment".
>>>
>>> --
>>>
>>> Begeman says amateur radio operators are welcome to come visit the display
>>> and operate CW or Side-band from one of the four operating stations.
>>>
>>> --
>>>
>>> Christ: ?"This is exactly what would have been ?on the ship".
>>>
>>> The call sign is WW2IND. ? ? This truly is, living history.
>>>
>>> Reporting from Indianapolis, this is Jack Parker, W8ISH.
>>>
>>> --
>>>
>>> The recreated radio room is located in the World War Memorial just four
>>> blocks north of Monument Circle in downtown Indianapolis. ?The actual
>>> memorial for the USS Indianapolis is about seven blocks away. ?Tours are
>>> Wednesday through ?Sunday from 9 a.m. to 5 p.m. local Indianapolis
>>> time. ?Amateur Radio operators are welcome to operate the equipment when an
>>> appropriately licensed ham is acting as the guide. ?(W8ISH)

>> >>> operator whom he or she must have his system repeat.
>>
>> >>> In his petition for rule making filed several month ago Green had asked the
>> >>> FCC to amend Section 97.205(e) of its Rules. ?This, to prohibit a repeater
>> >>> station licensee or control operator from limiting the use of a repeater to
>> >>> only certain user stations, unless a user blatantly violates the
>> >>> Commission's Rules.
>>
>> >>> Green argued that Section 97.205(e), which permits a repeater station
>> >>> licensee or control operator to limit the use of a repeater to certain user
>> >>> stations, conflicts with Section 97.101(b). ?That rule states that no
>> >>> frequency is for the exclusive use of a particular amateur station, and
>> >>> each station licensees must cooperate in selecting transmitting channels
>> >>> and in making the most effective use of the amateur service frequencies.
>>
>> >>> But in what might best be described as a cookie-cutter decision not unlike
>> >>> responses to similar requests going back more than 30 years, the FCC flatly
>> >>> disagreed. ?As in the past, the regulatory agency once again stated that
>> >>> Section 97.205(e) does not establish an exclusive assignment of a frequency
>> >>> to a repeater. ?And with ?regard to Green's contention that a coordinated
>> >>> closed repeater has exclusive control of an amateur service frequency, the
>> >>> FCC again noted that coordination is not required as a condition of
>> >>> operating a repeater.
>>
>> >>> The FCC went on to note that coordination does not and cannot result in
>> >>> assignment or establish control of an amateur service channel, and nothing
>> >>> in the rules prohibits other amateur stations from using the channels for
>> >>> which a repeater has been coordinated when they are not being used by the
>> >>> repeater. ?Rather, Section 97.205(e) merely enables a repeater licensee or
>> >>> control operator to control the repeater, so that he or she can ensure the
>> >>> repeater is properly operated as required by Section
>> >>> 97.105(a). ?Accordingly, says the FCC there is no conflict between the
>> >>> rules, and no grounds for the Commission to propose to amend Section
>> >>> ?97.105(a).
>>
>> >>> So what about operating on a repeaters input or output frequency when it is
>> >>> not in use. ?Well a quick history lesson is in order. ?Back in the early
>> >>> days of repeater rules the FCC required system owners to have lock-out
>> >>> receivers listening to the output frequency. ?These receivers would inhibit
>> >>> the repeater transmitter from coming on if the output frequency was in use.
>>
>> >>> When repeaters were deregulated in the mid-1970's the lock-out receivers
>> >>> were deemed to be unnecessary. ?Instead the FCC simply said that it
>> >>> expected hams to use common sense when using a repeater input or output for
>> >>> other than repeater purposes. ?It said that if you operate simplex on a
>> >>> repeater input you might be repeated whether you want to or not. ?It also
>> >>> inferred that if you operate simplex on a repeater output and got clobbered
>> >>> by the repeater transmitter to not complain to the FCC. ?Again the agency

>> >>> expected hams to have enough common sense to know this might happen and
>> >>> find other frequencies on which to operate. ?And that's been the
>> >>> ?unofficial
>> >>> rule of thumb for over three decades.
>>
>> >>> So what does this most recent decision mean to the average ham? ?In reality
>> >>> not very much. ?With the exception of Southern California, closed and
>> >>> private repeaters make up less than 1% of the nations total of
>> >>> machines. ?Also, most of the time those hams who are excluded from
>> >>> operating on a particular system have been asked to leave after the system
>> >>> owner or his control operators find that he or she is disruptive to the
>> >>> normal flow of repeater traffic. ?In other words they were ordered to leave
>> >>> and to date the FCC has backed every repeater owner who has asked
>> >>> enforcement assistance in keeping unwanted users off their machines.
>>
>> >>> Is this the end of it? ?Likely not. ?In another two or three years another
>> >>> well meaning ham will likely file a similar request to ban closed and
>> >>> private repeaters. ?Unless he or she cab come up with a far more compelling
>> >>> argument than has Maury Green, K3BEQ, and those who petitioned in the past,
>> >>> its likely that request will also fall on deaf FCC ears. ?In this area of
>> >>> the Part 97 rules, history does have a way of repeating itself.
>>
>> >>> For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.
>>
>> >>> --
>>
>> >>> As far as we can tell, this is the 9th or 10th attempt at getting the FCC
>> >>> to prohibit a repeater licensee from ?restricting access to a repeater to
>> >>> those whom he or she wants to be filed the last three decades. ?And as in
>> >>> all past attempts, this one has met with failure as well. ?(FCC with
>> >>> historic background from Looking West archive.)
>>
>> >>> **
>>
>> >>> RADIO RULES: ?FCC SAYS NO TO MODIFYING STATION ID RULES
>>
>> >>> The FCC has also denied a rules change request filed by Glen Zook, K9STH,
>> >>> of Richardson, Texas. ?Zook had request that Section 97.119(a) of the
>> >>> Commission's Rules be amended to incorporate certain portions of the
>> >>> Commission's former station identification rule so as to assure that hams
>> >>> properly identified their stations at specific times.
>>
>> >>> Back in 2006, Zook filed a petition requesting that the Commission amend
>> >>> the Amateur service rules ?to incorporate certain portions of the FCC's
>> >>> earlier station identification rule. ?This would include requiring that the
>> >>> call sign be transmitted at the beginning of each transmission or series of
>> >>> transmissions.
>>
>> >>> In response, the Commission received approximately one hundred comments,
>> >>> generally opposing the Zook petition. ?And in 2007 the FCC ?dismissed this

>> >>> petition, concluding that the requested rule changes were not necessary and
>> >>> were not supported by the amateur radio community.
>>
>> >>> Zook filed again on April 7, 2009. ?After considering his latest request
>> >>> for some nine months the FCC concluded that his present Petition does not
>> >>> assert or demonstrate that circumstances have changed since 2007 with
>> >>> respect to the adequacy of the current station identification rule. ?It
>> >>> went on to note that his current proposal, like his previous petition, does
>> >>> not demonstrate that revising the station identification requirement would
>> >>> address the concern that many amateur radio operators do not identify their
>> >>> station in a timely manner or at all.
>>
>> >>> In its dismissal order the FCC says that this is really a matter better
>> >>> addressed by enforcement of the present rule rather than a rule change. ?If
>> >>> he desires to do so Zook has the option to file an appeal. ?(FCC)
>>
>> >>> **
>>
>> >>> RESCUE RADIO: ?HAMS ASSIST AT UTAH DAIRY TRUCK CRASH
>>
>> >>> Amateur radio was first on the scene on Wednesday, December 2nd. ?This,
>> >>> after a dairy truck crashed near Logan, Utah, and rolled into the Logan
>> >>> River.
>>
>> >>> According to the Logan Herald Journal, Brent Yeates, KA7FAP, happened
>> >>> across the accident scene and stopped to help. ?With cellular telephone
>> >>> service sparse at best Yates used a local repeater to contact Brent
>> >>> Carruth, AD7VF in Logan. ?Carruth listened to Yeates give a first-hand
>> >>> account of the condition of the driver and the seriousness of the
>> >>> crash. ?He then notified authorities which dispatched assistance to the
>> >>> ?scene.
>>
>> >>> The accident occurred on Utah Route 89 as it passed through Logan
>> >>> Canyon. ?The semi-trailer was filled with 38,000 pounds of dairy products
>> >>> much of which was leaked into the river. ?More is

2473. SARL NEWS - SUNDAY 13 DECEMBER 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-12 20:00:09 UTC
From: website@sarl.org.za
Message-ID: <20091212200004.B0B8C33C8C@panix2.panix.com>
Source record: 6287
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 13 DECEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

MAKE YOUR INPUT INTO THE SARL STRATEGY FOR 2010

ONLY 4 SEATS LEFT AT THE CAPE TOWN HOME CONSTRUCTION COURSE

SPECIAL RECOGNITION FOR ZS5MU

EAST RAND CLUB SET TO BREAK BOLAND RECORD FOR ZS10WCS

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

MAKE YOUR INPUT INTO THE SARL STRATEGY FOR 2010

In early March 2010, the SARL Council and 2010 Council nominees will meet at the National Amateur Radio Centre to develop the strategy and activities for 2010 and 2011. The strategy plan will be tabled at the National Convention and Annual General meeting to be held Port Elizabeth from 23 - 25 April.

You have an opportunity to make input to what the SARL should be focussing on. Join SARL President, Rassie Erasmus, ZS1YT, on the next President's net to be held Sunday 31 January 2010 at 19:30. Make a note of the date and discuss your ideas with fellow amateurs and at your next club meeting.

ONLY 4 SEATS LEFT AT THE CAPE TOWN HOME CONSTRUCTION COURSE

There are only 4 seats left at the Cape Town Home Construction course to be held on 23 January 2010. Those who wish to fill these seats,

visit www.sarl.org.za, click on activities and then on RTA for details and a registration form. Bookings for Durban and Port Elizabeth are also starting to fill up.

BUILD A LIGHTNING PREDICTION UNIT

You can now predict when lightning is close to you with this handy lightning predictor. The handy construction project is available in kit form from the South African Amateur Radio Development Trust at R120 including postage and packing. To read more about it and how to order visit www.amateurradio.org.za.

ESSAY COMPETITION FOR LEARNERS

Following a request from the Gauteng Education Department, the closing date for the essay competition to celebrate the launch of SumbandilaSat, SO67, has been extended to 28 February 2010 to enable learners, after returning to school in January, to participate in the project. The main prize is an Acer Aspire One netbook with many consolation prizes including construction kits and Symantec software. Details on www.amateurradio.org.za.

SPECIAL RECOGNITION FOR ZS5MU

SARL Councillor Francois Botha, ZS6BUU, has presented Alastair Campbell, ZS5MU, with a framed certificate recognizing the support he and his wife Davina have been giving the yachting fraternity for the past 30 years. The citation reads: "SPECIAL RECOGNITION TO ALASTAIR CAMPBELL ZS5MU who, supported by Davina ZS5GC ,has operated the South African Maritime Mobile Net serving the yachting community at sea for 30 years".

EAST RAND CLUB SET TO BREAK BOLAND RECORD FOR ZS10WCS

December is the East Rand Branch's turn to operate ZS10WCS. The club is going all out to break the record set by the Boland Amteurradioklub who started the campaign in September and clocked up 2 639 contacts in over 100 countries. They made 1 522 SSB contacts, 1 050 on CW and 37 on PSK31, indeed a tough act to follow by the East Rand Amateur Radio Club. Look out for them on all bands.

2009 RAE SPONSORSHIP CLASS A AND B

Kobus Conradie of LetsPlayRadio in Cape Town informed SARL News that the 2009 sponsorship has been been extended and was decided by an impartial draw held at the year-end function of the Oakdale Club in Bellville.

The lucky draw included both the Class A and B candidates for 2009.

The sponsorship comprises a Yaesu FTM10E Ruggedized Twin Band mobile radio, donated by Verstay, the Yaesu importers.

The fortunate recipient is ZS6WWG, G Williscroft. Congratulations!

The SARL would like to thank LetsPlayRadio and Verstay for their support towards amateur radio in South Africa.

HAMNET GAUTENG SOUTH

An in-promptu exercise for HAMNET Gauteng South members is scheduled for 19 December 2009. Members who are available and willing to participate are invited to take part.

Operation Water Save will take place between 08:00 - 10:00. The purpose of the exercise is to determine and test mobile communications abilities in preparation for 2010. Please RSVP on or before 18 December 2009 in order to participate.

For more information contact Chris Gryffenberg, ZS6COG, by email to zs6cog@gmail.com.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. A small but active sunspot appeared on Wednesday, breaking the current spotless streak.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoon onwards.

During the late afternoons and early evenings it will be moderate towards Europa. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with New-Zealand will be possible for a short while on 15 m during the mornings. Conditions to Australia are challenging. During the afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here 20 m is also once again very useful for contacts over the longer distances, especially during the mornings.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

13 December - ARRL 10 Metre Contest still on the go; 18 December - Closing date for the PEARS raffle; 19 December - HAMNET Gauteng South in-promptu exercise, 08:00 - 10:00; 1 January - Straight key night on OSCARs; 15 to 17 January 2010 - the PEARS VHF/UHF Contest; 23 January - Home Construction course in Cape Town; 31 January - President's net at 19:30; 28 February - New closing date for the Sumbandilasat essay competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items,

if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.
/EX

VK8 NEW QSL MANAGER

vk3rtv digital amateur television update

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING DEC 13 2009

For the second week in a row, video footage of the weekly WIA National News
presented by Bryan VK3HXR and Robert VK3DN is available for download.

The news broadcast was simultaneously audio recorded and video'd at the
home of Jack VK3WWW. The video footage is suitable and recommended for
rebroadcast via Amateur Television Repeaters.

Our appreciation goes to Jack VK3WWW for his time filming the broadcast and preparing the Video footage for distribution and in particular Bryan and Robert for compiling the past 2 weeks newscasts and to Tony VK7AX and members of the NWTATVG the previous week whilst your's truly VK4BB has had 3 weeks vacation.

VK8 have a new QSL Manager - Craig Edwards VK8PDX.
VK8PDX's details are now updated on the WIA website

Emergency Communications - Where Are We Now ?

Over the last year or so the WIA has been taking a close look at the role of Amateur Radio in emergency communications, and in particular how the WIA can support both individual radio amateurs, and WICEN groups, who provide communications support to community and emergency services.

At the WIA's last Annual General Meeting it was announced that the WIA had requested it's RTO to identify suitable nationally recognised competencies for radio amateurs providing emergency communications.

We believe a training package based on nationally recognised competencies would offer a number of important benefits.

Firstly, it would provide a starting point for persons wishing to get involved in emergency service operations

Secondly, competencies are increasingly being required by emergency service organisations for admission to their communications sites, and radio amateurs may even be prevented from donating their skills and expertise in the future if they don't have the required competencies.

Thirdly, gaining competencies in emergency communications will increase the preparedness of the general amateur radio community, should a radio amateur find themselves as the first-line of communications in an emergency.

And lastly, by providing a valuable community service Amateur Radio can further justify its use valuable frequency spectrum.

So, where are we now.

Our RTO, Trainsafe Australia, has developed a training package with two

levels of competency. Level 1 is a Certificate 2 in Public Safety consisting of 6 core units plus one elective, and is open to all radio amateurs and other emergency service personnel.

Level 2 is a Certificate 3 in public safety consisting of 12 units, open to all Standard and Advanced level radio amateurs.

In addition to the training package, the WIA will offer WIA accreditation for Emergency Communications Operators who meet some extra criteria such as age, health, hearing and mobility, and WIA membership.

We are very keen to introduce this training package as quickly as possible, and to that end our RTO will shortly be conducting a trial training event to refine the program. A Train the Trainers weekend will be conducted in

early 2010.

For more detailed information on the WIA's Emergency Communications training package, please go to the WIA's website at www.wia.org.au

You may also remember that in the July 2009 issue of "Amateur Radio" we discussed the WIAs role in relation to WICEN, and we called for submissions expressing a view on the matter. We received a very small number of submissions, but those we did receive were very helpful and are much appreciated.
We have also, since that date, discussed the issue at meetings of clubs in South Australia, and Queensland and with WICEN groups in Victoria and Tasmania.
This is very much a 'work in progress' for the WIA and has raised many issues. Selected comments from the submissions, and a summary of progress so far can be viewed on our website, again at www.wia.org.au

So, work continues apace. First you will see the WIAs new Emergency Communications Training Package and also throughout next year you will see the WIA continuing to develop its role in supporting the various WICEN groups.

This is Phil Wait VK2DKN, for the WIA.

This snippet picked up on the Southgate AR Clubs news page posted by Amateur Radio Victoria says that the Icom IC-706MkIIG transceiver will definately cease production.

Despite deniers in the USA, it has been confirmed that Wednesday 9 December was the last day that the ICOM plant in Wakayama Japan produced the IC-706MKIIG transceiver.

ICOM Australia said it has checked with Japan and been reassured that the earlier advice received that the popular transceiver has been discontinued is correct.

All WIA Members should have received their copies of the December/January edition of AR.

There on page 39 are the abridged results for the 2009 RD Contest.

Due to the lead time with all magazines there a couple of errors what arose in the final scoring, owing to a data entry input (By Me of course), fortunately only 1 station is affected and it resulted in VK5HZ being relegated from 1st to 2nd place in the in the VHF/Multi Op/phone, section.

Then in the VHF/Single Op/Phone section VK6KHZ relegated to 4th place down from 3rd.

I do apologise to all concerned and I have rewritten the software that caused these errors.

Replacement Certificates have been sent out to those affected.

The full listings are available on the WIA website.

Peter VK4OD

Just a reminder that news doesn't sleep and this WIA National News WILL

continue to be produced each and every week over the Festive Season.

Some re-broadcasters may take time off so if it the news does NOT appear on your favourite spot on the dial have a scan around or pick up the mp3 audio from wia.org.au

HAMS ACROSS AUSTRALIA.

vk1 local news email broadcast@vk1.wia.ampr.org and ask for subscription.

REPEATERS

The VHF (IRLP) and UHF repeaters have been removed from Mt Majura.

The committee earlier in the year made the decision that the lease would not be renewed when it came up for renewal.

It is the clubs intention to reinstall the repeaters on Isaac's Ridge in central Canberra.

ACT WICEN

The WICEN team has been very busy over the last couple of months providing safety communications for a horse endurance ride, Fitz's Bicycle Challenge and two Motor rally events.

The next event will be the Carriage Driving Championships.

Equestrian Australia will be conducting an International event at "Witwood" (EA the peak equestrian body governing equestrian Pursuits in

Australia).

WICEN has been asked to fill the vital role of safety communications and timings that we normally fill on the marathon day Sunday 17 January 2010.

This event is a qualifier for the World Single Horse Championships to be held in Italy later next year.

Equestrian Australia have arranged for several international Judges to judge at the event.

All communications will be on 2M simplex, if you would like to assist contact the Canberra Region Amateur Radio Club Committee.

Meat and bread provided.

RSVP for numbers to Barry 8339 5683 or vk5zbq@activ8.net.au

VK6

Radio keeps mine assets on track

Black Box Control and RF Innovations have developed a system allowing
vehicle tracking and telemetry in remote areas. The result is suitable for
asset monitoring and tracking within pockets of interest or in areas with
limited telecommunications coverage.

The system has been installed on 16 haul trucks at the Koolyanobbing
iron ore mine site in Western Australia. Each truck has a Black Box
in-vehicle recorder monitoring unit and an RF Innovations radio modem
on board.

The recorder provides the source data required to understand its location
(via GPS), processes the telemetry data and manages the communications link.
The VHF Crescendo data radios are being used for the communications link
back to its central location.

The software allows the data from the central site to be examined from
anywhere in the world through an internet connection.

Features such as automatic recovery requests and forward error correction ensure total data reliability and make the radios suitable for use in RF-noisy environments such as a mine site.

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

Do you know someone who's been itching get into the hobby of Amateur Radio, but hasn't been able to find the time ?
Well the good news is that help is on the way !

For the second year in a row, Melbourne's Eastern and Mountain District

Radio Club is running it's special Christmas Foundation training course

held during the holiday break in the newly renovated EMDRC clubrooms in

Melbournes Eastern Suburbs. Easily accessible and just a few minutes walk from public transport, this one day course is intended for those who would like to take advantage of those spare days between Christmas and New Year. It is being held on Tuesday the 29th of December with assessments conducted the following morning or at any other mutually convenient time.

So if you, or someone you know, would like to get into this wonderful hobby and on the air, then contact Robert Broomhead VK3DN by email vk3dn@wia.org.au or by phoning 0403 066 686.

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL, Amateur Radio Newsline, NZART and the WW sources of the WIA.

Belgian amateurs allowed 69.95MHz

Belgian full licence amateurs are now allowed to operate on 69.950MHz on a secondary basis with 10 watts EIRP and a maximum bandwidth of 10kHz.

IARU Committee paper available to view

The Interim Meeting of the IARU Region 1 HF Committee and the VHF, UHF and Microwave Committee will take place over the period 19th to 21st February 2010 in Vienna, Austria.

The IARU Region 1 website now has the full set of both HF and VHF stroke microwave papers for the meeting from the various National Societies including the RSGB. Check out www.iaru-r1.org for details.

Date set for start of National Amateur Radio Centre construction

The RSGB General Manager Peter, G0TWW, has announced the start date for building work at the new National Amateur Radio Centre.

The work will commence at Bletchley Park on 11 January 2010.

Subject to favourable progress, the work is expected to finish in June 2010.

IRCs - important information

Please be aware that the batch of IRCs that have been used for the last few years will no longer be valid at the post office.

31st December 2009 is the dead line for the current style but it's best to stop using them ASAP to allow transit time.

The new one has the expiry date of 31st December 2013, just above the 'UPU' logo at your right hand side.

==========

RSGB NEWS FROM G4NJH

100 years since Braun and Marconi's Nobel Prize

On 10th December 1909 both Braun and Marconi were given the Nobel Prize for physics for their efforts in wireless communication.

Long wave transmitter DDH47 of National Weather Service at Pinneberg in Germany will conduct a special broadcast from 9th December, 23.00 UTC until 10th December 01.00 UTC on 147.3kHz using 20kW.

Special slow Morse code transmissions will take place at the former silence periods of the maritime radio service, 15 to 18 past each hour and 45 to 48 minutes past each hour. Using QRS3, which is one dot in 3 seconds, the names of famous wireless pioneers will be transmitted. Reception reports from distant places are welcome.

Amateurs may contact DL0PFB on the HF amateur bands. For further information, check out their website at www.mmqtc-award.org.

Santa Claus amateur radio station

Once again Santa's own amateur radio station OH9SCL will be active from Santa Claus Land in the Arctic Circle, during the month of December.

Activity will be on 160 through to 10m using CW, SSB and the digital modes. Among Santa's helpers will be operators Raimo, OH3BHL, Erkki, OH9KL, Kimmo, OH9MDV, Juha, OH9MM and Aaro, OH9RJ. The QSL address is on qrz.com under OH9SCL. A special Santa Claus Land award is available.

NEWS FROM ARNEWSLINE

VK FIRM GENESIS TO OFFER HAM RADIO SDR TRANSCEIVER KIT

Made in Australia may be the label on the next piece of ham gear you buy. This as a company down-under called Genesis Radio announces that it

will be producing a new multi-band low power Software Defined Radio transceiver kit to be available world-wide.

The Genesis G59 transceiver will cover the amateur bands from 1.8 to 54 MHz and produce up to 10 watts output when coupled with the GPA10 amplifier. A version with extended band coverage, the G59D that covers the increasingly popular pan-European 70 MHz band should be available sometime next year as well.

More information on this new Australian ham radio transceiver kit available at www.genesisradio.com.au

In D-X word that Willis Island is back on the air. David Burton reports that he has been assigned to the Bureau of Meteorology station on Willis for the next 6 months and will be operating with the call-sign VK9WBM. His station consists of a Icom IC-718 and an Alinco DX70. He will be activating the HF bands and 6 meters using a 2 element quad. QSL via VK4DMC.

OPERATIONAL NEWS -

Active is 'TC2IYK' during the weekend of 12-13 December 2009
from Istanbul Sailing Club for the International Naval Contest 2009.

During the contest, operation will be on SSB part of the HF bands but expect BPSK31 activity also. The station will be on APRS as well.

There will be a special QSL card for the contest...

QSL cards can be sent via The TA bureau.

Please check www.tcswat.org for qsl info.

Before and during the contest check www.qrz.com for information.

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2010

STRAIGHT KET NIGHT ON OSCAR 2010

AMSAT is inviting hams worldwide to participate in Straight Key Night on OSCAR 2010. Taking part in this event is both fun and quite easy. Just

operate CW through any OSCAR satellite between 0000 and 2400 UTC
on January 1st 2010, using a straight hand key. There are no other rules, no scoring and no need to send in a log.

In keeping with the friendly nature of this event, all participants are

encouraged to nominate someone they worked for "Best Fist" of those you

worked. Please send your nomination to w2rs@amsat.org. A list of those

nominated will appear in the Amsat News Service and will also be published in the AMSAT Journal.

2010 JOCK WHITE MEMORIAL FIELD DAY CONTEST
Saturday, 27th February 2010 and Sunday 28th February 2010

Saturday 1500 NZDT until 2400 NZDT and
Sunday 0600 NZDT until 1500 NZDT

Updated Contest Rules and Other Operating Information will be available from the NZART Website.

nzart.org.nz/contests

2010 RSBG COMMONWEALTH CONTEST (BERU)
13 & 14 March 2010
1000 UTC (Sat.) until 1000 UTC (Sun.)
All Bands
CW Only

Considered to be one of the more gentlemanly contests that has been in existence since the mid-1930's. Apart from the individual performances there is a Team event, based on individual nation's participation.

No word in from our contest director of any WIA involvement next year.

www.hfcc.org/hfcc/rule/2009/beru.shtml

March 21-22 John Moyle Field Day
Denis Johnstone vk4ae@hotmail.com reminds National WIA listeners and readers the National Field day for all bands HF, VHF, UHF, and above emphasising portable operation is only a few months away!

VK8 have a new QSL Manager - Craig Edwards VK8PDX.
VK8PDX's details are now updated on the WIA website

EA1BT will be active from Martinique Island between 8th and 15th December as TO1BT. He will be active on HF bands. QSL via home call.

Lee, DS4NMJ will be active from the Korean Antarctic base King Se-Jong on King George Island, South Shetland Islands, which is IOTA reference AN-010, until 31st January 2011 as DT8A. He will be active on all bands mainly CW but also some SSB and RTTY.

Mark, AA1AC, will sign VP9/HC from Bermuda until 12th December. He will be active on the HF bands. QSL via HC direct or bureau.

XE3RR, XE3PP, XE2WK and XE3N will be active from Isla El Cerrito, which is IOTA reference NA-153, between 10th and 14th December as XF3RR.

30,000+ hams have entered more than 250 million QSOs into Logbook of The World (LoTW), the ARRL's online logging program.

At this time last year, 23,000 hams had made just more than 192 million QSOs, marking an upswing in both users and QSOs of about 24 percent.

WW SPECIAL INTEREST GROUPS --- ATV (Every pixel tells a story) - Video

arvideonews.com
hamradiotube.com
youtube.com

King Bhumibol Adulyadej HS1A video

The King of Thailand, His Majesty King Bhumibol Adulyadej, HS1A, is 82 and a video showing him with Amateur and other radio communications has been added to YouTube.

Also on YouTube are historic videos showing the TV coverage of Amateur Radio operations during Hurricane Diana a quarter of a century ago in the USA. The videos were recorded on 11th September 1984.

VK3RTV digital amateur television update

The digitisation of the Melbourne amateur television repeater VK3RTV is continuing to attract international attention with the latest being an article in the Techtalk Bulletin of the Orange County Radio Club near Los Angeles.

That article also reports that there is only one amateur digital TV repeater in the United States.

European and USA Ham TV enthusiasts have been keen to learn more about VK3RTV and that has kept the repeater custodian Peter Cossins VK3BFG busy responding to emails.

The concept of VK3RTV having both analogue and digital inputs is lauded by correspondents overseas as a way of migration to digital that does not exclude those with analogue transmitters.

Peter VK3BFG has submitted an illustrated technical article for publication in the WIA journal, Amateur Radio magazine.

The arrival of Digital Amateur Television has stimulated interest in the Greater Melbourne and Geelong areas. There are 17 known stations with transmit capability and many more with digital set-top boxes and the like enabling them to tune.

While transmissions on 446.5 MHz can occur at any time they are more likely after 7pm. Transmission material varies from such programs as the popular 'Amateur Logic' series to home movies.

Jack Braham VK3WWW particularly has a range of tapes depicting amateur activities. Another program source is NASA tapes which cover much of the technicalities associated with various space missions that are interesting and educational.

Peter VK3BFG has just received a DVD from the US with a comprehensive presentation on the dangers associated with high RF fields.

The recent ARISS contact at the Sherbrook Community College went to air, and two video editions of the VK1WIA broadcast have also been shown on VK3RTV.

The VK3RTV digital project is funded by Amateur Radio Victoria, plus a $1,000 contribution from the WIA Club Grants Program and volunteer support.

I'm Barry Robinson VK3PV and you're listening to VK1WIA.

WW SPECIAL INTEREST GROUPS --- INTERNET --- THE HAMS DOMAIN

Google has launched real-time search to give users access to up to the second information.

The search giant said it will draw real-time data from over a billion pages on the web.

The new feature will also include updates from Twitter and the social networks of MySpace and Facebook.

"Information is being created at a pace I have never seen before and in this environment, seconds matter," said Google fellow Amit Singhal.

At an event staged at the Computer History Museum in California, the search giant said this was the first time ever that any search engine has integrated the real-time web into its results page.

The search giant also unveiled Google Goggles a new visual search feature that lets consumers use a picture instead of keywords as the search query.

The tool compares the image users have taken with Google's database to return relevant information.

CCARC starts the Horses at a Gallop

WICEN Tasmania (South) was joined by the Cradle Coast ARC to provide communications and checkpoints for the 2009 Tasmanian Equine Endurance Championship rides held at Sassafras. This was CCARC's introduction to

endurance riding. They were certainly thrown in at the deep end, literally.

Though the rides are intended to test the endurance of horses and riders, communications personnel were also under pressure and almost under water! The 160 km ride started at midnight on Friday night and the 93 km ride at 05:00. A mid-day Friday rendezvous at the site led to the Base set up, then locating the checkpoints and systems testing. In theory, that gave a few hours to catch a nap before the start of operations, but the mosquitoes had other ideas, so napping was minimal. Just to make it interesting, the mother of all storms hit during the night with heavy downpours, thunder and lightning. At one stage, the Base operators had two radios at full audio and still couldn't hear the messages coming in. Base was set up in a new portable car port which stood up well to the test. Unfortunately, the Base location was allocated, rather than selected, at the bottom of a slope next to a creek. The water found a course through the tent. Even a local frog decided the Base tent was good place to be. Fortunately, all the 240 volt stuff was at the high side and stayed dry. Rearranging the floor sheet edges and a half hour of mopping had things above the water level again.

WICEN (South) passes its thanks to the CCARC guys and a gal who did a wonderful job. Hopefully they will now be able to look after rides in their neck of the woods in the future.

REWIND - A LOOK BACK IN HISTORY

50th anniversary of 1st UK 10 GHz contact

January sees the 50th anniversary of the first UK two-way contact on the 10GHz band by G3BAK and G3LZ.

After WWII there were a few UK amateurs taking an interest in microwaves. Two of them, began experimenting in 1949 and, in January 1950, were rewarded with the first UK two-way contact on the 10GHz band.

Des eventually migrated to Australia where he carried on his microwave activities, mainly on the 5.6GHz band, until his death in 2005.
He was VK2AHC at first, but then relocated to South Australia as VK5ZO.

His 10GHz equipment for that 1950 contact with G3LZ consisted of a mains powered klystron transmitter/receiver and the path was just a "few miles" (actually about 1.75 miles) across the Manchester Ship Canal in North West England.

Of just as much interest was his use of 70cm for talkback. At that time even the 432MHz band was for radio pioneers!

MUST BE SENT FROM SAME ADDRESS AS U WISH TO SUBSCRIBE TO

First thanks go to Peter Harding VK4OD who the
past 3 weeks has assembled QNEWS from the audio
reports filed by VK4's active clubs.

This is a reminder to on how to have your clubs
news broadcast, because time and again we are
asked "how come you don't mention our club
activities.

It really is simple, we broadcast, in good faith
all material submitted BUT for qnews it must
be in the form of both audio and text.

Take a listen to Geoff and the Matman who week in
week out send us news from their respective clubs,
Gympie area and Townsville.

Don't send us links to stories, just the audio and
text and let the rest of VK4 know that your club
or group IS still alive and well!

GraHam VK4BB
qnews@wia.org.au

GYMPIE
www.gceginc.org.au
Geoff Emery vk4zpp

Well, the season's meeting and greeting activities are well under way
with get-together s being held amongst friends, work places and clubs.
The gift wish lists have no doubt been whispered in the ear of the
jovial old man in red and it won't be long before people are making
their new year's resolutions.

For my part, I would appreciate the summer heat to abate enough to be
able to enjoy some almost comfortable operating during the holiday break.

The word is getting out that some of the clubs that applied for funding
under the Community Volunteer Grant Scheme have received early presents
with email advice of success. Over the border in VK2, the Summerland
Amateur Radio Club have been successful and closer to home, Maryborough
Electronics and Radio Group are now waiting the confirmatory letter.
Congratulations to those clubs who have seen and taken the opportunity
to progress their activities in helping their local community and
supporting their volunteers.

Amateur Radio magazine arrived this week and with all the reminders
about preparedness that have been given out, there should be every
reason for a good turn out in the Ross Hull Contest and the VHF UHF
Field Day. You can find the rules in the magazine. If you enjoy the
smell of hot solder have a look at the article on paddy board
construction with surface mount components and for the new enthusiasts,
VK3CE looks at test equipment and sources in the Foundation Corner
pages. Some good reading in this December January edition of Amateur
Radio.

GREETINGS TO ALL LISTENERS! THIS IS DON VK4FNQA, STILL AT THE ORIGINAL SITE OF THE MATCAVE, WITH NEWS FROM NORTH QUEENSLAND.

ALTHOUGH IT IS HOT AND STEAMY HERE IN THE NORTH, HAMS ARE EXCITED ABOUT ONE OF THE MOST IMPORTANT EVENTS ON THE AMATEUR RADIO CALENDAR WHICH IS HAPPENING TODAY - OF COURSE IT IS THE FAMOUS TARC CHRISTMAS PARTY WITH MONSTER AUCTION.

EVERYTHING STARTS HAPPENING THIS AFTERNOON AT THE VK4TJS SATELLITE DISH CITY.

GET ALONG TO THE PARTY SITE AROUND 2PM TO HELP SET UP, THEN GET READY FOR THE MONSTER AUCTION FROM 2-30PM, GUARANTEED TO HAVE MORE MONSTERS THAN ANY OTHER HAM AUCTION IN THE COSMOS.

AROUND 4-30PM THE TARC BBQ WILL START CHURNING OUT GASTRONOMIC DELIGHTS WHILST PARTY-GOERS WILL PARTICIPATE IN THE TARC MYSTERY PRESSIE AUCTION. THERE'S BOUND TO BE A FEW SURPRISES AND LOTS OF FUN HAD DURING THE AFTERNOON. BRING YOUR SWIMMING COZZIES FOR A DIP IN THE POOL AND REMEMBER YOUR COMFY CHAIRS. HOPE TO SEE YOU THERE AND REMEMBER TO MAKE SURE YOU BRING YOUR DRINKS IN CANS OR PLASTIC - NO GLASS IS ALLOWED AROUND THE SWIMMING POOL.

NOW HERE IS SOME TECHNICAL NEWS - TARC IS CURRENTLY TESTING THE VK4RTL 6 METRE BEACON OUT ON THE NEW PROPOSED FREQUENCY OF FIFTY DECIMAL TWO EIGHT TWO MEGAHERTZ TO ENSURE ELECTRO MAGNETIC COMPATIBILITY WITH OTHER SERVICES AT THE MOUNT STUART SITE. PROJECT LEADER DOCTOR LLOYD VK4FP IS ALSO AFTER RECEPTION REPORTS PLEASE.

ARE YOU READY FOR THE SEASONAL INCLEMENT WEATHER THAT WILL BE SETTLING INTO THE NORTH DURING THE NEXT COUPLE OF MONTHS ? WITH THE MONSOON TROUGH NOW EXTENDING THROUGH THE TORRES STRAIT IT IS A TIMELY REMINDER TO GET THE HOUSE AND RADIO SHACK READY FOR THE CURLY WINDS THAT MIGHT VISIT THOSE IN THE NORTH DURING THE WET SEASON. ENSURE YOUR CYCLONE KITS ARE FULLY STOCKED, YOUR GENERATORS ARE WORKING PROPERLY, YOUR RADIO GEAR IS READY IN CASE YOU HAVE TO HELP OUT YOUR COMMUNITY AND ON STAND BY FOR ACTION !

FINALLY, THE TARC INC HAS THE SOCIAL MEETING HAPPENING THIS TUESDAY EVENING FROM 7-30PM AT THE CLUB ROOMS IN GREEN STREET WEST END. EVERYONE WELCOME TO COME ALONG AND HELP PUT THE MAGAZINE OF RENOWN, BACKSCATTER, TOGETHER AND ALSO SOCIALISE AT THE LAST MEETING FOR TARC IN 2009.

WELL THAT'S ALL FOR THIS WEEK FROM TROPICAL PARADISE. WE ARE ABOUT TO MOVE THE MATCAVE TO THE NEW QTH -- SO NEXT WEEK I WILL DEFINITELY BE COMMUNICATING TO YOU FROM

SOMEWHERE NEAR DOWN TOWN THURINGOWA, A SUBURB HERE IN
TOWNSVILLE.

THIS HAS BEEN A BUSY, BUSY DON VK4FNQA FOR THE TOWNSVILLE
AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO --
QNEWS FROM VK4WIA.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 6th-December, through Sunday, 13th-December there were 212 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, HA, HB, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, JA, JD/m, JD/o, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2V, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. By the time you read this, Jim, WB2TJO, should be active from here. Jim has been on the islands since December 8th, waiting for a license. He will be there until January 6th, and plans to visit three of the islands (Viti Levu, Vanua Levu and Taveuni -- all in IOTA OC-016). Using his Icom 706 MkIIG and wire antennas, look for him on 40 and 20

meters. Jim will be on holiday, so operations will be limited and casual. Look for updates, possibly on QRZ.com.

5T, MAURITANIA. There have been reports that YL Yoshiko, JQ1LCW, is now active as 5T5YL. QSNs on Sunday show activity on 17 meters SSB working mainly Europe and East Coast NA stations. QSL via JQ1LCW.

A6, UNITED ARAB EMIRATES. By the time you read this Don, N1DG, is expected to arrive in U.A.E for a week because of his job starting December 14th. However, his activity will be limited due to his work; he is expected to operate from the A61AD station, possibly on 12 and 17 meters using CW, SSB and RTTY. The A61AD station does have a 4 element SteppIR for 20-6 meters, so Don's activity will be limited to those bands. Logs will be uploaded to LoTW upon conclusion of his trip.

A6, UNITED ARAB EMIRATES. Gerry, VE6LB, informs OPDX that he will be active as A6/VE6LB from Dubai between January 8th and February 8th. Activity will be holiday style with low power using wire antennas and mainly on 40-15 meters CW. QSL direct via his home callsign or LoTW.

A9, BAHRAIN (News). Reports indicate that "The Daily DX" is reporting that radio amateurs in Bahrain can now operate on 6 meters (50.0-50.5 MHz on a primary and exclusive basis, and 50.05-52.00 MHz on a secondary basis) and also on additional frequencies on 136 kHz, 1.8 MHz, 7 MHz, 430 MHz and higher bands. However, they cannot operate on these newly allocated frequencies until their licenses are amended.

C5, THE GAMBIA. Eric, SM1TDE, will be active as C56SMT until January 3rd, 2010. Activity will be holiday style. Eric states, "Look for me on CW, 2 kHz from the band edges, as well as some RTTY and SSB." He was spotted on 40/30/20 meters CW this past weekend. QSL via his home callsign (the Bureau is preferred).

C5, THE GAMBIA. Neils, OZ8KR, will be active as C56KR from Bakuto between March 5ï¿½24th, 2010. This is his third trip to Bakuto. Activity will be holiday style with operations on 80ï¿½10 meters SSB, using 100 watts into wire antennas close to the Atlantic Ocean. QSL via OZ8KR.

CO8, CUBA (80 meters). Eduardo, CO8LY, has announced that he has installed a 2 element wire for 80 meters, and it is directed at Europe and NA to try to work the biggest quantity of countries. If stations need to work Cuba on 80 meters, they can send an E-mail to Eduardo and make a Sked for 80 meters at: co8ly@frcscu.ciges.inf.cu
Eduardo is also building a 160 meter long wire but hasn't had the time to finish it. He has been taking care of his wife who has ovarian cancer.

DXPEDITION OF THE YEAR SURVEY. The "DX World of Ham Radio" Web page is conducting a online survey to see which expedition warrants the title "DXpedition of the Year 2009". Special engraved trophies will be shipped to the top three DXpeditions of 2009. To participate in the survey, go to: http://dx-hamspirit.com

HEADING TO THE ANTARCTICA. Operators Andrej/UT6UE and Yurij/UT6UF are on board the "S/Y Kupava" on an Antarctic voyage to the Ukranian Antarctic Research Centre's base -- Vernadsky Base. Onboard equipment includes a VX1700, RTX Yaesu HF, Tuner FC-40, and a folded dipole for 80, 40 and 20 meters. They hope to be active on 3645-3720, 7090-7130-7185, 14140-14260-14345, between 2200-0100z. They have already been reported on the Packet-Clusters signing UT6UE/MM. For more info and pictures, visit the following Web page at: http://uarl.com.ua/news/antarctida
Also, visit the WAP Web site for more details at: http://www.waponline.it

IOTA NEWS.....
AS-086. (Rare IOTA) Vasily, RA9LI, is now active as RA9LI/0 from Troynoy Island in the Kara Sea for one year. Reports indicate that he has been there since mid-November. Activity will be on the HF bands, mainly SSB. He was heard earlier in the week on 14260 kHz between 0730-1030z. QSL via UA9LP.

NA-058. Members of the Camden County Amateur Radio (KB4CC) plan to activate Cumberland Island (USI GA002S, Camden County, Georgia) between January 23-24th. They plan to have two stations running on battery power on the following suggested frequencies and modes: SSB - 14260 kHz
CW - 14040 kHz, 7055 kHz and 7030 kHz
QSL via KB4CC: CCARS - USI#GA-002S, PO Box 2203, Kingsland, GA 31548. For more information, visit: http://www.ccars.org

NA-066. Members of the Palos Verdes Amateur Radio (K6PV) will be active from Santa Catalina Island (USI CA016S, WLOTA LH-2912, Los Angeles County, California) between February 25-28th. Activity will be on the ususal IOTA frequencies, mostly 20 meters SSB, using CW, RTTY and/or PSK31. Operators mentioned are: Ray/N6HE, Dan/W6DC, Mel/K6SY, Doris/K6KSY, Jeff/K6JW, Homer/K6HKT, Ginger/KG6TAU, Bob/AB6SY, Joe/K5KT and Marian/K5KKT. QSL direct to K6PV (Palos Verdes Amateur Radio Club) or by the Bureau. They will have a special K6PV IOTA card for this activation. Visit the PVARC's Web page at: http://www.palosverdes.com/pvarc

OC-212. Members of the Hellenic Amateur Radio Association of Australia (HARAOA Group) will be active as VI2BI from Broughton Island for three days in February 2010. Activity will take place on multiple bands (160-6 meters) simulataneously to give everyone the chance to contact them. The VI2BI team will consist of some of the operators who took part in the VK9NI DXpedition back in July this year. Operators mentioned are: Tommy/VK2IR, Peter/VK2NN, Allan/VK2GR, Raffy/VK2RF, Paul/VK2HV and John/VK3JHA. Suggested frequencies are:

BAND	CW	SSB	RTTY
160m		1825	1840
80m	3525	3793	3630
40m	7020	7085	7035
30m	10105		10145

20m 14025 14195 14090
17m 18075 18160 18105
15m 21025 21295 21090
12m 24895 24950 24925
10m 28025 28490 28090
6m 50105 50130
Special Notes:
* 80m Listening for VK Foundation Class Licence on 3.695 MHz.
* 20m They may use 14.260 MHz.(US General Class Licence)
For update and an online log search, visit the blog at:
http://www.vi2bi.blogspot.com

OC-203. (Update/RARE IOTA). Look for Ray/ZL4TY (home callsign VK4DXA) and Paul/ZL4M (home callsign ZL4PW) to be activating Stewart Island between March 12-23rd, 2010. They plan to have 2 stations using verticals for 160-30 meters and a Spiderbeam for 20-10 meters. They intend running barefoot unless they can obtain a solid-state amplifier. The following suggested frequencies (+/- 10 kHz, QRM, QRN & propagation permitting) have been announced:
Band CW SSB RTTY
---- ----- ----- ------
160m 1820 1845
80m 3525 3785 3580
40m 7025 7165 7038
30m 10115 10145
20m 14025 14260 14085
17m 18080 18145 18105
15m 21025 21295 21085
12m 24895 24945 24920
10m 28025 28475 28085 kHz

QSL Info: They need a minimum of 2 USDs or 1 x IRC (please, 2010 issue) for a direct reply. Any donation sent with your QSL request will be greatly appreciated. Cards with insufficient funds or invalid IRCs will be sent via the bureau. All logs will be uploaded to LoTW following the DXpedition.

QSL ZL4TY via VK4DXA; by the VK Bureau or direct to: Ray Crawford, 53 Moore Street, Kingaroy, QLD 4610, Australia

QSL ZL4M via ZL4PW; by the ZL Bureau or direct to: Paul Ormandy, 13 Swift St., Oamaru 9400, New Zealand

For more details and updates, visit their Web page at:
http://www.zl4pw.orconhosting.net.nz/OC203/si_index.htm

J6, ST. LUCIA (NA-108). John, VE8EV, is expected to be active as J68/VE8EV from Castries between December 18-20th. Activity will be SSB and CW on all bands, mostly during the RAC Canada Winter Contest (December 19th, between 0000-2359z) which this year is being held the weekend before Christmas. All

contacts are welcome during the contest, stations outside of Canada just send RS(T) and a serial number. Check out John's blog, for info and QSL details, at: http://ve8ev.blogspot.com/2009/10/na-108-st-lucia.html

J6, ST. LUCIA. John, W5JON, will once again be operating from the hilltop QTH overlooking the Caribbean Sea and Marigot Bay in St. Lucia, between March 2-11th. His callsign will be J68JA. Reference numbers are: IOTA NA-108 and Grid Square FK93. Activity will be on 160-6 meters (including 60m) on SSB. He will use an ICOM IC-7000, KL-400 Amp (350 watts) into the following antennas: ZS6BKW design multiband dipole, and a 3 element yagi on 6m. Activity will also include the ARRL International DX Phone Contest (March 6-7th) as a Single-Op/All-Band entry. QSL via W5JON. John adds, "As in the past, XYL Cathy/W5HAM will be very busy pool side."

KH6BZF PROPAGATION FORECAST/REPORT (For December 14-20th)....
Dec 14 AN SOLAR REFERENCE
Dec 15 AN ---------------
Dec 16 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 17 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 18 AN LN - Low Normal
Dec 19 AN
Dec 20 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

SPECIAL NOTE FROM LEE, KH6BZF: Forecast for the next several weeks is for "Above Normal" (AN) conditions on the low bands and some short skip on the high bands with solar flux levels in the 70's and the "A" low as well as "K" indexes. Have a very special upcoming "Happy Holidays To All.....Aloha and Mele Kalikemaka & Haole Makahiki Hou....."

PD09, THE NETHERLANDS (Special Event). Look for special event station PD09XMAS to be active until January 3rd, 2010. Activity is to celebrate "Christmas 2009". Activity has been on 20 meters SSB this past weekend on 14194 kHz. QSL via PD5X, direct or by the Bureau.

PJ5, ST. MAARTEN/ST. EUSTATIUS. Jim, K1NA, will once again be active as PJ5NA. Activity will include the ARRL DX CW Contest (February 20-21st) as Single-Op/All-Band entry. QSL via K1NA (100% QSL direct only with SASE) No bureau cards will be answered. DX stations MUST have SASE or SAE with 1 USD. No IRC! USA stations SASE only.

RTTY WELCOME DAY (January 1st - All Day Long!). Phil, N8PS, wants to remind everyone: "Now is your chance to meet and greet other RTTY operators from all over the world.
-- No hours, No rules, No score, No pressure, No quota, No log needed. --
- Any band*, Any contact, Any time, Any power, Any equipment, Any antenna.-
(*) = Authorized amateur radio sub-bands, of course.

Get that antique set-up running or fire-up that brand new rig. Use
any modem or computer or combination thereof. Meet and greet others
without time limits. Have a short exchange or a rag-chew - whatever
suits you. Participation is voluntary. No log necessary. No awards -
just satisfaction. Help others find joy in RTTY by operating for the
first time, or the thousandth time.
Get your set-up running smoothly and help others to reverse inversion.
Just get on the air to say 'howdy' -or- 'hello' -or-'WELCOME TO RTTY'
PLEASE HELP SPREAD THE NEWS. TELL YOUR FRIENDS AND NEIGHBORS.
'I'LL SEE YOU ON THE AIR FOR:'
RTTY WELCOME DAY - 01 JANUARY 2009 - ALL DAY LONG
73 - de Phil - N8PS, RTTY Welcome Day Cheerleader"

QSL INFO AND NEWS.....
P29CS QSL ROUTE (Important). Peter, VY0PW, informs OPDX that Andy,
P29CS, on Lihir Island (OC-069), is requesting stations "NOT" to QSL
to his present QRZ.com address. This is his location only and not
intended for mail purposes. Andy states that he is looking at present
for a QSL Manager, but this might take a while as he is very busy with
work.

QSL SURVEY. Don, W5FKX, is conducting an informal survey of QSLing
methods and would very much appreciate your input. Please respond
directly to him at: w5fkx@cox.net
1. Do you use the Logbook of the World (LOTW)?
If not, what has kept you from using it?

2. Do you use the eQSL service?
If not, what has kept you from using it?

3. Do you use the QSL Bureau system?
If not, what has kept you from using it?

4. Do you send out direct QSLs?
If not, what has kept you from doing so?

5. What is the approximate percentages of your QSLs received via:
LOTW
eQSL
Bureau
Direct

Don states, "Thanks very much for your participation. Any additional
comments are welcome."

TC2IYK via TA Bureau or to: TCSWAT, PK73 Karakoy, 34421 Istanbul, TURKEY.
Activity was by the Turkish group called TCSWAT (TC Special Wireless
Activity Team) during this past weekend from Istanbul Yelken Kulubu
(Istanbul Sailing Club -- <http://www.istanbulyelken.org.tr>) for the
International Naval Contest. Please check <http://www.tcswat.org> for
more details about the QSL info.

HAVE PATIENCE! Nenad, VE3EXY, reports that he received a message from Vlad, UA4WHX, stating that effective this week all outstanding direct requests for VE stations have been answered!

XV4TUJ via OK1DOT; "DIRECT ONLY", per Petr, OK1DOT.

QSLS VIA LoTW: 3D20CR, 4U1UN, 5N9OCH, A25/DL7DF, DL7FER, HI3TEJ, K4M, KD6WW/VY0, RX0AE, SU1KM, TI5/K2PLF, TX3A, TX9, VE3XB, VE7DLM and ZW5B

**SPECIAL NOTE: LoTW has reached new milestones. Since its inception on September 15, 2003, more than 30,000 hams have signed on to "Logbook of The World (LoTW). The ARRL's online logging program has had an increase of more than 7000 hams since 2008. These 30,000 hams have made upwards of 250 million QSOs with more than 58 million QSOs in 2009 alone. In 2009, there was an increase of more than 24 percent for both the number of registered users and the number of QSOs over 2008. For more details, go to the ARRL Web page at: http://www.arrl.org/news/stories/2009/12/03/11229

QSLS RECEIVED VIA MAIL: 3D2KJ, 3D2MJ, 3X5A, 5F1ROM, 5H3EE, 5K0T, 8R1PY, A52FJJ, ER8C, FM5LD, HL3ERJ, HV0A, J79ZG, K5D, KV4FZ, LX/PA6Z, OX3R, PZ5M, S04R, ST2R, T27OU, TM0M, TX5SPA, TX5SPM, TY1MS, VK9DWX, VP2VVV, VP9KF, VQ9LA, VQ9RD, VR2009EAG, W3FO/KH2, WN1Y/NH2, XE2WWW and YW5F

QSLS RECEIVED VIA THE BUREAU: V51AS

ST26, SUDAN (Special Event). Members of the Khartoum Sea Scouts Radio Club (ST2KSS) will be active as ST26ASC until January 28th, 2010. Activity is to celebrate the 26th Arab Scouts Conference (under Peace and Unity). Activity this past weekend was on 20 meters SSB. QSL via ST2M.

VP2V/W4DXX OPERATION WRAP-UP. Eric, W4DXX, informs OPDX readers of his recent ham-cation at the end of November on Tortola as VP2V/W4DXX which concluded w/1240 QSOs in 109 countries and 50 states with about 9 hours of operating time. Equipment and assistance was supplied by WB4MRF, N3DXX, KN5H, and VP2VQ. Bill Moore has accepted the operation for DXCC as of 12/9/09. All QSOs will be uploaded to LoTW shortly, and QSL cards are currently in design. QSL to W4DXX w/SASE or via LoTW.

VU, INDIA (News). OPDX was informed by Prasad, VU2PTT, that Gopal Madhavan, VU2GMN, who is the President of ARSI - the IARU recognized national organization of India, is reporting that the "Wireless Planning & Coordination Wing (WPC), India's Ministry of Communications and Information Technology Department of Telecommunications has written to him to inform that 10100-10150 kHz has been allocated to Amateur Radio Services on a secondary basis in India. This means that VU2 hams are free to use this on a non-interference basis with existing users of these frequencies. Earlier, temporary permission was issued from time to time for this WARC band. It has also been communicated to Gopal that the 50-52 MHz (6m) band cannot be allocated now since it has already been allocated to other services. ADDED NOTE: Steve, VU3USJ, mentions, "Gopal, VU2GMN, who has been in contact with the relevant authorities in Delhi, says he is trying to clarify if SSB will be included with the permanent allocation. I believe Australia is the only other country allowing SSB on 10 MHz

for hams."

Irish Radio Transmitters Society Radio News Bulletin
Sunday 13th December 2009

Bereavement We wish to extend our sincerest sympathies to Breda EI0DJ and Tony EI2AW on the death of Breda's mother Mrs. Kitty O'Flynn who passed away peacefully on 10 December. May she rest in peace.

IRTS Radio News via ATV The IRTS radio news which is normally broadcast by South Eastern Amateur Radio Group at 9.30 p.m. on Tuesday nights via the Southern Ireland Repeater Network is now available live via the EI8WDT, ATV (television) repeater from Dungarvan, Co. Waterford. A live video feed is available each Tuesday night at www.ei8ffb.com (details and link to EI8FFB are available on the SEARG web site at www.searg.com).

Christmas Island VK9XX Christmas Island VK9XX completed there expedition last weekend with almost 23,000 QSO confirmed in the log, Congratulations to the 16 EI stations that made it through the Hugh pile ups.

Top of the EI List were EI7BA with 7 bands worked, EI9JF & EI9O with 4 bands worked Congratulations

---

Wicklow Town Club Formation Lain EI5GN has received lots of interest in starting up a radio club in Wicklow Town. There is a premises confirmed which is virtually free of charge & it looks like the first meeting is scheduled for January 14th at 20.00pm 2010. More details will be available soon; Lain can be contacted at ei5gniain /at/ gmail.com or at QTHR.

South Dublin Radio Club This year's South Dublin Radio Club Christmas Party will take place next Tuesday the 15th of December. The venue will be the same as last year, "The Morgue", Tempelogue Village from 8.00 pm until late. Members of other clubs and visitors are as usual very welcome to this social event. Limited free food will be available for paid-up members; visitors can choose from the bar menu until 9.00 pm.

---------- Joint Club Christmas Dinner The North Dublin Radio Club, Fingal Radio Club and the Howth Martello Radio Group are having a joint Christmas dinner on Saturday 19th December. The restaurant in the Coachman's Inn near Dublin Airport is the venue and the meal will start at 8:30pm. This is the second year that this joint dinner has been organized. Last year's dinner was a great success and so this year it has been decided to invite other amateurs, SWLs and friends. Lapsed members of both clubs would be particularly welcome. Places are limited and early booking is recommended. If interested please email tony /at/ ei0mar.org as soon as possible to make a reservation.

Industry News Scott Robbins, W4PA, of Knoxville, Tennessee, has signed an agreement to purchase The Vibroplex Company, Inc from present owner Felton 'Mitch' Mitchell, W4OA, effective December 21, 2009.

Vibroplex will move from its present location in Mobile, Alabama to Knoxville, Tenn Robbins - who has been employed with Ten-Tec Inc since 1995 (he has been Product Manager for Ten-Tec's Amateur Radio equipment line since 1997) - will leave his position in mid-December to take over full-time management and ownership of Vibroplex during the last two weeks of December, with a planned opening date of January 5, 2010. Phone numbers email & contact addresses will remain in continuous operation under the new ownership of Vibroplex

---
Desecheo K5D DVD available The 'KP1-5 Project' have announced that the long anticipated Desecheo K5D DVD entitled "so rare, so near, yet so far" is now available. This DVD has been five months in production. For more information go to http://www.kp5.us

---
3W6C CW OP Required Experienced CW op needed for rare IOTA DXpedition An international group of operators will be active as 3W6C from Con Co Island (AS-185), Vietnam, between April 10-18th, 2010. The DXpedition has an opening for one additional experienced CW operator; German language is not required as this in an International group. Full details about the DXpedition are available at: http://www.3w6c.qrv.ch Interested operators are requested to send details about background and DXing experience to Hans-Peter at: hb9bxe /at/ 3w6c.qrv.ch Hans-Peter can likewise give further details about expenses, travel, etc

---

Rallies Phoenix A.R.C The Rally will be held as usual at Coolmine Community School near Blanchardstown on Sunday 14th February 2010.Doors open from 9am to 2.30pm. Usual traders will be present and to encourage a real Amateur Radio orientated Rally bring and buy tables will be free of charge. For tables contact Tony 087-2349997 or Tom 01-8211043 This is the first rally of the New Year and usually a very enjoyable occasion. Refreshments and plenty of car parking available.

This Week in History

1896 Preece and Marconi first public demo of radio at Toynbee Hall, London.

1901 Marconi received the first transatlantic communication, letter S. On 10 December 1909 Braun and Marconi were given the Nobel Prize for physics for their efforts in wireless communication. 1961 The first amateur satellite, OSCAR I was launched.

IARU Electronic Newsletter November, 2009

In this issue:
An Introduction
Preparations for WRC-12
IARU Administrative Council Meeting
GAREC-09 - Action Needed

==> An Introduction

This is the first IARU E-Letter for some period of time. As such, I thought I would take this opportunity to introduce myself. I am Rod Stafford, W6ROD, the new IARU Secretary. I will also be responsible for publishing this E-Letter. I assumed the office of Secretary on October 1, 2009. Dave Sumner, K1ZZ has been the IARU Secretary for the last 10 years and he was also IARU Secretary for a 7-year period in the 1980's. Dave did a great job as Secretary and I hope to continue the high standard that he established. Dave will continue to work closely with the IARU Administrative Council and will be Recording Secretary at the IARU Administrative Council meetings.

I began my association with the American Radio Relay League in 1983 as a Section Manager in the ARRL Field Organization. The Section Manager is a locally elected ARRL Official. In January, 1986, I became an ARRL Director and since that time have served as a Director, First and Second Vice President, President (1995-2000) and as the International Affairs Vice President (2000-present). I have attended 16 regional conferences, numerous regional executive committee meetings and numerous Administrative Council meetings. I'm certain the international experience will assist me as I take on the challenges of being IARU Secretary. In my professional life I have just retired as a Superior Court Judge in the State of California USA. My last day as an active Judge was the day prior to assuming the duties as IARU Secretary.

As far as my amateur radio operating, I enjoy the HF bands, particularly 20 and 40 meters, when I can make time to get on the air. Since I am now retired from full-time employment I should have more time for operating. My favorite ham activity is ragchewing and getting to know the person I work on the ham bands. I also enjoy VHF-UHF operation when I am in the car.

The purpose of this newsletter will be to provide information to the IARU member-societies that can be shared with their members. Many members of IARU societies are unaware of much of what the IARU does and why it does what it does. Hopefully, this newsletter will help

disseminate that information. Member-societies are requested to forward this E-Letter to their members electronically or any other appropriate way. Another purpose of the newsletter is to keep the member-societies up to date on the preparations for the upcoming World Radiocommunication Conference in early, 2012 (WRC-12) and how the member-societies can assist in the preparations. The newsletter will also serve as a outlet for information coming from the member-societies. If there is information that is appropriate to be shared with other member-societies around the world, please send me an email with the information and it will be published in this newsletter.

==> WRC-12 Preparations Underway

WRC-12 will start in January, 2012. The year 2012 seems a long way away but it is only slightly more than two years from now. Preparations within national telecom administrations have been underway for some period of time. Regional telecom organizations have been meeting to discuss the WRC agenda items and to arrive at regional positions on each issue.

Each and every IARU member-society capable of doing so should take the initiative to contact their own administration and let the administration know what the IARU position is on those WRC agenda items that impact the amateur radio service. If your society needs some guidance or advice on how best to approach the administration or what the substance of such discussions should be then do not hesitate to contact the IARU International Secretariat for assistance.

It would be very helpful if your society could place a knowledgeable amateur radio operator on the national delegation attending the WRC. If providing the support for an amateur to attend the WRC is not possible, it would be helpful if your society could arrange to have a knowledgeable amateur radio operator attend the national administrations planning meetings or the regional preparatory meetings leading up to the WRC.

Although the preparation process started some time ago it is not too late for your society to get involved. Do it today.

==> IARU Administrative Council Meeting October, 2009

The IARU Administrative Council (AC) held its annual meeting in mid-October, 2009, in Christchurch, New Zealand. IARU President Tim Ellam, VE6SH/G4HUA, presided over his first AC meeting. Also in attendance was Ole Garpestad, LA2RR, Vice President; Rod Stafford, W6ROD, Secretary; Hans Blondeel Timmerman, PB2T, President and Dennis Green, ZS4BS, Secretary, IARU Region 1; Ramï¿½n Santoyo, XE1KK, Secretary, and Daniel Lamoureux, VE2KA, Director, IARU Region 2; and Michael J. Owen, VK3KI, Chairman, and Shizuo Endo, JE1MUI, Director, IARU Region 3. Also present was Region 3 Director Peter Lake ZL2AZ along with David Sumner, K1ZZ, as recording secretary.

One of the major topics of discussion at the AC meeting involved the upcoming WRC-12, the World Radiocommunication Conference in 2012. The AC adopted preliminary IARU positions on the WRC agenda items that relate to amateur radio or may impact the amateur radio service. The most significant agenda items are:

1. Agenda Item (AI) 1.14 - Implementation of the radiolocation service in the range 30-300 MHz;

2. AI 1.15 - Possible allocations in the range 3-50 MHz to the radiolocation service for oceanographic radar applications;

3. AI 1.19 - Software-defined radio and cognitive radio systems;

4. AI 1.22 - Effect of emissions from short-range devices; and

5. AI 1.23 - To consider an allocation of about 15 kHz in parts of the band 415-526.5 kHz to the amateur service on a secondary basis, taking into account the need to protect existing services.

IARU has a document on the IARU web site that identifies the present and anticipated future requirements for radio spectrum allocations to the Amateur and Amateur-Satellite Services. These requirements are identified so that they may be taken into account in the formulation of national policies with respect to proposed and possible future international allocations conferences. At each AC meeting, those requirements are reviewed and when circumstances change so do the requirements. If you're interested in seeing what the IARU sees as spectrum requirements for the amateur service then log onto the IARU web site at http://www.iaru.org and look for the "Spectrum Requirements" document.

The IARU 2025 Committee was established a few years ago to explore restructuring IARU to make it more effective to meet the challenges faced by amateur radio. The committee came up with a proposed new structure. However, even though the proposed new structure had a number of beneficial aspects it became obvious early on that funding of the new structure could be problematic. At its recent meeting, the committee was restructured and given a slightly different mandate. If the committee can't develop a funding method for the proposed new structure then the committee may propose a different structure. Additionally, the committee should identify changes which can be implemented in the present structure to address concerns raised by the regional organizations and some member-societies.

There has been a movement in the last several years to try to identify "centers of activity" frequencies across all three IARU regions that can be used in disaster relief operations. It has at times been difficult to arrive at a consensus on what frequencies should be used. The AC noted that all three regions have now reached consensus on three global Center of Activity (CoA) frequencies for use in the event of emergencies: 14.300, 18.160 and 21.360 MHz. When no emergency operations are being conducted, these frequencies are open for normal

amateur usage. However, GAREC-09 (more on GAREC later in this report) calls upon IARU member-societies, among others, "whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, web-sites, social networking and DX-clusters to draw the attention of the largest possible number of Amateur Radio operators to on-going emergency communications, in order to avoid interference with emergency traffic." It would be helpful for each member-society to develop an effective method of notifying amateurs within their own country of any such emergency traffic being handled on the CoA frequencies, or elsewhere in the amateur bands.

In 2008, the AC called for a study of the QSL Bureau System. Since the study was initiated over 51 member-societies responded to the study questionnaire. It became clear that in some societies, QSL cards are not handled the same way for members as non-members. There are a small number of societies that dispose of the cards sent through their bureaus for non-members. The AC adopted a resolution stating "that member-societies are strongly encouraged, whenever possible, to provide incoming QSL bureau service to non-members within their operating territory, if such non-members agree to pay the full cost of this service; and if they are not already doing so, to explore appropriate means and methods for delivering QSL cards to non-members."

The AC adopted a protocol to deal with member-societies that no longer exist. If for a period of not less than 5 years: (a) there is no address or other means known to either the International Secretariat or the relevant regional organization by which communication may be made with a member-society; (b) there has been no communication from any person claiming to represent that member-society; and (c) there is no other evidence of the continued existence of that member-society. If those circumstances exist, then the relevant regional organization may request that the AC thereafter publish in the Calendar a notice setting out its belief that the particular Member-Society has ceased to exist, and calling for the submission of any evidence to the contrary within 180 days of the publication of the Calendar. If no such evidence is submitted within 180 days of the publication of the Calendar, then the member-society shall be deemed to no longer exist from that date. Thereafter, any association of radio amateurs claiming to represent that country or separate territory shall be required to apply for membership in the IARU in accordance with the IARU Constitution and Bylaws.

Promoting and preserving amateur radio is the mainstay of the IARU. The AC has at its disposal a number of expert consultants and technical representatives and relies heavily on such volunteer experts and technical representatives. There is always a need for more assistance by knowledgeable amateurs to attend ITU meetings and other telecommunications meetings to represent IARU. The IARU regional organizations and member-societies can be of assistance by recommending individuals who are capable of attending meetings and effectively

promoting the IARU objectives at such meetings. Individuals who are amateurs and who have backgrounds in various technical fields such as broadband or wireless technologies, propagation, radar, satellite communications and spectrum management, just to name a few, can be of assistance. Individuals who may be retired from government work in the field of communications or telecommunication regulation are good candidates for working within the IARU to achieve IARU goals. Member-society leaders are requested to investigate whether such individuals are members of their society and to determine if those amateurs would be willing to assist the IARU. If they are willing to do so, please contact the International Secretariat with the names and contact information so inquires can be made to determine if they are willing to join the IARU team of experts.

These are some of the important matters discussed at the recent Administrative Council meeting. The complete Summary Record of the meeting can be found at http://www.iaru.org/admin-council-summaries.html.

==> GAREC-09

The Fifth Global Amateur Radio Emergency Communications Conference (GAREC-09) took place in Tokyo, Japan, 24 & 25 August 2009. GAREC-09 was hosted by Japan Amateur Radio League (JARL) and was held in conjunction with Jam Fair 2009. Representatives from IARU, the three IARU regional organizations, representatives from a number of IARU member-societies and specialized amateur radio emergency communications groups from all three IARU regions attended the conference.

GAREC-09 produced a statement calling upon IARU member-societies and specialized amateur radio emergency communications groups to:

- to establish close working relationships between the National IARU Member Society and independent specialized Amateur Radio Emergency Communications Groups in the respective countries as well as to cooperate internationally,

- to request their national regulatory authorities implement the modifications to Article 25 of the Radio Regulations adopted by the World Radiocommunication Conference 2003 (WRC-03), in particular the regulations governing third-party traffic during emergencies and during training for emergency operations,

- to provide training in emergency communications to as many amateurs as possible in their respective countries with particular emphasis on:

- personal and logistical preparedness, the psychological aspects of entering a disaster area, and familiarity with the civil protection system in their country,

- specific communications techniques of particular value in emergencies, and

- remembering that the skills developed in the amateur service can be of great benefit to disaster relief organizations in maintaining and operating their own telecommunications networks,

- whenever emergency communications are being conducted on frequencies that propagate internationally, to use any available real-time communications channels, including but not limited to e-mail bulletins, web-sites, social networking and DX-clusters to draw the attention of the largest possible number of Amateur Radio operators to on-going emergency communications, in order to avoid interference with emergency traffic,

- to use their contacts with national regulatory authorities to encourage the accession to and implementation of the Tampere Convention on the Provision of Telecommunication Resources for Disaster Mitigation and Relief Operations,

- to support the work of the IARU on an international Emergency Communications Handbook and to provide copies of existing agreements with institutional partners in emergency response as well as copies of emergency communication guidelines, manuals, and checklists developed for national or local use as inputs to this work,

- to work towards the implementation of the Memoranda of Understanding established between the IARU and ITU, IFRC, and the United Nations by seeking cooperation with the respective national institutions and organizations in their country,

- to continuously improve their awareness of the mission, vision, and values of served agencies, and

- to represent themselves as a human and technical resource able and willing to investigate the communication requirements of served agencies, offer recommendations when asked, and facilitate emergency communications when required.

GAREC-10 is already being planned. GAREC will return to Region 2 in 2010. The Venue will be CURACAO. The dates will be October 11-12, 2010.

The Theme of the Conference will be: "Learning Through Practicing". More details about GAREC-10 will be available as the conference draws closer or on the GAREC web site at http://www.iaru.org/emergency/.

==> CONTACT INFORMATION

I can be reached by email at w6rod@iaru.org. If you have information that you believe would be of interest to the other IARU member-societies around the world then send the information to me. If you would like to see a particular subject discussed in this E-Letter, don't hesitate to contact me with the suggestion.

73,

Rod Stafford W6ROD Secretary, International Amateur Radio Union

2482. [RAC-Bulletin] RAC Bulletin 2009-039E - Croft Taylor VE3CT Appointed to Canadian Amateur Radio Hall of Fame.

RAC Bulletin - Croft Taylor VE3CT Appointed to Canadian Amateur
Radio Hall of Fame

The Board of Trustees of the Canadian Amateur Radio Hall of
Fame has appointed Croft Taylor VE3CT of Kanata, Ontario, to
the Hall of Fame for 2009. Croft will receive his award at
a presentation to be held in Ottawa later in the spring at
which time a summary of his contributions will be published.

Details will also be included in the RAC CARHOF website.
Appointments to the Hall of Fame are made to recognize a
radio amateur for outstanding achievement for sustained
service to amateur radio in Canada or amateur radio at large.

> address or other means known to either the International Secretariat or
> the relevant regional organization by which communication may be made
> with a member-society; (b) there has been no communication from any
> person claiming to represent that member-society; and (c) there is no
> other evidence of the continued existence of that member-society. ?If
> those circumstances exist, then the relevant regional organization may
> request that the AC thereafter publish in the Calendar a notice setting
> out its belief that the particular Member-Society has ceased to exist,
> and calling for the submission of any evidence to the contrary within
> 180 days of the publication of the Calendar. ?If no such evidence is

> submitted within 180 days of the publication of the Calendar, then the
> member-society shall be deemed to no longer exist from that date.
> Thereafter, any association of radio amateurs claiming to represent that
> country or separate territory shall be required to apply for membership
> in the IARU in accordance with the IARU Constitution and Bylaws.
>
> Promoting and preserving amateur radio is the mainstay of the IARU. The
> AC has at its disposal a number of expert consultants and technical
> representatives and relies heavily on such volunteer experts and
> technical representatives. There is always a need for more assistance
> by knowledgeable amateurs to attend ITU meetings and other
> telecommunications meetings to represent IARU. The IARU regional
> organizations and member-societies can be of assistance by recommending
> individuals who are capable of attending meetings and effectively
> promoting the IARU objectives at such meetings. Individuals who are
> amateurs and who have backgrounds in various technical fields such as
> broadband or wireless technologies, propagation, radar, satellite
> communications and spectrum management, just to name a few, can be of
> assistance. Individuals who may be retired from government work in the
> field of communications or telecommunication regulation are good
> candidates for working within the IARU to achieve IARU goals.
> Member-society leaders are requested to investigate whether such
> individuals are members of their society and to determine if those
> amateurs would be willing to assist the IARU. If they are willing to do
> so, please contact the International Secretariat with the names and
> contact information so inquires can be made to determine if they are
> willing to join the IARU team of experts.
>
> These are some of the important matters discussed at the recent
> Administrative Council meeting. The complete Summary Record of the
> meeting can be found athttp://www.iaru.org/admin-council-summaries.html.

> ==> GAREC-09
>
> The Fifth Global Amateur Radio Emergency Communications Conference
> (GAREC-09) took place in Tokyo, Japan, 24 & 25 August 2009. GAREC-09
> was hosted by Japan Amateur Radio League (JARL) and was held in
> conjunction with Jam Fair 2009. Representatives from IARU, the three
> IARU regional organizations, representatives from a number of IARU
> member-societies and specialized amateur radio emergency communications
> groups from all three IARU regions attended the conference.
>
> GAREC-09 produced a statement calling upon IARU member-societies and
> specialized amateur radio emergency communications groups to:
>
> - to establish close working relationships between the National IARU
> Member Society and independent specialized Amateur Radio
> Emergency Communications Groups in the respective countries as
> well as to cooperate internationally,

>
> - to request their national regulatory authorities implement the
> modifications to Article 25 of the Radio Regulations adopted by
> the World Radiocommunication Conference 2003 (WRC-03), in
> particular the regulations governing third-party traffic during
> emergencies and during training for emergency operations,
>
> - to provide training in emergency communications to as many
> amateurs as possible in their respective countries with
> particular emphasis on:
>
> - personal and logistical preparedness, the psychological aspects of
> entering a disaster area, and familiarity with the civil
> protection system in their country,
>
> - specific communications techniques of particular value in
> emergencies, and
>
> - remembering that the skills developed in the amateur service can
> be of great benefit to disaster relief organizations in
> maintaining and operating their own telecommunications networks,
>
> - whenever emergency communications are being conducted on
> frequencies that propagate internationally, to use any available
> real-time communications channels, including but not limited to
> e-mail bulletins, web-sites, social networking and DX-clusters
> to draw the attention of the largest possible number of Amateur
> Radio operators to on-going emergency communications, in order
> to avoid interference with emergency traffic,
>
> - to use their contacts with national regulatory authorities to
> encourage the accession to and implementation of the Tampere
> Convention on the Provision of Telecommunication Resources for
> Disaster Mitigation and Relief Operations,
>
> - to support the work of the IARU on an international Emergency
> Communications Handbook and to provide copies of existing
> agreements with institutional partners in emergency response as
> well as copies of emergency communication guidelines, manuals,
> and checklists developed for national or local use as inputs to
> this work,
>
> - to work towards the implementation of the Memoranda of
> Understanding established between the IARU and ITU, IFRC, and
> the United Nations by seeking cooperation with the respective
> national institutions and organizations in their country,
>
> - to continuously improve their awareness of the mission, vision,
> and values of served agencies, and

>
> • • •- to represent themselves as a human and technical resource able and
> • • • • •willing to investigate the communication requirements of served
> • • • • •agencies, offer recommendations when asked, and facilitate
> • • • • •emergency communications when required.
>
> GAREC-10 is already being planned. •GAREC will return to Region 2 in
> 2010. •The Venue will be CURACAO. •The dates will be October 11-12,
> 2010.
>
> The Theme of the Conference will be: "Learning Through Practicing". More
> details about GAREC-10 will be available as the conference draws closer
> or on the GAREC web site athttp://www.iaru.org/emergency/.
>
> ==> CONTACT INFORMATION
>
> I can be reached by email at w6...@iaru.org. •If you have information
> that you believe would be of interest to the other IARU member-societies

December 16, 2009

Editor: Rick Palm, K1CE <k1ce@arrl.net>

==> THE VIEW FROM FLAGLER COUNTY

Instead of the usual "View from Flagler County," let's get it from
Blacksburg, Virginia, for a change this month, where operators there
enjoyed a fine SKYWARN Recognition Day
<http://www.wrh.noaa.gov/mtr/hamradio/> (SRD) celebration. SRD is an
annual event sponsored by the ARRL and the National Weather Service,
involving radio amateurs from across the country putting stations in
their local National Weather Service Forecast Offices on the air to
work other amateurs and participating NWS offices. Operators practice
skills for sending and receiving simple weather reports to their local
County Warning Areas (CWAs) using repeaters that have been set up for
SKYWARN spotting and reporting. SRD is also just plain fun.

Veteran SKYWARN operator Carter Craigie, N3AO, reported: "To start SRD
off Saturday, December 5, at our Blacksburg, Virginia forecast office,
it seemed appropriate that a snowstorm was blowing into the region --
our first weather reports consisted of "snowing" and "32 degrees." The
Blacksburg operators used the SKYWARN radio station call sign WX4RNK.

The 40-county CWA for Blacksburg boasts nine 2-meter SKYWARN repeaters
in southwestern Virginia and northwestern North Carolina, as well as a
440 MHz linked repeater system called the Three Dog

Repeater Group. This system ran Echolink and IRLP, with Mike Knight,
K4IJ, the group's guru, posting simple step-by-step instructions for
ops new to those modes.

The previous night, a VHF operation was run by Glen Sage, W4GHS, who
checked in on one repeater to the next, soliciting weather reports.

Sage was assisted by Bill Perkins, KJ4ASH, on 2-meters and 440 MHz as
well as on 20 and 40 meters, and by Matthew Terry, KI4TYR, who also ran
the rotation on 2-meters and 440 MHz. Dean Davison, KC2MTW, worked 440
MHz also. The 40-meter band offered good conditions and the band logs,
provided by NWS Meteorologist and SKYWARN Supervisor Phil Hysell,
```

KI4CKP, filled up rapidly as contact after contact was made, both locally and all over the continent.

Meteorologist-in-Charge Dave Wert, KB2FZO, provided an excellent overview of the approaching snow storm, which was especially appreciated by SKYWARN Desk newcomer Ron Angert, N4AJT, giving him and the assembled crew many insights into work the forecasters do in order to accurately provide safety communications to the public. Angert went on to familiarize himself with the equipment at the SKYWARN Desk--another benefit to attending SKYWARN Recognition Day -- and then proceeded to make a few contacts.

The HF operators kept the Kenwood TS-570D radio on the air from 9 AM Saturday until 5 PM. Craigie said they were pleased that the new loop antenna provided by SKYWARN Coordinator Phil Benchoff, N3PB, and Vic LaFon, W4VLL, worked so well.

The HF crew took shifts starting with Craigie, who was relieved by Rick Armstrong, KS4XO, and ending with anchorman Roger Bell, N4FPA. Craigie said "we tried hard to surpass last year's effort and came close, but we'll have to wait for next year to break into the next higher NWS SRD category."

NOAA sends out handsome certificates to their NWS Forecast Offices congratulating them for their effort. "Last year, the Blacksburg office won the Cumulonimbus Award; next year it will be at least the Lightning Award," said Craigie.

==> 2010 NATIONAL HURRICANE CONFERENCE SET FOR ORLANDO

The 2010 National Hurricane Conference is scheduled for

March 29-April 2, 2010 at the Hilton Orlando, in Orlando, Florida. There is always a robust Amateur Radio and ARES presence at this important conference. Don't miss it.

The primary goal of the National Hurricane Conference <http://www.hurricanemeeting.com/> is to improve hurricane preparedness, response, recovery and mitigation in order to save lives and property in the United States and the tropical islands of the Caribbean and Pacific. In addition, the conference serves as a national forum for federal, state and local officials to exchange ideas and recommend new policies to improve Emergency Management. To accomplish these goals, the annual conference emphasizes:

* Lessons learned from hurricane strikes.

* State of the art programs worthy of emulation.

* New ideas being tested or considered.

* Information about new or ongoing assistance programs.

* The ABCs of hurricane preparedness, response, recovery and mitigation -- in recognition of the fact that there is a continual turnover of emergency management leadership and staff.

Look for a well-attended Amateur Radio seminar on the Tuesday of the meeting week, with participation by many Amateur Radio and hurricane response luminaries, and a good Q&A session. ARRL HQ usually sends a representative to discuss ARRL emergency planning and preparedness. The Hurricane Watch Net always has a presence.

==> 2010 FLORIDA GOVERNOR'S HURRICANE CONFERENCE: FORT LAUDERDALE

The 24th Annual Florida Governor's Hurricane Conference <http://www.flghc.org/> is slated for Fort Lauderdale, May 23 - 28, 2010. The 23rd Annual Governor's Hurricane Conference was a huge success, with over 2700 in attendance. Many of the 2009 presentations are posted on its Web site for viewing: Go to the Program page and click on Training Session or Workshop Descriptions to view.

This is another conference that is well-attended by radio amateurs involved in supporting emergency management during tropical weather events, especially in the southeast and Gulf regions.

==> INTERNATIONAL HUMANITARIAN AWARD NOMINEES SOUGHT

The deadline to nominate an amateur or group of amateurs for the 2009 ARRL International Humanitarian Award <http://www.arrl.org/FandES/field/awards/humanitarian.html> is coming up fast -- December 31, 2009. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

The Programs and Services Committee, appointed by the League's President, recommends the award recipient(s) to the ARRL Board, which makes the final decision. The committee is now accepting nominations from Amateur Radio, governmental or other organizations that have benefited from extraordinary service rendered by an Amateur Radio operator or group. The ARRL International Humanitarian Award recognizes Amateur Radio's unique role in international communication and the assistance amateurs regularly provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army or a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references.

All nominations and supporting materials for the 2009 ARRL International Humanitarian Award must be submitted in writing in English to ARRL International Humanitarian Award, 225 Main St, Newington, CT 06111 USA.

==> LETTERS

Amateurs Participating In Drills On Behalf Of Their Employers

I strongly disagree with the popular consensus about government employees participating in radio drills. Did anybody listen to a single word uttered by the FCC's William Cross and Laura Smith at this year's Hamvention? The regulation is there to protect Amateur Radio from all those who would seek to steal our spectrum.

Making this just about drills greatly oversimplifies things. Sure, nobody is "harmed" by a government employee participating in a radio drill. But where will it end? I don't think it will. Soon, paid employees of the Red Cross and Salvation Army will want their special dispensation, too. Who's next?

Maybe you think that the 2-meter band isn't worth saving, and we should just turn it over to public service and disaster relief organizations. If that is the case, you are certainly going about it the right way. IMHO, you are opening Pandora's box, and the potential for loss of our spectrum is huge. - Bruce Liddell, KC0RRS, Lawrence, Kansas, Douglas County ARES; Certified ARRL Emergency Communications Level One; FEMA ICS100, ICS200, NIMS700, NIMS800

CPR, Wilderness, Red Cross Training

Regarding the items on CPR training in the last issue, you are correct that the American Red Cross and the American Heart Association are both CPR training suppliers, but ARES operators should also check with their local hospitals for CPR courses, too. They might be less expensive than the other providers.

But wait, there's more: Stonehearth Outdoor Learning Opportunities <http://www.soloschools.com/> (SOLO) offers Wilderness Emergency Medical Courses ranging from basic to advanced levels, all oriented towards outdoor and remote activities. The National Outdoor Leadership School <http://www.nols.edu/> (NOLS) also teaches these courses, as does Wilderness First Aid <http://wfa.net/> (WFA), sponsored by the Wilderness Safety Council.

The American Red Cross is upgrading their Wilderness First Aid Basics course and it will become Wilderness and Remote First Aid as of March 1, 2010.

These are all resources that we use in the Boy Scouts of America to meet the camping requirements for remote camping and for long term sailing trips for Sea Scouts. These courses would be good for disaster operators since they teach skills needed when emergency help is potentially delayed. The courses have been around since the 1980s, but organizations such as the Red Cross and the National Safety Council started looking at them more closely after Katrina, when it was discovered that many first responders did not have the training to deal with delayed response issues or to improvise. Katrina caused areas that were within Urban Protocols to become Wilderness Protocol areas in an instant. -- Bill Stewart, WFA, W2BSA

Your report in the last issue on the Red Cross training institute in Kentucky points out that the Red Cross is a rich source of training for ARES members. I urge ARES ops to contact their local chapters for information on classes that are being taught locally.

However, potential attendees should go into Red Cross classes with appropriate expectations. These are, after all, Red Cross classes. They provide valuable information, but the emphasis is on material that is important for Red Cross volunteers. We've had issues with local hams who have attended Red Cross classes with the expectation of the material being ARES-related or communications-related and were disappointed with what they got.

Each Red Cross class has a Fact Sheet that clearly describes the class. I encourage anyone who is considering attending a class to ask the local chapter for the Fact Sheet and review it carefully to be sure that the material in the class matches their need. Here's an example: You listed "Disaster Assessment Basics" in the newsletter. This is a three hour class that is intended to provide basic information for volunteers who are performing the task of evaluating the damage caused by a disaster. This task is extremely important since it sets the scope of a disaster, and it's critical to get it done as soon as possible by local volunteers.

ARES often participates in the job by providing communications for the teams performing the assessment. If the ARES member wants to actually participate in the assessment, this course is vital. But if the ARES volunteer is insistent that their only task is providing communication, this course is going to seem a waste of time, although understanding

the information that we're communicating makes us better at that job.

I urge ARES members to affiliate with the Red Cross or another local disaster organization and learn how they can participate in disaster operations beyond simply being a communicator. Communication is vital, but it is only part of the mix in an actual disaster. People who have the capability to help in several areas can contribute more than one-dimensionally. -- Steve Bonine, KB9X, Albert Lea, Minnesota

==> EVCOMMS PREPARES OPS FOR EMCOMMS: CHECK OUT THE SECM

We hams are, of course, well known for communications support of relief agencies in disaster and post-disaster situations. But we also provide a plethora of communication services on a "preventive medicine" basis to the public during special events such as marathons and bike-a-thons. For ARES operators, it is the experience and practice for disaster situations that make working "EvComms" so valuable. Work every one you can!

The purpose of the ARRL'sSpecial Events Communications Manual <http://www.arrl.org/FandES/field/spevman/index.html> is to give you tips and suggestions to assist you in planning your EvComms efforts. It's free and can be found by clicking on the link.

==> NEW ARRL COURSE ON DIGITAL TECHNOLOGY FOR EMCOMMS

With digital technology becoming an integral part of Amateur Radio, hams interested in emergency communications now have a new tool to help them take advantage of emerging modes such as Packet Radio APRS, Winlink 2000, IRLP, EchoLink and WIRES-II, D-STAR, APCO25, HF sound card modes and Automatic Link Establishment (ALE). The ARRL Digital Technology for Emergency Communications Course <http://www.arrl.org/catalog/?item=1247> will introduce hams to all of the ways Amateur Radio operators are using digital technology as a valuable emergency communications tool.

Written by ARRL Publications Manager and QST Editor Steve Ford, WB8IMY, this self-study CD-ROM will answer such questions as: Can you transfer supply lists or personnel assignments between emergency operations sites? Can you get critical e-mails to the Internet if a connection goes down? Can you relay digital images of damage at specific locations? Can you track the locations of emergency personnel and display them on computer maps?

Illustrations, screenshots, Internet links and audio files are used to demonstrate transmission modes and equipment configurations. Bite-sized learning units and interactive knowledge checks make learning interesting and fun.

"This course is a great starting point for anyone interested in the public service applications of digital communications technology," said Ford.

==> EMPOWER: Q&A ON POWER FOR ARES OPS

Emergency power is often the critical link in any ARES operation. The following Q&As on this subject were harvested from an article written by ARRL Lab staff.

Start by considering your power source. If a larger, sustained operation is indicated, consider a generator.

Q. Our ARES group has a small 600-watt generator available. Will that be enough for four transceivers?

A. Not if they're typical "100-watt" transceivers. That's only 400 watts, you say? Not exactly. You'll have to calculate the total power requirements for all equipment you intend to use, including the station lights and accessories. To determine how much generator power you need, start by making a list of the power consumption of your station equipment (which will be much more than its RF power output). If you're lucky, some of the equipment may have its power consumption listed in the owner's manual or on the enclosure. If only current consumption is provided, multiply the current in amps by 120 volts to determine the power consumption in watts.

If there is no information available on the unit's power consumption, two rules of thumb may help: (1) A transmitter will usually operate at about 50% efficiency, so double the RF output to obtain the amount of power required. (2) The equipment fuse is usually rated at 150- to 200% of the actual current draw, so multiply the fuse value by 0.5 to 0.67 to calculate the approximate current consumption. Use one of these steps for all station equipment, including accessories and lighting.

Now, determine how much of this equipment will be operated simultaneously -- perhaps four transceivers, two 100-watt lights, and several accessory items such as CW keyers, voice keyers, etc. If you are going to use the generator to power a piece of non-station equipment, such as a coffee pot, you'll need to include it as well. Some equipment may require more power than you have calculated, so adding a few hundred watts to your estimate is a good idea. Let's look at a typical calculation based on using only one HF transceiver: Transceiver 400 watts, Laptop computer 40 watts, Lamp 60 watts, and Soldering iron 100 watts, for a total of 600 watts.

Some generators have a continuous power rating and an intermittent power rating. If you find that the total station requirement exceeds the available generator power, remember that transceivers draw full power only in transmit, and that they're not going to be in transmit 100% of the time. They could, however, all be in transmit simultaneously, so you need to make sure that the total possible power consumption doesn't exceed the intermittent power rating of the generator.

Check the output voltage and frequency, if possible. If the generator doesn't have a built-in over-voltage protector, make sure the voltage is correct before you use the generator to power your equipment.

Also, check the generator for radio noise. Some generators are not fully suppressed for ignition noise. You would rather find this out now than at the disaster site. If there is a problem, it may be possible to use resistor-type spark plugs or spark-plug wires. Check the owner's manual. You can also connect the generator to a good earth ground with a ground rod.

Q. We won't have generator capability at our disaster site. How about battery use?

A. Keep in mind that an automotive lead-acid battery was designed for one task -- to deliver a lot of current for a brief period of time. Its output voltage does not remain constant during its discharge cycle, and it is not a good idea to discharge it completely. An automobile battery won't tolerate too many deep-discharge cycles before it's ruined!

A deep-discharge lead-acid battery is much better suited to your needs. It can be discharged repeatedly without damage, and will maintain full output voltage over much of its discharge cycle. You'll find this type of battery at automotive and marine parts supply outlets. They are not much more expensive than regular automobile batteries and are designed to deliver moderate current for long periods of time.

Q. Is it possible to operate using batteries with a 100-watt transceiver?

A. Yes, but you may find that a 100-watt station is a heavy drain on your battery. A car battery would probably last only a few hours--less if it's cold. (Cold batteries lose up to 70% of their capacity.) A deep-cycle battery has a typical capacity of 1000 watt-hours, but you may not be able to use all of this capacity with a transmitter or receiver: As the battery discharges, its output voltage drops. When it drops below 12 volts or so, most amateur equipment will not function properly.

Q. Well, I can recharge the battery, right?

A. Yes, from commercial mains or a gasoline-powered generator. Alternative sources of charging power, such as solar panels or wind-driven generators, can be used.

Q. Solar power sounds interesting. Is a solar panel difficult to use?

A. No. Solar panels have only two wires to connect to your battery or circuit - one positive, one negative. Some solar panels have a diode in series for polarity protection and to reduce current flow from the battery back through the solar panel. This is no longer the case with many modern panels, particularly the larger ones where efficiency is important. Tests have shown the diode causes more energy loss during the day than the very small wattage dissipated in the solar panel at night.

Solar panels typically deliver 15 to 18 volts at 600 to 1500 mA in full sunlight. This will not damage a high-capacity battery, such as a

deep-cycle unit. All you need do is hook up the battery, put the solar panel in full sunlight, and charge away. The battery will regulate the maximum voltage from the panel.

If you're going to use a solar panel to recharge a smaller battery, such as a Nickel-Cadmium (NiCd) battery or gelled-electrolyte lead-acid battery, you'll need to pay a bit more attention to detail. These types of batteries can suffer damage if charged too quickly, so a regulated charge is necessary. The ARRL Handbook has several solar-panel charging and regulator circuits.

Q. A large lead-acid battery sounds a bit heavy. Are there any other types of batteries that we can use?

A. It depends on how long you want to operate. If you're planning only a few hours of low-power operation, you might be able to get away with using dry cells, either standard carbon-zinc or alkaline. (Don't forget that a carbon-zinc or alkaline battery should not be recharged!) An alkaline cell can deliver quite a bit of current and will last a surprisingly long period of time. NiCd batteries are usually not suitable for sustained operation above a few watts, but if you are planning to recharge them from solar power, they may be good for quite a few hours. If you do use NiCd batteries, do not allow them to become fully discharged. This can cause permanent damage.

Medium capacity lead-acid batteries are made with a gelled electrolyte. These are commonly called gel cells. In most cases, they are completely sealed and can be operated in any position. They are available in a variety of sizes, ranging from 1 Ah to about 50 Ah. (A list of suppliers is found at the end of Chapter 35 of the ARRL Handbook, or go to http://www.arrl.org/tis/tisfind.html and search the keyword BATTERY). Gel cells are a good compromise between portability, capacity and ease of use. They must be charged properly, though. If you charge them too fast, bubbles can develop in the electrolyte, permanently damaging the battery. They should be charged at no more that about 10% of their output rating in ampere-hours.

Q. Someone told me that there is a device that will convert 12 volts from a battery to 120 volts ac. Why can't I use one of these?

A. You can! The device is known as a dc-ac converter, or inverter. It converts 12 volts to a square-wave ac output at approximately 60 Hz. Inverters are limited to about 100 to 400 watts, however, and some equipment (especially motors!) cannot be powered by a square wave. An inverter will run a few light bulbs or a small soldering iron and can be a useful addition to a battery-powered station. Some newer ones use switching technology and are quite lightweight. (Test them ahead of time, though. They may generate RF noise or run hot at full output.)

Q. Does the ARRL have any information about emergency power?

A. The ARRL Handbook discusses all types of emergency power, ranging from batteries, to solar power and solar-panel charger circuits, to ac

generators. QRP Classics contains reprints of several QST articles about emergency power. See the ARRL publications catalog on the ARRL Web site for more information. Also see the rest of the Emergency/Alternative Power TIS Web page, also on the ARRL Web site. Consider purchasing Emergency Power for Radio Communications <http://www.arrl.org/catalog/?category=&words=Emergency+Power&SearchWords.x=0&SearchWords.y=0>, by Michael Bryce, WB8VGE, published by ARRL

==> TIP: POWERPOLE UPDATES

Powerpoles are now available in welded assemblies from Anderson Power Products <http://www.andersonpower.com/contact/sales-distribution-contacts.html>. There is typically a minimum of 500 to 1000 pieces (250 to 500) mated sets. These are ultrasonically bonded. Because Red and Black are so popular, there is a standard part number: PPHSG12RB. These cost a little more because of the extra labor to bond them, but now you can do away with the roll-pin. You can order this from any of our distributors. See our Web site for our regular distribution channels.There are also numerous smaller distributors that carry some product as well.

Also, Anderson finally made a waterproof powerpole pak. We call the Product Line SPEC Pak. We use 15/45 powerpoles inside an IP67 shell. Currently we have a 4 and a 6 pole version released with many other configurations in design to be released throughout 2010 and 2011. By mid 2010 we'll have versions to handle all the way up to 3/0 wire and hundreds of configurations in between. We also now have a premate ground <http://www.andersonpower.com/litlib/files.html/download/504>powerpole and a powerpole that will accept 4 signal contacts in the same 15/45 housing. <http://www.andersonpower.com/litlib/files.html/download/540>-- Eric Brown, Product Manager, Anderson Power Products

==> 20TH WORLD CONFERENCE ON DISASTER MANAGEMENT SLATED FOR TORONTO NEXT YEAR

The 20th World Conference on Disaster Management (WCDM) is scheduled for June 20 - 23, 2010, in Toronto, Canada. The theme is "20 Years of Progress." Industry experts will discuss the progress of past, present and future trends. This four day conference will offer new ideas and approaches that will help build solutions for a global community. Click for more <http://www.wcdm.org/Toronto/toronto.html> info. According to its Web site, "The World Conference on Disaster Management <http://www.wcdm.org/Toronto/toronto.html> (WCDM) offers a unique experience, bringing together experts, practitioners, certifying bodies, service and product suppliers from Emergency Management, Business Continuity and other Disaster Management disciplines.

==> K1CE FOR A FINAL

Notable of the Month: If you Google "Emergency Communications," five of the first ten results reference Amateur Radio. Are you thinking what I'm thinking? Amateur Radio is a key emcomm asset in this country.

And finally this year: Long time friend and former Hurricane Watch Net Manager Jerry Herman, N3BDW, always closed his annual presentations at the National Hurricane Conference with the following: "It's not about the radios, it's about the people we serve." I'd like to echo that sentiment, and add that it's also about us as a community of ARES operators that not only find reward and joy in serving the public in times of need, but also the camaraderie and friendships that evolve along the way. All of the above are the reasons we do it year in and year out. Happy Holidays! 73, Rick Palm, K1CE <http://www.qrz.com/db/k1ce>, Flagler County, Florida

The ARES E-Letter is published on the third Wednesday of each month. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/FandES/field/ares-el/.

2485. Dipole advice ??

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-17 05:53:23 UTC
From: Ron <ronnclair@ya.com>
Message-ID: <oHjWm.979$lH1.273@newsfe12.iad>
Source record: 6299

Hi

Just about to make a dipole and have enough parts to make but only want to climb once. 50 ft tower and lots of ladder line, coax, a 1:1 balun and lots of copper wire and a nice manual tuner that has its own balun for hook up to either the ladder line or coax.

Any idea which is best possible and practical application? Should I use the ladder line or coax? Do I need the balun? I hope to use it for 10-160 as this is what the rig is capable of.

Any advice or adeas or tricks of the trade are greatly appreciated, I hope to only climb once, what works best?

thanks
Ron

==> + ADVOCACY: AMATEUR RADIO BILL PASSES SENATE, MOVES TO THE HOUSE

On Monday, December 14, S 1755 -- The Amateur Radio Emergency
Communications Enhancement Act of 2009 -- passed the Senate by
unanimous consent; the bill now goes to the House of Representatives
for consideration. Sponsored by Senator Joe Lieberman (ID-CT), and
Senator Susan Collins (R-ME), S 1755, if passed, would direct the
Department of Homeland Security (DHS) to undertake a study on emergency
communications. S 1755 points out that "There is a strong Federal
interest in the effective performance of Amateur Radio Service
stations, and that performance must be given -- (A) support at all
levels of government; and (B) protection against unreasonable
regulation and impediments to the provision of the valuable
communications provided by such stations." Read more here
<http://www.arrl.org/news/stories/2009/12/15/11247/?nc=1>.
```

==> + PUBLIC SERVICE: HAMS HELP OUT WITH SEA RESCUE

When Dave Nicholson, N2AWE, was stranded at sea earlier this month off the Bermuda Triangle, he had no fuel and his 47 foot sailboat had sustained severe damage in a storm. When they learned of his predicament, hams with the Maritime Mobile Service Net (MMSN) helped to coordinate with the US Coast Guard to bring fuel and a tow boat to guide Nicholson safely to port. Read more here <http://www.arrl.org/news/stories/2009/12/16/11254/?nc=1>.

==> THE 2009 ARRL SPECTRUM DEFENSE CAMPAIGN NEEDS YOUR SUPPORT

Chief Development Officer Mary Hobart, K1MMH, reports that the ARRL has raised more than $221,000 toward the goal $310,000 for the 2009 Spectrum Defense Fund <http://www.arrl.org/defense>. "The messages I receive from the ARRL members and hams who contribute to this much needed fund are heartening," she said, "expressing appreciation for all the work ARRL does for the Amateur Radio community to protect our frequencies. And we can all be proud of the successes that have come from the work of ARRL leadership -- the Board and staff here at HQ. But there is always more to do." Hobart said that year after year, ARRL members tell her that the League's representation of radio operators -- both in Washington and on the international stage -- is one of, if not the most important activities that the ARRL does. "The cost of that representation at meetings in Washington, at ITU gatherings and working party meetings to prepare for world telecommunications conferences is the key to the continued success of our defense efforts," she said. "Spectrum Defense is one of those areas that is not covered completely by member dues. So we ask ARRL members to do what they can to help cover those expenses." Amateurs wishing to make a contribution may do so easily online <http://www.arrl.org/defense>, via postal mail or by calling the ARRL Development Office at 860-594-0397.

==> + AMATEUR RADIO IN SPACE: FIRST CHINESE AMATEUR RADIO SATELLITE NOW IN SPACE

AMSAT China (CAMSAT <http://www.camsat.cn/>) reports that at around 0230 UTC on December 15, China launched its first Amateur Radio satellite -- named XW-1 <http://www.amsat.org/amsat-new/satellites/satInfo.php?satID=116&retURL=satellites/futures.php>
-- into space. The microsatellite -- a secondary payload aboard the CZ-4C rocket launched from the Taiyuan Satellite Launch Center -- was launched into a Sun-synchronous orbit with an apogee of approximately 1200 kilometers. XW-1 successfully reached orbit at 0253 UTC. Members of the XW-1 launch team reported they received a beacon from the satellite shortly after the satellite deployed. In the first few days, the XW-1 team will work on the satellite's FM and store-forward transponder mode and its linear transponder mode. Once those tests are complete, they will upload a new flight program to set up the payload schedule. The satellite's communications payload includes a beacon and three crossband transponders operating in FM, SSB/CW and digital modes. Uplink and downlink frequencies can be found on the CAMSAT Web site

<http://www.camsat.cn/index.php?option=com_content&view=article&id=56&Itemid=67>.
For the latest Keplerian elements for XW-1 and other satellites, check out the W1AW Keplerian Bulletins <http://www.arrl.org/w1aw/kep/>.

==> + AMATEUR RADIO IN SPACE: STUDENTS AND TEACHERS INVITED TO "FLY A FILE" ON ARISSAT-1

On February 3, 2006, cosmonaut Valery Ivanovich Tokarev hand-launched the Amateur Radio satellite SuitSat-1 from the International Space Station during an extra vehicular activity (EVA), NASA's term for a spacewalk. A discarded Russian ORLAN spacesuit, SuitSat-1 was equipped with an Amateur Radio transmitter that transmitted telemetry and greetings from youngsters to the youth of the world in several languages. In 2010, an Amateur Radio satellite -- ARISSat-1 -- will once again be hand-launched from the ISS. Like its predecessor, ARISSat-1 will transmit messages recorded by students, and teachers and students are invited to "fly a file" aboard this Amateur Radio satellite. Read more here <http://www.arrl.org/news/stories/2009/12/15/11251/?nc=1>.

==> + ARRL PUBLICATIONS: CHECK OUT THE JANUARY/FEBRUARY 2010 NCJ

The January/February issue of NCJ, The National Contest Journal, is filled with the latest news from the contesting world. Whether you are new to contesting or are a seasoned pro -- or somewhere in the middle -- you will find something in NCJ just for you. In addition to all of the exciting articles in this issue, there are all the regular columns and features you expect from NCJ: "Workshop Chronicles," by Don Daso, K4ZA; "Contest Tips, Tricks & Techniques," by Gary Sutcliffe, W9XT; "VHF Contesting," by Jon Jones, N0JK; "RTTY Contesting," by Don Hill, AA5AU; "Propagation," by Carl Luetzelschwab, K9LA; "Contesting on a Budget," by Ralph Bellas, K9ZO, and "Contesting 101," by Kirk Pickering, K4RO. NCJ is published six times a year by the ARRL; it is edited by Al Dewey, K0AD. NCJ is what every contester needs in their shack -- subscribe today <http://www.arrl.org/ncj/>! Read more here <http://www.arrl.org/news/stories/2009/12/16/11252/?nc=1>.

==> + ARRL PUBLICATIONS: QEX : THE JANUARY/FEBRUARY 2010 ISSUE

The January/February issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. Would you like to write for QEX? It pays $50/printed page. Get more information and an Author's Guide <http://www.arrl.org/qex/>. If you prefer postal mail, send a business-size self-addressed, stamped envelope to QEX Author's Guide, c/o Maty Weinberg, ARRL, 225 Main St, Newington, CT 06111-1494. QEX is edited by Larry Wolfgang, WR1B <lwolfgang@arrl.org>, and is published bimonthly. The subscription rate (6 issues) for ARRL members in the US is $24. For First Class US delivery, it's $37; in Canada and internationally by airmail it's $31. Nonmembers add $12 to these rates. Subscribe to QEX <http://www.arrl.org/qex> today. Read more here

<http://www.arrl.org/news/stories/2009/12/17/11253/?nc=1>.

==> + NOW YOU KNOW!: SANTA'S A HAM!

By ARRL News Editor S. Khrystyne Keane, K1SFA

For 37 years, Mickey Hicks, WO6T, played Santa Claus to hundreds of children. These children never sat on Santa's lap to tell him that they had been good boys and girls and what they wanted for Christmas. They did it in a much more simple way -- they picked up a microphone and told Santa on the air. Each year, Hicks, a ham for almost 50 years and a long-time Amateur Radio instructor, would get on the air for 10 days each December as W6S (Whiskers-6-Santa). Unfortunately, Hicks became a Silent Key earlier this year.

Hicks said that the first year he operated as W6S was a hit with the operators -- and their children. Most children, he noted, are a bit apprehensive of talking over the radio, let alone to Santa. One of the most challenging parts of operating was when he heard a parent say "This one is shy and won't talk." That was never a problem for Hicks -- after a few warm-up questions, such as "Can you say hello to Rudolph?" -- he said he could strike up a conversation that lasted a few minutes. He had even heard back from parents that they weren't able to get the microphone away from the kids afterward!

Back in 2001, Hicks told the ARRL <http://www.arrl.org/news/stories/2001/12/21/3/?nc=1> that his Santa's Workshop was a great ham radio recruiting tool. One of his most memorable experiences was when a young girl he'd once spoken with on the air as Santa came by with her ham ticket in hand to thank him in person for getting her interested in Amateur Radio. "I had tears in my eyes, of course," he said. One of the most enjoyable moments of Hicks' Santa career occurred when he was speaking with a young child and realized he had spoken with their parents and grandparents when they were youngsters!

Mark Slater, WI6J, was Hicks' QSL manager. With the blessing of Hicks' wife, son and daughter-in-law, Slater will carry on the W6S tradition for 2010 and beyond. "Mickey's shoes are so much bigger than I could ever hope to fill," he told the ARRL, "but I know Mickey would have wanted Santa to keep getting on the air and speaking with the children." Slater said you can find him most evenings, as well as the weekend of December 19-20, on 14.270 MHz, Santa's favorite frequency. Santa is a ham -- now you know!

==> ARRL STAFF VACANCY

A vacancy has developed in the position of ARRL Emergency Preparedness and Response Manager. Applications for this position will be solicited before the end of the year with the objective of filling the position early in 2010. Because this is the last scheduled ARRL Letter of 2009, if you or someone you know may be qualified for and interested in the position, please watch for the posting on the ARRL Web site

<http://www.arrl.org/announce/jobs/>.

==> SOLAR UPDATE

Tad "A friend to man, to whom thou say'st, 'Beauty is truth, truth beauty' <http://englishhistory.net/keats/poetry/odeonagrecianurn.html>" Cook, K7RA, reports: Yet another new sunspot group -- number 1035 -- emerged this week, seemingly on top of group 1034, which has been visible since December 9. This sunspot group is quite active, and we may see a rise in geomagnetic activity on Sunday, December 20 with a predicted planetary A index of 15. Look for more information in the Solar Update, available on the ARRL Web site on Friday, December 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/tis/info/propagation.html>. This week's "Tad Cookism" brought to you by John Keats' Ode on a Grecian Urn <http://englishhistory.net/keats/poetry/odeonagrecianurn.html>.

==> THIS WEEK ON THE RADIO

This week, the Russian 160 Meter Contest is December 18. The OK DX RTTY Contest is December 19. The Croatian CW Contest is December 19-20 and the Lighthouse Christmas Lights QSO Party is December 19-January 3. The ARCI Holiday Spirits Homebrew Sprint is December 20, the Run for the Bacon QRP Contest is December 21 and the SKCC Sprint is December 23. Next week, check out the South Dakota QSO Party and the Stew Perry Topband Challenge -- both are on December 26-27. All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests/>, the ARRL Contest Update <http://www.arrl.org/contests/update/> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Station Web page <http://www.arrl.org/contests/spev.html>.

==> + ARRL HEADQUARTERS CLOSED FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Friday, December 25, 2009 and Friday, January 1, 2010 in observance of Christmas and New Year's Day. There will be no W1AW bulletins <http://www.arrl.org/w1aw/> or code practice transmissions <http://www.arrl.org/w1aw.html#w1awsked> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> <http://www.arrl.org/arrlletter/>or ARRL Audio News <http://www.arrl.org/arrlletter/audio/> <http://www.arrl.org/arrlletter/audio/>on Thursday, December 24 and 31. We wish everyone a safe and joyful holiday season and a prosperous 2010.

==> ARRL CONTINUING EDUCATION COURSE REGISTRATION

Registration remains open through Sunday, December 27, 2009, for these online course sessions <http://www.arrl.org/cep/student/> beginning on Friday, January 8, 2010: Amateur Radio Emergency

Communications Level 1; Antenna Modeling; Radio Frequency Interference; Antenna Design and Construction; Ham Radio (Technician) License Course; Propagation; Analog Electronics, and Digital Electronics. To learn more, visit the CEP Course Listing page <http://www.arrl.org/cep/student> or contact the Continuing Education Program Coordinator <cce@arrl.org>.

The ARRL Letter is published Thursdays, 50 times each year. ARRL members may subscribe at no cost or unsubscribe by editing their Member Data Page as described at http://www.arrl.org/arrlletter/.

Amateur Radio Newsline(tm) Report 1688 - December 18 2009

The following is a closed circuit. With an update on Amateur Radio Newsline, here's our Producer Bill Pasternak, WA6ITF:

--

This message will last about 5 1/2 minutes. Let me start by saying thank you to all who called or e-mailed their condolences on the passing of our treasurer, and my friend of the past two and a half decades Andy Jarema, N6TCQ. I will shortly on-pass those wishes to Judy and I know she will be appreciative.

As anytime there is the sudden passing of a key member of any organization there is a true feeling of loss. It takes time to sink in that this person whom had been such an integral part of all of our lives is now gone and he will never return. That I will never again going to hear the phone ring and on the other end will be Andy just calling to say hello. Or, or more times than not, telling me that the funds are low and we need income fast. And always telling me this with his well known Cheshire cat smile and a bit of a laugh to help soften the bad news a bit.

Yes, Andy Jarema, N6TCQ, was more than our treasurer and support fund administrator. He was our friend and a better friend nobody could possibly have.

But Andy would be the first to tell you that life and the business associated with life must go on. And it has for us here at the Amateur Radio Newsline. And I want to spend a few moments bring you up to date.

First off to those who support Newsline by check, we believe that we have located and deposited all that were in Andy's possession at the time of his passing. We have also been able to transfer all Pay Pal donations. In all, there was about $1500 in donations that Andy had not had the time to process before falling ill. Those have been transferred into our bank account with $741 going to pay off back expenses associated with the Young Ham of the Year Award and other administrative costs that had been lingering the past several months. Another $182 went to our Wireless provider for two months of service and $201.01 was paid to ATT to bring our wireline phone bill up to date. So out of that $1500 we have already spent $1124 to clear past debts and leaving us with about $375 to hopefully get us through to years end. Not a lot, and that does not include the monthly $63 for our high speed Internet connection that Ill front out of pocket for the time being, but at least we are up to date for the moment.

So what does this mean to all of you? First, to those of you who contribute by Pay Pal, you can resume doing so. The link to our PayPal donation account is on our website at www.arnewsline.org

If you support us by mail, please note that the Arcadia California Post Office Box is being closed within the next week or so. Temporarily, we are using my address for all incoming mail. If you do not have it, you will hear it at the end of this bulletin or just look me -- WA6ITF -- up on QRZ.com or Buckmaster. I have been at this address since 1979 and have no plans to move.

As to the future, we are searching for a ham who like Andy was, is a Certified Public Accountant with expertise in maintaining an income database as well as the knowledge needed to file our annual federal and state tax reports. Obviously the latter kind of means we need someone who is a California resident for this post. And he or she needs to do this as a volunteer and free of charge for us as Andy did for the last two decades plus. If you know of anyone who fits that description have that person contact me by e-mail to newsline@arnewsline.org

Lastly, I do have Andy's file as to whom donated what and when. Right now I simply do not have the time to do the regular thank-you's that Andy did so eloquently over the years he served as the Support Fund Administrator, but Ill do my best to include them in upcoming newscasts. It was a tradition that Andy started and that we plan to continue in his memory.

And that brings you up to date. Yes, we do need your continued support and the methods for us to accept contributions are back in place.

Once again we thank all of you for your outpouring of support in this very hard time. I think that's what sets Newsline apart from all other groups. Whether its us here producing the newscast or you who are listening, we truly are an extended family held together all of these years through the bonds of a hobby and service known as Amateur Radio.

Thank you, and God Bless. I'm Bill Pasternak, WA6ITF, in Los Angeles.

Now to Don Carlson, KQ6FM, and this weeks newscast.

--

Thank you Bill. Now, Amateur Radio Newsline report number 1688 with a release date of Friday, December 18th 2009 to follow in 5-4-3-2-1.

The following is a QST. China launches its first multi-transponder ham radio satellite, a big sunspot finally appears on the solar disc, Bahrain gives its hams added spectrum and ARISSSAT One to carry student files into space. Find out the details on Amateur Radio Newsline(tm) report number 1688 coming your way right now.

HAM RADIO IN SPACE: CHINA LAUNCHES THE XW-1 HAMSAT

China's first ever amateur radio satellite is now in space. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

AMSAT China reports the bird known as XW-1 was launched at about around 02:30 UTC on Tuesday, December 15th. And not long after liftoff it achieved orbit and its beacon was received by a monitoring station located in Sanya.

Late word is that XW-1 is in a circular orbit with both Apogee and Perigee at 1200 kilometers above the Earth. It sits at an inclination of 105 degrees and has an orbital period of 109 minutes to circle the planet.

XW-1 carries several transponders but the one that will be of interest to most hams is Mode J. This is a VHF to UHF orbital FM Voice Repeater running 1 watt output. It has an uplink on 145.8250 MHz and requiring a Continuous Tone Code Squelch Access Tone of 67.0 Hertz. The Downlink is 435.6750 MHz.

Other transponders support low duty cycle communications such as SSB and Morse. There's also a separate digital transponder as well.

XW-1 was a secondary payload aboard a Chinese booster that went into space from Taiyuan Satellite Launch Center. It placed its cargo into a sun-synchronous orbit about 1200 kilometers high. The primary payload of this launch is the Yaogen-8 Remote Sensing Satellite.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona

--

Details on the new XW-1 satellite are available

RADIO PROPAGATION: BIG NEW SUNSPOT:

Sunspot 1035 is here and its big news. This, because its one of the largest sunspots seen in years.

On Tuesday, December 15th Spaceweather reported that sunspot 1035 was nearly as wide as seven planet Earth's and growing. It said that the fast-growing active region burst into view on December 14th with a magnetic polarity that clearly identifies it as a member of new Solar Cycle 24.

If the expansion continues apace, it could soon become the largest sunspot of the year. Check spaceweather dot com for the latest photos and updates. And lets hope that this sunspot hangs around for a while to bring hams worldwide some long awaited High Frequency DX. (Spaceweather)

**

RESTRUCTURING: BAHRAIN GRANTS NEW OPERATING PRIVILEGES

The Daily DX is reporting that radio amateurs in Bahrain can now operate 50.0 to 50.5 MHz on 6 meters on a primary and exclusive basis, and 50.05 to 52.00 MHz on a secondary basis. The report also adds that they can now operate on additional frequencies on 136 kHz, 1.8 MHz, 7 MHz, 430 MHz and higher bands.

However there is one caveat: Bahrainian amateurs cannot operate on these newly allocated frequencies until their licenses are amended. (Daily DX, OPDX, Southgate, others)

RADIO LAW: RSGB TO CHALLENGE OFCOM OVER BPL

The Radio Society of Great Britain has established a Spectrum Defense Fund to challenge UK telecommunications regulator Ofcom. This over the agency's interpretation of the various Acts and Directives that cover Broad over Powerline or what Europe calls PLT Internet access and the threat that it may pose to amateur radio communications.

According to an RSGB news release, this challenge may take the form of a Judicial Review, but the national society says that i ill await the advice of its lawyers on the direction to take. It also notes that the cost of a Judicial Review is likely to be in excess of ï¿½75,000 United Kingdom Pounds and that there is no guarantee of success.

If this approach sounds a bit familiar that's because it quite similar to the court case brought here in the United States against the FCC. In that one the court ruled that the ARRL was correct and ordered the FCC to reassess its BPL policy and rules. (GB2RS)

**

RADIO LAW: CB WEBSITE WARNS TRUCKERS TO STAY OUT OF 10 METERS

A CB website is warning trucker C-B'ers and Freebanders to keep out of the 10 meter ham band. The home page post on LiveCBRadio.com tells readers that mobile ham operators all over the United States are now observing and reporting truckers talking above 28 MHz. The website notes that the hams will not just report the truck and it's company to the FCC, but that they often include video and audio as evidence with their complaints.

The website goes on to note that the FCC contacts the trucking company warning them of potential fines. It says that already there have been cases where both truckers and trucking companies have been fined.

The website warns readers, especially truckers with modified export type C-B sets that what is called C-B channel 19 High is actually 28.085 MHz. When someone with one of these illegal export radios tunes to 19 High he or she is transmitting full carrier A-M in the Morse only area of 10 meters.

The website warns CB'ers and Freebanders that is best to stay within the common C-B channels from 1 to 40. It notes that trucker CB'ers using the 19 High frequency might think that they are gaining extra privacy. In reality what they are doing is drawing national attention from the United States ham radio community and through them from the FCC. (QRZ, others)

**

RESCUE RADIO: FCC AND FEMA ESTABLISH CMAS STANDARD

Two federal agencies have established a mobile communications emergency public warning technology standard. The Federal Emergency Management Agency and the Federal Communications Commission announced the adoption of design specifications for a gateway interface enabling wireless carriers to provide emergency alerts via cell phones and mobile devices.

The intended Commercial Mobile Alert System--CMAS--project, part of the Integrated Public Alert and Warning System. It will be able to provide the President of the United States a means by which to notify Americans of national emergencies. The system would also be available for Amber alerts and regional warnings in the form of 90-character text messages.

The announcement also marks the beginning of the 28-month period, mandated by the FCC in August 2008, for commercial mobile service providers who have elected to participate in the CMAS design specs to develop, test and deploy the system. They must also be in the position to deliver mobile alerts to the public by 2012.

Wireless carriers participating in the CMAS will relay authorized text-based alerts to subscribers. They will also be able to transmit vibration and audio signals for those subscribers with disabilities. (TVB)

RADIO HONORS: ARRL SEEKS INTERNATIONAL HUMANITARIAN AWARD NOMINEES

The ARRL is seeking nominations for one of its most prestigious honors. Jeremy Boot, G4NJH, has the details:

--

Nominations are open for the 2009 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through amateur radio.

The League established the annual prize to recognize amateur radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

Nominations should include a summary of the nominee's actions that qualify the individual or individuals for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. Nominations should include the names and addresses of all references. Details appear on the ARRL website, www.arrl.org, where you can search for humanitarian award.

I'm Jeremy Boot, G4NJH.

--

The deadline to nominate an amateur or group of amateurs for the 2009 ARRL International Humanitarian Award is December 31st. (ARRL)

**

NAMES IN THE NEWS: SPECIAL RECOGNITION FOR ZS5MU

South African Radio League Councilor Francois Botha, ZS6BUU, has presented Alastair Campbell, ZS5MU, with a special certificate. This recognizing the support he and his wife Davina, ZS5GC, have been giving the yachting fraternity for the past 30 years. The citation states that ZS5MU supported by ZS5GC has operated the South African Maritime Mobile Net serving the yachting community at sea for 30 years. (SARL)

**

NAMES IN THE NEWS: VE3CT APPOINTED TO CANADIAN AMATEUR RADIO HALL OF FAME

And congratulations go out to Croft Taylor, VE3CT, of Kanata, Ontario, Canada on his appointment to Canadian Amateur Radio Hall of Fame. Taylor was awarded this honor by the Hall's Board of Trustees who have announced that it will be presented to him at a ceremony to be held in in Ottawa in the spring of 2010. Appointments to the Canadian Amateur Radio Hall of Fame are made to recognize a radio amateur for outstanding achievement in sustained service to amateur radio in that nation or to all of amateur radio at large. (RAC)

**

THE SOCIAL SCENE: INTERNATIONAL DX CONVENTION 2010

Turning to the 2010 ham radio social scene, word that the 61st Annual International DX Convention takes place next April 16th, 17th, 18th at the Holiday Inn Hotel and Conference Center, Visalia, California.

The International DX Convention is the world's foremost gathering that attracts DX'ers and aspiring DX'ers from around the world. The show attracts the biggest of the big-guns from the African continent, from Asia, Europe, Oceania and of coarse both North and South America. Some are there to tell how they have been able to meet and beat the challenge of DXing in an ever expanding hobby. Others will tell of the challenges of operating

from places far removed from the comfort of their home stations.

The 2010 event will be sponsored by the Southern California DX Club. Pre-registration began on December 1st. More information about the show is on-line at www.dxconvention.org. (IDXC)

**

BREAK 2

Wishing each of you the best of holiday greetings, this is ham radio news for today's radio amateur. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

WORLDBEAT: CZECH INTELLIGENCE SAYS SADDAM HUSSEIN PLANNED TO ATTACK RADIO FREE EUROPE

You may find this hard to believe, but the Iraq's former leader planned to attack and destroy Radio Free Europe. The plot was recently made public by Media Network and the Czech government. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

According to Andy Sennitt at Media Network the late Iraqi dictator Saddam Hussein ordered his secret agents to attack the Prague headquarters of US run Radio Free Europe and Radio Liberty. This, to end broadcasting to Iraq.

Sennitt quotes Czech intelligence service spokesman Jan Subert who said that the attack was ordered by the then Iraqi leader in 2000. Also that Iraqi intelligence agents planned to use numerous weapons including rocket propelled grenades, rifles and submachine guns in the attack. Subert said that the weapons had been stockpiled for the attack after they were brought into the country in an Iraqi diplomatic car.

It was not known when the attack was due to take place but Subert said that Czech intelligence discovered the plot and the Iraqis submitted the weapons to Czech authorities in 2003. The plan was for the attack to take place from the window of a nearby flat that the Iraqis planned to rent as an office for a fake company.

I'm Jim Davis, W2JKD.

--

The report seems to indicate that good intelligence by Czech national security foiled Saddam Hussein's plot. (Media Network)

**

SCIENCE CORNER: RENEWABLE ENERGY USE CLIMBS

Americans used more solar, nuclear, bio-mass and wind energy in 2008 than they did in 2007. This, according to the most recent energy flow charts released by the Lawrence Livermore National Laboratory.

The study also found that the nation also used less coal and petroleum during the same time frame and only slightly increased its natural gas consumption. Geothermal energy use remained the same. (Science Daily)

**

EMERGING TECHNOLOGY: APPLE REFUSES WARRANTY ON SMOKERS COMPUTERS

If you smoke and own an Apple computer, the company might not fix it under warranty. This is because Apple says it may void the warranty should you need to bring a smoke exposed computer in for repair.

The Tech Blog at Yahoo notes that in at least two instances in different parts of the country, Apple has voided the warranty and refused to provide repair service on computers exposed to environments where cigarette smoke has been present. Calling cigarette smoke residue inside a computer a health risk and a biohazard, in both cases Apple customers have been denied service despite having time left on a valid warranty.

Apple is standing by the decisions, saying that repair centers have the authority to make decisions like this on their own. It cites OSHA rules that include nicotine in a list of hazardous substances that could damage the health of someone exposed to it.

Apple isn't formally commenting on the issue or responding to media requests for comment, namely regarding whether there's a threshold for cigarette smoke exposure beyond which a computer won't be serviced. No word on whether other computer vendors have the same or similar policies. More is at http://tech.yahoo.com/blogs/null/156203 (Yahoo)

**

HAM RADIO IN SPACE: ARISSAT ONE TO CARRY STUDENT FILES

School students world-wide are being invited to fly a computer file on ARISSAT One, the educational satellite that was originally called Suitsat 2.

ARISSAT One will launch sometime in 2010 and like its predecessor Suitsat One it will again transmit messages recorded by students. But in addition, teachers and their students are invited to fly a file aboard this amateur radio satellite. This on a memory flash drive to be included on the bird.

What a teacher or student wants to fly is at their own discretion, but there are some suggestions from the ARISS team. These include things the student has prepared such as a paper or a study done on a science, technology, engineering or math topic. Other possibilities include, a drawing of space craft or a schematic, a journal kept on an educational topic, a story or news article about a science subject and the like.

Dave Jordan, AA4KN, will take delivery of these files and copy them onto a flash drive memory stick, plus make them available on the web for anyone to see. He will look at all of them for content to make certain that they are appropriate to student viewing.

Files can be in any language as long as an English translation is also included. Only JPG or PDF files will be accepted. Please e-mail files to aa4kn (at) amsat (dot) org. (ON4WF)

**

HAM RADIO NEAR SPACE: ANOTHER SUCCESSFUL ARISS TRAINING CONTACT

Another highly successful simulated ARISS contact took place on Tuesday, December 8th. This. between Deer Creek Elementary School in Bailey, Colorado and astronaut Tracy Caldwell, KF5DBF at the Johnson Space Center in Houston Texas.

As in the past, this session was a terrestrial-based amateur radio contact using Amateur Radio on the International Space Station equivalent equipment. These QSO's help astronauts learn the ins and outs of operating ham radio in space without having to leave the ground. For the school it means that its kids still get a chance to talk with a real live astronaut.

Reports are that the Deer Creek school enjoyed its session so much that it plans to apply for a contact with an actual on-orbit astronaut. (ANS)

**

THE FINAL FRONTIER: VIRGIN GALACTIC SPACESHIP TWO UNVEILED

Virgin Galactic has unveiled its second sub-orbital spacecraft. The unveiling of the VSS Enterprise took place on Tuesday evening, December 8th at the Mojave Air and Space Port in California's high desert.

Attached to its mother ship, the vehicle better known as SpaceShipTwo is expected to be the first commercial spacecraft when it enters service with Virgin Galactic. Constructed by Scaled Composites under the guidance of legendary aircraft designer Burt Rutan, the carbon composite spacecraft uses the same fuselage as its mother ship, the VMS Eve.

After a year of rigorous testing, VMS Eve completed flight testing earlier this fall. Rutan didn't specify when flight testing for SpaceShipTwo would begin, though it is expected to start early next year.

Sub-orbital passenger flights could start as early as 2011 from Virgin Galactic's space port in New Mexico which is currently under construction. Tickets for the early adopters are $200,000 for a training program culminating with the ride into space. (Virgin Galactic)

**

ON THE AIR: A FERRY GOOD IDEA

On the air, listen out for special event call GB2EI standing for Great Britain to Ireland is on the air to celebrate the reintroduction of the

Swansea to Cork Ferry service. The original service commenced in 1896. A similar station, EI2GBW, will also be operating from Cork. Both special event callsigns will be operational until March 31st of 2010. QSL details are available at qrz.com. (IRTS)

**

ON THE AIR: COMMEMORATING THE 5th EAST ASIAN GAMES

Members of the Hong Kong Amateur Radio Communications Association were on the air through December 13th as VR2EAG. This, to celebrate 5th East Asian Games that were hosted there. If you made contact with VR2EAG please QSL to the Hong Kong Amateur Radio Communications Association, GPO Box 7191, Hong Kong. (HKARC)

**

ON THE AIR: GERMAN HAMS CELEBRATE THE ANTARCTIC PROGRAM

And for the final time, the German special event station DR09ANT is on the air to celebrate the Worldwide Antarctic Program. It has is operational through December 31st using all modes on all bands. QSLs will be sent via the bureau automatically. (DX News)

**

DX

In D-X, The DX World of Ham Radio web page is conducting a online survey to see which expedition warrants the title DXpedition of the Year 2009. Special engraved trophies will be awarded to the top three chosen. To participate in the survey, go to http://dx-hamspirit.com.

Also word that SM1TDE plans an operation from Gambia from through December 31st. No other information is available at airtime. QSL as directed on the air.

W4JJ has hit the airwaves as T6LC from the Afghanistan province of Paktia. He is active using CW or SSB on 20 and 40 meters usually from 1430 to 1800 UTC. His QSL cards are handled by K4MJN.

And Angolan station CT1ITZ stroke D2CQ had planned to go QRT by the end of November but his stay was extended until December 27th. He operates SSB only and his QSL manager is CT1IUA.

Lastly, an international group of operators will be active as 3W6C from Con Co Island Vietnam, from April 10th to the 18th, 2010 and there is an open spot for one more operator. If you or any members of your organization would like to be considered a candidate for this open spot on our crew, please send details about your background and DX'ing experience to Hans-Peter by e-mail to hb9bxe (at) 3w6c (dot) qrv (dot) ch. He can supply you further details about expenses, travel, and all other aspects of the operation

(Above from various DX news sources)

THAT FINAL ITEM: IRC'S BEING REPLACED

And finally this week, its well known that International Reply Coupons or IRC's are used by many has to help with postal costs. But IRC's do not last forever as we hear from Jason Daniels, VK2LAW:

--

IRCs - important information. Please be aware that the batch of IRCs that have been used for the last
few years will no longer be valid at the post office. 31st December 2009 is the dead line for the current style but it's best to stop using them ASAP to allow transit time. The new one has the expiry date of 31st December 2013, just above the 'UPU' logo at your right hand side.

I'm Jason Daniels, VK2LAW

--

If you have old IRC's get them exchanged before their value is gone. (WIA News)

WTARS Helps a Member Return To Airwaves
By Lee Towater, KF4NZV
E-mail: kf4nzv@arrl.net

The West Tennessee Amateur Radio Society < www.wtars.org > is pleased to announce the return of Gary King, W4WKZ, to the amateur radio waves. Gary, who is legally blind, has been off the radio for almost two years. Gary had been a very active part of the amateur radio community. He was an active participant in the daily weather reporting of conditions from his home in Medon, TN to the National Weather Service in Memphis, TN. He has not been able to make reports via ham radio due to damage to his antenna system nearly two years ago.
The story began back in November 2008 when a long time friend, Bob Alper, W6KT, came to visit Gary. He noticed the damage to Gary's 60 foot tower and antenna array. Gary, not being able to make the repairs himself, was left with no way to use his ham radio equipment. Bob quickly got in contact with Philip Julian, KG4NVN, the treasurer of West Tennessee Amateur Society (WTARS) here in Jackson. Bob and Philip worked together to make a plan for repairing Gary's tower and antenna system.
During the summer heat of July 2009, a group of WTARS members assembled at Gary's home to begin the repair project. The group mixed and poured more than 880 pounds of concrete, by hand in a 5 gallon bucket, to make a new base for the existing tower. During the next four months a new antenna system and other tower installation items were purchased.
On December 5, 2009, the group reassembled at Gary's home to complete the repairs. Philip, KG4NVN, contacted local crane owner and operator Randy Rushing of Rushing's Crane Service. Randy happily agreed to bring his equipment out for the installation of the new antennas. All of Randy's expenses were donated to the project which

helped tremendously due to the fact WTARS was operating basically on a $0 budget for this project. Randy is known throughout the community for his willingness to serve others during local emergencies and disasters. Randy is a part of the Baptist Disaster Relief Ministry. The group installed a Diamond X50 dual band vertical. This antenna will give Gary the coverage he needs to reach the local repeaters and ample simplex coverage. They also installed a home brew HF multi-band wire antenna built by Randy Bennett, W4RFB. The wire antenna was installed on a pulley system allowing for easy lowering and raising, eliminating the need to climb the tower, to tune or make adjustments as needed.
At the end of the day Gary was back on the air. WTARS has given Gary back the joys he once had in the amateur radio hobby. WTARS would like to give a special thanks to Philip Julian, KG4NVN, for taking the lead on this project. Philip spent a countless number of hours in preparation for this project. We also give a special thanks to Randy Rushing of Rushing's Crane Service in Jackson, TN for providing the bucket crane to complete the installation.

>From the Editor: The WTARS example above shows what a dedicated club can do to assist fellow members and Hams. Even a quick, visual inspection of an antenna system can save life and property. Maybe there are hams around your club who could greatly benefit from simple assistance so that they may fully enjoy all that Ham Radio has to offer?

Amateur Radio Clubs make a difference!

When it comes to reaching radio amateurs there is no stronger link than to the hundreds of Amateur Radio clubs across the country. Now as the application period for ARRL Foundation Scholarships is open (until February 1, 2010), club newsletters and email bulletins to club members are an effective and important tool to remind young hams that there are more than 50 scholarships to be awarded in the spring of 2010.

If your club membership has high schools seniors and adult hams pursuing continuing education, remind them that the application period for the 2010 scholarship awards closes promptly on February 1, 2010. All the information about ARRL Foundation Scholarships, including application instructions and forms, can be found on the web at www.arrl.org/arrlf. Candidates should review the descriptions of all the scholarships and apply only those for which they qualify*. Note that a recent transcript is required with all applications.

Another vital role your club can play in the scholarship program is to encourage club members -- and the club itself - to make

contributions to the ARRL Foundation Scholarship Fund. Contributions in any amount to the ARRL Foundation are an important source of revenue to strengthen the scholarship program. New $1000 scholarships are added every year and your club might think about sponsoring one with an annual donation or by endowing an award with a larger gift.

Note: The William R. Goldfarb Memorial Scholarship is open only to high school seniors who must complete the application for that award and include a FAFSA or SAR based on the most recent family financial information, along with a full high school transcript.

The ARRL Foundation is an IRS-designated 501(c)(3) organization holding tax id
23-7325472. Contributions to the ARRL Foundation are tax-deductible to the full extent of the law.

Hamvention organizers have announced that the theme for the Dayton Hamvention 2010 will be "Amateur Radio Clubs Worldwide: The Lifeline." The event will take place May 14 -- 16, 2010 at the HARA Complex in Dayton, Ohio.
< http://www.hamvention.org/index.php >

If you have never been to "Dayton" it is worth the effort to visit the grand-daddy of all hamfests.

Many clubs coordinate travel and lodging for Hamvention so that members travel together and enjoy the event with familiar friends. If your club is considering an organized caravan or other group trip to the event now is the time to make your reservations and start planning your trip. Hotel rooms disappear quickly for this well attended extravaganza.

ARRL Expo will be exhibited in the Ballarena hall. We hope to meet and greet many ARRL members that weekend. See you there.

Gympie Amateur Radio Club
Geoff Emery vk4zpp

It was mentioned in last week's news that at least 2 radio clubs had received funding in the Volunteer Grant scheme. Well the good news is that, from my viewing of the web page that Redcliffe, Gympie and Maryborough clubs will all benefit with a total of over $11,000 going into the support of the hobby. Also the Historical Wireless Association, s.e. Qld Branch has been successful in receiving a grant of another $1,500. Also at least 2 community radio stations were grant recipients.

http://www.fahcsia.gov.au/sa/volunteers/funding/vg2009/Pages/qld.aspx

With 4 clubs in VK4 being successful and looking at the list of grant recipients, it is obvious that other state and national bodies have made local branches aware that this program was available. This scheme was announced in Q-News in 2009 so maybe we need to get the message out more widely for our centenary year.

As this is the last broadcast before the Christmas holiday, to all the news and broadcast team, to all members and listeners and readers of the text edition may you have the very best that the season can provide and

a big thank you for your participation and interest over the past year.

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

The club held its Xmas party last Saturday at Rotary Park, Woorum, on Bribie Island. Although the roll-up was small, the afternoon was extremely pleasant, and it was good to meet the "girls", wives and partners of the other members. Jayn, VK4FJAY, the wife of Peter VK4EA, had the whole group if fits of laughter with her jokes. Good fellowship was enjoyed by all until about 3 pm when it was time to return home.

John VK4BZ was ordained as a Minister of the Uniting Church last week and also re-joined the Australia Army as an Army Chaplin. John has been posted to the Second Battalion located in Townsville and will be moving there about the middle of January 2010. John has said that he intends to make use of his new second hand Yaesu transceiver and a good morse key to maintain his Thursday night CW practice.

There is a rumour that John will be overseas soon but will be a regular visitor back in Brisbane until this occurs.

The club wishes to congratulate John on his new appointment and is now hopeful that with closer contact with the Big Man in the Sky, that there will be even more sunspots on the way.

Shaun VK4FY, advised last Monday's night meeting that the IRLP and ECHOLINK on the Redcliffe 2 metre repeater will be off the air for about a week and should be up and working again just before Christmas.

Club President David, VK4DC, thanked all club members for the support given to the club for the last 12 months and then outlined some of events for the club for the next year which includes, working bee to re-line the club caravan, re-sighting of the club's HF beam antenna, organising the John Moyle field day and JOTA.

The club will be open throughout Christmas and New Year, with the next formal club meeting on Monday night, 11 January 2010.

Charlie VK4YZ, provided details of the costings of two portable sunshades that the club will be purchasing early in 2010, with the help of a $5000 grant from the Federal Government. The shades will be purchased from a local supplier and will include the club colours on the roof of the shade. The larger shade will come with side walls and both will be used for all club events in the future.

Well it is almost time to go for this week, so on behalf of the Redcliffe Club the best wishes for a very Merry Christmas and a happy New Year for 2010.

Until next time, I'm Ray from the Redcliffe club and you are listening to QNEWS from VK4WIA

GREETINGS ! THIS IS DON VK4FNQA, WITH NEWS FROM A PRETTY HOT AND HUMID NORTH QUEENSLAND.

WELL, WE ARE ALL HAVING A REST TODAY AFTER LAST WEEKENDS TARC CHRISTMAS PARTY AND MONSTER AUCTION. SOME OF US HAVE BROUGHT THE MONSTERS WE TOOK HOME FROM THE AUCTION BACK TO LIFE AND THERE WAS ALSO GREAT FUN HAD WITH THE MYSTERY PRESSIE AUCTION. THE COOKS DIDN'T LET US DOWN EITHER, PROVIDING 60 PLUS PARTY GOERS WITH GASTRONOMIC DELIGHTS. THANKS GO OUT TO TONY VK4TJS WHO PROVIDED US WITH A GREAT VENUE AND PERFECT WEATHER AT THE SATELLITE DISH CITY.

ANYWAY, IN THE SPIRIT OF THE SEASON.. THE MEMBERS AND COMMITTEE OF THE TOWNSVILLE AMATEUR RADIO CLUB INC WISH EVERYONE CONNECTED WITH AMATEUR RADIO A VERY MERRY CHRISTMAS AND A HEALTHY, HAPPY, PROSPEROUS AND SAFE 2010 !

THE MAIN ACTIVITY THIS WEEK ON RADIO IN TOWNSVILLE WILL BE THE ANN RENTON MEMORIAL LADIES NET WHICH HAPPENS THIS TUESDAY EVENING FROM 7-30PM ON THE TOWNSVILLE VHF REPEATER. THE NET IS ONE OF THE FRIENDLIEST ONES AROUND AND IS OPEN TO YOUNG AND OLD, YL OR OM, AND IS A GOLDEN OPPORTUNITY FOR ANYONE WHO NEEDS PRACTICE ON AIR TO GO ONTO THE NET AS SECOND OPERATOR. SO JOIN IN TO THIS TUESDAY EVENINGS NET, THE LAST ONE FOR 2009.

WELL, THATS ALL FOR THIS WEEK FROM TROPICAL PARADISE. THE MOVING OF THE MATCAVE TO THE NEW QTH IS GOING WELL AND TODAY'S QNEWS WILL BE LAST FROM THE OLD MATCAVE RADIO SHACK OF 34 YEARS. HI HI

THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC, AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

AUSTRALIA FOR WEEK COMMENCING DEC 20 2009

VOLUNTEER GRANTS.

Summerland have found out that their grant, which we mentioned last week,
actually is exactly $4889.00, which is what the club put in for in their
application.

The mail advice and deposit to Summerland's account has not been received
yet, however, all good things come to those who wait, so it's said.

Watch this space......

Australia introduces web filters

Some internet users are deeply opposed to web "censorship"

Australia intends to introduce filters which will ban access to websites
containing criminal content.

The banned sites will be selected by an independent classification body guided by complaints from the public, said Communications Minister Stephen Conroy.

A seven month trial in conjunction with internet service providers found the technology behind the filter to be 100% effective.

However, there has been opposition from some internet users.

Mr Conroy said the filters included optional extras.

The filter laws will be introduced in parliament in August 2010 and will take a year to implement.

Although a noble attempt at cleaning up the web, lets hope this does not lead to the old ham radio "packet police" days where even this news would be stopped or held up on various sites/routes around VK.

A commemorative station for Australia's worst ever natural disaster

On the anniversary of Victoria's Black Saturday bushfires, the Yarra Valley Amateur Radio Group will be setting up a field station VI3KIAH at Kinglake, one of the worst affected areas in the bushfires.

Jim Linton VK3 picks up the story.

"This commemorative callsign has the suffix KIAH, an Aboriginal word meaning 'beautiful place' or 'from a beautiful place'.

The purpose of the amateur radio activity is to acknowledge the efforts of all who fought and were involved the Black Saturday fires on the 7th of February this year, and the services provided by radio amateurs.

VI3KIAH will be at the Frank Thompson Reserve Kinglake 2pm to 8pm local time on Sunday the 7th of February.

It's first 173 contacts will qualify for a "From the Black" QSL card - the significance of 173 is that number of people died in the disaster.

On the day VI3KIAH will be operating both VHF and HF from the club's new emergency communications caravan that has replaced the vehicle destroyed by fire at Healesville.

The Yarra Valley Amateur Group invites those who were involved in the Black Saturday disaster and others to visit the station at Kinglake and to look for it on air.

Well done to the group for its planning of this respectful commemorative activity to occur on a day when all Victorians are asked to pause for a minute's silence for the first anniversary of the Black Saturday bushfire disaster.

I'm Jim Linton VK3PC and you're listening to VK1WIA.

WIA AND FESTIVE SEASON

This is Michael Owen, VK3KI and this is the last broadcast before Christmas.

First, let me tell you of the arrangements this year for the WIA office.

The WIA office will close on Wednesday 23 December 2009 and reopen on Monday 18 January 2010.

During that time no examinations will be processed or nor book orders dispatched.

Book orders placed after Monday 21 December are unlikely to be dispatched before the office reopens in January.

Orders for exam packs received before 23 December will be dispatched before Christmas.

Any urgent matters should be raised in the first instance by email to secretary@wia.org.au.

Next, as we look back on 2009 it has been a very busy year, and the Board would like to thank all those who did so much for amateur radio during the year, with our examination system, all the trainers and all the Assessors and Learning Facilitators, those who contributed to the broadcasts, the Publications Committee and those who contribute for the magazine Amateur Radio and the Call Book, those who conducted the contests and awards, to the many who have responded to our requests for opinions, those who handle the QSLs, to so many who contribute to our interest in so many ways, to our staff at the office and the volunteers who help them, we say a sincere thank you.

As this year ends, we look forward to a very special year in 2010, the centenary of organised amateur radio in Australia and the centenary of the WIA.

And to all of you who have supported the WIA by your membership, we say

thank you and I wish you all the best for the festive season and the New Year.

To those of you who are not members of the WIA, or have allowed your membership to lapse, please consider joining or rejoining the WIA and supporting the amateur's voice in Australia.

To everyone may I on behalf of the Directors, the Secretary and the Treasurer and for myself, wish you a very happy Christmas.

HAMS ACROSS AUSTRALIA.

SARC BBQ SUNDAY.
On the last Sunday before Christmas, Summerland Amateur Radio Club will have a BBQ.

No particular reason, just for the sake of it.

At the Clubrooms.

Lunchtime onwards, bring some other stuff if you wish.

So get along, make it a good wrap for 2009.

A "Centenary Dinner" will be held at the Wyong Bowling Club, Saturday 27 February 2010 commencing at 1800 hrs.

This will be a great opportunity to catch up with old friends on the evening before Wyong's big Centenary Field Day.

A two course buffet dinner is being provided at $25.00. Bookings essential to Brian VK2WBK.

Ph 0418 659 043.

Central Coast Amateur Radio Club will be conducting the Centenary Field Day at Wyong Race Course on Sunday 28 Feb commencing at 0900 hrs. Most major retailers and wholesalers will be present with the usual flea market and other events occurring.

Plenty of things to interest the amateur radio enthusiast and their family.

Call 02 4340 2500 for information.

Update on the Centre Victoria RadioFest No. 3

All of the elements that make up the biggest amateur radio event in Victoria are coming together nicely.

The following traders are confirmed: Strictly Ham, Vertex Standard Australia, G&C Communications, PK Loops, TTS Systems, Hamak Electrical Industries and NBS Antennas & Masts.

The popular Club Corner precinct has the centenary celebrating WIA, and eager to be part of it too is Australia's newest radio group, the Macedon Ranges Amateur Radio Club.

Also there will be the CW Operators' QRP Club, Historical Radio Society of Australia, the Royal Australian Corp of Signals Museum and the Bendigo District Astronomical Society. More space is available for clubs wanting to mount a display or use it as an opportunity to recruit new members.

The mini-lecture program has presentations on Amateur Radio heritage focussing on VK3, The end of Amateur Radio in the digital consumer age, the VK9NA VHF/UHF/Microwave DXpedition, and Amateur Radio goes to school.

For more details including information about second hand table and car-boot sales bookings check out the website, radiofest.amateurradio.com.au

A team of Amateur Radio Victoria and Central Goldfields Amateur Radio Club volunteers are ready to make it happen!

See you at the Centre Victoria RadioFest, Kyneton Racecourse, Sunday the 14th of February.

I'm Bruce Lees VK3FFF and you're listening to VK1WIA.

BUNYA MOUNTAINS AND DISTRICT AMCOM

Hi to all, I'm Neil VK4NF representing the Bunya Mts & District Amcom Inc. formally Dalby & District ARC.

We have a date claimer, Saturday the 30th January 2010.

We are holding a Ham & wine HamFest in the Maclagan hall in down town Maclagan from 0900 to 1600hrs on this day. So we invite you to come to a HamFest towards the west and join in the fun. Table bookings are just $10 each and stall holders will be allowed in after 0700hrs to set up.

For more info, or to receive a flyer with the details, please send an Email to myself at holmzie@bigpond.com or Ricky VK4NRL at Ricklammas@optusnet.com.au

Be there or be square we would love to see you there.

The proceeds from the day will be put towards the badly needed upgrade of our repeater site on the Bunya Mts.

So put the date in your diaries, Saturday the 30th January 2010

Remember it is towards the west, and not way out west, being about a 50 minute drive north west of Toowoomba.

Regards to all and as Graham would say, walk softly.

VK6

Hills Amateur Radio Group 27/02/10 2pm

The venue is the HARG club rooms on the corner of Sanderson and Brady Rds Lesmurdie. Sellers set up from 12pm buyers admitted from 2pm.

To reserve a $5 table call Marty Martin
0447 382 963 or

HOME OF THE GOOD GUYS

SPECIAL RECOGNITION FOR TWO AMATEURS

SARL Councillor Francois Botha, ZS6BUU, has presented Alastair Campbell, ZS5MU, with a framed certificate recognizing the support he and his wife Davina have been giving the yachting fraternity for the past 30 years.

The citation reads:

"SPECIAL RECOGNITION TO ALASTAIR CAMPBELL ZS5MU who, supported by Davina ZS5GC ,has operated the South African Maritime Mobile Net serving the yachting community at sea for 30 years".

Croft Taylor VE3CT Appointed to Canadian Amateur Radio Hall of Fame

The Board of Trustees of the Canadian Amateur Radio Hall of Fame has appointed VE3CT of Ontario, to the Hall of Fame for 2009. Croft will receive his award at a presentation to be held in Ottawa later in the spring at which time a summary of his contributions will be published.

Details will also be included in the RAC website.

Appointments to the CANADIAN Hall of Fame are made to recognize a radio amateur for outstanding achievement for sustained service to amateur radio in Canada or amateur radio at large.

ZL3 Radio Buildathon

The 3rd ZL3 Radio Buildathon will be held on Saturday January 30th in
Christchurch and hams will build a ZL3 Pixie Twins kit.

Youngsters and budding hams 8 - 80 are most welcome.
There's a kit for them too!

After building your fun 80m QRP CW transceiver you can enter two
competitions.

One is for the best DX CW contact within NZ using a ZL3 Pixie Twin.

The other is for the funniest housed unit.

Let your imagination run wild!

A superb 40 m QRP CW kit transceiver from smallwonderlabs.com USA will be
awarded to each of the winners.

Register your interest now WITH David zl3dws

INTERNATIONAL NEWS With thanks to RSGB, Southgate AR Club, the ARRL,
Amateur Radio Newsline, NZART and the WW sources of the WIA.

Students and teachers invited to 'fly a file' on ARISsat-1

Next year an Amateur Radio satellite will once again be hand launched from
the International Space Station. It will be called ARISSat-1.

ARISSat-1 will again transmit messages recorded by students.

Moreover, teachers and students are invited to fly a file aboard this
amateur radio satellite.

The ARISSat-1 Team wishes to include on their new satellite a memory stick
of files prepared by students. This should be a jpg or pdf of things the
student has prepared such as a paper or a study done on a science,
technology, engineering or math topic, a drawing of space craft or a

schematic, a photo of the class doing a hands-on activity -- that type of thing.

Having the student's work be a part of ARISSat-1 means the student is a part of the satellite project and along for the spacewalk and deployment of ARISSat-1.

Details google ARISSat-1

(sourced to Gaston Bertels - ON4WF ARISS Chairman).

Radio amateurs in Bahrain gain new frequencies

Reports on Southgate say 'The Daily DX' is reporting that radio amateurs in Bahrain can now operate on 6 meters (50.0-50.5 MHz on a primary and exclusive basis, and 50.05-52.00 MHz on a secondary basis).

The report also adds that they can now operate on additional frequencies on 136 kHz, 1.8 MHz, 7 MHz, 430 MHz and higher bands.

However, they cannot operate on these newly allocated frequencies until their licenses are amended.

Pegasus High Altitude Balloon Project

Monday December 14 saw the launch of Pegasus High Altitude Balloon (HAB) from Cambridge in the UK.

Because of restrictions imposed by the UK Amateur Radio licence it was not possible to use an Amateur transmitter on the balloon, so instead a GSM cell-phone was fitted along with a Licence Exempt 434.075 MHz 10 mW transmitter running 50-baud RTTY.

The GSM phone doesn't work above about 3000 feet, however, it is extremely reliable once the payload has landed while the Licence Exempt transmitter allows the payload to be tracked throughout the flight.

Further information on the project is at www.pegasushabproject.org.uk/

==========

NEWS FROM ARNEWSLINE

IARU SAYS TO GET READY FOR WRC-12

The next World Radiocommunications Conference takes place in January of

2012 and ham radio is making ready to face any challenges that it might

bring to the service.

The International Amateur Radio Union's Secretary is Rod Stafford, W6ROD. He says that every IARU member society capable of doing so, should take the initiative to be in contact with their own telecommunications administration and let the it know what the Union's position is on those

agenda items that influence the amateur radio service.

The most significant of these so far are the implementation of the radiolocation service in the range 30 to 300 MHz; the possible allocations in the range 3 to 50 MHz to the radiolocation service for oceanographic

radar applications and the effect of emissions from short-range devices.

Also likely to be discussed is a ham radio allocation of about 15 kHz in parts of the band from 415 to 526.5 kHz. This, on a secondary basis and taking into account the need to protect existing services.

INDIA GRANTS HAMS 30 METERS

Hams in India have received government permission to permanently operate on 30 meters on a secondary basis, though not all details of the new allocation are yet known.

India's hams had previously been granted experimental access to 30 meters for a one-month period between August 31st and September 30th of 2007. At that time, A1A and J3E modes with 100 watts maximum were allowed between 10.100 and 10.150 MHz.

VU2GMN has been in contact with the authorities in Delhi. He says that he is trying to clarify if SSB will be included with the permanent allocation. Australia is believed to be the only other major country allowing SSB on 10 MHz for amateur radio use in ITU Region 3.

VIBROPLEX CHANGING OWNERSHIP

A famed Morse key manufacturer is changing hands. Our CW man, Frank Haas, KB4T, has the details:

Vibroplex will have a new owner effective December 21st, 2009. Scott Robbins, W4PA, of Knoxville, Tennessee, has agreed to buy Amateur Radio's oldest manufacturer from present owner Mitch Mitchell of Mobile, Alabama who recently decided to retire. In a report detailed at arrl.org, Robbins says he will leave his post as Amateur Radio Product Manager at TenTec in Mid-December to take over and relocate Vibroplex.

The 800 number, web site and email contacts will remain the same. For the Amateur Radio Newsline, I'm Frank Haas KB4T in Florida.

The bottom line: Frank says that the change of ownership means that the Vibroplex side-swiper should be with us for a long time to come.

WESTOZDX - IOTA OC 211 Activation

G'Day, I'm Wally, VK6YS and this is a short note from the WestOzDx Group to advise any IOTA island chasers, and any other interested parties of course, know that the group will be activating OC-211 from Pigeon Island in the Wallabi group of Houtmans Abrolhos off Geraldton, over the New Year weekend.

Nigel, VK6NI, Bruce, KD6WW, and myself VK6YS, will be operating from Thursday 31st around 0400 UTC through to Monday 4th January around 0200

UTC, with up to three stations on air, propagation permitting of course, and we will be active from 40 through to 10 metres, and also listening on 6 just in case.

This is our eighth Western Australian IOTA activation and details of this and others we have activated can be seen on our web page, www.westozdx.net, and which we should be able to update with pics and information live this time from the Abrolhos, because we should have wireless coverage with an external gain antenna.

Looking forward to working lots of VK's. Cheers from the West

Last week I made mention of "log book of the world" which drew a query from a new member of our community as to what LOTW was.

Well the LoTW system is a repository of log records submitted by amateurs from around the world. When both participants in a QSO submit matching QSO records to LoTW, the result is a QSL that can be used for ARRL

award credit. While US amateurs do not need to be members of the ARRL to use LoTW, only members can use LoTW to apply for ARRL awards, such as DXCC and Worked All States (WAS). Some awards, like the Triple Play Award, only use LoTW credits instead of traditional QSL cards (foreign amateurs do not need to be ARRL members to apply for ARRL awards).

61st International DX Convention

The 61st annual International DX Convention sponsored by the Southern California DX Club will be held in April next year and pre-registration began December 1st.

The International DX Convention is the world's foremost DX convention.

If you are a DXer or interested in any aspect of ham radio, you need to be at Visalia. Top DX operators from around the world will be there. Meet the big guns from the US, Asia, Europe, Africa and Oceania. Meet the people on the other side of the mike or key. Shake hands with the person you have had that sked with for the past 10 years. Renew friendships.

Visit the manufacturers' midway where you can talk to the people who design and use the latest and best equipment.

Stop by their Web site for more details at:

dxconvention.org

AWARDS

NEW HF LEARNING AWARD FROM QCWA CHAPTER 119

In an effort to encourage newer amateur radio operators to enter into the mainstream of HF amateur radio the Chapter 119 of the Quarter Century Wireless Association has introduced the Worked All 10 U.S. Call Areas Award. According to the announcement this award provides an achievement goal for the new operator, or any operator beginning to explore the HF bands.

Because new hams with entry level licenses have limited access to the amateur radio bands on 160 through 10 meters, the award is unique in that it contains provisions to permit HF operation under the guidance of a mentor, or Elmer, who can, if necessary, act as a control operator. The sponsors say that becoming involved in HF operations will assist the new amateur operator to gain operating skills and to earn higher classes of

license with his or her own increased operating privileges.

Full details and a sample of the award can be found on-line at the Chapter 119 web page.

Its in cyberspace at qcwa-ch119.org

MEDIA WATCH
www.wiaq.com/admin/uploads/weeklytally.rtf
www.cq-amateur-radio.com/WorldRadio.html

Just a reminder that news doesn't sleep and this WIA National News WILL

continue to be produced each and every week over the Festive Season.

Some re-broadcasters may take time off so if it the news does NOT appear on your favourite spot on the dial have a scan around or pick up the mp3 audio from wia.org.au

In VK2, VK2WI will be there with morning only sessions for the next three weeks at 10 am. The broadcast will start - as usual - with this VK1WIA National news followed at 10.30 with their local VK2WI News.

During this holiday period the local VK2WI news will include additional segments usually only heard in their evening sessions - being the full IPS report and DX news together with some technical stories from the files of the Kurrajong Radio Museum.

VK2WI transmits from 160 Metres to 20 Metres, then 10 Metres through to 23 centimetres so you should find a frequency that covers your area.

In addition - there are relays made through many repeaters in VK2.

The VK2WI evening session resumes on January the 17 th.

Seasons Greetings from the VK2WI News Team ......

Had a note in through the week from Winston in VK7 when he sent in his number of checkins to VK7RMD.
"VK7RMD Tuesday 9.00PM, good tropo opening across Bass Strait, 16 stations instead of usual 10 or 11".

OSCAR-11 makes another appearance

Clive G3CWV provided an update on the 25 year old Amateur Radio satellite OSCAR-11 (UO-11) to Southgate through the week.

He asks people to listen out for it on 145.826 MHz FM over the period December 22 - January 1

On the AMSAT Bulletin Board he writes:

Please send reception reports to xoxox@amsat.org (replace xoxox by g3cwv)

AMSAT-China say XW-1 has been launched

China's 1st-ever amateur radio satellite XW-1 is in space now!

AMSAT China reports it was launched at about around 0230 UTC on December 15, 2009. The beacon was received in Sanya after launch.

XW-1 was a secondary payload aboard a CZ-4C rocket launched into a sun-synchronous orbit about 1200 kilometres high.
The primary payload of this launch is the Yaogen-8 Remote Sensing Satellite.

Frequency Information

Mode V/U (J) FM Voice Repeater (30 dbm (1 w)):
Uplink: 145.8250 MHz FM, PL 67.0 Hz.
Downlink: 435.6750 MHz FM

Mode V/U (J) Linear Transponder (Inverting) (30 dbm (1 w)):
Uplink:145.9250 - 145.9750 MHz SSB/CW
Downlink:435.7650 - 435.7150 MHz SSB/CW

Mode V/U (J) PacSat BBS (30 dbm (1 w)):
Uplink:145.8250 MHz AFSK 1200 BPS
Downlink: 435.6750 MHz AFSK 1200 BPS

Mode Beacon (23 dbm (200mw)):

WW SPECIAL INTEREST GROUPS --- QRP

500kHz 1mW QRP gets to Norway

Roger G3XBM in Cambridge runs just 1 milliwatt ERP on 500 kHz using WSPR and his signal has now been received in Norway by LA9BEA, 836 km away.

On his blog Roger writes:

"Friday Night Dec 11 a couple of LA stations were listening on 500kHz WSPR. Neither had heard my 1mW QRP signal by 2300z, so I left the station running through the night.

At 0418z (Saturday Dec 12) LA9BEA heard my signal at -28dB S/N in JO29 square some 836kms to the north east of me. This is now my 8th country, and 49th station, to log me on the band".

On the GQRP list he comments:

I can't begin to explain how much fun this ultra-simple approach to 500kHz has been: simple, small, antenna + tiny ferrite rod ATU + a small and simple transverter.

If anyone's interested, there's a photo of the latest version of his QRP 500kHz transverter, with the schematic, on his website.

2493. SARL NEWS - SUNDAY 20 DECEMBER 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-19 20:00:12 UTC
From: website@sarl.org.za
Message-ID: <20091219200004.810A533CA5@panix2.panix.com>
Source record: 6107
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 20 DECEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

RADIO AMATEUR TO MANAGE THE HERMANUS MAGNETIC OBSERVATORY

LEARNERS AND TEACHERS INVITED TO "FLY A FILE" ON ARISSAT-1

OPPORTUNITY TO DO SPACE WEATHER RESEARCH AT SANAE

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

RADIO AMATEUR TO MANAGE THE HERMANUS MAGNETIC OBSERVATORY

Dr Lee-Anne McKinnell, ZS2LAW, has been appointed as acting Managing Director of the HMO during the absence of the current MD, Sandile Malinga who has been seconded to the Space Agency. Sandile Malinga was appointed by the Minister of Science and Technology to serve as caretaker Chief Executive Officer of the South African Space Agency for a period of 18 months from 1 January 2010.

Dr Lee-Anne McKinnell is well known for her participation in the SARL Radio Technology in Action programme where she has made many presentations over the past three years. Lee-Anne, despite her busy schedule will again be joining the RTA in 2010. Congratulations to both Lee-Anne and Sandile.

LEARNERS AND TEACHERS INVITED TO "FLY A FILE" ON ARISSAT-1

Learners and teachers are invited to have their work flown in space in a new satellite project called ARISSat which replaces the originally

SuitSat 2 project which was a disused spacesuit fitted with amateur radio equipment.

"The ARISSat-1 Team wishes to include a memory stick of files prepared by learners," explained Amateur Radio on the International Space Station (ARISS) International Chairman, Gaston Bertels, ON4WF. "This should be a .jpg or a PDF of things the student has prepared." He gave such examples as a paper or a study done on a STEM (science, technology, engineering, math) topic, a drawing of spacecraft or a schematic, a journal kept on a STEM topic, a story or news article about a STEM subject or a photo of the class doing a hands-on STEM activity. Having the students' work be a part of ARISSat-1 means the student is a part of the satellite project and along for the spacewalk and deployment of ARISSat-1."

"The quantity of files and the size of a file are unlimited, since memory sticks provide for a very large amount of file space." Bertels said that files must be either in .jpg or PDF format -- no Microsoft Word documents will be accepted. Files can be in any language, as long as an English translation is also included as a text file.

South African entries will be coordinated by SA AMSAT and also placed on a local website. Entries should reach youth@sarl.org.za by 28 February 2010.

IF SPACE WEATHER RESEARCH IS YOUR INTEREST, HERE IS A CHANCE OF A LIFE TIME

The Hermanus Magnetic Observatory in collaboration with several other research institutions and universities in South Africa, will be responsible for the execution of several experiments related to Polar Space Weather studies. The experiments will be conducted on board the SA Agulhas, at the South African National Antarctic Programme's (SANAP) base in Antarctica and on the South African Bases at Marion Island and Gough Island.

The HMO requires a suitably qualified (B.Eng, B.Tech or equivalent) Electronic Engineer with at least two years relevant experience or a M.Eng, MSc or M.Tech degree for a two and a half year contract appointment in the South African National Antarctic Expedition (SANAE 50) team to Antarctica for 2011. The minimum contract period will be from 1 May 2010 to 30 September 2012, but may commence sooner and extend later if necessary. The applicant will be trained at the HMO and may also be involved in short-term expeditions to Marion Island and Gough Island to set up instrumentation for the HMO during the training period at the HMO.

Applicants should complete the required HMO application form, submit a detailed CV together with the names and contact details of three referees, and covering letter summarizing the reasons for applying to The Antarctic Officer at info@hmo.ac.za to reach the HMO before 1 January 2010. For more information call 028 312 1196.

ARE YOU UNDER 18 AND LICENSED?

If you have a callsign and are under 18, share with us your experience what it is like as a radio amateur. Write a short story of how you became interested in amateur radio and how it is helping you in your schoolwork and everyday life. We will record the best stories for a new website dedicated to promote amateur radio to young people. There are big prizes to be won so get cracking. Email your story with your name, callsign and telephone number to youth@sarl.org.za.

CONTEST NEWS

The contest committee received 13 logs for the November leg of the SARL HF Field Day made up of 12 contest logs and a check log. The provisional results of are:

Field Stations

1st Jan Botha, ZS4JAN, 116 412 points; 2nd West Rand ARC, ZS6WR, 77 712 points; 3rd Boland ARC, ZS1TB, 71 504 points; 4th Highway ARC, ZS5HAM, 61 048 points; 5th Sandton ARC, ZS6STN, 31 120 points; 6th Pretoria ARC, ZS6PTA, 30 488 points; 7th Hibiscus Coast ARC, ZS5HAC, 24 072 points; 8th Zululand ARC, ZS5ZLB, 19 542 points; 9th Oakdale ARC, ZS1OAK, 16 632 points; 10th Bloemfontein RAC, ZS4BFN, 2 760 points.

General Stations

1st Pieter Jacobs, ZS6XT, 41 172 points; 2nd Theunis Potgieter, ZS2EC, 3 972 points.

Check log - Stephanus Blignault, ZS6XB.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. An impressive sunspot cluster made its appearance on Wednesday. The solar flux level reached a new high of 83 for the current solar cycle. From another source it was learnt that about two days ago sunspot 1 035 was as wide as seven planets Earth. The fast-growing active region burst into view on 14 December with a magnetic polarity that clearly identifies it as a member of new Solar Cycle 24. If the expansion continues apace, it could soon become the largest sunspot of the year. Check http://spaceweather.com for movies, photos and updates.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be moderate towards Europa. In the afternoons there are good possibility of contacts with the USA on 15 m. Contacts with New-Zeeland will be possible for a short while on 15 m during the mornings. Contacts with Australia will be possible on 20 m during the afternoons. During the afternoons and evenings 20 and 15 m contacts may be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the

shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here 20 m is also once again very useful for contacts over the longer distances, especially during the mornings. On Wednesday, when the new sunspot cluster made its appearance, propagation was experienced on frequencies as high as 15 m between Pretoria and Hermanus.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

1 January - Final date to apply to do polar weather research at SANAE for the HMO, obtain information from info@hmo.ac.za; 1 January - Straight key night on OSCARs; 15 to 17 January 2010 - the PEARS VHF/UHF Contest; 23 January - Home Construction course in Cape Town; 31 January - President's net at 19:30; 28 February - New closing date for the Sumbandilasat essay competition; 28 February - Final date for entries in the ARRISSSAT project to be submitted to youth@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

Thank you for listening, 73.

NZART Headquarters Infoline Issue 198
20-DECEMBER-2009
NZART Website: http://www.nzart.org.nz/

Greetings
The last Infoline for 2009. Some changes are to occur to the FMTAG procedure as noted below, a repeat of the ZL3 - Radio Buildathon information and the National System Award is what you have this time.

Remember also that the Jock White Field Day for 2010 is on in the last days of FEBRUARY-2010 with a new section that is to be tried, Dual Band Single Station section.

Welcome to Headquarters-Infoline a twice-monthly bulletin of news from NZART Headquarters e-mailed directly to Branches, the amateur radio packet Bulletin Board Service and to others that subscribe through the NZART Website at:
http://www.nzart.org.nz/lists/infolinelist.html

In This Issue
*Revised Frequency Management and Technical Advisory Group (FMTAG) Procedure
*NZART Branch 12 Presents The National System Award 2010
*ZL3 Radio Buildathon
*Contest News
==VHF/UHF/SHF Contest Notes
==HF Contests
*Upcoming Events
*Break-In and Infoline Information
*Dates for Official Broadcast (OB) and Head Quarter's Infoline
*Attachments for Branches: NZART Headquarters Infoline 198.doc and 20091220e-fmtag-coordination-procedure.pdf

****
Revised Frequency Management and Technical Advisory Group (FMTAG) Procedure
Currently, applications for repeater and beacon stations are required to be reported in Break-In before the application can proceed. Because Break-In is published every two months, this brings an excessive time delay into the procedure.

The revised procedure, shown below, removes the required Break-In publish requirement and the inbuilt delay. It has added that all NZART methods of communicating to members and others, are used to show current applications in progress. (NZART Web, HQ Infoline, Official Broadcast and , of course, Break-In)

****
NZART Branch 12 Presents The National System Award 2010
National System Award 2010 -Historic Places, is presented by The Hamilton Amateur Radio Club, Branch 12 NZART in association with the New Zealand Historic Places Trust. Based upon the original idea of the Wellington VHF Group. This is a FUN award available to all amateurs to demonstrate the coverage and use of the National System, to promote our history and category 1 Historic places.

Detailed documentation is available from:-
http://zl1ux.tripod.com/nsaward.htm

The award will run from 1 January 2010 to 7 February 2010.
****
ZL3 Radio Buildathon
The 3rd ZL3 Radio Buildathon will be held on Saturday January 30th in Christchurch and all radio amateurs from ZL3 District are invited to come along and build a ZL3 Pixie Twins kit. Youngsters and budding hams 8 - 80 are most welcome. There's a kit for them too!

After building your fun 80m QRP CW transceiver you can enter two competitions.

One is for the best DX CW contact within NZ using a ZL3 Pixie Twin.

The other is for the funniest housed unit. Let your imagination run wild!

A superb 40M QRP CW kit transceiver from www.smallwonderlabs.com USA will be awarded to each of the winners.

Please register your interest now as places must be limited.

Bring along your friends, members of clubs you belong to, and workmates. Here's a great way for them to find out about the fun you're having in amateur radio.

Email David at ZL3DWS@nzart.org.nz or call 03 358 2424

Visit http://sites.google.com/site/zl3buildathon/

HF Contests

2010 JOCK WHITE MEMORIAL FIELD DAY CONTEST
When:- Saturday, 27th February 2010 and Sunday 28th February 2010
Times :- Saturday 1500 NZDT until 2400 NZDT and
Sunday 0600 NZDT until 1500 NZDT
Updated Contest Rules and Other Operating Information will be available from the NZART Website prior to the commencement of the contest.
NZART Website http://www.nzart.org.nz/contests/rules.html

2010 ARRL INTERNATIONAL CW CONTEST
When : - Saturday, 20 February 2010 and Sunday, 21 February 2010
Times :- 0000 UTC (20th) until 2400 UTC (21st).
Bands :- All Bands
Mode:- CW Only
Contest Rules and Other Operating Information are available from the ARRL Website,
http://www/arrl.org
A good contest as is the later SSB Contest (March 6&7) to garner those missing US States for the elusive Worked All States award.

2010 ARRL INTERNATIONAL PHONE CONTEST
When :- Saturday, 6 March 2010 and Sunday, 7 March 2010
Times:- 0000 UTC (6th) until 2400 UTC (7th)
Bands :- All Bands
Mode :- Phone Only
For Contest Rules and other Operating Information please refer to the Contest
Website - http://www.arrl.org/contests

2010 RSBG COMMONWEALTH CONTEST (BERU)
When :- 13 & 14 March 2010
Times :- 1000 UTC (Sat.) until 1000 UTC (Sun.)
Bands :- All Bands
Mode :- CW Only
Considered to be one of the more gentlemany contests that has been in existence since the mid-1930's. Apart from the individual performances there is a Team's event, based on individual nation's participation. The NZART Team under the astute leadership of Frank Hunt, ZL2BR won this event in 2007 and finished third last year. Frank is looking for Team participants to make up the NZ Team. Interested - contact Frank by "snail mail" at :- 8 Manu Crescent, New Plymouth. 4310., or email :-
zl2br@ihug.co.nz
Contest Rules and other operating information is now available from the Contest
website :- http://www.beru.org.uk/

4A, MEXICO (Special Event). Members of the DXXE (Mexican Contest and DX group) will celebrate their 5th anniversary by using the special callsign 4A1DXXE between December 20-31st. Activity will be on 160-6 meters using CW, SSB, RTTY and PSK31. The following operators will be active from different locations: Ismael/XE1AY, Hugo/XE1CQ, Sergio/XE1CT, Alex/XE1EE, Tony/XE1GRR, Pepe/XE1J, Ramon/XE1KK (Co-leader), Masa/XE1MM, Carlos/XE1MW, Joaquin/XE1R (Co-leader & callsign trustee), Miguel/XE1YYD, Benjamin/XE2AU, Bernardo/XE2HWB, Hector/XE2K (Co-leader & schedule and log controls), Marco/XE2S, Jorge/XE2WWW, Zalo/XE3N and Daniel/XE3RR. The QSL Manager is Dick, N7RO. Don't send your QSL cards to the Mexican Bureau since they will not have QSLs to answer. Make sure your Bureau QSL card is clearly marked via N7RO. QSOs with this station are good for the DXXE Award. For more information, visit the DXXE Web page at: http://www.dxxe.org

4S7, SRI LANKA. Peter, DC0KK, is now active as 4S7KKG until January 7th, 2010. Activity will be on all HF bands using CW, SSB and the Digital modes (RTTY, PSK and WSJT). Over the past week most of his activity has been on 20 meters RTTY and PSK31. QSL via DC0KK, direct or by the Bureau.

5N, NIGERIA. Tony, LZ1JZ, wants to remind everyone that Nick, LZ1QK, has been active as 5N/LZ1QK since October 2008. During his stay, Nick has received/used four different callsigns from different locations (5N3LQK, 5N3WQK, 5N4LQK and 5N4WQK). Next year he will operate under the special callsign 5N50K to celebrate the 50th anniversary of independence of Nigeria. His QSL Manager is LZ1CL: Vassil Shatarov, P.O Box 185, Plovdiv 4000, BULGARIA. ADDED NOTE: Currently, QSLs for 5N/LZ1QK and his other operations are momentarily not accepted for DXCC credit because the DXCC Desk has not received documentations yet.

7TH IDXC ANNOUNCEMENT. The 7th International DX Convention organized by the Strange Radio Team (SRT) will be held April 17-18th, 2010. The City will be Paestum near Salerno (fantastic Archeological Area/tourist site) and the airport is Napoli Capodichino. Look for more details to become available soon at: http://www.strangeradioteam.com/idxc

9H, MALTA. Christian, EA3NT, is active as 9H3NT until December 23rd. Activity will be on 40ï¿½10 meters using CW and SSB. QSL via LoTW or by his home callsign direct or by the Bureau.

ANTARCTICA TOUR (VP8, VP8/G, VP8/H, VP8/O and KC4). Thaire, W2APF, will be traveling on board the ship "National Geographic Explorer" heading to the Antarctica region between February 8th and March 5th. He is expected to be operating under the following callsigns (specific dates were not provided):
W2APF/C6A/MM ï¿½ While on board the ship "National Geographic Explorer"; http://www.expeditions.com/Ship_Detail92.asp?Ship
W2APF/KC4 ï¿½ While in Antarctic territories
VP8DML ï¿½ While in the territory of the Falkland Islands (VP8) including South Shetlands Islands (VP8/H), South Orkneyï¿½
s
Islands (VP8/O) and South Georgia Islands.
QSL all activity via W2APF.

BIRD ACTIVITY (Many Grids To Be Activated!). Jim, ND9M/VQ9JC, plans to activate 85 grids in 8 states on AO-51 (he actually travels through 13 states) between January 21st and February 10th. Jim and his wife will be driving to the Denver area (DN70) where his step-son lives and Cheyenne (DN71) where is brother lives. The trip will start from Panama City, Florida, on/or around January 21st, where they will head to Memphis, TN, and Jim may possibly activate some grids. From Memphis they will head westbound through OK, then into KS and NE before hitting CO. Their around trip will take them through Big Bend National Park and Texas (hitting every grid in TX) and the Gulf Coast into Louisiana. Here is the list of grids to be activated from start to finish:

Depart Memphis westbound
along 35N latitude to 100W Turn north along OK/TX
longitude line (100W)
---------- ----------
EM44 / EM45 (AR) DM96 / EM06
EM34 / EM35 DM97 / EM07 (KS)
EM24 / EM25 (OK) DM98 / EM08
EM14 / EM15 DM99 / EM09 <----- May try to run a quad
EM04 / EM05 DN90 / EN00 <----- field/grid point
DM94 / DM95 (TX) DN91 / EN01 (NE)

Turn west along 41N latitude
to I-80 and head toward Try to run DN71 when in Cheyenne.
Longmont. ----------

DN81 DN80 DN70

Head south from Longmont toward Leave Big Bend and head for
Big Bend Nat'l Park Brownsville, TX
---------- ----------
DM79 / DM89 DM72 / DM82 DL99 / DM90
DM78 / DM88 DM71 / DM81 DL98 / EL08
DM77 / DM87 DM70 / DM80 EL07
DM76 / DM86 DL79 / DL89 EL06
DM75 / DM85 DL88 - Big Bend EL16
DM74 / DM84 EL15 (Brownsville)
DM73 / DM83

Resume northbound and northwest Turn east toward 96W east
toward 100W longitude of Dallas
---------- ----------
EL17 / EL18 DM91 / EM01 EM13 / EM23
EL09 / EL19 DM92 / EM02
EM00 / EM10 DM93 / EM03

Turn south along 96W and head Follow Gulf Coast into
toward Houston & the Gulf Coast Louisiana
---------- ----------
EM12 / EM22 EL29 EL39 / EM30
EM11 / EM21 EL28 EL31 / EL32
EM10 / EM20 EL33

Jim will return home via route of convenience.....
(ed. Whew! I sure hope I got it right for him....)

BLACK SEA CUP INTERNATIONAL 2010. The Black Sea Contest Club (BSCC) will sponsor the "Black Sea Cup International Contest 2010" which will be held between 1200z, February 6th and 1159z, February 7th. For more information on the contest, please visit the BSCC Web page at: http://bscc.in

CE0Z, JUAN FERNANDEZ ISLAND. Al, LA9SN, will be active as CE0Z/LA9SN from March 16-23rd (possibly to the 26th), 2010. Activity will be on 80-10 meters using mostly CW and 100 watts. QSL via his home callsign (may change). For updates, visit his Web page at: http://www.la9sn.com

CTU USA 2010. Tim Duffy, K3LR, Contest University Chairman, reports:
"I am pleased to announce that 'early bird' registration for Dayton ConTest University ('CTU') 2010 is now OPEN. This will be the only Contest University held in the USA during 2010. Our 4th year holding CTU in Dayton!
The CTU staff is working hard to prepare an interesting and informative curriculum for 2010. CTU USA will be held in Dayton, Ohio, on Thursday, May 13, 2010 (classes last all day). This is the day before the big 3 day Dayton event!
CTU USA 2010 will feature some of the best Radio Contest operators and station builders ('CTU Professors'). They will present state of the art contesting topics that will increase your contesting knowledge and fun.
Thanks to our flagship Sponsor -Icom America for their continued support of CTU USA 2010 and our contesting radio sport. Also thanks to CQ Magazine, DX Engineering, Superbertha, International Radio and Dave, W9ZRX, for their contributions that help make CTU a success.
For CTU USA 2010 details, registration and more information, go to:
http://www.contestuniversity.com
Please make sure that you click on the registration page and indicate if you are a returning CTU graduate or if this is your first time attending Dayton CTU.
Based upon the tremendous attendance at Dayton CTU 2009, I expect Dayton CTU 2010 student registration slots will fill up fast. Space is limited.
Contest University traveled to the United Kingdom and Italy during 2009. Both locations had tremendous response with hundreds of students. CTU will be held in England and Italy again during 2010. There will be announcements
next month of additional Europe Contest University locations.
http://www.contestuniversity.com/main/page_uk.html

http://contestuniversityitaly.wordpress.com/gallery-contest-university-ital
y-2009/
This is the only USA Contest University for 2010 - we hope to see you in Dayton! Thanks to Scott, KA9FOX and QTH.com for his hosting of the Contest University Web site! Merry Christmas and 73!"

CHINESE BIRD VERY ACTIVE (XW-1 Satellite News). The new Chinese satellite XW-1 (HOPE-1) was in the linear transponder mode over South and North America on December 20th, between 0222Z and 0246Z for the first time.

The passband was filled with stations over the U.S. with excellent signals. K8YSE reported making 13 contacts on this pass.
XW-1 is at an altitude of 1200KM, more than 400KM higher than the popular AO-51, SO-50 and AO-27 satellites. This means a longer visible pass and more distance. Contacts with Europe are possible with the eastern US.
XW-1 will be in the FM mode between 0153 and 0228Z, December 21st over South and North America for the first time. One watt of output power makes this satellite easier to hear, so many are expected to be making contacts on this pass. A recording of the SSB pass can be downloaded at:
http://www.papays.com/XW-1_20Dec2009_022218z.mp3
The FM pass will eventually be uploaded to the following file:
http://www.papays.com/XW-1_21Dec2009_020500z.mp3
Congratulations to the Chinese Team that designed, built and launched this satellite. Details can be found on the AMSAT Web site at:
http://www.amsat.org

CX, URUGUAY. Jorge, CX6VM, will be active during the CQ 160m CW Contest (January 29-31st, 2010) as a Single-Op entry. QSL via QRZ.com address.

DXCC NEWS (2009 DXCC Yearbook Final Reminder). Bill Moore, NC1L, ARRL Awards Branch Manager, reports: "Just a last-minute final reminder that if you have not made your 2009 submission, you must make a submission in order to appear in the next yearbook. The submission must be postmarked on or by December 31, 2009.
If you are current on the DXCC Honor Roll (minimum of 329 'current' DXCC entities) you will automatically be listed and you DO NOT need to make a submission. However, if you are not current on the Honor Roll you must make a submission in order to be listed.
Also, in order for an award to appear in the Annual List, first the award must be 'active' (Meaning you must have a certificate). Just qualifying for an award does not mean it will appear. Also, for an active award to appear your total on that category MUST increase by at least one point. (eg: If you had 300 in 2008 for 10 Meters and in 2009 your number remaining at 300, the 10 meter listing will not appear in the Annual List. But, if your number increased to, at least 301, then your active award will appear.
Also, only ARRL members (during the 2009 calendar year) receive the free copy. (The cost of the yearbook is to be determined soon).
The 2009 DXCC Yearbook will now be handled as an official ARRL publication that will no longer be handled by the DXCC Branch directly. Orders for the yearbook will now be available only via the ARRL catalog. (This will not affect those who qualify for the free copy).
Send questions to <dxcc@arrl.org> "

ER, MOLDOVA. Vladimir, RA4LW, will be active as ER4KAA during the CQ 160M CW Contest (January 29-31st, 2010) as a Single-Op/High-Power entry. QSL via his home callsign direct.

GS, SCOTLAND (Year Long Special Event - Yaesu Heritage Year 2010). Just a reminder and update to look for the special event callsign GS2MP (club callsign of the North of Scotland Contest Group - GM7V) during 2010. Operators Chris GM3WOJ/ZL1CT and Jim/GM0NAI will be operating their

vintage Yaesu transmitters/receivers and transceivers during the whole year. Each calendar month they will use a different Yaesu radio, and amateurs worldwide are invited to work GS2MP and earn points towards the "Yaesu Heritage Year Award". Operation will mostly be on 40 and 20 meters, SSB and CW, using classic radios like the FT-dx-100 (original), FT-200, FT-dx-401, etc. Yaesu (UK) Ltd are kindly sponsoring the event by supplying special QSL cards, small trophies and a special prize to the overall 'winner' of this year-long fun event. In January 2010, Chris, GM3WOJ, will start by using an FT-200 transceiver. For more details, please visit the following Web site for some photos of the vintage radios at: http://www.gm7v.com/yaesu2010.htm

HS8, THAILAND. Voravut, HS8JYX, from Paknum Muang Krabi, is planning to be in the CQ 160-Meter CW Contest (January 29-31st) as a Single-Op/Low-Power entry. QSL via HS8JYX, LoTW or eQSL. He states he will use an inverted L antenna and transmit the power limit at about 50 watts.

IOTA NEWS.....
AF-019. (REAL EARLY ANNOUNCEMENT) Operator Luigi, IK8HCG, will be active as IG9R from Lampedusa Island, African Italy, during the next CQWW DX SSB Contest (October 30-31st, 2010). QSL via IK8HCG.

EU-099. Operators Lieven/ON4PQ, Jo/ON5MF, Pat/ON7PQ, Geert/ON7USB and Tim/ON5HC will be active as MJ/OP9X/P from Les Minquiers Island between March 31st and April 7th, 2010. Activity will be on 80-10 meters, including 30/17/12 meters, using CW, SSB and the Digital modes. QSL via ON4PQ by the Bureau or direct only! No eQSL or LoTW. QSL direct with 2 green stamps and a SAE. Les Minquiers is an uninhabited rock formation midway between St. Malo, France and Jersey Island. For more details about the island, see the DXpedition's Web page at: http://www.eu099.be

NA-235. (New IOTA, Also Possibly NA-239) Operators Yuri/UA9OBA, Merle/N6PYN, Yuri/N3QQ and possibly one operator will be active as KL7RRC from Chirikof Island, possibly late July and early August. This will be a typical Russian Robinson Club operation for about one week, depending on the weather. The team is talking about chartering an airplane from Kodiak and possibly landing in one of the two lakes on the island. They state that there are no bears on the island, but there is a herd of about 700-800 wild cows. The team may use an electric fence for antennas/camp to protect them. A possible trip to Seal Islands (NA-239; Callsign will be N6PYN/KL7) may take place after the Chirikof operation is completed. No other details were provided.

J3, GRENADA. Ulf, DL5AXX, will be active as J38XX between February 10ï¿½24th, 2010. Activity will be focused on the lower bands, but also in the ARRL International DX CW Contest (February 20-21st) as a Single-Op/All-Band entry. QSL via his home callsign.

J8, ST. VINCENT (On 6m). Member of the Midwest 6 Meter DX Group will activate 6 meters from Bequia Island (NA-025) as J8/homecall between June 28th and July 5th, 2010. Operators mentioned are: David/W9DR and Mike/W8IF. QSL both callsigns via KB3RHR. Visit the Midwest 6 Meter DX Group's Web page at: http://www.6meterdxgroup.com/DXpedition_2010.html

KH6BZF PROPAGATION FORECAST/REPORT (For December 14-20th)....
Dec 21 AN SOLAR REFERENCE
Dec 22 AN ---------------
Dec 23 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 24 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Dec 25 AN LN - Low Normal
Dec 26 AN
Dec 27 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

KH9, WAKE ISLAND. Colin, WA2YUN, will once again be active as KH9/WA2YUN from Wake Island (OC-053, USI OI-012S, WLOTA LH-2293) for about one year while on work assignment. Activity will be limited to his spare time. QSL via K2PF.

OFFICERS FOR 2010. Members of the Carolina DX Association elected the following officers for 2010 at their annual meeting held on December 9th. Serving as 2010 Officers are:
President: Ted Goldthorpe, W4VHF
Vice President: Paul Ponak, AD4IE
Sec./Treasurer: Cliff Wagoner, W3ZL
Newsletter Editor: John Scott, K8YC
Contest Manager: Dick Williams, W3OA
Cluster Manager: Joe Simpkins, K4MD
Cluster Manager, North: Paul Sturpe, W3GQ
Webmaster: Wayne Setzer, WB4BXW
Visit the CDXA Web page at: http://www.cdxa.org

OH0, ALAND ISLAND. Operators Timo/OH6GLE, Juha/OH6XX and Kari/OH5TS will be active as OH0Z during the CQ 160-Meter CW Contest (January 29-31st) as a Multi-Op entry. QSL via W0MM.

PJ2, NETHERLANDS ANTILLES. Members of the Caribbean Contesting Consortium (CCC) will once again activate Signal Point Station on Curacao (SA-006, WLOTA LH-0942) as PJ2T during the CQWW DX 160m CW Contest (January 29-31st, 2010) as a Multi-Op entry. Operators will be Jeff/K8ND and Jim/W8WTS. QSL via LoTW or direct to N9AG.

PJ5, ST. MAARTEN/ST. EUSTATIUS (Update). Last week we mentioned that Jim, K1NA, will once again be active as PJ5NA. Activity will include the ARRL DX CW Contest (February 20-21st) as Single-Op/All-Band entry. This week Jim informed OPDX that he will be at PJ5NA between January 10th and March 27th, operating mostly WARC bands outside of the contests and 160/80/40m

during his night time hours. He also mentioned that he should have all of the antennas up by the 13th of January. "Nothing very big, CC-R7 for 40-10m, CCMAV-160 for 160m, dipole for 80m on 30 ft. mast and using an IC-706 with a AL-811," states Jim. QSL via K1NA (100% QSL direct only with SASE) No bureau cards will be answered. DX stations MUST have SASE or SAE with 1 USD. No IRC! USA stations SASE only.

QSL INFO AND NEWS.....
A71QND via A71CO. Special event station in Doha, Qatar, is to celebrate "Qatar National Day" (December 18th). Activity was between December 15ï¿½19th.

LOGS ONLINE. The Algarve STAR DX Team announced this past week that the following logs are available online at:
http://algarvedx.com/logonline
CT1CQK/p - Roxo Large Dam (November 20th)
CR5CQK - Igreja da Fuzeta; LH POR-074 and Fa-44
CR5CQK - Dunas de S.Jacinto Natural Park; DPRN FF-16, WFF CTFF-16
CQ1I - Berlenga Island (EU-040) 1997; PIP NT-029
CU3F - Terceira Island - AZORES
CQ0ODX - Mouchao da Lebre Island (TJ-013); Mouchao dos Caracois Island (TJ-014) and 50 MHz expedition to Serra de Montejunto.
Information about the Algarve STAR DX Team awards program is available at: http://algarvedx.com

NOT THE QSL MANAGER. Ken, WA8JOC, reports that he is not and never has been the QSL Manager for BV7FF.

PIRATE ALERT. Nenad, VE3EXY, reports that a station signing C31LJ/M between December 8-9th was a PIRATE. Peter was not in Andorra. He also mentioned that this was the second PIRATED C31LJ operation this year.

RARE 1AW QSL FOR SALE! There is a rare 1AW QSL for sale on eBay at:

http://cgi.ebay.com/Rare-Hiram-Percy-Maxim-1AW-November-11-1923-QSL-Card_W0QQitemZ400092442363QQcmdZViewItemQQptZLH_DefaultDomain_0?hash=item5d275e2efb
Best offer by December 27th or "Buy It Now" for 275.00 USDs.

QSLS VIA LoTW: AU8JCB, JT1CO, VU2NKS and XR0Y

QSLS RECEIVED VIA MAIL: 3D2GM, 5N0OCH, 9M6DXX/p, 9M6XRO/p, BD4QH, EE9K, FO/G3BJ, FO/F6CTL, FP/KV1J, FT5GA, IM0A, KH7XS, LA2NK, OJ0B, P29NI, T2G, T30GM, TY1MS, UU4JDD/p, UA9UZZ, V47NT, VP2MXO, VP2V/DL7VOG, VP2V/KG9N, XE2YBG, XV2Z, XV4D, ZB2EO, ZC4VJ and ZK2BJ

QSLS RECEIVED VIA THE BUREAU: 3B8MM, 3D2RX, 3XDQZ/P, 5H3AP/3, 5I3A, 5V7BR, 6V7E, 6V7M, 7P8AO, 8P9JG, 9J2FM, 9M2MRS, 9M4SMO, 9X/ON4WW, A62ER, A61NT, A43DLH, AH2J, AM8IL, AP2TN, B7HQ, C6ATA, C6AKU, D2NX, D44TT, D44TXO, DL5JS, DP1POL, EA1GA, EL2WW, ER7HQ, FK/G3TXF, FK8HC, FM5LD, HF15SZL, HS0ZDY, IK2WZM, J38AA, J5C, J88XF, KB1H, LY1CX, M8C, OH3GZ/P, P29NI, RK2FWA/P, S79NS, S79NS/P, T88IW, T88KJ, TL0R, TO4X, TO5RZ, TS7C,

TX7LX, UA4PWR, VK9AA, VK9LA, VK9N/G3TXF, VU4MY, VU4RG, VU7SJ, WZ3AR, XU7ACY, YJ0TXF, YK1BA, YS1G and YU8/OH2R

SILENT KEYS.....
* Arnold Polsbroek, PZ1AP, became a Silent Key (SK) on December 11th.

* Karlis Sleckaitis, YL2MD, became a Silent Key (SK) on December 12th. He was 57.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

SOUTHEAST ASIAN TOUR (HS and XU). Eddy, ON4AFU, plans to be in Thailand (HS) between January 12th and March 8th, 2010. His callsign will be HS0ZJF. During his stay, Eddy plans to activate the Malay Peninsula East Group (AS-101) during this time-frame as HS0ZJF/8. He will also make a trip to Cambodia between February 2-15th, 2010, and be active as XU7AFU. All his activities will be on all bands but CW only. QSL via his home callsign.

TK, CORSICA. Laurent, F8BBL, will once again be active from here next year between July 10ï¿½24th, 2010. However, he will be using a different callsign this time. His callsign will be TK10B. His main QTH will be Golfe de Valinco, but he plans to make side trips to Sanguinaires Island (EU-104), Lavezzi Island (EU-164) and possibly a third IOTA. QSL via F8BBL.

V88, BRUNEI DARUSSALAM. Jan, DL7JAN, will be active as V88/DL7JAN from Bandar Seri Begawan between February 22nd and March 3rd. Activity will be on 160-10 meters using CW, SSB and RTTY. QSL via DL7JAN, by the Bureau or direct.

VK6, AUSTRALIA. Jim, G6PAA, is now active as VK6/G6PAA from Western Australia (IOTA OC-001, WLOTA LH-1520) until January 13th, 2010. Activity will be 80-10 meters using CW, SSB, RTTY and PSK. Jim will use 100 watts into a dipole. QSL via his home callsign, direct or by the Bureau.

VP2M, MONTSERRAT (Update). Mike, W1USN, will once again be active as VP2MPR between February 28th and March 13th (2010). Mike will work mainly SSB and PSK31. Bob, AA1M, will also return to Montserrat and will operate mostly CW as VP2MPL between March 3-11th. QSL both operators via their home callsigns.

VP8, FALKLAND ISLANDS. Operators Michael/G7VJR and Martin/G3ZAY will be active from Falkland Islands (SA-002) as VP8DMN between January 21-29th, 2010. Activity will be focused on lower bands. QSL via G7VJR, by the RSGB Bureau or direct.

YJ, VANUATU (OC-035). Nao, JK1FNL, will be active as YJ0NA from Port Vila between December 28th and January 4th. Activity will be on 40ï¿½6 meters using 100 watts into wire antennas. QSL via his home callsign.

YN, NICARAGUA. Eric, K9GY, will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada, during the 2010 CQ WPX CW Contest

(May 29-30th) as a Single-Op/All-Band/Low-Power entry. He will be there between May 27-31st. Outside of the contest, look for CW activity on 30/17/12 meters. Also look for him on 6 meters. QSL via LoTW or to his home callsign, direct or by the bureau.

ZL, NEW ZEALAND. After his Australia trip, Jim, G6PAA, will head to New Zealand and be active as ZL/G6PAA between January 16th and March 1st, 2010. He will probably visit both the North Island (OC-036, WLOTA LH-0069) and South Island (OC-134, WLOTA LH-0342). Activity will be 80-10 meters using CW, SSB, RTTY and PSK. Jim will use 100 watts into a dipole. QSL via his home callsign, direct or by the Bureau.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 20th December 2009

****

Echo Ireland

Most members will have received the 36 page December issue of Echo Ireland by no
w. Among its many interesting articles is the story of John EI6IJ who has kindl
y donated his car to IRTS. The article goes on to detail the method by which th
e car will be sold and how the proceeds of the sale will be utilised.

Those interested in purchasing the car are reminded that in the first instance t
hey are required to forward an "Expression of Interest" to the Society's Treasur
er by December 28th at the latest. Those submitting an Expression of Interest a
re not in any way obliged to make a bid for the car but bids will only be accept
ed from those who have submitted an Expression of Interest.

Expressions of Interest should be made by post or email to the Society Treasurer
at QTHR or donelansean@gmail.com

****

80m Counties Contest

You are reminded that the IRTS 80m Counties Contest takes place on New Year's Da
y. Full rules are on the IRTS Website.

We are pleased to announce that the Shannon Basin Club has kindly donated perpet
ual trophies for the section winners in this contest. In addition the committee
at its latest meeting agreed to award a perpetual trophy to the leading 'Rookie'
operator in this contest. In this case a 'Rookie' operator is someone who has r
eceived his first license in the previous 12 months and is operating under his o
wn callsign and from his home station.

Please spread the word to the new comers and encourage them to participate in wh
at for many will be their first contest.

****

AREN

On December 9th Last AREN members participated in an exercise with Dunmore East
Coast Guard. AREN was able to provide communications into what is otherwise a co
mmunications black-spot and had members available for logistical support through
out the county, region and country.

Many thanks to those who participated have a good Christmas, and we look forward to meeting everyone early in 2010.

****

Galway VHF Group Amateur Radio Course

The Galway VHF Group will be running an ongoing course for the Radio Amateur's E xamination. Applicants may enter onto this course at any time. The course will c onsist of lectures with slides, handouts and a CD Rom for study at home. The per iod of study will be at your own pace with a view to sitting the examination at the earliest possible time.

Anyone wishing to participate in this course should contact Steve EI5DD at the f ollowing E-Mail address ei5dd.steve@gmail.com

C.A.R.A Visit to Hurdy Gurdy Radio Museum

The club would like to thank Tony, John and Gerry for a level of welcome that ro yalty could only expect. After this they were introduced to the teapot, grateful ly replenished with tea & coffee with buns and banter.
Meeting Tony, John and Gerry was good craic, eventually getting around to the to ur, which was conducted by Gerry with additional info added by Tony and John who managed to answer any question that were asked, no matter how bizarre.
With the Museum Tour finished, Tony informed the group it was time for the rooft op tour, up the narrow spiral staircase to the roof on what was a fresh day in H owth, nice antenna setup & amazing view, although starting to turn blue, now the group realised why Tony didnt come up, but sent poor John, hi hi.
After more refreshments and chat it was time to head home, with goodbyes said an d the Group stood outside for a few moments, puzzled by how so much fitted into such a small space.
A visit to the Museum is highly recommended, for the hospitality alone
C.A.R.A would like to thank Tony, Gerry & John for their hospitality and would a lso like to wish all a Happy XMas

****

Wicklow Town Club Formation

Iain EI5GN has received lots of interest in starting up a radio club in Wicklow Town. The first meeting is scheduled for January 13th at 20.00pm 2010. More deta ils will be available soon; Iain can be contacted at ei5gniain@gmail.com or at Q THR.

****

Chinese Satellite XW-1

China launched its first Amateur Radio Satellite on 15th December, five days ahe ad of schedule. The Satellite is called XW-1 (Hope One)
The XW-1 carries three Amateur Radio transponders for FM, AX.25 / Digital and SS B/CW initial tests appear to indicate they are all working.

The CW beacon can be heard on 435.790 +/- 9 kHz Doppler shift.
China is presently operating an all band special event station with the call sig
n BT3WX to celebrate their new Satellite, the QSL manager is BA1DU.

****

OSCAR-11 makes another appearance

Update on the 25 year old Amateur Radio satellite OSCAR-11 (UO-11).Having interm
ittent activity the system resets and it may be possible to Rx again over the ho
liday period.
After reset the activity seems to occur every 10-20 days so the next period of a
ctivity may be between December 22 and January 1

It may be possible to listen out for it on 145.826 MHz FM

****

DXpedition of the Year survey

The 'DX World of Ham Radio' web page is conducting an online survey to see which

Make the dipole 135 feet long. Feed in the center with the ladder
line -- each leg will be half of 135 feet.

Before you build the dipole, I recommend you get one of these:
http://www.palmettoantennas.com/wa1ffl-ladderloc-ladder-line-center-antenna-suppor1.html

The LadderLoc will ensure a good, solid connection between the ladder
line and the antenna wires.

This guy makes a very high-quality ladder line; his website has some
photos of installations:
http://www.trueladderline.com/

Here's a QST article. This guy used a 66-foot long dipole -- half of
the 1235 I recommend.
http://www.arrl.org/tis/info/pdf/9312070.pdf

Here's a good discussion of how to install the ladder line and bring
it into the house:
http://www.radiobanter.com/archive/index.php/t-139945.html

Check out this guy's photos, especially the one where he used a short
piece of PVC to space the ladder line away from a tower:
http://www.n4ekv.com/antennas.asp

DO NOT PUT A BALUN IN THE LINE.

Your tuner should have connectors at the rear where you tie the ladder line. These are connected to the 4:1 balun inside the tuner and that's all you need.

Some tuners have an internal jumper that needs to be removed for use with ladder line -- check the instruction manual.

2501. Amateur Radio Newsline(tm) Report 1689 - December 25 2009

Newsgroup: rec.radio.amateur.misc
Date: 2009-12-25 02:44:57 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <5.2.0.9.2.20091224172914.030c0008@popd.ix.netcom.com>

Amateur Radio Newsline report number 1689 with a release date of
Friday, December 25th 2009 to follow in 5-4-3-2-1.

The following is a Q-S-T. Congress may force the FCC to have engineers as advisors to the Commissioners, the Emergency Communications Enhancement act gets a nod from the U-S Senate, a power company is told to turn off part of its system due to alleged interference to aircraft, hams worldwide welcome the XW-1 ham-sat to the airwaves and a visit with an all grown up Veronica Harrington, KC6TQR. All this and more an our Christmas week Amateur Radio Newsline(tm) report number 1689 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: CONGRESS TO CONSIDER PUTTING STAFF ENGINEERS BACK AT FCC

Engineers may soon be advising FCC Commissioners if the United States Congress has its way. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

United States Senator Olympia Snowe, of Maine, has introduced a bill that would potentially add one electrical engineer or computer scientist to the staffs of each commissioner of the Federal Communications Commission. Known as S. 2881, the bi-partisan measure co-sponsored by Senator. Mark Warner of Virginia would create the new position of Staff Engineer and would require that the person have a degree in electrical engineering or be a computer scientist.

According to the Society of Broadcast Engineers, if eventually passed into law the new authorization would effectively undo a loosening of requirements for technical staff at the highest level of the FCC that began more than 25 years ago. SBE President Vinny Lopez said the bill will go a long way toward returning technical expertise to the FCC commissioners' offices.

This creation of the mandatory Staff Engineer would be an additional position. The bill does not seek to replace any of the current three authorized staff assistants in each commissioner's office. The Society of Broadcast Engineers says that it will seek to get a companion bill introduced in the House.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The previous attempt to add technical expertise to the FCC commissioner's offices took place way back in 1991. That's when Representative Don Ritter introduced HR. 3501, which would have required that at least one member of the commission be skilled in the engineering sciences. It went down to defeat. (RW)

**

RADIO LAW: AR EMCOMM ENHANCEMENT ACT GETS SENATE NOD

The Amateur Radio Emergency Communications Enhancement Act of 2009 has been passed the Senate by unanimous consent and now goes to the House of Representatives.

S 1755 was cosponsored by Senators Joe Lieberman of Connecticut and Susan Collins of Maine. The measure if passed and signed into law would direct the Department of Homeland Security to undertake a study on emergency communications and the role played by radio amateurs.

S 1755 points out that there is a strong Federal interest in the effective performance of Amateur Radio Service stations. As such that performance must be given support at all levels of government; and protection against unreasonable regulation and impediments.

More on this bill is on-line at the ARRL Website at www.arrl.org/news/stories/2009/12/15/11247/?nc=1 (ARRL)

**

RESCUE RADIO: VK HAMS COMMEMORATE RECOVERY FROM BRUSHFIRE

Australia's Yarra Valley Amateur Radio Group will be setting up a field station with the call VI3KIAH at Kinglake. This in commemoration of the work done by hams at the Black Saturday bush fires. Kinglake was one of the worst affected areas in the Australian 2009 fire season. Jim Linton VK3PC picks up the story from here:

--

This commemorative operation is using a callsign that has the suffix KIAH. Thats an Australian Aboriginal word meaning 'beautiful place' or 'from a beautiful place'.

The purpose of the amateur radio activity is to acknowledge the efforts of all who fought and were involved the Black Saturday fires on the 7th of February this year, and the services provided by radio amateurs.

VI3KIAH will be at the Frank Thompson Reserve Kinglake 2pm to 8pm local time on Sunday the 7th of February.

It's first 173 contacts will qualify for a "From the Black" QSL card the significance of 173 is that number of people died in the disaster.

On the day VI3KIAH will be operating both VHF and HF from the club's new emergency communications caravan that has replaced the vehicle destroyed by fire at Healesville.

The Yarra Valley Amateur Group invites those who were involved in the Black Saturday disaster and others to visit the station at Kinglake and to look for it on air.

Well done to the group for its planning of this respectful commemorative activity to occur on a day when all Victorians are asked to pause for a minute's silence for the first anniversary of the Black Saturday bushfire disaster.

For the Amateur Radio Newsline, I'm Jim Linton, VK3PC.

--

No doubt that the world of amateur radio will be listening on February 7th for the callsign VI3KIAH. (VK3PC)

**

RESTRUCTURING: CEPT SURVEYS MEMBERS ON UNIVERSAL LICENSE EXPANSION

Meantime, across the Atlantic pond the CEPT Electronic Communications Committee Working Group RA2, which deals with Radio Amateur issues, has published the results of a questionnaire. This, on the procedure for a country joining CEPT Recommendations.

The survey sought the views of CEPT member administrations on the appropriate procedure for a country to join in using these CEPT Recommendations in relation to an acceptable universal Amateur Radio license and on a harmonized or universally accepted Amateur Radio Examination Certificate. It also sought input on the need for public consultation in case of amendment of national information in the relevant annexes to these recommendations.

For those not aware, CEPT is an acronym that stands for the European Conference of Postal and Telecommunications. The actual name comes from the French pronunciation of the group which is the Confï¿½rence europï¿½enne des administrations des postes et des tï¿½lï¿½communications.

CEPT was established on June 26, 1959 as a coordinating body for European state telecommunications and postal organizations. The results of the survey are on line at www.ero.dk. (Southgate)

**

RADIO LAW: OFCOM GRANTS EXTENSION TO 500 kHz UK STA

United Kingdom hams involved in 500kHz experimentation have had their license Notices of Validity extended to 2012. This to permit the continued evaluation of that band.

On Wednesday December 16th, UK telecommunications regulator Ofcom announced that following requests made by the Radio Society of Great Britain, the period of validity for all 501 to 504 kHz Notices of Validity is to be extended. This, follows negotiations with the Maritime and Coastguard Agency which lead Ofcom to extending the validity period to February 29, 2012.

The Notices of Validity, which are the UK equivalent of the FCC's granting of a Special Temporary Authority, were originally planned to expire at the end of February 2010. (RSGB)

**

BREAK 1

This week coming to you from warm and sunny Auckland, New Zealand, where its mid-summer, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9DUP repeater serving DuPage Illinois.

(5 sec pause here)

**

THE BPL WAR: UK MAGAZINE VS. BPL/PLT

A United Kingdom consumer electronics magazine has taken on the Broadband over Powerline interference issue.

Author Mike Richards, G4WNC, visited the recent E-M-C U-K trade show and found that powerline telecommunications and the problems they are causing were the hot topics there. His report can be read on pages 32 through 35 of the January issue of Radio User magazine.

The article suggests that if readers think they are suffering from interference then they should complain to telecommunications regulator Ofcom. It also explains how to properly address the issue with Ofcom and refers readers to the United Kingdom radio interference website at www.ukqrm.org

(Radio User Magazine: http://www.radiouser.co.uk/) (GB2RS)

**

ENFORCEMENT: POWER COMPANY TOLD TO TURN OFF INTERFERENCE IN AIR BAND

Its not BPL this time, but Duke Energy, which is an electric utility serving North Carolina, has been ordered to cease operating a small portion of its power grid. This, because of its inability to remedy RFI on 111.7 MHz. that the FCC deems to be a hazard to flight safety. Frank Haas, KB4T has more in this report:

--

The story goes this way. In response to a complaint of interference, on November 25th an agent of the FCC's Norfolk Office inspected power line

facilities belonging to Duke Energy located near the Falls Lake Reservoir in Durham and Wake Counties, North Carolina. During the examination the agent observed the facilities radiating energy on frequencies including 111.7MHz. This FCC says this caused harmful interference to air navigation aids used by pilots flying into nearby Raleigh-Durham International airport.

Later the same day, the agent notified the call center for Duke Energy of the harmful interference and of the need to cease operations at the affected locations. The call center supervisor stated someone would contact the agent about the interference in a few days. So the FCC waited the few days but as of December 2nd Duke Energy has not contacted the FCC about the interference or notified it that operations had been turned off at the affected locality.

So on December 3rd the FCC got tough. It notified Duke Energy that operation of the power-line facilities was causing interference in violation of Section 15.5(b) of the Commission Rules. It directed Duke Energy to cease operations at the affected locations immediately and keep that part of the grid shut down until repairs had been made. It also told Duke that failure to comply could subject the company to additional enforcement action against it.

According to the regulatory agency violations of the Communications Act or the FCC Rules could subject the violator to substantial monetary forfeitures, or seizure of equipment. It could also lead to criminal sanctions, including imprisonment.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida, reporting.

--

At airtime its not yet known if Duke Energy has complied with the FCC directive to take down its power grid in the geographic area where the interference to aviation communications has been taking place. The complete text of the Official Citation is on line at http://www.fcc.gov/eb/FieldNotices/2003/DOC-295187A1.html (FCC, CGC)

**

RADIO LAW: LPFM EXPANSION GETS CONGRESSIONAL BOOST

A measure to permit the FCC to create more Low Power FM broadcast stations has begun its trek through the United States Congress. By a voice vote on December 18th the House of Representatives passed a bill to drop third-adjacent channel protections for most full-power FM broadcasters in order to fit more low-power FM's on the band.

House Commerce Committee Chairman Henry Waxman, of California says that HR 1147, the Local Community Radio Act, removes a statutory barrier to the creation of potentially thousands of new low power stations. The bill now moves to the Senate, where so far no action is yet scheduled.

(RW)

**

RADIO LAW: SENATOR FEINGOLD WANTS RADIO MARTI TO GO QRT

Senator Russ Feingold's "Spotlight on Spending" series has taken aim at Radio and TV Marti. Feingold, a member of the Senate Budget Committee calls Radio and TV Martï¿½ are a relic of Cold War attempts to broadcast radio and TV signals into Cuba that virtually no one tunes in to anymore.

According to Feingold, government studies show that Radio and TV Martï¿½ are riddled with problems, and fall short of journalistic standards. He also says that as the United States progresses toward a more modern and constructive relationship with Cuba, that Radio and TV Martï¿½ no longer have any real diplomatic or fiscal purpose.

Backing him up is a January 2009 report by the Government Accountability Office. It found that Radio and TV Martï¿½ broadcasts continue to face jamming by the Cuban government. According to the GAO, the best available research suggests that the audience for Radio and TV Martï¿½ is small, and its effectiveness uncertain. (Source: Media Network, Press Release by Senator Russ Feingold)

HAM RADIO JOB: ARRL NEEDS EMERGENCY PREPAREDNESS AND RESPONSE MANAGER

The ARRL is looking for an Emergency Preparedness and Response Manager. The Primary Objective of this headquarters staff position is to develop and maintain ARRL's emergency communications and emergency preparedness functions, both internally and externally. To apply, please e-mail your resume to Monique Levesque at ARRL headquarters at mlevesque (at) arrl (dot) org. (ARRL)

**

THE SOCIAL SCENE: DAYTON HAMVENTION TO STAY AT HARA THROUGH 2013

The Dayton Hamvention will be staying at its home at the Hara Arena at least another three years. According to planners the Hamvention Committee has inked a deal with the Hara covering 2011, 2012 and 2013 in addition to the one already in place for 2010. The planning committee has also reached an agreement with the close in Salem Mall for parking and with the local bus service for transportation to and from the mall parking site. Hamvention 2010 is slated for May 14th to the 16th which is less than 6 months away. (DARA)

**

NAMES IN THE NEWS: ZS2LAW TO MANAGE HERMANUS MAGNETIC OBSERVATORY

Some names in the news. Dr. Lee-Anne McKinnell, ZS2LAW, has been appointed as acting Managing Director of South Africa's Hermanus

Magnetic Observatory. This during the absence of Sandile Malinga who has been appointed by the Minister of Science and Technology to serve as caretaker Chief Executive Officer of the South African Space Agency for a period of 18 months beginning January 1st, 2010.

Dr. McKinnell is well known for her participation in the South African Radio League's Radio Technology in Action program where she has made many presentations over the past three years. Despite her busy schedule, will again be joining the program in 2010.

The Hermanus Magnetic Observatory is a South African research facility of the National Research Foundation which is an autonomous science council responsible for research and human resources development in South Africa More about it is on-line at /www.nrf.ac.za. (NZART)

**

NAMES IN THE NEWS: A MONEY HUNT BY AN HONORABLE HAM

And a ham radio operator working a tow vehicle driver is a big hero to one of his clientele. This as Craig Goldbeck, N9ETD, and his father Gerald recover missing money for a local business.

The two were calling on customers of their Goldbeck Towing business in Onalaska, Wisconsin, when they noticed something strange on Highway 16. That something was money.

According to the La Crosse Tribune, earlier in the day an employee of an area business had driven off with a bank bag containing $3,000 on the vehicle's hood. It broke free and scattered its contents across the landscape.

The men started picking up $20 bills, some of them in stacks of four or five. They then called police and an officer joined the money hunt. In all the trio recovered $2,860 that was returned to its rightful owner.

The Goldbecks' were rewarded for their honesty and sharp eyes. The business owner sent them a box of steaks. (lacrossetribune.com, KC9ECI)

**

BREAK 2

This is ham radio news for today's radio amateur. This week coming to you from Auckland, New Zealand where we celebrate Christmas on the beach, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

HAM RADIO IN SPACE: TERRESTRIAL AMATEURS WELCOME THE XW-1 HAMSAT

Amateur satellite operators worldwide have reported receiving strong signals on the telemetry beacon of China's XW-1 satellite that was launched on December 15th. The satellite is currently being commissioned but all three amateur radio modes, which include an VHF to UHF FM repeater, a VHF to UHF linear transponder and a crossband AFSK packet system have been tested and appear to be operating to their design specification. Also strong is its Morse beacon on 435.7900 MHz.

During the checkout Michael Chen, BD5RV/4 reported that he managed to operate the special event station BT3WX to work several E2, BY, VR2, XX9 stations throughout on an evening pass using the FM transponder. AFSK packet operations were active over Japan with JA0CAW receiving the downlink on 435.675 MHz at 1200bps. As to the linear transponder? It was also busy with JE1CVL, JH1EKH, BD4SY, JF2CTY, JH1BCL, JA5BLZ succeeded in a QSO over Japan.

The first activation of the XW-1 linear transponder over North America took place in the early hours of December 20th and Drew Glasbrenner, KO4MA, produced a spectragram of the event showing the 50 kHz passband full of SSB signals. KO4MA says that right after XW-1 came on he called CQ and was answered by K8YSE. After moving up in the passband he worked W4DFU at the University of Florida followed by HK4MKE in Columbia.

An XW-1 CW Telemetry Decoder by Mike Rupprecht, DK3WN, can be downloaded at www.dk3wn.info/software.shtml (ANS)

**
HAM RADIO IN SPACE: XW1 NOW HO-68

And this just in. AMSAT-NA OSCAR Number Coordinator Bill Tynan, W3XO, has informed Alan Kung, BA1DU, Amateur Satellite Project Manager and Chief Executive Officer of AMSAT-China that XW-1 is now designated as Hope OSCAR 68, or HO-68. More can be found on-line on the AMSAT-China web page at www.camsat.cn. (W3XO)

**

RADIO NEAR SPACE: UK BALLOON LAUNCH

Monday December 14th saw the launch of Pegasus High Altitude Balloon from Cambridge in the UK.

Because of restrictions imposed by the UK Amateur Radio license it was not possible to use an amateur transmitter on the balloon, so instead a GSM cell-phone was fitted along with a License Exempt 434.075 MHz 10 milliwatt transmitter running 50-baud RTTY.

While the GSM phone doesn't work above about 3000 feet it is extremely reliable once the payload has landed while the License Exempt transmitter allowed the payload to be tracked throughout the flight.

Further information on the project is at www.pegasushabproject.org.uk (Pegasus Project)

**

RADIO IN SPORTS: NEW RADIO TECHNIQUE AIDS TRAINING COMPETITION SKIIERS

Tiny radio transmitters on skis are helping competitive skiers analyze their technique. These units can be attached to an athlete's skis and transmit through small antennas located to the front and the back of the skis.

Receiving stations placed alongside a slope in regular intervals pick up the signals and analyze the time a signal needs to travel from the antenna to a station, thus accurately determining an antenna's position within three centimeters. A computer attached to the receiver calculates the position of the skis every millisecond and displays their exact path on a monitor.

The Austrian firm Abatec developed the system. It says that its adaptable to just about any sport that requires a close study of athlete performance and event timing. (Science OnLine)

**

DX SURVEY: CHOOSING THE TOP DXPEDITIONS OF 2009

The 'DX World of Ham Radio' web page is conducting a online survey to see which expedition warrants the title DXpedition of the Year 2009. Special engraved trophies will be shipped to the top three. To participate in the survey, go to http://dx-hamspirit.com. (Ham Spirit)

**

DX

In DX, word that UT6UE and UT6UF are on board a ship headed to the Ukrainian Antarctic Research Centre's Vernadsky Base. They have with them a Yaesu H-F transceiver, an antenna tuner and a folded dipole for 80, 40 and 20 meters. They hope to be active on 80, 40 and 20 meters between 2200 and 0100 UTC. They have already been reported on the Packet-Clusters signing UT6UE/MM. QSL as directed on the air.

W2CG will be active as either P40C or P40CG from Aruba from the 5th to the 26th of January 2010 primarily CW and RTTY on 80 through 6 metres. Listen out for him between 1200 to 1400 and 2000 to 2400 UTC. QSL via W2CG, direct or bureau.

The Hellenic Amateur Radio Association of Australia will be active as VI2BI from Broughton Island on February 5th, 6th and 7th. The team plans to operate CW, SSB and RTTY on 160 through 6 meters. QSL direct to VK2CL.

JQ1LCW is now active from Mauritania as 5T5YL. Recent reports say she has been heard on 17 meter SSB working mainly Europe and East Coast North American stations. QSL via JQ1LCW.

Lastly, VE6LB says via the Ohio Penn DX Newsletter that he will be active portable A6 from Dubai between January 8th and February 8th. His operation will be holiday style with low power using wire antennas

mainly on 40 through 15 meters CW. QSL direct via his home callsign or Logbook to the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: WHAT EVER HAPPENED TO VERONICA HARRINGTON, KC6TQR

And finally this week, a question. A rhetorical one that asks whatever happened to Veronica Harrington, KC6TQR? You know, the cute little 6 year old ham from Long Beach, California. The one who captivated the nation with her appearance demonstrating ham radio on the Late Night with David Letterman program back in March of 1992.

Well the truth be known, Veronica is still a ham but she is now all grown up, married and out in the business world. The Rain Report's Hap Holly, KC9RP, recently had a long chat with Veronica and she told him what has happened in her life over the past 17 years:

--

KC6TQR: "Throughout my life I have done a lot. When I was 8 I actually got my FCC Commercial License. When I was 11 I got my Parliamentarian License and I became an E.M.T. when I was 18 while out volunteering with the Sheriff's license out here in Los Angeles.

"Professionally I do investment banking.

"I like going to Disneyland.

"I really like exploring the area. I actually live in downtown Los Angeles and love all the old architecture down here. There are so many things to discover."

--

That's just a small sample of the Veronica Harrington Myers, KC6TQR, story. To hear more just tune into this weeks RAIN Report. You will find it on-line at www.therainreport.com or on your telephone at 773-358-7845. (RAIN)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, and the entire world-wide all volunteer Amateur Radio Newsline team wishing you a very Merry Christmas, a Happy New Year, 73 and we thank you for listening.

SARL NEWS - SUNDAY 27 DECEMBER 2009

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web-stream, visit www.sarl.org.za, click on ARMI and follow the links for details. PLEASE NOTE: for audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 28,325; 14,235; 10,130, 7,066 and 3,695 MHz SSB, as well as 52,750; 438,825 and 1 296 MHz FM in the Pretoria area. (Other newsreaders please change to suit.)

In the news today:

NO ICASA ACCOUNT TILL MID JANUARY 2010

SUMBANDILASAT AMATEUR PAYLOAD ACTIVE OVER THE HOLIDAY PERIOD

TAKE PART IN AN HF AUDIO ART EXPERIMENT

VOYAGER MAKES AN INTERSTELLAR DISCOVERY

You are listening to ZS6SRL. Stay tuned for more detail on these and other important and interesting news items.

NO ICASA ACCOUNT TILL MID JANUARY 2010

ICASA confirmed that renewals for licenses will only be mailed during the second week in January. Although accounts are payable before 31 January each year, ICASA said it will not take action until the end of February.

The fee for an amateur radio license for 2010 will remain at R27.

If you insist in paying the 2010 fee before receiving an invoice, please ensure that your callsign and license number is stated in the electronic or post office payment. Every year ICASA receives payments which cannot be allocated to the correct account as this vital information is not submitted with the payment.

SUMBANDILASAT AMATEUR PAYLOAD ACTIVE OVER THE HOLIDAY PERIOD

SumbandilaSat, SO67's amateur radio payload, will be available on many daylight passes over the next few days. Get all the details from www.amsatsa.org.za.

TAKE PART IN AN HF AUDIO ART EXPERIMENT

Kapwani Kiwanga, a Canadian artist who works primarily with sound and vision invites radio amateurs with good HF capabilities to take part in an audio art project on 20 metres.

Kapwani will transmit a message on 20 metres from Eindhoven, the Netherlands, to territories that have a historic link with Holland, namely: Surinam, Indonesia, and South Africa. Participants in these countries are asked to re-transmit the received message back to him in Eindhoven. Kapwani will transmit it back to and so on and so on. This ping-pong effect will increasingly distort the message finally resulting in an abstract artistic sound recording.

She has created an original sound piece based on archives of 1940's Dutch programming found at Radio Netherlands. Her sound creation will include some Morse code and sound recordings. It will not be "music" in the conventional sense. This message will not be political or offensive in nature. The duration will be approximately three minutes.

Kapwani would like to get started as soon as possible. If you would like to take part in the project, send Kapwani a mail to kiwangakap@hotmail.com or call her on 0031 617 638 920. Copy SARL News at armi@sarl.org.za, we would like to keep track of the experiment.

Kapwani recently was invited as an artist in residence at MU in Eindhoven.

VOYAGER MAKES AN INTERSTELLAR DISCOVERY

The solar system is passing through an interstellar cloud that physics says should not exist. In the 24 December issue of Nature, a team of scientists reveal how NASA's Voyager spacecraft have solved the mystery.

Using data from Voyager scientists have discovered a strong magnetic field just outside the solar system. This magnetic field holds the interstellar cloud together and solves the long-standing puzzle of how it can exist at all.

What are the implications? It could increase radiation and ultimately affect the weather on earth. The time frame is a few million years. Nothing we should concern ourselves about now. It however make interesting reading. Listen to the full story by Dr Tony Philips of Science at NASA on Amateur Radio Mirror International today. For times and frequencies visit www.sarl.org.za, click on publications and select ARMI.

CONTEST NEWS

The combined results for the February and November legs of the SARL HF Field Day have been published in HF Happenings 385 and are available on the SARL website. Here is a summary:

High Power 1st Pretoria ARC, ZS6PTA, 30 488 points, Multi-operator field station; 2nd Cape Town ARS, ZS1CT, 19 944 points, Multi-operator field station; 3rd Zululand ARC, ZS5ZLB, 19 542 points, Multi-operator field station.

Low Power 1st West Rand ARC, ZS6WR, 142 024 points, Multi-operator field station; 2nd Boland ARC, ZS1TB, 132 240 points, Multi-operator field station; 3rd Sandton ARC, ZS6STN, 75 952 points, Multi-operator field station.

QRP 1st Jan Botha, ZS4JAN, 208 812 points, Single operator field station; 2nd Pieter Jacobs, ZS6XT, 78 954 points, General station; 3rd Pierre van Deventer, ZS6BB, 38 052 points, Single operator field station.

Well done and congratulations to the winners.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is still at low levels. During the week there were two sunspot regions visible. On Tuesday sunspot 1 036 erupted, producing a solar flare that packed as much energy as a million megatons of TNT. The effective sunspot number is expected to be between ten and fifteen for the coming week. Overall conditions are on the rise.

20 and 15 m will provide the best opportunities for DX. Conditions to India will be good from the afternoons onwards. During the late afternoons and early evenings it will be moderate towards Europa. In the afternoons there are good possibilities for contacts with the USA on 15 m. Contacts with New-Zealand will be possible for a short periods on 15 m during the mornings. Contacts with Australia will be possible on 20 m during the afternoons. During the afternoons and evenings 20 and 15 m contacts may also be possible with Brazil.

Local conditions are going to be good on 40 m during the day time. 80 m may perform well during the early mornings and late afternoons over the shorter distances. 30 m will perform well over the longer distances during the middle of the day. With summer here 20 m is also once again very useful for contacts over the longer distances, especially during the mornings.

80 m is the frequency of choice in the evenings.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

1 January - Final date to apply to do polar weather research at SANAE for the HMO, obtain information from info@hmo.ac.za; 1 January - Straight key night on OSCARs; 15 to 17 January 2010 - the PEARS VHF/UHF

Contest; 23 January - Home Construction course in Cape Town; 31 January - President's net at 19:30; 28 February - New closing date for the Sumbandilasat essay competition; 28 February - Final date for entries in the ARRISSSAT project to be submitted to youth@sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items, if possible, in both English and Afrikaans only to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Mirror International every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria-area, with relays on 7 082, 7 205 and 17 860 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'ARMI' and follow the links. A repeat transmission can be heard on Mondays at 21:00 CAT on 3 215 kHz.

Sentech sponsors the ARMI transmissions on the non-amateur frequencies. You have listened to a bulletin of the South African Radio League, compiled by George, ZS6NE.

>From SARL News we wish you a prosperous 2010, may amateur radio grow from strength to strength.

Thank you for listening, 73.
/EX

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 27th December 2009

MI3FBW Silent Key

The family of Peter Coulter better known as MI3FBW has asked to inform all that Peter became a Silent Key while in the Northern Ireland Hospice on the 19th December 2009.

Yvonne Barnes, wife of Terry, GI3USS, passed away in mid-December after a long illness.

May they rest in peace

Kia Rio for sale

Time is running out for anybody who might be interested in buying the Kia Rio complete with Yaesu 857 and antennas. The last date for receipt of expressions of
interest is December 28th.

Anybody who is interested should email the Society's Treasurer on or before December 28th stating that they are interested. Expressing an interest does not commit to buying or bidding for the car but only those who express an interest will be allowed to submit a bid. Full details of the car and its history may be found on page 15 of the December issue of Echo Ireland.

The Treasurer's email address for expressions of Interest or for further information on the car is
donelansean /at/ gmail.com

80m Counties Contest

A reminder that the IRTS 80 metres counties contest takes place on Friday next, 1st January, from 14:00 to
17:00 UTC.

Full rules for this contest are available at www.irts.ie/rules Note in particular the frequencies for this contest: CW 3.510-3.560 MHz; SSB 3.600-3.650
and 3.700-3.775 MHz

We are pleased to announce that the Shannon Basin Club has kindly donated perpetual trophies for the section winners in this contest.

In addition the committee at its latest meeting agreed to award a perpetual trophy to the leading 'Rookie' operator in this contest. In this case a 'Rookie' operator is someone who has received his first license in the previous 12 months and is operating under his own callsign and from his home station.

Please spread the word to the new comers and encourage them to participate in what for many will be their first contest.

Wicklow Town Club first meeting

The first meeting is scheduled for January 13th at 19.30pm 2010 in The Glebe National School in Wicklow town. Directions if coming into Wicklow from the North ie Rathnew. After Lidl and Heatons take your first turn left then immediately right and go up the hill. At the crest of the hill the school is on the right hand side opposite the Church of Ireland.

Iians mobile is 086 8057242 if you need to call. All are welcome to attend.

Rallies Phoenix A.R.C

The Rally will be held as usual at Coolmine Community School near Blanchardstown on Sunday 14th February 2010.Doors open from 9am to2.30pm.

Usual traders will be present and to encourage a real Amateur Radio orientated Rally bring and buy tables will be free of charge.

For tables contact Tony at 087-2349997 or Tom at 01-8211043 This is the first rally of the New Year and usually a very enjoyable occasion. Refreshments and plenty of car parking are available.

Do you want your first CW QSO?

If you've always wanted to plug-in your morse key and have that first CW QSO,then Ian Keyser, G3ROO has an invitation for you.

Ian operates on 3564KHz (plus or minus QRM) at 1830 clock time and most nights you will find me there calling CQ QRS NET, he calls at 12 WPM but will come back at slower speeds if he receives slower. This could be the perfect first chance for 2010 to either dust off that key or get back into CW.

Two new sunspot groups for Christmas

It looks like we may be getting two new sunspot groups in time for Christmas, joining group 1035 to give three visible at the same time. With the increased sunspot count we should see improved propagation conditions on 21, 24 and 28 MHz more information available on

http://www.solarcycle24.com/

Mexican Special Event Station

Members of the DXXE (Mexican Contest and DX group) will celebrate their 5th anniversary by using the special callsign 4A1DXXE until December 31st.

Activity will be on 160-6 meters using CW, SSB, RTTY and PSK31. Make sure your Bureau QSL card
is clearly marked via N7RO.

AMSAT China XW-1 designated Hope OSCAR 68

The AMSAT OSCAR Number Coordinator has informed AMSAT-China that the XW-1 Satellite as mentioned in last weeks Bulletin is now designated as Hope OSCAR 68, or HO-68.

As XW in Chinese means 'hope', it had been requested that this word be used as the prefix for the new OSCAR number. Therefore, with the above information this latest amateur radio satellite is designated as Hope Oscar 68 or HO-68.

HO-68 is not fully commissioned yet and is still in its test phase with its transponders being switched on for use occasionally. More information is
available at www.camsat.cn

2009 DXCC Yearbook -

final reminder Stations that qualify must make a submission in order to appear in the next yearbook. The submission must be postmarked on or by December 31, 2009.

If you are current on the DXCC Honor Roll (minimum of 329 'current' DXCC entities) you will automatically be listed and you DO NOT need to make a submission. However, if you are not current on the Honor Roll you must make a submission in order tobe listed.

Any questions please send them to
dxcc /at/ arrl.org

Antarctica tour

Thaire, W2APF, will be traveling on board the ship 'National Geographic Explorer' heading to the Antarctica region between February 8th and March 5th. He is expected to be operating under the following callsigns

(specific dates were not provided):

W2APF/C6A/MM While on board the ship 'National
Geographic Explorer' - see:

W2APF/KC4 While in Antarctic territories

VP8DML While in the territory of the Falkland Islands (VP8) including
South Shetlands Islands (VP8/H), South Orkneys Islands (VP8/O) and
South Georgia Islands. QSL
all activity via W2APF.

This week in History

1900 Fessenden is claimed to be first to transmit sound of the human
voice without wires.

1906 Fessenden transmits voice and music on Alexanderson alternator.

1947 Transistor invented at Bell Telephone Labs. USA

Happy New Year

IRTS News Team would like to wish all our friends in Radio a happy and
Peaceful New Year for 2010.

Items for inclusion in next weeks Radio News should be forwarded to
Charlie EI8JB, preferably via e-mail to charlie dot carolan at gmail
dot com Or by phone to 087-6265418

News can also be submitted via e-mail to newsteam at irts dot ie for
automatic forwarding to both the radio and printed news services.

Please note that items for the radio news should reach the editor no
later than midday on Thursday in order to be guaranteed inclusion in
the
following Sundays bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 940
BID: $OPDX.940
December 28, 2009
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q, NG3K & ADXO, N4AA & QRZ DX, KH6BZF, N7OU, K8YSE, AT International, DL7MAE & The DX News Letter, DX World of Ham Radio Web Site, FO8RZ, I1HYW, I1JQJ/IK1ADH & 425 DX News, OZ6OM & 50 MHz DX News, PA7FM, Pete's-DX-Newsdesk, PT7WA, RA3CO, RSGB IOTA Web Site, VA3RJ & ICPO, VHF-DX-Portal (MMMonVHF), VK2IA and VU2PTT for the following DX information.

*** SPECIAL NOTE FROM EDITOR (Tedd, KB8NW): My family (wife/OPDX's chief proof-reader Linda, son Teddy [TJ] and his wife Jessi, daughter Katie and her husband Kevin), and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy New Year". Thanks to the many individuals who have provided DX information over the past year. Without them there would not be an OPDX Bulletin. Also, thanks to the individuals who sent holiday wishes to my family and me.....
73 and Have a Great/Safe/Healthy New Year de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 20th-December, through Sunday, 27th-December there were 213 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J5, J6, J7, JA, JT, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TL, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V5, V7, V8, VE, VK, VK9W, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4Z, ISRAEL. Alex, 4Z5KJ, will be active as 4Z5J during the CQ 160m CW Contest (January 29-31st, 2010) as a Single-Op entry. QSL via W0MM.

6W, SENEGAL (Early Announcement). Al, F5VHJ, will once again be active as 6W1RY during the CQ WW DX SSB Contest (October 30-31st, 2010) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ.

C6, BAHAMAS. Operators Dimtiri/RA3CO and Yuri/RL3FT will be active as C6AWL during the ARRL DX CW Contest (February 20-21st) as a Multi-Single entry. QSL via RX3RC. Dimtiri informs OPDX that he will arrive a few days before the contest and will be active on all bands CW, but prefers 30 and 17 meters.

CM2, CUBA. Frank, CM2IR, informs OPDX that he will once again be active between January 1-3rd, on 40 meters [CW around 7015 kHz and SSB around 7125 kHz], and also 15/12/10 meters SSB between 2200-0300z to bring in the New Year. Reference numbers are: CQ 8, ITU 11, IOTA NA-015 and GRID LOCATOR EL83TC. QSL via EB7DX, his QSL Manager, with 2 USDs or IRCs. Interests are: QRP CW, Europe, Islands, and Africa.

FO, FRENCH POLYNESIA. Phil, FO8RZ (F5PHW), continues to be active on the bands (especially topband). He has announced this past week that he will be very active on 160m during his sunrise (around 1500z; calling on 1831 kHz +/- QRM and listening on 1824 kHz +/- QRM) until December 30th. If he does not hear anything, he will then move onto 80m, then after to 30m. QSL via F8BPN, direct, by the bureau, LotW.

HH, HAITI. Pierre, HB9AMO, is now active as HH/HB9AMO from Haiti for about one month. Activity will be limited to his spare time. He will be using a TS-50 with 100 watts into wire antennas operating CW ONLY, mainly on 30-17 meters. His QSL Manager is PA7FM: Dennis Robbemond, Loggerhof 11, 3181 NS ROZENBURG, Netherlands. An online log will be available later, but a small Web site is up and running at: http://www.hhhb9amo.pa7fm.nl

HS, THAILAND. Joerg, DL1MJF, is expected to be active from here again as HS0ZGQ between December 30th and January 25th. Activity will be on 40-10 meters CW/SSB using a Kenwood TS-50 and a dipole antenna. Joerg will also once again stay for one week on the Island of Koh Samui (AS-101) and will operate as HS0ZGQ/2. QSL via DL1MJF.

IOTA NEWS.....
OC-211. (Update) Operators Wally/VK6YS, Nigel/VK6NI and Bruce/KD6WW plan to be active as VK6IOA from Houtman Abrolhos in the Wallabi Island Group between December 31st and January 4th, 2010. They will definitely have the three stations on simul-taneously. Operations should be on 40-15 meters. QSL via VK4AAR. Visit their Web site at: http://www.westozdx.net/IOTAS/OC211/OC211.html

SA-041. Members of the Araucaria DX Group and the ForDX group are
planning to activate the Island of Maiau (DFB MA-01) during
June of 2010. This is the same group of operators who activated
PW6C from Coroa Vermelha Island and Coroa Da Barra Island.
More details are forthcoming.

KH6BZF PROPAGATION FORECAST/REPORT (For December 28th-January 3rd)....
Dec 28 AN SOLAR REFERENCE
Dec 29 AN ---------------
Dec 30 AN AN - Above Normal/Geomagnetic Level is QUIET
Dec 31 AN HN - High Normal/Geomagnetic Level is UNSETTLED
Jan 01 AN LN - Low Normal
Jan 02 AN
Jan 03 AN GEOMAGNETIC REFERENCE

QUIET - The "A" index is expected to be between
0-7 and the "K" index will be 2 or less
UNSETTLED - The "A" index is expected to be between
7-16 and "K" index will be 3 or less

NEED TO KNOW A GRID SQUARE? The following Web pages may be of interest
for those who chase Grid Squares (Grid Locators) or for those who need
to know their Grid:
Enter your address (or callsign) at:
http://www.levinecentral.com/ham/grid_square.php

Zoom in to your QTH and click on it, and it will display
your grid at: http://f6fvy.free.fr/qthLocator/fullScreen.php

NH7, HAWAII. Al, NH7A, will be active during the CQWW WPX SSB Contest
(March 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via F5VHJ.

OG20, FINLAND (Special Event). Anne, OH2YL, will be active using the
special callsign OG20YL from Karjalohja between December 30th and Janaury
3rd (2010). Activity is to celebrate receiving her ham license 20 years
ago. Operations will be on the HF bands and CW. QSL via her home callsign.

PY0F, FERNANDO DE NORONHA. Fred, PY2XB, will once agin be active as
PY2XB/PY0F from Fernando de Noronha (SA-03) between January 23rd and
February 3rd, 2010. Activity will be on all HF bands using CW, SSB,
RTTY and PSK. His activities will include the CQ 160M CW Contest (January
29-31st), but he will sign as PQ0F. QSL via PT7WA. See photos from his
last operation at: http://www.py2yp.com/py2xb

QSL INFO AND NEWS.....................
AT1HQ ON LOTW. Prasad, VU2PTT, QSL Manager for AT1HQ, informs OPDX that
"the logs for Amateur Radio Society of India (ARSI) HQ station in IARU
Contest 2009 have just been uploaded to ARRL Logbook of The World. If
anyone has made multiple QSOs with this station, the Grid Locator for
each QSO may vary based on band and mode of QSO as we had stations in
different parts of the country for this HQ operation. The AT1HQ station
locations were at VU2BGS, VU2PAI, VU2PTT, VU2SWS, VU2TS and VU2UR. The
QSL cards, both direct and via bureau will take some more time and will

be notified shortly."

QSLS VIA LoTW: None reported this week!

QSLS RECEIVED VIA MAIL: 3D2MJ, 3D2NB, 4U1UN, 5X1NH, 7P8MM, 8R1PY, 9M6XRO, 9N7JO, A92GE, BA4TB, BY4USA, C37URE, EA9/OL8R, EU7SA, FG5FR, FO/G3BJ, FO5RH, FT5GA, G3SWH, G3TXF, HA0HW, JT1CO, K5D, KL7RRC/P, M0URX, NI5DX, P29NI, P49Y, PJ4A, SU8LH, SV1CQN, SY2A, T8CW, T88CW, TY1MS, TO4X, TO8YY, TX5SPA, TX5SPM, TZ6JA, V26B, VK9LA, VP2MNK, VP2V/DL7VOG, VP8YCE, XV4D, YJ0CCC, ZA0/IK7JWX, ZB2FK, ZD7X and ZK2BJ

QSLS RECEIVED VIA THE BUREAU: 6M0W, 9M2GCN, DL4JS/6W, EA7HW, ER1RR, ER3DX, FK8CP, FO/N6JA, GB25FC, GW4CC, JO7CVU, MJ/F5CWU, OH1OR, OH2DZ/p, PY2OMS, RW0LT, TM6BRE, VP2ERV, VU2SWS and WI8R

R1, ANTARCTIC. Alex, UA1PAW (ex-RZ1PWA and R1ANF), now operating as R1ANR from Novo Runway in Antarctica, is expected to be there until the end of February 2010. Gianni, I1HYW, who spoke with Alex states, "He (Alex) said propagation is only open around 2000z on 40m. While 10/15/20/30m are closed. He is running a Stepp-IR all band vertical antenna using a Yaesu MARK V RTX and PA ACOM 2000A. He also said that he is worried as DX bulletins are reporting incorrect info about his QSL Manager, so this is the QSL route: QSL Manager is Nick Shapkin, RK1PWA for the Russian and Ukrainian Hams. While for the other countries his QSL Manager is ZS1ANF: Oleg S. Sakharov, P.O. Box 15968, Vlaeberg RSA, Cape Town, Western Cape 8018, SOUTH AFRICA." For more info and photos, see his blog at: http://alex-v-shmarin.livejournal.com

VI2, AUSTRALIA (Special Event). Look for the special callsign, VI2AJ2010, to be used by Scouts under the guidance of Fishers Ghost Amateur Radio Club members (VK2FFG) at Cataract Scout Park, near Sydney, during the upcoming triennial Australian Scout Jamboree (AJ2010), to take place January 4-14th, 2010. With registrations of 10,000+ Scouts and 3000 Scout Leaders, VI2AJ2010 will be active on HF, VHF and node 6111 to promote their hobby. QSL via VK2FFG (bureau/direct).

VP9,BERMUDA. Kurt, W6PH, will be active as VP9/W6PH for the 2010 ARRL DX CW Contest (February 20-21st) and ARRL DX SSB Contest (March 6-7th) as a Single-Op/All-Band/Low-Power entry. QSL direct to his home callsign W6PH.

YI, IRAQ (Update). A group of operators called the "YI9PSE DXpedition team" are planning to operate from Kurdistan and be active between April 3-11th. The team will receive a ten day visa issued by the Government of Kurdistan. A band/mode survey is available on their Web site at: http://www.yi9pse.com/survey.html
Suggested frequencies are also published on their Web page and OPDX.937. The current updated YI9PSE Team consists of the following operators: Paul/N6PSE (Team Leader), Andreas/N6NU, Bob/N6OX, Bruce/W8HW, Garry/NI6T, David/AH6HY, Bill/N2WB, Al/K3VN, Jun/JH4RHF and Heathem/YI1UNH. Pilot stations are: Don/N1DG, Chuck/AA6G and Toshikazu/JA1ELY. The group is also looking for donations to help fund their DXpedition. Donations can

be made via PayPal or mail a check to: Kurdistan 2010 DXpedition,
3052 Wetmore Dr., San Jose, CA 95148, USA. Online logs will be available
during and after the DXpedition. QSL via N6NKT. For more details and
updates, visit: http://www.yi9pse.com

ZK3, TOKELAU (Also 5W). Look for operators Bill/N7OU and Bob/W7YAQ to
operate from the Tokelau Islands (OC-048) between February 17th and
March 10th, 2010. The exact dates of their operation may change because
the only access to the Tokelau Islands is by boat. Their activities
will include an entry in the ARRL International DX CW Contest (February
20-21st). Operations will be on 160-10 meters but mainly on CW, with
some SSB and RTTY, using 100 watts and vertical antennas. Also, look
for them to operate from Apia, Samoa (5W), before they sail to Tolelau
and after between February 10-16th and March 11-15th. All callsigns
are to be announced. QSL via their home callsigns.

New Year schedule for HO-68

ALL UP AND COMING IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF
AUSTRALIA FOR WEEK COMMENCING JAN 3 2010

WIA CENTENARY - MARCH AUGUST 2010

We start this weeks and this new years broadcast with a reminder that
this very special year w will be celebrating the centenary of organised
amateur radio in Australia.

The March through August celebrations are recognition of the foundation
of the WIA and the very start of organised amateur radio in Australia

during 1910.

Prior to the Wireless Telegraphy Act of 1905 there was no real regulatory control of the radio spectrum, although early demonstrations and experimentation began in Australia in the late 1890s.

At the time the government wanted to protect its revenue from the wired telegraph system and initially considered wireless telegraphy to be of little use, but it then became useful for ship to shore communications.

Private wireless experimenters were considered a hindrance to the emerging maritime use of wireless. Others began to recognise a greater potential use of the technology.

Conflict between the commercial and amateur use of the spectrum was evident, licensed operation began in 1905. Within five years experimenters needed to get organised for their very survival.

On 11 March, 1910 a meeting of like-minded people in the Hotel Australia, Martin Place, Sydney, formed the Institute of Wireless Telegraphy of Australia, soon after dropping the word 'telegraphy' from its name.

Chairman of the founding meeting, George Taylor, proposed "the formation of an institution amongst experimenters and enthusiasts in wireless for their mutual benefit."

As preperations get underway don't forget to drop the WIA Centenary Committee and this WIA National News Service details of YOUR celebration activities, such as the story we ran last week fronm the first planned in VK by Matthew Weatherley VK4TMW from the Toowoomba and Downs Wireless Group who has organised a display of up to 40 radio transmitters and receivers dating from the 1920s through to modern times.

The display will run from March until June!

VK7REC Snow Hill is OFF AIR indefinitely.
Joe VK7JG reports that the top section of the VK7REC tower has collapsed. This in part due to lack of maintenance, old age and several lightening strikes.
One aerial was on this section and the second aerial was damaged by the falling tower.

(73, Joe, VK7JG)

VK5ALE Lower Eyre Peninsula ARC Clubrooms Destroyed

Michael Carey VK5ZEA President Lower Eyre Peninsula ARC reported that their rooms were destroyrd when a bush fire threatened the outskirts of Port Lincoln during a Catastrophic Fire danger day.

Strong, hot North winds made fighting the fire impossible and a wind change made things a lot worse. 12 homes were lost, countless sheds and rural properties destroyed but thankfully no lives were lost but it was not a very merry Christmas for some families last year.

Their next meeting is Wednesday January 6th, they will then be discussing what direction what equipment needs might be.

Michael joins us "in person" on the audio section of this newscast.

(www.wiaq.com/ftp/wianews_64.mp3)

"Here is one story from the fire that promotes D-Star which I though I would share.

By the time I first noticed the fire while I was at work, the NextG phone service was fully congested, I was unable to make calls or send SMS messages. I did however have my IC-91AD handheld radio with me.

I was planning on connecting up to REF012 B to check in on the San Diego D-Star net at 1430 (my time). Instead I connected VK5REX B to REF003 C and put out an emergency call for assistance from anyone who had immediate access to a telephone.

Steve VK5ZSW replied and I passed my home phone number info to him so he could contact my wife to let her know that I was OK and that I was going to move to safer ground. The message was dutifully passed along and Steve confirmed that my wife got the message. Although Steve was some 170+ Km away in Moonta on the Yorke Peninsula, he was able to use the VK5REX repeater perfectly. Ross VK3HBS also heard my call through REF003 C and he too rang my wife with the message."

I'm Trevor Taege, VK4BAT with the news from the Gympie Communications & Electronics Group:

We were saddened to hear of the news about the bushfire destruction of the Lower Eyre Peninsula Amateur Radio Clubrooms. As we are still searching for a new clubroom that we can call "Home" we certainly feel for them and wish them well for a speedy rebuild.

The Gympie group is having a Christmas-New Year BBQ on Sunday the 10th of January. The location will be the duck ponds on the north side of town and the time, 11:30am. Mark January 10 in your diary and we'll see you there.

Everyone is welcome.

We wish you all a successful and prosperous 2010.

The next two Meetings of the NWT-ATV Group are BOTH scheduled for Saturday 6th. February.

The first of these will be the Annual General Meeting of the Club and as per the rules all 5 executive positions of the Club will be declared vacant at this meeting. Any financial members of the Club are entitled to nominate for any of the positions. If any member feels he/she would like to have a go at holding an executive position within the Club, here is your chance.

The second meeting will be the General Meeting of the Club and will take place immediately at the conclusion of the AGM.

Those who got a Wii for Christmas listen up!

NEW RADIO TECHNIQUE AIDS TRAINING COMPETITION SKIIERS

Tiny radio transmitters on skis are helping competitive skiers analyse their technique. These units can be attached to an athlete's skis and

transmit through small antennas located to the front and the back of the skis.

Receiving stations placed alongside a slope in regular intervals pick up the signals and analyse the time a signal needs to travel from the antenna to a station, thus accurately determining an antenna's position within three centimetres. A computer attached to the receiver calculates the position of the skis every millisecond and displays their exact path on a monitor.

The Austrian firm Abatec developed the system. It says that its adaptable to just about any sport that requires a close study of athlete performance and event timing.

And as they say... steer clear of the yellow snow!

TAKE PART IN AN HF AUDIO ART EXPERIMENT

Kapwani Kiwanga, a Canadian artist who works primarily with sound and vision invites radio amateurs with good HF capabilities to take part in an audio art project on 20 metres.

Kapwani will transmit a message on 20 metres from the Netherlands to territories that have a historic link with Holland,

Participants are asked to re-transmit the received message back to him and then you send it back and so on and so on. This ping-pong effect will increasingly distort the message finally resulting in an abstract artistic sound recording.

She has created an original sound piece based on archives of 1940's Dutch programming found at Radio Netherlands. Her sound creation will include some Morse code and sound recordings. It will not be "music" in the conventional

sense.

If you would like to take part in the project, send mail to kiwangakap@hotmail

Copy SARL News at armi@sarl.org.za, as they would like to keep track of the experiment.

NEWS FROM ARNEWSLINE

POWER COMPANY TOLD TO TURN OFF INTERFERENCE IN AIR BAND

Its not BPL this time, but Duke Energy, which is an electric utility serving North Carolina, has been ordered to cease operating a small portion of its power grid. This, because of its inability to remedy RFI on 111.7 MHz. that the FCC deems to be a hazard to flight safety. Frank Haas, KB4T has more in this report:

The story goes this way. In response to a complaint of interference, on November 25th an agent of the FCC's Norfolk Office inspected power line

facilities belonging to Duke Energy located near the Falls Lake Reservoir in Durham and Wake Counties, North Carolina. During the examination the agent observed the facilities radiating energy on frequencies including

111.7MHz. This FCC says this caused harmful interference to air navigation aids used by pilots flying into nearby Raleigh-Durham International airport.

Later the same day, the agent notified the call centre for Duke Energy of the harmful interference and of the need to cease operations at the affected locations. The call centre supervisor stated someone would contact the agent about the interference in a few days. So the FCC waited the few days but as of December 2nd Duke Energy has not contacted the FCC about the interference or notified it that operations had been turned off at the affected locality.

So on December 3rd the FCC got tough. It notified Duke Energy that operation of the power-line facilities was causing interference in violation of Section 15.5(b) of the Commission Rules. It directed Duke Energy to cease operations at the affected locations immediately and keep that part of the grid shut down until repairs had been made. It also told Duke that failure to comply could subject the company to additional enforcement action against it.

According to the regulatory agency violations of the Communications Act or the FCC Rules could subject the violator to substantial monetary forfeitures, or seizure of equipment. It could also lead to criminal sanctions, including imprisonment.

For the Amateur Radio Newsline, I'm Frank Haas, KB4T, in Holly Hill, Florida, reporting.

At airtime its not yet known if Duke Energy has complied with the FCC directive to take down its power grid in the geographic area where the interference to aviation communications has been taking place. The complete text of the Official Citation is on line at fcc.gov/eb/FieldNotices/2003/DOC-295187A1.html

OFCOM GRANTS EXTENSION TO 500 kHz UK STA

United Kingdom hams involved in 500kHz experimentation have had their license Notices of Validity extended to 2012. This to permit the continued evaluation of that band.

On Wednesday December 16th, UK telecommunications regulator Ofcom announced that following requests made by the Radio Society of Great Britain, the

period of validity for all 501 to 504 kHz Notices of Validity is to be extended. This, follows negotiations with the Maritime and Coastguard Agency which lead Ofcom to extending the validity period to February 29, 2012.

The Notices of Validity, which are the UK equivalent of the FCC's granting of a Special Temporary Authority, were originally planned to expire at the end of February 2010.

EPC WW DX Contest 2010

The European PSK Club has invited radio amateurs from all over the world to participate in the EPC WW DX Contest 2010.

The objective of the contest is to establish as many contacts as possible between radio amateurs around the world by using the BPSK125 mode.

Everybody can work everybody for QSO and multiplier credit.

Bands: We recommend the following frequencies -
80 meters (3.580 - 3.590 MHz),
40 meters (7.040 - 7.050 MHz),
20 meters (14.070 - 14.080 MHz),
15 meters (21.070 - 21.080 MHz), and
10 meters (28.070 - 28.080 MHz).

The contest will be held from 12:00 UTC on 27 Feb to 12:00 UTC on 28 Feb.

Rules, dates and all info in :

VI3KIAH acknowledging Black Saturday Bush Fires 2pm to 8pm local Feb 7 2010

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club Queensland.

One of the our club members , Kevin, VK4UH, will be joining a
VHF/UHF/Microwave DXpedition from the 3rd January -14th January 2010.
The expedition is to Norfolk Island and will be operating as VK9NA.
The expedition will be operating on the following bands:

6 METRES 100W with a 3 ELEM YAGI, 2 METRES 360W a 10 ELEM YAGI,
70 CM 110W with a 23 ELEM YAGI, 23 CM 90W and a 1.2 MTR DISH,
13 CM 20W with a 1.2 MTR DISH, 9 CM 20W and a 1.2 MTR DISH, 6 CM 15W and a
1.2 MTR DISH and 3 CM 5W with a 1.2 MTR DISH. The team will be using
Yaesu FT897D & FT817ND radios and will be using SSB, FSK441, JT65A, B&C & CW.

Kevin advised the Club at last Monday night's get together that all the
details of the expedition can be found on the net at VK9NA.com and day
to day details will be available on VKLOGGER. The team of Alan VK3XPD,
Michael VK3KH and Kevin VK4UH would appreciate you trying to reach them
and all are hoping for some good tropospheric ducting to occur, during the
time they are on Norfolk Island.

Need to know a grid square?

The Web pages you can find in the text version of this weeks news will be
of interest to we radio amateurs who chase Grid Squares or Grid Locators or
for those who need to know their Grid:

ï¿½ Enter your address (or callsign) at:
http://www.levinecentral.com/ham/grid_square.php

ï¿½ Zoom in to your QTH and click on it, and it will display
your grid at: http://f6fvy.free.fr/qthLocator/fullScreen.php

Relay station off the air

There has been a fire in the high voltage room of the external mains power supply at Radio Netherlands Worldwide's relay station in Madagascar.

Fire-fighters from the Madagascan capital Antananarivo managed to bring the blaze under control within hours.

The fire destroyed the high voltage circuit breaker equipment, broadcasts from Madagascar were suspended. Satellite and Internet broadcasts are not affected.

Some transmissions moved to other sites, but because of the Christmas holidays this took longer than usual to organise.

(http://mt-shortwave.blogspot.com/)

SENATOR FEINGOLD WANTS RADIO MARTI TO GO QRT

US Senator Russ Feingold's "Spotlight on Spending" series has taken aim at Radio and TV Marti. Feingold, a member of the Senate Budget Committee calls Radio and TV Martï¿½ are a relic of Cold War attempts to broadcast radio and TV signals into Cuba that virtually no one tunes in to anymore.

According to Feingold, government studies show that Radio and TV Martï¿½ are riddled with problems, and fall short of journalistic standards. He also says that as the United States progresses toward a more modern and constructive relationship with Cuba, that Radio and TV Martï¿½ no longer have any real diplomatic or fiscal purpose.

Backing him up is a January 2009 report by the Government Accountability Office. It found that Radio and TV Martï¿½ broadcasts continue to face

jamming by the Cuban government. According to the GAO, the best available research suggests that the audience for Radio and TV Martï¿½ is small, and its effectiveness uncertain.

(Media Network, Press Release by Senator Russ Feingold VIA arnewsline)

JAN 2010 vk4 17 Sunny Coast
FEB 2010 VK3 7 ARV (promoting Centre Vic Hamfest)
FEB 2010 vk2 21 CCARC (Promoting Wyong Field Day)

Radio and Electronics Association of Southern Tasmania

This story started with a phone message left by Janet who is Ian VK7IR's XYL. The message was a little concerning as it said Ian would not be able to do the VK7 broadcast as he was in hospital.

This left the broadcast coordinator and a number of other people a little concerned about Ian's welfare!

After a few days a wonderful email arrived from Ian with the following humours message-.

"Sorry about last week...things happened rather quickly!

My Master Oscillator was suffering some frequency instability, with consequent drop-outs at rare intervals, which would have been nasty under several circumstances.......

This has now been fixed by locking the MO to an implanted frequency standard, which is working well, and I shall be available as required from now on.

Cheers, 73, Ian"

I think we all wish Ian and Janet a very Happy New Year and look forward to hearing his voice for many years to come.

(73, Justin, VK7TW, VK7 Broadcast and News Coordinator)

Remembering the unit men - Ohm

Hello I'm Jim Linton VK3PC with the first in a series of brief looks at those who made discoveries and have their names as units of measurement.

Georg Simon Ohm was a remarkable individual born in 1789 and began school at the age of 11, gained his Ph. D with the career aim of becoming a professor.

Ohm was extremely interested in electricity and the then recently discovered phenomenon of electromagnetism.

That led him to begin experimenting, taking measurements and established a mathematical relationship - the very basis of what we know as Ohms Law.

Initially he suffered from those sceptical of his work but it did result in the post of professor of physics in Nuremburg and later at the Berlin university.

Some 37 years after his death, he gained the ultimate recognition when in Britain first, and then at the First International Electrical Congress in Paris 1881 the unit of resistance was named the Ohm.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

AMSAT-VK UNOFFICIAL HF Net.

April through October 1000 UTC 3.685 MHz
November through March 0900 UTC 7.068 MHz

New Year schedule for HO-68

Alan Kung, BA1DU, of AMSAT-China has provided this schedule for the
Amateur Radio satellite XIWANG-1 (HO-68) for the New Year holiday.

The schedule also shows the popular SSB linear transponder being switched on
New Year's Day at 21:05 and 22:50 UT.

The 50 kHz bandwidth linear transponder for SSB and CW operation is
inverting so an LSB signal on the uplink gives USB on the downlink.

It uses these frequencies:

Uplink :145.925 - 145.975 MHz
Downlink:435.765 - 435.715 MHz
Beacon :435.790 MHz

The FM transponder uplink is 145.825 MHz and downlink is 435.675 MHz, a
67.0 Hz CTCSS tone is required.

XIWANG-1 (HO-68) Real Time Tracking (tick draw footprint)

QNEWS BROADCAST JANUARY 03 2010

Welcome to QNews from VK4WIA. I'm Geoff Emery, VK4ZPP welcoming you to
the start of the centenary year of the Wireless Institute of Australia.

>From p.2 of the WIA 2010 Callbook, here is the Amateurs Code:-

The Radio Amateur is....

Considerate...never knowingly operates in such a way as to lessen the

pleasure of others.

Loyal... offers loyalty, encouragement and support to other amateurs,
local clubs, and the national organisation, through which
Amateur Radio is represented nationally and internationally.

Progressive...with knowledge abreast of science, a well built and efficient
station and operation above reproach.

Friendly... slow and patient operating when requested; friendly and
considerate advice to the beginner; kindly assistance,
cooperation and consideration for the interests of others.
These are the hallmarks of the amateur spirit.

Balanced... radio is an avocation, never interfering with the duties
owed to family, job, school or community.

Patriotic... station and skills are always ready for service to country
and community.

(Paul M Segal, W9EEA. 1928)

And so what was on your New Year's list of resolutions?

Has your club affiliated with the WIA and getting the benefits of cheaper insurance and club distribution of inwards QSL cards, etc? Are you a WIA member and getting all the benefits? Just think, if you purchase Amateur Radio magazine at the news agent you will be paying more than the annual subscription and AR gets delivered to your mail box when you are an Institute member.

Has your club got its booking to use the VK100WIA callsign?

Let's consider the Amateurs Code and make 2010 the "will do" not a "gunnado" year.

For QNews, I'm Geoff, VK4ZPP and that's what I think.

CLUBBING

cAIRNS

The Cairns Amateur Radio Club (inc) is holding a NEW YEAR BASH
at Brothers Football Club, corner Anderson & English street Cairns
starting 7PM on 12th January 2010 to celebrate a new.

Bring your partner and offspring to join us in a sumptuous buffet.

GYMPIE
www.gceginc.org.au
Trevor Taege, VK4BAT

I'm Trevor Taege, VK4BAT with the news from the Gympie Communications & Electronics Group:

We were saddened to hear of the news about the bushfire destruction of the Lower Eyre Peninsula Amateur Radio Clubrooms. As we are still searching for a new clubroom that we can call "Home" we certainly feel for them and wish them well for a speedy rebuild.

In relation to our own clubroom situation, our local State Member of Parliament David Gibson has written to QR asking for a resolution of our negotiations, so we're still progressing in the matter and are keen to see

it resolved in the near future.

A new weather page has been added to our Club website and the stats show that people are viewing the site from as far away as Russia. The new weather page will be especially interesting for distant IRLP users. Google Gympie Ham Radio to find our website.

The first Club meeting for 2010 will be held this Thursday night, January 7 at the usual location in the basement of Leading Edge Electronics - entry is via Reef Street.

The Gympie group is having a Christmas-New Year BBQ on Sunday the 10th of January. The location will be the duck ponds on the north side of town and the time, 11:30am. Mark January 10 in your diary and we'll see you there.

Everyone is welcome.

We wish you all a successful and prosperous 2010.

For Gympie Area News, I'm Trevor Taege, VK4BAT

Redcliffe and District Radio Club
www.redclifferadioclub.org.au/

Hi I am Ray VK4CF with news from Redcliffe Amateur Radio Club for QNEWS.

One of the our club members , Kevin, VK4UH, will be joining the VHF/UHF/Microwave DXpedition from the 3rd January -14th January 2010. The expedition is to Norfolk Island and will be operating as VK9NA. The expedition will be operating on the following bands:

6 METRES 100W with a 3 ELEM YAGI, 2 METRES 360W a 10 ELEM YAGI, 70 CM 110W with a 23 ELEM YAGI, 23 CM 90W and a 1.2 MTR DISH, 13 CM 20W with a 1.2 MTR DISH, 9 CM 20W and a 1.2 MTR DISH, 6 CM 15W and a 1.2 MTR DISH and 3 CM 5W with a 1.2 MTR DISH. The team will be using Yaesu FT897D & FT817ND radios and will be using SSB, FSK441, JT65A, B&C & CW.

Kevin advised the Club at last Monday night's get together that all the details of the expedition can be found on the net at VK9NA.com and day to day details will be available on VKLOGGER. The team of Alan VK3XPD, Michael VK3KH and Kevin VK4UH would appreciate you trying to reach them and all are hoping for some good tropospheric ducting to occur, during the time they are on Norfolk Island.

The club was advised that it has been successful in obtaining a grant in excess of $20,000 to upgrade not only the 2 and 70 repeaters and cavities but to also finalise the fit-out of the caravan so it can be deployed to assist in providing emergency communications in the event of a natural disaster.

The grant was developed by Peter, VK4EA, who did all the "leg work" in the development of the proposal, coordinating the quotes from over a dozen suppliers and putting the whole package together. Well Done Peter! With a few working bees early in the new year there is a better than 50% chance

that the caravan could be deployed during the John Moyle contest that is fast approaching.

Club President David, VK4DC, will be away taking his good lady on a trip to China and Hong Kong early in January and club secretary, Peter, VK4TAA, will be mobile in central Queensland for about 3 weeks during January. Peter will have his mobile rig in the vehicle and would be pleased to help anyone wishing to get their worked all Queensland award. Please listen out for Peter on or about 7070 most days from 7 January 2010.

The club will be open each Wednesday but with Charles, VK4BTC and Ken, VK4FKEN taking holidays in early February there may be some small changes to the opening times during the week. Stay tuned for details.

Well it is time to go for this week, so I hope the start to 2010 has been an easy one as the rest of the year for club members will be a very busy one. Until next time, I'm Ray from the Redcliffe club and you are listening to QNEWS from VK4WIA

GREETINGS!

THIS IS DON VK4FNQA, WITH NEWS FROM NORTH QUEENSLAND, IT IS NOW YEAR 2010 AND A NEW DECADE - GOODBYE NAUGHTIES AND HELLO TEENIES.

THE TOWNSVILLE IRLP NODE 6444 IS BACK UP AND OPERATING AFTER BEING OUT FOR A FEW DAYS. BY THE LOOKS OF THINGS, THE NODE WANTED TO HAVE CHRISTMAS OFF LIKE THE REST OF US ! LUCKILY THE FAULT WAS REPORTED BY TARCADIAN BOB VK4AAH, WHO IS CURRENTLY ON A ROUND AUSTRALIA TRIP AND IN THE VINCENT GULF AREA. TARC IRLP MASTER ROB VK4RB GAVE THINGS A KICK IN THE YOU KNOW WHERE AND NOW EVERYTHING WITH THE NODE IS OPERATING PROPERLY. THANKS BOB AND THANKS ROB !

REMEMBER LAST WEEK I MENTIONED THAT GAVIN VK4ZZ WAS AFTER OPERATORS FOR THE TERAHA ENDURANCE RIDE CLINIC THAT IS HAPPENING IN A COUPLE OF WEEKS ON SUNDAY 17TH JANUARY? THERE ARE ONLY FOUR OPERATORS ON THE LIST AT THE MOMENT AND MORE ARE NEEDED. PLEASE CONTACT GAVIN ON MOBILE 0427 182469 OR VIA THE CLUBS REPEATERS OR EVEN SEND HIM A MESSAGE IF YOU CAN HELP OUT.

LAST WEEK I ALSO MENTIONED THAT THE WIA IS SEEKING EXPRESSIONS OF INTEREST FROM OPERATORS WANTING TO BE PART OF THE NATIONALLY RECOGNISED WIA EMERGENCY COMMUNICATIONS ACCREDITATION FRAMEWORK. RESPONSE HAS BEEN POOR IN SOME AREAS SO AGAIN I ASK YOU TO GO TO THE WIA WEBSITE, SELECT THE MEMBERS TAB, CHOOSE THE EMERGENCY COMMUNICATIONS LINK THEN CLICK ON THE REGISTER YOUR INTEREST LINK FILL IN THE ONLINE FORM AS COMPLETELY AS YOU CAN. THE WIA WILL BE TAKING NOTE OF THE REGIONS THAT SHOW GOOD INTEREST AND DEPLOY TRAINING RESOURCES ACCORDINGLY.

HAPPY NEW YEAR TO ALL LISTENERS AND FAMILIES; WITH SPECIAL BEST
WISHES FOR A HEALTHY, HAPPY AND SAFE 2010 TO YOU ALL.

WELL THATS ALL FOR THE START OF THE NEW YEAR IN TROPICAL PARADISE...
THIS HAS BEEN DON VK4FNQA FOR THE TOWNSVILLE AMATEUR RADIO CLUB INC,
AND YOU HAVE BEEN LISTENING TO QNEWS FROM VK4WIA.

THE FINAL FINAL

Struth, dja see there's 30 Qu'nsland radio clubs listed in the callbook?

Blimey and we hardly hear from most of 'em on the news each S'ndee.

Yeah, you mean there's all those amateurs not doin' anything?

Well, must be they're doin' nothin, cos they don't tell the rest of us.

Reach out and share your world of amateur radio via QNEWS. It's so easy

to do!

Type out what you want to say, in the way you would listen to it, record
what you wrote in WAV or MP3 format and upload the audio and email the
script.

Now that wasn't hard, was it?

Let's hear from your club on QNEWS.
